"This enlarges the just opportunities of leadership and dignifies its efforts. Whatever tends to separate the activities of party management from the voters upon whom it relies necessarily weakens the party and deprives it of its proper capacity for effective work. It may be impossible to devise any plan which will at all times secure that active interest in party affairs which it is the duty of every member of the party to take, but provisions for participation should be so arranged as to encourage it and not repel it. There should be the same freedom within the party in the choice of candidates for office as there is in the choice of officers by the direct vote of the electorate at large.

"The present method of choosing candidates is inadequate. The voter feels that he has little or no influence in determining the result. He feels that candidates are selected for him and that the selection is not even made by those whom he chooses to perform his duty. Against this system he is in revolt. He is willing to abide by the decision of the majority, but he wishes the majority to decide. The movement in favor of direct nomination is acquiring, I believe, an irresistible momentum. It is instinct with the spirit of democracy. It is not revolutionary, but consistent with our theories of government. Party government is likewise based upon the free choice of party candidates.

"For this I stand, and because I believe that they are essential to secure such choice I am in favor of direct nominations by every party. * * * I regard this as one of the most important issues in this campaign."

At the beginning of the governor's second term in 1909 he again pointed out the urgent need for freeing party conventions from domination against the interest of the people:

"All that is worst in our public life finds its readiest means of access to power through the control of the nominating machinery of parties. Party organization needs constantly to defend itself from these encroachments. * * *

"The time has come, I believe, when nominations by all parties for elective offices should be made directly by the enrolled voters of the parties respectively. This will provote true party representation. It will tend to strengthen and dignify party leadership by making it less susceptible to misuse and more in accord with general party sentiment. By increasing the direct influence of the party voters their participation in party affairs will be encouraged. It will make the elective officer more independent of those who would control his action for their selfish advantage and enable him to appeal more directly to his constituency upon the basis of faithful service. It can not fail in the main to prove a strong barrier against the efforts of those who seek, by determining the selection of candidates, to pervert administration to the service of privilege or to secure immunity for law breaking. It is a reform which is instinct with the spirit of our institutions, and it is difficult to see how any party man, however earnest in his partisanship, can oppose the right of voters of the party really to decide who shall represent them as candidates."

Departs from permissive idea: The governor then indicated his conviction that the policy should be binding upon all parties:

"I therefore recommend a system of direct nominations by all parties for all elective offices, other than those of presidential electors, filled at the November election or at special elections called to fill vacancies in such offices. Heretofore I have suggested that it be made permissive, because it was believed that such a provision would rapidly lead to its general extension. But the objections urged to this course and the strength which the movement for direct nominations has gathered have produced the conviction that we should decide upon a policy binding upon all parties. In this State the way has been prepared for

this course by the method of party enrollment now in use in portions of the State and by our familiarity with provisions designed to prevent corrupt practices and frauds at elections."

From now on the merits and demerits of direct primaries were debated in the legislature, on the stump, and in the press. A legislative committee was appointed to investigate the workings of the system in the States where it was in operation. This committee reported adversely to the introduction of the system in New York State.

In his fourth message to the legislature, in 1910, the governor, in summing up the situation at considerable length, again emphasized the need of direct choice by the party voters.

Defeat of bills: During this session a number of primary-election bills were introduced. Preeminent among them was the Hinman-Green direct-primaries bill favored by Gov. Hughes. This bill was defeated in both houses.

The Meade-Phillips bill, which was passed by the legislature, was promptly vetoed by Gov. Hughes on the ground that it was not a grant but a denial of needed primary reform.

A compromise measure called the Cobb bill was then introduced. It provided for the direct nomination of assemblymen, senators, and Congressmen, for the direct election of party officials, for State-wide enrollment, State safeguarded primaries, and a proper official primary ballot.

This bill passed the senate, but was defeated in the assembly. While it did not go far enough to achieve the needed reforms, those who supported this bill believed that the first men elected under it would be of a different caliber from those holding office and that they would have carried out the reform that the Cobb bill would have begun.

Special session called: The legislature was then summoned to meet in special session to consider the Cobb bill, advocated by the governor as experimental.

Ex-President Roosevelt indorsed the Cobb bill in a letter dated June 29, 1910, addressed to Lloyd C. Griscom, chairman of the New York County Republican committee, in the following terms:

"It seems to me that the Cobb bill, with the amendments proposed by you, meets the needs of the situation. I believe the people demand it. I most earnestly hope that it will be enacted into law."

It was indorsed by a Republican ex-President, was recommended by a Republican governor, and was favored by a majority of the Republican legislature. It was beaten in the assembly, however, by a vote of 80 to 63. The senate then rejected the Cobb bill by a vote of 25 to 19, 26 being necessary to pass it.

Gov. Hughes was urged by some persons to call a second special session, but he decided that all had been done that could be done at that time and that the next action must lie in the direction of educating the voters to demand direct primaries in the fall conventions.

A so-called direct primary law has since then been placed upon the statute books of New York State to satisfy the demand which Gov. Hughes's campaign created. It is not a law based on the principles of primary reform urged by Gov. Hughes. But New York and many other States of the country are now endeavoring to work out an adequate direct primary system. The principles which they are working slowly toward are the principles of Hughes's direct primary campaign.

*V. Public officials.*

Gov. Hughes believed that a large part of an executive's efficiency lay in the quality of his appointments.

Throughout his administration the governor demanded honesty and efficiency in public service. High standards of administrative efficiency on the part of the individuals charged with carrying into effect the responsibilities of government were urged by him in his first inaugural address:

"We are a government of laws and not of men. We subordinate individual caprice to defined duty. The essentials of our liberty are expressed in constitutional enactments removed from the risk of temporary agitation. But the security of our Government, despite its constitutional guaranties, is found in the intelligence and public spirit of its citizens and in its ability to call to the work of administration men of single-minded devotion to the public interests, who make unselfish service to the State a point of knightly honor.

"If in administration we make the standard efficiency and not partisan advantage, if in executing the laws we deal impartially, if in making the laws there is fair and intelligent action with reference to each exigency, we shall disarm reckless and selfish agitators and take from the enemies of our peace their vantage ground of attack.

"It is my intention to employ my constitutional powers to this end."

In his second inaugural address in 1909 he again laid emphasis on the careful selection of public officials:

"What is most influential in securing due recognition of the dignity of office is proper care in the selection of officers. So far as we may be able to raise the standards of administration we may make easier the task of drawing to the public service men of high capacity and unselfish motive. Conspicuous examples of administrative efficiency, and the appropriate tributes won from a grateful people, will do more to secure disinterested men of talent for public office and to maintain high standards than either protests against the abuse of criticism or increase of pecuniary rewards."

REMOVALS FROM OFFICE.

The governor stood out flatly in favor of giving the executive the power of removal. He believed that the governor, being responsible to the people for the efficient administration of public office in the State, must have the power to remove all heads of departments and members of commissions, not merely in the case of proved dishonesty or flagrant graft, but also when the head or the commissioner was incompetent or inefficient.

The standards of public office which he set are well exemplified by his statement at the time he tried to remove from office the State superintendent of insurance whom he held to be proved incompetent for his office. He said:

"The removal should not be limited to acts which constitute a crime or involve moral turpitude. We do not want our offices conducted by men who simply keep within the penal code and do not outrage the moral sentiment of the community. We want efficient administrators, men who are not only honest but capable men who have a high standard of administrative duty, who do not proceed along the line of least resistance, but are intent on giving the service to which the public is entitled."

The standards here defined by Mr. Hughes mark a definite step forward in the efficient development of public administration in America, and their enforcement in the most populous and influential State has had a marked influence throughout the country.

The question of the governor's right to remove public officers was brought to a severe test in the case of the borough president of Manhattan, who was proved at a public hearing to be both negligent and involved in dubious financial transactions. This was the first occasion on which a governor had removed an elective officer, and the counsel for the defense maintained that the governor had no jurisdiction in the matter. Gov. Hughes, however, would not allow this technicality to operate so as to retain in public office an official whose incompetency had been publicly proved.

SALARY CLASSIFICATION.

As a means to administrative efficiency a board of control to investigate the matter of the classification and fixing of salaries in prisons, in charitable institutions, and in hospitals for the insane in order to obtain uniformity of administration and better service to the State was advocated by the governor in his annual message in 1908.

A bill providing for a salary classification commission was duly introduced and passed, but it was vetoed by the governor, as it did not give the commission power to fix salaries:

"This would devolve upon the legislature the burden of fixing by statute the entire salary list in the various State institutions. This is clearly objectionable. The legislature, of course, must make the necessary appropriations to pay salaries, and any board having control of the matter under proper statutes would be compelled to fix salaries so as to bring them within the gross amounts allowed. But it is much better to commit the fixing of the salary schedule in detail and the making of the necessary adjustments to secure reasonable harmony to a board of officers fairly representative and intimately acquainted with the needs of the institution than to make it necessary for the salary schedules to be acted on directly by the legislature.

"The course outlined in this bill I believe to be a serious mistake in policy, and I therefore disapprove it."

CIVIL SERVICE.

The legislature passed a bill in June, 1910, which entitled persons occupying classified civil-service positions which had been abolished to go on a preferred list for three years for reappointment to any similar position. On the ground of administrative efficiency again the governor vetoed the measure and sent the following memorandum to the legislature:

"While such a measure may be desirable from the standpoint of those in the employ of the State, I believe it to be opposed to the interest of the State as a whole. The period is too long. There is in effect a preferred list for three years, not simply for the department from which the employees have been dropped but with regard to 'any corresponding or similar position.' The requirements of justice to the employees whose services are dispensed with can be met by a more limited period. * * *

"Undoubtedly there will be hard cases, but the system should be adjusted to the average results of experience. Save in exceptional circumstances, the probability is that the least efficient will be retired as places become unnecessary, and that while a reasonable opportunity shall be afforded for reinstatement, the long period of life for the suspended list, the obligatory feature to which I have referred, and the necessity of drawing upon the list in all departments with respect to the same class or grade of work would be injurious to the public service."

The problem of administration as it concerns appointments was thus practically met by Gov. Hughes: By direct and persistent supervision of officeholders on the part of the responsible executive; by the removal of proved incompetents; by the recommendation of laws designed to insure administrative efficiency in the servants of the State; by the recommendation of such changes, additions, and appropriations as were necessary; where the means furnished to a department failed to secure, or were inadequate to insure, efficient administration, and by the veto of laws which, with this general object of securing administrative efficiency, yet failed in soundness of application and of detail.

*VI. Conservation.*

The conservation of the material resources of the State was advocated by Gov. Hughes throughout his administration. He outlined a forward-looking policy for State administration and control of the sources of industrial energy and public pleasure and welfare.

PURCHASE OF FOREST LANDS.

In 1907 over 46,000 acres of forest land were purchased or contracted for by the land purchasing board, making a total of over one and one-half million acres held by the State. The governor said in his message of 1908:

"It would be difficult to name any matter of greater importance to the people than the conservation of our forests. To this end the State should largely extend its purchases and so far as possible avoid the increased cost which will be entailed by delay. Any effort on behalf of private interests to invade the common right in these lands and their maintenance for the public benefit should be defeated."

Not only the extension of the State holdings but also suitable replanting was urged by the governor.

In his message to the legislature in 1910 the delay in putting into effect a thoroughgoing conservation policy, due to the smallness of the appropriations, was sharply criticized by Gov. Hughes, who believed that New York State, with its great wealth, should not unnecessarily delay in securing control of forest tracts the preservation of which was of vital importance to the continued prosperity of the State. He urged the legislature to adopt the only businesslike method of making purchases of tracts that had been decided upon as rapidly as possible without waiting for values to increase or until further depredations had lowered the value of the land, and pointed out that, as the outlay needed to purchase this land would really be a capital investment for the benefit of the people for all time and not in any sense for the ordinary expenses of the government, it would be eminently proper to pay for the land by creating a State debt to be repaid by long-term bonds with annual contributions to a sinking fund.

CONSERVATION OF LANDS.

New forest lands: In his message to the legislature in 1909 the governor urged upon the legislature the importance of conserving new forest lands:

"The conservation of our forests is so essential to the maintenance of our water supply and to the health and industrial activities of the people that the police powers of the State should be used to secure the proper regulation of forests held in private ownership, as, for example, by preventing the cutting of trees under suitable dimensions."

Park grounds: The governor's interest in conserving park grounds for the public in the development of Fire Island was indicated in his address on "Conservation" at the conference of governors in 1908:

"During the present year another addition has been made to the State reservations by provision for the retention and development as a public park of the property of Fire Island, on the Long Island coast, which was acquired some years ago for the purpose of temporary quar-

antine. In view of the growth of metropolitan population, the holding of this strip of seaboard for park purposes can not fail to be of great public benefit."

Fire protection: The governor was conscious of the need for protection of forests from fire, and in 1909 signed a bill providing such facilities, despite the objectionable features on other grounds as outlined in his memorandum of approval:

"It is unfortunate that this bill, having for its main object the making of suitable provisions to protect the forests from fire, should have been made the vehicle of special amendments with regard to fish and game. It was hoped that the careful revision of last year would end the practice of annual amendments for the purpose of making special exceptions with regard to this or that locality.

"The bill is also objectionable in its provisions exempting men employed for fire protection from the civil-service law. All exemptions that are justified can readily be had, and should be had, under the provisions of the general law.

"There are other provisions which may justly be criticized. But in view of the peril to which our forest possessions are constantly exposed and the importance of establishing a proper system to prevent loss by fire, it is advisable on the whole that the bill should become a law."

WATER POWER.

The regulation and development of the enormous water power of the State was frequently urged by Gov. Hughes. He called the attention of the people of the State to the enormous value of the State's water power and pointed out the opportunities for industrial development which were inherent in this power:

"It has been estimated by the water-supply commission that, excluding Niagara and the St. Lawrence, the rivers of the State, with the proper storage of their flood waters, are capable of furnishing at least 1,000,000 horsepower for industrial purposes; and it is deemed clear that 550,000 horsepower of energy is annually allowed to run to waste because no well-devised and comprehensive plant for the general and systematic development of water powers has been undertaken by the State. And the incidental additions which would accrue from the regulation of our streams and the prevention of drought and flood are sufficiently obvious.

"We now have within our grasp an opportunity which for the sake of the industrial freedom and prosperity of the future we should not permit to be wasted. These great natural sources of power should not only be developed in a manner which the State alone can make possible, but should be held for the benefit of the people under conditions which will insure the protection of the common right and fair return for privileges granted."

State water-supply commission (1907): At the conference of governors on conservation in 1908 Gov. Hughes summarized the results accomplished during the first year of his administration, quoting his annual message to the legislature of 1907:

"After referring to the legislation which has created a water-supply commission, charged with duties with regard to potable waters and river improvement, I added: 'It remains to be considered whether it is not advisable to provide a more comprehensive plan, embracing in a clearly defined way the matter of water storage and the use of watercourses for purposes of power. The entire question of the relation of the State to the water demands more careful attention than it has hitherto received, in order that there may be an adequate scheme of just regulation for the public benefit.'

"Pursuant to this recommendation, the legislature of 1907 directed the State water-supply commission 'to collect information relating to the water powers of the State and devise plans for the development of such water powers,' and appropriated $35,000 for the purpose. The act contemplated a thorough investigation and the submission of accurate information and comprehensive plans.

"The commission entered zealously upon its work and procured competent expert assistance. In February last it made a valuable preliminary report."

Compensation for water-power privileges: The governor opposed the grant of water-power privileges without compensation and without restrictions which would protect the right of the public from whom those privileges are derived. In the same address he pointed out that the State in the previous year had established a precedent of requiring proper compensation for grants of power privileges in public waters:

"Water-power privileges have been granted in the past without any provision for a payment to the State in return for what the State gives. These grants have frequently been made without proper reservations or conditions and without anything constituting a suitable consideration. They have amounted simply to donations of public rights for private benefit. It does not fetter individual enterprise to insist upon protection of the common interest and due payment for what is obtained from the public. Last year, on the grant of a franchise to a development company which was to develop power from the St. Lawrence River, it was insisted that provision should be made for compensation for the privilege upon a sliding scale, according to the power developed. And thus it was established that hereafter in the State of New York public privileges, on terms of justice to the investors and the public alike, must be paid for."

Principles in water-power development: In his message to the legislature in 1910, the governor enumerated the provisions which a proper water-power bill should contain:

"(1) That the flow of water in our rivers should be regulated and our water powers developed to the fullest extent that may be practicable.

"This is essential to prevent unnecessary damage from floods and to insure our industrial progress and the future prosperity of our people.

"(2) That with respect to streams having their headwaters within the boundaries of the forest parks, all plans of regulation or power development should be executed only by the State, and all reservoirs and their appurtenances and the impounded waters should be the property of the State and under exclusive State control, and not be permitted to pass into private hands.

"Any such plan should embrace all necessary safeguards to insure the proper protection of the forests.

"(3) That with respect to any other streams flowing through any other public park or reservation of the State, such plans should likewise be executed by the State and it should retain exclusive ownership and control in order adequately to safeguard the State's interests.

"(4) That further, as it is of great public importance that the water powers of the State should be developed in a comprehensive manner and that these natural sources of industrial energy should not become the subject of an injurious private control, such development should be undertaken by the State whenever such action appears to be feasible and for the general interest.

"(5) That in any case of State development of water power, provision should be made for the granting of such rights as may be proper to use the power so developed upon equitable terms and conditions.

"(6) That the State should not undertake any plan of regulation or water-power development save upon a basis which would make its investment a fair and reasonable one from the public standpoint by virtue of practicable measures for insuring such a return upon the State's outlay as would be equitable in the particular circumstances.

"(7) That an amendment of the constitution at this time for the purpose of permitting any portion of the forest preserve to be used for any such purpose should, by its terms, or by appropriate reference, suitably define the property within the preserve which is to be used and the manner of its use. No amendment and no plan of development should meet with any favor which, after the most rigid scrutiny, does not afford absolute assurance that in no way will the public interest in the forests be parted with or jeopardized."

Vetoes measures to promote private profit: The governor met each legislative effort to promote private profit at the expense of the State by vetoing such bills passed by the legislature, as in the case of assembly bill 2382, June 25, 1910:

"It does not afford a suitable scheme for the protection of the State, and it should not become a law.

"It is to be regretted that a comprehensive measure for water-power development, with the necessary details for the execution of a proper plan, has not been provided."

The same attitude was shown in the governor's veto of an addition to the river improvement act (June 25, 1910), in which he said:

"It is apparent, for reasons which I have repeatedly stated in my messages to the legislature, that there is need for appropriate legislation to secure the advantages which would flow from water-power development, not limited to mere considerations of public health and safety. We should have a comprehensive scheme so that the sources of industrial power in this State may be properly availed of; and that we may have that extension of industry under conditions safeguarding the public interest which will greatly promote the common prosperity. * * *

"I have been very desirous that there should be a proper plan by which our water powers can be developed on a basis fair to all; but the details of such a plan need to be worked out carefully, and I do not believe this can be done by a mere addition to the river improvement act."

That the State alone should carry out any plan for the regulation of water power having its rise within the boundaries of the forest parks also was urged by Gov. Hughes. He believed that all reservoirs with their appurtenances should be the property of the State and under exclusive State control, and should not be permitted to pass into private hands, and that plans for the regulation or development of any other stream flowing through any public work or reservation of the State should also be exclusively under State control.

PRESERVATION OF SARATOGA SPRINGS.

Private interests and competitive measures having threatened the destruction of the mineral springs at Saratoga Springs, the legislature in 1909 passed a bill providing for the purchase of the springs by the State and the establishment of a State reservation. Gov. Hughes approved the bill.

Gov. Hughes's conservation policy shows an industrial outlook of unusual breadth. It defines the proper use of great natural resources for the greatest good to the State and its citizens. It guards against ruthless destroyers on the one hand and selfish interests on the other. It offers a practical administrative plan for one of the most difficult and least-regarded problems of American States.

*VII. Labor.*

One-third of the labor laws ever passed in the State of New York since its foundation—133 years—were passed during Gov. Hughes's administration, and at his instance. These cover the field of labor legislation from workmen's compensation to child labor.

The results accomplished during Gov. Hughes's first term were outlined briefly in his speech upon the occasion of his renomination:

"The labor department has been made more effective. Additional inspectors have been provided. The bureau of mercantile inspection has been created and inspection of the establishments subject thereto has been removed from the overburdened health officers of cities of the first class and placed with the State department. The head of the department, himself a labor man who won his promotion by his proved capacity, has made a commendable record in the enforcement of the law.

"The child-labor laws have been made more stringent.

"Improved provision has been made with regard to ventilation of factories and for suitable washrooms; protection has been provided for those employed in the construction of tunnels and for proper report of accidents.

"The limitation of the hours of labor of employees on street surface railroads has been extended to all cities of the second class. The employment of railroad employees, except in specified cases of casualties or unexpected delays of trains for more than 16 consecutive hours, has been prohibited and provision has been made to enforce periods of rest. An eight-hour day has been provided for railroad, telegraph, and telephone operators.

"It has been required that the employees of steam surface railways shall receive their wages semimonthly instead of monthly as heretofore, thus aiding thrift and protecting them from the exactions to which they have been exposed. And the law as to cash payment of wages has been amended so as to include companies engaged in harvesting and storing ice."

REORGANIZATION OF DEPARTMENT OF LABOR.

A law which went into effect June 15, 1907, completely reorganized the department of labor and provided for an enlarged staff to enforce the law. In the words of the commissioner of labor: "It was the most intelligent and generous treatment the department has received from the legislature for many years."

Gov. Hughes, in his first message to the legislature, set forth specifically his reasons for this law:

"The labor department should be put on a better footing. Prior to 1901 the bureaus or departments of labor statistics, factory inspection, and mediation and arbitration were separately organized. In that year they were consolidated into the present department of labor, but this was accomplished without a suitable revision of the law, and some confusion has resulted. Not only should the law be carefully revised, but provision should promptly be made to increase the efficiency of the department by thoroughly equipping it for its work. It serves no useful purpose to increase the duties of a department without supplying the means by which they may be discharged. And it is of vital importance to the interests of the wage earners throughout the

State that the provisions of the labor law should be strictly enforced.

"* * * Whatever increase is necessary to secure the enforcement of the important provisions of the statutes regulating the conditions of labor should be supplied without delay. To attain proper efficiency the work should be specialized and positions and salaries should be graded."

PROTECTION OF CHILD LABOR.

In his message to the legislature in 1907 Gov. Hughes urged definite and specific legislation for the protection of children:

"I recommend to your careful consideration the important subject of child labor. Laws for the protection of children, in securing to them their right to an elementary education and in surrounding them with appropriate safeguards, make a special appeal to humane sentiment, and nothing should be left undone to give them full effect.

"Children under 16 should have an eight-hour day. Such a provision will not only furnish protection from excessive strain, but will also aid the administrative officers in their enforcement of the law.

"I also recommend that in order to protect children from dangerous employments there should be a more precise prohibition specifying the occupations in which children under 16 shall not be employed. General prohibitions as to such matters are apt to be found inoperative. It is fair to all concerned and essential to the protection of children that the law be made as specific as possible."

Legislation: Two laws, as outlined by the governor, were later enacted, one reducing the number of hours per day when children may be employed in factories from 9 to 8 and the hours between which they may be employed from between 7 a. m. and 6 p. m. to 8 a. m. and 5 p. m., and one extending these provisions to apply to children employed "in connection with factories" and entirely reframing the law defining the hours of labor of females over 16. These were divided into two classes—minors under 21 and adults—in order to limit to the adults the effect of recent decisions of the courts holding the night-work prohibition of section 77 unconstitutional because it applied to adults. Gov. Hughes regarded these bills of such extreme importance to working women and children that he approved them, despite the retention of the unconstitutional provision.

Dangerous employments: As the governor's recommendation relating to the protection of children against dangerous employments contained in his first message to the legislature had not been carried out, he again urged, in 1909, the enactment of such legislation:

"I renew the recommendation made in my first message that in order to protect children against dangerous employments there should be a more precise prohibition specifying the occupations, to be selected with just discrimination, in which children under 16 years of age shall not be employed. It is believed that this will be an improvement upon the general terms of the present law.

"It is also desirable in the interests of justice, as well as to aid in the enforcement of the law, that where a minor under 16 sustains an injury in the course of an employment which the law forbids, the employer should be liable by reason of the violation of the law, without regard to contributory negligence or the employee's assumption of risk."

A bill was also passed specifying the different kinds of machines upon which children under 16 might not be employed. It prohibited, in addition, their employment in certain processes, including, in the case of girls, operations which required them to remain standing constantly. This second list of prohibited employments had in view not only danger of accidental injury, but also danger to health from harmful or poisonous substances.

HEALTH AND SAFETY OF EMPLOYEES IN MERCANTILE ESTABLISHMENTS.

The power of inspection of mercantile establishments had heretofore been vested in local boards of health. The resulting inadequate enforcement of the labor law brought from the governor a recommendation that the responsibility of enforcement be transferred to the State department of labor.

A bill to this effect passed the assembly without much difficulty, but in the senate met with powerful opposition on the part of merchants who would be affected by the measure. Notwithstanding the efforts of the many friends of the bill, its opponents succeeded in preventing its passage.

"The supply bill passed at the regular session carries appropriations to enable the labor department to undertake this work, but the necessary amendments of the substantive law have not been made."

Gov. Hughes emphatically recommended the bill again to the legislature in extraordinary session. It was accordingly again introduced, and, although again vigorously opposed, was finally passed.

SEMIMONTHLY PAYMENT OF WAGES.

The first bill requiring railroads to pay wages semimonthly instead of monthly was introduced in 1901. Since then the measure had appeared perennially before the legislature. After eight years of activity by railroad employees, the bill became a law in 1908 under Gov. Hughes.

This act was one of the two preferred measures that year of the State Workingmen's Federation and was actively championed by the legislative agents of that organization and the railway brotherhoods, and on the other hand was vigorously opposed by the railroads. In approving the act, Gov. Hughes said:

"By the labor law it is provided that corporations and joint-stock associations shall pay their employees weekly. Steam surface railroads, however, were excepted from this provision and permitted to pay monthly. This mitigates this discrimination by providing for a semimonthly payment.

"It is urged that this change will cause the steam railroads some inconvenience and expense. But doubtless the present law occasions inconvenience and expense to other corporations who are not benefited by any exception. It is better that the present bill should become a law and suitable administrative arrangements be made to comply with it than that the existing discrimination, which can not be justified with due regard to the policy of the provision of the labor law, should be maintained."

Since adequate penalties for violation of this law had not been provided, the governor included in his message to the next legislature the following recommendation, which resulted in the necessary amendment:

"At the last session a law was passed providing for semimonthly payment of railroad employees. While a penalty for its violation is provided for by the labor law, it is not satisfactory, and the Penal Code should be amended so as to bring within its provisions the violation of the amendment of last year. There should be no question as to the adequacy of the penalty."

REGULATION OF EMPLOYMENT AGENCIES.

Abuses in connection with employment agencies led to an entire recasting of the law regulating employment agencies. Chapter 780 of the laws of 1910 provided for the licensing, supervision, and regulation of employment agencies by local commissioners of licenses in the larger cities and by mayors in the smaller cities. The act included provisions for the protection of the unemployed person in search of work from exploitation by employment agents and provided for maximum fees, prohibited misrepresentation regarding the place and kind of work, etc.

EMPLOYERS' LIABILITY AND WORKMEN'S COMPENSATION.

Gov. Hughes initiated the movement that resulted in the enactment of the workmen's compensation act of 1910, which substituted a system of automatic compensation for the old common-law principle of employer's liability which threw practically the whole burden and loss of industrial accident upon the workman. In a speech delivered at the Exposition of Safety Devices and Industrial Hygiene immediately after his inauguration in 1907, he manifested a deep interest in the subject of industrial safety and the need of governmental action to establish proper working conditions. The governor said:

"We shudder at the thought of the carnage of war, but we give too little attention to the perils of our industrial army and to the useless sacrifice of life and productive efficiency which is the result of preventable accidents in industry. * * * It has been estimated that the so-called industrial accidents in the United States amount to over 500,000 in a year. * * *

"The common law reflects the view that the laborer is free in his choice of an occupation and voluntarily accepts its obvious risks. He is supposed to deal on a footing of equality with his employer and to be compensated by the agreed wages for the risks which he assumes. However convenient this may be as a matter of legal theory, we know that our industrial army is recruited from those who have no choice but to take the work nearest at hand and to accept, for the most part, whatever perils may attend it. The workman takes the risk because he must work or starve, and in getting work he can not afford to be too squeamish about the conditions under which he is employed. To be sure, humane motives and economic reasons have led to the adoption of varied safety appliances. Inventive skill has been directed to the protection of labor. Legislatures have intervened and have specifically required protection. But much remains to be accomplished, and from experience abroad the conclusion is forced upon us that a very large proportion of the injuries which annually occur are wholly useless. It is a shocking thought that the wage earners of the country, who, by their daily toil, make possible the industrial prestige of which we boast, should be subjected through ignorance or indifference to unnecessary peril. The interests of labor are the interests of all the people, and the protection of the wage earner in the security of his life and health by every practicable means is one of the most sacred trusts of society. It is of the first importance that this obligation should voluntarily be recognized and that every effort should be made to better the lot of industrial employees by making the conditions of their labor decent, wholesome, and safe."

In his message to the legislature in 1909, the governor said:

"I also recommend that provision be made for special and expert inquiry into the questions relating to employers' liability and compensation for workmen's injuries. Our present methods are wasteful and result in injustice. Numbers of negligence cases are prosecuted upon a basis which gives the attorneys a high percentage of recoveries. Only a small percentage of the premiums paid for insurance against liability is devoted to payment of losses. As a result the workmen do not receive proper compensation and employers pay large amounts that do not reach them. There are constitutional restrictions which stand in the way of some of the remedies which have been devised in other countries; but the subject should be thoroughly examined to the end that the present waste and injustice should be mitigated to the fullest extent that may be found to be at once practicable and consistent with the provisions of our fundamental law."

Wainwright Commission: In accordance with this suggestion the "Wainwright Commission" to investigate the subject of employers' liability and unemployment was appointed.

The work of the commission and its comprehensive report was referred to by Gov. Hughes as follows:

"Existing conditions with regard to employers' liability and compensation for workmen's injuries are so unjust that there should be remedial action as soon as it can be taken intelligently after competent investigation. The present methods are satisfactory neither to employer nor employed and the rules of law governing legal liability offend the common sense of fairness. Under the legislation of the last session a commission, broadly representative in character, was appointed and authorized to make full inquiry with respect to industrial accidents and their causes, also into the causes of unemployment and the means of securing a better distribution of labor. The work of this commission should be supported, and it is hoped that its labors and recommendations may lead to the adoption of comprehensive measures which will avoid the present waste and injustice, and promote contentment and prosperity by securing improved conditions for those engaged in industrial occupations."

Two acts were passed by the legislature after the filing of the commission's report. Chapter 352 greatly extended the legal liability of employers based on negligence and at the same time offered a plan of fixed compensation which employers and employees might by voluntary agreement substitute for their respective liabilities and rights under the liability law. Chapter 674 substituted outright for certain especially dangerous occupations in place of employers' liability based on negligence, compulsory compensation with a fixed scale for all employees accidentally injured when not guilty of serious or willful misconduct.

In signing these bills Gov. Hughes noted that in this new field of social legislation in America much would have to be learned by experiment, and the laws revised later accordingly:

"The proposals of the commission have been criticized by some on the ground that they do not go far enough and by others because they go too far. While avoiding extremes, the commission has sought to afford a scheme of compensation through the testing of which the State may find a basis for the establishment of its policy.

"With respect to the objections urged upon me as to the validity of certain features of the bill, I believe that the questions thus raised should be left to the determination of the courts. In this way only can there be an authoritative determination with respect to the measures that are within the limits of legislative power and a suitable shaping, in the light of judicial decisions, of the policy of the State with respect to compensation for industrial accidents."

Chapter 674 was the first State law in this country to adopt the principle of compulsory compensation. Both acts were notable as effecting a general change from the principle of liability to that of automatic compensation.

FULL CREW ON RAILROADS.

The legislature in 1907 passed a bill requiring the employment of an additional brakeman on freight trains composed of more than 20 cars, thus making a train crew consist of six instead of five persons. As in other similar legislation, the governor expressed full sympathy with efficient service, but opposed arbitrary requirements not adaptable to varying conditions. The governor vetoed the bill on the following grounds:

"According to present practice, freight trains are very generally operated with a crew of five persons, and the object of this bill is to compel the employment of an additional brakeman. The necessity for this is said to lie in the fact that without three brakemen the freight trains are insufficiently manned, and that firemen are compelled to leave their places in all kinds of weather to throw switches when the two brakemen are required respectively to go ahead of and behind the train.

"This bill, however, upon the facts developed before me upon the hearing and undisputed, is clearly unconstitutional. Such a measure should define the service required with suitable reference to circumstances and conditions, so that the law would apply in proper cases and not otherwise. The bill takes no account of the differences between the different roads and parts of roads, in trackage and switching facilities, and of the fact that what may be necessary in the case of some railroads may be wholly unnecessary in others. In the case of the New York Central Railroad it was shown that the trackage and switching facilities on its main lines were of such a character as to make unnecessary the employment of a third brakeman, in accordance with the provisions of the bill. This was frankly conceded by supporters of the bill.

"To require the expenditure of a very large amount of money (estimated at several hundred thousand dollars annually), without necessity for the outlay, is simply arbitrary exaction and a taking of property without due process of law. The bill does not refer its requirements to any proper standard of necessity or provide any criterion by which its proper application under varying conditions is to be determined. It contains an absolute requirement which, upon the facts conceded before me, can not be justified."

EQUAL PAY FOR TEACHERS.

In the last year of Gov. Hughes's administration the legislature passed an act to amend the Greater New York charter providing equal pay for equal work to both male and female members of the supervising and teaching staff of the public schools of the city of New York.

The bill was referred to the mayor of New York City, who disapproved it. The legislature, however, passed the bill over the mayor's disapproval, and it was then referred to the governor.

Gov. Hughes then vetoed the bill. He did not take a stand against equal pay, his attitude being clearly outlined in the following paragraph of his memorandum of veto:

"It is proposed by legislative enactment to establish the proposition that for the work of a given position women shall receive equal pay with men. It is for this principle that the supporters of the bill contend and not for mere increased pay. The gross inequalities which have been permitted by the board of education, and which clearly should not be continued, are pointed to for the purpose of emphasizing the principle in question."

He was against inequalities, whether they affected women teachers or any other group of public servants, but could not approve the selection for special relief of one group within a given community. He stood for principles broadly applied, after full investigation and discussion, rather than piecemeal legislation. He took the position that if the policy of "equal pay for equal work" was to be adopted, it was the duty of the State to apply that policy impartially in every city of the State and for other kinds of State work besides teaching:

"The board of education is (thus) directly subject to the control of the legislature, and whatever provisions may be found necessary or wise for the purpose of defining its powers or prescribing its policy must be prescribed by the legislature. No other authority is competent to make such provision.

"But while the legislature has power to deal with every phase of the matter, the course which experience approves is that certain general principles of action should be laid down and that within these principles freedom with reference to details of management should be left to the subordinate body acting with peculiar knowledge of local conditions. * * *

"The motive of the present bill is to compel equal pay for men and women holding the same positions under any particular schedule of salaries. The provision of the bill relating to classification, schedules, and the raising of additional funds by taxation turn upon this central requirement and are for the purpose of giving it effect. And inasmuch as the question is one of general principle it is claimed that it is a requirement properly to be established by the legislature in laying down the rules under which the board of education shall exercise its powers.

"Now, without taking up the alleged ambiguities of the bill, it clearly appears, with respect to this fundamental matter, to be open to serious objection.

"The proposition as it is put—'equal pay for equal work'—is an attractive one and set forth on behalf of the worthy public servants who are engaged in this important calling. It has elicited a large measure of support while at the same time it has provoked vigorous opposition from those who believe that the desired legislation would be unfortunate both for the schools and the women teachers.

"But it is manifest that the principle is one of general application, and it should not be adopted by the State unless the State is prepared to apply it generally. The question is necessarily one of State policy, and as such it should be presented and debated before action is taken.

"There is no reason why the principle should be applied to teachers in New York and not to those in Albany, Syracuse, Rochester, Buffalo, and elsewhere in the State. Nor is there any reason why it should be limited to school-teaching. If sound, it should be applied in our State hospital service, in our charitable and reformatory institutions, and generally through the civil-court service of the State. It is indefensible that a principle of grave importance to the State as a whole should be established in connection with a local measure inviting only the consideration which as such it receives. The consideration of such a matter should be under circumstances directing the attention of every member of the legislature to its importance with reference to his own constituency and to the State at large, and not upon the assumption that it is a question of purely local concern.

"What local authorities or subordinate boards may do within the limits of their discretion, while locally important, is a very different matter from the establishment by legislation of a principle of action which has an appropriate local limitation. By acting in such matters through local bills, the State finds itself committed to a course which as State policy has never received thorough consideration.

"For this reason I can not approve this bill. The matter should be left to the board of education to be dealt with locally as may seem best, unless the legislature is prepared to lay down the general principle for the entire State and the entire public service."

ATTITUDE TOWARD LABOR UNIONS.

The governor frequently gave expression to his natural sympathy with the constructive work done by labor organizations. At the dedication of the tuberculosis pavilion erected by the Central Federation of Labor at Albany he said, in 1908:

"My friends, there are some who regard organized labor as a source of strife and menace of difficulty. I regard it as a fine opportunity for the amelioration of the condition of men working with no other purpose than to make the most of themselves and to achieve something for their families. I regard it as a fine opportunity for the realization of the highest benefits for those that every patriotic citizen feels most solicitous about to see that everything should be done for their continued progress.

"Under wise leadership, with statesmanlike guidance, with a sincere intention to promote the benefit of the community and to secure honorable progress, the mission of labor organizations is one of the finest that any association of men could guard. To-day we have a realization of what can be accomplished.

"We have entered into a campaign which requires the cooperation of all in the community to stamp out this great white plague. By the mitigation of improper conditions of labor, by the decrease of hours of labor, by securing better administration of health departments and wiser legislation with regard to the conditions of tenement houses, and with reference to many preventable nuisances much has been done to obtain better conditions for the workingman. But what is done each year only points out what is to be done the year following.

"There is a great movement in this country from one end to the other, a movement of progress that is not sensational, that is not intended for the benefit of this or that particular man, selfishly considered, that is not controlled by any set of men, but is for the improvement and the progress of humanity, because all our decent citizenship is determined that every abuse that can be corrected shall be corrected and that every man shall have a fair chance in this country."

Six-day week: The governor frequently held conferences with labor-union delegations during his incumbency. In 1908 an effort was made to open such work places as butcher and barber shops on Sunday, and a delegation of the Workingmen's Federation appeared before him to enlist his opposition to such measures. When a minister who accompanied them, representing the Sabbatarian Association, read a long address to the governor urging him to keep such places closed on Sunday, the latter immediately replied:

"I believe in a six-day working week. So do you. But do you know that the men who are making a six-day week a possibility and an eventual fixture are these men and their associates?" indicating the labor union members present. "I long ago came to the conclusion that the labor unions are going to solve the Sunday labor question to the best interest of the country. Join hands with them and you will double your results while halving your labor."

ORGANIZED LABOR COMMENT ON THE HUGHES ADMINISTRATION.

The Legislative Labor News, the recognized organ of the State Federation of Labor, published by John M. O'Hanlon, Troy, N. Y., indicated after the governor's resignation in 1910 how this interest had resulted in unusually favorable labor legislation by commenting, under the caption "He was a great governor," as follows:

"Now that Gov. Hughes has retired from politics and ascended to a place on the highest judicial tribunal in the world, the fact can be acknowledged without hurting anybody's political corns that he was the greatest friend of labor laws that ever occupied the governor's chair at Albany. During his two terms he has signed 56 labor laws, including among them the best labor laws ever enacted in this or any other State. He also urged the enactment of labor laws in his messages to the legislature, even going so far as to place the demand for a labor law in one of his messages to an extra session of the legislature.

"Only 162 labor laws have been enacted in this State since its erection in 1777—in 133 years. One-third of these, exceeding in quality all of the others, have been enacted and signed during Gov. Hughes's term of three years and nine months.

"With such a record of approval and suggestion of progressive legislation in the interest of humanity to his credit, it is easy to believe that human rights will have a steadfast and sympathetic upholder in the new justice of the Supreme Court of the United States."

The protection of children in industry, the recognition of the rights of injured and disabled workmen to compensation, thus distributing the burden of industrial accidents; the improvement of hours and conditions of labor for working men and women, these are among the significant achievements of Mr. Hughes's governorship. These same subjects are now engaging social and legislative interest and energy in many of our States. In all of them history shows Mr. Hughes to have been a pioneer. The workmen's compensation law was the first State-wide compensation law in the country, and, although declared unconstitutional by the Supreme Court, it served as a model for similar laws in a number of States in the following year. The work of the Wainwright Commission and the law of 1910 are landmarks in the history of compensation law. The stability of Mr. Hughes's social measures and their permanent place in our national records are due to their combination of social idealism with sound legislative detail.

*VIII. Immigration.*

Mr. Hughes, as governor, put through the first measures of practical Americanization ever adopted by any State in this country. The New York State Bureau of Industries and Immigration established by him exemplifies the domestic immigration policy, which in a national way has never yet been attained, and which New York State was the first to approach.

Soon after Gov. Hughes took office the question of investigating the condition and distribution of immigrants in New York State engaged his attention.

American citizenship and our foreign born: Gov. Hughes understood the various racial elements of which our citizenship is composed and frequently gave expression to his faith in the democracy which grew

out of the fusion of races in American life. In an address to a committee representing a society of foreign-born citizens on January 28, 1908, he said:

"One of the most encouraging things about conditions in this country is the fact that whatever stocks we may represent, we so rapidly become responsive to the American ideal, and the genuine love of our institutions is not confined to people of any race or of any stock, but is general to all the members of our citizenship. Were it otherwise we could not last. As it is, we can confront the future with unbounded confidence."

The same sentiment was expressed in an address in March of the same year before another group of naturalized citizens:

"My friends, we are all together here; we have got to do something for the newcomer; we have got to make him realize what our institutions mean; we have got to give him a helping and a brotherly hand. No American can afford to set himself aloof, and when we gather in our different societies and pay just tribute to our stocks and the great men who have ennobled the fame of our origin, let us not forget that the greatest source of pride is in the contribution we have made to the life of this country, and the test of our own right to exult in our ancestry is what we do to maintain what they have so richly provided."

The governor entered into a more detailed statement of his attitude toward the foreign-born citizen in an address at Cohoes, N. Y., on June 24, 1909:

"We are reminded here of the different elements that have been fused into American life, and of the varied sources of our power as a Nation. No true American begrudges anyone his pride of ancestry or the fondness with which he lingers over the glories of the land of his birth or the pride he takes in the talents of the race to which he belongs. We are proud of the fact that in this country we are not dependent upon any one influence or any one source of strength, but we have gathered together the best of all, and we represent in our American life the talents and the aptitudes of all humanity. * * *

"We sometimes hear people talking of 'the American' as though he belonged to one particular race; and sometimes we hear the distinction drawn between so-called 'Americans' and so-called 'foreigners.' I have no sympathy for any spirit of that sort. 'American' is a word of the spirit, and not a word of the flesh. 'American' means devotion to institutions, and not a particular origin; and those who have come here from any country or who represent here the different racial elements that appear commingled are either true or false Americans, not according to the length of their stay, the place of birth of their fathers, or the distinction of their ancestry in this country, but by reference exclusively to their honorable devotion to the principles of American government and their earnest desire that the institutions of this country shall be preserved in their integrity.

"There are American men landing from the ship at Ellis Island almost every day that are true Americans five years before they can take out their naturalization papers. They are true Americans the moment they land on American soil because of the patriotic ideas which brought them here, and their intense love of liberty and of popular government under a Constitution which safeguards the rewards of thrift and secures honorably acquired property."

COMMISSION OF IMMIGRATION.

In 1908 Gov. Hughes sent a message to the legislature recommending that a commission be appointed to make suitable inquiry into the condition of aliens in New York State, and to suggest practicable measures to remedy existing abuses and to promote Americanization:

"The condition of immigrants from foreign countries who in large numbers remain in this State requires careful study. We can not afford to ignore the situation, and our first effort should be properly to understand it and to take whatever measures may be necessary to protect these newcomers from the special forms of imposition of which they are the victims, and through a proper distribution to realize their economic value. The matter has many phases which may well form the subject of a special investigation.

"I recommend that provision be made for the appointment of a commission for this purpose. And as it is a field which has engaged the attention of many public-spirited citizens, I believe it would be possible to obtain a commission possessing the highest qualifications which would serve without compensation."

A commission was accordingly appointed, which investigated the condition of immigrants living in the State. It transmitted its report on April 5, 1909. The general social, industrial, and educational condition of aliens was studied and inquiry was made into such matters as exclusion of aliens; causes of immigration; the alien as a dependent, delinquent, and defective; economic and moral conditions; places of amusement for immigrants; and forces tending to promote assimilation of aliens into American life. Such general exploitation was discovered that detailed investigations were made of practices and methods of immigrant private banks and the losses incurred by immigrant depositors; activities of steamship ticket agencies and ticket peddlers; work of notaries public and preparation of illegal documents; relation of the alien to the administration of the civil and criminal law, and the work of shyster lawyers and professional bondsmen; congestion in the courts empowered to hold naturalization proceedings; conditions surrounding the transportation of immigrants from the time of their landing at the Battery and the exploitation practiced upon them on trains, docks, and steamboats; condition of immigrant homes; distribution of aliens through employment and contract-labor agencies; and living conditions in labor camps. Existing educational facilities for immigrants were also studied, including the provision for industrial training in public schools and in religious, philanthropic, and private schools, the lack of educational facilities in labor camps, and the lack of adequate standards for comprehensive instruction in civics.

BUREAU OF INDUSTRIES AND IMMIGRATION.

The commission recommended as a result of its inquiry that a bureau of industries and immigration should be established in the State, especially charged with the duty of securing for the State the economic advantages derivable from the intelligent utilization of the alien in industrial, agricultural, and other employments and at the same time of protecting the alien from exploitation, fraud, and misrepresentation and of promoting his welfare and thus facilitating his development into an intelligent and useful citizen.

The bureau of industries and immigration was clothed with the power of carrying out and developing a State domestic immigration policy by assuring to every alien a hearing and an impartial inquiry into his complaint or difficulty, by obtaining the enforcement of existing laws to prevent his exploitation, by undertaking investigations of living and labor conditions and submitting recommendations for improvements, and by publishing and distributing information to facilitate assimilation.

OTHER PROTECTIVE LAWS.

Specific laws passed under Gov. Hughes for the protection of aliens against the exploitation that resulted from the new immigrant's ignorance of our language and institutions included a law providing for the supervision of steamship ticket agencies, a law regulating private banks, and a law providing for the supervision of notaries public. A number of complaints alleging illegal acts on the part of notaries had been filed with the governor, and in March, 1910, he refused to reappoint 66 notaries public and also revoked the commissions of 10 others on charges after a hearing before a commissioner. Later a law was passed prohibiting any person to advertise, hold himself out, or convey the impression that he is a notary public, and made it a misdemeanor to practice any fraud or deceit while exercising his powers as a notary public.

The "removal of the hyphen" has long been the problem of this Nation, though it has had general recognition only during the past few years. A united citizenship and an undivided loyalty among citizens and residents of this country can be achieved only when the United States has a definite policy for distributing into industry and educating and preparing for citizenship the men and women it admits. Mr. Hughes instituted the first measures of Americanism ever established in any State. New Jersey, Massachusetts, Rhode Island, and California have since appointed commissions based upon the New York State policy.

*IX. Race-track gambling.*

When Gov. Hughes took office he found that the State constitution, the fundamental law of the State, was being openly and flagrantly violated with respect to pool selling and bookmaking at race tracks. The constitution plainly prohibited such gambling and the legislature by chapter 270 of the laws of 1895 had pretended to prohibit it and had made the penalty for its continuance liability to a civil suit for the money lost. This ineffective penalty actually protected such practices, and criminal proceedings for this plain evasion of the will of the people could not be brought.

The governor in his message to the legislature in 1908 called attention to these facts and asked the legislature to carry into effect the constitutional mandate. Acrimonious comments were made on the governor's attempts to alter the situation, and a resolution was passed asking for a letter which Gov. Hughes was said in a newspaper article to have received from a gambler stating that legislators had been influenced to vote against the bill. The governor refused to give them the letter with the following message:

"I give no credence to any report that the members of your honorable body would be deflected from their manifest duty by an attempt, if any such were made, on the part of those who have vast interests at stake in this matter to corrupt their judgment. On the contrary, I have implicit confidence that the legislature will carry into effect the constitutional mandate and will purge our State of this source of misery and vice which exists only because the will of the people, flatly declared in the fundamental law, has not been carried into effect.

"On the one side we have the plain provision of the constitution that pool selling and bookmaking shall not be allowed in this State, and that the legislature shall pass appropriate laws to prevent these offenses.

"On the other side stand those who would sacrifice the morals of our youth by extending the area of unnecessary temptation; who would inflict needless suffering upon the helpless women and children, depending upon the cultivation of thrift and industry; and who would imperil the welfare of thousands of our people simply because of their selfish desire to make money out of gambling privileges. They fatten upon wretchedness, and have the effrontery to demand that the laws of the State shall be adapted to their purposes. * * *."

The governor then pointed out that the pending legislation was not intended to destroy racing, but merely to make effective a constitutional prohibition.

"The bills are not aimed at racing or at race tracks or at property. They are aimed at public gambling, prohibited by the constitution, condemned by the moral sense of the people, irrespective of creed, conceded to be the prolific source of poverty and crime."

The assembly passed a bill correcting the situation, but the senate would not do so. On April 9 the governor sent a special message to the legislature urging it again to enact appropriate legislation to abolish the existing discriminations in favor of race-track gambling. He also called attention to the fact that under the constitution the legislature must make existing prohibitions effective and had no right to permit discriminations.

Summons extraordinary session: The legislature adjourned, however, without passing the race-track bills, and Gov. Hughes forthwith summoned the legislature to an extraordinary session to complete the work it had left undone. His special message read:

"I recommend to your consideration the enactment of suitable legislation for the prevention of race-track gambling.

"The issue has been clearly presented whether the interests of those who wish to maintain gambling privileges at race tracks shall be considered paramount to the constitution of the State. It is an issue which has been clearly defined and is fully appreciated by the people. It can not be obscured by a discussion of propensities of human nature. Race-track gambling exists not because it is hidden or elusive but as an organized business shielded by legislative discrimination. The law which professes to prohibit it, in fact, protects it.

"Nor can the question be finally disposed of save by indicating the honor of the State and by demonstrating that there is no power, however strong or unscrupulous, which can be permitted to override the will of the people as expressed in the fundamental law."

The governor appealed to the people, and succeeded finally in obtaining the necessary legislation. His motive in insisting upon the enactment of this legislation was brought before the people time and time again, as in a speech in the Richmond County Fair, Staten Island, on September 10, 1908:

"It may be said that it is not a plank in the Republican platform upon which I was elected; but it was the foundation of all the planks in the Republican platform, without which they would not have held up very long. Of course, you do not have to have systematized public gambling, largely at the expense of the public that, even in the gambling game, as many of you know, do not have a fair show. Of course, it is not necessary in order to promote sport to defy the constitution or to engage in a general systematic plan of public gambling. The very essence of sport is that it is above mere considerations of pecuniary return, and, indeed, above any considerations of improper pecuniary return. I believe in racing and in sport, but whether it is this evil or that, whether it is in connection with railroads or in connection with race tracks, whether it has to do with this department or that matter,

when anybody says we can get the best of the constitution because we don't like it, then it is the time to step in and find out what the people of the State say.

"That is the security of our Government and the respect which the people have for law—for law in itself, not for a particular law. Everybody likes a law that helps him. Everybody likes a law which aids him, as he thinks, in his business. What really supports us as a free government is not respect for a particular law but respect for law because it is law; because we are all going together with the genuine belief in our institutions and a determination that we will do things in the right way; that if we don't like a law we will try to repeal it; that if the constitution is not right it shall be amended."

The governor showed in many ways his interest in racing as a sport and in improving the breed of horses, especially in what he did to develop the State fair.

The governor's fight against race-track gambling was a fight for the integrity of the fundamental law of the State. Far from having in view interference with the pleasure of the people, it aimed at and achieved the abolition of legislative discrimination in favor of a particular group.

Gov. Hughes in this respect, as in many other of his measures, insisted that in letter and in spirit the law should apply broadly to all citizens and all groups alike, and should be evaded or modified in the interest of none.

*X. Education.*

Several important educational policies were adopted by the State in Gov. Hughes's administration.

TRADE SCHOOLS.

The establishment of trade schools in connection with the public schools was provided for by chapter 263 of the laws of 1908. It permitted the establishment by local public school authorities of either general, industrial, or trade schools, and provided for their subsidy by the State. An important provision of the act designed to give employers and employees a voice in their management, required the public school authorities to appoint "an advisory board of five members representing the local trades and industries" to "counsel with and advise" the school authorities in such management.

The governor in his message to the legislature in 1909 dwelt on the lack of suitable vocational training:

"The lack of suitable vocational training is a matter of serious concern. Adequate opportunities for boys to become skilled workmen do not exist, and our efforts to supply industrial training have not fully met the difficulty.

"A serious aspect of it is that children who are not being trained for some definite vocation are not being trained for anything. It is said that more than one-half of all who enter the public elementary schools leave before completing the work of the schools. Obviously the curriculum of the elementary schools should make it to the interest of the children to remain to the end of the course. At least it should be of a character to impel rational parents to see that it is clearly to their ultimate interest to keep their children in school to the end of the elementary course, and to justify the State in so doing in case of inferior courts of criminal jurisdiction where parents are remiss."

COMPULSORY EVENING SCHOOL ATTENDANCE.

The education law was amended by chapter 409 of the laws of 1909 to provide for the compulsory evening school attendance in cities of the first and second class of children between the ages of 14 and 16 who had not graduated from the day schools and to provide for its enforcement.

IMMIGRANT CHILDREN.

The act creating the bureau of industries and immigration (see "Immigration"), upon the recommendation of Gov. Hughes's commission of immigration, gave that bureau power to secure and distribute to school superintendents the names and addresses of newly arrived alien children of school age to aid in the enforcement of the compulsory attendance provisions of the education law. The data for such children were then secured from the Federal immigration authorities, and in the first year of its existence the bureau distributed 8,369 names of such alien children. This experiment proved of such value that the Federal Government has since adopted the plan and is now distributing the names of all newly arrived children of school age to school superintendents throughout the country.

IMMIGRANT ADULTS.

The same bureau was also empowered to devise methods for the proper instruction of adult and minor aliens in the English language and in respect to the duties and rights of citizenship and the fundamental principles of the American system of government, and otherwise to further their education. A special study was made of labor camps, and it was found that they were wholly without educational facilities. The immigrant's need of learning the English language in order to prevent accidents, to enable him to understand his work better, and to adopt an American standard of living and of learning civics and the principles of the American form of government to promote better citizenship was pointed out by this bureau. The passage of an act was later secured establishing schools in temporary labor camps, the first of its kind in the country.

AGRICULTURAL.

In his address at the Wyoming County Fair, Warsaw, N. Y., on September 15, 1908, Gov. Hughes made clear his understanding of the need for agricultural education.

"Now, we want to make progress in all agricultural work; we want to have the State of New York go forward and far surpass all that has hitherto been accomplished by securing proper instruction, proper opportunities for agricultural education.

"That (farmer) boy that I spoke of a moment ago wants to have not a haphazard existence on the farm, just practicing what he may have learned with restricted opportunity; he wants to have the best of all experience brought right to his aid; he does not want mere theoretical instruction; but he does want to know what has been tried, what experience shows and others know; and there is no reason in the world why the boy that goes on the farm should not have as good a training as the boy that goes into the law or into medicine or into every daily vocation of an inheritance experience. The object of an education is to bring within the range of one what he, in the experience of a long life, could never acquire for himself; but he is taught what has been accomplished in the centuries past under varied conditions, so he may have, at once, that great capital to draw upon.

"So we have entered upon a course of agricultural education in this State of the most practical sort."

The educational policy which characterizes this legislation of the governor's dealing particularly with the working youth and handicapped aliens, shows that in education as in other fields Gov. Hughes believed that the State must extend its right to an education to all the people.

*XI. Courts and probation.*

In revising the methods of the lower courts in the interests of the unfortunate, and in greatly broadening and developing the system of probation throughout the State, Gov. Hughes advanced far in a new field of humane legislation in America.

CIVIL COURTS.

The city court of New York was at this time three years behind in its regular calendar, so that unless a case was of such a nature that it could be put upon the short-course calendar, it took three years for it to reach trial.

"It is doubtful whether any court in the county affects the welfare of more persons. It is the poor man's court, where justice should be speedy, but delays of this sort amount to a denial of justice and breed disrespect for the law and its administration. If we are to maintain law and order and conserve our institutions, evils of this sort must be remedied. While we are spending many millions of dollars on public works of great importance to the business interests of the State, we must not fail to make adequate provision to secure to the masses of the people the prompt enforcement of their rights and the swift redress of their grievances. No one who is acquainted with the conditions prevailing in those courts and the earnest efforts which are made by the justices who perform their duties under conditions of great embarrassment can fail to recognize the necessity of devising some means of relief."

CRIMINAL COURTS.

The governor early in 1908 also asked the legislature to authorize the naming of a commission to investigate "the methods and procedure of inferior courts of criminal jurisdiction where it would seem that our system of administering justice may be greatly improved," and a bill to this effect was introduced in the senate and a commission was appointed. The investigation resulted in the passage of an act in 1910, which the governor signed and with which he filed the following memorandum:

"This bill provides for important reforms in connection with the inferior courts of criminal jurisdiction in the city of New York. The wisdom of some of the proposals has been challenged, but they are the result of painstaking study, by the commission appointed for the purpose, of a most difficult subject, and the city of New York should not be denied the right to avail itself of the test and experience which the bill will permit."

PROBATION.

During the first year of Gov. Hughes's administration he called attention to the need of perfecting the probation system of the State, based on a careful and sympathetic study of the subject in order to devise a practicable statutory scheme. He secured the passage of chapter 430 in June of that year authorizing the appointment of a permanent State probation commission to collate information about this method of dealing with prisoners and to supervise the efforts of probation officers to reclaim the offenders placed in their charge. It also was given power to investigate the work of any probation officer.

The report of the probation commission in 1910 shows what progress was made in the State's probationary system:

"Prior to 1907 there were no statistics available as to the extent of the use of probation in New York State. In that year the probation system was reported as used in 16 cities, 1 village, and 11 county courts. The growth of the system during the next three years led to its use in 1910 in 37 cities, over 40 towns and villages, and 34 county courts, besides in the supreme court in a number of counties.

"The first appropriation for the salary of a probation officer was made in 1904. In 1907 the number of publicly salaried positions was 35; in 1910 the number had increased to 106. Not until 1908 was it permissible for counties to make appropriations for the probation service. In 1910, 16 counties had provisions for salaried probation officers.

"Since the commission came into existence the number of children placed on probation each year has been about 2,000, and the number of adults so dealt with has averaged between 6,000 and 7,000. The number of persons on probation at a time averages between 3,000 and 4,000.

"Marked improvements have been made in the operations of the probation system during the last three years. More care than ever before is exercised by judges in selecting defendants to be released on probation; offenders are kept on probation longer and under closer oversight; more is done to aid probationers to improve their habits; and the abuses which formerly characterized the use of the system are decreasing.

"The probation system to-day is stronger and is receiving more hearty support from officials and the general public than ever before."

The year following the appointment of the State probation commission the first salaried probation officers had been appointed, and boards of supervisors were authorized to appropriate money for them in county courts. In 1909 the first juvenile detention home was established in Buffalo and a national probation association was organized. In 1910 the new inferior courts act authorized the appointment of salaried civilian probation officers in place of police officers, and a domestic relations court was established in Buffalo upon the commission's recommendation—the first such court in the world presided over by a judge devoting his time exclusively to such cases.

No task of social reform has more gravely challenged the powers of social leaders and administrators than the sound revision of the methods of administering justice and of securing a plan of probation that shall be at once sympathetic, sound, and practical. In this Gov. Hughes's record as cited above shows him to have been again a pioneer.

*XII. Federal income-tax amendment.*

Gov. Hughes vetoed the Federal income-tax amendment not because he did not believe in a Federal income tax, for he did, but because the amendment implied, in his opinion, a Federal right to tax the securities of States and municipalities and was therefore a violation of the rights of the States.

A joint resolution submitted to the legislature in 1910 proposed an amendment to the Constitution of the United States which had been adopted by two-thirds of both Houses of Congress, and which read:

"ART. XVI. The Congress shall have power to lay and collect taxes on incomes from whatever source derived without apportionment among the several States, and without regard to any census or enumeration."

The governor, commenting on the proposed amendment, pointed out that the words "from whatever source derived" conceded a new grant of power to Congress in giving it the right to tax income derived from State or municipal bonds—a right which might prove extremely dangerous to the States. He pointed out that Congress had previously exercised the power of taxing incomes without apportionment among the States upon the basis of population, and that if the proposed amendment was passed, a limitation would be placed on the borrowing power of the State and thus make the performance of State functions a matter of Federal grace. He therefore recommended that the proposed amendment should not be approved:

"I am in favor of conferring upon the Federal Government the power to lay and collect an income tax without the apportionment among the States according to population. I believe that this power should be held by the Federal Government so as properly to equip it with the means of meeting national exigencies.

"But the power to tax incomes should not be granted in such terms as to subject to Federal taxation the incomes derived from bonds issued by the State itself, or those issued by municipal governments organized under the State authority. To place the borrowing capacity of the State and of its governmental agencies at the mercy of the Federal taxing power would be an impairment of the essential rights of the State which, as its officers, we are bound to defend.

"You are called upon to deal with a specific proposal to amend the Constitution, and your action must necessarily be determined not by a general consideration of the propriety of a just Federal income tax, or of giving to the Federal Government the power to lay such a tax, but whether or not the particular proposal is of such a character as to warrant your assent.

"This proposal is that the Federal Government shall have the power to lay and collect taxes on incomes 'from whatever source derived.'

"It is to be borne in mind that this is not a mere statute to be construed in the light of constitutional restrictions, express or implied, but a proposed amendment to the Constitution itself, which, if ratified, will be in effect a grant to the Federal Government of the power which it defines. The comprehensive words 'from whatever source derived,' if taken in their natural sense, would include not only incomes from ordinary real or personal property, but also incomes derived from State and municipal securities.

"It may be urged that the amendment would be limited by construction. But there can be no satisfactory assurance of this. The words in terms are all inclusive. An amendment to the Constitution of the United States is the most important of political acts, and there should be no amendment expressed in such terms as to afford the opportunity for Federal action in violation of the fundamental conditions of State authority. I am not now referring to the advantage which the States might derive from the exclusive power to tax incomes from property, or to the argument that for this reason the power to tax such incomes should be withheld from the Federal Government. To that argument I do not assent.

"I am referring to a proposal to authorize a tax which might be laid, in fact, upon the instrumentalities of State government. In order that a market may be provided for State bonds and for municipal bonds, and that thus means may be afforded for State and local administration, such securities from time to time are excepted from taxation. In this way lower rates of interest are paid than otherwise would be possible. To permit such securities to be the subject of Federal taxation is to place such limitations upon the borrowing power of the State as to make the performance of the functions of local government a matter of Federal grace. * * *

"It is certainly significant that the words 'from whatever source derived' have been introduced into the proposed amendment as if it were the intention to make it impossible for the claim to be urged that the income from any property, even though it consists of the bonds of the State or of a municipality organized by it, will be removed from the taxing power of the Federal Government. The immunity from Federal taxation that the State and its instrumentalities of government now enjoy is derived, not from any express provision of the Federal Constitution, but from what has been deemed to be necessary implication. Who can say that any such implication with respect to the proposed tax will survive the adoption of this explicit and comprehensible amendment?

"We can not suppose that the Congress will not seek to tax incomes derived from securities issued by the State and its municipalities. It has repeatedly endeavored to lay such taxes, and its efforts have been defeated only by such implied constitutional restriction which this amendment threatens to destroy. While we may desire that the Federal Government may be equipped with all necessary national powers in order that it may perform its national functions, we must be equally solicitous to secure the essential bases of State government.

"I therefore deem it my duty, as governor of the State, to recommend that this proposed amendment should not be ratified."

In vetoing the Federal income-tax amendment, and thus vetoing an object which he believed desirable, Gov. Hughes contributed additional testimony to his persistent unwillingness to remedy one ill by causing another, and to evade fundamental considerations for the sake of desirable ends. In guarding the rights of the States from the encroachment of a dangerous implication, he showed his regard for that broad principle of conservation which is the life and health of government.

*XIII. Special privilege.*

Throughout the four years of his official life, Gov. Hughes's action in vetoing bills showed a rigid determination to oppose special privileges and to insist that if the existing general laws were not adequate to meet particular cases, the proper remedy was not to pass a special law applying to each special case, but rather to amend the general law so as to make it cover the class of case under consideration. He tried to keep the new laws as few as possible, and with this in view refused to sign many classes of bills, such as amendments to the forest, fish, and game law, escheat bills, claim bills, bills legalizing the acts of notaries public and commissioners of deeds, and the like. He insisted that general laws should be passed to relieve the legislature of such trifling matters. Time and again the same phrases recur in his vetoes.

If it was a question of letting the electors in Vernon, Oneida County, vote whether to make a charge of 15 per cent of the cost of road improvements a charge on the town instead of on the abutting owners, who under the law were obliged to pay, Gov. Hughes said that if these abutting owners in Vernon were to be let off, it should be done by a general law applicable to all towns in like case, but that there could be no special legislation.

If it was a question of a claim put in for repairing a fire-alarm system in the fifth ward of the Borough of Queens, Gov. Hughes said that special legislation was wholly unnecessary. It was properly a question for the board of estimate and apportionment. If for some reason this claim was not technically correct, the board should be given general power to deal with the equity of such claims, but that they should not be handled separately by special bills.

If a bill were put in petitioning for the release of lands that had escheated to the State, Gov. Hughes vetoed it and stated that it was necessary to use the method provided for in the general law in such cases.

The governor's insistence upon the exercise of extreme care in the enactment of remedial legislation and his opposition to the passage of special acts for special purposes where broad general laws apply is evidenced in his memorandum of veto to a bill amending the stock-corporation law relating to the conditions under which certain railroad corporations may be merged or consolidated:

"The bill is evidently intended to fit a special case, although it is not frankly special, and justifiable as such, but is an amendment to the general law with conditions which prevent it from being generally applicable.

"Thus the amendment applies only to corporations (1) whose routes are mainly on private right of way; (2) when such routes are less than 100 miles in length; (3) where the building of the roads has not been commenced or they are only in part constructed; and (4) when each corporation has a terminus within a city of more than 1,000,000 inhabitants.

"It would be difficult to suggest any ground of public policy which requires that an amendment to the general law should be hedged about in this manner, and the bill is an illustration of a vicious practice which has been altogether too prevalent."

One of the gravest dangers to legislation in America, whether State or National, is the danger of sectional or group interest, or special as opposed to general application. Not only in the above-mentioned cases but in the case of the equal-pay bill and others during his administration, Gov. Hughes testified to his unwillingness to commit the State to the confusion and instability of special legislation which overzealous reformers and selfish private interests could alike secure to the detriment of the State.

*XIV. Home rule.*

Insistence that local problems must be left for the local authorities to deal with and not be made the subject of special legislation constantly recurs. Bill after bill was put in creating a new position or providing for an increase of salary in various local offices. These were invariably vetoed on the ground that the local authorities must have adequate power to deal with such a questions as hiring another jailer or raising a copyist's salary.

"Local needs can best be determined by the boards which have been chosen to administer local affairs and the expenditures of the money raised by taxation for local purposes should be under their control."

He vetoed many bills on the ground that there were properly constituted authorities with jurisdiction over such matters. Sixteen bills in one year, for instance, relating to proposed amendments of the charter of New York City were vetoed on the ground that they were matters that should be taken up by the charter revision commission. Eight bills authorizing the cancellation or refund of taxes and three relating to the admission of particular attorneys and many other bills were vetoed because Gov. Hughes believed the matter should have been taken up with the proper authorities.

It is a part of the policy of conservation in government that constitutional powers be not lightly transferred, merged, or confused. The Hughes legislative record and the Hughes memoranda of approval and of veto show an unfailing regard for the proper exercise of Federal, State, and local powers.

*XV. Registration of land titles.*

The Torrens system of registration of land titles was made effective in the State on May 20, 1908, after a careful investigation by a commission, to avoid repeated examinations of title and an unnecessary multiplication of record. Gov. Hughes's memorandum of approval stated:

"A commission was appointed last year to examine the matter, and after the most careful consideration of the whole subject, including the experience of other States and of foreign countries, the majority of the commission recommended this legislation. Objections were presented in a careful minority report. After this thorough examination, and with the opposing views clearly presented, the legislature has adopted the recommendations of the commission.

"I believe that this measure represents an important movement in the direction of facilitating land transfers, and that it should become a law. The merits of the objection can be tested, and indeed can satisfactorily be tested only, by experience. If we are ever to escape the complications, delays, and expense incident to present methods, a beginning must be made, and the painstaking and intelligent efforts which have culminated in the passage of this bill should not be frustrated."

*XVI. Attachment of wages for debt.*

An amendment to the existing garnishee law was passed in 1908 (chap. 148) which slightly lowered the limit of wages exempted to $12 a week, but made the law apply to all debts for goods purchased instead of only to those for "necessaries." On the one hand, the limit of wages exempted from such attachment was lowered so that a wage of $12 a week or over could be attached, whereas before only a wage exceeding $12 could be garnished. On the other hand, the limit as to the kinds of debt for which wages may be attached was removed, whereas before only debts for "necessaries" bought or for wages due to a domestic servant or salary due to an employee could be made the basis of such an attachment. This enlargement of the law's application removed the question of what constituted a "necessary," and, still more important, removed a restriction which virtually tended to make the law apply especially to working people, as the latter's debts, more often than those of any others, are debts for necessaries. The purchaser of luxuries as well as the buyer of necessaries was brought under the law.

*XVII. Protection of life insurance of policyholders.*

Under Gov. Hughes's direction chapter 595 of the laws of 1909 was passed, which amended the insurance law with respect to the surrender value of lapsed or forfeited policies. Under the amendment a person who had been insured for at least three years and had then found it impossible to continue his premium payments was protected to a considerable degree. The amendment provided that the reserve on such a policy must be accepted by the insurance company as a single premium of life insurance either to continue the insurance of the policy in force at its full amount so long as such single premium would purchase temporary insurance for that amount or, in the discretion of the insured, to purchase a properly computed amount of paid-up insurance.

During the same year amendments to the standard provisions required that all life or endowment policies must contain a provision that the insured is entitled to have the policy reinstated at any time within three years from the date of default unless the cash value had been duly paid or the extension period had expired upon the production of evidence of insurability satisfactory to the company and the payment of all overdue premiums and other indebtedness with interest at 6 per cent per annum.

*XVIII. Regulation of loan associations.*

The hardships caused by loan associations preying upon the poor were corrected to a considerable extent by chapter 127 of the laws of 1910, amending the banking laws relative to personal associations. It provided that a corporation organized for the purpose of aiding persons in need of pecuniary assistance shall have paid in the whole of its capital stock, which must not be less than $10,000; that the superintendent of banks shall investigate the character, responsibility, and general fitness of the stockholders, and upon the filing of a bond shall license such corporations. The amendments required also the filing of reports and examination of books by the superintendent of banks at least once a year, provided for penalties and the revocation of the license for violations, and outlined the procedure for dissolution of the corporation. When acting as a pawnbroker such an association can not loan more than $200 to any one person, and can not charge more than 3 per cent interest a month, not to be charged or collected in advance.

Upon his record as governor of New York State the Republican Party asks the people of this country to elect Mr. Hughes as President. The qualities he showed as administrator of the State of New York are the qualities most needed in a national Executive for these United States.

## Urgent Need of Government Paper Mill.

### EXTENSION OF REMARKS

OF

### HON. CLYDE H. TAVENNER,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr. TAVENNER. Mr. Speaker, on August 31, 1916, I introduced in the House the following bill (H. R. 17699) providing for a Government pulp and paper mill:

*Be it enacted, etc.*, That the Public Printer is hereby authorized and directed to provide, either by purchase or erection, or both, a pulp and paper mill or mills for the manufacture of print paper for the Government of the United States, said mill or mills to have a daily capacity of not less than 50 tons of paper; to be located at a place or places approved by the Joint Committee on Printing, with special reference to utilization of the forests, minerals, water power, and other resources on the public lands.

If the location or locations so selected are on the public lands, the President of the United States is hereby authorized and empowered, in his judgment, to take from the lands of the United States such site or sites and the rights of way thereto as are necessary for the purpose of carrying out this act. And if the United States owns no suitable site or sites, authority is hereby given to acquire by purchase, condemnation, or gift such site or sites and the rights of way thereto as may be necessary.

The Public Printer is further authorized to construct, maintain, and operate, at or on any site or sites so designated, dams, locks, improvements to navigation, power houses, and other plants and equipment necessary or convenient for generation of power and for the production of pulp and other materials required in the manufacture of print paper for the Government.

SEC. 2. That for the purpose of manufacturing paper as provided herein the Secretary of the Interior and the Secretary of Agriculture are hereby authorized and directed to sell to the Public Printer at a fair price such available wood, minerals, and other materials on the public lands under their respective jurisdictions as he may require; and the Secretary of Agriculture and the Secretary of Commerce are hereby authorized and directed to render such assistance to the Public Printer as he may request and they may deem necessary to carry out the purposes of this act in the construction and operation of a suitable plant for the manufacture of paper for the Government. If sufficient or suitable materials for the manufacture of paper can not be obtained from the public lands, the Public Printer is hereby authorized to purchase such materials in the open market at the lowest and best prices obtainable therefor after due advertisement; and he is hereby directed to give due consideration and encouragement by experiments or otherwise, in cooperation with the Department of Agriculture, to the manufacture of paper from corn and cotton stalks, cereal straws, grasses, and other fibrous plants. Paper manufactured under the supervision of the Public Printer shall conform to such standards and inspection as are provided for in the printing act approved January 12, 1895, and amendments thereof.

SEC. 3. That the products of such mill or mills shall be used by the Public Printer for the public printing and binding to the extent that he may deem necessary, and any surplus which he shall determine is not so required shall be sold and disposed of by him at not less than cost, under such regulations as he may prescribe, with the approval of the Joint Committee on Printing, first consideration being given in the sale of such surplus to the needs of other branches of the Government service, which shall procure from the Public Printer at cost all the paper for their respective requirements that he may be able to furnish them.

SEC. 4. That the Public Printer shall keep an accurate and itemized account of the cost per ton of the product of such mill or mills, and publish an annual statement of the same, together with a detailed report of the operations, receipts, and disbursements of said mill or mills, as soon after July 1 of each year as possible.

SEC. 5. That for the purposes of this act the sum of $1,000,000 is hereby authorized to be appropriated, out of any money in the Treasury of the United States not otherwise appropriated. The expenditures for drafting, technical, expert, and clerical assistance necessary shall be paid from said appropriation, and the Public Printer is hereby authorized and empowered to employ such assistance as in his discretion may be necessary to enable him to carry out the purposes herein specified.

It is proposed by this bill to construct a mill of sufficient size to produce 50 tons of paper a day, which is about double the present requirements of the Government Printing Office for print paper, and for this purpose an appropriation of $1,000,000 is authorized.

The bill requires that the mill shall be located with special reference to utilization of the forests, minerals, water power, and other resources of the public lands, and the President is authorized to set aside such site as may be selected on the public lands for that purpose. The bill further directs that the Secretary of Agriculture and the Secretary of Commerce shall assist the Public Printer in the construction and operation of the mill, which insures adequate expert and technical skill for the new enterprise, inasmuch as the Department of Agriculture and the Department of Commerce have already done considerable work along the lines proposed by this measure.

My principal purposes in urging the Government manufacture of paper are as follows: First, to provide an adequate supply of print paper at all times and at a fair price, thus protecting the Government from the grasping combines that now refuse to furnish necessary paper for the operations of the Government except at exorbitant and noncompetitive prices. Second, to obtain for newspaper publishers and the printing trade in general definite information as to the cost of the manufacture of print paper so as to likewise protect them from excessive charges by unscrupulous manufacturers who seek, under abnormal conditions, to advance their own selfish interests, entirely regardless of the public service performed by newspaper and other publishers in the distribution of necessary information to the people. Third, to utilize the forests and water power on the public lands in the economical manufacture of paper for the benefit of the Government and to prevent further waste of these resources which the paper interests are seeking to have withheld from competition with their monopolistic ownership of wood pulp and power sites. Fourth, to furnish adequate and practical means for the development of the manufacture of paper from corn and cotton stalks and similar agricultural products, which would be of vast benefit to the farmers of this country in providing a profitable market for a large portion of their products which now go to waste. The use of new fibers, other than wood, would also be of inestimable value in the conservation of the forests of the United States, the destruction of which is largely chargeable to their extravagant use in the manufacture of paper.

The Government of the United States has long been at the mercy of paper combines and monopolies that undoubtedly have profited excessively in furnishing paper to the Government Printing Office, which is one of the largest consumers of paper in the world. This situation has become all the more intolerable during the past year, when the paper manufacturers have taken advantage of conditions alleged to be due to the war to demand still more exorbitant prices for their products. Some of the manufacturers are even attempting to repudiate their contracts with the Government, though these contracts provide in several instances for increases amounting to more than 50 per cent above the price paid for the same paper last year. These contractors, while refusing to furnish paper under their agreement for the year ending March 1, 1917, are demanding two and three times their contract price when the Government seeks to make open-market purchases of the paper necessary to continue operations of the Government Printing Office. Even at these outrageous prices the Public Printer is unable to obtain any real competition, practically only one bid being submitted in most instances, and that by the company which had refused to continue furnishing paper to the Government at its contract price. In other words, there appears to be a mutual understanding among the paper trade to refrain from competitive bidding for Government business. This conduct on the part of certain paper contractors has created a most serious situation. At times the Government has had the greatest difficulty to obtain sufficient paper to print the necessary records of the Government.

With all the resources at its command, owning, as it does, vast forests and great water-power sites adequate to produce many times the required quantity of paper, the Government ought never again to be reduced to the necessity of begging the paper monopoly to furnish paper to the Public Printer regardless of price.

The present acute situation only accentuates the condition that has long prevailed in the purchase of paper for the Gov-

ernment Printing Office. Though the Joint Committee on Printing, which awards the contracts for paper, has made every effort in its power to secure adequate competition and fair prices for paper for the Government Printing Office, the fact remains that there has been but little competition for the Government's business. It has been charged that the prospective bidders have sometimes held informal meetings before submitting their proposals to the Government and have allotted different items among themselves, putting in noncompetitive bids accordingly. Every effort has been made to break up this practice and to obtain sufficient evidence to prosecute the guilty parties, but, as in nearly all cases of collusion, it has been impossible to obtain evidence sufficiently conclusive for court proceedings. This question of collusion among paper manufacturers to advance prices or otherwise in restraint of trade was gone into very carefully by a select committee of the House which made a pulp and paper investigation in 1908. That committee in its report stated that "considerable evidence was presented which might excite suspicion that such combinations had been made and were in existence." It seems, therefore, that the only course left for the Government to pursue is to engage in the manufacture of paper for itself, and in this regard it is very fortunately situated, as has already been pointed out, in the ownership of practically everything necessary to carry out the enterprise successfully.

In addition to providing paper for the Government at cost price, it is proposed by the bill to aid newspaper and other publishers in securing paper for their use at a fair price. The cost of producing paper, particularly news print paper, has long been a mooted question. It was investigated at great length by a select committee in 1908 and again by the Tariff Board in 1911, but is still a subject of much controversy. The bill proposes, therefore, that the Public Printer shall keep an accurate and itemized account of the cost per ton of the product of the Government paper mill and report same to Congress annually. It is believed that this report as to cost will be of inestimable value in determining a fair price to be charged by paper manufacturers.

The bill also provides that if the Public Printer shall have any surplus on hand after supplying the needs of the Government, such surplus shall be sold by him at not less than cost. It is believed that this surplus product may have some effect in preventing exorbitant prices for paper in the future. That the Public Printer's price per ton may represent an adequate charge for the paper the Secretary of the Interior and the Secretary of Agriculture are directed to sell to him the necessary raw materials obtained from the public lands "at a fair price," so that all elements of cost will enter into the report submitted by the Public Printer as to the operation of his plant.

Utilization of the forest reserves and water-power sites now owned by the Government is really one of the important features of the bill. It is a most wasteful policy to leave these Government-owned forests and water-power sites in idleness when they can be readily turned to such great advantage. This policy of the Government has been taken advantage of, undoubtedly, by the paper manufacturers to greatly increase the price of their own product, having no fear at present of competition from the materials that are locked up in the Government's vast storehouses. As a matter of fact, the Government has not even been able to dispose of its wood to the pulp mills of the United States, though it has large quantities on hand at present. Pulp and paper manufacturers have been declaring that high prices of paper are due to the scarcity and excessive cost of wood pulp, due principally to the difficulty of obtaining pulp from Canada and existing war conditions. The President, however, has just made public a letter from the Secretary of Agriculture, under date of August 3, 1916, setting forth the fact that the Forest Service has offered for sale large quantities of timber favorable for pulp operation, but that up to the present time it has not been able to make such sales. This statement from the Secretary of Agriculture completely refutes the claim of the paper manufacturers that their present prices are due to the scarcity of pulp-making materials. The secretary of Agriculture says in this regard in his letter concerning the print-paper situation:

> The Forest Service has offered for sale at various times large amounts of timber on the national forests in logging chances favorable for pulp operations. These areas are located mainly in the Pacific northwest and in Alaska, and offer combinations of suitable and cheap timber with large quantities of easily developed water power. Up to the present time it has not been possible to make such sales. The chief difficulty has been that the western markets have been fully supplied, and, in fact, mill capacity probably has been in excess of market demands. Western mills with the advantage of cheap power and cheap timber seemed to be unable to enter eastern and middle western markets, and the only opportunity for successful enterprises seemed to be the more or less uncertain possibility of being able to develop foreign and chiefly oriental markets. These areas undoubtedly will be placed under contract as soon as economic conditions permit their development. They are offered under terms designed to encourage the development of the pulp and paper industry.

That the national forests contain enough timber to operate half a hundred mills of the size of the one proposed by this bill is easily apparent from the fact that the forest reserves owned by the public now contain 162,773,280 acres, and slightly more than 1,000,000,000 board feet of timber was sold from these reserves in 1915. This 1,000,000,000 feet constitutes ripe timber which was of no further advantage to the forest reserves, and consequently its cutting was in the interests of forest conservation. Reduced to cords this represents an annual supply of 650,000 cords. Compared with this vast supply, a 100-ton mill, or double the capacity of the mill proposed by the bill, would use only 37,500 cords of wood per year, according to the statement of foremost paper manufacturers.

David S. Cowles, president of the American Paper and Pulp Association, in his testimony before the select committee in 1908 (vol. 2, p. 893) stated that 7,500 acres per year would be sufficient to supply pulp wood for a 100-ton mill cutting 5 cords to the acre. By recutting this acreage once in 15 years, which is believed to be a sufficient time to allow a growth of suitable new timber, it would require a total of 112,500 acres to keep a 100-ton mill in operation. This, of course, is a mere bagatelle as compared with the 162,000,000 acres in the national forest reservation, a large part of which would be available for pulp wood for a Government plant.

There is no question, therefore, that the Government has an ample supply of timber for the operation of a paper mill, and that it has any number of water-power sites available in suitable localities for such a mill.

This view is confirmed by a statement which Acting Forester W. B. Greeley, of the United States Forest Service, has just submitted to the Joint Committee on Printing in regard to the volume of national forest timber suitable for pulp-making purposes. In this statement, Mr. Greeley says:

> The commercial feasibility of the establishment of a pulp plant hinges partly on the supply of timber and partly on the water power available; the national forests often combine these two factors admirably. The western country abounds in undeveloped water power; to utilize these streams in conjunction with a pulp plant is perfectly feasible in several locations of which examinations have already been made. As illustrative of the resources of the national forests which can be drawn upon, I would point out an area on the Yaak River in the Kootenai National Forest, Mont., where approximately 500,000,000 feet of Engelmann spruce and other woods adapted to pulp making are to be had, with an excellent undeveloped water-power site. On the South Fork and Middle Fork of the Flathead River in the Flathead National Forest, Mont., are areas estimated to contain 2,000,000,000 feet and 1,500,000,000 feet, respectively, of paper-making woods; in these two instances likewise there is an opportunity for cheap water-power development. Another pulp-wood area is found on the Middle Fork of the Clearwater River in the Selway National Forest, Idaho, which has a stand of more than a billion feet and excellent water powers; again, on the Plumas National Forest, Cal., an area has been examined which contains about 650,000 cords of wood suitable for pulp making and 3,500 horsepower awaiting development. On the Tongass and Chugach National Forests in Alaska is a stand of more than 70,000,000,000 feet of timber, a large percentage of which is Engelmann spruce and western hemlock, from which can be manufactured a good grade of pulp. Water power, too, is abundant, and the Alaska projects have the added advantage of being on tidewater. The physical conditions in southern Alaska resemble in many respects those of Norway and Sweden, which have been leading countries in the production of pulp and paper. There is no question that the Alaskan National Forests are capable of great service to the country in the future, with their enormous supply of good paper-making woods.

The Government has already done considerable experimenting with various materials other than wood pulp for the manufacture of paper. These experiments have been conducted largely by the Department of Agriculture. That suitable paper can be made from such material as cotton stalks, corn stalks, cereal straws, grasses, and various fibrous plants is no longer an experiment. It has been difficult, however, to induce paper manufacturers to take up the manufacture of paper from any of these materials. This attitude on the part of the manufacturers is believed to be due, in many instances, to their large holdings in wood-pulp mills and heavy investments in timber lands. It is quite probable that they fear that the successful manufacture of paper from material other than wood pulp would greatly depreciate the value of their investment and encourage new and undesirable competition in the paper industry.

Consequently it seems that the only way to obtain a practical test of these other materials for the manufacture of paper is for the Government itself to undertake such a test. That can only be done by the establishment of a mill of adequate size to manufacture paper in commercial quantities. The proposed mill could be used for such a purpose, as its 50-ton capacity would be more than sufficient to supply paper for the immediate needs of the Government. Germany has already commenced the manufacture of paper from cotton stalks, and paper experts have no doubt but that print paper made from cotton and corn

stalks will sooner or later be a commercial success. If the Government can advance that success, it will be of immense benefit to the farmers of the United States who now find little or no use for their corn and cotton stalks.

If the proposed mill were to be erected with no other object in view than that of making a commercial success of manufacturing paper from these waste materials of the farmer, it would more than justify the proposed expenditure.

The authorized expenditure of $1,000,000 for a paper plant of not less than 50 tons daily capacity is based upon expert figures submitted by the Tariff Board, through its report relative to the pulp and news print paper industry in 1911. (S. Doc. 31, 62d Cong.) This report indicates that the necessary capital investment per ton per day for a balanced plant, consisting of a ground-wood mill, sulphite mill, and paper mill, suitably equipped, ranges from $15,000 to $20,000 for a 100-ton plant. At the higher figure, which includes the cost of hydraulic development, a 50-ton plant, such as is proposed, would cost approximately $1,000,000, the authorized appropriation. In this regard I quote as follows from the Tariff Board report, pages 72–73:

> The lowest actual balanced mill which we have examined in this regard shows $15,000. The lowest calculations we have received (from a professional engineer) show an estimated range from $15,000 for a 25-ton mill, with $13,000 for a 50-ton mill, and $10,900 for a 100-ton mill to $9,700 for a 200-ton mill. These last figures do not include any part of the cost of hydraulic development, so that the totals would be increased by this amount, which, on the basis of 75 horsepower per ton, would be $2,250 if the cost per horsepower is $30, or $3,750 at a cost per horsepower of $50, or $7,500 at a cost per horsepower of $100.
>
> It may be said in general terms that under normal conditions an investment for hydraulic power and fully equipped balanced plant of best construction and equipment, and a capacity of 100 tons per day, ought to be fully covered by $17,000 per ton per day. For a plant of smaller capacity the cost would be somewhat greater. This does not include either cost of water-storage facilities or provision for extra-grinding capacity to offset lack of such storage. If these were included, the total might be increased to $20,000. Either of these figures should be taken as a liberal estimate.

## Speech of President Woodrow Wilson Accepting the Nomination for President by the Democratic Party.

---

EXTENSION OF REMARKS

OF

# HON. FRANK E. DOREMUS,

OF MICHIGAN,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr. DOREMUS. Mr. Speaker, under leave granted me to extend my remarks in the RECORD, I herewith insert the speech of President Woodrow Wilson, accepting the Democratic nomination for the Presidency, delivered at Shadow Lawn, New Jersey, September 2, 1916.

The speech is as follows:

SPEECH OF PRESIDENT WOODROW WILSON, ACCEPTING THE NOMINATION FOR PRESIDENT BY THE DEMOCRATIC PARTY, DELIVERED AT SHADOW LAWN, NEW JERSEY, SATURDAY, SEPTEMBER 2, 1916.

Senator JAMES, gentlemen of the notification committee, fellow citizens, I can not accept the leadership and responsibility which the national Democratic convention has again in such generous fashion asked me to accept without first expressing my profound gratitude to the party for the trust it reposes in me after four years of fiery trial in the midst of affairs of unprecedented difficulty, and the keen sense of added responsibility with which this honor fills—I had almost said burdens—me as I think of the great issues of national life and policy involved in the present and immediate future conduct of our Government. I shall seek, as I have always sought, to justify the extraordinary confidence thus reposed in me by striving to purge my heart and purpose of every personal and of every misleading party motive and devoting every energy I have to the service of the Nation as a whole, praying that I may continue to have the counsel and support of all forward-looking men at every turn of the difficult business.

For I do not doubt that the people of the United States will wish the Democratic Party to continue in control of the Government. They are not in the habit of rejecting those who have actually served them for those who are making doubtful and conjectural promises of service. Least of all are they likely to substitute those who promised to render them particular services and proved false to that promise for those who have actually rendered those very services.

Boasting is always an empty business, which pleases nobody but the boaster, and I have no disposition to boast of what the Democratic Party has accomplished. It has merely done its duty. It has merely fulfilled its explicit promises. But there can be no violation of good taste in calling attention to the manner in which those promises have been carried out or in adverting to the interesting fact that many of the things accomplished were what the opposition party had again and again promised to do but had left undone. Indeed that is manifestly part of the business of this year of reckoning and assessment. There is no means of judging the future except by assessing the past. Constructive action must be weighed against destructive comment and reaction. The Democrats either have or have not understood the varied interests of the country. The test is contained in the record.

What is that record? What were the Democrats called into power to do? What things had long waited to be done, and how did the Democrats do them? It is a record of extraordinary length and variety, rich in elements of many kinds, but consistent in principle throughout and susceptible of brief recital.

The Republican Party was put out of power because of failure, practical failure, and moral failure; because it had served special interests and not the country at large; because, under the leadership of its preferred and established guides, of those who still make its choices, it had lost touch with the thoughts and the needs of the Nation and was living in a past age and under a fixed illusion—the illusion of greatness. It had framed tariff laws based upon a fear of foreign trade, a fundamental doubt as to American skill, enterprise, and capacity, and a very tender regard for the profitable privileges of those who had gained control of domestic markets and domestic credits; and yet had enacted antitrust laws which hampered the very things they meant to foster, which were stiff and inelastic, and in part unintelligible. It had permitted the country throughout the long period of its control to stagger from one financial crisis to another under the operation of a national banking law of its own framing which made stringency and panic certain and the control of the larger business operations of the country by the bankers of a few reserve centers inevitable; had made as if it meant to reform the law but had faint-heartedly failed in the attempt, because it could not bring itself to do the one thing necessary to make the reform genuine and effectual, namely, break up the control of small groups of bankers. It had been oblivious, or indifferent, to the fact that the farmers, upon whom the country depends for its food and in the last analysis for its prosperity, were without standing in the matter of commercial credit, without the protection of standards in their market transactions, and without systematic knowledge of the markets themselves; that the laborers of the country, the great army of men who man the industries it was professing to father and promote, carried their labor as a mere commodity to market, were subject to restraint by novel and drastic process in the courts, were without assurance of compensation for industrial accidents, without Federal assistance in accommodating labor disputes, and without national aid or advice in finding the places and the industries in which their labor was most needed. The country had no national system of road construction and development. Little intelligent attention was paid to the Army and not enough to the Navy. The other Republics of America distrusted us, because they found that we thought first of the profits of American investors and only as an afterthought of impartial justice and helpful friendship. Its policy was provincial in all things; its purposes were out of harmony with the temper and purpose of the people and the timely development of the Nation's interests.

So things stood when the Democratic Party came into power. How do they stand now? Alike in the domestic field and in the wide field of the commerce of the world, American business and life and industry have been set free to move as they never moved before.

The tariff has been revised, not on the principle of repelling foreign trade, but upon the principle of encouraging it, upon something like a footing of equality with our own in respect of the terms of competition, and a Tariff Board has been created whose function it will be to keep the relations of American with foreign business and industry under constant observation, for the guidance alike of our business men and of our Congress. American energies are now directed toward the markets of the world.

The laws against trusts have been clarified by definition, with a view to making it plain that they were not directed against big business, but only against unfair business and the pretense of competition where there was none; and a Trade Commission has been created with powers of guidance and accommodation which have relieved business men of unfounded fears and set them upon the road of hopeful and confident enterprise.

By the Federal reserve act the supply of currency at the disposal of active business has been rendered elastic, taking its volume not from a fixed body of investment securities but from

the liquid assets of daily trade; and these assets are assessed and accepted, not by distant groups of bankers in control of unavailable reserves, but by bankers at the many centers of local exchange, who are in touch with local conditions everywhere.

Effective measures have been taken for the re-creation of an American merchant marine and the revival of the American carrying trade indispensable to our emancipation from the control which foreigners have so long exercised over the opportunities, the routes, and the methods of our commerce with other countries.

The Interstate Commerce Commission is about to be reorganized to enable it to perform its great and important functions more promptly and more efficiently. We have created, extended, and improved the service of the parcel post.

So much we have done for business. What other party has understood the task so well or executed it so intelligently and energetically? What other party has attempted it at all? The Republican leaders, apparently, know of no means of assisting business but "protection." How to stimulate it and put it upon a new footing of energy and enterprise they have not suggested.

For the farmers of the country we have virtually created commercial credit, by means of the Federal reserve act and the rural credits act. They now have the standing of other business men in the money market. We have successfully regulated speculation in "futures" and established standards in the marketing of grains. By an intelligent warehouse act we have assisted to make the standard crops available as never before both for systematic marketing and as a security for loans from the banks. We have greatly added to the work of neighborhood demonstration on the farm itself of improved methods of cultivation, and, through the intelligent extension of the functions of the Department of Agriculture, have made it possible for the farmer to learn systematically where his best markets are and how to get at them.

The workingmen of America have been given a veritable emancipation, by the legal recognition of a man's labor as part of his life, and not a mere marketable commodity; by exempting labor organizations from processes of the courts which treated their members like fractional parts of mobs and not like accessible and responsible individuals; by releasing our seamen from involuntary servitude; by making adequate provision for compensation for industrial accidents; by providing suitable machinery for mediation and conciliation in industrial disputes; and by putting the Federal Department of Labor at the disposal of the workingman when in search of work.

We have effected the emancipation of the children of the country by releasing them from hurtful labor. We have instituted a system of national aid in the building of highroads such as the country has been feeling after for a century. We have sought to equalize taxation by means of an equitable income tax. We have taken the steps that ought to have been taken at the outset to open up the resources of Alaska. We have provided for national defense upon a scale never before seriously proposed upon the responsibility of an entire political party. We have driven the tariff lobby from cover and obliged it to substitute solid argument for private influence.

This extraordinary recital must sound like a platform, a list of sanguine promises; but it is not. It is a record of promises made four years ago and now actually redeemed in constructive legislation.

These things must profoundly disturb the thoughts and confound the plans of those who have made themselves believe that the Democratic Party neither understood nor was ready to assist the business of the country in the great enterprises which it is its evident and inevitable destiny to undertake and carry through. The breaking up of the lobby must especially disconcert them, for it was through the lobby that they sought and were sure they had found the heart of things. The game of privilege can be played successfully by no other means.

This record must equally astonish those who feared that the Democratic Party had not opened its heart to comprehend the demands of social justice. We have in four years come very near to carrying out the platform of the Progressive Party as well as our own, for we also are progressives.

There is one circumstance connected with this program which ought to be very plainly stated. It was resisted at every step by the interests which the Republican Party had catered to and fostered at the expense of the country, and these same interests are now earnestly praying for a reaction which will save their privileges—for the restoration of their sworn friends to power before it is too late to recover what they have lost. They fought with particular desperation and infinite resourcefulness the reform of the banking and currency system, knowing that to be the citadel of their control; and most anxiously are they hoping and planning for the amendment of the Federal reserve act by the concentration of control in a single bank which the old familiar group of bankers can keep under their eye and direction. But while the "big men" who used to write the tariffs and command the assistance of the Treasury have been hostile—all but a few with vision—the average business man knows that he has been delivered, and that the fear that was once every day in his heart, that the men who controlled credit and directed enterprise from the committee rooms of Congress would crush him, is there no more, and will not return—unless the party that consulted only the "big men" should return to power—the party of masterly inactivity and cunning resourcefulness in standing pat to resist change.

The Republican Party is just the party that can not meet the new conditions of a new age. It does not know the way and it does not wish new conditions. It tried to break away from the old leaders and could not. They still select its candidates and dictate its policy, still resist change, still hanker after the old conditions, still know no methods of encouraging business but the old methods. When it changes its leaders and its purposes and brings its ideas up to date it will have the right to ask the American people to give it power again, but not until then. A new age, an age of revolutionary change, needs new purposes and new ideas.

In foreign affairs we have been guided by principles clearly conceived and consistently lived up to. Perhaps they have not been fully comprehended because they have hitherto governed international affairs only in theory, not in practice. They are simple, obvious, easily stated, and fundamental to American ideals.

We have been neutral not only because it was the fixed and traditional policy of the United States to stand aloof from the politics of Europe and because we had had no part either of action or of policy in the influences which brought on the present war, but also because it was manifestly our duty to prevent, if it were possible, the indefinite extension of the fires of hate and desolation kindled by that terrible conflict and seek to serve mankind by reserving our strength and our resources for the anxious and difficult days of restoration and healing which must follow, when peace will have to build its house anew.

The rights of our own citizens, of course, became involved; that was inevitable. Where they did, this was our guiding principle: That property rights can be vindicated by claims for damages and no modern nation can decline to arbitrate such claims; but the fundamental rights of humanity can not be. The loss of life is irreparable. Neither can direct violations of a nation's sovereignty await vindication in suits for damages. The nation that violates these essential rights must expect to be checked and called to account by direct challenge and resistance. It at once makes the quarrel in part our own. These are plain principles, and we have never lost sight of them or departed from them, whatever the stress or the perplexity of circumstances or the provocation to hasty resentment. The record is clear and consistent throughout and stands distinct and definite for anyone to judge who wishes to know the truth about it.

The seas were not broad enough to keep the infection of the conflict out of our own politics. The passions and intrigues of certain active groups and combinations of men amongst us who were born under foreign flags injected the poison of disloyalty into our own most critical affairs, laid violent hands upon many of our industries, and subjected us to the shame of divisions of sentiment and purpose in which America was contemned and forgotten. It is part of the business of this year of reckoning and settlement to speak plainly and act with unmistakable purpose in rebuke of these things, in order that they may be forever hereafter impossible. I am the candidate of a party, but I am above all things else an American citizen. I neither seek the favor nor fear the displeasure of that small alien element amongst us which puts loyalty to any foreign power before loyalty to the United States.

While Europe was at war our own continent, one of our own neighbors, was shaken by revolution. In that matter, too, principle was plain, and it was imperative that we should live up to it if we were to deserve the trust of any real partisan of the right as free men see it. We have professed to believe, and we do believe, that the people of small and weak States have the right to expect to be dealt with exactly as the people of big and powerful States would be. We have acted upon that principle in dealing with the people of Mexico.

Our recent pursuit of bandits into Mexican territory was no violation of that principle. We ventured to enter Mexican territory only because there were no military forces in Mexico that could protect our border from hostile attack and our own people from violence, and we have committed there no single

act of hostility or interference even with the sovereign authority of the Republic of Mexico herself. It was a plain case of the violation of our own sovereignty, which could not wait to be vindicated by damages and for which there was no other remedy. The authorities of Mexico were powerless to prevent it.

Many serious wrongs against the property, many irreparable wrongs against the persons of Americans have been committed within the territory of Mexico herself during this confused revolution, wrongs which could not be effectually checked so long as there was no constituted power in Mexico which was in a position to check them. We could not act directly in that matter ourselves without denying Mexicans the right to any revolution at all which disturbed us and making the emancipation of her own people await our own interest and convenience.

For it is their emancipation that they are seeking—blindly it may be, and as yet ineffectually, but with profound and passionate purpose and within their unquestionable right, apply what true American principle you will—any principle that an American would publicly avow. The people of Mexico have not been suffered to own their own country or direct their own institutions. Outsiders, men out of other nations and with interests too often alien to their own, have dictated what their privileges and opportunities should be and who should control their land, their lives, and their resources—some of them Americans, pressing for things they could never have got in their own country. The Mexican people are entitled to attempt their liberty from such influences; and so long as I have anything to do with the action of our great Government I shall do everything in my power to prevent anyone standing in their way. I know that this is hard for some persons to understand; but it is not hard for the plain people of the United States to understand. It is hard doctrine only for those who wish to get something for themselves out of Mexico. There are men, and noble women, too, not a few, of our own people, thank God! whose fortunes are invested in great properties in Mexico who yet see the case with true vision and assess its issues with true American feeling. The rest can be left for the present out of the reckoning until this enslaved people has had its day of struggle toward the light. I have heard no one who was free from such influences propose interference by the United States with the internal affairs of Mexico. Certainly no friend of the Mexican people has proposed it.

The people of the United States are capable of great sympathies and a noble pity in dealing with problems of this kind. As their spokesman and representative, I have tried to act in the spirit they would wish me to show. The people of Mexico are striving for the rights that are fundamental to life and happiness—15,000,000 oppressed men, overburdened women, and pitiful children in virtual bondage in their own home of fertile lands and inexhaustible treasure! Some of the leaders of the revolution may often have been mistaken and violent and selfish, but the revolution itself was inevitable and is right. The unspeakable Huerta betrayed the very comrades he served, traitorously overthrew the government of which he was a trusted part, impudently spoke for the very forces that had driven his people to the rebellion with which he had pretended to sympathize. The men who overcame him and drove him out represent at least the fierce passion of reconstruction which lies at the very heart of liberty; and so long as they represent, however imperfectly, such a struggle for deliverance, I am ready to serve their ends when I can. So long as the power of recognition rests with me the Government of the United States will refuse to extend the hand of welcome to anyone who obtains power in a sister republic by treachery and violence. No permanency can be given the affairs of any republic by a title based upon intrigue and assassination. I declared that to be the policy of this administration within three weeks after I assumed the Presidency. I here again vow it. I am more interested in the fortunes of oppressed men and pitiful women and children than in any property rights whatever. Mistakes I have no doubt made in this perplexing business, but not in purpose or object.

More is involved than the immediate destinies of Mexico and the relations of the United States with a distressed and distracted people. All America looks on. Test is now being made of us whether we be sincere lovers of popular liberty or not and are indeed to be trusted to respect national sovereignty among our weaker neighbors. We have undertaken these many years to play big brother to the Republics of this hemisphere. This is the day of our test whether we mean, or have ever meant, to play that part for our own benefit wholly or also for theirs. Upon the outcome of that test (its outcome in their minds, not in ours) depends every relationship of the United States with Latin America, whether in politics or in commerce and enterprise. These are great issues and lie at the heart of the gravest tasks of the future, tasks both economic and political and very intimately inwrought with many of the most vital of the new issues of the politics of the world. The Republics of America have in the last three years been drawing together in a new spirit of accommodation, mutual understanding, and cordial cooperation. Much of the politics of the world in the years to come will depend upon their relationships with one another. It is a barren and provincial statesmanship that loses sight of such things!

The future, the immediate future, will bring us squarely face to face with many great and exacting problems which will search us through and through whether we be able and ready to play the part in the world that we mean to play. It will not bring us into their presence slowly, gently, with ceremonious introduction, but suddenly and at once, the moment the war in Europe is over. They will be new problems, most of them; many will be old problems in a new setting and with new elements which we have never dealt with or reckoned the force and meaning of before. They will require for their solution new thinking, fresh courage and resourcefulness, and in some matters radical reconsiderations of policy. We must be ready to mobilize our resources alike of brains and of materials.

It is not a future to be afraid of. It is, rather, a future to stimulate and excite us to the display of the best powers that are in us. We may enter it with confidence when we are sure that we understand it—and we have provided ourselves already with the means of understanding it.

Look first at what it will be necessary that the nations of the world should do to make the days to come tolerable and fit to live and work in; and then look at our part in what is to follow and our own duty of preparation. For we must be prepared both in resources and in policy.

There must be a just and settled peace, and we here in America must contribute the full force of our enthusiasm and of our authority as a nation to the organization of that peace upon world-wide foundations that can not easily be shaken. No nation should be forced to take sides in any quarrel in which its own honor and integrity and the fortunes of its own people are not involved; but no nation can any longer remain neutral as against any willful disturbance of the peace of the world. The effects of war can no longer be confined to the areas of battle. No nation stands wholly apart in interest when the life and interests of all nations are thrown into confusion and peril. If hopeful and generous enterprise is to be renewed, if the healing and helpful arts of life are indeed to be revived when peace comes again, a new atmosphere of justice and friendship must be generated by means the world has never tried before. The nations of the world must unite in joint guaranties that whatever is done to disturb the whole world's life must first be tested in the court of the whole world's opinion before it is attempted.

These are the new foundations the world must build for itself, and we must play our part in the reconstruction, generously and without too much thought of our separate interests. We must make ourselves ready to play it intelligently, vigorously, and well.

One of the contributions we must make to the world's peace is this: We must see to it that the people in our insular possessions are treated in their own lands as we would treat them here and make the rule of the United States mean the same thing everywhere—the same justice, the same consideration for the essential rights of men.

Besides contributing our ungrudging moral and practical support to the establishment of peace throughout the world, we must actively and intelligently prepare ourselves to do our full service in the trade and industry which are to sustain and develop the life of the nations in the days to come.

We have already been provident in this great matter and supplied ourselves with the instrumentalities of prompt adjustment. We have created, in the Federal Trade Commission, a means of inquiry and of accommodation in the field of commerce which ought both to coordinate the enterprises of our traders and manufacturers and to remove the barriers of misunderstanding and of a too technical interpretation of the law. In the new Tariff Commission we have added another instrumentality of observation and adjustment which promises to be immediately serviceable. The Trade Commission substitutes counsel and accommodation for the harsher processes of legal restraint, and the Tariff Commission ought to substitute facts for prejudices and theories. Our exporters have for some time had the advantage of working in the new light thrown upon foreign markets and opportunities of trade by the intelligent inquiries and activities of the Bureau of Foreign and Domestic Commerce which the Democratic Congress so wisely created in 1912. The Tariff

Commission completes the machinery by which we shall be enabled to open up our legislative policy to the facts as they develop.

We can no longer indulge our traditional provincialism. We are to play a leading part in the world drama whether we wish it or not. We shall lend, not borrow; act for ourselves, not imitate or follow; organize and initiate, not peep about, merely to see where we may get in.

We have already formulated and agreed upon a policy of law which will explicitly remove the ban now supposed to rest upon cooperation amongst our exporters in seeking and securing their proper place in the markets of the world. The field will be free, the instrumentalities at hand. It will only remain for the masters of enterprise amongst us to act in energetic concert and for the Government of the United States to insist upon the maintenance throughout the world of those conditions of fairness and of even-handed justice in the commercial dealings of the nations with one another upon which, after all, in the last analysis, the peace and ordered life of the world must ultimately depend.

At home also we must see to it that the men who plan and develop and direct our business enterprises shall enjoy definite and settled conditions of law, a policy accommodated to the freest progress. We have set the just and necessary limits. We have put all kinds of unfair competition under the ban and penalty of the law. We have barred monopoly. These fatal and ugly things being excluded, we must now quicken action and facilitate enterprise by every just means within our choice. There will be peace in the business world, and, with peace, revived confidence and life.

We ought both to husband and to develop our natural resources, our mines, our forests, our water power. I wish we could have made more progress than we have made in this vital matter; and I call once more, with the deepest earnestness and solicitude, upon the advocates of a careful and provident conservation, on the one hand, and the advocates of a free and inviting field for private capital, on the other, to get together in a spirit of genuine accommodation and agreement and set this great policy forward at once.

We must hearten and quicken the spirit and efficiency of labor throughout our whole industrial system by everywhere and in all occupations doing justice to the laborer, not only by paying a living wage but also by making all the conditions that surround labor what they ought to be. And we must do more than justice. We must safeguard life and promote health and safety in every occupation in which they are threatened or imperiled. That is more than justice, and better, because it is humanity and economy.

We must coordinate the railway systems of the country for national use, and must facilitate and promote their development with a view to that coordination and to their better adaptation as a whole to the life and trade and defense of the Nation. The life and industry of the country can be free and unhampered only if these arteries are open, efficient, and complete.

Thus shall we stand ready to meet the future circumstance and international policy effect their unfolding, whether the changes come slowly or come fast and without preface.

I have not spoken explicitly, gentlemen, of the platform adopted at St. Louis, but it has been implicit in all that I have said. I have sought to interpret its spirit and meaning. The people of the United States do not need to be assured now that that platform is a definite pledge, a practical program. We have proved to them that our promises are made to be kept.

We hold very definite ideals. We believe that the energy and initiative of our people have been too narrowly coached and superintended; that they should be set free, as we have set them free, to disperse themselves throughout the Nation; that they should not be concentrated in the hands of a few powerful guides and guardians, as our opponents have again and again, in effect, if not in purpose, sought to concentrate them. We believe, moreover—who that looks about him now with comprehending eye can fail to believe—that the day of little Americanism, with its narrow horizons, when methods of "protection" and industrial nursing were the chief study of our provincial statesmen, are past and gone, and that a day of enterprise has at last dawned for the United States whose field is the wide world.

We hope to see the stimulus of that new day draw all America, the Republics of both continents, on to a new life and energy and initiative in the great affairs of peace. We are Americans for big America, and rejoice to look forward to the days in which America shall strive to stir the world without irritating it or drawing it on to new antagonisms; when the nations with which we deal shall at last come to see upon what deep foundations of humanity and justice our passion for peace rests, and when all mankind shall look upon our great people with a new sentiment of admiration, friendly rivalry and real affection, as upon a people who, though keen to succeed, seeks always to be at once generous and just and to whom humanity is dearer than profit or selfish power.

Upon this record and in the faith of this purpose we go to the country.

## The Railroad Situation.

### EXTENSION OF REMARKS
OF
### HON. J. HAMPTON MOORE,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

*Thursday, August 31, 1916.*

Mr. MOORE of Pennsylvania. Mr. Speaker, under leave to print I submit the following communications received from two of the large commercial organizations in Philadelphia, the Manufacturers' Club and the Philadelphia Bourse, both relating to the pending railway strike situation:

AUGUST 28, 1916.

Hon. J. HAMPTON MOORE,
*House of Representatives, Washington, D. C.*

DEAR SIR: At a special meeting of the board of directors of the Manufacturers' Club, of Philadelphia, held this day, the following resolutions were adopted:

"Whereas the representatives of certain labor unions of railroad employees have demanded of their employers the unconditional grant of an 8-hour day with 10-hour pay, under penalty of the immediate paralysis of railroad traffic throughout the country by means of a strike; and

"Whereas the President of the United States, assuming the rôle of mediator, has advised the managements of the railroads to waive their request for a hearing before any board of arbitration the President may select; and

"Whereas there are involved in the controversy questions of such vital importance to the transportation interest and industries of the country that can be satisfactorily settled only by arbitration: Therefore be it

"*Resolved*, That the Manufacturers' Club of Philadelphia appeal to the President and to the American public (1) to uphold the principle of arbitration as fundamental to justice and fair dealing, and (2) to insist that no class of citizens have special prerogatives, privileges, or immunities which do not belong equally to all American citizens, rich or poor, employer or employed; and be it further

"*Resolved*, That a copy of these resolutions be sent to the President of the United States, to United States Senators from Pennsylvania, Members of Congress from Philadelphia, to the newspapers of Philadelphia, and to the national conference committee of the railways."

Yours, very truly,

[SEAL.] MANUFACTURERS' CLUB OF PHILADELPHIA,
N. J. FOLWELL, *President.*

Attest:

ELMER P. WEISEL, *Secretary.*

[Resolutions adopted by the Philadelphia Bourse, an organization composed of over 2,500 business men, firms, and corporations, having as one of its objects the improvement of the city, State, and Nation, acting through its committee on commercial affairs of its board of directors, at a meeting held Aug. 29, 1916.]

*To the honorable the Senate and House of Representatives in Congress assembled.*

Whereas the transportation of passengers, mail, express matter, and freight is and has become generally recognized as a public service, and the corporations engaged in such public service are subject to control and regulation in the interest of the public service by the several States in which they operate and by the United States; and

Whereas such public-service corporations can not perform their functions or render service to the public except through the medium of numerous operating employees; and

Whereas men employed by such public-service corporations, especially in the operating departments, are public servants, and as such owe a duty to the public which can not be lightly disregarded; and

Whereas such men voluntarily enter the employ of such corporations and by so doing assume duties and obligations to the public which become paramount to any personal claims; and

Whereas the principal operating employees of the most important public-service transportation corporations of the country disregarding their obligations to the public have threatened and are threatening to stop the operation of such companies by refusing, as a body, to work, which threats if carried out will paralyze the commerce and industries of the whole country, bringing misery to millions of working people whose wages depend upon the commerce and industries which would come to a stop without railroad transportation; and

Whereas these operating employees have formulated certain demands upon the employing public-service corporations as the price of their continuance in the performance of their duties to the public, which demands the employing corporations contend are beyond reason and beyond their ability to meet, thus raising an issue that is clearly arbitrable; and

Whereas it should be impossible for such a situation to arise and it is manifest that legislation is requisite to prevent its recurrence: Therefore

*Resolved*, That the Philadelphia Bourse, speaking for several thousand business men, urges upon the Congress the immediate enactment of legislation which will declare operating employees of public-service corporations engaged in interstate commerce to be public servants, and as

such not free to conspire or combine to leave the service of the employer simultaneously or proximately so, or at any time except upon due and sufficient notice, and shall further declare that all disputes between bodies of employees of public-service corporations engaged in interstate commerce shall be submitted to arbitration, such arbitration to be compulsory and final, refusal to accept the award being punishable as contempt of court by a fine or imprisonment or both, in the discretion of the court, no decision to be reopened for arbitration under two years from its rendering.

PHILADELPHIA BOURSE,
ROBERT COMLY,
*Chairman of Committee on Commercial Affairs.*
GEORGE E. BARTOL, *President.*

True copy.
Attest:

EMIL P. ALBRECHT, *Secretary.*

## Platforms of the Two Great Political Parties, 1856–1916, Inclusive.

## EXTENSION OF REMARKS

OF

# HON. ALBEN W. BARKLEY,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr. BARKLEY. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD I include the platforms of the two great political parties from 1856 to 1916, inclusive, as compiled by South Trimble, Clerk of the House of Representatives, June, 1916.

The platforms are as follows:

[This volume contains the Democratic and Republican platforms from 1856, the date of the organization of the Republican Party, down to the present time.]

PLATFORMS OF THE TWO GREAT POLITICAL PARTIES, 1856–1916, INCLUSIVE.

The Democratic convention of 1856 was held in Cincinnati, Ohio, June 2–6.

James Buchanan, of Pennsylvania, was nominated for President and John C. Breckinridge, of Kentucky, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1856.

1. *Resolved*, That the American Democracy place their trust in the intelligence, the patriotism, and the discriminating justice of the American people.

2. *Resolved*, That we regard this as a distinctive feature of our political creed, which we are proud to maintain before the world as the great moral element in a form of government springing from and upheld by the popular will; and we contrast it with the creed and practice of federalism, under whatever name or form, which seeks to palsy the will of the constituent, and which conceives no imposture too monstrous for the popular credulity.

3. *Resolved, therefore*, That, entertaining these views, the Democratic Party of this Union, through their delegates assembled in a general convention of the States, coming together in a spirit of concord, of devotion to the doctrines and faith of a free and representative government, and appealing to their fellow citizens for the rectitude of their intentions, renew and reassert before the American people the declarations of principles avowed by them when, on former occasions, in general convention, they presented their candidates for the popular suffrage:

1. That the Federal Government is one of limited power, derived solely from the Constitution; and the grants of power made therein ought to be strictly construed by all the departments and agents of the Government; and that it is inexpedient and dangerous to exercise doubtful constitutional powers.

2. That the Constitution does not confer upon the General Government the power to commence and carry on a general system of internal improvements.

3. That the Constitution does not confer authority upon the Federal Government, directly or indirectly, to assume the debts of the several States, contracted for local and internal improvements, or other State purposes; nor would such assumption be just or expedient.

4. That justice and sound policy forbid the Federal Government to foster one branch of industry to the detriment of any other, or to cherish the interests of one portion to the injury of another portion of our common country; that every citizen and every section of the country has a right to demand and insist upon an equality of rights and privileges, and to complete and ample protection of person and property from domestic violence or foreign aggression.

5. That it is the duty of every branch of the Government to enforce and practice the most rigid economy in conducting our public affairs, and that no more revenue ought to be raised than is required to defray the necessary expenses of the Government and for the gradual but certain extinction of the public debt.

6. That the proceeds of the public lands ought to be sacredly applied to the national objects specified in the Constitution; and that we are opposed to any law for the distribution of such proceeds among the States, as alike inexpedient in policy and repugnant to the Constitution.

7. That Congress has no power to charter a national bank; that we believe such an institution one of deadly hostility to the best interests of the country, dangerous to our republican institutions and the liberties of the people, and calculated to place the business of the country within the control of a concentrated money power and above the laws and the will of the people; and that the results of Democratic legislation in this and all other financial measures upon which issues have been made between the two political parties of the country have demonstrated to candid and practical men of all parties their soundness, safety, and utility in all business pursuits.

8. That the separation of the moneys of the Government from banking institutions is indispensable for the safety of the funds of the Government and the rights of the people.

9. That we are decidedly opposed to taking from the President the qualified veto power, by which he is enabled, under restrictions and responsibilities amply sufficient to guard the public interests, to suspend the passage of a bill whose merits can not secure the approval of two-thirds of the Senate and House of Representatives, until the judgment of the people can be obtained thereon, and which has saved the American people from the corrupt and tyrannical domination of the Bank of the United States and from a corrupting system of general internal improvements.

10. That the liberal principles embodied by Jefferson in the Declaration of Independence, and sanctioned in the Constitution, which makes ours the land of liberty and the asylum of the oppressed of every nation, have ever been cardinal principles in the Democratic faith, and every attempt to abridge the privilege of becoming citizens and the owners of soil among us ought to be resisted with the same spirit which swept the alien and sedition laws from our statutes books; and

Whereas since the foregoing declaration was uniformly adopted by our predecessors in national conventions, an adverse political and religious test has been secretly organized by a party claiming to be exclusively American, it is proper that the American Democracy should clearly define its relation thereto and declare its determined opposition to all secret political societies, by whatever name they may be called.

*Resolved*, That the foundation of this Union of States having been laid in, and its prosperity, expansion, and preeminent example in free government built upon entire freedom in matters of religious concernment, and no respect of person in regard to rank or place of birth, no party can justly be deemed national, constitutional, or in accordance with American principles which bases its exclusive organization upon religious opinions and accidental birthplace. And hence a political crusade in the nineteenth century, and in the United States of America, against Catholic and foreign born is neither justified by the past history or the future prospects of the country, nor in unison with the spirit of tolerance and enlarged freedom which peculiarly distinguishes the American system of popular government.

*Resolved*, That we reiterate with renewed energy of purpose the well-considered declarations of former conventions upon the sectional issue of domestic slavery and concerning the reserved rights of the States.

1. That Congress has no power under the Constitution to interfere with or control the domestic institutions of the several States, and that such States are the sole and proper judges of everything appertaining to their own affairs not prohibited by the Constitution; that all efforts of the abolitionists or others made to induce Congress to interfere with questions of slavery, or to take incipient steps in relation thereto, are calculated to lead to the most alarming and dangerous consequences, and that all such efforts have an inevitable tendency to diminish the happiness of the people and endanger the stability and permanency of the Union, and ought not to be countenanced by any friend of our political institutions.

2. That the foregoing proposition covers and was intended to embrace the whole subject of slavery agitation in Congress, and therefore the Democratic Party of the Union, standing on this national platform, will abide by and adhere to a faithful execution of the acts known as the "compromise" measures, settled by the Congress of 1850, "the act of reclaiming fugitives from service or labor" included, which act, being designed to carry out an express provision of the Constitution, can not, with fidelity thereto, be repealed or so changed as to destroy or impair its efficiency.

3. That the Democratic Party will resist all attempts at renewing, in Congress or out of it, the agitation of the slavery question, under whatever shape or color the attempt may be made.

4. That the Democratic Party will faithfully abide by and uphold the principles laid down in the Kentucky and Virginia resolutions of 1798, and in the report of Mr. Madison to the Virginia Legislature in 1799; that it adopts those principles as constituting one of the main foundations of its political creed, and is resolved to carry them out in their obvious meaning and import.

And that we may more distinctly meet the issue on which a sectional party, subsisting exclusively on slavery agitation, now relies to test the fidelity of the people, North and South, to the Constitution and the Union—

1. *Resolved*, That, claiming fellowship with and desiring the co-operation of all who regard the preservation of the Union under the Constitution as the paramount issue—and repudiating all sectional parties and platforms concerning domestic slavery, which seek to embroil the States and incite to treason and armed resistance to law in the Territories, and whose avowed purposes, if consummated, must end in civil war and disunion—the American Democracy recognize and adopt the principles contained in the organic laws establishing the Territories of Kansas and Nebraska as embodying the only sound and safe solution of the "slavery question" upon which the great national idea of the people of this whole country can repose in its determined conservatism of the Union—noninterference by Congress with slavery in State and Territory, or in the District of Columbia.

2. That was the basis of the compromises of 1850—confirmed by both the Democratic and Whig Parties in national conventions—ratified by the people in the election of 1852, and rightly applied to the organization of Territories in 1854.

3. That by the uniform application of this Democratic principle to the organization of Territories and to the admission of new States, with or without domestic slavery, as they may elect, the equal rights of all the States will be preserved intact, the original compacts of the Constitution maintained inviolate, and the perpetuity and expansion of this Union insured to its utmost capacity of embracing, in peace and harmony, every future American State that may be constituted or annexed with a republican form of government.

*Resolved*, That we recognize the right of the people of all the Territories, including Kansas and Nebraska, acting through the legally and fairly expressed will of a majority of actual residents, and whenever the number of their inhabitants justifies it, to form a constitution, with or without domestic slavery, and be admitted into the Union upon terms of perfect equality with the other States.

*Resolved, finally*, That, in view of the condition of popular institutions in the Old World (and the dangerous tendencies of sectional agitation, combined with the attempt to enforce civil and religious disabilities against the rights of acquiring and enjoying citizenship in our own land), a high and sacred duty is devolved, with increased responsibility upon the Democratic Party of this country, as the party of the Union, to uphold and maintain the rights of every State, and thereby

the union of the States, and to sustain and advance among us constitutional liberty, by continuing to resist all monopolies and exclusive legislation for the benefit of the few at the expense of the many, and by a vigilant and constant adherence to those principles and compromises of the Constitution which are broad enough and strong enough to embrace and uphold the Union as it was, the Union as it is, and the Union as it shall be, in the full expansion of the energies and capacity of this great and progressive people.

1. *Resolved*, That there are questions connected with the foreign policy of this country which are inferior to no domestic question whatever. The time has come for the people of the United States to declare themselves in favor of free seas and progressive free trade throughout the world, and, by solemn manifestations, to place their moral influence at the side of their successful example.

2. *Resolved*, That our geographical and political position with reference to the other States of this continent, no less than the interest of our commerce and the development of our growing power requires that we should hold as sacred the principles involved in the Monroe doctrine. Their bearing and import admit of no misconstruction, they should be applied with unbending rigidity.

3. *Resolved*, That the great highway which nature, as well as the assent of the States most immediately interested in its maintenance, has marked out for a free communication between the Atlantic and the Pacific Oceans, constitutes one of the most important achievements realized by the spirit of modern times and the unconquerable energy of our people. That result should be secured by a timely and efficient exertion of the control which we have the right to claim over it, and no power on earth should be suffered to impede or clog its progress by any interference with the relations it may suit our policy to establish between our Government and the governments of the States within whose dominions it lies. We can, under no circumstances, surrender our preponderance in the adjustment of all questions arising out of it.

4. *Resolved*, That, in view of so commanding an interest, the people of the United States can not but sympathize with the efforts which are being made by the people of Central America to regenerate that portion of the continent which covers the passage across the interoceanic isthmus.

5. *Resolved*, That the Democratic Party will expect of the next administration that every proper effort be made to insure our ascendancy in the Gulf of Mexico and to maintain a permanent protection to the great outlets through which are emptied into its waters the products raised out of the soil and the commodities created by the industry of the people of our western valleys and the Union at large.

*Resolved*, That the Democratic Party recognizes the great importance, in a political and commercial point of view, of a safe and speedy communication, by military and postal roads, through our own territory between the Atlantic and Pacific coasts of this Union, and that it is the duty of the Federal Government to exercise promptly all its constitutional power for the attainment of that object.

*Resolved*, That the administration of Franklin Pierce has been true to the great interests of the country. In the face of the most determined opposition it has maintained the laws, enforced economy, fostered progress, and infused integrity and vigor into every department of the Government at home. It has signally improved our treaty relations, extended the field of commercial enterprise, and vindicated the rights of American citizens abroad. It has asserted with eminent impartiality the just claims of every section, and has at all times been faithful to the Constitution. We therefore proclaim our unqualified approbation of its measures and its policy.

—

The first Republican national convention was held in Philadelphia, Pa., on June 17, 1856.

John C. Fremont, of California, was nominated for President and William L. Dayton, of New Jersey, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1856.

This convention of delegates, assembled in pursuance of a call addressed to the people of the United States, without regard to past political differences or divisions, who are opposed to the repeal of the Missouri Compromise, to the policy of the present administration, to the extension of slavery into free territory, in favor of admitting Kansas as a free State, of restoring the action of the Federal Government to the principles of Washington and Jefferson, and who purpose to unite in presenting candidates for the offices of President and Vice President, do

*Resolved*, That the maintenance of the principles promulgated in the Declaration of Independence and embodied in the Federal Constitution are essential to the preservation of our republican institutions, and that the Federal Constitution, the rights of the States, and the Union of the States must be preserved.

*Resolved*, That, with our republican fathers, we hold it to be a self-evident truth that all men are endowed with the inalienable right to life, liberty, and the pursuit of happiness, and that the primary object and ulterior design of our Federal Government were to secure these rights to all persons under its exclusive jurisdiction; that as our republican fathers, when they had abolished slavery in all our national territory, ordained that no person shall be deprived of life, liberty, or property without due process of law, it becomes our duty to maintain this provision of the Constitution against all attempts to violate it for the purpose of establishing slavery in the United States, by positive legislation, prohibiting its existence or extension therein; that we deny the authority of Congress, of a Territorial legislature, of any individual, or association of individuals to give legal existence to slavery in any Territory of the United States while the present Constitution shall be maintained.

*Resolved*, That the Constitution confers upon Congress sovereign power over the Territories of the United States for their government, and that in the exercise of this power it is both the right and the imperative duty of Congress to prohibit in the Territories those twin relics of barbarism, polygamy and slavery.

*Resolved*, That while the Constitution of the United States was ordained and established by the people in order to "form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty," and contains ample provision for the protection of the life, liberty, and property of every citizen, the dearest constitutional rights of the people of Kansas have been fraudulently and violently taken from them; their territory has been invaded by an armed force; spurious and pretended legislative, judicial, and executive officers have been set over them by whose usurped authority, sustained by the military power of the Government, tyrannical and unconstitutional laws have been enacted and enforced; the right of the people to keep and bear arms has been infringed; test oaths of an extraordinary and entangling nature have been imposed as a condition of exercising the right of suffrage and holding office; the right of an accused person to a speedy and public trial by an impartial jury has been denied; the right of the people to be secure in their persons, houses, papers, and effects against unreasonable searches and seizures has been violated; they have been deprived of life, liberty, and property without due process of law; the freedom of speech and of the press has been abridged; the right to choose their representatives has been made of no effect; murders, robberies, and arsons have been instigated and encouraged, and the offenders have been allowed to go unpunished; that all these things have been done with the knowledge, sanction, and procurement of the present national administration, and that for this high crime against the Constitution, the Union, and humanity we arraign the administration, the President, his advisers, agents, supporters, apologists, and accessories, either before or after the fact, before the country and before the world; and that it is our fixed purpose to bring the actual perpetrators of these atrocious outrages and their accomplices to a sure and condign punishment hereafter.

*Resolved*, That Kansas should be immediately admitted as a State of the Union, with her present free constitution, as at once the most effectual way of securing to her citizens the enjoyment of the rights and privileges to which they are entitled, and of ending the civil strife now raging in her territory.

*Resolved*, That the highwayman's plea that "might makes right," embodied in the Ostend circular, was in every respect unworthy of American diplomacy and would bring shame and dishonor upon any government or people that gave it their sanction.

*Resolved*, That a railroad to the Pacific Ocean by the most central and practicable route is imperatively demanded by the interests of the whole country, and that the Federal Government ought to render immediate and efficient aid in its construction; and as an auxiliary thereto to the immediate construction of an emigrant route on the line of the railroad.

*Resolved*, That appropriations by Congress for the improvement of rivers and harbors of a national character, required for the accommodation and security of our existing commerce, are authorized by the Constitution and justified by the obligation of the Government to protect the lives and property of its citizens.

*Resolved*, That we invite the affiliation and cooperation of the men of all parties, however differing from us in other respects, in support of the principles herein declared; and, believing that the spirit of our institutions as well as the Constitution of our country guarantees liberty of conscience and equality of rights among citizens, we oppose all legislation impairing their security.

—

The Democratic convention of 1860 was held in Baltimore, Md., June 18–23.

Stephen A. Douglas, of Illinois, was nominated for President and Herschel V. Johnson of Georgia, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1860.

1. *Resolved*, That we, the Democracy of the Union, in convention assembled, hereby declare our affirmance of the resolutions unanimously adopted and declared as a platform of principles by the Democratic convention at Cincinnati in the year 1856, believing that Democratic principles are unchangeable in their nature when applied to the same subject matters; and we recommend, as the only further resolutions, the following: Inasmuch as differences of opinion exist in the Democratic Party as to the nature and extent of the powers of a Territorial legislature, and as to the powers and duties of Congress, under the Constitution of the United States, over the institution of slavery within the Territories—

2. *Resolved*, That the Democratic Party will abide by the decisions of the Supreme Court of the United States on the questions of constitutional law.

3. *Resolved*, That it is the duty of the United States to afford ample and complete protection to all its citizens, whether at home or abroad, and whether native or foreign.

4. *Resolved*, That one of the necessities of the age, in a military, commercial, and postal point of view, is speedy communication between the Atlantic and Pacific States, and the Democratic Party pledge such constitutional government aid as will insure the construction of a railroad to the Pacific coast at the earliest practicable period.

5. *Resolved*, That the Democratic Party are in favor of the acquisition of the island of Cuba on such terms as shall be honorable to ourselves and just to Spain.

6. *Resolved*, That the enactments of State legislatures to defeat the faithful execution of the fugitive-slave law are hostile in character, subversive of the Constitution, and revolutionary in their effect.

7. *Resolved*, That it is in accordance with the true interpretation of the Cincinnati platform that, during the existence of the Territorial governments, the measure of restriction, whatever it may be, imposed by the Federal Constitution on the power of the Territorial legislature over the subject of the domestic relations, as the same has been, or shall hereafter be, finally determined by the Supreme Court of the United States, should be respected by all good citizens and enforced with promptness and fidelity by every branch of the General Government.

—

The Republican convention of 1860 was held at Chicago, Ill., May 16–18.

Abraham Lincoln, of Illinois, was nominated for President, and Hannibal Hamlin, of Maine, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1860.

*Resolved*, That we, the delegated representatives of the Republican electors of the United States, in convention assembled, in discharge of the duty we owe to our constituents and our country, unite in the following declarations:

1. That the history of the Nation during the last four years has fully established the propriety and necessity of the organization and perpetuation of the Republican Party, and that the causes which called it into existence are permanent in their nature, and now, more than ever before, demand its peaceful and constitutional triumph.

2. That the maintenance of the principles promulgated in the Declaration of Independence and embodied in the Federal Constitution, "That all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness; that to secure these rights governments are instituted among men, deriving their just powers from the consent of the governed," is essential to the preservation of our republican institutions; and that the Federal Constitution, the rights of the States, and the Union of the States must and shall be preserved.

3. That to the Union of the States this Nation owes its unprecedented increase in population, its surprising development of material resources, its rapid augmentation of wealth, its happiness at home and its honor abroad; and we hold in abhorrence all schemes for disunion, come from whatever source they may; and we congratulate the country that no Republican Member of Congress has uttered or countenanced the threats of disunion so often made by Democratic Members without rebuke and with applause from their political associates; and we denounce those threats of disunion in case of a popular overthrow of their ascendency as denying the vital principles of a free government and as an avowal of contemplated treason, which it is the imperative duty of an indignant people sternly to rebuke and forever silence.

4. That the maintenance inviolate of the rights of the States, and especially the right of each State to order and control its own domestic institutions according to its own judgment exclusively, is essential to that balance of power on which the perfection and endurance of our political fabric depends; and we denounce the lawless invasion by armed force of the soil of any State or Territory, no matter under what pretext, as among the gravest of crimes.

5. That the present Democratic administration has far exceeded our worst apprehensions in its measureless subserviency to the exactions of a sectional interest, as especially evinced in its desperate exertions to force the infamous Lecompton constitution upon the protesting people of Kansas; in construing the personal relations between master and servant to involve an unqualified property in persons; in its attempted enforcement everywhere, on land and sea, through the intervention of Congress and of the Federal courts, of the extreme pretensions of a purely local interest; and in its general and unvarying abuse of the power intrusted to it by a confiding people.

6. That the people justly view with alarm the reckless extravagance which pervades every department of the Federal Government; that a return to rigid economy and accountability is indispensable to arrest the systematic plunder of the Public Treasury by favored partisans, while the recent startling developments of fraud and corruption at the Federal metropolis show that an entire change of administration is imperatively demanded.

7. That the new dogma—that the Constitution of its own force carries slavery into any or all of the Territories of the United States—is a dangerous political heresy, at variance with the explicit provisions of that instrument itself, with contemporaneous exposition, and with legislative and judicial precedent; is revolutionary in its tendency and subversive of the peace and harmony of the country.

8. That the normal condition of all the territory of the United States is that of freedom; that as our republican fathers, when they had abolished slavery in all our national territory, ordained that "no person should be deprived of life, liberty, or property without due process of law," it becomes our duty, by legislation, whenever such legislation is necessary, to maintain this provision of the Constitution against all attempts to violate it; and we deny the authority of Congress, of a Territorial legislature, or of any individuals to give legal existence to slavery in any Territory of the United States.

9. That we brand the recent reopening of the African slave trade under the cover of our national flag, aided by perversions of judicial power, as a crime against humanity and a burning shame to our country and age, and we call upon Congress to take prompt and efficient measures for the total and final suppression of that execrable traffic.

10. That in the recent vetoes by their Federal governors of the acts of the legislatures of Kansas and Nebraska prohibiting slavery in those Territories we find a practical illustration of the boasted democratic principle of nonintervention and popular sovereignty embodied in the Kansas-Nebraska bill and a demonstration of the deception and fraud involved therein.

11. That Kansas should of right be immediately admitted as a State under the constitution recently formed and adopted by her people and accepted by the House of Representatives.

12. That while providing revenue for the support of the General Government by duties upon imports, sound policy requires such an adjustment of these imposts as to encourage the development of the industrial interests of the whole country, and we commend that policy of national exchanges which secures to the workingmen liberal wages, to agriculture remunerative prices, to mechanics and manufacturers an adequate reward for their skill, labor, and enterprise, and to the Nation commercial prosperity and independence.

13. That we protest against any sale or alienation to others of the public lands held by actual settlers, and against any view of the free-homestead policy which regards the settlers as paupers or suppliants for public bounty; and we demand the passage by Congress of the complete and satisfactory homestead measure which has already passed the House.

14. That the Republican Party is opposed to any change in our naturalization laws or any State legislation by which the rights of citizens hitherto accorded to immigrants from foreign lands shall be abridged or impaired; and in favor of giving a full and efficient protection to the rights of all classes of citizens, whether native or naturalized, both at home and abroad.

15. That appropriations by Congress for river and harbor improvements of a national character, required for the accommodation and security of an existing commerce, are authorized by the Constitution and justified by the obligation of Government to protect the lives and property of its citizens.

16. That a railroad to the Pacific Ocean is imperatively demanded by the interests of the whole country; that the Federal Government ought to render immediate and efficient aid in its construction; and that, as preliminary thereto, a daily overland mail should be promptly established.

17. Finally, having thus set forth our distinctive principles and views, we invite the cooperation of all citizens, however differing on other questions, who substantially agree with us in their affirmance and support.

---

The Democratic convention of 1864 was held at Chicago, Ill., August 29.

George B. McClellan, of New Jersey, was nominated for President and George H. Pendleton, of Ohio, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1864.

*Resolved*, That in the future, as in the past, we will adhere with unswerving fidelity to the Union under the Constitution as the only solid foundation of our strength, security, and happiness as a people, and as a framework of government equally conducive to the welfare and prosperity of all the States, both Northern and Southern.

*Resolved*, That this convention does explicitly declare, as the sense of the American people, that after four years of failure to restore the Union by the experiment of war, during which, under the pretense of a military necessity or war power higher than the Constitution, the Constitution itself has been disregarded in every part, and public liberty and private right alike trodden down, and the material prosperity of the country essentially impaired—justice, humanity, liberty, and the public welfare demand that immediate efforts be made for a cessation of hostilities, with a view to the ultimate convention of the States, or other peaceable means, to the end that at the earliest practicable moment peace may be restored on the basis of the Federal Union of the States.

*Resolved*, That the direct interference of the military authorities of the United States in the recent elections held in Kentucky, Maryland, Missouri, and Delaware was a shameful violation of the Constitution, and a repetition of such acts in the approaching election will be held as revolutionary, and resisted with all the means and power under our control.

*Resolved*, That the aim and object of the Democratic Party is to preserve the Federal Union and the rights of the States unimpaired, and they hereby declare that they consider that the administrative usurpation of extraordinary and dangerous powers not granted by the Constitution—the subversion of the civil by military law in States not in insurrection; the arbitrary military arrest, imprisonment, trial, and sentence of American citizens in States where civil law exists in full force; the suppression of freedom of speech and of the press; the denial of the right of asylum; the open and avowed disregard of State rights; the employment of unusual test-oaths; and the interference with and denial of the right of the people to bear arms in their defense—is calculated to prevent a restoration of the Union and the perpetuation of a Government deriving its just powers from the consent of the governed.

*Resolved*, That the shameful disregard of the administration to its duty in respect to our fellow citizens who now are and long have been prisoners of war and in a suffering condition, deserves the severest reprobation on the score alike of public policy and common humanity.

*Resolved*, That the sympathy of the Democratic Party is heartily and earnestly extended to the soldiers of our Army and sailors of our Navy who are and have been in the field and on the sea under the flag of our country, and, in the event of its attaining power, they will receive all the care, protection, and regard that the brave soldiers and sailors of the Republic have so nobly earned.

---

The Republican convention of 1864 was held at Baltimore, Md., June 7.

Abraham Lincoln, of Illinois, was nominated for President and Andrew Johnson, of Tennessee, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1864.

1. *Resolved*, That it is the highest duty of every American citizen to maintain against all their enemies, the integrity of the Union and the paramount authority of the Constitution and laws of the United States; and that, laying aside all differences of political opinion, we pledge ourselves as Union men, animated by a common sentiment and aiming at a common object, to do everything in our power to aid the Government in quelling by force of arms the rebellion now raging against its authority, and in bringing to the punishment due to their crimes the rebels and traitors arrayed against it.

2. *Resolved*, That we approve the determination of the Government of the United States not to compromise with rebels, or to offer them any terms of peace except such as may be based upon an unconditional surrender of their hostility and a return to their just allegiance to the Constitution and laws of the United States; and that we call upon the Government to maintain this position and to prosecute the war with the utmost possible vigor, to the complete suppression of the rebellion, in full reliance upon the self-sacrificing patriotism, the heroic valor, and the undying devotion of the American people to the country and its free institutions.

3. *Resolved*, That as slavery was the cause and now constitutes the strength of this rebellion, and as it must be always and everywhere hostile to the principles of republican government, justice and the national safety demand its utter and complete extirpation from the soil of the Republic; and that while we uphold and maintain the acts and proclamations by which the Government, in its own defense, has aimed a deathblow at this gigantic evil, we are in favor, furthermore, of such an amendment to the Constitution, to be made by the people in conformity with its provisions, as shall terminate and forever prohibit the existence of slavery within the limits of the jurisdiction of the United States.

4. *Resolved*, That the thanks of the American people are due to the soldiers and sailors of the Army and Navy who have periled their lives in defense of their country and in vindication of the honor of its flag; that the Nation owes to them some permanent recognition of their patriotism and their valor, and ample and permanent provision for those of their survivors who have received disabling and honorable wounds in the service of the country; and that the memories of those who have fallen in its defense shall be held in grateful and everlasting remembrance.

5. *Resolved*, That we approve and applaud the practical wisdom, the unselfish patriotism, and the unswerving fidelity to the Constitution and the principles of American liberty with which Abraham Lincoln has discharged, under circumstances of unparalleled difficulty, the great duties and responsibilities of the presidential office; that we approve and indorse, as demanded by the emergency and essential to the preservation of the Nation, and as within the provisions of the Constitution, the measures and acts which he has adopted to defend the Nation against its open and secret foes; that we approve especially the proclamation of emancipation and the employment as Union soldiers of men heretofore held in slavery; and that we have full confidence in his determination to carry these and all other constitutional measures essential to the salvation of the country into full and complete effect.

6. *Resolved*, That we deem it essential to the general welfare that harmony should prevail in the national councils, and we regard as worthy of public confidence and official trust those only who cordially indorse the principles proclaimed in these resolutions, and which should characterize the administration of the Government.

7. *Resolved*, That the Government owes to all men employed in its armies, without regard to distinction of color, the full protection of the laws of war, and that any violation of these laws, or of the usages of civilized nations in time of war, by the rebels now in arms, should be made the subject of prompt and full redress.

8. *Resolved*, That foreign immigration, which in the past has added so much to the wealth, development of resources, and increase of power to the Nation—the asylum of the oppressed of all nations—should be fostered and encouraged by a liberal and just policy.

9. *Resolved*, That we are in favor of the speedy construction of the railroad to the Pacific coast.

10. *Resolved*, That the national faith, pledged for the redemption of the public debt, must be kept inviolate, and that for this purpose we recommend economy and rigid responsibility in the public expenditures, and a vigorous and just system of taxation; and that it is the duty of every loyal State to sustain the credit and promote the use of the national currency.

11. *Resolved*, That we approve the position taken by the Government, that the people of the United States can never regard with indifference the attempt of any European power to overthrow by force, or to supplant by fraud, the institutions of any republican government on the Western Continent; and that they will view with extreme jealousy, as menacing to the peace and independence of their own country, the efforts of any such power to obtain new footholds for monarchical governments, sustained by foreign military force, in near proximity to the United States.

—

The Democratic convention of 1868 was held at New York, N. Y., July 4–11.

Horatio Seymour, of New York, was nominated for President and Francis P. Blair, of Missouri, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1868.

The Democratic Party, in national convention assembled, reposing its trust in the intelligence, patriotism, and discriminating justice of the people, standing upon the Constitution as the foundation and limitation of the powers of the Government and the guarantee of the liberties of the citizen, and recognizing the questions of slavery and secession as having been settled for all time to come by the war or the voluntary action of the Southern States in constitutional conventions assembled, and never to be renewed or reagitated—do, with the return of peace, demand—

1. Immediate restoration of all the States to their rights in the Union under the Constitution, and of civil government to the American people.

2. Amnesty for all past political offenses, and the regulation of the elective franchise in the States by their citizens.

3. Payment of the public debt of the United States as rapidly as practicable: All moneys drawn from the people by taxation, except so much as is requisite for the necessities of the Government, economically administered, being honestly applied to such payment; and where the obligations of the Government do not expressly state upon their face, or the law under which they were issued does not provide that they shall be paid in coin, they ought, in right and in justice, to be paid in the lawful money of the United States.

4. Equal taxation of every species of property according to its real value, including Government bonds and other public securities.

5. One currency for the Government and the people, the laborer and the officeholder, the pensioner and the soldier, the producer and the bondholder.

6. Economy in the administration of the Government; the reduction of the standing army and navy; the abolition of the Freedmen's Bureau and all political instrumentalities designed to secure negro supremacy; simplification of the system, and discontinuance of inquisitorial modes of assessing and collecting internal revenue, so that the burden of taxation may be equalized and lessened; the credit of the Government and the currency made good; the repeal of all enactments for enrolling the State Militia into national forces in time of peace; and a tariff for revenue upon foreign imports, and such equal taxation under the internal revenue laws as will afford incidental protection to domestic manufactures, and as will, without impairing the revenue, impose the least burden upon, and best promote and encourage, the great industrial interests of the country.

7. Reform of abuses in the Administration; the expulsion of corrupt men from office; the abrogation of useless offices; the restoration of rightful authority to, and the independence of, the executive and judicial departments of the Government; the subordination of the military to the civil power, to the end that the usurpations of Congress and the despotism of the sword may cease.

8. Equal rights and protection for naturalized and native-born citizens at home and abroad; the assertion of American nationality which shall command the respect of foreign powers and furnish an example and encouragement to people struggling for national integrity, constitutional liberty, and individual rights, and the maintenance of the rights of naturalized citizens against the absolute doctrine of immutable allegiance, and the claims of foreign powers to punish them for alleged crime committed beyond their jurisdiction.

In demanding these measures and reforms we arraign the Radical Party for its disregard of right and the unparalleled oppression and tyranny which have marked its career. After the most solemn and unanimous pledge of both Houses of Congress to prosecute the war exclusively for the maintenance of the Government and the preservation of the Union under the Constitution, it has repeatedly violated that most sacred pledge under which alone was rallied that noble volunteer army which carried our flag to victory. Instead of restoring the Union, it has, so far as in its power, dissolved it, and subjected 10 States, in time of profound peace, to military despotism and negro supremacy. It has nullified there the right of trial by jury; it has abolished the habeas corpus, that most sacred writ of liberty; it has overthrown the freedom of speech and the press; it has substituted arbitrary seizures and arrests and military trials and secret star-chamber inquisitions for the constitutional tribunals; it has disregarded, in time of peace, the right of the people to be free from searches and seizures; it has entered the post and telegraph offices, and even the private rooms of individuals, and seized their private papers and letters without any specific charge or notice of affidavit, as required by the organic law; it has converted the American Capitol into a bastile; it has established a system of spies and official espionage to which no constitutional monarchy of Europe would now dare to resort; it has abolished the right of appeal, on important constitutional questions, to the supreme judicial tribunals, and threatens to curtail or destroy its original jurisdiction, which is irrevocably vested by the Constitution; while the learned Chief Justice has been subjected to the most atrocious calumnies, merely because he would not prostitute his high office to the support of the false and partisan charges preferred against the President. Its corruption and extravagance have exceeded anything known in history, and by its frauds and monopolies it has nearly doubled the burden of the debt created by the war. It has stripped the President of his constitutional power of appointment, even of his own Cabinet. Under its repeated assaults the pillars of the Government are rocking on their base, and should it succeed in November next, and inaugurate its President, we will meet, as a subjected and conquered people, amid the ruins of liberty and the scattered fragments of the Constitution.

And we do declare and resolve that ever since the people of the United States threw off all subjection to the British Crown the privilege and trust of suffrage have belonged to the several States, and have been granted, regulated, and controlled exclusively by the political power of each State, respectively, and that any attempt by Congress, on any pretext whatever, to deprive any State of this right, or interfere with its exercise is a flagrant usurpation of power which can find no warrant in the Constitution, and if sanctioned by the people will subvert our form of government, and can only end in a single, centralized, and consolidated government, in which the separate existence of the States will be entirely absorbed, and an unqualified despotism be established in place of a Federal Union of coequal States.

And that we regard the reconstruction acts (so called) of Congress, as such, as usurpations and unconstitutional, revolutionary, and void.

That our soldiers and sailors, who carried the flag of our country to victory against a most gallant and determined foe, must ever be gratefully remembered, and all the guarantees given in their favor must be faithfully carried into execution.

That the public lands should be distributed as widely as possible among the people, and should be disposed of either under the preemption or homestead laws, or sold in reasonable quantities, and to none but actual occupants, at the minimum price established by the Government. When grants of the public lands may be allowed, necessary for the encouragement of important public improvements, the proceeds of the sale of such lands and not the lands themselves should be so applied.

That the President of the United States, Andrew Johnson, in exercising the power of his high office in resisting the aggressions of Congress upon the constitutional rights of the States and the people, is entitled to the gratitude of the whole American people, and in behalf of the Democratic Party we tender him our thanks for his patriotic efforts in that regard.

Upon this platform the Democratic Party appeal to every patriot, including all the conservative element and all who desire to support the Constitution and restore the Union, forgetting all past differences of opinion, to unite with us in the present great struggle for the liberties of the people; and that to all such, to whatever party they may have heretofore belonged, we extend the right hand of fellowship and hail all such cooperating with us as friends and brethren.

*Resolved*, That this convention sympathize cordially with the workingmen of the United States in their efforts to protect the rights and interests of the laboring classes of the country.

*Resolved*, That the thanks of the convention are tendered to Chief Justice Salmon P. Chase for the justice, dignity, and impartiality with which he presided over the court of impeachment on the trial of President Andrew Johnson.

—

The Republican convention of 1868 was held at Chicago, Ill., May 20–22.

Ulysses S. Grant, of Illinois, was nominated for President, and Schuyler Colfax, of Indiana, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1868.

The National Republican Party of the United States, assembled in national convention in the city of Chicago on the 21st day of May, 1868, make the following declaration of principles:

1. We congratulate the country on the assured success of the reconstruction policy of Congress, as evinced by the adoption in the majority of the States lately in rebellion of constitutions securing equal civil and political rights to all, and regard as the duty of the Government to sustain those constitutions and to prevent the people of such States from being remitted to a state of anarchy or military rule.

2. The guaranty by Congress of equal suffrage to all loyal men at the South was demanded by every consideration of public safety, of gratitude, and of justice, and must be maintained, while the question of suffrage in all the loyal States properly belongs to the people of those States.

3. We denounce all forms of repudiation as a national crime, and the national honor requires the payment of the public indebtedness in the uttermost good faith to all creditors at home and abroad, not only according to the letter, but the spirit of the laws under which it was contracted.

4. It is due to the labor of the nation that taxation should be equalized and reduced as rapidly as the national faith will permit.

5. The national debt, contracted as it has been for the preservation of the Union for all time to come, should be extended over a fair period for redemption, and it is the duty of Congress to reduce the rate of interest thereon whenever it can be honestly done.

6. That the best policy to diminish our burden of debt is to so improve our credit that capitalists will seek to loan us money at lower rates of interest than we now pay, and must continue to pay, so long as repudiation, partial or total, open or covert, is threatened or suspected.

7. The Government of the United States should be administered with the strictest economy, and the corruptions which have been so shamefully nursed and fostered by Andrew Johnson call loudly for radical reform.

8. We profoundly deplore the untimely and tragic death of Abraham Lincoln and regret the accession to the Presidency of Andrew Johnson, who has acted treacherously to the people who elected him and the cause he was pledged to support; who has usurped high legislative and judicial functions; who has refused to execute the laws; who has used his high office to induce other officers to ignore and violate the laws; who has employed his executive powers to render insecure the property, the peace, the liberty, and life of the citizen; who has abused the pardoning power; who has denounced the National Legislature as unconstitutional; who has persistently and corruptly resisted, by every means in his power, every proper attempt at the reconstruction of the States lately in rebellion; who has perverted the public patronage into an engine of wholesale corruption; and who has been justly impeached for high crimes and misdemeanors and properly pronounced guilty thereof by the vote of 35 Senators.

9. The doctrine of Great Britain and other European powers, that because a man is once a subject he is always so, must be resisted at every hazard by the United States, as a relic of feudal times, not authorized by the laws of nations, and at war with our national honor and independence. Naturalized citizens are entitled to protection in all their rights of citizenship as though they were native born, and no citizen of the United States, native or naturalized, must be liable to arrest and imprisonment by any foreign power for acts done or words spoken in this country; and if so arrested and imprisoned, it is the duty of the Government to interfere in his behalf.

10. Of all who were faithful in the trials of the late war there were none entitled to more especial honor than the brave soldiers and seamen who endured the hardships of campaign and cruise and imperiled their lives in the service of the country. The bounties and pensions provided by the law for these brave defenders of the Nation are obligations never to be forgotten; the widows and orphans of the gallant dead are the wards of the people—a sacred legacy bequeathed to the Nation's protecting care.

11. Foreign immigration, which in the past has added so much to the wealth, development, and resources and increase of power to this Republic—the asylum of the oppressed of all nations—should be fostered and encouraged by a liberal and just policy.

12. This convention declares itself in sympathy with all oppressed people struggling for their rights.

13. That we highly commend the spirit of magnanimity and forbearance with which men who have served in the rebellion, but who now frankly and honestly cooperate with us in restoring the peace of the country and reconstructing the southern State governments upon the basis of impartial justice and equal rights, are received back into the communion of the loyal people, and we favor the removal of the disqualifications and restrictions imposed upon the late rebels in the same measure as the spirit of disloyalty will die out and as may be consistent with the safety of the loyal people.

14. That we recognize the great principles laid down in the immortal Declaration of Independence as the true foundation of democratic government; and we hail with gladness every effort toward making these principles a living reality on every inch of American soil.

---

The Democratic convention of 1872 was held at Baltimore, Md., July 9. Horace Greeley, of New York, was nominated for President and B. Gratz Brown, of Missouri, was nominated for Vice President.

The convention adopted the following resolution:

DEMOCRATIC PLATFORM, 1872.

We, the Democratic electors of the United States, in convention assembled, do present the following principles, already adopted at Cincinnati, as essential to just government.

The principles referred to in the above resolution were incorporated in the Liberal Republican platform adopted at a convention held at Cincinnati, Ohio, on May 1, 1872.

The platform follows:

We, the Liberal Republicans of the United States, in national convention assembled at Cincinnati, proclaim the following principles as essential to just government:

1. We recognize the equality of all men before the law, and hold that it is the duty of government, in its dealings with the people, to mete out equal and exact justice to all, of whatever nativity, race, color, or persuasion, religious or political.

2. We pledge ourselves to maintain the Union of these States, emancipation, and enfranchisement, and to oppose any reopening of the questions settled by the thirteenth, fourteenth, and fifteenth amendments to the Constitution.

3. We demand the immediate and absolute removal of all disabilities imposed on account of the rebellion, which was finally subdued seven years ago, believing that universal amnesty will result in complete pacification in all sections of the country.

4. Local self-government, with impartial suffrage, will guard the rights of all citizens more securely than any centralized power. The public welfare requires the supremacy of the civil over the military authority and freedom of persons under the protection of the habeas corpus. We demand for the individual the largest liberty consistent with public order, for the State self-government, and for the Nation a return to the methods of peace and the constitutional limitations of power.

5. The civil service of the Government has become a mere instrument of partisan tyranny and personal ambition, and an object of selfish greed. It is a scandal and reproach upon free institutions, and breeds a demoralization dangerous to the perpetuity of republican government. We therefore regard a thorough reform of the civil service as one of the most pressing necessities of the hour; that honesty, capacity, and fidelity constitute the only valid claim to public employment; that the offices of the Government cease to be a matter of arbitrary favoritism and patronage, and that public station become again a post of honor. To this end it is imperatively required that no President shall be a candidate for reelection.

6. We demand a system of Federal taxation which shall not unnecessarily interfere with the industry of the people, and which shall provide the means necessary to pay the expenses of the Government, economically administered, the pensions, the interest on the public debt, and a moderate reduction annually of the principal thereof; and recognizing that there are in our midst honest but irreconcilable differences of opinion with regard to the respective systems of protection and free trade, we remit the discussion of the subject to the people in their congressional districts, and to the decision of the Congress thereon, wholly free from Executive interference or dictation.

7. The public credit must be sacredly maintained, and we denounce repudiation in every form and guise.

8. A speedy return to specie payment is demanded alike by the highest considerations of commercial morality and honest government.

9. We remember with gratitude the heroism and sacrifices of the soldiers and sailors of the Republic, and no act of ours shall ever detract from their justly earned fame or the full reward of their patriotism.

10. We are opposed to all further grants of lands to railroads or other corporations. The public domain should be held sacred to actual settlers.

11. We hold that it is the duty of the Government in its intercourse with foreign nations to cultivate the friendships of peace by treating with all on fair and equal terms, regarding it alike dishonorable either to demand what is not right or to submit to what is wrong.

12. For the promotion and success of these vital principles and the support of the candidates nominated by this convention, we invite and cordially welcome the cooperation of all patriotic citizens, without regard to previous political affiliations.

---

The Republican convention of 1872 was held at Philadelphia, Pa., June 5–6.

Ulysses S. Grant, of Illinois, was nominated for President and Henry Wilson, of Massachusetts, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1872.

The Republican Party of the United States, assembled in national convention in the city of Philadelphia on the 5th and 6th days of June, 1872, again declares its faith, appeals to its history, and announces its position upon the questions before the country.

1. During 11 years of supremacy it has accepted with grand courage the solemn duties of the time. It suppressed a gigantic rebellion, emancipated 4,000,000 slaves, decreed the equal citizenship of all, and established universal suffrage. Exhibiting unparalleled magnanimity, it criminally punished no man for political offenses, and warmly welcomed all who proved loyalty by obeying the laws and dealing justly with their neighbors. It has steadily decreased with firm hand the resultant disorders of a great war and initiated a wise and humane policy toward the Indians. The Pacific Railroad and similar vast enterprises have been generously aided and successfully conducted, the public lands freely given to actual settlers, immigration protected and encouraged, and a full acknowledgment of the naturalized citizens' rights secured from European powers. A uniform national currency has been provided, repudiation frowned down, the national credit sustained under the most extraordinary burdens, and new bonds negotiated at lower rates. The revenues have been carefully collected and honestly applied. Despite large annual reductions in the rates of taxation, the public debt has been reduced during Gen. Grant's Presidency at the rate of a hundred millions a year; great financial crises have been avoided, and peace and plenty prevail throughout the land. Menacing foreign difficulties have been peacefully and honorably composed, and the honor and power of the Nation kept in high respect throughout the world. This glorious record of the past is the party's best pledge for the future. We believe the people will not intrust the Government to any party or combination of men composed chiefly of those who have resisted every step of this beneficent progress.

2. The recent amendments to the National Constitution should be cordially sustained because they are right, not merely tolerated because they are law, and should be carried out according to their spirit by appropriate legislation, the enforcement of which can safely be intrusted only to the party that secured those amendments.

3. Complete liberty and exact equality in the enjoyment of all civil, political, and public rights should be established and effectually maintained throughout the Union by efficient and appropriate State and Federal legislation. Neither the law nor its administration should admit any discrimination in respect of citizens by reason of race, creed, color, or previous condition of servitude.

4. The National Government should seek to maintain honorable peace with all nations, protecting its citizens everywhere, and sympathizing with all peoples who strive for greater liberty.

5. Any system of the civil service under which the subordinate positions of the Government are considered rewards for mere party zeal is fatally demoralizing, and we therefore favor a reform of the system by laws which shall abolish the evils of patronage and make honesty, efficiency, and fidelity the essential qualifications for public positions, without practically creating a life tenure of office.

6. We are opposed to further grants of the public lands to corporations and monopolies, and demand that the national domain be set apart for free homes for the people.

7. The annual revenue, after paying current expenditures, pensions, and the interest on the public debt, should furnish a moderate balance for the reduction of the principal, and that revenue, except so much as may be derived from a tax on tobacco and liquors, should be raised by duties upon importations, the details of which should be so adjusted as to aid in securing remunerative wages to labor, and promote the industries, prosperity, and growth of the whole country.

8. We hold in undying honor the soldiers and sailors whose valor saved the Union. Their pensions are a sacred debt of the Nation, and the widows and orphans of those who died for their country are entitled to the care of a generous and grateful people. We favor such additional legislation as will extend the bounty of the Government to all our soldiers and sailors who were honorably discharged, and who in the line of duty became disabled, without regard to the length of service or the cause of such discharge.

9. The doctrine of Great Britain and other European powers concerning allegiance—"Once a subject always a subject"—having at last, through the efforts of the Republican Party, been abandoned, and the American idea of the individual's right to transfer allegiance having been accepted by European nations, it is the duty of our Government to guard with jealous care the rights of adopted citizens against the assumption of unauthorized claims by their former Governments, and we urge continued careful encouragement and protection of voluntary immigration.

10. The franking privilege ought to be abolished and the way prepared for a speedy reduction in the rates of postage.

11. Among the questions which press for attention is that which concerns the relations of capital and labor, and the Republican Party recognizes the duty of so shaping legislation as to secure full protection and the amplest field for capital, and for labor, the creator of capital, the largest opportunities and a just share of the mutual profits of these two great servants of civilization.

12. We hold that Congress and the President have only fulfilled an imperative duty in their measures for the suppression of violent and treasonable organizations in certain lately rebellious regions, and for the protection of the ballot box; and therefore they are entitled to the thanks of the Nation.

13. We denounce repudiation of the public debt, in any form or disguise, as a national crime. We witness with pride the reduction of the principal of the debt, and of the rates of interest upon the balance, and confidently expect that our excellent national currency will be perfected by a speedy resumption of specie payment.

14. The Republican Party is mindful of its obligations to the loyal women of America for their noble devotion to the cause of freedom. Their admission to wider fields of usefulness is viewed with satisfaction; and the honest demand of any class of citizens for additional rights should be treated with respectful consideration.

15. We heartily approve the action of Congress in extending amnesty to those lately in rebellion, and rejoice in the growth of peace and fraternal feeling throughout the land.

16. The Republican Party proposes to respect the rights reserved by the people to themselves as carefully as the powers delegated by them to the State and to the Federal Government. It disapproves of the resort to unconstitutional laws for the purpose of removing evils, by interference with rights not surrendered by the people to either the State or National Government.

17. It is the duty of the General Government to adopt such measures as may tend to encourage and restore American commerce and shipbuilding.

18. We believe that the modest patriotism, the earnest purpose, the sound judgment, the practical wisdom, the incorruptible integrity, and the illustrious services of Ulysses S. Grant have commended him to the heart of the American people and with him at our head we start to-day upon a new march to victory.

19. Henry Wilson, nominated for the Vice Presidency, known to the whole land from the early days of the great struggle for liberty as an indefatigable laborer in all campaigns, an incorruptible legislator, and representative man of American institutions, is worthy to associate with our great leader and share the honors which we pledge our best efforts to bestow upon them.

—

The Democratic convention of 1876 was held at St. Louis, Mo., June 27–29.

Samuel J. Tilden, of New York, was nominated for President and Thomas A. Hendricks, of Indiana, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1876.

We, the delegates of the Democratic Party of the United States, in national convention assembled, do hereby declare the administration of the Federal Government to be in urgent need of immediate reform; do hereby enjoin upon the nominees of this convention and of the Democratic Party in each State a zealous effort and cooperation to this end; and do hereby appeal to our fellow citizens of every former political connection to undertake with us this first and most pressing patriotic duty.

For the Democracy of the whole country we do here reaffirm our faith in the permanence of the Federal Union, our devotion to the Constitution of the United States, with its amendments universally accepted as a final settlement of the controversies that engendered civil war, and do here record our steadfast confidence in the perpetuity of republican self-government.

In absolute acquiescence in the will of the majority, the vital principle of republics; in the supremacy of the civil over the military authority; in the total separation of church and state, for the sake alike of civil and religious freedom; in the equality of all citizens before just laws of their own enactment; in the liberty of individual conduct, unvexed by sumptuary laws; in the faithful education of the rising generation, that they may preserve, enjoy, and transmit these best conditions of human happiness and hope—we behold the noblest products of a hundred years of changeful history; but while upholding the bond of our Union and great charter of these our rights, it behooves a free people to practice a so that eternal vigilance which is the price of liberty.

Reform is necessary to rebuild and establish in the hearts of the whole people the Union 11 years ago happily rescued from the danger of a secession of States, but now to be saved from a corrupt centralism which, after inflicting upon 10 States the rapacity of carpet-bag tyrannies, has honeycombed the offices of the Federal Government itself with incapacity, waste and fraud; infected States and municipalities with the contagion of misrule, and locked fast the prosperity of an industrious people in the paralysis of "hard times."

Reform is necessary to establish a sound currency, restore the public credit, and maintain the national honor.

We denounce the failure, for all these 11 years of peace, to make good the promise of the legal-tender notes, which are a changing standard of value in the hands of the people, and the nonpayment of which is a disregard of the plighted faith of the Nation.

We denounce the improvidence which in 11 years of peace has taken from the people in Federal taxes thirteen times the whole amount of the legal-tender notes and squandered four times their sum in useless expense, without accumulating any reserve for their redemption.

We denounce the financial imbecility and immorality of that party which, during eleven years of peace, has made no advance toward resumption, no preparation for resumption, but instead has obstructed resumption by wasting our resources and exhausting all our surplus income; and, while annually professing to intend a speedy return to specie payments, has annually enacted fresh hindrances thereto. As such hindrance we denounce the resumption clause of the act of 1875, and we here demand its repeal.

We demand a judicious system of preparation by public economies, by official retrenchments, and by wise finance, which shall enable the nation soon to assure the whole world of its perfect ability and its perfect readiness to meet any of its promises at the call of the creditor entitled to payment.

We believe such a system, well devised, and, above all, intrusted to competent hands for execution, creating at no time an artificial scarcity of currency, and at no time alarming the public mind into a withdrawal of that vaster machinery of credit by which 95 per cent of all business transactions are performed—a system open, public, and inspiring general confidence—would from the day of its adoption bring healing on its wings to all our harassed industries, set in motion the wheels of commerce, manufacturers, and the mechanic arts, restore employment to labor, and renew in all its natural sources the prosperity of the people.

Reform is necessary in the sum and modes of Federal taxation, to the end that capital may be set free from distrust, and labor lightly burdened.

We denounce the present tariff, levied upon nearly 4,000 articles, as a masterpiece of injustice, inequality, and false pretense. It yields a dwindling, not a yearly rising revenue. It has impoverished many industries to subsidize a few. It prohibits imports that might purchase the products of American labor. It has degraded American commerce from the first to an inferior rank on the high seas. It has cut down the sales of American manufactures at home and abroad, and depleted the returns of American agriculture—an industry followed by half our people. It costs the people five times more than it produces to the Treasury, obstructs the processes of production, and wastes the fruits of labor. It promotes fraud, fosters smuggling, enriches dishonest officials, and bankrupts honest merchants. We demand that all customhouse taxation shall be only for revenue.

Reform is necessary in the scale of public expense—Federal, State, and municipal. Our Federal taxation has swollen from 60,000,000 gold, in 1860, to 450,000,000 currency, in 1870; our aggregate taxation from 154,000,000 gold, in 1860, to 730,000,000 currency, in 1870; or in one decade from less than $5 per head to more than $18 per head. Since the peace, the people have paid to their tax gatherers more than thrice the sum of the national debt, and more than twice that sum for the Federal Government alone. We demand a rigorous frugality in every department and from every officer of the Government.

Reform is necessary to put a stop to the profligate waste of public lands and their diversion from actual settlers by the party in power, which has squandered 200,000,000 acres upon railroads alone, and out of more than thrice that aggregate has disposed of less than a sixth directly to tillers of the soil.

Reform is necessary to correct the omissions of a Republican Congress and the errors of our treaties and our diplomacy, which have stripped our fellow citizens of foreign birth and kindred race, recrossing the Atlantic, of the shield of American citizenship, and have exposed our brethren of the Pacific coast to the incursions of a race not sprung from the same great parent stock, and in fact now by law denied citizenship through naturalization, as being neither accustomed to the traditions of a progressive civilization nor exercised in liberty under equal laws. We denounce the policy which thus discards the liberty-loving German and tolerates a revival of the coolie trade in Mongolian women imported for immoral purposes, and Mongolian men held to perform servile labor contracts, and demand such modification of the treaty with the Chinese Empire, or such legislation within Constitutional limitations, as shall prevent further importation or immigration of the Mongolian race.

Reform is necessary, and can never be effected but by making it the controlling issue of the elections, and lifting it above the two false issues with which the office-holding class and the party in power seek to smother it:

1. The false issue with which they would enkindle sectarian strife in respect to the public schools, of which the establishment and support belong exclusively to the several States, and which the Democratic Party has cherished from their foundation, and is resolved to maintain without prejudice or preference for any class, sect, or creed, and without largesses from the Treasury to any.

2. The false issue by which they seek to light anew the dying embers of sectional hate between kindred peoples once estranged, but now reunited in one indivisible Republic and a common destiny.

Reform is necessary in the civil service. Experience proves that efficient, economical conduct of the governmental business is not possible if its civil service be subject to change at every election, be a prize fought for at the ballot box, be a brief reward of party zeal, instead of posts of honor assigned for proved competency, and held for fidelity in the public employ; that the dispensing of patronage should neither be a tax upon the time of all our public men nor the instrument of their ambition. Here again promises falsified in the performance attest that the party in power can work out no practical or salutary reform.

Reform is necessary even more in the higher grades of the public service. President, Vice President, judges, Senators, Representatives, Cabinet officers—these and all others in authority are the people's servants. Their offices are not a private perquisite; they are a public trust.

When the annals of this Republic show the disgrace and censure of a Vice President, a late Speaker of the House of Representatives marketing his rulings as a presiding officer, three Senators profiting secretly by their votes as lawmakers, five chairmen of the leading committees of the late House of Representatives exposed in jobbery, a late Secretary of the Treasury forcing balances in the public accounts, a late Attorney General misappropriating public funds, a Secretary of the Navy enriched or enriching friends by percentages levied off the profits of contractors with his department, an ambassador to England censured in a dishonorable speculation, the President's private secretary barely escaping conviction upon trial for guilty complicity in frauds upon the revenue, a Secretary of War impeached for high crimes and misdemeanors—the demonstration is complete that the first step in reform must be the people's choice of honest men from another party lest the disease of one political organization infect the body politic, and lest by making no change of men or parties we get no change of measures and no real reform.

All these abuses, wrongs, and crimes, the product of 16 years' ascendancy of the Republican Party, create a necessity for reform confessed by Republicans themselves; but their reformers are voted down in convention and displaced from the Cabinet. The party's mass of honest voters is powerless to resist the 80,000 officeholders, its leaders and guides.

Reform can only be had by a peaceful civic revolution. We demand a change of system, a change of administration, a change of parties, that we may have a change of measures and of men.

*Resolved*, That this convention, representing the Democratic Party of the United States, do cordially indorse the action of the present House of Representatives in reducing and curtailing the expenses of the Federal Government in cutting down salaries, extravagant appropriations, and in abolishing useless offices and places not required by the public necessities; and we shall trust to the firmness of the Democratic Members of the House that no committee of conference and no misinterpretation of the rules will be allowed to defeat these wholesome measures of economy demanded by the country.

*Resolved*, That the soldiers and sailors of the Republic, and the widows and orphans of those who have fallen in battle, have a just claim upon the care, protection, and gratitude of their fellow citizens.

—

The Republican convention of 1876 was held at Cincinnati, Ohio, June 14–16.

Rutherford B. Hayes, of Ohio, was nominated for President and William A. Wheeler, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1876.

When, in the economy of Providence, this land was to be purged of human slavery, and when the strength of government of the people, by the people, and for the people was to be demonstrated, the Republican Party came into power. Its deeds have passed into history, and we look back to them with pride. Incited by their memories and with high aims for the good of our country and mankind, and looking to the future with unfaltering courage, hope, and purpose, we, the representatives of the party, in national convention assembled, make the following declaration of principles:

1. The United States of America is a nation, not a league. By the combined workings of the National and State Governments, under their respective constitutions, the rights of every citizen are secured at home and abroad and the common welfare promoted.

2. The Republican Party has preserved these Governments to the hundredth anniversary of the Nation's birth, and they are now embodiments of the great truth spoken at its cradle: "That all men are created equal; that they are endowed by their Creator with certain inalienable rights, among which are life, liberty, and the pursuit of happiness; that for the attainment of these ends governments have been instituted among men, deriving their just powers from the consent of the governed." Until these truths are cheerfully obeyed or, if need be, vigorously enforced the work of the Republican Party is unfinished.

3. The permanent pacification of the southern section of the Union and the complete protection of all its citizens in the free enjoyment of all their rights are duties to which the Republican Party stands

sacredly pledged. The power to provide for the enforcement of the principles embodied in the recent constitutional amendments is vested by those amendments in the Congress of the United States; and we declare it to be the solemn obligation of the legislative and executive departments of the Government to put into immediate and vigorous exercise all their constitutional powers for removing any just causes of discontent on the part of any class, and for securing to every American citizen complete liberty and exact equality in the exercise of all civil, political, and public rights. To this end we imperatively demand a Congress and a Chief Executive whose courage and fidelity to these duties shall not falter until these results are placed beyond dispute or recall.

4. In the first act of Congress signed by President Grant the National Government assumed to remove any doubts of its purpose to discharge all just obligations to the public creditors and solemnly pledged its faith "to make provisions at the earliest practicable period for the redemption of the United States notes in coin." Commercial prosperity, public morals, and the national credit demand that this promise be fulfilled by a continuous and steady progress to specie payment.

5. Under the Constitution the President and heads of departments are to make nominations for office, the Senate is to advise and consent to appointments, and the House of Representatives is to accuse and prosecute faithless officers. The best interest of the public service demands that these distinctions be respected; that Senators and Representatives who may be judges and accusers should not dictate appointments to office. The invariable rule for appointments should have reference to the honesty, fidelity, and capacity of the appointees, giving to the party in power those places where harmony and vigor of administration require its policy to be represented, but permitting all others to be filled by persons selected with sole reference to the efficiency of the public service and the right of all citizens to share in the honor of rendering faithful service to the country.

6. We rejoice in the quickening conscience of the people concerning political affairs, and will hold all public officers to a rigid responsibility, and engage that the prosecution and punishment of all who betray official trusts shall be swift, thorough, and unsparing.

7. The public-school system of the several States is the bulwark of the American Republic, and with a view to its security and permanence we recommend an amendment to the Constitution of the United States forbidding the application of any public funds or property for the benefit of any schools or institutions under sectarian control.

8. The revenue necessity for current expenditures and the obligations of the public debt must be largely derived from duties upon importations, which, so far as possible, should be adjusted to promote the interests of American labor and advance the prosperity of the whole country.

9. We reaffirm our opposition to further grants of the public lands to corporations and monopolies, and demand that the national domain be devoted to free homes for the people.

10. It is the imperative duty of the Government so to modify existing treaties with European Governments that the same protection shall be afforded to the adopted American citizen that is given to the native born, and that all necessary laws should be passed to protect immigrants, in the absence of power in the States for that purpose.

11. It is the immediate duty of Congress to fully investigate the effect of the immigration and importation of Mongolians upon the moral and material interests of the country.

12. The Republican Party recognizes with approval the substantial advances recently made toward the establishment of equal rights for women by the many important amendments effected by Republican legislatures in the laws which concern the personal and property relations of wives, mothers, and widows, and by the appointment and election of women to the superintendence of education, charities, and other public trusts. The honest demands of this class of citizens for additional rights, privileges, and immunities should be treated with respectful consideration.

13. The Constitution confers upon Congress sovereign power over the Territories of the United States for their government, and in the exercise of this power it is the right and duty of Congress to prohibit and extirpate, in the Territories, that relic of barbarism, polygamy; and we demand such legislation as shall secure this end and the supremacy of American institutions in all the Territories.

14. The pledge which the Nation has given to her soldiers and sailors must be fulfilled, and a grateful people will always hold those who imperiled their lives for the country's preservation in the kindest remembrance.

15. We sincerely deprecate all sectional feeling and tendencies. We therefore note with deep solicitude that the Democratic Party counts, as its chief hope of success, upon the electoral vote of a united South, secured through the efforts of those who were recently arrayed against the Nation; and we invoke the earnest attention of the country to the grave truth that a success thus achieved would reopen sectional strife and imperil national honor and human rights.

16. We charge the Democratic Party with being the same in character and spirit as when it sympathized with treason; with making its control of the House of Representatives the triumph and opportunity of the Nation's recent foes; with reasserting and applauding in the National Capitol the sentiments of unrepentant rebellion; with sending Union soldiers to the rear and promoting Confederate soldiers to the front; with deliberately proposing to repudiate the plighted faith of the Government; with being equally false and imbecile upon the overshadowing financial question; with thwarting the ends of justice by its partisan mismanagements and obstruction of investigation; with proving itself, through the period of its ascendency in the lower House of Congress, utterly incompetent to administer the Government; and we warn the country against trusting a party thus alike unworthy, recreant, and incapable.

17. The national administration merits commendation for its honorable work in the management of domestic and foreign affairs, and President Grant deserves the continued hearty gratitude of the American people for his patriotism and his eminent services in war and in peace.

18. We present as our candidates for President and Vice President of the United States two distinguished statesmen of eminent ability and character and conspicuously fitted for those high offices, and we confidently appeal to the American people to intrust the administration of their public affairs to Rutherford B. Hayes and William A. Wheeler.

---

The Democratic convention of 1880 was held at Cincinnati, Ohio, June 22–24.

Winfield S. Hancock, of Pennsylvania, was nominated for President and William H. English, of Indiana, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1880.

The Democrats of the United States, in convention assembled, declare—

1. We pledge ourselves anew to the constitutional doctrines and traditions of the Democratic Party as illustrated by the teachings and example of a long line of Democratic statesmen and patriots and embodied in the platform of the last national convention of the party.

2. Opposition to centralizationism and to that dangerous spirit of encroachment which tends to consolidate the powers of all the departments in one and thus to create, whatever be the form of government, a real despotism. No sumptuary laws, separation of church and state for the good of each, common schools fostered and protected.

3. Home rule; honest money, the strict maintenance of the public faith, consisting of gold and silver and paper convertible into coin on demand; the strict maintenance of the public faith, State and national; and a tariff for revenue only.

4. The subordination of the military to the civil power and a general and thorough reform of the civil service.

5. The right to a free ballot is the right preservative of all rights and must and shall be maintained in every part of the United States.

6. The existing administration is the representative of conspiracy only, and its claim of right to surround the ballot boxes with troops and deputy marshals to intimidate and obstruct the electors, and the unprecedented use of the veto to maintain its corrupt and despotic power insult the people and imperil their institutions.

7. We execrate the course of this administration in making places in the civil service a reward for political crime and demand a reform by statute which shall make it forever impossible for the defeated candidate to bribe his way to the seat of the usurper by billeting villains upon the people.

8. The great fraud of 1876–77, by which upon a false count of the electoral votes of two States the candidate defeated at the polls was declared to be President and, for the first time in American history, the will of the people was set aside under a threat of military violence, struck a deadly blow at our system of representative government; the Democratic Party, to preserve the country from a civil war, submitted for a time in firm and patriotic faith that the people would punish this crime in 1880; this issue precedes and dwarfs every other; it imposes a more sacred duty upon the people of the Union than ever addressed the conscience of a nation of free men.

9. The resolution of Samuel J. Tilden not again to be a candidate for the exalted place to which he was elected by a majority of his countrymen, and from which he was excluded by the leaders of the Republican Party, is received by the Democrats of the United States with sensibility, and they declare their confidence in his wisdom, patriotism, and integrity, unshaken by the assaults of a common enemy, and they further assure him that he is followed into the retirement he has chosen for himself by the sympathy and respect of his fellow citizens, who regard him as one who, by elevating the standards of public morality, merits the lasting gratitude of his country and his party.

10. Free ships and a living chance for American commerce on the seas and on the land. No discrimination in favor of transportation lines, corporations, or monopolies.

11. Amendment of the Burlingame treaty. No more Chinese immigration, except for travel, education, and foreign commerce, and therein carefully guarded.

12. Public money and public credit for public purposes solely, and public land for actual settlers.

13. The Democratic Party is the friend of labor and the laboring man and pledges itself to protect him alike against the cormorant and the commune.

14. We congratulate the country upon the honesty and thrift of a Democratic Congress which has reduced the public expenditures $40,000,000 a year, upon the continuation of prosperity at home and the national honor abroad, and, above all, upon the promise of such a change in the administration of the Government as shall insure us genuine and lasting reform in every department of the public service.

---

The Republican convention of 1880 was held at Chicago, Ill., June 2–8.

James A. Garfield, of Ohio, was nominated for President, and Chester A. Arthur, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1880.

The Republican Party, in national convention assembled, at the end of 20 years since the Federal Government was first committed to its charge, submits to the people of the United States this brief report of its administration:

It suppressed a rebellion which had armed nearly a million men to subvert the national authority; it reconstructed the Union of the States, with freedom instead of slavery as its corner stone; it transformed 4,000,000 human beings from the likeness of things to the rank of citizens; it relieved Congress of the infamous work of hunting fugitive slaves, and charged it to see that slavery does not exist.

It has raised the value of our paper currency from 38 per cent to the par of gold; it has restored, upon a solid basis, payment in coin of all national obligations, and has given us a currency absolutely good and equal in every part of our extended country; it has lifted the credit of the Nation from the point of where 6 per cent bonds sold at 86 to that where 4 per cent bonds are eagerly sought at a premium.

Under its administration railways have increased from 31,000 miles in 1860 to more than 82,000 miles in 1879.

Our foreign trade increased from $700,000,000 to $1,150,000,000 in the same time, and our exports, which were $20,000,000 less than our imports in 1860, were $265,000,000 more than our imports in 1879.

Without resorting to loans it has, since the war closed, defrayed the ordinary expenses of Government besides the accruing interest on the public debt, and has disbursed annually more than $30,000,000 for soldiers' and sailors' pensions. It has paid $880,000,000 of the public debt, and by refunding the balance at lower rates has reduced the annual interest charge from nearly $150,000,000 to less than $89,000,000.

All the industries of the country have revived, labor is in demand, wages have increased, and throughout the entire country there is evidence of a coming prosperity greater than we have ever enjoyed.

Upon this record the Republican Party asks for the continued confidence and support of the people, and this convention submits for their approval the following statement of the principles and purposes which will continue to guide and inspire its efforts:

1. We affirm that the work of the Republican Party for the last 20 years has been such as to commend it to the favor of the Nation; that the fruits of the costly victories which we have achieved through immense difficulties should be preserved; that the peace regained should be cherished; that the Union should be perpetuated and that the liberty secured to this generation should be transmitted undiminished to other generations; that the order established and the credit acquired should never be impaired; that the pensions promised should be paid; that the debt, so much reduced, should be extinguished by the full payment of every dollar thereof; that the reviving industries should be further promoted; and that the commerce already increasing should be steadily encouraged.

2. The Constitution of the United States is a supreme law and not a mere contract. Out of confederated States it made a sovereign nation. Some powers are denied to the Nation, while others are denied to the States; but the boundary between the powers delegated and those reserved is to be determined by the national and not by the State tribunal.

3. The work of popular education is one left to the care of the several States, but it is the duty of the National Government to aid that work to the extent of its constitutional ability. The intelligence of the Nation is but the aggregate of the intelligence in the several States, and the destiny of the Nation must be guided not by the genius of any one State but by the average genius of all.

4. The Constitution wisely forbids Congress to make any law respecting the establishment of religion, but it is idle to hope that the Nation can be protected against the influence of secret sectarianism while each State is exposed to its domination. We therefore recommend that the Constitution be so amended as to lay the same prohibition upon the legislature of each State, and to forbid the appropriation of public funds to the support of sectarian schools.

5. We reaffirm the belief avowed in 1876, that the duties levied for the purpose of revenue should so discriminate as to favor American labor; that no further grants of the public domain should be made to any railway or other corporation; that, slavery having perished in the State, its twin barbarity—polygamy—must die in the Territories; that everywhere the protection accorded to a citizen of American birth must be secured to citizens by American adoption; that we deem it the duty of Congress to develop and improve our seacoast and harbors, but insist that further subsidies to private persons or corporations must cease; that the obligations of the Republic to the men who preserved its integrity in the day of battle are undiminished by the lapse of 15 years since their final victory—to do them honor is and shall forever be the grateful privilege and sacred duty of the American people.

6. Since the authority to regulate immigration and intercourse between the United States and foreign nations rests with the Congress of the United States and the treaty-making power, the Republican Party, regarding the unrestricted immigration of Chinese as a matter of grave concernment under the exercise of both these powers, would limit and restrict that immigration by the enactment of such just, humane, and reasonable laws and treaties as will produce that result.

7. That the purity and patriotism which characterized the earlier career of Rutherford B. Hayes in peace and war, and which guided the thoughts of our immediate predecessors to him for a presidential candidate, have continued to inspire him in his career as Chief Executive; and that history will accord to his administration the honors which are due to an efficient, just, and courteous discharge of the public business, and will honor his vetoes interposed between the people and attempted partisan laws.

8. We charge upon the Democratic Party the habitual sacrifice of patriotism and justice to a supreme and insatiable lust for office and patronage; that to obtain possession of the National Government and control of the place, they have obstructed all efforts to promote the purity and to conserve the freedom of the suffrage, and have devised fraudulent ballots and invented fraudulent certification of returns; have labored to unseat lawfully elected Members of Congress, to secure at all hazards the vote of a majority of the States in the House of Representatives; have endeavored to occupy by force and fraud the places of trust given to others by the people of Maine, rescued by the courage and action of Maine's patriotic sons; have, by methods vicious in principle and tyrannical in practice, attached partisan legislation to appropriation bills upon whose passage the very movement of the Government depended; have crushed the rights of the individual; have advocated the principles and sought the favor of the rebellion against the Nation, and have endeavored to obliterate the sacred memories and to overcome its inestimably valuable results of nationality, personal freedom, and individual equality.

The equal, steady, and complete enforcement of the laws and the protection of all our citizens in the enjoyment of all the privileges and immunities guaranteed by the Constitution are the first duties of the Nation.

The dangers of a "Solid South" can only be averted by a faithful performance of every promise which the Nation has made to the citizen. The execution of the laws, and the punishment of all those who violate them, are the only safe methods by which an enduring peace can be secured and genuine prosperity established throughout the South. Whatever promises the Nation makes the Nation must perform. A nation can not with safety relegate this duty to the States. The "Solid South" must be divided by the peaceful agencies of the ballot, and all honest opinions must there find free expression. To this end the honest voter must be protected against terrorism, violence, or fraud.

And we affirm it to be the duty and the purpose of the Republican Party to use all legitimate means to restore all the States of this Union to the most perfect harmony which may be possible, and we submit to the practical, sensible people of these United States to say whether it would not be dangerous to the dearest interests of our country at this time to surrender the administration of the National Government to a party which seeks to overthrow the existing policy under which we are so prosperous, and thus bring distrust and confusion where there is now order, confidence, and hope.

9. The Republican Party, adhering to the principles affirmed by its last national convention of respect for the constitutional rules governing appointments to office, adopts the declaration of President Hayes that the reform of the civil service should be thorough, radical, and complete. To this end it demands the cooperation of the legislative with the executive departments of the Government, and that Congress shall so legislate that fitness, ascertained by proper practical tests, shall admit to the public service.

---

The Democratic convention of 1884 was held at Chicago, Ill., July 8–11.

Grover Cleveland, of New York, was nominated for President and Thomas A. Hendricks, of Indiana, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1884.

The Democratic Party of the Union, through its representatives in national convention assembled, recognizes that, as the Nation grows older, new issues are born of time and progress, and old issues perish. But the fundamental principles of the Democracy, approved by the united voice of the people, remain and will ever remain as the best and only security for the continuance of free government. The preservation of personal rights; the equality of all citizens before the law; the reserved rights of the States; and the supremacy of the Federal Government within the limits of the Constitution, will ever form the true basis of our liberties, and can never be surrendered without destroying that balance of rights and powers which enables a continent to be developed in peace, and social order to be maintained by means of local self-government. But it is indispensable for the practical application and enforcement of these fundamental principles that the Government should not always be controlled by one political party. Frequent change of administration is as necessary as constant recurrence to the popular will. Otherwise, abuses grow, and the Government, instead of being carried on for the general welfare, becomes an instrumentality for imposing heavy burdens on the many who are governed, for the benefit of the few who govern. Public servants thus become arbitrary rulers. This is now the condition of the country; hence a change is demanded.

The Republican Party, so far as principle is concerned, is a reminiscence. In practice it is an organization for enriching those who control its machinery. The frauds and jobbery which have been brought to light in every department of the Government are sufficient to have called for reform within the Republican Party; yet those in authority, made reckless by the long possession of power, have succumbed to its corrupting influence and have placed in nomination a ticket against which the independent portion of the party are in open revolt.

Therefore a change is demanded. Such a change was alike necessary in 1876, but the will of the people was then defeated by a fraud which can never be forgotten nor condoned. Again, in 1880, the change demanded by the people was defeated by the lavish use of money contributed by unscrupulous contractors and shameless jobbers, who had bargained for unlawful profits or high office. The Republican Party, during its legal, its stolen, and its bought tenures of power, has steadily decayed in moral character and political capacity. Its platform promises are now a list of its past failures. It demands the restoration of our Navy; it has squandered hundreds of millions to create a Navy that does not exist; it calls upon Congress to remove the burdens under which American shipping has been depressed; it imposed and has continued those burdens. It professes a policy of reserving the public lands for small holdings by actual settlers; it has given away the people's heritage till now a few railroads and nonresident aliens, individual and corporate, possess a larger area than that of all our farms between the two seas. It professes a preference for free institutions; it organized and tried to legalize a control of State elections by Federal troops. It professes a desire to elevate labor; it has subjected American workingmen to the competition of convict and imported contract labor. It professes gratitude to all who were disabled or died in the war, leaving widows and orphans; it left to a Democratic House of Representatives the first effort to equalize both bounties and pensions. It proffers a pledge to correct the irregularities of our tariff; it created and has continued them. Its own tariff commission confessed the needs of more than 20 per cent reduction; its Congress gave a reduction of less than 4 per cent. It professes the protection of American manufactures; it has subjected them to an increasing flood of manufactured goods and a hopeless competition with manufacturing nations, not one of which taxes raw materials. It professes to protect all American industries; it has impoverished many to subsidize a few. It professes the protection of American labor; it has depleted the returns of American agriculture and industry, followed by half of our people. It professes the equality of all men before the law, attempting to fix a status of colored citizens; the acts of its Congress were overset by the decisions of its courts. It "accepts anew the duty of leading in the work of progress and reform"; its caught criminals are permitted to escape through contrived delays or actual connivance in the prosecution. Honeycombed with corruption, outbreaking exposures no longer shock its moral sense. Its honest members, its independent journals no longer maintain a successful contest for authority in its councils or a veto upon bad nominations. That change is necessary is proved by an existing surplus of more than $100,000,000, which has yearly been collected from a suffering people. Unnecessary taxation is unjust taxation. We denounce the Republican Party for having failed to relieve the people from crushing war taxes, which have paralyzed business, crippled industry, and deprived labor of employment and of just reward.

The Democracy pledges itself to purify the administration from corruption, to restore economy, to revive respect for law, and to reduce taxation to the lowest limit consistent with due regard to the preservation of the faith of the Nation to its creditors and pensioners. Knowing full well, however, that legislation affecting the operations of the people should be cautious and conservative in method, not in advance of public opinion, but responsive to its demands, the Democratic Party is pledged to revise the tariff in a spirit of fairness to all interests. But, in making reduction in taxes, it is not proposed to injure any domestic industries, but rather to promote their healthy growth. From the foundation of this Government, taxes collected at the customhouse have been the chief source of Federal revenue. Such they must continue to be. Moreover, many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved. The process of reform must be subject in the execution to this plain dictate of justice; all taxation shall be limited to the requirements of economical government. The necessary reduction and taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor, and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country. Sufficient revenue to pay all the expenses of the Federal Government, economically administered, including pensions, interest and principal of the public debt, can be got under our present system of taxation from the customhouse taxes on fewer imported articles, bearing heaviest on articles of luxury and bearing lightest on articles of necessity. We therefore denounce the abuses of the existing tariff, and, subject to the preceding limitations, we demand that Federal taxation shall be exclusively for public purposes, and shall not exceed the needs of the Government economically administered.

The system of direct taxation known as the "internal revenue" is a war tax, and so long as the law continues the money derived therefrom should be sacredly devoted to the relief of the people from the

remaining burdens of the war, and be made a fund to defray the expense of the care and comfort of worthy soldiers disabled in line of duty in the wars of the Republic, and for the payment of such pensions as Congress may from time to time grant to such soldiers, a like fund for the sailors having already been provided, and any surplus should be paid into the Treasury.

We favor an American continental policy based upon more intimate commercial and political relations with the 15 sister Republics of North, Central, and South America, but entangling alliances with none.

We believe in honest money, the gold and silver coinage of the Constitution, and a circulating medium convertible into such money without loss.

Asserting the equality of all men before the law, we hold that it is the duty of the Government in its dealings with the people to mete out equal and exact justice to all citizens, of whatever nativity, race, color, or persuasion, religious or political.

We believe in a free ballot and a fair count, and we recall to the memory of the people the noble struggle of the Democrats in the Forty-fifth and Forty-sixth Congresses, by which a reluctant Republican opposition was compelled to assent to legislation making everywhere illegal the presence of troops at the polls, as the conclusive proof that a Democratic administration will preserve liberty with order.

The selection of Federal officers for the Territories should be restricted to citizens previously resident therein.

We oppose sumptuary laws, which vex the citizen and interfere with individual liberty.

We favor honest civil-service reform and a compensation of all United States officers by fixed salaries, the separation of church and state, and the diffusion of free education by common schools, so that every child in the land may be taught the rights and duties of citizenship.

While we favor all legislation which will tend to the equitable distribution of property, to the prevention of monopoly, and to the strict enforcement of individual rights against corporate abuses, we hold that the welfare of society depends upon a scrupulous regard for the right of property as defined by law.

We believe that labor is best rewarded where it is freest and most enlightened. It should therefore be fostered and cherished. We favor the repeal of all laws restricting the free action of labor, and the enactment of laws by which labor organizations may be incorporated, and of all such legislation as will tend to enlighten the people as to the true relations of capital and labor.

We believe that the public land ought, as far as possible to be kept as homesteads for actual settlers; that all unearned lands heretofore improvidently granted to railroad corporations by the action of the Republican Party should be restored to the public domain, and that no more grants of land shall be made to corporations or be allowed to fall into the ownership of alien absentees.

We are opposed to all propositions which upon any pretext would convert the General Government into a machine for collecting taxes, to be distributed among the States, or the citizens thereof.

In reaffirming the declaration of the Democratic platform of 1856, that the liberal principles embodied by Jefferson in the Declaration of Independence, and sanctioned in the Constitution, which makes ours the land of liberty and the asylum of the oppressed of every nation, have ever been cardinal principles in the Democratic faith, we nevertheless do not sanction the importation of foreign labor or the admission of servile races, unfitted by habits, training, religion, or kindred for absorption into the great body of our people or for the citizenship which our laws confer. American civilization demands that against the immigration or importation of Mongolians to these shores our gates be closed.

The Democratic Party insists that it is the duty of the Government to protect with equal fidelity and vigilance the rights of its citizens, native and naturalized, at home and abroad, and to the end that this protection may be assured, United States papers of naturalization, issued by courts of competent jurisdiction, must be respected by the executive and legislative departments of our own Government and by all foreign powers. It is an imperative duty of this Government to efficiently protect all the rights of persons and property of every American citizen in foreign lands, and demand and enforce full reparation for any invasion thereof. An American citizen is only responsible to his own Government for any act done in his own country or under her flag, and can only be tried therefor on her own soil and according to her laws; and no power exists in this Government to expatriate an American citizen to be tried in any foreign land for any such act.

This country has never had a well defined and executed foreign policy, save under Democratic administration. That policy has ever been in regard to foreign nations, so long as they do not act detrimental to the interests of the country or hurtful to our citizens, to let them alone; that as a result of this policy we recall the acquisition of Louisiana, Florida, California, and of the adjacent Mexican territory, by purchase alone, and contrast these grand acquisitions of Democratic statesmanship with the purchase of Alaska, the sole fruit of a Republican administration of nearly a quarter of a century.

The Federal Government should care for and improve the Mississippi River and other great waterways of the Republic, so as to secure for the interior States easy and cheap transportation to tidewater.

Under a long period of Democratic rule and policy our merchant marine was fast overtaking, and on the point of outstripping, that of Great Britain. Under 20 years of Republican rule and policy our commerce has been left to British bottoms, and the American flag has almost been swept off the high seas. Instead of the Republican Party's British policy, we demand for the people of the United States an American policy. Under Democratic rule and policy our merchants and sailors, flying the Stars and Stripes in every port, successfully searched out a market for the varied products of American industry; under a quarter of a century of Republican rule and policy—despite our manifest advantage over all other nations in high-paid labor, favorable climate, and teeming soils; despite freedom of trade among all these United States; despite their population by the foremost races of men, and an annual immigration of the young, thrifty, and adventurous of all nations; despite our freedom here from the inherited burdens of life and industry in the Old World monarchies, their costly war navies, their vast tax-consuming, nonproducing standing armies; despite 20 years of peace—that Republican rule and policy have managed to surrender to Great Britain, along with our commerce, the control of the markets of the world. Instead of the Republican Party's British policy, we demand, in behalf of the American democracy, an American policy. Instead of the Republican Party's discredited scheme and false pretense of friendship for American labor, expressed by imposing taxes, we demand in behalf of the Democracy, freedom for American labor, by reducing taxes, to the end that these United States may compete with unhindered powers for the primacy among nations in all the arts of peace and fruits of liberty.

With profound regret, we have been apprised by the venerable statesman through whose person was struck that blow at the vital principle of Republics—acquiescence in the will of the majority—that he can not permit us again to place in his hands the leadership of the Democratic hosts, for the reason that the achievement of reform in the administration of the Federal Government is an undertaking now too heavy for his age and failing strength. Rejoicing that his life has been prolonged until the general judgment of our fellow countrymen is united in the wish that that wrong were righted in his person for the Democracy of the United States we offer to him, in his withdrawal from public cares, not only our respectful sympathy and esteem, but also that best homage of freemen—the pledge of our devotion to the principles and the cause now inseparable in the history of this Republic from the labors and the name of Samuel J. Tilden.

With this statement of the hopes, principles, and purposes of the Democratic Party, the great issue of reform and change in administration is submitted to the people, in calm confidence that the popular voice will pronounce in favor of new men and new and more favorable conditions for the growth of industry, the extension of trade, the employment and due reward of labor and of capital, and the general welfare of the whole country.

—

The Republican convention of 1884 was held at Chicago, Ill., June 3–6.

James G. Blaine, of Maine, was nominated for President, and John A. Logan, of Illinois, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1884.

The Republicans of the United States, in national convention assembled renew their allegiance to the principles upon which they have triumphed in six successive presidential elections, and congratulate the American people on the attainment of so many results in legislation and administration, by which the Republican Party has, after saving the Union, done so much to render its institutions just, equal, and beneficent, the safeguard of liberty, and the embodiment of the best thought and highest purpose of our citizens.

The Republican Party has gained its strength by quick and faithful response to the demands of the people for the freedom and equality of all men; for a united Nation, assuring the rights of all citizens; for the elevation of labor; for an honest currency; for purity in legislation; and for integrity and accountability in all departments of the Government, and it accepts anew the duty of leading in the work of progress and reform.

We lament the death of President Garfield, whose sound statesmanship, long conspicuous in Congress, gave promise of a strong and successful administration—a promise fully realized during the short period of his office as President of the United States. His distinguished services in war and peace have endeared him to the hearts of the American people.

In the administration of President Arthur we recognize a wise, conservative, and patriotic policy, under which the country has been blessed with remarkable prosperity, and we believe his eminent services are entitled to and will receive the hearty approval of every citizen.

It is the first duty of a good government to protect the rights and promote the interests of its own people.

The largest diversity of industry is most productive of general prosperity, and of the comfort and independence of the people.

We therefore demand that the imposition of duties on foreign imports shall be made, not "for revenue only," but that in raising the requisite revenues for the Government such duties shall be so levied as to afford security to our diversified industries and protection to the rights and wages of the laborer, to the end that active and intelligent labor, as well as capital, may have its just reward, and the laboring man his full share in the national prosperity.

Against the so-called economic system of the Democratic Party, which would degrade our labor to the foreign standard, we enter our earnest protest.

The Democratic Party has failed completely to relieve the people of the burden of unnecessary taxation by a wise reduction of the surplus.

The Republican Party pledges itself to correct the inequalities of the tariff and to reduce the surplus, not by the vicious and indiscriminate process of horizontal reduction, but by such methods as will relieve the taxpayer without injuring the laborer or the great productive interests of the country.

We recognize the importance of sheep husbandry in the United States, the serious depression which it is now experiencing, and the danger threatening its future prosperity; and we therefore respect the demands of the representatives of this important agricultural interest for a readjustment of duties upon foreign wool, in order that such industry shall have full and adequate protection.

We have always recommended the best money known to the civilized world; and we urge that efforts should be made to unite all commercial nations in the establishment of an international standard, which shall fix for all the relative value of gold and silver coinage.

The regulation of commerce with foreign nations and between the States is one of the most important prerogatives of the General Government; and the Republican Party distinctly announces its purpose to support such legislation as will fully and efficiently carry out the Constitutional power of Congress over interstate commerce.

The principle of public regulation of railway corporations is a wise and salutary one for the protection of all classes of the people, and we favor legislation that shall prevent unjust discrimination and excessive charges for transportation, and that shall secure to the people and the railways alike the fair and equal protection of the laws.

We favor the establishment of a national bureau of labor; the enforcement of the eight-hour law; a wise and judicious system of general legislation by adequate appropriation from the national revenues, wherever the same is needed. We believe that everywhere the protection to a citizen of American birth must be secured to citizens by American adoption; and we favor the settlement of national differences by international arbitration.

The Republican Party, having its birth in a hatred of slave labor and a desire that all men may be truly free and equal, is unalterably opposed to placing our workingmen in competition with any form of servile labor, whether at home or abroad. In this spirit we denounce the importation of contract labor, whether from Europe or Asia, as an offense against the spirit of American institutions; and we pledge ourselves to sustain the present law restricting Chinese immigration, and to provide such further legislation as is necessary to carry out its purposes.

Reform of the civil service, auspiciously begun under Republican administration, should be completed by the further extension of the reform system, already established by law, to all the grades of the service to which it is applicable. The spirit and purpose of the reform should be observed in all executive appointments, and all laws at variance with the objects of existing reform legislation should be repealed, to the end that the dangers to free institutions which lurk in the power of official patronage may be wisely and effectively avoided.

The public lands are a heritage of the people of the United States, and should be reserved as far as possible for small holdings by actual settlers. We are opposed to the acquisition of large tracts of these lands by corporations or individuals, especially where such holdings are in the hands of nonresidents or aliens, and we will endeavor to obtain such legislation as will tend to correct this evil. We demand of Congress the speedy forfeiture of all land grants which have lapsed by reason of noncompliance with acts of incorporation, in all cases where there has been no attempt in good faith to perform the conditions of such grants.

The grateful thanks of the American people are due to the Union soldiers and sailors of the late war; and the Republican Party stands pledged to suitable pensions for all who were disabled, and for the widows and orphans of those who died in the war. The Republican Party also pledges itself to the repeal of the limitations contained in the arrears act of 1879, so that all invalid soldiers shall share alike, and their pensions begin with the date of disability or discharge, and not with the date of application.

The Republican Party favors a policy which shall keep us from entangling alliances with foreign nations, and which gives us the right to expect that foreign nations shall refrain from meddling in American affairs—a policy which seeks peace and trade with all powers, but especially with those of the Western Hemisphere.

We demand the restoration of our Navy to its old-time strength and efficiency that it may in any sea protect the rights of American citizens and the interests of American commerce; and we call upon Congress to remove the burdens under which American shipping has been depressed, so that it may again be true that we have a commerce which leaves no sea unexplored and a Navy which takes no law from superior force.

*Resolved*, That appointments by the President to offices in the Territories should be made from the bona fide citizens and residents of the Territories wherein they are to serve.

*Resolved*, That it is the duty of Congress to enact such laws as shall promptly and effectually suppress the system of polygamy within our Territories and divorce the political from the ecclesiastical power of the so-called Mormon Church; and that the laws so enacted should be rigidly enforced by the civil authorities if possible, and by the military, if need be.

The people of the United States, in their organized capacity, constitute a Nation and not an American federacy of States. The National Government is supreme within the sphere of its national duties; but the States have reserved rights which should be faithfully maintained. Each should be guarded with jealous care, so that the harmony of our system of government may be preserved and the Union kept inviolate.

The perpetuity of our institutions rests upon the maintenance of a free ballot, an honest count, and correct returns. We denounce the fraud and violence practiced by the Democracy in Southern States, by which the will of a voter is defeated, as dangerous to the preservation of free institutions; and we solemnly arraign the Democratic Party as being the guilty recipient of the fruits of such fraud and violence.

We extend to the Republicans of the South, regardless of their former party affiliations, our cordial sympathy and pledge to them our most earnest efforts to promote the passage of such legislation as will secure to every citizen, of whatever race and color, the full and complete recognition, possession, and exercise of all civil and political rights.

—

The Democratic convention of 1888 was held at St. Louis, Mo., June 5. Grover Cleveland, of New York, was nominated for President, and Allen G. Thurman, of Ohio, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1888.

The Democratic Party of the United States, in national convention assembled, renews the pledge of its fidelity to Democratic faith, and reaffirms the platform adopted by its representatives at the convention of 1884, and indorses the views expressed by President Cleveland in his last earnest message to Congress as the correct interpretation of that platform upon the question of tariff reduction; and also indorses the efforts of our Democratic Representatives in Congress to secure a reduction of excessive taxation.

MAINTENANCE OF THE UNION.

Chief among its principles of party faith are the maintenance of an indissoluble union of free and indestructible States, now about to enter upon its second century of unexampled progress and renown; devotion to a plan of government regulated by a written Constitution, strictly specifying every granted power and expressly reserving to the States or people the entire ungranted residue of power; the encouragement of a jealous popular vigilance, directed to all who have been chosen for brief terms to enact and execute the laws, and are charged with the duty of preserving peace, insuring equality, and establishing justice.

PLEDGES REDEEMED.

The Democratic Party welcomes an exacting scrutiny of the administration of the executive power, which four years ago was committed to its trust in the selection of Grover Cleveland as President of the United States; but it challenges the most searching scrutiny concerning its fidelity and devotion to the pledges which then invited the suffrages of the people. During a most critical period of our financial affairs resulting from overtaxation, the anomalous condition of our currency, and a public debt unmatured, it has, by the adoption of a wise and conservative course, not only averted disaster, but greatly promoted the prosperity of the people.

HOMES FOR THE PEOPLE.

It has reversed the improvident and unwise policy of the Republican Party touching the public domain and has reclaimed from corporations and syndicates, alien and domestic, and restored to the people nearly 100,000,000 acres of valuable land, to be sacredly held as homesteads for our citizens.

PENSIONS FOR THE SOLDIERS.

While carefully guarding the interests of the taxpayers and conforming strictly to the principles of justice and equity, it has paid out more for pensions and bounties to the soldiers and sailors of the Republic than was ever paid before during an equal period.

FOREIGN POLICY.

It has adopted and consistently pursued a firm and prudent foreign policy, preserving peace with all nations, while scrupulously maintaining all the rights and interests of our own Government and people at home and abroad. The exclusion from our shores of Chinese laborers has been effectually secured under the provisions of a treaty, the operation of which has been postponed by the action of a Republican majority in the Senate.

CIVIL-SERVICE REFORM.

Honest reform in the civil service has been inaugurated and maintained by President Cleveland, and he has brought the public service to the highest standard of efficiency, not only by rule and precept, but by the example of his own untiring and unselfish administration of public affairs.

RIGHTS OF THE PEOPLE.

In every branch and department of the Government under Democratic control the rights and the welfare of all the people have been guarded and defended, every public interest has been protected, and the equality of all our citizens before the law, without regard to race or color, has been steadfastly maintained. Upon its record thus exhibited and upon the pledge of a continuance to the people of these benefits the Democracy invokes a renewal of popular trust by the reelection of a Chief Magistrate who has been faithful, able, and prudent. We invoke, in addition to that trust, the transfer also to the Democracy of the entire legislative power.

TAXATION.

The Republican Party, controlling the Senate and resisting in both Houses of Congress a reformation of unjust and unequal tax laws, which have outlasted the necessities of war and are now undermining the abundance of a long peace, denies to the people equality before the law and the fairness and the justice which are their right. Thus the cry of American labor for a better share in the rewards of industry is stifled with false pretenses, enterprise is fettered and bound down to home markets, capital is discouraged with doubt, and unequal, unjust laws can neither be properly amended nor repealed. The Democratic Party will continue, with all the power confined to it, the struggle to reform these laws in accordance with the pledges of its last platform, indorsed at the ballot box by the suffrages of the people.

Of all the industrious freemen of our land the immense majority, including every tiller of the soil, gain no advantage from excessive tax laws, but the price of nearly everything they buy is increased by the favoritism of an unequal system of tax legislation. All unnecessary taxation is unjust taxation. It is repugnant to the creed of Democracy that by such taxation the cost of the necessaries of life should be unjustifiably increased to all our people. Judged by Democratic principles, the interests of the people are betrayed when, by unnecessary taxation, trusts and combinations are permitted to exist, which while unduly enriching the few that combine rob the body of our citizens by depriving them of the benefits of natural competition.

NATIONAL SURPLUS.

Every Democratic rule of governmental action is violated when, through unnecessary taxation, a vast sum of money, far beyond the needs of an economical administration, is drawn from the people and the channels of trade and accumulated as a demoralizing surplus in the National Treasury. The money now lying idle in the General Treasury resulting from superfluous taxation amounts to more than $125,000,000, and the surplus collected is reaching the sum of more than $60,000,000 annually. Debauched by this immense temptation, the remedy of the Republican Party is to meet and exhaust, by extravagant appropriations and expenses, whether constitutional or not, the accumulation of extravagant taxation. The Democratic policy is to enforce frugality in public expense and to abolish unnecessary taxation.

TARIFF REFORM.

Our established domestic industries and enterprises should not and need not be endangered by the reduction and correction of the burdens of taxation. On the contrary, a fair and careful revision of our tax laws, with due allowance for the difference between the wages of American and foreign labor, must promote and encourage every branch of such industries and enterprises by giving them assurance of an extended market and steady and continuous operations. In the interests of American labor, which should in no event be neglected, the revision of our tax laws contemplated by the Democratic Party should promote the advantage of such labor by cheapening the cost of necessaries of life in the home of every workingman and at the same time securing to him steady and remunerative employment. Upon this question of tariff reform, so closely concerning every phase of our national life, and upon every question involved in the problem of good government, the Democratic Party submits its principles and professions to the intelligent suffrages of the American people.

REDUCTION OF REVENUE.

*Resolved*, That this convention hereby indorses and recommends the early passage of the bill for the reduction of the revenue now pending in the House of Representatives.

ADMITTANCE OF TERRITORIES.

*Resolved*, That a just and liberal policy should be pursued in reference to the Territories; that right of self-government is inherent in the people and guaranteed under the Constitution; that the Territories of Washington, Dakota, Montana, and New Mexico are, by virtue of population and development, entitled to admission into the Union as States, and we unqualifiedly condemn the course of the Republican Party in refusing statehood and self-government to their people.

FOREIGN SELF-GOVERNMENT.

*Resolved*, That we express our cordial sympathy with the struggling people of all nations in their efforts to secure for themselves the inestimable blessings of self-government and civil and religious liberty, and we especially declare our sympathy with the efforts of those noble patriots who, led by Gladstone and Parnell, have conducted their grand and peaceful contest for home rule in Ireland.

—

The Republican convention of 1888 was held at Chicago, Ill., June 19 to 25.

Benjamin Harrison, of Indiana, was nominated for President, and Levi P. Morton, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1888.

The Republicans of the United States, assembled by their delegates in national convention, pause on the threshold of their proceedings to honor the memory of their first great leader, the immortal champion

of liberty and the rights of the people—Abraham Lincoln—and to cover also with wreaths of imperishable remembrance and gratitude the heroic names of our later leaders, who have more recently been called away from our councils—Grant, Garfield, Arthur, Logan, Conkling. May their memories be faithfully cherished. We also recall, with our greetings and with prayer for his recovery, the name of one of our living heroes, whose memory will be treasured in the history both of Republicans and of the Republic—the name of that noble soldier and favorite child of victory, Philip H. Sheridan.

In the spirit of those great leaders and of our own devotion to human liberty, and with that hostility to all forms of despotism and oppression which is the fundamental idea of the Republican Party, we send fraternal congratulations to our fellow-Americans of Brazil upon their great act of emancipation, which completed the abolition of slavery throughout the two American continents. We earnestly hope that we may soon congratulate our fellow citizens of Irish birth upon the peaceful recovery of home rule for Ireland.

FREE SUFFRAGE.

We reaffirm our unswerving devotion to the National Constitution and to the indissoluble union of the States; to the autonomy reserved to the States under the Constitution; to the personal rights and liberties of citizens in all the States and Territories in the Union, and especially to the supreme and sovereign right of every lawful citizen, rich or poor, native or foreign born, white or black, to cast one free ballot in public elections and to have that ballot duly counted. We hold the free and honest popular ballot and the just and equal representation of all the people to be the foundation of our republican Government, and demand effective legislation to secure the integrity and purity of elections, which are the fountains of all public authority. We charge that the present administration and the Democratic majority in Congress owe their existence to the suppression of the ballot by a criminal nullification of the Constitution and laws of the United States.

PROTECTION TO AMERICAN INDUSTRIES.

We are uncompromisingly in favor of the American system of protection; we protest against its destruction as proposed by the President and his party. They serve the interests of Europe; we will support the interests of America. We accept the issue and confidently appeal to the people for their judgment. The protective system must be maintained. Its abandonment has always been followed by general disaster to all interests, except those of the usurer and the sheriff. We denounce the Mills bill as destructive to the general business, the labor, and the farming interests of the country, and we heartily indorse the consistent and patriotic action of the Republican Representatives in Congress in opposing its passage.

DUTIES ON WOOL.

We condemn the proposition of the Democratic Party to place wool on the free list, and we insist that the duties thereon shall be adjusted and maintained so as to furnish full and adequate protection to that industry throughout the United States.

THE INTERNAL REVENUE.

The Republican Party would effect all needed reduction of the national revenue by repealing the taxes upon tobacco, which are an annoyance and burden to agriculture, and the tax upon spirits used in the arts and for mechanical purposes, and by such revision of the tariff laws as will tend to check imports of such articles as are produced by our people, the production of which gives employment to our labor, and release from import duties those articles of foreign production (except luxuries) the like of which can not be produced at home. If there shall still remain a larger revenue than is requisite for the wants of the Government, we favor the entire repeal of internal taxes rather than the surrender of any part of our protective system, at the joint behests of the Whisky Trust and the agents of foreign manufacturers.

FOREIGN CONTRACT LABOR.

We declare our hostility to the introduction into this country of foreign contract labor and of Chinese labor, alien to our civilization and our Constitution, and we demand the rigid enforcement of the existing laws against it, and favor such immediate legislation as will exclude such labor from our shores.

We declare our opposition to all combinations of capital, organized in trusts or otherwise, to control arbitrarily the condition of trade among our citizens; and we recommend to Congress and the State legislatures, in their respective jurisdictions, such legislation as will prevent the execution of all schemes to oppress the people by undue charges on their supplies, or by unjust rates for the transportation of their products to market. We approve the legislation by Congress to prevent alike unjust burdens and unfair discriminations between the States.

HOMES FOR THE PEOPLE.

We reaffirm the policy of appropriating the public lands of the United States to be homesteads for American citizens and settlers, not aliens, which the Republican party established in 1862, against the persistent opposition of the Democrats in Congress, and which has brought our western domain into such magnificent development. The restoration of unearned railroad land grants to the public domain for the use of actual settlers, which was begun under the administration of President Arthur should be continued. We deny that the Democratic party has ever restored one acre to the people, but declare that by the joint action of the Republicans and Democrats about 50,000,000 of acres of unearned lands originally granted for the construction of railroads have been restored to the public domain, in pursuance of the conditions inserted by the Republican Party in the original grants. We charge the Democratic administration with failure to execute the laws securing to settlers title to their homesteads, and with using appropriations made for that purpose to harass innocent settlers with spies and prosecutions, under the false pretense of exposing frauds and vindicating the law.

HOME RULE IN TERRITORIES.

The government by Congress of the Territories is based upon necessity only, to the end that they may become States in the Union; therefore, whenever the conditions of population, material resources, public intelligence, and morality are such as to issue a stable local government therein, the people of such Territories should be permitted, as a right inherent in them, the right to form for themselves consitutions and State governments, and be admitted into the Union. Pending the preparation for statehood, all officers thereof should be selected from the bona fide residents and citizens of the Territory wherein they are to serve.

ADMITTANCE OF SOUTH DAKOTA.

South Dakota should of right be immediately admitted as a State in the Union, under the constitution framed and adopted by her people, and we heartily indorse the action of the Republican Senate in twice passing bills for her admission. The refusal of the Democratic House of Representatives for partisan purposes, to favorably consider these bills is a willful violation of the sacred American principle of local self-government, and merits the condemnation of all just men. The pending bills in the Senate for acts to enable the people of Washington, North Dakota, and Montana Territories to form constitutions and establish State governments should be passed without unnecessary delay. The Republican Party pledges itself to do all in its power to facilitate the admission of the Territories of New Mexico, Wyoming, Idaho, and Arizona to the enjoyment of self-government as States—such of them as are now qualified as soon as possible, and the others as soon as they may become so.

MORMONISM.

The political power of the Mormon Church in the Territories as exercised in the past is a menace to free institutions, a danger no longer to be suffered. Therefore we pledge the Republican party to appropriate legislation asserting the sovereignty of the Nation in all Territories where the same is questioned, and in furtherance of that end to place upon the statute books legislation stringent enough to divorce the political from the ecclesiastical power, and thus stamp out the attendant wickedness of polygamy.

BIMETALLISM.

The Republican Party is in favor of the use of both gold and silver as money, and condemns the policy of the Democratic administration in its efforts to demonetize silver.

REDUCTION OF LETTER POSTAGE.

We demand the reduction of letter postage to 1 cent per ounce.

FREE SCHOOLS.

In a Republic like ours, where the citizen is the sovereign and the official the servant, where no power is exercised except by the will of the people, it is important that the sovereign—the people—should possess intelligence. The free school is the promoter of that intelligence which is to preserve us a free Nation; therefore the State or Nation, or both combined, should support free institutions of learning sufficient to afford to every child growing up in the land the opportunity of a good common-school education.

ARMY AND NAVY FORTIFICATIONS.

We earnestly recommend that prompt action be taken by Congress in the enactment of such legislation as will best secure the rehabilitation of our American merchant marine, and we protest against the passage by Congress of a free-ship bill, as calculated to work injustice to labor by lessening the wages of those engaged in preparing materials as well as those directly employed in our shipyards. We demand appropriations for the early rebuilding of our Navy; for the construction of coast fortifications and modern ordnance and other approved modern means of defense for the protection of our defenseless harbors and cities; for the payment of just pensions to our soldiers: for the necessary works of national importance in the improvement of harbors and the channels of internal, coastwise, and foreign commerce; for the encouragement of the shipping interests of the Atlantic, Gulf, and Pacific States, as well as for the payment of the maturing public debt. This policy will give employment to our labor, activity to our various industries, increase the security of our country, promote trade, open new and direct markets for our produce, and cheapen the cost of transportation. We affirm this to be far better for our country than the Democratic policy of loaning the Government's money, without interest, to "pet banks."

THE MONROE DOCTRINE.

The conduct of foreign affairs by the present administration has been distinguished by its inefficiency and its cowardice. Having withdrawn from the Senate all pending treaties effected by Republican administrations for the removal of foreign burdens and restrictions upon our commerce and for its extension into better markets, it has neither effected nor proposed any others in their stead. Professing adherence to the Monroe doctrine, it has seen, with idle complacency, the extension of foreign influence in Central America and of foreign trade everywhere among our neighbors. It has refused to charter, sanction, or encourage any American organization for constructing the Nicaragua Canal, a work of vital importance to the maintenance of the Monroe doctrine and of our national influence in Central and South America, and necessary for the development of trade with our Pacific territory, with South America, and with the islands and farther coasts of the Pacific Ocean.

PROTECTION OF OUR FISHERIES.

We arraign the present Democratic administration for its weak and unpatriotic treatment of the fisheries question, and its pusillanimous surrender of the essential privileges to which our fishing vessels are entitled in Canadian ports under the treaty of 1818, the reciprocal maritime legislation of 1830, and the comity of nations, and which Canadian fishing vessels receive in the ports of the United States. We condemn the policy of the present administration and the Democratic majority in Congress toward our fisheries as unfriendly and conspicuously unpatriotic, and as tending to destroy a valuable national industry and an indispensable resource of defense against a foreign enemy. The name of American applies alike to all citizens of the Republic, and imposes upon all alike the same obligation of obedience to the laws. At the same time that citizenship is and must be the panoply and safeguard of him who wears it, and protect him, whether high or low, rich or poor, in all his civil rights. It should and must afford him protection at home and follow and protect him abroad, in whatever land he may be, on a lawful errand.

CIVIL-SERVICE REFORM.

The men who abandoned the Republican Party in 1884 and continue to adhere to the Democratic Party have deserted not only the cause of honest government, of sound finance, of freedom, of purity of the ballot, but especially have deserted the cause of reform in the civil service. We will not fail to keep our pledges because they have broken theirs, or because their candidate has broken his. We therefore repeat our declaration of 1884, to wit: "The reform of the civil service, auspiciously begun under the Republican administration, should be completed by the further extension of the reform system, already established by law, to all the grades of the service to which it is applicable. The spirit and purpose of the reform should be observed in all Executive appointments, and all laws at variance with the object of existing

reform legislation should be repealed to the end that the dangers to free institutions which lurk in the power of official patronage may be wisely and effectively avoided."

PENSIONS FOR THE SOLDIERS.

The gratitude of the Nation to the defenders of the Union can not be measured by laws. The legislation of Congress should conform to the pledge made by a loyal people, and be so enlarged and extended as to provide against the possibility that any man who honorably wore the Federal uniform should become the inmate of an almshouse or dependent upon private charity. In the presence of an overflowing Treasury it would be a public scandal to do less for those whose valorous service preserved the Government. We denounce the hostile spirit of President Cleveland in his numerous vetoes of measures for pension relief and the action of the Democratic House of Representatives in refusing even a consideration of general pension legislation.

In support of the principles herewith enunciated, we invite the cooperation of patriotic men of all parties, and especially of all workingmen, whose prosperity is seriously threatened by the free-trade policy of the present administration.

RESOLUTION RELATING TO PROHIBITION.

The first concern of all good government is the virtue and sobriety of the people and the purity of their homes. The Republican Party cordially sympathize with all wise and well-directed efforts for the promotion of temperance and morality.

---

The Democratic convention of 1892 was held at Chicago, Ill., June 21. Grover Cleveland, of New York, was nominated for President and Adlai E. Stevenson, of Illinois, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1892.

SECTION 1. The representatives of the Democratic Party of the United States, in national convention assembled, do reaffirm their allegiance to the principles of the party as formulated by Jefferson and exemplified by the long and illustrious line of his successors in Democratic leadership, from Madison to Cleveland; we believe the public welfare demands that these principles be applied to the conduct of the Federal Government, through the accession to power of the party that advocates them; and we solemnly declare that the need of a return to these fundamental principles of a free popular government, based on home rule and individual liberty, was never more urgent than now, when the tendency to centralize all power at the Federal Capital has become a menace to the reserved rights of the States that strikes at the very roots of our Government, under the Constitution as framed by the fathers of the Republic.

FEDERAL CONTROL OF ELECTIONS.

SEC. 2. We warn the people of our common country, jealous for the preservation of their free institutions, that the policy of Federal control of elections, to which the Republican Party has committed itself, is fraught with the gravest dangers, scarcely less momentous than would result from a revolution practically establishing monarchy on the ruins of the Republic. It strikes at the North as well as at the South, and injures the colored citizens even more than the white. It means a horde of deputy marshals at every polling place, armed with Federal power; returning boards appointed and controlled by Federal authority; the outrage of the electoral rights of the people in the several States; the subjugation of the colored people to the control of the party in power, and the reviving of race antagonisms now happily abated, of the utmost peril to the safety and happiness of all—a measure deliberately and justly described by a leading Republican Senator as "the most infamous bill that ever crossed the threshold of the Senate." Such a policy, if sanctioned by law, would mean the dominance of a self-perpetuating oligarchy of officeholders, and the party first intrusted with its machinery could be dislodged from power only by an appeal to the reserved rights of the people to resist oppression; which is inherent in all self-governing communities. Two years ago this revolutionary policy was emphatically condemned by the people at the polls; but, in contempt of that verdict, the Republican Party has defiantly declared, in its latest authoritative utterance, that its success in the coming elections will mean the enactment of the force bill and the usurpation of despotic control over elections in all the States.

Believing that the preservation of republican government in the United States is dependent upon the defeat of this policy of legalized force and fraud, we invite the support of all citizens who desire to see the Constitution maintained in its integrity, with the laws pursuant thereto, which have given our country a hundred years of unexampled prosperity; and we pledge the Democratic Party, if it be intrusted with power, not only to the defeat of the force bill, but also to relentless opposition to the Republican policy of profligate expenditure, which, in the short space of two years, has squandered an enormous surplus and emptied an overflowing Treasury, after piling new burdens of taxation upon the already overtaxed labor of the country.

TARIFF LEGISLATION.

SEC. 2. We denounce Republican protection as a fraud—a robbery of the great majority of the American people for the benefit of the few. We declare it to be a fundamental principal of the Democratic Party that the Federal Government has no constitutional power to impose and collect tariff duties, except for the purposes of revenue only, and we demand that the collection of such taxes shall be limited to the necessities of the Government when honestly and economically administered.

We denounce the McKinley tariff law enacted by the Fifty-first Congress as the culminating atrocity of class legislation; we indorse the efforts made by the Democrats of the present Congress to modify its most oppressive features in the direction of free raw materials and cheaper manufactured goods that enter into general consumption, and we promise its repeal as one of the beneficent results that will follow the action of the people in intrusting power to the Democratic Party. Since the McKinley tariff went into operation there have been 10 reductions of the wages of the laboring men to 1 increase. We deny that there has been any increase of prosperity to the country since that tariff went into operation, and we point to the dullness and distress, to the wage reductions and strikes in the iron trade, as the best possible evidence that no such prosperity has resulted from the McKinley Act.

We call the attention of thoughtful Americans to the fact that, after 30 years of restrictive taxes against the importation of foreign wealth in exchange for our agricultural surplus, the homes and farms of the country have become burdened with a real estate mortgage debt of over $2,500,000,000, exclusive of all other forms of indebtedness; that in one of the chief agricultural States of the West there appears a real estate mortgage debt averaging $165 per capita of the total population, and that similar conditions and tendencies are shown to exist in the other agricultural-exporting States. We denounce a policy which fosters no industry so much as it does that of the sheriff.

RECIPROCITY.

SEC. 4. Trade interchange on the basis of reciprocal advantages to the countries participating is a time-honored doctrine of the Democratic faith, but we denounce the sham reciprocity which juggles with the people's desire for enlarged foreign markets and freer exchanges, by pretending to establish closer trade relations for a country whose articles of export are almost exclusively agricultural products with other countries that are also agricultural, while erecting a custom-house barrier of prohibitive tariff taxes against the richest countries of the world, that stand ready to take our entire surplus of products, and to exchange therefor commodities which are necessaries and comforts of life among our own people

TRUSTS AND COMBINATIONS.

SEC. 5. We recognize in the trusts and combinations, which are designed to enable capital to secure more than its just share of the joint product of capital and labor, a natural consequence of the prohibitive taxes which prevent the free competition which is the life of honest trade; but we believe their worst evils can be abated by law, and we demand the rigid enforcement of the laws made to prevent and control them, together with such further legislation in restraint of their abuses as experience may show to be necessary.

PUBLIC LAND.

SEC. 6. The Republican Party, while professing a policy of reserving the public land for small holdings by actual settlers, has given away the people's heritage, till now a few railroads and nonresident aliens, individual and corporate, possess a larger area than that of all our farms between the two seas. The last Democratic Administration reversed the improvident and unwise policy of the Republican Party touching the public domain, and reclaimed from corporations and syndicates, alien and domestic, and restored to the people, nearly 100,000,000 acres of valuable land, to be sacredly held as homesteads for our citizens, and we pledge ourselves to continue this policy until every acre of land so unlawfully held shall be reclaimed and restored to the people.

GOLD AND SILVER.

SEC. 7. We denounce the Republican legislation known as the Sherman Act of 1890 as a cowardly makeshift, fraught with possibilities of danger in the future which should make all of its supporters, as well as its author, anxious for its speedy repeal. We hold to the use of both gold and silver as the standard money of the country, and to the coinage of both gold and silver without discriminating against either metal or charge for mintage; but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, or be adjusted through international agreement or by such safeguards of legislation as shall insure the maintenance of the parity of the two metals and the equal power of every dollar at all times in the markets and in the payment of debts; and we demand that all paper currency shall be kept at par with and redeemable in such coin. We insist upon this policy as especially necessary for the protection of the farmers and the laboring classes, the first and most defenseless victims of unstable money and a fluctuating currency.

TAX ON STATE BANKS.

SEC. 8. We recommend that the prohibitory 10 per cent tax on State bank issues be repealed.

CIVIL SERVICE.

SEC. 9. Public office is a public trust. We reaffirm the declaration of the Democratic National Convention of 1876 for the reform of the civil service, and we call for the honest enforcement of all laws regulating the same. The nomination of a President, as in the recent Republican convention, by delegations composed largely of his appointees, holding office at his pleasure, is a scandalous satire upon free popular institutions, and a startling illustration of the methods by which a President may gratify his ambition. We denounce a policy under which Federal officeholders usurp control of party conventions in the States, and we pledge the Democratic Party to the reform of these and all other abuses which threaten individual liberty and local self-government.

FOREIGN POLICY.

SEC. 10. The Democratic Party is the only party that has ever given the country a foreign policy consistent and vigorous, compelling respect abroad and inspiring confidence at home. While avoiding entangling alliances, it has aimed to cultivate friendly relations with other nations, and especially with our neighbors on the American Continent, whose destiny is closely linked with our own, and we view with alarm the tendency to a policy of irritation and bluster, which is liable at any time to confront us with the alternative of humiliation or war. We favor the maintenance of a navy strong enough for all purposes of national defense, and to properly maintain the honor and dignity of the country abroad.

SYMPATHY FOR THE OPPRESSED.

SEC. 11. This country has always been the refuge of the oppressed from every land—exiles for conscience' sake—and, in the spirit of the founders of our Government, we condemn the oppression practiced by the Russian Government upon its Lutheran and Jewish subjects, and we call upon our National Government, in the interest of justice and humanity, by all just and proper means, to use its prompt and best efforts to bring about a cessation of these cruel persecutions in the dominions of the Czar, and to secure to the oppressed equal rights. We tender our profound and earnest sympathy to those lovers of freedom who are struggling for home rule and the great cause of local self-government in Ireland.

IMMIGRATION.

SEC. 12. We heartily approve all legitimate efforts to prevent the United States from being used as the dumping ground for the known criminals and professional paupers of Europe, and we demand the rigid enforcement of the laws against Chinese immigration, or the importation of foreign labor and lessen its wages; but we condemn and denounce any and all attempts to restrict the immigration of the industrious and worthy of foreign lands.

PENSIONS.

SEC. 13. This convention hereby renews the expression of appreciation of the patriotism of the soldiers and sailors of the Union in the war for its preservation and we favor just and liberal pensions for all

disabled Union soldiers, their widows, and dependents; but we demand that the work of the Pension Office shall be done industriously, impartially, and honestly. We denounce the present administration of that office as incompetent, corrupt, disgraceful, and dishonest.

WATERWAYS.

SEC. 14. The Federal Government shall care for and improve the Mississippi River and other great waterways of the Republic, so as to secure for the interior States easy and cheap transportation to the tide water. When any waterway of the public is of sufficient importance to demand the aid of the Government, such aid should be extended with a definite plan of continuous work until permanent improvement is secured.

NICARAGUA CANAL.

SEC. 15. For purposes of national defense and the promotion of commerce between the States, we recognize the early construction of the Nicaragua Canal and its protection against foreign control as of great importance to the United States.

WORLD'S FAIR.

SEC. 16. Recognizing the World's Columbian Exposition as a national undertaking of vast importance, in which the General Government has invited the cooperation of all the powers of the world; and, appreciating the acceptance by many of such powers of the invitation so extended and the broadest liberal efforts being made by them to contribute to the grandeur of the undertaking, we are of the opinion that Congress should make such necessary financial provision as shall be requisite to the maintenance of the national honor and public faith.

EDUCATION.

SEC. 17. Popular education being the only safe basis of popular suffrage, we recommend to the several States most liberal appropriations for the public schools. Free common schools are the nursery of good government, and they have always received the fostering care of the Democratic Party, which favors every means of increasing intelligence. Freedom of education, being an essential of civil and religious liberty as well as a necessity for the development of intelligence, must not be interfered with under any pretext whatever. We are opposed to State interference with parental rights and rights of conscience in the education of children as an infringement of the fundamental Democratic doctrine that the largest individual liberty consistent with the rights of others insures the highest type of American citizenship and the best government.

ADMISSION OF TERRITORIES.

SEC. 18. We approve the action of the present House of Representatives in passing bills for the admission into the Union as States of the Territories of New Mexico and Arizona, and we favor the early admission of all the Territories having necessary population and resources to admit them to statehood; and while they remain Territories we hold that the officials appointed to administer the government of any Territory, together with the Districts of Columbia and Alaska, should be bona fide residents of the Territory or District in which their duties are to be performed. The Democratic Party believes in home rule and the control of their own affairs by the people of the vicinage.

PROTECTION OF RAILROAD EMPLOYEES.

SEC. 18. We favor legislation by Congress and State legislatures to protect the lives and limbs of railway employees and those of other hazardous transportation companies, and denounce the inactivity of the Republican Party, and particularly the Republican Senate, for causing the defeat of measures beneficial and protective to this class of wage-workers.

SWEATING SYSTEM.

SEC. 20. We are in favor of the enactment by the States of laws for abolishing the notorious sweating system; for abolishing contract convict labor; and for prohibiting the employment in factories of children under 15 years of age.

SUMPTUARY LAWS.

SEC. 21. We are opposed to all sumptuary laws as an interference with the individual rights of the citizen.

CHANGES ASKED.

SEC. 22. Upon this statement of pprinciples and policies the Democratic Party asks the intelligent judgment of the American people. It asks a change of administration and a change of party, in order that there may be a change of system and a change of methods, thus assuring the maintenance unimpaired of institutions under which the Republic has grown great and powerful.

---

The Republican convention of 1892 was held at Minneapolis, Minn., June 7–10.

Benjamin Harrison, of Indiana, was nominated for President, and Whitelaw Reid, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1892.

The representatives of the Republicans of the United States, assembled in general convention on the shores of the Mississippi River, the everlasting bond of an indestructible Republic, whose most glorious chapter of history is the record of the Republican Party, congratulate their countrymen on the majestic march of the Nation under the banners inscribed with the principles of our platform of 1888, vindicated by the victory at the polls and prosperity in our fields, workshops, and mines, and make the following declaration of principles:

THE PRINCIPLE OF PROTECTION.

We reaffirm the American doctrine of protection. We call attention to its growth abroad. We maintain that the prosperous condition of our country is largely due to the wise revenue legislation of the last Republican Congress. We believe that all articles which can not be produced in the United States, except luxuries, should be admitted free of duty, and that on all imports coming into competition with the products of American labor there should be levied duties equal to the difference between wages abroad and at home.

We assert that the prices of manufactured articles of general consumption have been reduced under the operations of the tariff act of 1890.

We denounce the efforts of the Democratic majority of the House of Representatives to destroy our tariff laws piecemeal, as manifested by their attacks upon wool, lead, and lead ores, the chief products of a number of States, and we ask the people for their judgment thereon.

TRIUMPH OF RECIPROCITY.

We point to the success of the Republican policy of reciprocity, under which our export trade has vastly increased and new and enlarged markets have been opened for the products of our farms and workshops. We remind the people of the bitter opposition of the Democratic Party to this practical business measure, and claim that, executed by a Republican administration, our present laws will eventually give us control of the trade of the world.

FREE AND SAFE COINAGE OF GOLD AND SILVER.

The American people, from tradition and interest, favor bimetallism, and the Republican Party demands the use of both gold and silver as standard money, with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of values of the two metals, so that the purchasing and debt-paying power of the dollar, whether of silver, gold, or paper, shall be at all times equal. The interests of the producers of the country, its farmers and its workingmen, demand that every dollar, paper or coin, issued by the Government shall be as good as any other. We commend the wise and patriotic steps already taken by our Government to secure an international conference to adopt such measures as will insure a parity of value between gold and silver for use as money throughout the world.

FREEDOM OF THE BALLOT.

We demand that every citizen of the United States shall be allowed to cast one free and unrestricted ballot in all public elections, and that such ballot shall be counted and returned as cast; that such laws shall be enacted and enforced as will secure to every citizen, be he rich or poor, native or foreign born, white or black, this sovereign right, guaranteed by the Constitution. The free and honest popular ballot, the just and equal representation of all the people, as well as their just and equal protection under the laws, are the foundation of our republican institutions, and the party will never relax its efforts until the integrity of the ballot and the purity of elections shall be fully guaranteed and protected in every State.

OUTRAGES IN THE SOUTH.

We denounce the continued inhuman outrages perpetrated upon American citizens for political reasons in certain Southern States of the Union.

EXTENSION OF FOREIGN COMMERCE.

We favor the extension of our foreign commerce, the restoration of our mercantile marine by home-built ships, and the creation of a navy for the protection of our national interests and the honor of our flag; the maintenance of the most friendly relations with all foreign powers, entangling alliances with none, and the protection of the rights of our fishermen.

MONROE DOCTRINE.

We reaffirm our approval of the Monroe doctrine, and believe in the achievement of the manifest destiny of the Republic in its broadest sense.

RESTRICTION OF IMMIGRATION.

We favor the enactment of more stringent laws and regulations for the restriction of criminal, pauper, and contract immigration.

EMPLOYEES OF RAILROADS.

We favor efficient legislation by Congress to protect the life and limbs of employees of transportation companies engaged in carrying on interstate commerce, and recommend legislation by the respective States that will protect employees engaged in State commerce, in mining, and manufacturing.

CHAMPIONING THE OPPRESSED.

The Republican Party has always been the champion of the oppressed, and recognizes the dignity of manhood, irrespective of faith, color, or nationality. It sympathizes with the cause of home rule in Ireland, and protests against the persecution of the Jews in Russia.

FREEDOM OF THOUGHT AND SPEECH.

The ultimate reliance of free popular government is the intelligence of the people and the maintenance of freedom among all men. We therefore declare anew our devotion to liberty of thought and conscience, of speech and press, and approve all agencies and instrumentalities which contribute to the education of the children of the land; but while insisting upon the fullest measure of religious liberty, we are opposed to any union of church and State.

TRUSTS CONDEMNED.

We reaffirm our opposition, declared in the Republican platform of 1888, to all combinations of capital, organized in trusts or otherwise, to control arbitrarily the condition of trade among our citizens. We heartily indorse the action already taken upon this subject, and ask for such further legislation as may be required to remedy any defects in existing laws and to render their enforcement more complete and effective.

FREE DELIVERY SERVICE.

We approve the policy of extending to towns, villages, and rural communities the advantages of the Free Delivery Service now enjoyed by the larger cities of the country, and reaffirm the declaration contained in the Republican platform of 1888, pledging the reduction of letter postage to 1 cent at the earliest possible moment consistent with the maintenance of the Post Office Department and the highest class of Postal Service.

SPIRIT OF CIVIL-SERVICE REFORM.

We commend the spirit and evidence of reform in the civil service, and the wise and consistent enforcement by the Republican Party of the laws regulating the same.

THE NICARAGUA CANAL.

The construction of the Nicaragua Canal is of the highest importance to the American people, both as a measure of defense and to build up and maintain American commerce, and it should be controlled by the United States Government.

TERRITORIES.

We favor the admission of the remaining Territories at the earliest practicable day, having due regard to the interests of the people of the Territories and of the United States.

FEDERAL TERRITORIAL OFFICERS.

All the Federal officers appointed for the Territories should be selected from bona fide residents thereof, and the right of self-government should be accorded as far as practicable.

ARID LANDS.

We favor cession, subject to the homestead laws, of the arid public lands to the States and Territories in which they lie, under such congressional restrictions as to disposition, reclamation, and occupancy by settlers as will secure the maximum benefits to the people.

THE COLUMBIAN EXPOSITION.

The World's Columbian Exposition is a great national undertaking, and Congress should promptly enact such reasonable legislation in aid thereof as will insure a discharging of the expense and obligations incident thereto and the attainment of results commensurate with the dignity and progress of the Nation.

SYMPATHY FOR TEMPERANCE.

We sympathize with all wise and legitimate efforts to lessen and prevent the evils of intemperance and promote morality.

PLEDGES TO THE VETERANS.

Ever mindful of the services and sacrifices of the men who saved the life of the nation, we pledge anew to the veteran soldiers of the Republic a watchful care and a just recognition of their claims upon a grateful people.

HARRISON'S ADMINISTRATION COMMENDED.

We commend the able, patriotic, and thoroughly American administration of President Harrison. Under it the country has enjoyed remarkable prosperity, and the dignity and honor of the nation, at home and abroad, have been faithfully maintained, and we offer the record of pledges kept as a guaranty of faithful performance in the future.

---

The Democratic convention of 1896 was held at Chicago, Ill., July 7. William J. Bryan, of Nebraska, was nominated for President and Arthur Sewell, of Maine, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1896.

We, the Democrats of the United States, in national convention assembled, do reaffirm our allegiance to those great essential principles of justice and liberty upon which our institutions are founded, and which the Democratic party has advocated from Jefferson's time to our own—freedom of speech, freedom of the press, freedom of conscience, the preservation of personal rights, the equality of all citizens before the law, and the faithful observance of Constitutional limitations.

During all these years the Democratic Party has resisted the tendency of selfish interests to the centralization of Governmental power, and steadfastly maintained the integrity of the dual system of Government established by the founders of this Republic of Republics. Under its guidance and teachings the great principle of local self-government has found its best expression in the maintenance of the rights of the States and in its assertion of the necessity of confining the general Government to the exercise of the powers granted by the Constitution of the United States.

The Constitution of the United States guarantees to every citizen the rights of civil and religious liberty. The Democratic party has always been the exponent of political liberty and religious freedom, and it renews its obligations and reaffirms its devotion to these fundamental principles of the Constitution.

THE MONEY PLANK.

Recognizing that the money question is paramount to all others at this time, we invite attention to the fact that the Federal Constitution named silver and gold together as the money metals of the United States, and that the first coinage law passed by Congress under the Constitution made the silver dollar the monetary unit and admitted gold to free coinage at a ratio based upon the silver-dollar unit.

We declare that the act of 1873 demonetizing silver without the knowledge or approval of the American people, has resulted in the appreciation of gold and a corresponding fall in the prices of commodities produced by the people; a heavy increase in the burden of taxation and of all debts, public and private; the enrichment of the money-lending class at home and abroad; the prostration of industry and impoverishment of the people.

We are unalterably opposed to monometalism, which has locked fast the prosperity of an industrial people in the paralysis of hard times. Gold monometalism is a British policy, and its adoption has brought other nations into financial servitude to London. It is not only un-American but anti-American, and it can be fastened on the United States only by the stifling of that spirit and love of liberty which proclaimed our political independence in 1776 and won it in the war of the Revolution.

We demand the free and unlimited coinage of both silver and gold at the present legal ratio of 16 to 1, without waiting for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender, equally with gold, for all debts, public and private, and we favor such legislation as will prevent for the future the demonetization of any kind of legal-tender money by private contract.

We are opposed to the policy and practice of surrendering to the holders of the obligations of the United States the option reserved by law to the Government of redeeming such obligations in either silver coin or gold coin.

INTEREST-BEARING BONDS.

We are opposed to the issuing of interest-bearing bonds of the United States in time of peace, and condemn the trafficking with banking syndicates, which, in exchange for bonds and at an enormous profit to themselves, supply the Federal Treasury with gold to maintain the policy of gold monometallism.

AGAINST NATIONAL BANKS.

Congress alone has the power to coin and issue money, and President Jackson declared that this power could not be delegated to corporations or individuals. We therefore denounce the issuance of notes intended to circulate as money by national banks as in derogation of the Constitution, and we demand that all paper which is made a legal tender for public and private debts, or which is receivable for dues to the United States, shall be issued by the Government of the United States, and shall be redeemable in coin.

TARIFF RESOLUTION.

We hold that tariff duties should be levied for purposes of revenue, such duties to be so adjusted as to operate equally throughout the country, and not discriminate between class or section, and that taxation should be limited by the needs of the Government, honestly and economically administered. We denounce as disturbing to business the Republican threat to restore the McKinley law, which has twice been condemned by the people in national elections, and which, enacted under the false plea of protection to home industry, proved a prolific breeder of trusts and monopolies, enriched the few at the expense of the many, restricted trade, and deprived the producers of the great American staples of access to their natural markets.

Until the money question is settled we are opposed to any agitation for farther changes in our tariff laws, except such as are necessary to meet the deficit in revenue caused by the adverse decision of the Supreme Court on the income tax. But for this decision by the Supreme Court, there would be no deficit in the revenue under the law passed by a Democratic Congress in strict pursuance of the uniform decisions of that court for nearly one hundred years, that court having in that decision sustained constitutional objections to its enactment, which had previously been overruled by the ablest judges who have ever sat on that bench. We declare that it is the duty of Congress to use all the constitutional power which remains after that decision, or which may come from its reversal by the court as it may hereafter be constituted, so that the burdens of taxation may be equally and impartially laid, to the end that wealth may bear its due proportion of the expense of the Government.

IMMIGRATION AND ARBITRATION.

We hold that the most efficient way of protecting American labor is to prevent the importation of foreign pauper labor to compete with it in the home market, and that the value of the home market to our American farmers and artisans is greatly reduced by a vicious monetary system which depresses the prices of their products below the cost of production, and thus deprives them of the means of purchasing the products of our home manufactories; and as labor creates the wealth of the country, we demand the passage of such laws as may be necessary to protect it in all its rights.

We are in favor of the arbitration of differences between employers engaged in interstate commerce and their employees, and recommend such legislation as is necessary to carry out this principle.

TRUSTS AND POOLS.

The absorption of wealth by the few, the consolidation of our leading railroad systems, and the formation of trusts and pools require a stricter control by the Federal Government of those arteries of commerce. We demand the enlargement of the powers of the Interstate Commerce Commission and such restriction and guaranties in the control of railroads as will protect the people from robbery and oppression.

DECLARE FOR ECONOMY.

We denounce the profligate waste of the money wrung from the people by oppressive taxation and the lavish appropriations of recent Republican Congresses, which have kept taxes high while the labor that pays them in unemployed and the products of the people's toil are depressed in price till they no longer repay the cost of production. We demand a return to that simplicity and economy which befits a democratic government and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

FEDERAL INTERFERENCE IN LOCAL AFFAIRS.

We denounce arbitrary interference by Federal authorities in local affairs as a violation of the Constitution of the United States and a crime against free institutions, and we especially object to government by injunction as a new and highly dangerous form of oppression by which Federal judges, in contempt of the laws of the States and rights of citizens, become at once legislators, judges, and executioners, and we approve the bill passed at the last session of the United States Senate and now pending in the House of Representatives relative to contempts in Federal courts and providing for trials by jury in certain cases of contempt.

PACIFIC RAILROAD.

No discrimination should be indulged in by the Government of the United States in favor of any of its debtors. We approve of the refusal of the Fifty-third Congress to pass the Pacific Railroad funding bill and denounce the effort of the present Republican Congress to enact a similar measure.

PENSIONS.

Recognizing the just claims of deserving Union soldiers, we heartily indorse the rule of the present Commissioner of Pensions that no names shall be arbitrarily dropped from the pension roll, and the fact of enlistment and service should be deemed conclusive evidence against disease and disability before enlistment.

ADMISSION OF TERRITORIES.

We favor the admission of the Territories of New Mexico, Arizona, and Oklahoma into the Union as States, and we favor the early admission of all the Territories having the necessary population and resources to entitle them to statehood; and, while they remain Territories, we hold that the officials appointed to administer the government of any Territory, together with the District of Columbia and Alaska, should be bona fide residents of the Territory or District in which their duties are to be performed. The Democratic Party believes in home rule, and that all public lands of the United States should be appropriated to the establishment of free homes for American citizens.

We recommend that the Territory of Alaska be granted a delegate in Congress, and that the general land and timber laws of the United States be extended to said Territory.

SYMPATHY FOR CUBA.

The Monroe doctrine, as originally declared and as interpreted by succeeding Presidents, is a permanent part of the foreign policy of the United States and must at all times be maintained.

We extend our sympathy to the people of Cuba in their heroic struggle for liberty and independence.

CIVIL-SERVICE LAWS.

We are opposed to life tenure in the public service, except as provided in the Constitution. We favor appointments based on merit, fixed terms of office, and such an administration of the civil-service laws as will afford equal opportunities to all citizens of ascertained fitness.

THIRD-TERM RESOLUTION.

We declare it to be the unwritten law of this Republic, established by custom and usage of 100 years, and sanctioned by the examples of the greatest and wisest of those who founded and have maintained our Government that no man should be eligible for a third term of the Presidential office.

IMPROVEMENT OF WATERWAYS.

The Federal Government should care for and improve the Mississippi River and other great waterways of the Republic, so as to secure for the interior States easy and cheap transportation to tidewater. When any waterway of the Republic is of sufficient importance to demand aid of the Government, such aid should be extended upon a definite plan of continuous work until permanent improvement is secured.

CONCLUSION.

Confiding in the justice of our cause and the necessity of its success at the polls, we submit the foregoing declaration of principles and purposes to the considerate judgment of the American people. We invite the support of all citizens who approve them and who desire to have them made effective through legislation for the relief of the people and the restoration of the country's prosperity.

—

The Republican convention of 1896 was held at St. Louis, Mo., June 16.

William McKinley, of Ohio, was nominated for President and Garret A. Hobart, of New Jersey, was nominated for Vice-President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1896.

The Republicans of the United States, assembled by their representatives in national convention, appealing for the popular and historical justification of their claims to the matchless achievements of the 30 years of Republican rule, earnestly and confidently address themselves to the awakened intelligence, experience, and conscience of their countrymen in the following declaration of facts and principles:

For the first time since the Civil War the American people have witnessed the calamitous consequences of full and unrestricted Democratic control of the Government. It has been a record of unparalleled incapacity, dishonor, and disaster. In administrative management it has ruthlessly sacrificed indispensable revenue, entailed an unceasing deficit, eked out ordinary current expenses with borrowed money, piled up the public debt by $262,000,000 in time of peace, forced an adverse balance of trade, kept a perpetual menace hanging over the redemption fund, pawned American credit to alien syndicates, and reversed all the measures and results of successful Republican rule.

In the broad effect of its policy it has precipitated panic, blighted industry and trade with prolonged depression, closed factories, reduced work and wages, halted enterprise, and crippled American production while stimulating foreign production for the American market. Every consideration of public safety and individual interest demands that the Government shall be rescued from the hands of those who have shown themselves incapable to conduct it without disaster at home and dishonor abroad, and shall be restored to the party which for 30 years administered it with unequaled success and prosperity; and in this connection we heartily indorse the wisdom, the patriotism, and the success of the administration of President Harrison.

TARIFF.

We renew and emphasize our allegiance to the policy of protection as the bulwark of American industrial independence and the foundation of American development and prosperity. This true American policy taxes foreign products and encourages home industry; it puts the burden of revenue on foreign goods; it secures the American market for the American producer; it upholds the American standard of wages for the American workingman; it puts the factory by the side of the farm, and makes the American farmer less dependent on foreign demand and price; it diffuses general thrift, and founds the strength of all on the strength of each. In its reasonable application it is just, fair, and impartial; equally opposed to foreign control and domestic monopoly, to sectional discrimination and individual favoritism.

We denounce the present Democratic tariff as sectional, injurious to the public credit, and destructive to business enterprise. We demand such an equitable tariff on foreign imports which have come into competition with American products as will not only furnish adequate revenue for the necessary expenses of the Government, but will protect American labor from degradation to the wage level of other lands. We are not pledged to any particular schedules. The question of rates is a practical question to be governed by the conditions of time and of production; the ruling and uncompromising principle is the protection and development of American labor and industry. The country demands a right settlement, and then it wants rest.

RECIPROCITY.

We believe the repeal of the reciprocity arrangements negotiated by the last Republican administration was a national calamity, and we demand their renewal and extension on such terms as will equalize our trade with other nations, remove the restrictions which now obstruct the sale of American products in the ports of other countries and secure enlarged markets for the products of our farms, forests, and factories.

Protection and reciprocity are twin measures of Republican policy and go hand in hand. Democratic rule has recklessly struck down both, and both must be reestablished. Protection for what we produce; free admission for the necessaries of life which we do not produce; reciprocity agreements of mutual interests which gain open markets for us in return for our open market to others. Protection builds up domestic industry and trade, and secures our own market for ourselves; reciprocity builds up foreign trade, and finds an outlet for our surplus.

SUGAR.

We condemn the present administration for not keeping faith with the sugar producers of this country. The Republican Party favors such protection as will lead to the production on American soil of all the sugar which the American people use, and for which they pay other countries more than $100,000,000 annually.

WOOL AND WOOLENS.

To all our products—to those of the mine and the fields as well as to those of the shop and the factory; to hemp, to wool, the product of the great industry of sheep husbandry, as well as to the finished woolens of the mills—we promise the most ample protection.

MERCHANT MARINE.

We favor restoring the American policy of discriminating duties for the upbuilding of our merchant marine and the protection of our shipping in the foreign carrying trade, so that American ships—the product of American labor employed in American shipyards, sailing under the Stars and Stripes, and manned, officered, and owned by Americans—may regain the carrying of our foreign commerce.

FINANCE.

The Republican Party is unreservedly for sound money. It caused the enactment of the law providing for the resumption of specie payments in 1879; since then every dollar has been as good as gold.

We are unalterably opposed to every measure calculated to debase our currency or impair the credit of our country. We are, therefore, opposed to the free coinage of silver except by international agreement with the leading commercial nations of the world, which we pledge ourselves to promote, and until such agreement can be obtained the existing gold standard must be preserved. All our silver and paper currency must be maintained at parity with gold, and we favor all measures designed to maintain inviolably the obligations of the United States of all our money, whether coin or paper, at the present standard, the standard of the most enlightened nations of the earth.

PENSIONS.

The veterans of the Union Army deserve and should receive fair treatment and generous recognition. Whenever practicable they should be given the preference in the matter of employment, and they are entitled to the enactment of such laws as are best calculated to secure the fulfillment of the pledges made to them in the dark days of the country's peril. We denounce the practice in the Pension Bureau so recklessly and unjustly carried on by the present administration of reducing pensions and arbitrarily dropping names from the rolls, as deserving the severest condemnation of the American people.

FOREIGN RELATIONS.

Our foreign policy should be at all times firm, vigorous, and dignified, and all our interests in the Western Hemisphere carefully watched and guarded. The Hawaiian Islands should be controlled by the United States, and no foreign power should be permitted to interfere with them; the Nicaragua Canal should be built, owned, and operated by the United States; and by the purchase of the Danish islands we should secure a proper and much-needed naval station in the West Indies.

ARMENIAN MASSACRES.

The massacres in Armenia have aroused the deep sympathy and just indignation of the American people, and we believe that the United States should exercise all the influence it can properly exert to bring these atrocities to an end. In Turkey American residents have been exposed to the gravest dangers and American property destroyed. There and everywhere American citizens and American property must be absolutely protected at all hazards and at any cost.

MONROE DOCTRINE.

We reassert the Monroe doctrine in its full extent, and we reaffirm the right of the United States to give the doctrine effect by responding to the appeal of any American State for friendly intervention in case of European encroachment. We have not interfered and shall not interfere with the existing possessions of any European power in this hemisphere, but these possessions must not on any pretext be extended. We hopefully look forward to the eventual withdrawal of the European powers from this hemisphere, and to the ultimate union of all English-speaking parts of the continent by the free consent of its inhabitants.

CUBA.

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American peoples to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty.

The Government of Spain having lost control of Cuba and being unable to protect the property or lives of resident American citizens or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

THE NAVY.

The peace and security of the Republic and the maintenance of its rightful influence among the nations of the earth demand a naval power commensurate with its position and responsibility. We therefore favor the continued enlargement of the Navy and a complete system of harbor and seacoast defenses.

FOREIGN IMMIGRATION.

For the protection of the quality of our American citizenship and of the wages of our workingmen against the fatal competition of low-priced labor we demand that the immigration laws be thoroughly enforced and so extended as to exclude from entrance to the United States those who can neither read nor write.

CIVIL SERVICE.

The civil-service law was placed on the statute book by the Republican Party, which has always sustained it, and we renew our repeated declarations that it shall be thoroughly and honestly enforced, and extended wherever practicable.

FREE BALLOT.

We demand that every citizen of the United States shall be allowed to cast one free and unrestricted ballot, and that such ballot shall be counted and returned as cast.

LYNCHINGS.

We proclaim our unqualified condemnation of the uncivilized and barbarous practice well known as lynching, or killing of human beings suspected or charged with crime, without process of law.

NATIONAL ARBITRATION.

We favor the creation of a national board of arbitration to settle and adjust differences which may arise between employers and employees engaged in interstate commerce.

HOMESTEADS.

We believe in an immediate return to the free-homestead policy of the Republican Party and urge the passage by Congress of a satisfactory free-homestead measure, such as has already passed the House and is now pending in the Senate.

TERRITORIES.

We favor the admission of the remaining Territories at the earliest practicable date, having due regard to the interests of the people of the Territories and of the United States. All the Federal officers ap-

pointed for the Territories should be selected from bona fide residents thereof and the right of self-government should be accorded as far as practicable.

ALASKA.

We believe the citizens of Alaska should have representation in the Congress of the United States, to the end that needful legislation may be intelligently enacted.

TEMPERANCE.

We sympathize with all wise and legitimate efforts to lessen and prevent the evils of intemperance and promote morality.

RIGHTS OF WOMEN.

The Republican Party is mindful of the rights and interests of women. Protection of American industries includes equal opportunities, equal pay for equal work, and protection to the home. We favor the admission of women to wider spheres of usefulness, and welcome their cooperation in rescuing the country from Democratic and Populistic mismanagement and misrule.

Such are the principles and policies of the Republican Party. By these principles we will abide and these policies we will put into execution. We ask for them the considerate judgment of the American people. Confident alike in the history of our great party and in the justice of our cause we present our platform and our candidates in the full assurance that the election will bring victory to the Republican Party and prosperity to the people of the United States.

---

The Democratic convention of 1900 was held at Kansas City, Mo., July 4–6.

William Jennings Bryan, of Nebraska, was nominated for President and Adlai E. Stevenson, of Illinois, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1900.

We, the representatives of the Democratic Party of the United States, assembled in national convention, on the anniversary of the adoption of the Declaration of Independence, do reaffirm our faith in that immortal proclamation of the inalienable rights of man and our allegiance to the Constitution framed in harmony therewith by the Fathers of the Republic. We hold, with the United States Supreme Court, that the Declaration of Independence is the spirit of our Government, of which the Constitution is the form and letter.

THE ORIGIN AND POWERS OF GOVERNMENT.

We declare again that all governments instituted among men derive their just powers from the consent of the governed; that any Government not based upon the consent of the governed is a tyranny, and that to impose upon any people a government of force is to substitute the methods of imperialism for those of a republic. We hold that the Constitution follows the flag and denounce the doctrine that an Executive or Congress, deriving their existence and their power from the Constitution, can exercise lawful authority beyond it or in violation of it.

We assert that no nation can long endure half republic and half empire, and we warn the American people that imperialism abroad will lead quickly and inevitably to despotism at home.

TAXATION OF PORTO RICO.

Believing in these fundamental principles, we denounce the Porto Rican law, enacted by a Republican Congress against the protest and opposition of the Democratic minority, as a bold and open violation of the Nation's organic law and a flagrant breach of the national good faith. It imposes upon the people of Porto Rico a government without their consent and taxation without representation. It dishonors the American people by repudiating a solemn pledge made in their behalf by the commanding general of our Army, which the Porto Ricans welcomed to a peaceful and unresisted occupation of their land. It doomed to poverty and distress a people whose helplessness appeals with peculiar force to our justice and magnanimity.

In this, the first act of its imperialistic program, the Republican Party seeks to commit the United States to a colonial policy inconsistent with republican institutions and condemned by the Supreme Court in numerous decisions.

PLEDGE TO CUBA.

We demand the prompt and honest fulfillment of our pledge to the Cuban people and the world, that the United States has no disposition or intention to exercise sovereignty, jurisdiction, or control over the island of Cuba except for its pacification. The war ended nearly two years ago, profound peace reigns over all the island, and still the administration keeps the government of the island from its people, while Republican carpetbag officials plunder its revenues and exploit the colonial theory, to the disgrace of the American people.

THE PHILIPPINES.

We condemn and denounce the Philippine policy of the present administration. It has involved the Republic in unnecessary war, sacrificed the lives of many of our noblest sons, and placed the United States, previously known and applauded throughout the world as the champion of freedom, in the false an un-American position of crushing with military force the efforts of our former allies to achieve liberty and self-government. The Filipinos can not be citizens without endangering our civilization; they can not be subjects without imperiling our form of government; and as we are not willing to surrender our civilization nor to convert the Republic into an empire we favor an immediate declaration of the Nation's purpose to give the Filipinos, first, a stable form of government; second, independence; and, third, protection from outside interference, such as has been given for nearly a century to the Republics of Central and South America.

The greedy commercialism which dictated the Philippine policy of the Republican administration attempts to justify it with the plea that it will pay; but even this sordid and unworthy plea fails when brought to the test of facts. The war of criminal aggression against the Filipinos, entailing an annual expense of many millions, has already cost more than any possible profit that could accrue from the entire Philippine trade for years to come. Furthermore, when trade is extended at the expense of liberty, the price is always too high.

LEGITIMATE EXPANSION.

We are not opposed to territorial expansion when it takes in desirable territory which can be erected into States in the Union and whose people are willing and fit to become American citizens. We favor expansion by every peaceful and legitimate means. But we are unalterably opposed to seizing or purchasing distant islands to be governed outside the Constitution and whose people can never become citizens.

We are in favor of extending the Republic's influence among the nations, but believe that that influence should be extended not by force and violence, but through the persuasive power of a high and honorable example.

THE PARAMOUNT ISSUE.

The importance of other questions now pending before the American people is nowise diminished, and the Democratic Party takes no backward step from its position on them, but the burning issue of imperialism growing out of the Spanish War involves the very existence of the Republic and the destruction of our free institutions. We regard it as the paramount issue of the campaign.

THE MONROE DOCTRINE.

The declaration in the Republican platform adopted at the Philadelphia convention, held in June, 1900, that the Republican Party "steadfastly adheres to the policy announced in the Monroe doctrine" is manifestly insincere and deceptive. This profession is contradicted by the avowed policy of that party, in opposition to the spirit of the Monroe doctrine, to acquire and hold sovereignty over large areas of territory and large numbers of people in the Eastern Hemisphere. We insist on the strict maintenance of the Monroe doctrine in all its integrity, both in letter and in spirit, as necessary to prevent the extension of European authority on this continent and as essential to our supremacy in American affairs. At the same time we declare that no American people shall ever be held by force in unwilling subjection to European authority.

MILITARISM OPPOSED.

We oppose militarism. It means conquest abroad and intimidation and oppression at home. It means the strong arm which has ever been fatal to free institutions. It is what millions of our citizens have fled from in Europe. It will impose upon our peace-loving people a large standing army and unnecessary burden of taxation and will be a constant menace to their liberties. A small standing army and a well-disciplined State militia are amply sufficient in time of peace. This Republic has no place for a vast military service and conscription.

THE NATIONAL GUARD.

In time of danger the volunteer soldier is his country's best defender. The National Guard of the United States should ever be cherished in the patriotic hearts of a free people. Such organizations are ever an element of strength and safety. For the first time in our history and coeval with the Philippine conquest has there been a wholesale departure from our time-honored and approved system of volunteer organization. We denounce it as un-American, undemocratic, and unrepublican, and as a subversion of the ancient and fixed principles of a free people.

TRUSTS.

Private monopolies are indefensible and intolerable. They destroy competition, control the price of all material and of the finished product, thus robbing both producer and consumer. They lessen the employment of labor and arbitrarily fix the terms and conditions thereof, and deprive individual energy and a small capital of their opportunity for betterment. They are the most efficient means yet devised for appropriating the fruits of industry to the benefit of the few at the expense of the many, and, unless their insatiate greed is checked, all wealth will be aggregated in a few hands and the Republic destroyed.

The dishonest paltering with the trust evil by the Republican Party in State and National platforms is conclusive proof of the truth of the charge that trusts are the legitimate product of Republican policies, that they are fostered by Republican laws, and that they are protected by the Republican administration for campaign subscriptions and political support.

We pledge the Democratic Party to an unceasing warfare in Nation, State, and city against private monopoly in every form. Existing laws against trusts must be enforced and more stringent ones must be enacted, providing for publicity as to the affairs of corporations engaged in interstate commerce, requiring all corporations to show, before doing business outside the State of their origin, that they have no water in their stock, and that they have not attempted, and are not attempting, to monopolize any branch of business or the production of any article of merchandise; and the whole constitutional power of Congress over interstate commerce, the mails, and all modes of interstate communication shall be exercised by the enactment of comprehensive laws upon the subject of trusts.

THE FREE LIST AS A REMEDY.

Tariff laws should be amended by putting the products of trusts upon the free list, to prevent monopoly under the plea of protection.

REPUBLICAN INSINCERITY IN TRUST LEGISLATION.

The failure of the present Republican administration, with an absolute control over all the branches of the National Government, to enact any legislation designed to prevent or even curtail the absorbing power of trusts and illegal combinations, or to enforce the antitrust laws already on the statute books, proves the insincerity of the high-sounding phrases of the Republican platform.

CORPORATE INTERFERENCE IN GOVERNMENT.

Corporations should be protected in all their rights and their legitimate interests should be respected, but any attempt by corporations to interfere with the public affairs of the people, or to control the sovereignty which creates them, should be forbidden under such penalties as will make such attempts impossible.

THE DINGLEY TARIFF LAW.

We condemn the Dingley tariff law as a trust-breeding measure, skillfully devised to give the few favors which they do not deserve and to place upon the many burdens which they should not bear.

INTERSTATE COMMERCE COMMISSION.

We favor such an enlargement of the scope of the interstate-commerce law as will enable the commission to protect individuals and communities from discriminations and the public from unjust and unfair transportation rates.

THE SILVER DECLARATION.

We reaffirm and indorse the principles of the national Democratic platform adopted at Chicago in 1896, and we reiterate the demand of that platform for an American financial system made by the American people for themselves, which shall restore and maintain a bimetallic price level, and as part of such system the immediate restoration of the free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1, without waiting for the aid or consent of any other nation.

THE CURRENCY BILL DENOUNCED.

We denounce the currency bill enacted at the last session of Congress as a step forward in the Republican policy which aims to discredit the sovereign right of the National Government to issue all money, whether coin or paper, and to bestow upon national banks the power to issue and control the volume of paper money for their own benefit. A permanent national-bank currency, secured by Government bonds, must have a permanent debt to rest upon, and if the bank currency is to increase the debt must also increase. The Republican currency scheme is therefore a scheme for fastening upon the taxpayers a perpetual and growing debt.

We are opposed to this private corporation paper circulated as money but without legal tender qualities, and demand the retirement of the national-bank notes as fast as Government paper or silver certificates can be substituted for them.

POPULAR ELECTION OF SENATORS.

We favor an amendment to the Federal Constitution providing for election of United States Senators by the direct vote of the people, and we favor direct legislation wherever practicable.

INJUNCTIONS, BLACKLIST, AND ARBITRATION.

We are opposed to government by injunction; we denounce the blacklist, and favor arbitration as a means of settling disputes between corporations and their employees.

A DEPARTMENT OF LABOR.

In the interest of American labor and the uplifting of the workingman, as the corner stone of the prosperity of our country, we recommend that Congress create a department of labor, in charge of a secretary with a seat in the Cabinet, believing that the elevation of the American laborer will bring with it increased protection and increased prosperity to our country at home and to our commerce abroad.

LIBERAL PENSIONS.

We are proud of the courage and fidelity of the American soldiers and sailors in all our wars; we favor liberal pensions to them and their dependents, and we reiterate the position taken in the Chicago platform in 1896, that the fact of enlistment and service shall be deemed conclusive evidence against disease and disability before enlistment.

FOR THE NICARAGUAN CANAL.

We favor the immediate construction, ownership, and control of the Nicaraguan Canal by the United States, and we denounce the insincerity of the plank in the Republican platform for an isthmian canal in the face of the failure of the Republican majority on this subject to pass such a bill in Congress.

HAY-PAUNCEFOTE TREATY.

We condemn the Hay-Pauncefote treaty as a surrender of American rights and interests not to be tolerated by the American people.

NEW STATES AND TERRITORIES.

We denounce the failure of the Republican Party to carry out its pledges to grant statehood to the Territories of Arizona, New Mexico, and Oklahoma. We promise the people of those Territories immediate statehood, and home rule during their condition as Territories, and we favor home rule and a Territorial form of government for Alaska and Porto Rico.

ARID LANDS.

We favor an intelligent system of improving the arid lands of the West, storing the waters for purposes of irrigation, and the holding of such lands for actual settlers.

CHINESE EXCLUSION.

We favor the continuance and strict enforcement of the Chinese exclusion law, and its application to the same classes of all Asiatic races.

ALLIANCES OPPOSED.

Jefferson said: "Peace, commerce, and honest friendship with all nations; entangling alliances with none." We approve this wholesome doctrine, and earnestly protest against the Republican departure which has involved us in so-called world politics, including the diplomacy of Europe and the intrigue and land grabbing of Asia. We especially condemn the ill-concealed Republican alliance with England, which must mean discrimination against other friendly nations, and which has already stifled the Nation's voice, while liberty is being strangled in Africa.

SYMPATHY FOR THE BOERS.

Believing in the principles of self-government, and rejecting, as did our forefathers, the claim of monarchy, we view with indignation the purpose of England to overwhelm with force the South African republics. Speaking as we do for the entire American Nation, except its Republican officeholders, and for all freemen everywhere, we extend our sympathies to the heroic burghers in their unequal struggle to maintain their liberty and independence.

REPUBLICAN EXTRAVAGANCE DENOUNCED.

We denounce the lavish appropriations of recent Republican Congresses, which have kept taxes high and which threaten the perpetuation of the oppressive war levies. We oppose the accumulation of a surplus, to be squandered in such barefaced frauds upon the taxpayers as the shipping subsidy bill, which, under the false pretense of prospering American shipbuilding, would put unearned millions into the pockets of favorite contributors to the Republican campaign fund. We favor the reduction and speedy repeal of the war taxes and a return to the time-honored Democratic policy of strict economy in Governmental expenditures.

OUR INSTITUTIONS IMPERILED.

Believing that our most cherished institutions are in great peril, that the very existence of our Constitutional Republic is at stake, and that the decision now to be rendered will determine whether our children are to enjoy the blessed privileges of free government, which have made the United States great, prosperous, and honored, we earnestly ask for the foregoing declaration of principles the hearty support of the liberty-loving American people, regardless of previous party affiliations.

---

The Republican convention of 1900 was held at Philadelphia, Pa., June 19–21.

William McKinley, of Ohio, was nominated for President, and Theodore Roosevelt, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1900.

The Republicans of the United States through their chosen representatives met in national convention, looking back upon an unsurpassed record of achievement and looking forward into a great field of duty and opportunity, and appealing to the judgment of their countrymen, make these declarations:

EXPECTATIONS FULFILLED.

The expectation in which the American people, turning from the Democratic Party, intrusted power four years ago to a Republican Chief Magistrate and a Republican Congress, has been met and satisfied. When the people then assembled at the polls, after a term of Democratic legislation and administration, business was dead, industry paralyzed, and the national credit disastrously impaired. The country's capital was hidden away and its labor distressed and unemployed. The Democrats had no other plan with which to improve the ruinous conditions which they had themselves produced than to coin silver at the ratio of 16 to 1.

PROMISE OF PROSPERITY REDEEMED.

The Republican Party, denouncing this plan as sure to produce conditions even worse than those from which relief was sought, promised to restore prosperity by means of two legislative measures: A protective tariff and a law making gold the standard of value. The people by great majorities issued to the Republican Party a commission to enact these laws. The commission has been executed, and the Republican promise is redeemed.

Prosperity more general and more abundant than we have ever known has followed these enactments. There is no longer controversy as to the value of any Government obligations. Every American dollar is a gold dollar or its assured equivalent, and American credit stands higher than that of any nation. Capital is fully employed, and labor everywhere is profitably occupied.

GROWTH OF EXPORT TRADE.

No single fact can more strikingly tell the story of what Republican government means to the country than this, that while during the whole period of 107 years, from 1790 to 1897, there was an excess of exports over imports of only $383,028,497, there has been in the short three years of the present Republican administration an excess of exports over imports in the enormous sum of $1,483,537,094.

THE WAR WITH SPAIN.

And while the American people, sustained by this Republican legislation, have been achieving these splendid triumphs in their business and commerce, they have conducted, and in victory concluded, a war for liberty and human rights. No thought of national aggrandizement tarnished the high purpose with which American standards were unfurled. It was a war unsought and patiently resisted, but when it came the American Government was ready. Its fleets were cleared for action, its armies were in the field, and the quick and signal triumph of its forces on land and sea bore equal tribute to the courage of American soldiers and sailors, and to the skill and foresight of Republican statesmanship. To ten millions of the human race there was given "a new birth of freedom," and to the American people a new and noble responsibility.

M'KINLEY'S ADMINISTRATION INDORSED.

We indorse the administration of William McKinley. Its acts have been established in wisdom and in patriotism, and at home and abroad it has distinctly elevated and extended the influence of the American Nation. Walking untried paths and facing unforeseen responsibilities, President McKinley has been in every situation the true American patriot and the upright statesman, clear in vision, strong in judgment, firm in action, always inspiring and deserving the confidence of his countrymen.

DEMOCRATIC INCAPACITY A MENACE TO PROSPERITY.

In asking the American people to indorse this Republican record and to renew their commission to the Republican Party, we remind them of the fact that the menace to their prosperity has always resided in Democratic principles, and no less in the general incapacity of the Democratic Party to conduct public affairs. The prime essential of business prosperity is public confidence in the good sense of the Government and in its ability to deal intelligently with each new problem of administration and legislation. That confidence the Democratic Party has never earned. It is hopelessly inadequate, and the country's prosperity, when Democratic success at the polls is announced, halts and ceases in mere anticipation of Democratic blunders and failures.

MONETARY LEGISLATION.

We renew our allegiance to the principle of the gold standard and declare our confidence in the wisdom of the legislation of the Fifty-sixth Congress, by which the parity of all our money and the stability of our currency upon a gold basis has been secured. We recognize that interest rates are a potent factor in production and business activity, and for the purpose of further equalizing and of further lowering the rates of interest we favor such monetary legislation as will enable the varying needs of the season and of all sections to be promptly met, in order that trade may be evenly sustained, labor steadily employed, and commerce enlarged. The volume of money in circulation was never so great per capita as it is to-day.

FREE COINAGE OF SILVER OPPOSED.

We declare our steadfast opposition to the free and unlimited coinage of silver. No measure to that end could be considered which was without the support of the leading commercial countries of the world. However firmly Republican legislation may seem to have secured the country against the peril of base and discredited currency, the election of a Democratic President could not fail to impair the country's credit and to bring once more into question the intention of the American people to maintain upon the gold standard the parity of their money circulation. The Democratic Party must be convinced that the American people will never tolerate the Chicago platform.

TRUSTS.

We recognize the necessity and propriety of the honest cooperation of capital to meet new business conditions, and especially to extend our rapidly increasing foreign trade; but we condemn all conspiracies and combinations intended to restrict business, to create monopolies, to limit production, or to control prices, and favor such legislation as will effectively restrain and prevent all such abuses, protect and promote competition, and secure the rights of producers, laborers, and all who are engaged in industry and commerce.

PROTECTION POLICY REAFFIRMED.

We renew our faith in the policy of protection to American labor. In that policy our industries have been established, diversified, and maintained. By protecting the home market competition has been stimulated and production cheapened. Opportunity to the inventive genius of our people has been secured and wages in every department of labor maintained at high rates—higher now than ever before, and always distinguishing our working people in their better conditions of life from those of any competing country. Enjoying the blessings of the American common school, secure in the right of self-government, and protected in the occupancy of their own markets, their constantly increasing knowledge and skill have enabled them to finally enter the markets of the world.

RECIPROCITY FAVORED.

We favor the associated policy of reciprocity, so directed as to open our markets on favorable terms for what we do not ourselves produce in return for free foreign markets.

RESTRICTION OF IMMIGRATION, AND OTHER LABOR LEGISLATION.

In the further interest of American workmen we favor a more effective restriction of the immigration of cheap labor from foreign lands, the extension of opportunities of education for working children, the raising of the age limit for child labor, the protection of free labor as against contract convict labor, and an effective system of labor insurance.

SHIPPING.

Our present dependence upon foreign shipping for nine-tenths of our foreign carrying trade is a great loss to the industry of this country. It is also a serious danger to our trade, for its sudden withdrawal in the event of European war would seriously cripple our expanding foreign commerce. The national defense and naval efficiency of this country, moreover, supply a compelling reason for legislation which will enable us to recover our former place among the trade-carrying fleets of the world.

DEBT TO SOLDIERS AND SAILORS.

The Nation owes a debt of profound gratitude to the soldiers and sailors who have fought its battles, and it is the Government's duty to provide for the survivors and for the widows and orphans of those who have fallen in the country's wars. The pension laws, founded on this just sentiment, should be liberally administered, and preference should be given, wherever practicable, with respect to employment in the public service, to soldiers and sailors and to their widows and orphans.

THE CIVIL SERVICE.

We commend the policy of the Republican Party in maintaining the efficiency of the civil service. The administration has acted wisely in its effort to secure for public service in Cuba, Porto Rico, Hawaii, and the Philippine Islands only those whose fitness has been determined by training and experience. We believe that employment in the public service in these territories should be confined, as far as practicable, to their inhabitants.

THE RACE QUESTION.

It was the plain purpose of the fifteenth amendment to the Constitution to prevent discrimination on account of race or color in regulating the elective franchise. Devices of State governments, whether by statutory or constitutional enactment, to avoid the purpose of this amendment are revolutionary and should be condemned.

PUBLIC ROADS.

Public movements looking to a permanent improvement of the roads and highways of the country meet with our cordial approval, and we recommend this subject to the earnest consideration of the people and of the legislatures of the several States.

RURAL FREE DELIVERY.

We favor the extension of the Rural Free-Delivery Service wherever its extension may be justified.

LAND LEGISLATION.

In further pursuance of the constant policy of the Republican Party to provide free homes on the public domain, we recommend adequate national legislation to reclaim the arid lands of the United States, reserving control of the distribution of water for irrigation to the respective States and Territories.

NEW STATES PROPOSED.

We favor home rule for and the early admission to statehood of the Territories of New Mexico, Arizona, and Oklahoma.

REDUCTION OF WAR TAXES.

The Dingley Act, amended to provide sufficient revenue for the conduct of the war, has so well performed its work that it has been possible to reduce the war debt in the sum of $40,000,000. So ample are the Government's revenues and so great is the public confidence in the integrity of its obligations that its newly funded 2 per cent bonds sell at a premium. The country is now justified in expecting, and it will be the policy of the Republican Party to bring about, a reduction of the war taxes.

ISTHMIAN CANAL AND NEW MARKETS.

We favor the construction, ownership, control, and protection of an Isthmian Canal by the Government of the United States. New markets are necessary for the increasing surplus of our farm products. Every effort should be made to open and obtain new markets, especially in the Orient, and the administration is to be warmly commended for its successful efforts to commit all trading and colonizing nations to the policy of the open door in China.

DEPARTMENT OF COMMERCE.

In the interest of our expanding commerce we recommend that Congress create a Department of Commerce and Industries in the charge of a Secretary with a seat in the Cabinet. The United States consular system should be reorganized under the supervision of this new department upon such a basis of appointment and tenure as will render it still more serviceable to the Nation's increasing trade.

PROTECTION OF CITIZENS.

The American Government must protect the person and property of every citizen wherever they are wrongfully violated or placed in peril.

SERVICES OF WOMEN.

We congratulate the women of America upon their splendid record of public service in the Volunteer Aid Association and as nurses in camp and hospital during the recent campaigns of our armies in the East and West Indies, and we appreciate their faithful cooperation in all works of education and industry.

FOREIGN AFFAIRS—SAMOAN AND HAWAIIAN ISLANDS.

President McKinley has conducted the foreign affairs of the United States with distinguished credit to the American people. In releasing us from the vexatious conditions of a European alliance for the government of Samoa his course is especially to be commended. By securing to our undivided control the most important island of the Samoan group and the best harbor in the southern Pacific every American interest has been safeguarded.

We approve the annexation of the Hawaiian Islands to the United States.

THE HAGUE CONFERENCE—THE MONROE DOCTRINE—THE SOUTH AFRICAN WAR.

We commend the part taken by our Government in the Peace Conference at The Hague. We assert our steadfast adherence to the policy announced in the Monroe doctrine. The provisions of The Hague convention were wisely regarded when President McKinley tendered his friendly offices in the interest of peace between Great Britain and the South African Republic. While the American Government must continue the policy prescribed by Washington, affirmed by every succeeding President, and imposed upon us by The Hague treaty, of nonintervention in European controversies, the American people earnestly hope that a way may soon be found, honorable alike to both contending parties, to terminate the strife between them.

SOVEREIGNTY IN NEW POSSESSIONS.

In accepting by the treaty of Paris the just responsibility of our victories in the Spanish War, the President and the Senate won the undoubted approval of the American people. No other course was possible than to destroy Spain's sovereignty throughout the West Indies and in the Philippine Islands. That course created our responsibility before the world and with the unorganized population whom our intervention had freed from Spain to provide for the maintenance of law and order and for the establishment of good government and for the performance of international obligations.

Our authority could not be less than our responsibility, and wherever sovereign rights were extended it became the high duty of the Government to maintain its authority, to put down armed insurrection, and to confer the blessings of liberty and civilization upon all the rescued peoples.

The largest measure of self-government consistent with their welfare and our duties shall be secured to them by law.

INDEPENDENCE OF CUBA.

To Cuba independence and self-government were assured in the same voice by which war was declared, and to the letter this pledge shall be performed.

INVOKES THE JUDGMENT OF THE PEOPLE.

The Republican Party, upon its history and upon this declaration of its principles and policies, confidently invokes the considerate and approving judgment of the American people.

---

The Democratic convention of 1904 was held at St. Louis, Mo., July 6–9.

Alton B. Parker, of New York, was nominated for President and Henry G. Davis, of West Virginia, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC CONVENTION, 1904.

The Democratic Party of the United States, in national convention assembled, declares its devotion to the essential principles of the Democratic faith which bring us together in party communion.

Under them local self-government and national unity and prosperity were alike established. They underlay our independence, the structure of our free Republic, and every Democratic extension from Louisiana to California and Texas to Oregon which preserved faithfully in all the States the tie between taxation and representation. They yet inspire the masses of our people, guarding jealously their rights and liberties and cherishing their fraternity, peace, and orderly development. They remind us of our duties and responsibilities as citizens, and impress upon us, particularly at this time, the necessity of reform and the rescue of the administration of government from the headstrong, arbitrary, and spasmodic methods which distract business by uncertainty and pervade the public mind with dread, distrust, and perturbation.

FUNDAMENTAL PRINCIPLES

The application of these fundamental principles to the living issues of the day is the first step toward the assured peace, safety, and progress of our Nation. Freedom of the press, of conscience, and of speech; equality before the law of all citizens; right of trial by jury; freedom of the person defended by the writ of habeas corpus; liberty of personal contract untrammeled by sumptuary laws; supremacy of the civil over military authority; a well-disciplined militia; the separation of church and state; economy in expenditures; low taxes, that labor may be lightly burdened; prompt and sacred fulfillment of public and private obligations; fidelity to treaties; peace and friendship with all nations, entangling alliances with none; absolute acquiescence in the will of the majority, the vital principle of republics—these are doctrines which Democracy has established as proverbs of the Nation, and they should be constantly invoked and enforced.

CAPITAL AND LABOR.

We favor enactment and administration of laws giving labor and capital impartially their just rights. Capital and labor ought not to be enemies. Each is necessary to the other. Each has its rights, but the rights of labor are certainly no less "vested," no less "sacred," and no less "unalienable" than the rights of capital.

CONSTITUTIONAL GUARANTIES.

Constitutional guaranties are violated whenever any citizen is denied the right to labor, acquire and enjoy property, or reside where interest or inclination may determine. Any denial thereof by individuals, organizations, or governments should be summarily rebuked and punished.

We deny the right of any Executive to disregard or suspend any constitutional privilege or limitation. Obedience to the laws and respect for their requirements are alike the supreme duty of the citizen and the official.

The military should be used only to support and maintain the law. We unqualifiedly condemn its employment for the summary banishment of citizens without trial or for the control of elections.

We approve the measure which passed the United States Senate in 1896, but which a Republican Congress has ever since refused to enact, relating to contempts in Federal courts and providing for trial by jury in cases of indirect contempt.

WATERWAYS.

We favor liberal appropriations for the care and improvement of the waterways of the country. When any waterway like the Mississippi River is of sufficient importance to demand special aid of the Government, such aid should be extended with a definite plan of continuous work until permanent improvement is secured.

We oppose the Republican policy of starving home development in order to feed the greed for conquest and the appetite for national "prestige" and display of strength.

ECONOMY OF ADMINISTRATION.

Large reductions can easily be made in the annual expenditures of the Government without impairing the efficiency of any branch of the public service, and we shall insist upon the strictest economy and frugality compatible with vigorous and efficient civil, military, and naval administration as a right of the people too clear to be denied or withheld.

We favor the enforcement of honesty in the public service, and to that end a thorough legislative investigation of those executive departments of the Government already known to teem with corruption, as well as other departments suspected of harboring corruption, and the punishment of ascertained corruptionists, without fear or favor or regard to persons. The persistent and deliberate refusal of both the Senate and the House of Representatives to permit such investigation to be made demonstrates that only by a change in the executive and in the legislative departments can complete exposure, punishment, and correction be obtained.

FEDERAL GOVERNMENT CONTRACTS WITH TRUSTS.

We condemn the action of the Republican Party in Congress in refusing to prohibit an executive department from entering into contracts with convicted trusts or unlawful combinations in restraint of interstate trade. We believe that one of the best methods of procuring economy and honesty in the public service is to have public officials, from the occupant of the White House down to the lowest of them, return as nearly as may be to Jeffersonian simplicity of living.

EXECUTIVE USURPATION.

We favor the nomination and election of a President imbued with the principles of the Constitution, who will set his face sternly against Executive usurpation of legislative and judicial functions, whether that usurpation be veiled under the guise of Executive construction of existing laws, or whether it take refuge in the tyrant's plea of necessity or superior wisdom.

IMPERIALISM.

We favor the preservation, so far as we can, of an open door for the world's commerce in the Orient, without an unnecessary entanglement in oriental and European affairs, and without arbitrary, unlimited, irresponsible, and absolute government anywhere within our jurisdiction.

We oppose, as fervently as did George Washington himself, an indefinite, irresponsible, discretionary, and vague absolutism and a policy of colonial exploitation, no matter where or by whom invoked or exercised. We believe, with Thomas Jefferson and John Adams, that no Government has a right to make one set of laws for those "at home" and another and a different set of laws, absolute in their character, for those "in the colonies." All men under the American flag are entitled to the protection of the institutions whose emblem the flag is. If they are inherently unfit for those institutions, then they are inherently unfit to be members of the American body politic. Wherever there may exist a people incapable of being governed under American laws, in consonance with the American Constitution, the territory of that people ought not to be part of the American domain.

FILIPINOS AND CUBANS.

We insist that we ought to do for the Filipinos what we have done already for the Cubans, and it is our duty to make that promise now and, upon suitable guaranties of protection to citizens of our own and other countries resident there at the time of our withdrawal, set the Filipino people upon their feet, free and independent to work out their own destiny.

The endeavor of the Secretary of War, by pledging the Government's indorsement for "promoters" in the Philippine Islands, to make the United States a partner in speculative legislation of the archipelago, which was only temporarily held up by the opposition of the Democratic Senators in the last session, will, if successful, lead to entanglements from which it will be difficult to escape.

TARIFF LEGISLATION.

The Democratic Party has been and will continue to be the consistent opponent of that class of tariff legislation by which certain interests have been permitted, through congressional favor, to draw a heavy tribute from the American people. This monstrous prevention of those equal opportunities which our political institutions were established to secure has caused what may once have been infant industries to become the greatest combinations of capital that the world has ever known. These especial favorites of the Government have, through trust methods, been converted into monopolies, thus bringing to an end domestic competition, which was the only alleged check upon the extravagant profits made possible by the protective system. These industrial combinations, by the financial assistance they can give, now control the policy of the Republican Party.

We denounce protection as a robbery of the many to enrich the few, and we favor a tariff limited to the needs of the Government, economically administered, and so levied as not to discriminate against any industry, class, or section, to the end that the burdens of taxation shall be distributed as equally as possible.

We favor a revision and a gradual reduction of the tariff by the friends of the masses and for the common weal, and not by the friends of its abuses, its extortions, and its discriminations, keeping in view the ultimate ends of "equality of burdens and equality of opportunities," and the constitutional purpose of raising a revenue by taxation, to wit, the support of the Federal Government in all its integrity and virility, but in simplicity.

TRUSTS AND UNLAWFUL COMBINATIONS.

We recognize that the gigantic trusts and combinations designed to enable capital to secure more than its just share of the joint products of capital and labor and which have been fostered and promoted under Republican rule, are a menace to beneficial competition and an obstacle to permanent business prosperity. A private monopoly is indefensible and intolerable.

Individual equality of opportunity and free competition are essential to a healthy and permanent commercial prosperity, and any trust, combination, or monopoly tending to destroy these by controlling production, restricting competition, or fixing prices should be prohibited and punished by law. We especially denounce rebates and discrimination by transportation companies as the most potent agency in promoting and strengthening these unlawful conspiracies against trade.

INTERSTATE COMMERCE.

We demand an enlargement of the powers of the Interstate Commerce Commission, to the end that the traveling public and shippers of this country may have prompt and adequate relief for the abuses to which they are subjected in the matter of transportation. We demand a strict enforcement of existing civil and criminal statutes against all such trusts, combinations, and monopolies, and we demand the enactment of such further legislation as may be necessary to effectually suppress them.

Any trust or unlawful combination engaged in interstate commerce which is monopolizing any branch of business or production should not be permitted to transact business outside of the State of its origin. Whenever it shall be established in any court of competent jurisdiction that such monopolization exists, such prohibition should be enforced through comprehensive laws to be enacted on the subject.

RECLAMATION OF ARID LANDS.

We congratulate our western citizens upon the passage of the law known as the Newlands Irrigation Act for the irrigation and reclamation of the arid lands of the West, a measure framed by a Democrat, passed in the Senate by a nonpartisan vote, and passed in the House against the opposition of almost all the Republican leaders by a vote, the majority of which was Democratic. We call attention to this great Democratic measure, broad and comprehensive as it is, working automatically throughout all time, without further action of Congress, until the reclamation of all the lands in the arid West capable of reclamation is accomplished, reserving the lands reclaimed for home seekers in small tracts and rigidly guarding against land monopoly, as an evidence of the policy of domestic development contemplated by the Democratic Party should it be placed in power.

ISTHMIAN CANAL.

The Democracy, when intrusted with power, will construct the Panama Canal speedily, honestly, and economically, thereby giving to our people what Democrats have always contended for—a great interoceanic canal, furnishing shorter and cheaper lines of transportation and broader and less trammeled trade relations with the other peoples of the world.

AMERICAN CITIZENSHIP.

We pledge ourselves to insist upon the just and lawful protection of our citizens at home and abroad, and to use all proper measures to secure for them, whether native born or naturalized, and without distinction of race or creed, the equal protection of laws and the enjoyment of all rights and privileges open to them under the covenants of our treaties of friendship and commerce; and if under existing treaties the right of travel and sojourn is denied the American citizen or recognition is withheld from American passports by any countries on the ground of race or creed, we favor the beginning of negotiations with the Governments of such countries to secure by treaties the removal of these unjust discriminations. We demand that all over the world a duly authenticated passport issued by the Government of the United States to an American citizen shall be proof of the fact that he is an American citizen and shall entitle him to the treatment due him as such.

ELECTION OF SENATORS BY THE PEOPLE.

We favor the election of United States Senators by the direct vote of the people.

STATEHOOD FOR TERRITORIES.

We favor the admission of the Territory of Oklahoma and the Indian Territory. We also favor the immediate admission of Arizona and New Mexico as separate States, and a Territorial government for Alaska and Porto Rico.

We hold that the officials appointed to administer the government of any Territory, as well as the District of Alaska, should be bona fide residents at the time of their appointment for the Territory or District in which their duties are to be performed.

CONDEMNATION OF POLYGAMY.

We demand the extermination of polygamy within the jurisdiction of the United States and the complete separation of church and State in political affairs.

MERCHANT MARINE.

We denounce the ship-subsidy bill recently passed by the United States Senate as an iniquitous appropriation of public funds for private purposes and a wasteful, illogical, and useless attempt to overcome by subsidy the obstructions raised by Republican legislation to the growth and development of American commerce on the sea.

We favor the upbuilding of a merchant marine without new or additional burdens upon the people and without bounties from the Public Treasury.

RECIPROCITY.

We favor liberal trade arrangements with Canada and with peoples of other countries where they can be entered into with benefit to American agriculture, manufactures, mining, or commerce.

MONROE DOCTRINE.

We favor the maintenance of the Monroe doctrine in its full integrity.

ARMY.

We favor the reduction of the Army and of Army expenditures to the point historically demonstrated to be safe and sufficient.

PENSIONS.

The democracy would secure to the surviving soldiers and sailors and their dependents generous pensions, not by an arbitrary executive order, but by legislation which a grateful people stand ready to enact.

Our soldiers and sailors who defend with their lives the Constitution and the laws have a sacred interest in their just administration. They must, therefore, share with us the humiliation with which we have witnessed the exaltation of court favorites without distinguished service, over the scarred heroes of many battles; or aggrandized by executive appropriations out of the treasuries of a prostrate people, in violation of the act of Congress which fixed the compensation or allowances of the military officers.

CIVIL SERVICE.

The Democratic Party stands committed to the principles of civil-service reform, and we demand their honest, just, and impartial enforcement.

We denounce the Republican Party for its continuous and sinister encroachments upon the spirit and operation of civil-service rules, whereby it has arbitrarily dispensed with examination for office in the interests of favorites and employed all manner of devices to overreach and set aside the principles upon which the civil service was established.

SCHOOL AND RACE QUESTIONS.

The race question has brought countless woes to this country. The calm wisdom of the American people should see to it that it brings no more. To revive the dead and hateful race and sectional animosities in any part of our common country means confusion, distruction of business, and the reopening of wounds now happily healed. North and South, East and West have but recently stood together in line of battle from the walls of Peking to the hills of Santiago, and as sharers of a common glory and a common destiny we should share fraternally the common burdens. We therefore deprecate and condemn the bourbon-like, selfish, and narrow spirit of the recent Republican convention at Chicago, which sought to kindle anew the embers of racial and sectional strife, and we appeal from it to the sober common sense and patriotic spirit of the American people.

THE REPUBLICAN ADMINISTRATION.

The existing Republican administration has been spasmodic, erratic, sensational, spectacular, and arbitrary. It has made itself a satire upon the Congress, the courts, and upon the settled practices and usages of national and international law.

It summoned the Congress into hasty and futile extra session, and virtually adjourned it, leaving behind in its flight from Washington uncalled calendars and unaccomplished tasks.

It made war, which is the sole power of Congress, without its authority, thereby usurping one of its fundamental prerogatives. It violated a plain statute of the United States as well as plain treaty obligations, international usages, and constitutional law; and has done so under pretense of executing a great public policy, which could have been more easily effected lawfully, constitutionally, and with honor.

It forced strained and unnatural constructions upon statutes, usurping judicial interpretation and substituting congressional enactment.

It withdrew from Congress their customary duties of investigation which have heretofore made the representatives of the people and the States the terror of evildoers.

It conducted a secretive investigation of its own and boasted of a few sample convictions, while it threw a broad coverlet over the bureaus which had been their chosen field of operative abuses, and kept in power the superior officers under whose administration the crimes had been committed.

It ordered assaults upon some monopolies; but, paralyzed by its first victory, it flung out the flag of truce and cried out that it would not "run amuck," leaving its future purposes beclouded by its vacillations.

APPEAL TO THE COUNTRY.

Conducting the campaign upon this declaration of our principles and purposes, we invoke for our candidates the support, not only of our great and time-honored organization, but also the active assistance of all of our fellow citizens who, disregarding past differences upon questions no longer in issue, desire the perpetuation of our Constitutional Government as framed and established by the fathers of the Republic.

---

The Republican convention of 1904 was held in Chicago, Ill, on June 21–23.

Theodore Roosevelt, of New York, was nominated for President, and Charles W. Fairbanks, of Indiana, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1904.

Fifty years ago the Republican Party came into existence, dedicated, among other purposes, to the great task of arresting the extension of human slavery. In 1860 it elected its first President. During 24 of the 44 years which have elapsed since the election of Lincoln the Republican Party has held complete control of the Government. For 18 more of the 44 years it has held partial control through the possession of one or two branches of the Government, while the Democratic Party during the same period has had complete control for only two years.

This long tenure of power by the Republican Party is not due to chance. It is a demonstration that the Republican Party has commanded the confidence of the American people for nearly two generations to a degree never equaled in our history, and has displayed a high capacity for rule and government which has been made even more conspicuous by the incapacity and infirmity of purpose shown by its opponents.

REPUBLICAN ACHIEVEMENTS SINCE 1897.

The Republican Party entered upon its present period of complete supremacy in 1897. We have every right to congratulate ourselves upon the work since then accomplished, for it has added luster even to the traditions of the party which carried the Government through the storms of civil war.

We then found the country, after four years of Democratic rule, in evil plight, oppressed with misfortune, and doubtful of the future. Public credit had been lowered, the revenues were declining, the debt was growing, the administration's attitude toward Spain was feeble and mortifying, the standard of values was threatened and uncertain, labor was unemployed, business was sunk in the depression which had succeeded the panic of 1893, hope was faint, and confidence was gone.

We met these unhappy conditions vigorously, effectively, and at once. We replaced a Democratic tariff law based on free-trade principles and garnished with sectional protection by a consistent protective tariff, and industry, freed from oppression and stimulated by the encouragement of wise laws, has expanded to a degree never before known, has conquered new markets, and has created a volume of exports which has surpassed imagination. Under the Dingley tariff labor has been fully employed, wages have risen, and all industries have revived and prospered.

We firmly established the gold standard, which was then menaced with destruction. Confidence returned to business, and with confidence an unexampled prosperity.

For deficient revenues supplemented by improvident issues of bonds we gave the country an income which produced a large surplus and which enabled us only four years after the Spanish War had closed to remove over one hundred millions of annual war taxes, reduce the public debt, and lower the interest charges of the Government.

The public credit, which had been so lowered that in time of peace a Democratic administration made large loans at extravagant rates of interest in order to pay current expenditures, rose under Republican administration to its highest point and enabled us to borrow at 2 per cent even in time of war.

We refused to palter longer with the miseries of Cuba. We fought a quick and victorious war with Spain. We set Cuba free, governed the island for three years, and then gave it to the Cuban people with order restored, with ample revenues, with education and public health established, free from debt, and connected with the United States by wise provisions for our mutual interests.

We have organized the government of Porto Rico, and its people now enjoy peace, freedom, order, and prosperity.

In the Philippines we have suppressed insurrection, established order, and given to life and property a security never known there before. We have organized civil government, made it effective and strong in administration, and have conferred upon the people of those islands the largest civil liberty they have ever enjoyed.

By our possession of the Philippines we were enabled to take prompt and effective action in the relief of the legations at Peking and a decisive part in preventing the partition and preserving the integrity of China.

The possession of a route for an Isthmian Canal, so long the dream of American statesmanship, is now an accomplished fact. The great work of connecting the Pacific and Atlantic by a canal is at last begun, and it is due to the Republican Party.

We have passed laws which will bring the arid lands of the United States within the area of cultivation.

We have reorganized the Army and put it in the highest state of efficiency.

We have passed laws for the improvement and support of the militia.

We have pushed forward the building of the Navy, the defense and protection of our honor and our interest.

Our administration of the great departments of the Government has been honest and efficient, and wherever wrongdoing has been discovered the Republican administration has not hesitated to probe the evil and bring offenders to justice without regard to party or political ties.

Laws enacted by the Republican Party which the Democratic Party failed to enforce and which were intended for the protection of the public against the unjust discrimination or the illegal encroachment of vast aggregations of capital, have been fearlessly enforced by a Republican President, and new laws, insuring reasonable publicity as to the operations of great corporations, and providing additional remedies for the prevention of discrimination in freight rates, have been passed by a Republican Congress.

In this record of achievement during the past eight years may be read the pledges which the Republican Party have fulfilled. We promise to continue these policies, and we declare our constant adherence to the following principles:

THE PROTECTIVE TARIFF.

Protection which guards and develops our industries is a cardinal policy of the Republican Party. The measure of protection should always at least equal the difference in the cost of production at home and abroad.

We insist upon the maintenance of the principles of protection, and therefore rates of duty should be readjusted only when conditions have so changed that the public interest demands their alteration, but this work can not safely be committed to any other hands than those of the Republican Party. To intrust it to the Democratic Party is to invite disaster. Whether, as in 1892, the Democratic Party declares the protective tariff unconstitutional, or whether it demands tariff reform or tariff revision, its real object is always the destruction of the protective system.

However specious the name, the purpose is ever the same. A Democratic tariff has always been followed by business adversity; a Republican tariff by business prosperity.

To a Republican Congress and a Republican President this great question can be solely intrusted. When the only free-trade country among the great nations agitates a return to protection, the chief protective country should not falter in maintaining it.

We have extended widely our foreign markets, and we believe in the adoption of all practicable methods for their further extension, including commercial reciprocity wherever reciprocal arrangements can be effected consistent with the principles of protection and without injury to American Agriculture, American labor, or any American industry.

THE GOLD STANDARD MUST BE UPHELD.

We believe it to be the duty of the Republican Party to uphold the gold standard and the integrity and value of our national currency. The maintenance of the gold standard, established by the Republican Party, can not safely be committed to the Democratic Party, which resisted its adoption and has never given any proof since that time of belief in it or fidelity to it.

ENCOURAGE THE MERCHANT MARINE.

While every other industry has prospered under the fostering aid of Republican legislation, American shipping engaged in foreign trade in competition with the low cost of construction, low wages, and heavy subsidies of foreign governments has not for many years received from the Government of the United States adequate encouragement of any kind. We therefore favor legislation which will encourage and build up the American merchant marine, and we cordially approve the legislation of the last Congress which created the Merchant Marine Commission to investigate and report on this subject.

MAINTAIN THE NAVY.

A Navy powerful enough to defend the United States against any attack, to uphold the Monroe doctrine, and watch over our commerce is essential to the safety and the welfare of the American people. To maintain such a Navy is the fixed policy of the Republican Party.

EXCLUDE CHINESE LABOR.

We cordialy approve the attitude of President Roosevelt and Congress in regard to the exclusion of Chinese labor and promise a continuance of the Republican policy in that direction.

ENFORCE THE CIVIL-SERVICE LAW.

The civil-service law was placed on the statute books by the Republican Party, which has always sustained it, and we renew our former declarations that it shall be thoroughly and honestly enforced.

ADMINISTER PENSION LAWS LIBERALLY.

We are always mindful of the country's debt to the soldiers and sailors of the United States, and we believe in making ample provision for them and in the liberal administration of the pension laws.

ARBITRATION.

We favor the peaceful settlement of international differences by arbitration.

PROTECT AMERICAN CITIZENS ABROAD.

We commend the vigorous efforts made by the administration to protect American citizens in foreign lands and pledge ourselves to insist upon the just and equal protection of all our citizens abroad. It is the unquestioned duty of the Government to procure for all our citizens without distinction the rights of travel and sojourn in friendly countries, and we declare ourselves in favor of all proper efforts tending to that end.

OUR POLICY REGARDING CHINA.

Our great interests and our growing commerce in the Orient render the condition of China of high importance to the United States. We cordially commend the policy pursued in that direction by the administrations of President McKinley and President Roosevelt.

ENFORCE THE CONSTITUTIONAL PROVISIONS REGARDING ELECTIVE FRANCHISES.

We favor such congressional action as shall determine whether by special discriminations the elective franchise in any State has been unconstitutionally limited, and if such is the case we demand that representation in Congress and in the electoral colleges shall be proportionately reduced as directed by the Constitution of the United States.

COMBINATIONS OF LABOR AND CAPITAL.

Combinations of capital and of labor are the results of the economic movement of the age, but neither must be permitted to infringe upon the rights and interests of the people. Such combinations, when lawfully formed for lawful purposes, are alike entitled to the protection of the laws, but both are subject to the laws and neither can be permitted to break them.

M'KINLEY AND ROOSEVELT.

The great statesman and patriotic American, William McKinley, who was reelected by the Republican Party to the Presidency four years ago was assassinated just at the threshold of his second term. The entire Nation mourned his untimely death and did that justice to his great qualities of mind and character which history will confirm and repeat.

The American people were fortunate in his successor, to whom they turned with a trust and confidence which have been fully justified. President Roosevelt brought to the great responsibilities thus sadly forced upon him a clear head, a brave heart, and earnest patriotism, and high ideals of public duty and public service. True to the principles of the Republican Party and to the policies which that party had declared, he has also shown himself ready for every emergency and has met new and vital questions with ability and with success.

SETTLEMENT OF THE COAL STRIKE.

The confidence of the people in his justice, inspired by his public career, enabled him to render personally an inestimable service to the country by bringing about a settlement of the coal strike which threatened such disastrous results at the opening of the winter in 1902.

ROOSEVELT'S FOREIGN POLICY.

Our foreign policy under his administration has not only been able, vigorous, and dignified, but to the highest degree successful. The complicated questions which arose in Venezuela were settled in such a way by President Roosevelt that the Monroe doctrine was signally vindicated and the cause of peace and arbitration greatly advanced.

PANAMA.

His prompt and vigorous action in Panama, which we commend in the highest terms, not only secure to us the canal route, but avoided foreign complications which might have been of a very serious character.

IN THE ORIENT.

He has continued the policy of President McKinley in the Orient, and our position in China, signalized by our recent commercial treaty with that Empire, has never been so high.

THE ALASKAN BOUNDARY.

He secured the tribunal by which the vexed and perilous question of the Alaskan boundary was finally settled.

Whenever crimes against humanity have been perpetrated which have shocked our people his protest has been made and our good offices have been tendered, but always with due regard to international obligations.

Under his guidance we find ourselves at peace with all the world, and never were we more respected or our wishes more regarded by foreign nations.

DOMESTIC QUESTIONS.

Preeminently successful in regard to our foreign relations, he has been equally fortunate in dealing with domestic questions. The country has known that the public credit and the national currency were absolutely safe in the hands of his administration. In the enforcement of the laws he has shown not only courage but the wisdom which understands that to permit laws to be violated or disregarded opens the door to anarchy, while the just enforcement of the law is the soundest conservatism. He has held firmly to the fundamental American doctrine that all men must obey the law; that there must be no distinction between rich and poor, between strong and weak, but that justice and equal protection under the law must be secured to every citizen without regard to race, creed, or condition.

His administration has been throughout vigorous and honorable, high-minded and patriotic. We commend it without reservation to the considerate judgment of the American people.

---

The Democratic convention of 1908 was held in Denver, Colo., on July 7-11.

William Jennings Bryan, of Nebraska, was nominated for President and John W. Kern, of Indiana, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1908.

We, the representatives of the Democracy of the United States, in national convention assembled, reaffirm our belief in and pledge our loyalty to the principles of the party.

We rejoice at the increasing signs of an awakening throughout the country. The various investigations have traced graft and political corruption to the representatives of predatory wealth, and laid bare the unscrupulous methods by which they have debauched elections and preyed upon a defenseless public through the subservient officials whom they have raised to place and power.

The conscience of the Nation is now aroused and will free the Government from the grip of those who have made it a business asset of the favor-seeking corporations. It must become again a people's Government, and be administered in all departments according to the Jeffersonian maxim, "Equal rights to all; special privileges to none."

"Shall the people rule?" is the overwhelming issue which manifests itself in all the questions now under discussion.

INCREASE OF OFFICEHOLDERS.

Coincident with the enormous increase in expenditures is a like addition to the number of officeholders. During the past year 23,784 were added, costing $16,156,000, and in the past six years of Republican administration the total number of new offices created, aside from many commissions, has been 99,319, entailing an additional expenditure of nearly $70,000,000, as against only 10,279 new offices created under the Cleveland and McKinley administrations, which involved an expenditure of only $6,000,000. We denounce this great and growing increase in the number of officeholders as not only unnecessary and wasteful, but also as clearly indicating a deliberate purpose on the part of the administration to keep the Republican Party in power at public expense by thus increasing the number of its retainers and dependents. Such procedure we declare to be no less dangerous and corrupt than the open purchase of votes at the polls.

ECONOMY IN ADMINISTRATION.

The Republican Congress in the session just ended made appropriations amounting to $1,008,000,000, exceeding the total expenditures of the past fiscal year by $90,000,000, and leaving a deficit of more than $60,000,000 for the fiscal year just ended. We denounce the needless waste of the people's money, which has resulted in the appalling increase, as a shameful violation of all prudent considerations of government and as no less than a crime against the millions of working men and women, from whose earnings the great proportion of these colossal sums must be extorted through excessive tariff exactions and other indirect methods. It is not surprising that, in the face of this shocking record, the Republican platform contains no reference to economical administration or promise thereof in the future. We demand that a stop be put to this frightful extravagance, and insist upon the strictest economy in every department, compatible with frugal and efficient administration.

ARBITRARY POWER—THE SPEAKER.

The House of Representatives was designed by the fathers of the Constitution to be the popular branch of our Government, responsive of the public will.

The House of Representatives, as controlled in recent years by the Republican Party, has ceased to be a deliberative and legislative body, responsive to the will of the majority of its Members, but has come under the absolute domination of the Speaker, who has entire control of its deliberations and powers of legislation.

We have observed, with amazement, the popular branch of our Federal Government helpless to obtain either the consideration or enactment of measures desired by a majority of its Members.

Legislative control becomes a failure when one Member in the person of the Speaker is more powerful than the entire body.

We demand that the House of Representatives shall again become a deliberative body, controlled by a majority of the people's Representatives, and not by the Speaker; and we pledge ourselves to adopt such rules and regulations to govern the House of Representatives as will enable a majority of its Members to direct its deliberations and control legislation.

MISUSE OF PATRONAGE.

We condemn as a violation of the spirit of our institutions the action of the present Chief Executive in using the patronage of his high office to secure the nomination for the Presidency of one of his Cabinet officers. A forced succession in the Presidency is scarcely less repugnant to public sentiment than is life tenure in that office. No good intention on the part of the Executive, and no virtue in the one selected, can justify the establishment of a dynasty. The right of the people to freely select their officials is inalienable and can not be delegated.

PUBLICITY OF CAMPAIGN CONTRIBUTIONS.

We demand Federal legislation forever terminating the partnership which has existed between corporations of the country and the Republican Party under the expressed or implied agreement that in return for the contribution of great sums of money wherewith to purchase elections they should be allowed to continue substantially unmolested in their efforts to encroach upon the rights of the people.

Any reasonable doubt as to the existence of this relation has been dispelled by the sworn testimony of witnesses examined in the insurance investigation in New York, and the open admission of a single individual—unchallenged by the Republican national committee—that he himself, at the personal request of the then Republican candidate for the Presidency, raised over a quarter of a million of dollars to be used in a single State during the closing hours of the last campaign. In order that this practice shall be stopped for all time we demand the passage of a statute punishing by imprisonment any officer of a corporation who shall either contribute on behalf of, or consent to the contribution by, a corporation of any money or thing of value to be used in furthering the election of a President or Vice President of the United States or any Member of the Congress thereof.

We denounce the Republican Party, having complete control of the Federal Government, for its failure to pass the bill introduced in the last Congress to compel the publication of the names of contributors and the amounts contributed toward campaign funds, and point to the evidence of the sincerity of Republican leaders when they sought, by an absolutely irrelevant and impossible amendment, to defeat the passage of the bill. As a further evidence of their intention to conduct their campaign in the coming contest with vast sums of money wrested from favor-seeking corporations, we call attention to the fact that the recent Republican national convention at Chicago refused, when the issue was presented to it, to declare against such practices.

We pledge the Democratic Party to the enactment of a law prohibiting any corporation from contributing to a campaign fund and any individual from contributing any amount above a reasonable maximum, and providing for the publication, before election, of all such contributions above a reasonable maximum.

THE RIGHTS OF THE STATES.

Believing with Jefferson in "the support of the State governments in all their rights as the most competent administrations for our domestic concerns and the surest bulwarks against anti-Republican tendencies," and in "the preservation of the General Government in its whole constitutional vigor as the sheet anchor of our peace at home and safety abroad," we are opposed to the centralization implied in the suggestion now frequently made that the powers of the General Government should be extended by judicial construction. There is no twilight zone between the Nation and the State in which exploiting interests can take refuge from both; and it is as necessary that the Federal Government shall exercise the powers delegated to it, that it is that the State governments shall use the authority reserved to them; but we insist that Federal remedies for the regulation of interstate commerce and for the prevention of private monopoly shall be added to, not substituted for, State remedies.

POPULAR ELECTION OF SENATORS.

We favor the election of United States Senators by direct vote of the people, and regard this reform as the gateway to other national reforms.

TARIFF.

We welcome the belated promise of tariff reform now offered by the Republican Party as a tardy recognition of the righteousness of the Democratic position on this question; but the people can not safely intrust the execution of this important work to a party which is so deeply obligated to the highly protected interests as is the Republican Party. We call attention to the significant fact that the promised relief is postponed until after the coming election—an election to succeed in which the Republican Party must have that same support from the beneficiaries of the high protective tariff as it has always heretofore received from them; and to the further fact that during years of uninterrupted power no action whatever has been taken by the Republican Congress as to correct the admittedly existing tariff iniquities.

We favor immediate revision of the tariff by the reduction of import duties. Articles entering into competition with trust-controlled products should be placed upon the free list; material reductions should be made in the tariff upon the necessaries of life, especially upon articles competing with such American manufactures as are sold abroad more cheaply than at home; and gradual reductions should be made in such other schedules as may be necessary to restore the tariff to a revenue basis.

Existing duties have given the manufacturers of paper a shelter behind which they have organized combinations to raise the price of pulp and of paper, thus imposing a tax upon the spread of knowledge. We demand the immediate repeal of the tariff on wood pulp, print paper, lumber, timber, and logs, and that those articles be placed upon the free list.

INCOME TAX.

We favor an income tax as part of our revenue system, and we urge the submission of a constitutional amendment specifically authorizing Congress to levy and collect a tax upon individual and corporate incomes, to the end that wealth may bear its proportionate share of the burdens of the Federal Government.

TRUSTS.

A private monopoly is indefensible and intolerable. We therefore favor the vigorous enforcement of the criminal law against guilty trust magnates and officials and demand the enactment of such additional legislation as may be necessary to make it impossible for a private monopoly to exist in the United States. Among the additional remedies we specify three: First, a law preventing a duplication of directors among competing corporations; second, a license system which will, without abridging the right of each State to create corporations, or its right to regulate as it will foreign corporations doing business within its limits, make it necessary for a manufacturing or trading corporation engaged in interstate commerce to take out a Federal license before it shall be permitted to control as much as 25 per cent of the products in which it deals, the license to protect the public from watered stock and to prohibit the control by such corporation of more than 50 per cent of the total amount of any product consumed in the United States; and, third, a law compelling such licensed corporations to sell to all purchasers in all parts of the country on the same terms, after making the allowance for the cost of transportation.

RAILROAD LEGISLATION.

We assert the right of Congress to exercise complete control over interstate commerce and the right of each State to exercise like control over commerce within its borders.

We demand such enlargement of the powers of the Interstate Commerce Commission as may be necessary to enable it to compel railroads to perform their duties as common carriers and prevent discrimination and extortion.

We favor the efficient supervision and rate regulation of railroads engaged in interstate commerce. To this end we recommend the valuation of railroads by the Interstate Commerce Commission, such valuation to take into consideration the physical value of the property, the original cost, the cost of production, and any elements of value that will render the valuation fair and just.

We favor such legislation as will prohibit the railroads from engaging in business which brings them into competition with their shippers; also legislation preventing the overissue of stocks and bonds by interstate railroads, and legislation which will assure such reduction in transportation rates as conditions will permit, care being taken to avoid reduction that would compel a reduction of wages, prevent adequate service, or do injustice to legitimate investments.

We heartily approve the laws prohibiting the pass and the rebate, and we favor any further necessary legislation to restrain, correct, and prevent such abuses.

We favor such legislation as will increase the power of the Interstate Commerce Commission, giving to it the initiative with reference to rates and transportation charges put into effect by the railroad companies, and permitting the Interstate Commerce Commission on its own initiative to declare a rate illegal and as being more than should be charged for such service. The present law relating thereto is inadequate by reason of the fact that the Interstate Commerce Commission is without power to fix or investigate a rate until complaint has been made to it by the shipper.

We further declare in favor of a law that all agreements of traffic or other associations of railway agents affecting interstate rates, service, or classification shall be unlawful, unless filed with and approved by the Interstate Commerce Commission.

We favor the enactment of a law giving to the Interstate Commerce Commission the power to inspect proposed railroad tariff rates or schedules before they shall take effect, and, if they be found to be unreasonable to initiate an adjustment thereof.

TELEGRAPH AND TELEPHONE.

We pledge the Democratic Party to the enactment of a law to regulate, under the jurisdiction of the Interstate Commerce Commission, the rates and services of telegraph and telephone companies engaged in the transmission of messages between the States.

BANKING.

The panic of 1907, coming without any legitimate excuse, when the Republican Party had for a decade been in complete control of the Federal Government, furnishes additional proof that it is either unwilling or incompetent to protect the interests of the general public. It has so linked the country to Wall Street that the sins of the speculators are visited upon the whole people. While refusing to rescue the wealth producers from spoliation at the hands of the stock gamblers and speculators in farm products, it has deposited Treasury funds, without interest and without competition in favorite banks. It has used an emergency for which it is largely responsible to force through Congress a bill changing the basis of bank currency and inviting market manipulation, and has failed to give to the 15,000,000 depositors of the country protection in their savings.

We believe that in so far as the needs of commerce require an emergency currency, such currency should be issued and controlled by the Federal Government, and loaned on adequate security to national and State banks. We pledge ourselves to legislation under which the national banks shall be required to establish a guaranty fund for the prompt payment of the depositors of any insolvent national bank, under an equitable system which should be available to all State banking institutions wishing to use it.

We favor a postal savings bank if the guaranteed bank can not be secured, and believe that it should be so constituted as to keep the deposited money in the communities where the depositors live. But we condemn the policy of the Republican Party in proposing postal savings banks under a plan of conduct by which they will aggregate the deposits of the rural communities and deposit the same while under Government charge in the banks of Wall Street, thus depleting the circulating medium of the producing regions and unjustly favoring the speculative markets.

LABOR AND INJUNCTIONS.

The courts of justice are the bulwark of our liberties, and we yield to none in our purpose to maintain their dignity. Our party has given to the bench a long line of distinguished justices, who have added to the respect and confidence in which this department must be jealously maintained. We resent the attempt of the Republican Party to raise a false issue respecting the judiciary. It is unjust reflection upon a great body of our citizens to assume that they lack respect for the courts.

It is the function of the courts to interpret the laws which the people create, and if the laws appear to work economic, social, or political injustice, it is our duty to change them. The only basis upon which the integrity of our courts can stand is that of unswerving justice and protection of life, personal liberty, and property. If judicial processes may be abused, we should guard them against abuse.

Experience has proven the necessity of a modification of the present law relating to injunctions, and we reiterate the pledge of our national platform of 1896 and 1904 in favor of the measure which passed the United States Senate in 1896, but which a Republican Congress has ever since refused to enact, relating to contempts in Federal courts and providing for trial by jury in cases of indirect contempt.

Questions of judicial practice have arisen, especially in connection with industrial disputes. We believe that the parties to all judicial proceedings shall be treated with rigid impartiality, and that injunctions should not be issued in any cases in which injunctions would not issue if no industrial dispute were involved.

The expanding organization of industry makes it essential that there should be no abridgment of the right of wage earners and producers to organize for the protection of wages and the improvement of labor conditions, to the end that such labor organizations and their members should not be regarded as illegal combinations in restraint of trade.

We favor the eight-hour day on all Government work.

We pledge the Democratic Party to the enactment of a law by Congress, as far as the Federal jurisdiction extends, for a general employers' liability act covering injury to body or loss of life or property.

We pledge the Democratic [illegible] to the enactment of a law creating a Department of Labor represented separately in the President's Cabinet, in which department shall be included the subject of mines and mining.

THE PHILIPPINES.

We condemn the experiment in imperialism as an inexcusable blunder which has involved us in enormous expenses, brought us weakness instead of strength, and laid our Nation open to the charge of abandoning a fundamental doctrine of self-government. We favor an immediate declaration of the Nation's purpose to recognize the independence of the Philippine Islands as soon as a stable government can be established, such independence to be guaranteed by us as we guarantee the independence of Cuba, until the neutralization of the islands can be secured by treaty with other powers. In recognizing the independence of the Philippines our Government should retain such land as may be necessary for coaling stations and naval bases.

WATERWAYS.

Water furnishes the cheaper means of transportation, and the National Government, having the control of navigable waters, should improve them to their fullest capacity. We earnestly favor the immediate adoption of a liberal and comprehensive plan for improving every water course in the Union which is justified by the needs of commerce; and to secure that end we favor, when practicable, the connection of the Great Lakes with the navigable rivers and with the Gulf through the Mississippi River, and the navigable rivers with each other by artificial canals, with a view of perfecting a system of inland waterways to be navigated by vessels of standard draft.

We favor the coordination of the various services of the Government connected with waterways in one service, for the purpose of aiding in the completion of such a system of inland waterways; and we favor the creation of a fund ample for continuous work, which shall be conducted under the direction of a commission of experts to be authorized by law.

MERCHANT MARINE.

We believe in the upbuilding of the American merchant marine without new or additional burdens upon the people and without bounties from the public treasury.

THE NAVY.

The constitutional provision that a navy shall be provided and maintained means an adequate navy, and we believe that the interests of this country would be best served by having a navy sufficient to defend the coasts of this country and protect American citizens wherever their rights may be in jeopardy.

PROTECTION OF AMERICAN CITIZENS.

We pledge ourselves to insist upon the just and lawful protection of our citizens at home and abroad, and to use all proper methods to secure for them, whether native born or naturalized, and without distinction of race or creed, the equal protection of the law and enjoyment of all rights and privileges open to them under our treaties; and if, under existing treaties, the right of travel and sojourn is denied to American citizens, or recognition is withheld from American passports by any countries on the ground of race or creed, we favor prompt negotiations with the Governments of such countries to secure the removal of these unjust discriminations.

We demand that all over the world a duly authenticated passport issued by the Government of the United States to an American citizen shall be proof of the fact that he is an American citizen and shall entitle him to the treatment due him as such.

FOREIGN PATENTS.

We believe that where an American citizen holding a patent in a foreign country is compelled to manufacture under his patent within a certain time, similar restrictions should be applied in this country to the citizens or subjects of such a country.

CIVIL SERVICE.

The law pertaining to the civil service should be honestly and rigidly enforced to the end that merit and ability shall be a standard of appointment and promotion, rather than services rendered to a political party.

PENSIONS.

We favor a generous pension policy, both as a matter of justice to the surviving veterans and their dependents, and because it tends to relieve the country of the necessity of maintaining a large standing army.

HEALTH BUREAU.

We advocate the organization of all existing national public health agencies into a national bureau of public health, with such power over sanitary conditions connected with factories, mines, tenements, child labor, and such other conditions connected within jurisdiction of Federal Government and do not interfere with the power of the States controlling public health agencies.

AGRICULTURAL AND MECHANICAL EDUCATION.

The Democratic Party favors the extension of agricultural, mechanical, and industrial education. We therefore favor the establishment of district agricultural experiment stations and secondary agricultural and mechanical colleges in the several States.

OKLAHOMA.

We welcome Oklahoma to the sisterhood of States and heartily congratulate her upon the auspicious beginning of a great career.

ARIZONA AND NEW MEXICO.

The National Democratic Party has for the last 16 years labored for the admission of Arizona and New Mexico as separate States of the Union, and recognizing that each possesses every qualification successfully to maintain separate State governments, we favor the immediate admission of these Territories as separate States.

ALASKA AND PORTO RICO.

We demand for the people of Alaska and Porto Rico the full enjoyment of the rights and privileges of a Territorial form of government, and that the officials appointed to administer the government of all our Territories and the District of Columbia should be thoroughly qualified by previous bona fide residence.

HAWAII.

We favor the application of the principles of the land laws of the United States to our newly acquired Territory, Hawaii, to the end that the public lands of that Territory may be held and utilized for the benefit of bona fide homesteaders.

POST ROADS.

We favor Federal aid to State and local authorities in the construction and maintenance of post roads.

NATURAL RESOURCES.

We repeat the demand for internal development and for the conservation of our natural resources contained in previous platforms, the enforcement of which Mr. Roosevelt has vainly sought from a reluctant party; and to that end we insist upon the preservation, protection, and replacement of needed forests, the preservation of the public domain of homeseekers, the protection of the national resources in timber, coal, iron, and oil against monopolistic control, the development of our waterways for navigation and every other useful purpose, including the irrigation of arid lands, the reclamation of swamp lands, the clarification of streams, the development of water power, and the preservation of electric power generated by this natural force, from the control of monopoly; and to such end we urge the exercise of all powers, national, State, and municipal, both separately and in cooperation.

We insist upon a policy of administration of our forest reserves which shall relieve it of the abuses which have arisen thereunder, and which shall, as far as practicable, conform to the police regulations of the several States wherein the reserves are located, which shall enable homesteaders as of right to occupy and acquire title to all portions thereof which are especially adapted to agriculture and which shall furnish a system of timber sales available as well to the private citizen as to the large manufacturer and consumer.

GRAZING LANDS.

The establishment of rules and regulations, if any such are necessary, in relation to free grazing upon the public lands outside of forests or other reservations, until the same shall eventually be disposed of, should be left to the people of the States, respectively, in which such lands may be situated.

PAN AMERICAN RELATIONS.

The Democratic Party recognizes the importance and advantage of developing closer ties of Pan American friendship and commerce between the United States and her sister relations of Latin America, and favors the taking of such steps, consistent with Democratic policies, for better acquaintance, greater mutual confidence, and larger exchange of trade as will bring lasting benefit not only to the United States, but to this group of American Republics, having constitutions, forms of government, ambitions, and interests akin to our own.

PANAMA CANAL.

We believe that the Panama Canal will prove of great value to our country, and favor its speedy completion.

ASIATIC IMMIGRATION.

We favor full protection, by both National and State Governments within their respective spheres, of all foreigners residing in the United States under treaty, but we are opposed to the admission of Asiatic immigrants who can not be amalgamated with our population, or whose presence among us would raise a race issue and involve us in diplomatic controversies with oriental powers.

CONCLUSION.

The Democratic Party stands for democracy; the Republican Party has drawn to itself all that is aristocratic and plutocratic. The Democratic Party is the champion of equal rights and opportunities to all; the Republican Party is the party of privilege and private monopoly. The Democratic Party listens to the voice of the whole people and gauges progress by the prosperity and advancement of the average man; the Republican Party is subservient to the comparatively few who are the beneficiaries of governmental favoritism. We invite the cooperation of all, regardless of previous political affiliation or past differences, who desire to preserve a government of the people, by the people, and for the people, and who favor such an administration of the Government as will insure, as far as human wisdom can, that each citizen shall draw from society a reward commensurate with his contribution to the welfare of society.

---

The Republican convention of 1908 was held in Chicago, Ill. on June 16–20.

William Howard Taft, of Ohio, was nominated for President and James S. Sherman, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1908.

TRIBUTE TO THE PARTY.

Once more the Republican Party in national convention assembled submits its cause to the people. This great historic organization that destroyed slavery, preserved the Union, restored credit, expanded the national domain, established a sound financial system, developed the industries and resources of the country, and gave to the Nation her seat of honor in the councils of the world now meets the new problems of the Government with the same spirit with which it solved the old. In this the greatest area of American advancement the Republican Party has reached its highest service under the leadership of Theodore Roosevelt. His administration is an epoch in American history. In no other period since the national sovereignty was won under Washington or preserved under Lincoln has there been such mighty progress in those ideals of government which make for justice, equality, and fair dealing among men. The highest aspirations of the American people have found voice. Their most exalted servant represents the best aims and the worthiest purposes of all his countrymen. American manhood has been lifted up to a nobler sense of duty and obligation. Conscience and courage in public station and high standards of right and wrong in private life have been the cardinal principles of political life. Capital and labor have been brought into closer relations of confidence and interdependence and the abuse of wealth and the tyranny of power, and all evils and privileged favoritism have been put to scorn by the simple and manly virtues of justice and fair play.

ACCOMPLISHMENTS OF PRESIDENT ROOSEVELT.

The greatest accomplishments of President Roosevelt have been first and foremost a brave and impartial enforcement of the law. The prosecution of illegal trusts and monopolies, the exposure and punishment of evildoers in the public service, the more effective regulation of the rates and services of the great transportation lines, the complete overthrow of preferences, rebates, and discriminations, the arbitration of labor disputes, the amelioration of the conditions of wage earners everywhere, the conservation of the natural resources of the country, the forward step in the improvement of the inland waterways, and always the earnest support and defense of every wholesome safeguard which has made more secure the guaranties of life, liberty, and property—these are the elements that will make for Theodore Roosevelt his place in history, but more than all else the great things he has done will be an inspiration to those who have yet greater things to do.

We declare our unfaltering adherence to the policies thus inaugurated, and pledge their continuance under the Republican administration of the Government.

COUNTRY'S GREAT PROSPERITY.

Under the guidance of the Republican principles the American people have become the richest Nation in the world. Our wealth to-day exceeds that of England and all of her colonies and that of France and Germany combined. When the Republican Party was born the wealth of this country was $16,000,000,000. It has leaped to $110,000,000,000 in a generation, while Great Britain has gathered but $60,000,000,000 in 500 years. The United States now owns one-fourth of the world's wealth and makes one-third of all the modern manufactured products.

In the great necessities of civilization, such as coal, the motive power of all activity; iron, the chief basis of all industry; cotton, the stable foundation of all fabrics; wheat, corn, and all the agricultural products that feed mankind, American supremacy is undisputed. And yet her great national wealth has been scarcely touched. We have a vast domain of 3,000,000 square miles literally bursting with latent treasure still waiting the magic of capital and industry to be converted to the practical uses of mankind; a country rich in soil and climate, embarrassed in its riches and treasures, and all the products of the field, the forest, and the factory. With gratitude to God's bounty, with pride in the splendid productiveness of the past, and with confidence in the plenty and prosperity of the future, the Republican Party declares for the principle that in the development and enjoyment of wealth so great and blessings so benign there shall be equal opportunity to all.

Nothing so clearly demonstrates the sound basis upon which our commercial, industrial, and agricultural interests are founded, and the necessity of promoting their continued welfare through the operation of the Republican policies as the recent safe passage of the American people through a financial disturbance which, if appearing in the midst of Democratic rule or the menace of it, might have equaled the familiar Democratic panics of the past. We congratulate the people of the United States because of our American supremacy and hail with confidence the signs now manifest of complete restoration of business prosperity in all lines of trade, commerce, and manufacturing.

Since the election of William McKinley in 1896 the people of this country have felt anew the wisdom of trusting to the Republican Party, through decisive majorities, the control and direction of national affairs. The many wise and comprehensive measures adopted at recent sessions of Congress have demonstrated the patriotic resolve of the Republican leadership in the legislative department to keep step in the forward march to our better government.

RECORD OF LAST SESSION OF CONGRESS.

Notwithstanding the indefensible filibustering of the Democratic minority in the House of Representatives during the last session, many wholesome and progressive laws were enacted, and we especially commend the passage of the emergency currency bill, the appointment of a national monetary commission, the employers' Government liability law, the measures for the greater efficiency of the Army and the Navy, the widows' pension bill, the child-labor law for the District of Columbia, the new statute for the safety of railroad engineers and firemen, and many other acts conserving the public welfare.

TARIFF REVISION PROMISED.

The Republican Party declares unequivocally for a revision of the tariff by a special session of the Congress immediately following the inauguration of the next President, and commends the steps already taken to this end in the work assigned to the appropriate committees of Congress, which are now investigating the operation and effect of these schedules. In all tariff legislation the true principle of protection is best maintained by the imposition of such duties as will equal the difference between cost of production at home and abroad, together with a reasonable profit to American industries. We favor the establishment of a maximum and minimum rate to be administered by the President under limitations fixed by the law, the maximum to be available to meet the discrimination by foreign countries against American goods entering our markets, and the minimum representing the normal measure of protection at home, the aim and the purpose of Republican policy being not only to preserve without excessive duties the security against foreign competition to which American manufacturers, farmers, and producers are entitled, but also to maintain the high standard of living of the wageworkers of this country, who are the most direct beneficiaries of the protective system.

PHILIPPINE TARIFF.

Between the United States and the Philippines we believe in a free interchange of products with such limitations as to sugar and tobacco as will afford adequate protection to domestic interests.

CURRENCY.

We approve the emergency measure adopted by the Government during the recent financial disturbance, and especially commend the passage by Congress of the law designed to protect the country from a repetition of such a stringency. The Republican Party is committed to the development of a permanent currency system, responding to our greater needs, and the appointment of a national monetary commission by the present Congress which will impartially investigate all the proposed methods and insure the early realization of this purpose.

The present currency laws have fully justified their adoption, but an expanding commerce, a marvelous growth in wealth and population, multiplying the centers of distribution, increasing the demand for the movement of crops in the West and South, and entailing periodic changes in the monetary condition, disclose the need of a more elastic and adaptable system. Such a system must meet the requirements of agriculturists, manufacturers, merchants, and business men in general; must be automatic in operation, minimizing the fluctuations in the interest rates, and all must be in harmony with the Republican doctrine which insists that every dollar shall be based upon and as good as gold.

POSTAL SAVINGS.

We favor the establishment of a postal savings bank system for the convenience of the people and the encouragement of thrift.

TRUSTS.

The Republican Party passed the Sherman antitrust law over Democratic opposition, and enforced it after Democratic dereliction. It has been a wholesome instrument for good in the hands of a wise and fearless administration; but experience has shown that its effectiveness can be strengthened and its real objects better obtained by such amendment as will give the Federal Government greater supervision and control over and greater publicity in the management of that class of corporations engaged in interstate commerce having power and opportunity to effect monopolies.

RAILROADS.

We approve the enactment of the railroad-rate law and the vigorous enforcement by the present administration of the statute against rebates and discrimination, as a result of which the advantages formerly possessed by the large shipper over the small shipper have substantially disappeared. And in this connection we commend an appropriation by the present Congress to enable the Interstate Commerce Commission to thoroughly investigate and give publicity to the accounts of interstate railroads. We believe, however, that the interstate commerce law should be further amended so as to give railroads the right to make and publish traffic agreements subject to the approval of the commission, but maintaining always the principle of competition between naturally competing lines and avoiding the common control of such lines by any means whatsoever.

We favor such national legislation and supervision as will prevent the overissue of stocks and bonds in the future by interstate carriers.

EMPLOYERS' LIABILITY.

The enactment in constitutional form at the present session of Congress of the employers' liability law, the passage and enforcement of the safety-appliance statute, as well as the additional protection secured for engineers and firemen, the reduction in the hours of labor of trainmen and railroad telegraphers, the successful exercise of the powers of mediation and arbitration between the interests of railroads and their employees, and the law making a beginning in the policy of compensation for injured employees of the Government, were the most commendable accomplishments of the present administration. But there is further work in this direction yet to be done, and the Republican Party pledges its continued devotion to every cause that makes for the safety and the betterment of conditions among those whose labor contributes so much to the progress and welfare of the country.

HELP TO WORKERS.

The wise policy which has induced the Republican Party to maintain protection to American labor, to establish the eight-hour day in the construction of all public work, to increase the list of employees who shall have preferred claims for wages under the bankruptcy law, to adopt a child-labor statute for the District of Columbia, to direct the investigation into the condition of the working women and children, and later of the employees of telephone and telegraph companies engaged in interstate business, to appropriate $150,000 at the recent session of Congress in order to secure a thorough inquiry into the causes of loss of life in the mines, and to amend and strengthen the law prohibiting the importation of contract labor will be pursued in every legitimate direction in Federal authority to lighten the burdens and increase the opportunity for happiness and the advancement of all who toil.

The Republican Party recognizes the special needs of wage earners generally for their well-being and the well-being of all.

The Republican Party will uphold at all times the authority and the integrity of the courts, State and Federal, and will ever insist that their power to enforce their process and to protect life, liberty, and property shall be preserved inviolate.

We believe, however, that the rules of procedure in the Federal courts with respect to the issuance of the writ of injunctions should be more accurately defined by statute, and that no injunction or temporary restraining order should be issued without notice except where irreparable injury would result from delay, in which case a speedy hearing should be granted thereafter.

THE FARMER.

Among those whose welfare is as vital to the welfare of the whole country as is that of the wageworkers is the American farmer. The prosperity of the country rests peculiarly upon the prosperity of agriculture. The Republican Party during the last 12 years has accomplished extraordinary work in bringing the resources of the National Government to the aid of the farmer, not only in advancing agriculture itself but in increasing the conveniences of rural life. Free rural mail delivery has been established. It now reaches millions of our citizens, and we favor its extension until every community in the land receives the full benefit of the Postal Service. We recognize the social and economic advantages of good country roads, maintained more and more largely at public expense and less and less at the expense of the abutting property owner. In this work we commend the growing practice of State aid and we approve the efforts of the National Agricultural Department by experiment and otherwise to make clear to the public the best methods of road construction.

NEGRO PROBLEM.

The Republican Party has been for more than 50 years the consistent friend of the American negro. It gave him freedom and assistance, wrote in the organic law the declaration which proclaimed his civil and political rights, and it believes to-day that his worthy progress in intelligence, industry, and good citizenship has earned the respect and encouragement of the Nation. We demand equal justice for all men without regard to race or color. We declare once more and without reservation for the enforcement in letter and spirit of the thirteenth, fourteenth, and fifteenth amendments to the Constitution, which were designed for the protection and advancement of the negro, and we condemn all devices which have for their real aim his disfranchisement, and that for reasons of color alone, as unfair, un-American, and repugnant to the supreme law of the land.

CONSERVATION OF FORESTS.

We indorse the movement inaugurated by the administration for the conservation of the natural resources. We approve of measures to prevent the waste of timber. We commend the work now going on for the reclamation of arid lands, and reaffirm the Republican policy of the free distribution of the available areas of the public domain to the landless settler. No obligation of the future is more insistent and none will result in greater blessings to posterity. In the line of this splendid undertaking is the future duty equally imperative to enter upon a systematic improvement upon a large and comprehensive plan just to all persons of the country of the waterways, harbors, and Great Lakes, whose natural adaptability to the increasing traffic of the land is one of the greatest gifts of benign Providence.

ARMY AND NAVY.

The Sixtieth Congress passed many commendable acts increasing the efficiency of the Army and Navy, making the militia of the States an integral part of the national establishment, authorizing joint maneuvers of Army and militia, fortifying new naval bases, and completing the construction of the coaling stations, instituting a female nurse corps for naval hospitals and ships, and added 2 new battleships, 10 torpedo-boat destroyers, 3 steam colliers, and 8 submarines to the strength of the Navy. Although at peace with all the world and secure in the consciousness that the American people do not desire and will not provoke a war with any other country, we nevertheless declare our unalterable devotion to the policy that will keep this Republic ready at all times to defend her traditional doctrines and assure her a proper part in promoting tranquillity among the nations.

CITIZENS ABROAD.

We commend the vigorous efforts made by the administration to protect American citizens in foreign lands and pledge ourselves to insist upon a just and equal protection of all our citizens abroad. It is the unquestioned duty of the Government to procure for all our citizens without distinction right of travel and sojourn in friendly countries, and we declare ourselves in favor of all proper efforts tending to that end.

NEIGHBORS TO THE SOUTH.

Under the administration of the Republican Party the foreign commerce of the United States has experienced a remarkable growth, until its present annual valuation is approximately $3,000,000,000, and gives employment to a vast amount of labor and capital which otherwise would be idle. It has inaugurated through the recent visit of the Secretary of State to South America and Mexico a new area of pan-American commerce and comity, which is bringing us into closer touch

with our 20 sister American Republics having a common historic heritage, a republican form of government, and offering us a limitless field of legitimate commercial expansion.

THE HAGUE TRIBUNAL.

The conspicuous contributions of American statesmanship to the cause of international peace so strongly advanced in The Hague conference are occasions for just pride and gratification. At the last session of the United States Senate 11 Hague conventions were ratified, establishing the rights of neutrals; plans were laid for the restrictions of submarine mines; limiting the use of force for the collection of international debts; governing the opening of hostilities; extending the application of the Geneva principle in many ways; lessening the evils of war, and promoting the peaceful settlement of international controversies. At the same session 12 arbitration conventions with great nations were affirmed and extradition principles were ratified. We indorse such achievement as the highest duty of people to perform, and proclaim the obligation of further strengthening the bonds of friendship and good will with all the nations of the world.

MERCHANT MARINE.

We adhere to the Republican doctrine of encouragement to American shipping and urge such legislation as will advance the merchant marine prestige of the country, so essential to the national defense, the enlargement of avenues of trade, and the industrial prosperity of our own people.

PENSIONS.

Another Republican policy which must be ever maintained is that of generous appreciation for those who have fought the country's battles and for the widows and orphans of those who have fallen. We commend the increase in the widows' pension made by the present Congress and declare for a liberal administration of all pension laws, to the end that the people's gratitude may grow deeper as the memories of the heoric sacrifices grow more sacred with the passing years.

CIVIL SERVICE.

We reaffirm our former declaration regarding the civil-service law.

PUBLIC HEALTH.

We commend the efforts made to secure greater efficiency in national public health agencies and favor such legislation as will effect its purpose.

MINING.

In the interest of the great mineral industries of our country we earnestly support the establishment of a bureau of mines and mining.

COLONIAL.

The American Government in Republican hands has freed Cuba, given peace and protection to Porto Rico and the Philippines under our flag, and begun the construction of the Panama Canal. The present condition in Cuba vindicates the wisdom of maintaining between that Republic and this imperishable bonds of mutual interest, and the hope is now expressed that the Cuban people will soon again be ready to assume complete sovereignty over their land. In Porto Rico the Government of the United States has met with loyal and patriotic support. Order and prosperity prevail and the well-being of the people in every respect promoted and conserved. We believe that the native inhabitants of Porto Rico should be at once made collectively citizens of the United States, and that all others properly qualified under existing law residing in said islands should have the privilege of becoming naturalized.

In the Philippines insurrection has been suppressed, law established, and life and property made secure. Education and practical experience are there advancing the capacity of the people for government, and the policy of McKinley and Roosevelt is leading the inhabitants step by step to an ever-increasing home rule.

PANAMA CANAL.

Time has justified the selection of the Panama route for the great isthmian canal, and events have shown the wisdom of securing authority over the zone through which it is to be built. The work is now progressing with a rapidity far beyond expectation, and already the realization of the hopes of the centuries is coming in view in the near future.

STATEHOOD.

We favor the immediate admission of the Territories of New Mexico and Arizona as separate States in the Union.

LINCOLN CENTENARY.

February 12, 1909, will be the one hundredth anniversary of the birth of Abraham Lincoln, that immortal spirit whose fame has brightened with the receding years and whose name stands among the first of those given to the world by the great Republic. We recommend that this centennial anniversay be celebrated throughout the confines of the Nation by all the people, and especially by the public schools as an exercise to stir the patriotism of the youth of the land.

REPUBLICANISM AND DEMOCRACY CONTRASTED.

We call the attention of the American people to the fact that none of the great measures here advocated by the Republican Party could be inaugurated and none of the forward steps here proposed could be taken under a Democratic administration, nor under one in which the party responsibility is divided. The continuance of the present policies absolutely requires the continuance in power of that party which believes in them and which possesses the capacity to put them into operation.

Beyond all platform declarations there are fundamental differences between the Republican Party and its chief opponent which makes one worthy and the other unworthy of public trust. In history the difference between Democracy and Republicanism is that one stood for debased currency, the other for honest money; the one for free silver, the other for honest currency; the one for free trade, the other for protection; the one for the contraction of American influence, the other for expansion. One has been forced to abandon every position it has taken on the great issues before the people, the other has held and vindicated all.

In experience the difference between Democracy and Republicanism is that the one means adversity, while the other means prosperity. One means low wages, the other means high wages. One means doubt and debt, the other means confidence and thrift.

In principle the difference between Democracy and Republicanism is that one stands for vacillation and timidity in government, the other for strength and purpose. One stands for obstruction, the other for construction. One promises, the other performs. One finds fault, the other finds work. The present tendencies of the two parties are more marked by inherent differences. The trend of Democracy is toward socialism, while the Republican Party stands for a wise and regulated individualism. Socialism would destroy wealth, Republicanism would prevent its abuse. Socialism would give to each an equal right to take, Republicanism would give to each an equal right to earn. Socialism would offer an equality of position which would soon leave no one anything to possess. Republicanism would give equality to each; it would assure to each his share of the constantly increasing sum of possession.

In line with this tendency the Democratic Party to-day believes in government ownership, while the Republican Party believes in government legislation. Ultimately Democracy would have the Nation own the people, while Republicanism would have the people own the Nation.

Upon this platform of principles and purposes, reaffirming our adherence to every Republican doctrine proclaimed since the birth of the party, we go before the country asking the support not only of those who have acted with us heretofore but of all our fellow citizens who, regardless of political differences, unite in a desire to maintain the policies, perpetuate the blessings, and make secure the achievements of a greater America.

—

The Democratic convention of 1912 was held at Baltimore, Md., June 25–July 3.

Woodrow Wilson, of New Jersey, was nominated for President and Thomas R. Marshall, of Indiana, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1912.

We, the representatives of the Democratic Party of the United States, in national convention assembled, reaffirm our devotion to the principles of democratic government formulated by Thomas Jefferson and enforced by a long and illustrious line of Democratic Presidents.

TARIFF REFORM.

We declare it to be a fundamental principle of the Democratic Party that the Federal Government, under the Constitution, has no right or power to impose or collect tariff duties except for the purpose of revenue, and we demand that the collection of such taxes shall be limited to the necessities of government honestly and economically administered.

The high Republican tariff is the principal cause of the unequal distribution of wealth. It is a system of taxation which makes the rich richer and the poor poorer. Under its operations the American farmer and laboring man are the chief sufferers. It raises the cost of the necessaries of life to them, but does not protect their product or wages. The farmer sells largely in free markets and buys almost entirely in the protected markets. In the most highly protected industries, such as cotton and wool, steel and iron, the wages of the laborers are the lowest paid in any of our industries. We denounce the Republican pretense on that subject, and assert that American wages are established by competitive conditions and not by the tariff.

We favor the immediate downward revision of the existing high and in many cases prohibitive tariff duties, insisting that material reductions be speedily made upon the necessaries of life. Articles entering into competition with trust-controlled products and articles of American manufacture which are sold abroad more cheaply than at home should be put upon the free list.

We recognize that our system of tariff taxation is intimately connected with the business of the country, and we favor the ultimate attainment of the principles we advocate by legislation that will not injure or destroy legitimate industry.

We denounce the action of President Taft in vetoing the bills to reduce the tariff in the cotton, woolen, metal, and chemical schedules and the farmers' free-list bill, all of which were designed to give immediate relief to the masses from the exactions of the trusts.

The Republican Party, while promising tariff revision, has shown by its tariff legislation that such revision is not to be in the people's interest; and having been faithless to its pledges of 1908, it should no longer enjoy the confidence of the Nation. We appeal to the American people to support us in our demand for a tariff for revenue only.

HIGH COST OF LIVING.

The high cost of living is a serious problem in every American home. The Republican Party, in its platform, attempts to escape from responsibility for present conditions by denying that they are due to a protective tariff. We take issue with them on this subject, and charge that excessive prices result in a large measure from the high tariff laws enacted and maintained by the Republican Party and from trusts and commercial conspiracies fostered and encouraged by such laws, and we assert that no substantial relief can be secured for the people without import duties on the necessaries of life are materially reduced and these criminal conspiracies broken up.

ANTITRUST LAW.

A private monopoly is indefensible and intolerable. We therefore favor the vigorous enforcement of the criminal as well as the civil law against trusts and trust officials, and demand the enactment of such additional legislation as may be necessary to make it impossible for a private monopoly to exist in the United States.

We favor the declaration by law of the conditions upon which corporations shall be permitted to engage in interstate trade, including, among others, the prevention of holding companies, of interlocking directors, of stock watering, of discrimination in price, and the control by any one corporation of so large a proportion of any industry as to make it a menace to competitive conditions.

We condemn the action of the Republican administration in compromising with the Standard Oil Co. and the Tobacco Trust, and its failure to invoke criminal provisions of the antitrust law against the officers of those corporations after the court had declared that from the undisputed facts in the record they had violated the criminal provisions of the law.

We regret that the Sherman antitrust law has received a judicial construction depriving it of much of its efficacy, and we favor the enactment of legislation which will restore to the statute the strength of which it has been deprived by such interpretation.

RIGHTS OF THE STATES.

We believe in the preservation and maintenance in their full strength and integrity of the three coordinate branches of the Federal Government—the executive, the legislative, and the judicial—each keeping within its own bounds and not encroaching upon the just powers of either of the others.

Believing that the most efficient results under our system of government are to be attained by the full exercise by the States of their reserved sovereign powers, we denounce as usurpation the efforts of our opponents to deprive the States of any of the rights reserved to them and to enlarge and magnify by indirection the powers of the Federal Government.

We insist upon the full exercise of all the powers of the Government, both State and National, to protect the people from injustice at the hands of those who seek to make the Government a private asset in business. There is no twilight zone between the Nation and the State in which exploiting interests can take refuge from both. It is as necessary that the Federal Government shall exercise the powers reserved to them, but we insist that Federal remedies for the regulation of interstate commerce and for the prevention of private monopoly shall be added to and not substituted for State remedies.

INCOME TAX AND POPULAR ELECTION OF SENATORS.

We congratulate the country upon the triumph of two important reforms demanded in the last national platform, namely, the amendment of the Federal Constitution authorizing an income tax and the amendment providing for the popular election of Senators, and we call upon the people of all the States to rally to the support of the pending propositions and secure their ratification.

We note with gratification the unanimous sentiment in favor of publicity before the election of campaign contributions—a measure demanded in our national platform of 1908 and at that time opposed by the Republican Party—and we commend the Democratic House of Representatives for extending the doctrine of publicity to recommendations, verbal and written, upon which presidential appointments are made, to the ownership and control of newspapers, and to the expenditures made by and in behalf of those who aspire to presidential nominations, and we point for additional justification for this legislation to the enormous expenditures of money in behalf of the President and his predecessor in the recent contest for the Republican nomination for President.

The movement toward more popular government should be promoted through legislation in each State which will permit the expression of the preference of the electors for national candidates at presidential primaries.

We direct that the national committee incorporate in the call for the next nominating convention a requirement that all expressions of preference for presidential candidates shall be given and the selection of delegates and alternates made through a primary election conducted by the party organization in each State where such expression and election are not provided for by State law. Committeemen who are hereafter to constitute the membership of the Democratic national committee, and whose election is not provided for by law, shall be chosen in each State at such primary elections, and the service and authority of the committeemen, however chosen, shall begin immediately upon the receipt of their credentials, respectively.

CAMPAIGN CONTRIBUTIONS.

We pledge the Democratic Party to the enactment of a law prohibiting any corporation from contributing to a campaign fund and any individual from contributing any amount above a reasonable maximum.

TERM OF PRESIDENT.

We favor a single presidential term, and to that end urge the adoption of an amendment to the Constitution making the President of the United States ineligible for reelection, and we pledge the candidate of this convention to this principle.

DEMOCRATIC CONGRESS.

At this time, when the Republican Party, after a generation of unlimited power in its control of the Federal Government, is rent into factions, it is opportune to point to the record of accomplishment of the Democratic House of Representatives in the Sixty-second Congress. We indorse its action, and we challenge comparison of its record with that of any Congress which has been controlled by our opponents.

We call the attention of the patriotic citizens of our country to its record of efficiency, economy, and constructive legislation.

It has, among other achievements, revised the rules of the House of Representatives so as to give to the representatives of the American people freedom of speech and of action in advocating, proposing, and perfecting remedial legislation.

It has passed bills for the relief of the people and the development of our country; it has endeavored to revise the tariff taxes downward in the interest of the consuming masses, and thus to reduce the high cost of living.

It has proposed an amendment to the Federal Constitution providing for the election of United States Senators by the direct vote of the people.

It has secured the admission of Arizona and New Mexico as two sovereign States.

It has required the publicity of campaign expenses both before and after election and fixed a limit upon the election expenses of United States Senators and Representatives.

It has also passed a bill to prevent the abuse of the writ of injunction.

It has passed a law establishing an eight-hour day for workmen on all national public work.

It has passed a resolution which forced the President to take immediate steps to abrogate the Russian treaty.

And it has passed the great supply bills which lessen waste and extravagance, and which reduce the annual expenses of the Government by many millions of dollars.

We approve the measure reported by the Democratic leaders in the House of Representatives for the creation of a council of national defense, which will determine a definite naval program with a view to increased efficiency and economy. The party that proclaimed and has always enforced the Monroe doctrine, and was sponsor for the new Navy, will continue faithfully to observe the constitutional requirements to provide and maintain an adequate and well-proportioned Navy sufficient to defend American policies, protect our citizens, and uphold the honor and dignity of the Nation.

REPUBLICAN EXTRAVAGANCE.

We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a democratic government, and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

RAILROADS, EXPRESS COMPANIES, TELEGRAPH AND TELEPHONE LINES.

We favor the efficient supervision and rate regulation of railroads, express companies, telegraph and telephone lines engaged in interstate commerce. To this end we recommend the valuation of railroads, express companies, telegraph and telephone lines by the Interstate Commerce Commission, such valuation to take into consideration the physical value of the property, the original cost, the cost of reproduction, and any element of value that will render the valuation fair and just.

We favor such legislation as will effectually prohibit the railroads, express, telegraph, and telephone companies from engaging in business which brings them into competition with their shippers or patrons, also legislation preventing the overissue of stocks and bonds by interstate railroads, express companies, telegraph and telephone lines, and legislation which will assure such reductions in transportation rates as conditions will permit, care being taken to avoid reduction that would compel a reduction of wages, prevent adequate service, or do injustice to legitimate investments.

BANKING LEGISLATION.

We oppose the so-called Aldrich bill or the establishment of a central bank; and we believe the people of the country will be largely freed from panics and consequent unemployment and business depression by such a systematic revision of our banking laws as will render temporary relief in localities where such relief is needed, with protection from control or dominion by what is known as the Money Trust.

Banks exist for the accommodation of the public, and not for the control of business. All legislation on the subject of banking and currency should have for its purpose the securing of these accommodations on terms of absolute security to the public and of complete protection from the misuse of the power that wealth gives to those who possess it.

We condemn the present methods of depositing Government funds in a few favored banks, largely situated in or controlled by Wall Street, in return for political favors, and we pledge our party to provide by law for their deposit by competitive bidding in the banking institutions of the country, national and State, without discrimination as to locality upon approved securities and subject to call by the Government.

RURAL CREDITS.

Of equal importance with the question of currency reform is the question of rural credits or agricultural finance. Therefore, we recommend that an investigation of agricultural credit societies in foreign countries be made, so that it may be ascertained whether a system of rural credits may be devised suitable to conditions in the United States; and we also favor legislation permitting national banks to loan a reasonable proportion of their funds on real-estate security.

We recognize the value of vocational education, and urge Federal appropriations for such training and extension teaching in agriculture in cooperation with the several States.

WATERWAYS.

We renew the declaration in our last platform relating to the conservation of our natural resources and the development of our waterways. The present devastation of the lower Mississippi Valley accentuates the movement for the regulation of river flow by additional bank and levee protection below, and the diversion, storage, and control of the flood waters above, and the utilization for the beneficial purposes in the reclamation of arid and swamp lands and the development of water power instead of permitting the floods to continue, as heretofore, agents of destruction.

We hold that the control of the Mississippi River is a national problem. The preservation of the depth of its water for the purpose of navigation, the building of levees to maintain the integrity of its channel, and the prevention of the overflow of the land and its consequent devastation, resulting in the interruption of interstate commerce, the disorganization of the mail service, and the enormous loss of life and property, impose an obligation which alone can be discharged by the General Government.

To maintain an adequate depth of water the entire year, and thereby encourage water transportation, is a consummation worthy of legislative attention, and presents an issue national in its character. It calls for prompt action on the part of Congress, and the Democratic Party pledges itself to the enactment of legislation leading to that end.

We favor the cooperation of the United States and the respective States in plans for the comprehensive treatment of all waterways with a cooperative plan for channel improvement, with plans for drainage of swamp and overflowed lands, and to this end we favor the appropriation by the Federal Government of sufficient funds to make surveys of such lands, to develop plans for drainage of the same, and to supervise the work of construction.

We favor the adoption of a liberal and comprehensive plan for the development and improvement of our inland waterways with economy and efficiency, so as to permit their navigation by vessels of standard draft.

POST ROADS.

We favor national aid to State and local authorities in the construction and maintenance of post roads.

RIGHTS OF LABOR.

We repeat our declarations of the platform of 1908, as follows:

"The courts of justice are the bulwark of our liberties, and we yield to none in our purpose to maintain their dignity. Our party has given to the bench a long line of distinguished justices, who have added to the respect and confidence in which this department must be jealously maintained. We resent the attempt of the Republican Party to raise a false issue respecting the judiciary. It is an unjust reflection upon a great body of our citizens to assume that they lack respect for the courts.

"It is the function of the courts to interpret the laws which the people enact, and if the laws appear to work economic, social, or political injustice, it is our duty to change them. The only basis upon which the integrity of our courts can stand is that of unswerving justice and protection of life, personal liberty, and property. As judicial processes may be abused, we should guard them against abuse.

"Experience has proved the necessity of a modification of the law relating to injunction, and we reiterate the pledges of our platforms of 1896 and 1904 in favor of a measure which passed the United States Senate in 1896 relating to contempt in Federal courts and providing for trial by jury in cases of indirect contempt.

"Questions of judicial practice have arisen, especially in connection with industrial disputes. We believe that the parties to all judicial proceedings should be treated with rigid impartiality, and that injunctions should not be issued in any case in which an injunction would not issue if no industrial disputes were involved.

"The expanding organization of industry makes it essential that there should be no abridgement of the right of the wage earners and producers to organize for the protection of wages and the improvement of labor conditions, to the end that such labor organizations and their members should not be regarded as illegal combinations in restraint of trade.

"We pledge the Democratic Party to the enactment of a law creating a department of labor, represented separately in the President's Cabinet, in which department shall be included the subject of mines and mining."

We pledge the Democratic Party, so far as the Federal jurisdiction extends, to an employees' compensation law providing adequate indemnity for injury to body or loss of life.

CONSERVATION.

We believe in the conservation and the development, for the use of all the people, of the natural resources of the country. Our forests, our sources of water supply, our arable and our mineral lands, our navigable streams, and all the other material resources with which our country has been so lavishly endowed constitute the foundation of our national wealth. Such additional legislation as may be necessary to prevent their being wasted or absorbed by special or privileged interests should be enacted, and the policy of their conservation should be rigidly adhered to.

The public domain should be administered and disposed of with due regard to the general welfare. Reservations should be limited to the purposes which they purport to serve and not extended to include land wholly unsuited therefor. The unnecessary withdrawal from sale and settlement of enormous tracts of public land upon which tree growth never existed and can not be promoted tends only to retard development, create discontent, and bring reproach upon the policy of conservation.

The public-land laws should be administered in a spirit of the broadest liberality toward the settler exhibiting a bona fide purpose to comply therewith, to the end that the invitation of this Government to the landless should be as attractive as possible; and the plain provisions of the forest-reserve act permitting homestead entries to be made within the national forest should not be nullified by administrative regulations which amount to a withdrawal of great areas of the same from settlement.

Immediate action should be taken by Congress to make available the vast and valuable coal deposits of Alaska under conditions that will be a perfect guaranty against their falling into the hands of monopolizing corporations, associations, or interests.

We rejoice in the inheritance of mineral resources unequaled in extent, variety, or value, and in the development of a mining industry unequaled in its magnitude and importance. We honor the men who, in their hazardous toil underground, daily risk their lives in extracting and preparing for our use the products of the mine, so essential to the industries, the commerce, and the comfort of the people of this country. And we pledge ourselves to the extension of the work of the Bureau of Mines in every way appropriate for national legislation with a view of safeguarding the lives of miners, lessening the waste of essential resources, and promoting the economic development of mining, which, along with agriculture, must in the future, even more than in the past, serve as the very foundation of our national prosperity and welfare, and our international commerce.

We believe in encouraging the development of a modern system of agriculture and a systematic effort to improve the conditions of trade in farm products so as to benefit both the consumers and producers. And as an efficient means to this end we favor the enactment by Congress of legislation that will suppress the pernicious practice of gambling in agricultural products by organized exchanges or others.

MERCHANT MARINE.

We believe in fostering, by constitutional regulation of commerce, the growth of a merchant marine, which shall develop and strengthen the commercial ties which bind us to our sister republics of the south, but without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury.

We urge upon Congress the speedy enactment of laws for the greater security of life and property at sea, and we favor the repeal of all laws and the abrogation of so much of our treaties with other nations as provide for the arrest and imprisonment of seamen charged with desecration with violation of their contract of service. Such laws and treaties are un-American and violate the spirit, if not the letter, of the Constitution of the United States.

We favor the exemption from toll of American ships engaged in coastwise trade passing through the canal.

We also favor legislation forbidding the use of the Panama Canal by ships owned or controlled by railroad carriers engaged in transportation competitive with the canal.

PURE FOOD AND PUBLIC HEALTH.

We reaffirm our previous declarations advocating the union and strengthening of the various governmental agencies relating to pure foods, quarantine, vital statistics, and human health. Thus united and administered without partiality to or discrimination against any school of medicine or system of healing, they would constitute a single health service not subordinated to any commercial or financial interests but devoted exclusively to the conservation of human life and efficiency. Moreover, this health service should cooperate with the health agencies of our various States and cities, without interference with their prerogatives, or with the freedom of individuals to employ such medical or hygienic aid as they may see fit.

CIVIL-SERVICE LAW.

The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political party, and we favor a reorganization of the civil service, with adequate compensation commensurate with the class of work performed, for all officers and employees; we also recommend the extension to all classes of civil-service employees of the benefits of the provisions of the employers' liability law; we also recognize the right of direct petition to Congress by employees for the redress of grievance.

LAW REFORM.

We recognize the urgent need of reform in the administration of civil and criminal law in the United States, and we recommend the enactment of such legislation and the promotion of such measures as will rid the present legal system of the delays, expense, and uncertainties incident to the system as now administered.

THE PHILIPPINES.

We reaffirm the position thrice announced by the Democracy in national convention assembled against a policy of imperialism and colonial exploitation in the Philippines or elsewhere. We condemn the experiment in imperialism as an inexcusable blunder, which has involved us in enormous expenses, brought us weakness instead of strength, and laid our Nation open to the charge of abandonment of the fundamental doctrine of self-government. We favor an immediate declaration of the Nation's purpose to recognize the independence of the Philippine Islands as soon as a stable government can be established, such independence to be guaranteed by us until the neutralization of the islands can be secured by treaty with other powers.

In recognizing the independence of the Philippines our Government should retain such land as may be necessary for coaling stations and naval bases.

ARIZONA AND NEW MEXICO.

We welcome Arizona and New Mexico to the sisterhood of States and heartily congratulate them upon their auspicious beginning of great and glorious careers.

ALASKA.

We demand for the people of Alaska the full enjoyment of the rights and privileges of a Territorial form of government, and we believe that the officials appointed to administer the government of all our Territories and the District of Columbia should be qualified by previous bona fide residence.

THE RUSSIAN TREATY.

We commend the patriotism of the Democratic Members of the Senate and House of Representatives which compelled the termination of the Russian treaty of 1832, and we pledge ourselves anew to preserve the sacred rights of American citizenship at home and abroad. No treaty should receive the sanction of our Government which does not recognize that equality of all our citizens, irrespective of race or creed, and which does not expressly guarantee the fundamental right of expatriation.

The constitutional rights of American citizens should protect them on our borders and go with them throughout the world, and every American citizen residing or having property in any foreign country is entitled to and must be given the full protection of the United States Government, both for himself and his property.

PARCEL POST AND RURAL DELIVERY.

We favor the establishment of a parcel post or postal express and also the extension of the rural-delivery system as rapidly as practicable.

PANAMA CANAL EXPOSITION.

We hereby express our deep interest in the great Panama Canal Exposition to be held in San Francisco in 1915, and favor such encouragement as can be properly given.

PROTECTION OF NATIONAL UNIFORM.

We commend to the several States the adoption of a law making it an offense for the proprietors of places of public amusement and entertainment to discriminate against the uniform of the United States, similar to the law passed by the Congress applicable to the District of Columbia and the Territories in 1911.

PENSIONS.

We renew the declaration of our last platform relating to a generous pension policy.

RULE OF THE PEOPLE.

We direct attention to the fact that the Democratic Party's demand for a return to the rule of the people expressed in the national platform four years ago has now become the accepted doctrine of a large majority of the electors. We again remind the country that only by a larger exercise of the reserved power of the people can they protect themselves from the misuse of delegated power and the usurpation of governmental instrumentality by special interests. For this reason the national convention insisted on the overthrow of Cannonism and the inauguration of a system by which United States Senators could be elected by direct vote. The Democratic Party offers itself to the country as an agency through which the complete overthrow and extirpation of corruption, fraud, and machine rule in American politics can be effected.

CONCLUSION.

Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office, as well as relied upon during the campaign, and we invite the cooperation of all citizens, regardless of party, who believe in maintaining unimpaired the institutions and traditions of our country.

---

The Republican convention of 1912 was held in Chicago, Ill., on June 18–22.

William Howard Taft, of Ohio, was nominated for President and James S. Sherman, of New York, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1912.

The Republican Party, assembled by its representatives in national convention, declares its unchanging faith in government of the people, by the people, for the people. We renew our allegiance to the principles of the Republican Party and our devotion to the cause of Republican institutions established by the fathers.

It is appropriate that we should now recall with a sense of veneration and gratitude the name of our first great leader, who was nominated in this city, and whose lofty principles and superb devotion to his country are an inspiration to the party he honored—Abraham Lincoln.

In the present state of public affairs we should be inspired by his broad statesmanship and by his tolerant spirit toward men.

PRIDE IN PARTY'S RECORD.

The Republican Party looks back upon its record with pride and satisfaction and forward to its new responsibilities with hope and confidence. Its achievements in government constitute the most luminous pages in our history Our greatest national advance has been made during the years of its ascendency in public affairs. It has been genuinely and always a party of progress; it has never been either stationary or reactionary. It has gone from the fulfillment of one great pledge to the fulfillment of another in response to the public need and to the popular will.

We believe in our self-controlled representative democracy, which is a government of laws, not of men, and in which order is the prerequisite of progress.

The principles of constitutional government, which make provision for orderly and effective expressions of the popular will, for the protection of civil liberty and the rights of men, and for the interpretation of law by an untrammeled and independent judiciary, have proved themselves capable of sustaining the structure of a government which, after more than a century of development, embraces 100,000,000 people, scattered over a wide and diverse territory, but bound by common purpose, common ideals, and common affection to the Constitution of the United States.

HOW NATION HAS GROWN.

Under the Constitution and the principles asserted and vitalized by it the United States has grown to be one of the great civilized and civilizing powers of the earth. It offers a home and an opportunity to the ambitious and the industrious from other lands. Resting upon the broad basis of a people's confidence and a people's support, and managed by the people themselves, the Government of the United States will meet the problems of the future as satisfactorily as it has solved those of the past.

The Republican Party is now, as always, a party of advanced and constructive statesmanship. It is prepared to go forward with the solution of those new questions which social, economic, and political development have brought into the forefront of the Nation's interest. It will strive, not only in the Nation but in the several States, to enact the necessary legislation to safeguard the public health, to limit effectively the labor of women and children, to protect wage earners engaged in dangerous occupations, to enact comprehensive and generous workman's compensation laws in place of the present wasteful and unjust system of employers' liability, and in all possible ways to satisfy the just demand of the people for the study and solution of the complex and constantly changing problems of social welfare.

PROTECTION OF LIBERTY.

In dealing with these questions it is important that the rights of every individual to the freest possible development of his own powers and resources and to the control of his own justly acquired property, as far as those are compatible with the rights of others, shall not be interfered with or destroyed. The social and political structure of the United States rests upon the civil liberty of the individual, and for the protection of that liberty the people have wisely, in the National and State constitutions, put definite limitations upon themselves and upon their governmental officers and agencies. To enforce these limitations, to secure the orderly and coherent exercise of governmental powers, and to protect the rights of even the humblest and least favored individual are the functions of independent courts of justice.

The Republican Party reaffirms its intention to uphold at all times the authority and integrity of the courts, both State and Federal, and it will ever insist that their powers to enforce their processes and to protect life, liberty, and property shall be preserved inviolate. An orderly method is provided under our system of government by which the people may, when they choose, alter or amend the constitutional provisions which underlie that Government. Until these constitutional provisions are so altered or amended in orderly fashion, it is the duty of the courts to see to it that when challenged they are enforced.

WOULD HURRY LAWSUITS.

That the courts, both Federal and State, may bear the heavy burden laid upon them to the complete satisfaction of public opinion we favor legislation to prevent long delays and the tedious and costly appeals which have so often amounted to a denial of justice in civil cases and to a failure to protect the public at large in criminal cases.

Since the responsibility of the judiciary is so great, the standards of judicial action must be always and everywhere above suspicion and reproach. While we regard the recall of judges as unnecessary and unwise, we favor such action as may be necessary to simplify the process by which any judge who is found to be derelict in his duty may be removed from office.

Together with peaceful and orderly development at home, the Republican Party earnestly favors all measures for the establishment and protection of the peace of the world and for the development of closer relations between the various nations of the earth. It believes most earnestly in the peaceful settlement of international disputes and in the reference of all controversies between nations to an international court of justice.

MONOPOLY AND PRIVILEGE.

The Republican Party is opposed to special privilege and to monopoly. It placed upon the statute book the interstate commerce act of 1887 and the important amendments thereto, and the antitrust act of 1890, and it has consistently and successfully enforced the provisions of these laws. It will take no backward step to permit the reestablishment in any degree of conditions which were intolerable.

Experience makes it plain that the business of the country can be carried on without fear and without disturbance and at the same time without resort to practices which are abhorrent to the common sense of justice. The Republican Party favors the enactment of legislation supplementary to the existing antitrust act which will define as criminal offenses those specific acts that uniformly mark attempts to restrain and to monopolize trade, to the end that those who honestly intend to obey the law may have a guide for their action and that those who aim to violate the law may the more surely be punished. The same certainty should be given to the law prohibiting combinations and monopolies that characterizes other provisions of commercial law, in order that no part of the field of business opportunity may be restricted by monopoly or combination, that business success honorably achieved may not be converted into crime, and that the right of every man to acquire commodities, and particularly the necessaries of life, in an open market, uninfluenced by the manipulation of trust or combination, may be preserved.

FEDERAL TRADE COMMISSION.

In the enforcement and administration of Federal laws governing interstate commerce and enterprises impressed with a public use engaged therein there is much that may be committed to a Federal trade commission, thus placing in the hands of an administrative board many of the functions now necessarily exercised by the courts. This will promote promptness in the administration of the laws and avoid delays and technicalities incident to court procedure.

THE TARIFF POLICY.

We reaffirm our belief in a protective tariff. The Republican tariff policy has been of the greatest benefit to the country, developing our resources, diversifying our industries, and protecting our workingmen against competition with cheaper labor abroad, thus establishing for our wage earners the American standard of living. The protective tariff is so woven into the fabric of our industrial and agricultural life that to substitute for it a tariff for revenue only would destroy many industries and throw millions of our people out of employment. The products of the farm and of the mine should receive the same measure of protection as other products of American labor.

We hold that the import duties should be high enough, while yielding a sufficient revenue, to protect adequately American industries and wages. Some of the existing import duties are too high, and should be reduced. Readjustment should be made from time to time to conform to changing conditions and to reduce excessive rates, but without injury to any American industry. To accomplish this, correct information is indispensable. This information can best be obtained by an expert commission, as the large volume of useful facts contained in the recent reports of the Tariff Board has demonstrated.

TARIFF BOARD INDORSED.

The pronounced feature of modern industrial life is its enormous diversification. To apply tariff rates justly to these changing conditions requires closer study and more scientific methods than ever before. The Republican Party has shown by its creation of a Tariff Board its recognition of this situation and its determination to be equal to it. We condemn the Democratic Party for its failure either to provide funds for the continuance of this board or to make some other provision for securing the information requisite for intelligent tariff legislation. We protest against the Democratic method of legislating on these vitally important subjects without careful investigation.

We condemn the Democratic tariff bills passed by the House of Representatives of the Sixty-second Congress as sectional, as injurious to the public credit, and as destructive of business enterprise.

COST OF LIVING.

The steadily increasing cost of living has become a matter not only of national but of world-wide concern. The fact that it is not due to the protective tariff system is evidenced by the existence of similar conditions which have a tariff policy different from our own, as well as by the fact that the cost of living has increased while rates of duty have remained stationary or been reduced.

The Republican Party will support a prompt scientific inquiry into the causes which are operative, both in the United States and elsewhere, to increase the cost of living. When the exact facts are known, it will take the necessary steps to remove such abuses as may be found to exist, in order that the cost of food, clothing, and shelter of the people may in no way be unduly or artificially increased.

BANKING AND CURRENCY.

The Republican Party has always stood for a sound currency and safe banking methods. It is responsible for the resumption of specie payment and for the establishment of the gold standard. It is committed to the progressive development of our banking and currency system. Our banking arrangements to-day need further revision to meet the requirements of current conditions. We need measures which will prevent the recurrence of money panics and financial disturbances and which will promote the prosperity of business and the welfare of labor by producing constant employment. We need better currency facilities for the movement of crops in the West and South. We need banking arrangements under American auspices for the encouragement and better conduct of our foreign trade. In attaining these ends the independence of individual banks, whether organized under national or State charters, must be carefully protected, and our banking and currency system must be safeguarded from any possibility of domination by sectional, financial, or political interests.

It is of great importance to the social and economic welfare of this country that its farmers have facilities for borrowing easily and cheaply the money they need to increase the productivity of their land. It is as important that financial machinery be provided to supply the demand of farmers for credit as it is that the banking and currency systems be reformed in the interest of general business. Therefore we recommend and urge an authoritative investigation of agricultural credit societies and corporations in other countries and the passage of State and Federal laws for the establishment and capable supervision of organizations having for another purpose the loaning of funds to farmers.

THE CIVIL SERVICE.

We reaffirm our adherence to the principle of appointment to public office based on proved fitness, and tenure during good behavior and efficiency. The Republican Party stands committed to the maintenance, extension, and enforcement of the civil-service law, and it favors the passage of legislation empowering the President to extend competitive service so far as practicable. We favor legislation to make possible the equitable retirement of disabled and superannuated members of the civil service, in order that a higher standard of efficiency may be maintained.

We favor the amendment of the Federal employers' liability law so as to extend its provisions to all Government employees, as well as to provide a more liberal scale of compensation for injury and death.

CAMPAIGN CONTRIBUTIONS.

We favor such additional legislation as may be necessary more effectually to prohibit corporations from contributing funds, directly or indirectly, to campaigns for the nomination or election of the President, the Vice President, Senators, and Representatives in Congress.

We heartily approve the recent act of Congress requiring the fullest publicity in regard to all campaign contributions, whether made in connection with primaries, conventions, or elections.

CONSERVATION POLICY.

We rejoice in the success of the distinctive Republican policy of the conservation of our national resources for their use by the people without waste and without monopoly. We pledge ourselves to a continuance of such a policy.

We favor such fair and reasonable rules and regulations as will not discourage or interfere with actual bona fide homeseekers, prospectors, and miners in the acquisition of public lands under existing laws.

PARCEL POST ASKED.

In the interest of the general public, and particularly of the agricultural or rural communities, we favor legislation looking to the establishment under proper regulations, of a parcel post, the postal rates to be graduated under a zone system—in proportion to the length of carriage.

PROTECTION OF CITIZENSHIP.

We approve the action taken by the President and the Congress to secure with Russia, as with other countries, a treaty that will recognize the absolute right of expatriation, and that will prevent all discrimination of whatever kind between American citizens, whether native born

or alien, and regardless of race, religion, or previous political allegiance. The right of asylum is a precious possession of the people of the United States, and it is to be neither surrendered nor restricted.

NEW BATTLESHIPS URGED.

We believe in the maintenance of an adequate Navy for the national defense, and we condemn the action of the Democratic House of Representatives in refusing to authorize the construction of battleships.

We believe that one of the country's most urgent needs is a merchant marine. There should be American ships and plenty of them, to make use of the great American interoceanic canal now nearing completion.

FOR FLOOD PROTECTION.

The Mississippi River is the Nation's drainage ditch. Its flood waters, gathered from 31 States and the Dominion of Canada, constitute an overpowering force, which breaks the levees and pours its torrents over many million acres of the richest land in the Union, stopping mails, impeding commerce, and causing great loss of life and property. These floods are national in scope, and the disasters they produce seriously affect the general welfare. The States, unaided, can not cope with this giant problem. Hence, we believe the Federal Government should assume a fair proportion of the burden of its control, so as to prevent the disasters from recurring floods.

RECLAMATION OF LANDS.

We favor the continuance of the policy of the Government with regard to the reclamation of arid lands; and for the encouragement of the speedy settlement and improvement of such lands we favor an amendment to the law that will reasonably extend the time within which the cost of any reclamation project may be repaid by the landowners under it.

We favor a liberal and systematic policy for the improvement of our rivers and harbors. Such improvements should be made upon expert information and after a careful comparison of cost and propective benefits.

LIBERAL ALASKAN POLICY.

We favor a liberal policy toward Alaska to promote the development of the great resources of that District, with such safeguards as will prevent waste and monopoly.

We favor the opening of the coal lands to development through a law leasing the lands on such terms as will invite development and provide fuel for the Navy and the commerce of the Pacific Ocean, while retaining title in the United States to prevent monopoly.

PHILIPPINE ATTITUDE.

The Philippine policy of the Republican Party has been and is inspired by the belief that our duty toward the Filipino people is a national obligation which should remain entirely free from partisan politics.

We ratify in all its particulars the platform of 1908 respecting citizenship for the people of Porto Rico.

We pledge the Republican Party to the enactment of appropriate laws to give relief from the constantly growing evil of induced or undesirable immigration, which is inimical to the progress and welfare of the people of the United States.

SAFETY AT SEA.

We favor the speedy enactment of laws to provide that seamen shall not be compelled to endure involuntary servitude, and that life and property at sea shall be safeguarded by the ample equipment of vessels with life-saving appliances and with full complements of skilled, able-bodied seamen to operate them.

REPUBLICAN ACCOMPLISHMENT.

The approaching completion of the Panama Canal, the establishment of a Bureau of Mines, the institution of postal savings banks, the increased provision made in 1912 for the aged and infirm soldiers and sailors of the Republic and for their widows, and the vigorous administration of the laws relating to pure food and drugs, all mark the successful progress of Republican administration and are additional evidence of its effectiveness.

We commend the earnest effort of the Republican administration to secure greater economy and increased efficiency in the conduct of Government business. Extravagant appropriations and the creation of unnecessary offices are an injustice to the taxpayer and a bad example to the citizen.

We call upon the people to quicken their interest in public affairs, to condemn and punish lynchings and other forms of lawlessness, and to strengthen in all possible ways a respect for law and the observance of it. Indifferent citizenship is an evil from which the law affords no adequate protection, and for which legislation can provide no remedy.

We congratulate the people of Arizona and New Mexico upon the admission of those States, thus merging in the Union in final and enduring form the last remaining portion of our continental territory.

REPUBLICAN ADMINISTRATION.

We challenge successful criticism of the 16 years of Republican administration under Presidents McKinley, Roosevelt, and Taft. We heartily reaffirm the indorsement of President McKinley contained in the platform of 1900 and of 1904, and that of President Roosevelt contained in the platforms of 1904 and 1908.

We invite the intelligent judgment of the American people upon the administration of William H. Taft. The country has prospered and been at peace under his Presidency. During the years in which he had the cooperation of a Republican Congress an unexampled amount of constructive legislation was framed and passed in the interest of the people and in obedience to their wish. That legislation is a record which any administration might appeal with confidence to the favorable judgment of history.

We appeal to the American electorate upon the record of the Republican Party, and upon this declaration of its principles and purposes. We are confident that under the leadership of the candidates here to be nominated our appeal will not be in vain; that the Republican Party will meet every just expectation of the people whose servant it is; that under its administration and its laws our Nation will continue to advance; that peace and prosperity will abide with the people, and that new glory will be added to the great Republic.

The Democratic convention of 1916 was held at St. Louis, Mo., June 14–16.

Woodrow Wilson, of New Jersey, was nominated for President and Thomas R. Marshall, of Indiana, was nominated for Vice President.

The following platform was adopted:

DEMOCRATIC PLATFORM, 1916.

The Democratic Party, in national convention assembled, adopts the following declaration to the end that the people of the United States may both realize the achievements wrought by four years of Democratic administration and be apprised of the policies to which the party is committed for the further conduct of national affairs.

RECORD OF ACHIEVEMENT.

We indorse the administration of Woodrow Wilson. It speaks for itself. It is the best exposition of sound Democratic policy at home and abroad.

We challenge comparison of our record, our keeping of pledges and our constructive legislation, with those of any party of any time.

We found our country hampered by special privilege, a vicious tariff, obsolete banking laws and an inelastic currency. Our foreign affairs were dominated by commercial interests for their selfish ends. The Republican Party, despite repeated pledges, was impotent to correct abuses which it had fostered. Under our administration, under a leadership which has never faltered, these abuses have been corrected, and our people have been freed therefrom.

Our archaic banking and currency system, prolific of panic and disaster under Republican administrations,—long the refuge of the Money Trust,—has been supplanted by the Federal Reserve Act, a true democracy of credit under Government control, already proved a financial bulwark in a world crisis, mobilizing our resources, placing abundant credit at the disposal of legitimate industry and making a currency panic impossible.

We have created a Federal Trade Commission to accommodate the perplexing questions arising under the antitrust laws so that monopoly may be strangled at its birth and legitimate industry encouraged. Fair competition in business is now assured.

We have effected an adjustment of the tariff, adequate for revenue under peace conditions, and fair to the consumer and to the producer. We have adjusted the burdens of taxation so that swollen incomes bear their equitable share. Our revenues have been sufficient in times of world stress, and will largely exceed the expenditures for the current fiscal year.

We have lifted human labor from the category of commodities and have secured to the workingman the right of voluntary association for his protection and welfare. We have protected the rights of the laborer against the unwarranted issuance of writs of injunction, and have guaranteed to him the right of trial by jury in cases of alleged contempt committed outside the presence of the court.

We have advanced the parcels post to genuine efficiency, enlarged the Postal Savings System, added 10,000 rural-delivery routes and extensions, thus reaching 2,500,000 additional people, improved the Postal Service in every branch, and for the first time in our history, placed the post-office system on a self-supporting basis, with actual surplus in 1913, 1914 and 1916.

ECONOMIC FREEDOM.

The reforms which were most obviously needed to clear away special privilege, prevent unfair discrimination and release the energies of men of all ranks and advantages, have been effected by recent legislation. We must now remove, as far as possible, every remaining element of unrest and uncertainty from the path of the business men of America, and secure for them a continued period of quiet, assured and confident prosperity.

TARIFF.

We reaffirm our belief in the doctrine of a tariff for the purpose of providing sufficient revenue for the operation of the Government economically administered and unreservedly indorse the Underwood tariff law as truly exemplifying that doctrine. We recognize that tariff rates are necessarily subject to change to meet changing conditions in the world's production and trade. The events of the last two years have brought about many momentous changes. In some respects their effects are yet conjectural and wait to be disclosed, particularly in regard to our foreign trade.

Two years of a war which has directly involved most of the chief industrial nations of the world and which has indirectly affected the life and industry of all nations, are bringing about economic changes more varied and far-reaching than the world has ever before experienced. In order to ascertain just what those changes may be, the Democratic Congress is providing for a nonpartisan tariff commission to make impartial and thorough study of every economic fact that may throw light either upon our past or upon our future fiscal policy with regard to the imposition of taxes on imports or with regard to the changed and changing conditions under which our trade is carried on. We cordially indorse this timely proposal and declare ourselves in sympathy with the principle and purpose of shaping legislation within that field in accordance with clearly established facts rather than in accordance with the demands of selfish interests or upon information provided largely, if not exclusively, by them.

AMERICANISM.

The part which the United States will play in the new day of international relationships that is now upon us will depend upon our preparation and our character. The Democratic Party, therefore, recognizes the assertion and triumphant demonstration of the indivisibility and coherent strength of the Nation as the supreme issue of this day in which the whole world faces the crisis of manifold change. It summons all men of whatever origin or creed who would count themselves Americans, to join in making clear to all the world the unity and consequent power of America. This is an issue of patriotism. To taint it with partisanship would be to defile it. In this day of test, America must show itself not a Nation of partisans but a Nation of patriots. There is gathered here in America the best of the blood, the industry and the genius of the world, the elements of a great race and a magnificent society to be welded into a mighty and splendid Nation

Whoever, actuated by the purpose to promote the interest of a foreign power, in disregard of our own country's welfare or to injure this Government in its foreign relations or cripple or destroy its industries at home, and whoever by arousing prejudices of a racial, religious or other nature creates discord and strife among our people so as to obstruct the wholesome process of unification, is faithless to the trust which the privileges of citizenship repose in him and is disloyal to his country. We, therefore, condemn as subversive of this Nation's unity and integrity, and as destructive of its welfare, the activities and designs of every

group or organization, political or otherwise, that has for its object the advancement of the interest of a foreign power, whether such object is promoted by intimidating the Government, a political party, or representatives of the people, or which is calculated and tends to divide our people into antagonistic groups and thus to destroy that complete agreement and solidarity of the people and that unity of sentiment and purpose so essential to the perpetuity of the Nation and its free institutions. We condemn all alliances and combinations of individuals in this country of whatever nationality or descent, who agree and conspire together for the purpose of embarrassing or weakening our Government or of improperly influencing or coercing our public representatives in dealing or negotiating with any foreign power. We charge that such conspiracies among a limited number exist and have been instigated for the purpose of advancing the interests of foreign countries to the prejudice and detriment of our own country. We condemn any political party which, in view of the activity of such conspirators, surrenders its integrity or modifies its policy.

PREPAREDNESS.

Along with the proof of our character as a nation must go the proof of our power to play the part that legitimately belongs to us. The people of the United States love peace. They respect the rights and covet the friendship of all other nations. They desire neither any additional territory nor any advantage which can not be peacefully gained by their skill, their industry, or their enterprise; but they insist upon having absolute freedom of national life and policy, and feel that they owe it to themselves and to the rôle of spirited independence which it is their sole ambition to play, that they should render themselves secure against the hazard of interference from any quarter, and should be able to protect their rights upon the seas or in any part of the world. We, therefore, favor the maintenance of an Army fully adequate to the requirements of order, of safety and of the protection of the Nation's rights; the fullest development of modern methods of seacoast defense and the maintenance of an adequate reserve of citizens trained to arms and prepared to safeguard the people and territory of the United States against any danger of hostile action which may unexpectedly arise; and a fixed policy for the continuous development of a Navy worthy to support the great naval traditions of the United States and fully equal to the international tasks which this Nation hopes and expects to take a part in performing. The plans and enactments of the present Congress afford substantial proof of our purpose in this exigent matter.

INTERNATIONAL RELATIONS.

The Democratic administration has throughout the present war scrupulously and successfully held to the old paths of neutrality and to the peaceful pursuit of the legitimate objects of our national life which statesmen of all parties and creeds have prescribed for themselves in America since the beginning of our history. But the circumstances of the last two years have revealed necessities of international action which no former generation can have foreseen. We hold that it is the duty of the United States to use its power, not only to make itself safe at home, but also to make secure its just interests throughout the world, and, both for this end and in the interest of humanity, to assist the world in securing settled peace and justice. We believe that every people has the right to choose the sovereignty under which it shall live; that the small states of the world have a right to enjoy from other nations the same respect for their sovereignty and for their territorial integrity that great and powerful nations expect and insist upon; and that the world has a right to be free from every disturbance of its peace that has its origin in aggression or disregard of the rights of peoples and nations; and we believe that the time has come when it is the duty of the United States to join with the other nations of the world in any feasible association that will effectively serve those principles, to maintain inviolate the complete security of the highway of the seas for the common and unhindered use of all nations.

The present administration has consistently sought to act upon and realize in its conduct of the foreign affairs of the Nation the principle that should be the object of any association of the nations formed to secure the peace of the world and the maintenance of national and individual rights. It has followed the highest American traditions. It has preferred respect for the fundamental rights of smaller States even to property interests, and has secured the friendship of the people of such States for the United States by refusing to make a mere material interest an excuse for the assertion of our superior power against the dignity of their sovereign independence. It has regarded the lives of its citizens and the claims of humanity as of greater moment than material rights, and peace as the best basis for the just settlement of commercial claims. It has made the honor and ideals of the United States its standard alike in negotiation and action.

PAN AMERICAN CONCORD.

We recognize now, as we have always recognized, a definite and common interest between the United States and the other peoples and Republics of the Western Hemisphere in all matters of national independence and free political development. We favor the establishment and maintenance of the closest relations of amity and mutual helpfulness between the United States and the other Republics of the American continents for the support of peace and the promotion of a common prosperity. To that end we favor all measures which may be necessary to facilitate intimate intercourse and promote commerce between the United States and our neighbors to the south, and such international understandings as may be practicable and suitable to accomplish these ends.

We commend the action of the Democratic administration in holding the Pan American Financial Conference at Washington in May, 1915, and organizing the International High Commission which represented the United States in the recent meeting of representatives of the Latin American Republics at Buenos Aires, April, 1916, which have so greatly promoted the friendly relations between the people of the Western Hemisphere.

MEXICO.

The Monroe doctrine is reasserted as a principle of Democratic faith. That doctrine guarantees the Independent Republics of the two Americas against aggression from another continent. It implies, as well, the most scrupulous regard upon our part for the sovereignty of each of them. We court their good will. We seek not to despoil them. The want of a stable, responsible government in Mexico, capable of repressing and punishing marauders and bandit bands, who have not only taken the lives and seized and destroyed the property of American citizens in that country, but have insolently invaded our soil, made war upon and murdered our people thereon, has rendered it necessary temporarily to occupy, by our armed forces, a portion of the territory of that friendly State. Until, by the restoration of law and order therein, a repetition of such incursions is improbable, the necessity for their remaining will continue. Intervention, implying as it does military subjugation, is revolting to the people of the United States, notwithstanding the provocation to that course has been great and should be resorted to, if at all, only as a last recourse. The stubborn resistance of the President and his advisers to every demand and suggestion to enter upon it, is creditable alike to them and to the people in whose name he speaks.

MERCHANT MARINE.

Immediate provision should be made for the development of the carrying trade of the United States. Our foreign commerce has in the past been subject to many unnecessary and vexatious obstacles in the way of legislation of Republican Congresses. Until the recent Democratic tariff legislation, it was hampered by unreasonable burdens of taxation. Until the recent banking legislation, it had at its disposal few of the necessary instrumentalities of international credit and exchange. Until the formulation of the pending act to promote the construction of a merchant marine, it lacked even the prospect of adequate carriage by sea. We heartily indorse the purposes and policy of the pending shipping bill and favor all such additional measures of constructive or remedial legislation as may be necessary to restore our flag to the seas and to provide further facilities for our foreign commerce, particularly such laws as may be requisite to remove unfair conditions of competition in the dealings of American merchants and producers with competitors in foreign markets.

CONSERVATION.

For the safeguarding and quickening of the life of our own people, we favor the conservation and development of the natural resources of the country through a policy which shall be positive rather than negative, a policy which shall not withhold such resources from development but which, while permitting and encouraging their use, shall prevent both waste and monopoly in their exploitation, and we earnestly favor the passage of acts which will accomplish these objects, reaffirming the declaration of the platform of 1912 on this subject.

The policy of reclaiming our arid lands should be steadily adhered to.

THE ADMINISTRATION AND THE FARMER.

We favor the vigorous prosecution of investigations and plans to render agriculture more profitable and country life more healthful, comfortable and attractive, and we believe that this should be a dominant aim of the Nation as well as of the States. With all its recent improvement, farming still lags behind other occupations in development as a business, and the advantages of an advancing civilization have not accrued to rural communities in a fair proportion. Much has been accomplished in this field under the present administration, far more than under any previous administration. In the Federal Reserve Act of the last Congress and the Rural Credits Act of the present Congress, the machinery has been created which will make credit available to the farmer constantly and readily, placing him at last upon a footing of equality with the merchant and the manufacturer in securing the capital necessary to carry on his enterprises. Grades and standards necessary to the intelligent and successful conduct of the business of agriculture have also been established or are in the course of being established by law.

The long-needed Cotton Futures Act, passed by the Sixty-third Congress, has now been in successful operation for nearly two years. A Grain Grades Bill, long needed, and a Permissive Warehouse Bill, intended to provide better storage facilities and to enable the farmer to obtain certificates upon which he may secure advances of money, have been passed by the House of Representatives, have been favorably reported to the Senate, and will probably become law during the present session of the Congress. Both Houses have passed a good-roads measure which will be of far-reaching benefit to all agricultural communities. Above all, the most extraordinary and significant progress has been made, under the direction of the Department of Agriculture, in extending and perfecting practical farm demonstration work which is so rapidly substituting scientific for empirical farming. But it is also necessary that rural activities should be better directed through cooperation and organization, that unfair methods of competition should be eliminated and the conditions requisite for the just, orderly and economical marketing of farm products created. We approve the Democratic administration for having emphatically directed attention for the first time to the essential interests of agriculture involved in farm marketing and finance, for creating the Office of Markets and Rural Organization in connection with the Department of Agriculture, and for extending the cooperative machinery necessary for conveying information to farmers by means of demonstrations. We favor continued liberal provision, not only for the benefit of production, but also for the study and solution of problems of farm marketing and finance and for the extension of existing agencies for improving country life.

GOOD ROADS.

The happiness, comfort and prosperity of rural life, and the development of the city, are alike conserved by the construction of public highways. We, therefore, favor national aid in the construction of post roads and roads for military purposes.

GOVERNMENT EMPLOYMENT.

We hold that the life, health and strength of the men, women and children of the Nation are its greatest asset, and that in the conservation of these the Federal Government, wherever it acts as the employer of labor, should both on its own account and as an example, put into effect the following principles of just employment:

1. A living wage for all employees.
2. A working day not to exceed eight hours, with one day of rest in seven.
3. The adoption of safety appliances and the establishment of thoroughly sanitary conditions of labor.
4. Adequate compensation for industrial accidents.
5. The standards of the "Uniform Child Labor Law" wherever minors are employed.
6. Such provisions for decency, comfort and health in the employment of women as should be accorded the mothers of the race.
7. An equitable retirement law providing for the retirement of superannuated and disabled employees of the civil service, to the end that a higher standard of efficiency may be maintained.

We believe also that the adoption of similar principles should be urged and applied in the legislation of the States with regard to labor within their borders and that through every possible agency the life and health of the people of the Nation should be conserved.

LABOR.

We declare our faith in the Seamen's Act, passed by the Democratic Congress, and we promise our earnest continuance of its enforcement.

We favor the speedy enactment of an effective Federal Child Labor Law, and the regulation of the shipment of prison made goods in interstate commerce.

We favor the creation of a Federal Bureau of Safety in the Department of Labor, to gather facts concerning industrial hazards, and to recommend legislation to prevent the maiming and killing of human beings.

We favor the extension of the powers and functions of the Federal Bureau of Mines.

We favor the development upon a systematic scale of the means, already begun under the present administration to assist laborers throughout the Union to seek and obtain employment, and the extension by the Federal Government of the same assistance and encouragement as is now given to agricultural training.

We heartily commend our newly established Department of Labor for its fine record in settling strikes by personal advice and through conciliating agents.

PUBLIC HEALTH.

We favor a thorough reconsideration of the means and methods by which the Federal Government handles questions of public health to the end that human life may be conserved by the elimination of loathsome diseases, the improvement of sanitation, and the diffusion of a knowledge of disease prevention.

We favor the establishment by the Federal Government of tuberculosis sanitariums for needy tubercular patients.

SENATE RULES.

We favor such alteration of the rules of procedure of the Senate of the United States as will permit the prompt transaction of the Nation's legislative business.

ECONOMY AND THE BUDGET.

We demand careful economy in all expenditures for the support of the Government, and to that end favor a return by the House of Representatives to its former practice of initiating and preparing all appropriation bills through a single committee chosen from its membership, in order that responsibility may be centered, expenditures standardized and made uniform, and waste and duplication in the public service as much as possible avoided. We favor this as a practicable first step toward a budget system.

CIVIL SERVICE.

We reaffirm our declarations for the rigid enforcement of the Civil Service laws.

PHILIPPINE ISLANDS.

We heartily indorse the provisions of the bill, recently passed by the House of Representatives, further promoting self-government in the Philippine Islands as being in fulfillment of the policy declared by the Democratic Party in its last National platform, and we reiterate our indorsement of the purpose of ultimate independence for the Philippine Islands, expressed in the preamble of that measure.

WOMAN SUFFRAGE.

We recommend the extension of the franchise to the women of the country by the States upon the same terms as to men.

PROTECTION OF CITIZENS.

We again declare the policy that the sacred rights of American citizenship must be preserved at home and abroad, and that no treaty shall receive the sanction of our Government which does not expressly recognize the absolute equality of all of our citizens irrespective of race, creed or previous nationality, and which does not recognize the right of expatriation. The American Government should protect American citizens in their rights not only at home but abroad, and any country having a Government should be held to strict accountability for any wrongs done them, either to person or to property. At the earliest practicable opportunity our country should strive earnestly for peace among the warring nations of Europe and seek to bring about the adoption of the fundamental principle of justice and humanity, that all men shall enjoy equality of right and freedom from discrimination in the lands wherein they dwell.

PRISON REFORM.

We demand that the modern principles of prison reform be applied in our Federal Penal System. We favor such work for prisoners as shall give them training in remunerative occupations so that they may make an honest living when released from prison; the setting apart of the net wages of the prisoner to be paid to his dependent family or to be reserved for his own use upon his release; the liberal extension of the principles of the Federal Parole Law, with due regard both to the welfare of the prisoner and the interests of society; the adoption of the probation system, especially in the case of first offenders not convicted of serious crimes.

PENSIONS.

We renew the declarations of recent Democratic platforms relating to generous pensions for soldiers and their widows and call attention to our record of performance in this particular.

WATERWAYS AND FLOOD CONTROL.

We renew the declaration in our last two platforms relating to the development of our waterways. The recent devastation of the lower Mississippi Valley and several other sections by floods accentuates the movement for the regulation of river flow by additional bank and levee protection below, and diversion, storage and control of the flood waters above, and their utilization for beneficial purposes in the reclamation of arid and swamp lands, and development of water power, instead of permitting the floods to continue as heretofore agents of destruction. We hold that the control of the Mississippi River is a national problem. The preservation of the depth of its waters for purposes of navigation, the building of levees and works of bank protection to maintain the integrity of its channel and prevent the overflow of its valley resulting in the interruption of interstate commerce, the disorganization of the mail service, and the enormous loss of life and property, impose an obligation which alone can be discharged by the National Government.

We favor the adoption of a liberal and comprehensive plan for the development and improvement of our harbors and inland waterways with economy and efficiency so as to permit their navigation by vessels of standard draft.

ALASKA.

It has been and will be the policy of the Democratic Party to enact all laws necessary for the speedy development of Alaska and its great natural resources.

TERRITORIES.

We favor granting to the people of Alaska, Hawaii, and Porto Rico the traditional Territorial government accorded to all Territories of the United States since the beginning of our Government, and we believe that the officials appointed to administer the government of these several Territories should be qualified by previous bona fide residence.

CANDIDATES.

We unreservedly indorse our President and Vice President, Woodrow Wilson of New Jersey, and Thomas Riley Marshall of Indiana, who have performed the functions of their great offices faithfully and impartially, and with distinguished ability.

In particular we commend to the American people the splendid diplomatic victories of our great President, who has preserved the vital interests of our Government and its citizens, and kept us out of war.

Woodrow Wilson stands to-day the greatest American of his generation.

CONCLUSION.

This is a critical hour in the history of America, a critical hour in the history of the world. Upon the record above set forth, which shows great constructive achievement in following out a consistent policy for our domestic and internal development; upon the record of the Democratic administration, which has maintained the honor, the dignity and the interests of the United States, and at the same time, retained the respect and friendship of all the nations of the world; and upon the great policies for the future strengthening of the life of our country, the enlargement of our national vision and the ennobling of our international relations, as set forth above, we appeal with confidence to the voters of the country.

—

The Republican convention of 1916 was held at Chicago, Ill., June 7–10.

Charles E. Hughes, of New York, was nominated for President and Charles W. Fairbanks, of Indiana, was nominated for Vice President.

The following platform was adopted:

REPUBLICAN PLATFORM, 1916.

In 1861 the Republican Party stood for the Union. As it stood for the Union of States, it now stands for a united people, true to American ideals, loyal to American traditions, knowing no allegiance except to the Constitution, to the Government, and to the flag of the United States. We believe in American policies at home and abroad.

PROTECTION OF AMERICAN RIGHTS.

We declare that we believe in and will enforce the protection of every American citizen in all the rights secured to him by the Constitution, by treaties and the law of nations, at home and abroad, by land and sea. These rights which, in violation of the specific promise of their party made at Baltimore in 1912, the Democratic President and the Democratic Congress have failed to defend, we will unflinchingly maintain.

FOREIGN RELATIONS.

We desire peace, the peace of justice and right, and believe in maintaining a strict and honest neutrality between the belligerents in the great war in Europe. We must perform all our duties and insist upon all our rights as neutrals without fear and without favor. We believe that peace and neutrality, as well as the dignity and influence of the United States, can not be preserved by shifty expedients, by phrase-making, by performances in language, or by attitudes ever changing in an effort to secure groups of voters. The present administration has destroyed our influence abroad and humiliated us in our own eyes. The Republican Party believes that a firm, consistent, and courageous foreign policy, always maintained by Republican Presidents in accordance with American traditions, is the best, as it is the only true way to preserve our peace and restore us to our rightful place among the nations. We believe in the pacific settlement of international disputes, and favor the establishment of a world court for that purpose.

MEXICO.

We deeply sympathize with the 15,000,000 people of Mexico who for three years have seen their country devastated, their homes destroyed, their fellow citizens murdered, and their women outraged by armed bands of desperadoes led by self-seeking, conscienceless agitators who, when temporarily successful in any locality, have neither sought nor been able to restore order or establish and maintain peace.

We express our horror and indignation at the outrages which have been and are being perpetrated by these bandits upon American men and women who were or are in Mexico by invitation of the laws and of the Government of that country and whose rights to security of person and property are guaranteed by solemn treaty obligations. We denounce the indefensible methods of interference employed by this administration in the internal affairs of Mexico and refer with shame to its failure to discharge the duty of this country as next friend to Mexico, its duty to other powers who have relied upon us as such friend, and its duty to our citizens in Mexico, in permitting the continuance of such conditions, first by failure to act promptly and firmly, and, second, by lending its influence to the continuation of such conditions through recognition of one of the factions responsible for these outrages.

We pledge our aid in restoring order and maintaining peace in Mexico. We promise to our citizens on and near our border, and to those in Mexico, wherever they may be found, adequate and absolute protection in their lives, liberty, and property.

MONROE DOCTRINE.

We reaffirm our approval of the Monroe Doctrine, and declare its maintenance to be a policy of this country essential to its present and future peace and safety and to the achievement of its manifest destiny.

LATIN AMERICA.

We favor the continuance of Republican policies which will result in drawing more and more closely the commercial, financial, and social relations between this country and the countries of Latin America.

PHILIPPINES.

We renew our allegiance to the Philippine policy inaugurated by McKinley, approved by Congress, and consistently carried out by Roosevelt and Taft. Even in this short time it has enormously improved the material and social conditions of the islands, given the Philippine people a constantly increasing participation in their government and, if persisted in, will bring still greater benefits in the future.

We accepted the responsibility of the islands as a duty to civilization and the Filipino people. To leave with our task half done would break our pledges, injure our prestige among nations, and imperil what has already been accomplished.

We condemn the Democratic administration for its attempt to abandon the Philippines, which was prevented only by the vigorous opposition of Republican Members of Congress, aided by a few patriotic Democrats.

RIGHT OF EXPATRIATION.

We reiterate the unqualified approval of the action taken in December, 1911, by the President and Congress to secure with Russia, as with other countries, a treaty that will recognize the absolute right of expatriation and prevent all discrimination of whatever kind between American citizens whether native born or alien, and regardless of race, religion, or previous political allegiance. We renew the pledge to observe this principle and to maintain the right of asylum, which is neither to be surrendered nor restricted, and we unite in the cherished hope that the war which is now desolating the world may speedily end, with a complete and lasting restoration of brotherhood among the nations of the earth and the assurance of full equal rights, civil and religious, to all men in every land.

PROTECTION OF THE COUNTRY.

In order to maintain our peace and make certain the security of our people within our own borders the country must have not only adequate but thorough and complete national defenses ready for any emergency. We must have a sufficient and effective Regular Army, and a provision for ample reserves, already drilled and disciplined, who can be called at once to the colors when the hour of danger comes.

We must have a Navy so strong and so well proportioned and equipped, so thoroughly ready and prepared, that no enemy can gain command of the sea and effect a landing in force on either our western or our eastern coast. To secure these results we must have a coherent and continuous policy of national defense, which even in these perilous days the Democratic Party has utterly failed to develop, but which we promise to give to the country.

TARIFF.

The Republican Party stands now, as always, in the fullest sense for the policy of tariff protection to American industries and American labor and does not regard an antidumping provision as an adequate substitute.

Such protection should be reasonable in amount but sufficient to protect adequately American industries and American labor and so adjusted as to prevent undue exactions by monopolies or trusts. It should, moreover, give special attention to securing the industrial independence of the United States as in the case of dyestuffs.

Through wise tariff and industrial legislation our industries can be so organized that they will become not only a commercial bulwark but a powerful aid to national defense.

The Underwood tariff act is a complete failure in every respect. Under its administration imports have enormously increased in spite of the fact that intercourse with foreign countries has been largely cut off by reason of the war, while the revenues of which we stand in such dire need have been greatly reduced.

Under the normal conditions which prevailed prior to the war it was clearly demonstrated that this act deprived the American producer and the American wage earner of that protection which enabled them to meet their foreign competitors, and but for the adventitious conditions created by the war, would long since have paralyzed all forms of American industry and deprived American labor of its just reward.

It has not in the least degree reduced the cost of living, which has constantly advanced from the date of its enactment. The welfare of our people demands its repeal and the substitution of a measure which in peace as well as in war will produce ample revenue and give reasonable protection to all forms of American production in mine, forest, field and factory.

We favor the creation of a tariff commission with complete power to gather and compile information for the use of Congress in all matters relating to the tariff.

BUSINESS.

The Republican Party has long believed in the rigid supervision and strict regulation of the transportation and great corporations of the country. It has put its creed into its deeds, and all really effective laws regulating the railroads and the great industrial corporations are the work of Republican Congresses and Presidents. For this policy of regulation and supervision the Democrats, in a stumbling and piecemeal way, are undertaking to involve the Government in business, which should be left within the sphere of private enterprise and in direct competition with its own citizens, a policy which is sure to result in waste, great expense to the taxpayer and in an inferior product.

The Republican Party firmly believes that all who violate the laws in regulation of business should be individually punished. But prosecution is very different from persecution, and business success, no matter how honestly attained, is apparently regarded by the Democratic Party as in itself a crime. Such doctrines and belief choke enterprise and stifle prosperity. The Republican Party believes in encouraging American business, as it believes in and will seek to advance all American interests.

RURAL CREDITS.

We favor an effective system of rural credits as opposed to the ineffective law proposed by the present Democratic administration.

RURAL FREE DELIVERY.

We favor the extension of the rural free delivery system and condemn the Democratic administration for curtailing and crippling it.

MERCHANT MARINE.

In view of the policies adopted by all the maritime nations to encourage their shipping interests, and in order to enable us to compete with them for the ocean-carrying trade, we favor the payment to ships engaged in the foreign trade of liberal compensation for services actually rendered in carrying the mails, and such further legislation as will build up an adequate American merchant marine and give us ships which may be requisitioned by the Government in time of national emergency.

We are utterly opposed to the Government ownership of vessels, as proposed by the Democratic Party, because Government-owned ships, while effectively preventing the development of the American merchant marine by private capital, will be entirely unable to provide for the vast volume of American freights and will leave us more helpless than ever in the hard grip of foreign syndicates.

RAILROADS.

Interstate and intrastate transportation have become so interwoven that the attempt to apply two and often several sets of laws to its regulation has produced conflicts of authority, embarrassment in operation and inconvenience and expense to the public.

The entire transportation system of the country has become essentially national. We therefore favor such action by legislation or, if necessary, through an amendment to the Constitution of the United States as will result in placing it under complete Federal control.

ECONOMY AND A NATIONAL BUDGET.

The increasing cost of the National Government and the need for the greatest economy of its resources in order to meet the growing demands of the people for Government service call for the severest condemnation of the wasteful appropriations of this Democratic administration, of its shameless raids on the Treasury, and of its opposition to and rejection of President Taft's oft-repeated proposals and earnest efforts to secure economy and efficiency through the establishment of a simple businesslike budget system, to which we pledge our support and which we hold to be necessary to effect any real reform in the administration of national finances.

CONSERVATION.

We believe in a careful husbandry of all the natural resources of the Nation—a husbandry which means development without waste; use, without abuse.

CIVIL-SERVICE REFORM.

The civil-service law has always been sustained by the Republican Party, and we renew our repeated declarations that it shall be thoroughly and honestly enforced and extended wherever practicable. The Democratic Party has created since March 4, 1913, 30,000 offices outside of the civil-service law at an annual cost of $44,000,000 to the taxpayers of the country.

We condemn the gross abuse and the misuse of the law by the present Democratic administration and pledge ourselves to a reorganization of this service along lines of sufficiency and economy.

TERRITORIAL OFFICIALS.

Reaffirming the attitude long maintained by the Republican Party, we hold that officials appointed to administer the government of any Territory should be bona fide residents of the Territory in which their duties are to be performed.

LABOR LAWS.

We pledge the Republican Party to the faithful enforcement of all Federal laws passed for the protection of labor. We favor vocational education; the enactment and rigid enforcement of a Federal child-labor law; the enactment of a generous and comprehensive workman's compensation law, within the commerce power of Congress, and an accident compensation law covering all Government employees. We favor the collection and collation, under the direction of the Department of Labor, of complete data relating to industrial hazards for the information of Congress, to the end that such legislation may be adopted as may be calculated to secure the safety, conservation, and protection of labor from the dangers incident to industry and transportation.

SUFFRAGE.

The Republican Party, reaffirming its faith in government of the people, by the people, and for the people, as a measure of justice to one-half the adult people of the country, favors the extension of the suffrage to woman, but recognizes the right of each State to settle this question for itself.

Such are our principles, such are our purposes and policies. We close as we began. The times are dangerous and the future is fraught with perils. The great issues of the day have been confused by words and phrases. The American spirit, which made the country and saved the Union has been forgotten by those charged with the responsibility of power. We appeal to all Americans, whether naturalized or native born, to prove to the world that we are Americans in thought and in deed, with one loyalty, one hope, one aspiration. We call on all Americans to be true to the spirit of America, to the great traditions of their common country, and above all things, to keep the faith.

*Miscellaneous.*

The first presidential election occurred January 7, 1789. The first Wednesday of February following the electors made choice for President and Vice President, and their votes were counted April 6.

Three States out of the 13 did not vote, viz: New York, which had not passed an electoral law; and North Carolina and Rhode Island, which had not ratified the Constitution.

Jefferson and Burr received an equal number of electoral votes; there being no choice, the House of Representatives proceeded to choose a President in the manner prescribed at that time by the Constitution. (Art. II, sec. 2.) On the thirty-sixth ballot, the votes of New York, New Jersey, Pennsylvania, Virginia, North Carolina, Georgia, Tennessee, Kentucky, Vermont, and Maryland (10 States) were cast for Thomas Jefferson; the votes of New Hampshire, Massachusetts, Connecticut, and Rhode Island (4 States) for Aaron Burr; and South Carolina and Delaware (2 States) blank. Thomas Jefferson having received the votes of a majority of the States was thereby elected President and Aaron Burr Vice President of the United States for the term beginning March 4, 1801.

Maine formed part of Massachusetts. On admission to the Union was declared (by act of Congress, Apr. 7, 1820) entitled to seven Representatives, to be taken from Massachusetts.

An elector (ex-Governor and ex-United States Senator William Plumer) of New Hampshire cast the only vote against James Monroe out of disapproval of his first term of service, and *not*, as generally accredited, to prevent him from sharing with Washington the honor of a unanimous election. He said: "There is not one act of my official life on which I reflect with more satisfaction than that of withholding from him (Monroe) my vote as an elector. In politics I am not bound by the shackles of party, nor in religion by the chains of sectarianism."

In this campaign there were no recognized parties; the presidential election became a personal contest. Jackson, Adams, Crawford, and Henry Clay were the candidates. On February 9, 1825, the two Houses assembled and proceeded to the counting of the votes for President and Vice President. It was found that John Cadwell Calhoun had received a majority of the whole number of votes for the Vice Presidency, and was therefore declared to have been elected Vice President of the United States for the term beginning March 4, 1825. No candidate for the

Presidency having received a majority, the Senators withdrew; the House of Representatives then proceeded to the choice of a President from the three highest. On the first ballot John Quincy Adams was chosen, receiving the votes of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, Vermont, New York, Maryland, Ohio, Kentucky, Illinois, Missouri, and Louisiana (13 States); Andrew Jackson received the votes of New Jersey, Pennsylvania, South Carolina, Tennessee, Alabama, Mississippi, and Indiana (7 States); those for William Harrison Crawford were Delaware, Virginia, North Carolina, and Georgia (4 States). The Speaker declared Adams to have been elected President of the United States, and notice of the result was sent to the Senate.

Eleven seceding States, within the belligerent territory, did not vote. A joint resolution approved February 8, 1865, declared that they were not entitled to representation in the Electoral College.

Three seceding States were disfranchised because they had not complied with the conditions of Congress for readmission. A joint resolution approved July 20, 1868, excluded from the Electoral College votes of States which shall not have been reorganized.

All the States were represented in the Electoral College, May 23, 1872.

Seventeen votes rejected by Congress, viz, 6 from Arkansas because the seal of the State was not affixed; 8 from Louisiana on account of two returns having been received, and 3 from Georgia for Horace Greely, who died November 29, 1872, before the votes were cast.

A dispute having arisen over the electoral votes from Florida, Louisiana, Oregon, and South Carolina, they were by Congress referred to the "Electoral Commission" for decision as to their validity, which decided the votes to be Republican. The President of the Senate then declared that Rutherford B. Hayes, of Ohio, having received a majority of the whole number of electoral votes, is duly elected President and that William A. Wheeler, of New York, is duly elected Vice President of the United States for four years, commencing on the 4th day of March, 1877. This was the first count on the part of Congress, regulated by general law, in the history of the Government under the Constitution.

Absentees, and vacancies caused by death, in the Electoral College, viz, 1789, Maryland 2, Virginia 2; 1792, Maryland 2, Vermont 1; 1808, Kentucky 1; 1812, Ohio 1; 1816, Delaware 1, Maryland 3; 1820, 1 elector in each of the States of Mississippi, Pennsylvania, and Tennessee died between appointment and the meeting of the electors; 1832, Maryland 2; 1864, Nevada chose 3 electors, 1 died before the election.

PRESIDENTIAL SUCCESSION.

Upon the death of the President, the Vice President succeeds to the office. (Constitution, Art. II, sec. 5.)

Record of succession: Harrison, by John Tyler, April 4, 1841; Taylor, by Millard Fillmore, July 9, 1850; Lincoln, by Andrew Johnson, April 15, 1865; Garfield, by Chester Alan Arthur, September 19, 1881; McKinley, by Theodore Roosevelt, September 14, 1901.

Succession: In case of removal, death, resignation, or inability both of the President and Vice President: Secretary of State, Secretary of the Treasury, Secretary of War, Attorney General, Postmaster General, Secretary of the Navy, Secretary of the Interior. (Act of Jan. 19, 1886, 24 Stat., 1.)

The Department of Agriculture and Department of Commerce and Labor were organized after the passage of the presidential succession act.

ORGANIZATION OF POLITICAL PARTIES WHICH HAVE ELECTED PRESIDENTS.

1. *Federal, 1787–1816.*—Formed from the Strong Government, or Constitutional Party.

2. *Democratic-Republican, 1792–1828.*—Formed from the Anti-Federal (1787–1793), the Republican, or Jefferson Party (1791–1793), and Democrats or sympathizers with the French Revolutionists (1791–1793).

3. *Coalition, 1825.*—Formed from a union of the supporters of Henry Clay with those of John Quincy Adams.

4. *Democratic, 1828.*—The Democratic-Republican Party divided into four parts in the campaign of 1824, and never reappeared again in a national contest. The Democratic and National-Republican Parties were constructed out of its ruins, and perfected organizations.

5. *Whig, 1834–1854.*—Formed from a union of the National-Republicans, the Nullifiers, extreme States' Rights men, Anti-Masons, and the personal opponents of President Jackson.

6. *Republican, 1854.*—Formed from the greater part of the Northern Whigs, Free-Soilers—both of Democratic and Whig antecedents—Anti-Nebraska Democrats, and anti-slavery men of the Democratic Party—on the issues of the slave question.

ORGANIZATION OF MINOR PARTIES WHICH HAVE CHOSEN ELECTORS.

7. *Opposition, 1820.*—One elector in New Hampshire voted against his party candidate.

8. *National-Republican, 1825–1834.*—Formed from a union of the Adams and Clay factions.

9. *Independent, 1832.*—South Carolina chose electors pledged to candidates of her own. In 1872, one "Liberal Republican" elector in Missouri voted for an Independent—David Davis.

10. *Anti-Masonic, 1826–1834.*—Formed from opponents of Freemasonry.

11. *American (Know-Nothing), 1852–1860.*—Formed from members of other parties dissatisfied with the influx and power of the foreign element.

12. *Breckinridge Democrats. 1860.*—Formed from southern Democrats. Their platform avowed a purpose to carry slavery into the Territories.

13. *Constitutional Union, 1860.*—Formed from the relics of the Whigs and Know-Nothings, and Democrats declaring their political principles to be "The Constitution of the country, the union of States, and enforcement of the laws."

19. *People's (Populist), 1891.*—The legitimate successor of the following parties: Greenback, 1874; became National Greenback, 1878; became Union Labor, 1887. These various elements uniting with the "Farmers' Alliance" formed the People's, or Populist, Party.

HOW THE ELECTORS ARE CHOSEN AND THE WAY CONGRESS COUNTS THE VOTES GIVEN FOR PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES.

The President and Vice President of the United States are chosen by officials (in each State) termed "electors," who are, under existing State laws, chosen by the qualified voters thereof by ballot on a general State ticket on the first Tuesday next succeeding the first Monday in November in every fourth year preceding the year in which the presidential term expires.

The *electors* equal the whole number of Senators and Representatives to which the State may be entitled in Congress. (Constitution, Art. II, sec. 1.)

The governors of States are required to send a certificate as to the ascertainment of electors to the Secretary of State of the United States, who publishes in such newspaper as he shall designate such certificate in full; and at the first meeting of Congress thereafter he transmits to the two Houses of Congress copies of each and every such certificate received theretofore at the State Department. (Act of Congress, Feb. 3, 1887.)

The *electors of each State meet* on the second Monday in January next following their appointment, at such place as the State legislature may direct, and cast their votes.

The *electors sign two certificates* of all the votes given by them, each of which certificates must contain two distinct lists, one of the votes for President, the other for Vice President; lists to be sealed and sent forthwith to the President of the United States Senate, at the seat of Government, one by mail and one by messenger, accompanied by a certificate (triplicate) duly executed by the governor of the respective State, which shall set forth the names of the electors and the number and division of votes cast. (Constitutional Amendment XII, and act of Congress, Feb. 3, 1887; also Constitution, Art. II, sec. 3.)

*Congress shall be in session* on the second Wednesday in February succeeding every meeting of the electors. The Senate and House of Representatives shall meet in the Hall of the House at 1 o'clock p. m. on that day, and the President of the Senate shall be their presiding officer. That at such joint meeting of the two Houses seats shall be provided as follows: For the President of the Senate, the Speaker's chair; for the Speaker, immediately upon the left; the Senators, in the body of the Hall upon the right of the presiding officer; for the Representatives, in the body of the Hall not provided for the Senators; for the tellers, Secretary of the Senate, and Clerk of the House of Representatives, at the Clerk's desk; for the other officers of the two Houses, in front of the Clerk's desk and upon each side of the Speaker's platform. Such joint meeting shall not be dissolved until the count of electoral votes shall be completed and the result declared. Two tellers shall be previously appointed on the part of the Senate and two on the part of the House, to whom shall be handed, as they are opened by the President of the Senate, all the certificates and papers purporting to be certificates of the electoral votes, which certificates and papers shall be opened and acted upon in the alphabetical order of the States; and said tellers, having then read the same in the presence of the two Houses, shall make a list of the votes as they shall appear from the said certificates; and the votes having been ascertained and counted, the result of the same shall be delivered to the President of the Senate, who shall thereupon announce the state of the vote, which announcement shall be deemed a sufficient declaration of the persons, if any, elected President and Vice President of the United States, and, together with a list of the votes, be entered on the journals of the two Houses; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a Member or Members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if no person have a majority of votes for Vice President, then from the two highest numbers on the list the Senate shall choose the Vice President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. (Act of Congress, Feb. 3, 1887, and Amendment XII, Constitution. For procedure on objections, incorrect returns, etc., see secs. 4 to 7, act of Feb. 3, 1887, and Constitutional Amendment XII.)

Before the twelfth amendment to the Constitution was declared in force (Sept. 25, 1804) each elector voted (under the original clause of the Constitution, Art. II, sec. 1, par. 3) for two candidates for President; the candidate having the greatest number of electoral votes (if a majority of the whole) became President and the one having the next greatest number Vice President.

The acts of Congress executory of the electoral system are as follows: The resolve of Congress September 13, 1788 (Journals of Congress, vol. 4, 1823 ed., 866), provided for appointing electors and fixed the day they should assemble in their respective States and vote for a President; act of March 1, 1792 (1 Stat., 239), provided for election of President and Vice President and temporary filling of vacancies; act of March 26, 1804 (2 Stat., 295), supplementary provision for election of President and Vice President and temporary filling of vacancies; act of January 23, 1845 (5 Stat., 721), established a uniform time for the electors to vote for President and Vice President; joint resolution of February 8, 1865 (13 Stat., 567), declaring certain States not entitled to representation in the Electoral College; joint resolution of July 20, 1868 (15 Stat., 257), excluding from the Electoral College votes of States lately in rebellion which shall not have been reorganized; act of May 23, 1872 (17 Stat., 157), fixes a uniform time for holding elections for electors of President and Vice President; act of January 29, 1877 (19 Stat., 227), created an electoral commission for counting the votes for President and Vice President for the term commencing March 4, 1877; act of February 3, 1887 (24 Stat., 373), fixes the day for the meeting of the electors, and provides for the counting of the votes for President and Vice President, and the decision of questions arising thereon; supplementary act of October 19, 1888 (25 Stat., 613), provides for sending a special messenger for any certificate of electoral votes not duly received.

*Membership and ratio under each apportionment.*

| Apportionment. | Year. | Members. | Ratio. |
|---|---|---|---|
| Constitution | 1789 | 65 | 30,000 |
| First Census | 1793 | 106 | 33,000 |
| Second Census | 1803 | 142 | 33,000 |
| Third Census | 1813 | 186 | 35,000 |
| Fourth Census | 1823 | 213 | 40,000 |
| Fifth Census | 1833 | 242 | 47,700 |
| Sixth Census | 1843 | 232 | 70,680 |
| Seventh Census | 1853 | 237 | 93,423 |
| Eighth Census | 1863 | 243 | 127,381 |
| Ninth Census | 1873 | 293 | 131,425 |
| Tenth Census | 1883 | 332 | 151,911 |
| Eleventh Census | 1893 | 357 | 173,901 |
| Twelfth Census | 1901 | 391 | 194,182 |
| Thirteenth Census | 1911 | 435 | 211,877 |

*Presidents of the United States.*

| No. | Name. | Born. | Inaugurated. | Term of office. | Died. | Native of— | Residence when elected. | Political party. |

## The Direct Vote.

### EXTENSION OF REMARKS
OF
### HON. FINLY H. GRAY,
OF INDIANA,
IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr. GRAY of Indiana. Mr. Speaker, on August 11 I introduced a House joint resolution to vest greater power and control in the people by the direct vote over the Federal Constitution.

The Constitution now provides for the initiation and ratification of amendments by State legislature and conventions. This resolution, while leaving these provisions in force, would provide an additional mode for the initiation and ratification of amendments and would empower and authorize Congress to propose amendments for ratification by the direct vote of the people whenever applicable or called for by popular demand.

I here include the resolution as a part of my remarks:

Joint resolution (H. J. Res. 294) proposing an amendment to the Constitution of the United States.

*Resolved, etc.*, That the substitution of the following in place of Article V is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE V.

"The Congress shall propose amendments to this Constitution whenever two-thirds of both Houses deem it necessary, or whenever two-thirds of the several States make application therefor, such application being made in any State either by its legislature or by vote of a majority of the electors voting on the question, and shall call a convention for proposing amendments whenever the legislatures of two-thirds of the several States make application therefor. Amendments shall be valid to all intents and purposes, as part of this Constitution, when ratified by the legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, or by the electors in three-fourths thereof, whichever mode of ratification may be proposed by Congress: *Provided*, That no State, without its consent, shall be deprived of its equal suffrage in the Senate. A ratification of an amendment, if made in any State by vote of the electors thereof, shall be made at an election of representatives by a majority of the electors qualified to vote for representatives and voting on the question of ratification. In such case the taking of the vote shall, unless provided for by the State, be in the manner provided by the Congress."

Originally all power was vested in the people by natural right for their exercise by the direct vote. But in the organization of the Government, through the adoption of the Constitution, the people, for convenience and facility of action, surrendered and delegated a part of such power vested in them over to legislative bodies, courts, and administrative officials. The people

reserved to themselves what they believed was sufficient power and which was at that time sufficient power to retain their direction and control of public affairs. But since the organization of the Government and the adoption of the national Constitution new social, industrial, and economic conditions have arisen, among which are the combinations of capital, the concentration of wealth, and the organization of great special interests. The corporation has become a rival of the Government itself, an overshadowing power to influence and direct legislation and dictate the administration of public affairs. Great federations of financial, industrial, and commercial organizations have become dominant factors in the control of the fiscal policies of the Government.

Under these new and changed industrial conditions the power which the people had reserved to themselves as sufficient to direct and control the administration of their Government has been found insufficient and inadequate for that purpose. To meet this new and changed order of things, to resist the encroachment of corporations, the concentration of wealth and the combinations of capital, and to restore the power of the people to direct legislation and control public affairs, the necessity is fast coming to be realized, not only to preserve the direct power originally reserved to the people, but to recover to them a measure of the power so surrendered and delegated to legislative bodies, courts, and administrative officials for exercise by the people themselves, through the direct vote.

One of the powers originally vested in the people and surrendered to the State legislature on the adoption of the Constitution was the power of the election of United States Senators. The indirect power reserved by the people in the election of the members of State legislatures, who were empowered to elect Senators, was sufficient to hold the Senate responsive to popular will until the development of these new and changed industrial conditions, the combinations of capital, the concentration of wealth, and the organization of great special interests. Under these new and changed conditions the United States Senate was fast becoming an exclusive, aristocratic, and autocratic body, unresponsive to the will of the people. The proceedings of this branch of Congress were being characterized as "the treason of the Senate" and with other appellations signifying disloyalty and disregard for popular will. Then the necessity for the recovery by the people of power to themselves for exercise by the direct vote was finally and fully realized and the amendment to the Federal Constitution providing for the election of United States Senators by direct vote was adopted.

That the people have not mistaken their remedy in resorting to the direct vote to meet these changed conditions and to recover to themselves the power to better direct legislation and control the administration of government is proven by the effect of the change from State legislatures to the direct vote in the election of United States Senators. Even before this amendment providing for the election of United States Senators by the direct vote of the people had become effective and in anticipation of such change alone, the United States Senate took on a new and changed policy and suddenly became more progressive than the House of Representatives.

This movement for the recovery of greater and more positive power to the people for their exercise by the direct vote, and upon their own initiative, embodies the basic and fundamental principles of what is commonly known to-day as progressive policies of government, the first and initial step of which has already been taken in the restoration of power to the people in the election of United States Senators. This step will be followed by others in the recovery of power by the people for exercise by the direct vote until these new conditions are met and legislative bodies and administrative officials have again become responsive to the will of the majority.

Another power no less vested in the people by natural right and surrendered by them to State legislatures and conventions, on the adoption of the Constitution, was the power to alter, change, and amend their constitution. While amendments to the Constitution are less frequent before the country for determination than the election of United States Senators and legislative officials, yet they are of more vital concern and of more serious import to the general welfare and ultimate public interest. The authorization of this additional mode of initiation and ratification of amendments to the Federal Constitution is imperative under these new and changed social, economic, and industrial conditions, and the discretionary power to be vested in Congress by the resolution is a step none too far advanced now to be taken.

But, other than new social, economic, and industrial conditions, there are changes in the policy of the Government itself which make the exercise of a greater measure of power by the direct vote of the people imperative. The power and jurisdiction to be exercised by the General Government, and which the framers of the Constitution originally intended to vest in the General Government, were limited to matters as between the different States, as between the citizens of different States, as between the different States and the Nation, as between the Nation and foreign States, and all matters relating to the general policy of the States acting as a whole and of such general effect and concern to the whole people as to preclude action by each or any State acting separately or independently of others, and as specifically conferred by the Constitution upon the General Government. Jurisdiction over other matters were intended to be reserved for exercise under State constitutions and the direct vote. The extent of the power and jurisdiction which the General Government has since assumed was never contemplated. It was never dreamed that such power and jurisdiction would be expanded and enlarged to embrace matters of local effect and concern in the everyday and business affairs of the people.

As the General Government was only intended to serve the people as States and bodies of men, and not to affect them as individual citizens in matters of local concern or in the everyday and business affairs of life, the necessity for the ratification of such amendments by the people, acting in their individual capacity and under the exercise of the direct vote, was not realized or considered. With the power and jurisdiction of the General Government expanding and reaching out to concern the people more directly, their direct power for control must be correspondingly enlarged to maintain a proper equation with the power to be exercised by the Government.

With the right of the direct vote in the States for the ratification of amendments to the State constitutions and the diminishing power of the States and the growing, enlarging, and ever-increasing jurisdiction of the Central Government, where no direct vote is provided for in the ratification of amendments to the Federal Constitution, the effect of submitting amendments to the Federal Constitution where the question can be determined by the people under their State constitution is to take that question away from the people and the direct vote and vest it in the control of the State legislature instead.

While this resolution which I have introduced seeks only to extend the direct vote for the initiation and ratification of amendments to the Federal Constitution and at the discretion of Congress proposing the same, I wish to refer to the necessity for enlarging the exercise of the direct vote in other matters of government, as illustrative of the change of conditions and Federal policy and the principle for which I contend.

Another power vested in the people and surrendered to be exercised as a part of the appointive power was the power of election of administrative officials. In addition to the reasons existing for the recovery to the people of the power of election of United States Senators by the direct vote, other and equally potent reasons exist for the direct election of many officials of the Government now appointed by the Executive. When the appointive power was vested in the President on the adoption of the Constitution, the growth and extent which the Federal jurisdiction has assumed was not contemplated or dreamed of. The enlarging functions to be performed, the multiplying appointments to be made, and the overshadowing power of the Executive office was never in any manner apprehended. Such a concentration of power and centralization of authority as now exists in the Executive by reason of the Constitution was never in any manner considered by the framers of that instrument, and would never have been authorized if even faintly realized by our forefathers.

Many of the activities of the General Government administered by officials appointive by the President as closely and intimately affect and concern the people as their own local governments administered by officials elected by the direct vote of the people themselves. This ever-growing and extending Federal jurisdiction and the increasing activities of the General Government in the everyday affairs of the people administered under Executive appointments make a readjustment and limitations of the appointive power of the President imperative to prevent the concentration and overshadowing power of that office, a necessity fast becoming realized. When the appointment of all postmasters was vested in the President the activities of the Postal Department and the close relations of the postmaster with the people and their everyday business affairs as realized to-day were not even faintly in the minds of the framers of the Constitution.

As the jurisdiction of the General Government broadens its power must be in the same ratio decentralized and brought closer to the people for their better and more effective direction and control. The people in time must recover to themselves the power to elect by their direct vote many officials, now appointive,

who direct the activity of the General Government in their local affairs. While no Executive has ever taken advantage of this power for abuse, the power exists to be abused. The test of a safe repository or distribution of power is not what good men will use it for, but what use bad men may make of it.

When the Federal Constitution was adopted by our forefathers, vesting in Congress the full power to declare war, defense—"to provide for the common defense"—was the only object for which war was contemplated. War for the vanity of world power, control of the seas, and the acquisition of foreign territory for exploitation; war to open markets and the enforcement of conscienceless contracts entered into with unsuspecting natives and their Governments; war for profits in preparedness, were not in the minds of the framers of the Constitution. They did not foresee the growth and developments of the country along social, industrial, and economic lines, nor the combinations of capital, the concentration of wealth, and the organization of great special interests, nor realize the influences which would be brought to bear for war and for policies which lead to war and call for war in their support. The time has come when the Government should be brought closer to the people for the exercise of more direct and positive power by them relative to war, when the Constitution should be amended, and the power to declare war, now vested in Congress, should be limited to war for the one purpose of common defense, as originally intended, and when the people who must pay the cost and do the fighting should recover to themselves for exercise by direct vote the power to declare war for other purposes.

I do not only believe in the fundamental principle and natural right of the people to exercise direct power in the control of their Constitution and the administration of public affairs, but I have full confidence in the wisdom of the multitude and the ability of the masses to exercise self-government. We hear it said in opposition to the direct vote that the people would be liable to act without full information and proper advisement. Grant this as true, the same objection could be urged with equal force against legislative bodies, as many Members vote not upon their own information or advisement but by following others who claim a superior knowledge of the facts. It is true that men may make mistakes, but it is also true that a man does not make as many mistakes against himself as others are liable to make against him, and it is also true that if he does make such mistakes he is more liable to correct them than others would be to correct them against him.

It is true that some men are wiser than other men, that some men are better informed than other men, that some men are more experienced and better trained than other men; but no man is so much wiser than another man or so much better informed than another man or so much more experienced or better trained than another man that he is entitled to be given the right to think or act for another man, nor the power to govern another man, nor to tell another man what is good for him, nor what that other man likes best, nor how he loves to live, nor how he should enjoy life, liberty, or the pursuit of happiness.

While some men claim that only the special few know how to direct the Government and to conduct public affairs, yet whenever one of these special few passes away the world is found to move on without him, and men are found who are able to conduct public affairs in even a better way than those in whom it was claimed that all political wisdom rested. And while some men claim in justification of the right of the few to govern the many that the few do what is best for their fellow man and better than their fellow man could do for himself, this is a subterfuge as old as history. Every man who has enslaved another man has enslaved him under the claim that it was to better the condition of the enslaved. Every nation which has conquered and subjugated a defenseless people has conquered and subjugated them under the claim that it was to improve the condition of the subjugated.

You will hear the claim that the people themselves do not know enough to select good public officials and that popular election of such officials is a failure and that such selection of public servants can be better made by the representatives of the people than by the people themselves. Unfortunately for this argument, we have a practical example before us. The Federal Constitution provided for the election of United States Senators by the State legislatures; but after trial and experience it was found that under the election of United States Senators by legislatures the United States Senate had become filled with men who represented themselves and their business associates more efficiently than the people whom it was intended they should represent. By reason of this discovery the Federal Constitution was amended, taking the power away from State legislatures for the election of United States Senators and placing the same in the control of the direct vote of the people.

## "Catching the Labor Vote."

### EXTENSION OF REMARKS
OF
### HON. J. HAMPTON MOORE,
OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr. MOORE of Pennsylvania. Mr. Speaker, somebody close to the White House has been muddying the waters. The exigencies of the campaign have made it advisable for somebody to get busy in order that the public mind may be diverted from the failure of the low-tariff law and the necessity for increasing the direct taxes in order that the Government may thrive. The administration has created 30,000 new positions in various departments, commissions, and boards, but this, of course, has not reduced the expenses of the Government, nor wiped out the Republican charges of extravagance. The European war has been worked to death as a saving cause and "he kept us out of war" is beginning to pall on those who hear it. The Mexican situation has been unfortunate from start to finish and the great mass of voters, who are interested in the young men who were corralled through the National Guard for service on the frontier, are beginning to ask the War Department unpleasant questions. The vigorous campaign launched by the Republican candidate, Mr. Hughes, has also been distressing to the administration. Therefore, the time has arrived for a strike, not necessarily a railroad strike, but something in the nature of political "pep" to induce the public to forget what has been done to it by an administration that promised to relieve it of all the ills from which it suffered.

QUESTIONS FOR DESPAIRING DEMOCRATS.

"What shall we do to prove that we are not too proud to fight? What shall we do to satisfy the pacifists and to appease the hyphenates? What shall we do to throttle the whole Mexican business? But more than all, how in the world can we get rid of the 'Banquo's ghost' of incompetence and extravagance?" These are questions that might fairly have been considered by any Democratic conference interested in the reelection of the Democratic President. Let us suppose that such a conference was on, and that the distinguished chairman of the Democratic campaign committee, the Hon. Vance C. McCormick, of Pennsylvania, had said to the standard bearer of his party, "Give me the Director of the Mint (Mr. Woolley) and the First Assistant Postmaster (Mr. Roper) and we will start a publicity campaign that will induce the public to get over its grouch about taxes and talk of something else. There is the dispute now pending between the railroads and the brotherhoods—why not send in the Board of Mediation and Conciliation and scare the country into the notion that we are to have a strike? That will appeal to the shippers and the consumers, to the grocers and to the mothers who have to buy milk for their babies. When the Board of Mediation advances sufficiently to have the White House take the matter over, let us so arrange it that all the world can see that he who has been so adroit in 'keeping us out of war' can save us against the calamity of a Nation-wide strike. If we can pull off so clever a trick, think of the avalanche of high-minded citizens who will rush to the standard of the Democratic Party. Think of the effect upon union labor. If we can cinch this movement with the aid of our friend, Mr. Gompers, we are dead sure of 400,000 votes. And think what it means to win the plaudits of the multitude, who will continue to receive, even at the present high cost of living, the eggs, the potatoes, the cauliflower, and the baby's milk that would have been taken away from them if our standard bearer had not stepped into the breach."

WHAT THE PRESIDENT SAID.

I do not know whether any such conference actually occurred, but I do know that the ardent supporters of the national chairman, Mr. McCormick, have been claiming laurels for the President for taking up the cause of union labor and establishing an eight-hour day by law. It is common knowledge, also, that whether the plan outlined as above was actually a matter of conference or not, the President came into the House of Representatives on August 29—about the time Mr. Hughes, the Republican candidate for President, was talking of Mexico and revenue deficiencies and things of that kind, in his tour of the West—and, despite all that has been said about "Democratic prosperity," told the assembled Senators and Representatives that he had conceded an eight-hour day to the railroad brotherhoods, but

that nevertheless a strike was impending. Listen to what the President said:

The 400,000 men from whom the demands proceeded had voted to strike if their demands were refused; the strike was imminent; it has since been set for the 4th of September next. It affects the men who man the freight trains on practically every railway in the country. The freight service throughout the United States must stand still until their places are filled, if, indeed, it should prove possible to fill them at all. Cities will be cut off from their food supplies; the whole commerce of the Nation will be paralyzed; men of every sort and occupation will be thrown out of employment; countless thousands will in all likelihood be brought, it may be, to the very point of starvation, and a tragical national calamity brought on, to be added to the other distresses of the time, because no basis of accommodation or settlement has been found.

SECURED A CHANGE OF SUBJECT.

Unfortunate as it might have been that an administration which brought so much "Democratic prosperity" to a Nation should be compelled to admit "a tragical national calamity" in addition to "the other distresses of the time," the message of the President was sufficient to raise a doubt in the minds of many as to whether, in coming to Congress after his failure as mediator, the standard bearer of the Democratic Party was as true a friend of union labor as his one-sided determination of the question in controversy might lead one to believe. But the incident, the rather spectacular incident, of the President's appearance in Congress was sufficient to attract the attention of the Nation and to fill the newspapers with columns of material which had no reference to the unfortunate Mexican situation or to the deplorable condition of the Treasury. It may not have been known, even to the President or to Mr. McCormick, although it must have been known to Mr. Gompers, who has aligned himself with the Democratic standard bearer in this campaign, that the American Federation of Labor, itself the strongest existing organization of the kind, with which the railroad brotherhoods are affiliated, has not been in favor of establishing an eight-hour day by law. I know that such a statement may be embarrassing to gentlemen who voted on the President's recommendation for an eight-hour day for the railroad brotherhoods, but the fact remains that organized labor to-day, while it approves the eight-hour principle, which most of us approve as a principle, is opposed to legislative interference in matters affecting hours and wages. Those who think they have curried favor with organized labor by voting for this eight-hour proposition, as recommended by the President, have been drawn into an error. Organized labor is on record as favoring eight hours for labor as a matter wholly within the judgment of the unions, and is not in favor of relinquishing that right to the legislature. Thus we are able to puncture the claims of the national Democratic chairman and of the White House if they lay up to the Democratic Party any particular glory for the passage of an eight-hour bill by the National Congress, which sooner or later will involve the very existence of the labor organizations of the United States.

JUMPING ON MR. HUGHES.

But, Mr. Speaker, these remarks which I am thus permitted to extend are made for the purpose of adding to the political history of the times a short chapter that will bear reading. The national chairman of the Democratic Party, Mr. McCormick, ignoring for the moment whatever advantage may have been attained through muddying the waters on the strike situation, has awakened sufficiently to take note of the sledge-hammer blows of the Republican candidate, now "somewhere in Colorado." A New York dispatch this morning brings us the following deliverance from the national chairman:

NEW YORK, *September 1.*

Chairman Vance McCormick, of the Democratic national committee, referred to the action of presidential candidate Charles E. Hughes in congratulating Gov. Johnson, of California, for his success at the primaries, in a caustic manner to-day. He said:

"Mr. Hughes's act in congratulating Gov. Johnson, the California Progressive leader, upon his nomination for United States Senator, is typical of the Republican candidate. When a word of recognition might have proved helpful to the Progressive candidate Mr. Hughes was silent. Mr. Hughes's belated recognition of Gov. Johnson smacks of his attitude toward woman suffrage."

It will be observed that Mr. McCormick, being now in the public eye and subject to fair criticism, accuses the Republican candidate of inconsistency. He thinks the Republican candidate may not mean what he says. Making allowances for the right of the Democratic candidate to be as inconsistent as he pleases, and to change the Democratic platform pledges at his own sweet will, what are we to say about the labor attitude of the distinguished chairman of the national campaign committee in view of the fine "Roman hand" that has just manipulated the railroad-strike situation to capture at one fell swoop the entire 400,000 votes of the members of the railway brotherhoods? If a presidential candidate can denounce organized labor as a college professor, and being a candidate for second term can so befuddle the political situation as to fool 400,000 intelligent railroad men that they must fall in for him like a flock of sheep, what are we to say of the premier of the campaign, who can take down the union label from his newspaper, and, as mayor, veto an ordinance advancing the pay of laborers 1¾ cents an hour, and then blossom forth as a champion of labor and the rights of the downtrodden in order that the Democratic Party may be saved? If the facts be as stated, it is fair political capital.

INTRODUCING THE DEMOCRATIC NATIONAL CHAIRMAN.

The Democratic national chairman is a Princeton man, just as the Democratic standard bearer is. In days gone by he had positive views upon the question of labor. When he ran for governor of Pennsylvania on the Wilson platform members of his own party—Democrats—took great pains to have their gubernatorial candidate expound his views upon labor. Some of them even tried to convince the President that the candidate for governor could not win, as he did not, because of his labor record. It may be recalled that his running mate for United States Senator, our former colleague, Mr. A. Mitchell Palmer, a loyal supporter of the President, also did not win.

Whether the labor record of Mr. McCormick had all to do with this inglorious battle I do not know, but as Democrats made more use of the national chairman's labor record than the Republicans did I assume it had something to do with the result. What Mr. McCormick's own party men advanced against him as a candidate for governor was the purchase by him of the Harrisburg Patriot and the taking down, when he took charge, August 1, 1902, of the union label, which the former owner, D. A. Orr, had kept at the top of the editorial column until July 31, 1902. These Democratic critics of Mr. McCormick reproduced in facsimile the first editorial under the new management, bearing the signature of "Vance C. McCormick," in which he said:

In politics it [the Patriot] will be Democratic, representing the highest principles and best traditions of that party, but endlessly free from the control of any political faction or of any power, corporation, or individual which conflicts with the public good.

which high-sounding pledge was interpreted to mean that "labor unions must go" from the Patriot office.

A LABOR-ORDINANCE VETO.

Evidently the opponents of the gubernatorial candidate were not inclined to accept Mr. McCormick as a friend of labor. He had been elected mayor of the city of Harrisburg on the Democratic ticket. Like all other mayors, he ran up against the labor problem. The issue was as to whether the wages of the ordinary laborers working for the city should be kept at 15 cents per hour for nine hours a day or be advanced on a nine-hour basis to 16⅔ cents per hour, a total of $1.50 per day. An ordinance was passed by council making this advance of 1¾ cents per hour in the laborers' pay, but the mayor vetoed the bill. The veto message, which is taken from the campaign records of the period, is appended hereto:

CITY OF HARRISBURG, EXECUTIVE DEPARTMENT,
*January 25, 1905.*

To the PRESIDENTS AND MEMBERS OF SELECT AND COMMON COUNCILS.

GENTLEMEN: I herewith return without my executive approval an ordinance entitled "An ordinance amending section 1 of an ordinance entitled 'An ordinance fixing the wages of laborers employed by the different departments of the city.'"

The passage of this ordinance would effect an increase in the wages now paid ordinary laborers by the city and interfere with the proper work of the city departments, as the work is such that the heads of the departments should be free to regulate the hours of their employees as emergencies arise. These officials are held responsible for the proper performance of their duties, and they should not be restricted or interfered with unless the city's employees are not being fairly or justly treated, which is not now the case, as the present rate of 15 cents per hour is above the average rate of wages paid for ordinary labor in this locality, and it is not fair to the taxpayers of this city to increase that rate to 16⅔ cents per hour, as stated in the ordinance, which is considerably higher than the average wages paid by other employers; and considering the great number of applicants to the city departments for work, the wages now paid seem to be entirely satisfactory.

Respectfully, yours,

(Signed) VANCE C. MCCORMICK,
*Mayor.*

LABOR WILL NOT BE DECEIVED.

Political campaigns are curious things, in that they develop many phases of human character and understanding. The public is often stampeded by false moves merely because they are spectacular. Voters are sometimes deceived by false friends. The man in high place who has taken a positive stand on public questions is sometimes confronted with the necessity of convincing those whose support he courts that he did not mean what he said. The greatest play in politics is often made for "the labor vote." It is doubtful if "the labor vote" can be solidly controlled by any man or set of men.

The present campaign is no different from others in the desire of candidates to prove their friendship for labor, and

labor is no more likely to be deceived this year than it has been heretofore. The sudden appearance of the Democratic standard bearer as the voluntary mediator of a great strike when "other distresses" confronted him will be duly understood by the thinking men. Organized labor, if it is true to its own professions, will not misunderstand the legislative dodge that has just been "put over on it," and on election day will perform its full duty, as it usually does, each man according to his own convictions and with a full appreciation of the methods that are sometimes employed to deceive him.

## Imports, Exports, and Revenue Under Underwood Tariff Bill.

### EXTENSION OF REMARKS
OF
### HON. MARTIN D. FOSTER,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. FOSTER. Mr. Speaker, under the unanimous consent given me I desire to have printed in the RECORD remarks showing the imports, exports, and revenue under the Underwood tariff bill. The remarks are as follows:

GOLDEN HARVEST REAPED UNDER NEW TARIFF ACT—UNDERWOOD ACT ROOTS OUT PRIVILEGE AND MONOPOLY-BREEDING DUTIES—OPENS NEW MARKETS TO AMERICAN ENTERPRISE.

The Democratic tariff law has—

Increased American industrial and business efficiency by stimulating competition.

Enabled United States industry to import raw materials to be manufactured into finished products for export on a huge scale.

Assisted in making a new record for United States foreign trade, with a huge balance in our favor.

Lifted from the backs of the poor undue burdens of taxation.

Filled the workman's dinner pail from Maine to California.

Provided the largest customs revenue obtained from this source by any nation in the world.

Helped create, sustain, and distribute evenly the present unequaled prosperity of the country.

So will you now vote for a renewal of tariff agitation, which, as stated by Jacob H. Schiff, New York banker and lifelong Republican, is "the only thing that can stop the great prosperity we now have"?

The Democratic Party, led by Woodrow Wilson, has redeemed its pledge to revise the tariff on a sound basis in the interest of the consumer. The Underwood-Simmons Act is the most equitable tariff measure ever placed upon the statute books of the United States.

It remedies economic evil and injustice of long standing. It meets the Government's need as a revenue measure. And it has furnished definite and invaluable aid to the expansion of American over-seas commerce, which is now so important a factor in the present prosperity of the country.

Its companion measure, fortifying the Government to deal with any contingency growing out of the European war—the tariff-commission act—at this writing is about to become law.

In behalf of the masses of the American people and the prosperity of American business, the Underwood-Simmons Act has wiped out the discriminating and extortionate schedules of the iniquitous Payne-Aldrich law and placed the necessaries of life, raw materials, and unmanufactured articles on the free list or given them the advantages of the minimum rates of duty, while the maximum assessments have been levied upon the luxuries of life.

TAX BURDEN EQUALIZED.

The burden of taxation has been more nearly equalized, and for the first time in the history of the country wealth has been called upon to bear a fairer share of the cost of government.

Conceived and enacted free of all dictation by special interests and privileged classes, the law has liberated the people of the United States from the economic bondage in which they had so long been held by the tariff policy of the Republican Party—a policy having for its fundamental creed the encouragement of all the elements and evils of monopoly and oppression. To arm favored industries with the power to extort from the consuming American public $5 to $50 for every dollar collected as a protective duty at the customhouses has constituted the essence and chief effect of Republican tariffs.

Contrast the achievement of the Democratic Party in effectually reducing the tariff according to its platform pledge with the shameful and repudiated record of the Republican Party, which, in answer to the general and emphatic demand for a revision of the tariff downward, contemptuously gave the country in 1909 the abortive Payne-Aldrich Act—the rich man's tariff, written by and for selfish interests and privileged classes regardless of the great consuming masses of the United States. That tariff law and economic outrage flagrantly violated a solemn pledge to the Nation and was condemned by every fair-minded citizen, Democrat, Progressive, and Republican alike. It was the rock upon which the reactionaries and progressives of the Republican Party first split, culminating in the disruption of 1912.

A DEMOCRATIC DARE.

Would the Republican Party dare reenact the Payne-Aldrich law if given the opportunity?

Eliminating the abuses and injustices of the old high protective system, the Underwood-Simmons Act, by means of the income-tax section, has equalized taxation and lifted much of the burden from the shoulders of the poor and middle classes of our people and transferred it to the wealthy classes which have never paid their just share. Throughout its history the Republican Party has favored the tariff as the chief source of Government revenue because it afforded a means of "shoving the taxes along" to the ultimate consumer—putting them upon the overburdened backs of labor. The Democratic Party has always toiled in the interest of the ultimate consumer—the masses of the people of the United States—and by placing an income tax on wealth has been able to remove the duties from many articles of common necessity and to cause a material reduction of the rates on many articles of general use.

The income tax is constructive legislation that outweighs all the fiscal legislation of the 16 years of Republican rule. Would the Republican Party dare repeal it if given the opportunity?

A STIMULUS TO INDUSTRY.

Coupled with its benefit to the consuming public, the Underwood-Simmons Act has given a stimulus to our industries never before equaled in the history of the country. It has unfettered business and commerce, and permitted our industries, great and small, to compete with the world. In normal times it will not only be adequate as a producer of revenue, but it will increase the efficiency of American business, and will enable legitimate enterprise to prosper in the United States without the power to oppress the masses of the people with unreasonable and extortionate prices. While a friend of all legitimate business, the Democratic Party will never be willing to confer upon any industry the power to increase the cost of living out of all proportion to the economic conditions of supply and demand.

We are living in an extraordinary period. Much of the wealth of the world is being destroyed. This great waste, together with the very important fact that millions of men have been withdrawn from the fields of production and sent to the fields of death has diminished the supply of the world's goods and has greatly decreased the aggregate productive capacity of the belligerent nations of the earth. In these circumstances a high protective tariff unquestionably would have resulted in a most oppressive increase in the cost of living—a misfortune which has been checked by the reasonable and fair customs duties of the Democratic law.

No industry has been hurt and every industry has been benefited—for the tariff has played a most important part in swelling the unprecedented tide of prosperity that is sweeping every part of the country—the greatest in the history of any nation on the face of the earth. The removal of the prohibitive tariff barriers has enabled many neutral countries formerly dealing with belligerent nations of Europe to find in the United States a ready market for their raw and unmanufactured products which otherwise could not have come to us, and has given to our manufacturers the opportunity of exchanging for them our finished products and opening to them new and profitable markets which were never before accessible to them under the Republican high protective policy. We are importing from South America, Canada, Asia, Africa, and other countries needed crude materials, manufacturing them into finished products, and selling them to the Old World or back to the countries from which the raw material was purchased, and building up a foreign consumption of our surplus products which has helped to produce our present prosperity and upon which stable prosperity depends in the future.

The following table shows the imports and exports for the fiscal years 1910 to 1913 under the Payne-Aldrich Act as compared with the same statistics for the fiscal years 1914 to 1916 under the Underwood-Simmons law:

*Payne-Aldrich Act.*

| Year. | Imports. | Exports. | Total foreign trade. | Balance of trade in favor of the United States. |
|---|---|---|---|---|
| 1910 | $1,556,947,430 | $1,744,981,720 | $3,301,932,150 | $188,037,290 |
| 1911 | 1,527,226,105 | 2,049,320,199 | 3,576,546,304 | 522,094,034 |
| 1912 | 1,653,264,934 | 2,204,322,409 | 3,857,587,343 | 551,057,475 |
| 1913 | 1,813,098,234 | 2,465,884,149 | 4,278,892,383 | 652,875,915 |

*Underwood-Simmons Act.*

| Year. | Imports. | Exports. | Total foreign trade. | Balance of trade in favor of the United States. |
|---|---|---|---|---|
| 1914 | $1,803,925,657 | $2,384,579,148 | $4,258,504,805 | $470,653,491 |
| 1915 | 1,674,169,740 | 2,768,589,340 | 4,442,759,080 | 1,094,419,600 |
| 1916 | 2,197,984,842 | 4,333,698,604 | 6,531,683,446 | 2,135,713,762 |

Because of the general depression throughout the world during the fiscal year 1914—the year the Underwood-Simmons Act went into effect—our foreign trade fell off one-half of 1 per cent below 1913, but exceeded the record of all previous years by over $400,000,000. Despite the unbalanced economic conditions of 1914, due to the European war, the balance of trade in favor of the United States, as represented by the excess of exports over imports during that year, was $470,653,491, as compared with $188,037,290 for 1910, the fiscal year under the Payne-Aldrich law.

MARVELOUS GROWTH OF COMMERCE.

The growth of our foreign commerce under the Democratic tariff act since the outbreak of the European war; that is, for the fiscal years 1915 and 1916, has been so extraordinary in magnitude that it has broken all trade records of all countries in the whole history of the world. Our exports for 1915 were $2,768,589,340, exceeding all previous records by several hundred millions; our exports for 1916 reached the stupendous total of $4,333,698,604, or $1,565,000,000 greater than 1915 and almost double the high records of previous years.

The balance of trade in favor of the United States for the fiscal year 1915, was $1,094,419,600, breaking the record of all previous years; while the favorable balance of trade for the fiscal year 1916 was $2,135,713,762, or double that of 1915, and almost three and one-half times the highest record of previous years. These figures fairly stagger the imagination!

Our exports could never have grown in this degree if our industries had been hampered by a high protective tariff, which would have increased the cost of raw material to prohibitive figures or forced to other markets the raw materials and unmanufactured articles we have imported for the purpose of manufacture into finished products in order to supply the export trade. The increase in our imports during 1916 is represented almost entirely by the increase in the imports of such raw materials and unmanufactured articles required by our own manufacturers. For example, we imported for the fiscal year 1915 crude materials for use in manufacturing to the amount of $575,143,000; for the fiscal year 1916, these imports were $944,105,000—an increase of $369,000,000; for the fiscal year 1915 our imports of manufactures for further use of our own manufacturers amounted to $237,946,000, while for the fiscal year 1916, they were $359,442,000, an increase of $121,500,000. The increase in these two groups of imports alone aggregated $490,500,000. On the other hand, our total exports during the fiscal year 1916 of domestic manufactured products—exclusive of foodstuffs—ready for consumption exceeded such exports for 1915 by $1,187,733,090, breaking all previous records of the country's history, viz:

Exports of domestic manufactures (exclusive of foodstuffs) ready for consumption:

| | |
|---|---|
| 1915 | $808,634,402 |
| 1916 | 1,996,367,492 |
| Increase in 1 year, 1916 over 1915 | 1,187,733,090 |

Compare these figures with our imports of manufactures (exclusive of foodstuffs) ready for consumption, which were valued as follows:

| | Imports of manufactures ready for consumption (exclusive of foodstuffs). | Decrease as compared with 1913. |
|---|---|---|
| Fiscal year 1913 | $408,179,000 | |
| Fiscal year 1915 | 336,263,000 | $71,916,000 |
| Fiscal year 1916 | 315,884,000 | 92,295,000 |
| Total decrease | | 164,211,000 |

It is very difficult to follow the devious Republican mind on the tariff question. Republican leaders and spokesmen, with characteristic partisan inconsistency and purely for the purpose of misleading the country in their frantic efforts to drive the Democratic Party from power, contended until a few months ago that the European war had acted as a temporary tariff wall, preventing the flooding of the country with foreign imports; that this accounted for our prosperity and proved the theory of trade exclusion by high tariff protection to be correct. They now ignore that contention, make an "about face," and point to the large increase in the imports for 1916 as a threat to our prosperity and as a fruitful source of tariff taxation to meet the present revenue necessities for preparedness, and so forth.

As the increase in our imports has been due to increased imports of raw materials and the like for the use of our manufacturers in their export trade, it would simply be taxing, and consequently diminishing, our export trade if we increased the duties on crude materials, and therefore hurtful to our prosperity. The conclusive evidence that the Democratic tariff law has helped the country is the fact, viz, that while we bought from foreign countries in 1916 (our imports) $2,197,984,842, we sold to foreign countries in 1916 (our exports) more than twice as much as we bought, viz, $4,333,698,604, leaving a trade balance in our favor, for the fiscal year 1916, of $2,135,713,762. No wonder the United States is now the richest and most prosperous nation on earth. Democratic policies, Democratic administration, and Democratic government truly in the interest of the people have made it so.

DUMPING CHARGE A FABRICATION.

The charge, often repeated until recently, that the Democratic tariff has resulted in the dumping of European manufactures upon our markets to the detriment of American business is utterly fallacious and deliberately misleading.

During the first 10 months under the present tariff act, or the period from its adoption to the outbreak of the war—that is, during times of peace—our imports increased $101,977,779, or at the rate of only about $122,000,000 a year.

The following table shows the relative increase of imports under the Payne-Aldrich and the Underwood-Simmons Acts:

| Fiscal year. | Tariff law. | Increase of imports over preceding fiscal year. |
|---|---|---|
| 1910 | Payne-Aldrich | $245,000,000 |
| 1912 | do | 126,000,000 |
| 1913 | do | 160,000,000 |
| 1914 | Underwood-Simmons, at the rate of | 122,000,000 |

In other words, the above table shows that for the year ended June 30, 1910, nearly 11 months of which were under the Payne-Aldrich law, the first year in which that law was in effect, imports increased $245,000,000 over the preceding year, or more than double the rate of increase under the first 10 months of the Underwood-Simmons Act; for the fiscal year of 1912—the last full Republican year—also under the Payne-Aldrich law, they increased $126,000,000 over the previous year; for the fiscal year of 1913, likewise under the Payne-Aldrich Act, they increased $160,000,000, while the rate of increase under the Underwood-Simmons Act for the fiscal year of 1914 was only $122,000,000.

In spite of the increase of $101,977,779 in total imports for the 10 months ended July 31, 1914, the increase in foodstuffs and crude materials for use in manufacturing was over $105,000,000, leaving an actual decrease in the value of imports of all kinds of manufactures (excluding manufactures of foodstuffs) of over $3,000,000. In other words, instead of the alleged dumping of European-made goods on our markets, these figures show that there was really a decrease in the value of importations of manufactured articles for that period. Not only is this true as to manufactures as a whole, but an analysis of the figures from each of the larger branches of manufactures shows that they were not injured in any degree by the lower duties.

Imports of manufactures of cotton for that period were valued at about $60,000,000, as against $53,000,000 for the corresponding period of 1913 under the old tariff. But as our total domestic output of manufactures of cotton annually is at least $800,000,000, the increase could not have had any effect on our cotton manufactures.

An analysis of the increase in the imports of our principal manufactures for the 10 months ended July 31, 1914, under the Underwood-Simmons Act—that is, prior to the outbreak of the European war—as compared with the corresponding period of 1913, shows that wherever there was an increase in imports of

manufactured products there was a corresponding or greater increase in the imports of raw materials, out of which these goods are made.

DEMAND EXCEEDS SUPPLY.

This clearly indicates that the demand of the United States for these manufactured articles was in excess of the ability of our own manufacturers to supply them. The following table is illuminating in this respect:

*Imports.*

| | 10 months ended July 31, 1913. | 10 months ended July 31, 1914. | Increase. |
|---|---|---|---|
| Wool: | | | |
| Manufactured goods | $13,000,000 | $33,000,000 | $20,000,000 |
| Raw wool | 26,000,000 | 53,000,000 | 27,000,000 |
| Vegetable fibers: | | | |
| Manufactured goods | 65,000,000 | 70,000,000 | 5,000,000 |
| Raw | 42,000,000 | 49,000,000 | 7,000,000 |
| Silk: | | | |
| Manufactured goods | 22,000,000 | 27,000,000 | 5,000,000 |
| Raw silk | 72,000,000 | 85,000,000 | 13,000,000 |
| Leather and tanned skins: | | | |
| Manufactured goods | 6,800,000 | 8,700,000 | 1,900,000 |
| Unmanufactured | 7,300,000 | 13,100,000 | 5,800,000 |
| Uncured hides and skins | 92,000,000 | 105,000,000 | 13,000,000 |

The above are the principal increases in the value of manufactured goods, while there are notable decreases in other kinds of manufactures.

The value of imports of manufactures of iron and steel entered for consumption for the period from October 4, 1913, when the Underwood-Simmons Tariff Act went into effect, to June 30, 1914, shows a slight decrease from the value of the imports during the period October 1, 1912, to June 30, 1913, under the Payne-Aldrich tariff. Steel and iron articles entered free of duty increased from $447,347 to $5,933,658 during that period. Of this, however, the greater part consisted of pig iron, the free imports of which increased to the value of $3,193,333.

The domestic production of pig iron for the calendar year 1913, ending 3 months after the new tariff law went into effect, and 8 or 10 months after the new duties on iron were practically known, was 30,966,000 tons, valued at over $458,000,000. This was the record production for any year and for any country, the entire production for the world for that year being about 77,500,000 tons, the greatest production to that date.

MADE GOOD BEFORE THE WAR.

Bar iron decreased; steel ingots, billets, bars, and so forth, decreased; wire rods decreased and forgings decreased, while the value of imports of tin plates increased from $915,688 to $1,225,461. Wire and manufactures of wire increased from $830,303 to $1,076,557. Imports of cutlery increased from $1,380,765 to $2,532,911. These increases, however, were infinitely small in proportion to the total domestic production of these articles. The domestic production of tin and terneplate in 1909, for instance, was $47,969,645. The domestic production of wire and wirework was $126,210,278. The value of the domestic production of cutlery and tools was $53,206,163, while the total value of iron and steel products of blast furnaces was $391,306,675 and of iron and steel products of steel works and rolling mills was $985,628,297. These relatively infinitesimal increases could have had no adverse effect upon the iron and steel industries.

The above is an analysis of the situation before the outbreak of the European war, the only normal period during which the Simmons-Underwood Act has had an opportunity to operate. There has been a great decrease in our imports of manufactured goods since the war, but the Republican Party has been making strenuous efforts to mislead the country by the circulation of false statements of the wildest character to the effect that Europe is prepared to dump $2,000,000,000 worth of manufactured articles upon the United States as soon as peace is declared. The statement is absurd on its face. It is an absolute fabrication. There is absolutely no data upon which to base such statements. That they are utterly ridiculous becomes instantly clear when one considers the prostration of Europe and the fact that a great proportion of her producers and manufacturers have been withdrawn from the fields of commercial production and are forced to devote their entire energies and resources to the production of munitions and other materials to prosecute the war.

During the past two years our manufacturers have enormously increased their efficiency and the output of their plants, and our record-breaking exports are going to every corner of the globe, including markets which never before have been available to the United States. This has resulted in a great improvement in organization and in methods of manufacture and in a great increase of trained workmen, which will give the manufacturers of the United States for years to come a paramount advantage over all foreign competitors. In these circumstances there will be no chance for an increase in the importation of manufactured products, because, as clearly shown above, the increase in the imports of manufactured goods in the past under the Simmons-Underwood Act was due to an increased demand for such goods by the people of the United States and the inability of our manufacturers to supply them.

It is not only false, but dishonest, for the Republican Party to claim that the revenue needs of the Government could have been provided by a protective tariff. The highest protective tariff ever written would have yielded less revenue to the Government than the Underwood-Simmons Act. The articles which are not coming into this country now certainly would not come in under a higher protective tariff, and many of the articles that had never previously sought the United States, which are being imported now, would be prohibited from entering by protective rates of duty. Revenue can not be collected from goods that do not enter the country. While receipts from the tariff have necessarily been decreased by the war, the receipts from the income-tax section of the act have been a reliable, constant, and increasing source of revenue.

The Underwood-Simmons Act is a most successful revenue measure, and will continue to prove so upon the restoration of normal conditions in the world, as it was clearly demonstrated to be successful in normal times.

The customs provisions of the law will yield during normal times $100,000,000 in excess of the customs laws of any other nation. In view of that fact, would the people of the United States tolerate an increase in the tariff?

The following tables afford a comparison between the amount of revenue receipts yielded to the Government by the Payne-Aldrich Act and that produced by the Underwood-Simmons law:

| | |
|---|---|
| *Payne-Aldrich Act, fiscal year 1912.* | |
| Customs | $311,321,672 |
| Corporation tax | 28,583,304 |
| Total | 339,904,976 |
| *Payne-Aldrich Act, fiscal year 1913.* | |
| Customs | $318,891,396 |
| Corporation tax | 35,006,300 |
| Total | 353,897,696 |
| *Underwood-Simmons Act, fiscal year 1914.* | |
| Customs | $292,320,015 |
| Corporation income tax | 43,127,740 |
| Individual income tax | 28,253,535 |
| Total | 363,701,290 |

In other words, the receipts for 1912 under the Payne-Aldrich Act—the last full Republican year—were $23,796,314 less than the collections for 1914, chiefly under the Democratic tariff law, and the receipts for 1913, likewise under the Payne-Aldrich tariff, were $9,803,594 less than those for 1914, chiefly under the Democratic law.

NO MORE EXTREME TARIFFS.

The life of the modernized ultra high protective tariff system as heretofore developed in this and one or two other leading countries has reached its end. Apart from its essential injustice to the people, this system has become a positive menace to the peace of all trade countries. It is naturally utilized for purposes of rank discrimination, practical boycotting, undue preferences, retaliations, and other irritating practices. It also involves in its logical development subsidies, bounties, rebates, and the like. The trade practices growing out of the very spirit and operation of these so-called scientific high protective tariff systems have been a source of constant controversy and irritation among the leading commercial nations. It is a matter of common knowledge that the operation of the many unfair, injurious, and sharp trade practices and the strenuous trade conquests pursued under these systems largely contributed to the outbreak of the present European war.

Viewed from any standpoint, the citizen must be selfish, greedy, and shortsighted who would demand or seriously suggest tariff revision before normal conditions are reestablished in the world.

EUROPE HARD HIT.

At the close of the war Europe, commercially and industrially speaking, will be flat on her back. She will be burdened by a stupendous debt and most seriously handicapped by high prices, high wages, inflated currency, destroyed capital, scarcity of skilled labor, loss of export trade, high taxes, burdensome interest, extreme scarcity of all raw materials, and great depletion of her stock of manufactures, both for export and domestic purposes. The principal countries at war will be paying greater annual interest charges than the total amount of taxes annually levied by the United States Government. With these tremendous

handicaps, no intelligent person expects Europe to be able to rehabilitate herself commercially and industrially within any short period of time. Some of her best markets have already been lost to the United States.

—

FOREIGN TRADE RECORD IS OVER SIX BILLIONS—CHANGE OF NATIONAL ADMINISTRATION WILL MENACE OVER-SEAS BUSINESS AND RISK LOSS OF PROSPERITY—FACTS AS TO MUNITIONS SALES.

From March 4, 1913, to date this country has enjoyed an increase of its foreign trade far in excess of former increases of this or any other nation during a similar period.

Our total foreign trade for the fiscal year ending June 30, 1912, was $3,857,587,343; in the fiscal year 1913 it increased to $4,278,892,383, but fell off slightly in 1914, when it amounted to $4,258,504,805. There was a slight increase during the fiscal year ending June 30, 1915, when the total trade was $4,442,759,080; but in the fiscal year 1916 it leaped to $6,530,000,000.

The European war created an opportunity to secure this enormous business, but practical legislation and efficient administrative action aided in securing it. Authorities agree that much of the business can be retained by the enterprise of our business men if the present cooperation by the Government is continued, and if radical changes of policy, such as would be involved in a Republican tariff revision, are not adopted.

This article tells the important story of the growth of our over-seas business, and demonstrates that a change of national administration at the flood tide of our foreign successes would menace not only export business but the prosperity of the country.

A STUPENDOUS PROPOSITION.

Six and one-half billion dollars' worth of foreign trade is a remarkable and stupendous thing, and has contributed to the present unbounded prosperity of the United States.

It was in 1872 that our foreign trade first exceeded $1,000,000,000; in 1900 it passed the $2,000,000,000 mark; in 1907 it crossed the $3,000,000,000 line; in 1913 it was slightly above $4,000,000,000. And now within three short years the level has extended to well over $6,000,000,000, an increase of over 50 per cent since the beginning of the Wilson administration.

Exports have shown the same tremendous upward tendency. In the fiscal year ending June 30, 1912, our exports amounted to $2,204,322,409. They increased in the fiscal year 1913 to $2,465,884,149; fell off in 1914 to $2,364,579,148; increased again in 1915 to $2,768,589,340; and jumped in the fiscal year 1916 to $4,330,000,000. But even more important than the growth in the volume of our exports has been the change in their essential character.

Prior to March 4, 1913, our exports consisted largely of raw materials; in fact, 33 per cent of our exports were raw materials in unmanufactured state. For the last fiscal year the proportion of raw and crude products in our exports is only 13 per cent. Meanwhile the proportion of finished manufactured goods has increased from 31 to 47 per cent. In actual figures, for the fiscal year ending June 30, 1912, we exported $672,268,163 of finished manufactured goods and $723,008,839 in crude materials. In 1916 we exported $2,000,000,000 of finished manufactured goods and $536,000,000 in raw materials.

Prof. Walter Troeltsch, of Marburg University, Germany, says in a technical periodical published in Essen:

> We shall have to face a long period of diminished purchasing power, combined with higher costs of production, owing to dearer raw materials, and also higher taxes and higher wages.

IMPORTS OF RAW MATERIALS.

No less remarkable is the great increase in our imports of raw materials. This was aided by the Underwood tariff, which placed raw materials on the free list. In 1912 22 per cent of our imports consisted of manufactured articles ready for consumption. During the last fiscal year our imports of manufactured goods ready for consumption amounted to 14 per cent of the total imports. On the other hand, in 1912 the imports of raw materials amounted to 34 per cent, while in 1916 they amounted to 43 per cent of the total. This means that instead of importing manufactured goods ready for consumption, we are now importing the raw materials from which those goods are manufactured; and instead of paying for foreign labor and for foreign profits, we are putting that money into the pockets of our own laboring men and are paying profits to our own people.

These changes in the three short years since the beginning of the present administration are of great significance in the economic history of this country; they mark the shifting of the balance of economic power in the world from Europe to the United States.

MUNITIONS TRADE EXAGGERATED.

It is sometimes stated that this increase in our trade is due entirely to munitions of war. But this statement is far from the actual facts. A large portion of our gain in foreign trade has been with countries outside the war zone.

We may divide all our exports into three groups:

(1) Exports of actual muntitions of war, including ammunition, cartridges, loaded projectiles, guns, rifles, etc.

(2) Exports of what might be called secondary army supplies, including horses and mules; automobile trucks and aeroplanes; horseshoes and barbed wire; men's shoes; harness and saddles; wearing apparel and manufactures of brass, copper, lead and zinc.

(3) Exports of other products that would be sold even in times of peace, including agricultural, electrical, and other machinery; grain and flour; chemicals; cloths, wearing apparel, and other manufactures of cotton; fish, fruits, and meats; bars, billets, rails, sheets, structural, and other iron and steel; leather; mineral and vegetable oils; paper; tobacco; lumber and other manufactures of wood, and the various other agricultural, mining, and manufacturing products which enter into our exports under normal conditions.

The largest percentage of increase in our exports of these three groups occurred in the actual munitions of war. A comparison, however, of our exports of this group since the war with a period prior to the war based solely on the percentage of increase is fallacious for the reason that the exports in normal times are insignificant.

It should be borne in mind, too, that the articles classed as secondary army supplies are exported in times of peace and that, in fact, a large portion of them would be exported, war or no war.

WONDERFUL TRADE BALANCE.

Another significant change has taken place. Heretofore the United States has never enjoyed a really favorable "balance of trade." True, exports have for a number of years exceeded imports by many millions of dollars.

Since 1900, for example, our excess of exports over imports has amounted to as much as $1,094,000,000 in 1915, and has declined to as low as $188,000,000 in 1910. But there are many factors in the real balance of trade between the United States and other foreign nations that have not been taken into account.

The United States has for years borrowed money from Europe, and at the beginning of the Wilson administration owed Europe not less than $6,500,000,000, on which we paid an annual interest of not less than $300,000,000. Our tourists traveling in foreign countries spent probably not less than $250,000,000 each year. Foreigners resident in the United States sent back to Europe probably not less than $150,000,000 annually. Shippers paid to foreign-owned steamship lines not less than $50,000,000 each year. The sum total of these expenditures was approximately $750,000,000 annually. At no time, therefore, since 1900, and certainly not before that until 1915, have we ever had a sufficient "balance of trade" to fully offset this great indebtedness and the large interest payments on it.

Conditions have changed under the Wilson administration. In three years we have taken up $1,500,000,000 of American securities held abroad, paid off $500,000,000 of floating debt, and loaned to foreign countries $1,250,000,000, thereby reducing our net debt to the world by the vast total of $3,250,000,000, which is without precedent in history. Not only has the debt been thus reduced, but our payments abroad have heavily shrunk. Even our foreign population, on account of the difficulties in sending money abroad, have cut off their remittances. Along with the decrease in our indebtedness to Europe has of course come a falling off in the interest charges. Our payments to Europe probably do not amount to more than half the amount paid each year prior to the inauguration of Woodrow Wilson.

On the other hand, instead of borrowing money from Europe, we have actually made loans to European nations and other nations on the American Continent.

Our loans to foreign countries now—August 1, 1916—aggregate approximately $1,250,000,000.

BUY HEAVILY ABROAD.

In addition, American investors have bought in foreign markets at favorable prices old Government issues to the extent of nearly $50,000,000.

Our position in the world's markets has therefore completely changed. We have assumed a position of commanding importance and our commerce exceeds that of any other country of the world. As a matter of fact, our commerce at present is as great as that of England and France combined. In the world of financial affairs we have also taken the leading rôle. We

have discharged a large share of our indebtedness to foreign countries and are now lending money instead of borrowing it.

Foreign trade is a stabilizer. It would be relatively impossible for the United States to withstand the ups and downs of trade if it did not have a large foreign trade with which to balance the wheel of business. If a concern in the United States manufacturing agricultural machinery does a purely domestic trade, its business rises and falls with the crop conditions in this country. If, however, it also sells in Canada, Argentina, Russia, India, and Australia, in all of which it is quite improbable for bad crops to occur at the same time, it has a good business in some countries to offset the slackness at home or in other foreign fields. What is true of the manufacturer is true of the dealer in raw materials, such as iron, steel, lumber, cement, and the great food products, such as corn, wheat, meat, and the staples, like cotton and tobacco. The wider the markets the greater the variation in conditions and the more stable the business of the country supplying these markets. If we are to have greater stability in business conditions in the United States, it is absolutely necessary that we have wider markets, which means a larger foreign trade.

The Democratic administration of Woodrow Wilson has recognized for the first time in the history of the United States the impossibility both of expecting to get foreign trade and of setting up a high tariff wall of the extreme type favored by a majority of Republicans. It is impossible for any man—business man, manufacturer, or farmer—to believe in high protection of the Republican brand and at the same time to believe in foreign trade. The man who believes in Republican high protection in effect indicates his willingness or his desire to do away with foreign trade, and the man who announces his intention to get foreign trade avows that he does not need protection.

OLD TARIFFS HINDERED BUSINESS.

Another phase of the tariff situation should not be overlooked by those who advocate a high protective tariff wall. In effect, the country that establishes a high tariff wall says to other countries, "This is the way we believe that the country should develop; if you are wise you will go and do likewise." Therefore it is not surprising that we find the countries of Central and South America following our own example and erecting the high tariff walls that are now the chief obstacle to our getting trade in South America.

One of the most important achievements of the present Democratic administration in its efforts to promote trade was the establishment and development of the Bureau of Foreign and Domestic Commerce. There had long been an appropriation for promoting commerce, but prior to the Wilson administration the amount was so small that it was impossible to do much effective or practical work. This appropriation is now nearly four times the amount used in 1909 and more than double the amount ever granted by a Republican administration.

TRADE "DIPLOMATS" NOW HELP.

Since the beginning of this administration the number of commercial agents, skilled technical investigators in foreign countries, has been greatly increased. Eight branches and six cooperative branch offices have been established in the United States for developing foreign trade. Ten commercial attachés have been sent to the important commercial foreign capitals of the world in London, Paris, The Hague, Petrograd, Melbourne, Peking, Rio de Janeiro, Lima, Buenos Aires, and Santiago. This work of trade promotion has been increased tenfold over what it was during the previous administration. Its work has increased in extent, volume, and in practicability. It aims to give the manufacturer expert service and expert information with reference to foreign trade. It has succeeded in building up a wide and enviable reputation for its business-like methods and for the efficiency of its work.

Constructive legislation by the Wilson administration has greatly facilitated the development of our foreign trade. The first and most important legislation bearing on foreign trade was the Federal reserve act, which created adequate machinery for financing foreign business. Payments in international trade need no longer be made through London, for there has been established in New York an "acceptance" market which has proved of incalculable value in building up our trade and enabling our manufacturers to finance their foreign business. This legislation also permitted national banks to open branches in foreign countries, and through them to give our exporters a service that had never before been possible.

LAWS AND SHIPPING.

The shipbuilding industry and merchant shipping have been hampered in the past by restrictions imposed by Republican administrations. Some of these have been removed. Foreign-built vessels are permitted to register and fly the American flag, and our merchant marine has increased during the last 2 years more than in the preceding 50. The ship-purchase measure, urged by the administration and opposed by the Republican Members of Congress, provides legislation that will enable the United States to go still further in the development of a merchant marine. It aims to regulate ocean freight rates, to require foreign vessels to give as favorable rates to American as to European ships; in short, to regulate a business now wholly unregulated to the immense disadvantage of the United States.

Other legislation, designed to assist American exporters, includes the bill permitting American manufacturers to combine in their foreign trade work so that they may meet on equal terms their foreign competitors who have long been permitted to do this, and the proposed American trade-mark law, which will make it possible for American goods to carry a distinctive American mark that will distinguish them in all countries of the world and guarantee their American origin.

A vital question, and one that is agitating many business men at the present time, is whether or not we will be able to hold the increased trade we have obtained since the beginning of the European war, or whether we will lose it to our foreign competitors.

LIKELY TO HOLD NEW TRADE.

Barring a change from the present active and efficient cooperation of the Government in this field, there is every reason to believe that American exporters will hold the bulk of their new business in other than war munitions. Europe will be loaded with war debts, and these will mean heavy taxes on business and industry. Practically all of the elements entering into cost of production will be raised; the good will of their foreign business is already practically lost to many of the European belligerent nations, and the labor-supervising force in Europe will be considerably reduced and its efficiency will be considerably impaired.

The men who are fighting in the armies of Europe are not the unemployed or the unemployable; they are the very flower of the industrial and commercial enterprises. Many of these men will not return to their places in the factories or at the bench. Many of those who do return will be maimed and diseased, and most of them will have lost the work spirit that is so characteristic of and such a large asset to the European worker.

FOREIGN PRICES WILL BE HIGH.

During the war capital has been withdrawn from productive uses, all capital expenditures and capital investments have been reduced in efficiency, plants need renewals and repairs which have not been made, the demand for capital will be large at the end of the war, and the stock of it on hand will be small and expensive. The war is not yet over, and these effects will be cumulative as long as the war lasts. Interest rates will therefore be high.

The elements entering into cost of production will all be raised, and it is claimed that prices can not even for a short period be substantially lower than the cost of production. On these principles it is argued that prices will be high, higher than ever before in Europe, and will more nearly approximate the level of prices in the United States. European nations will not be able to export or to supply their own markets at prices as much below ours as they were before the war. We will be able therefore to hold a very large proportion of the new trade we have obtained during the progress of the war.

It is absurd to believe that European nations will be able to do more after the war than they did before the war. They will be weaker, not stronger. Domestic wants will have to be filled before the European nations can seriously undertake foreign trade. No matter how much they may want foreign trade, no matter how much they may need it, they will first have to set their own houses in order.

We can successfully compete with any other nation in the world in any market, but we can do so only when we bring our present industrial equipment and our distributing machinery to the highest point of efficiency. The war will be followed by a period of intense competition, and the most efficient producers and distributors will win. We can not waste with one hand and win with the other. We must use science and research in business as our rivals do. We can no longer afford a gospel of industrial fear in this country. We can compete if we will to compete, and shall be both stronger and safer for the effort. It is a principal part of the program of President Wilson to continue the development of the Government auxiliaries to foreign trade expansion so that America may keep the place in foreign trade that it now has. A change of administration inevitably would cut short and cripple the very practical work to this end now under way.

WONDERFUL EXPANSION—DEADLY PARALLEL PRESENTS THE CASE OF WILSON V. TAFT IN FOREIGN COMMERCE.

| ON MARCH 4, 1913. | ON AUGUST 4, 1916. |
|---|---|
| Annual foreign trade, $3,857,587,343 (fiscal year 1912). | Annual foreign trade, $9,530,000,000 (fiscal year 1916). |
| Exports, $2,204,322,409 (fiscal year 1912). | Exports, $4,330,000,000 (fiscal year 1916). |
| Our net foreign indebtedness, funded and floating, $6,500,000,000. | Our net foreign indebtedness reduced by half. |
| Our loans to foreign countries were practically nothing. | Our loans to foreign countries were one and one-fourth billion dollars. |
| Imports of manufactured goods amounted to $360,018,963 (fiscal year 1912), or 21.78 per cent of our total imports. | Our imports of manufactured goods amounted to $315,000,000 (fiscal year 1916), or 14.30 per cent of our total imports. |
| Exports of manufactured goods ready for consumption amounted to $672,268,163 (fiscal year 1912), or 30.98 per cent of all our domestic exports. | Our exports of manufactured goods ready for consumption amounted to $2,000,000,000 (fiscal year 1916), or 46.73 per cent of all our domestic exports. |
| Total amount of special appropriations for promotion of our foreign trade, $60,000 (fiscal year 1912). | Total amount of special appropriations for promotion of our foreign trade, $252,000 (fiscal year 1916). |
| Field staff engaged in promoting foreign trade numbered 11. | Field staff engaged in promoting foreign trade numbered 61. |
| No commercial attachés. | Ten commercial attachés. |
| No appropriation for commercial attachés. | An appropriation of $100,000 for commercial attachés. |
| No district or branch offices in the United States for promoting foreign trade. | Eight district offices and six cooperating branch offices for promoting American trade. |
| Only nine agents gathering information about foreign markets for American products. | Twenty agents gathering information about foreign markets for American products. |
| Only 2,145 trade opportunities issued for the benefit of American manufacturers. | There were 4,300 trade opportunities issued, each giving a specific chance to market American goods abroad. |

## The Revenue Bill.

# SPEECH

OF

# HON. MEYER LONDON,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, July 7, 1916.*

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H. R. 16763) to increase the revenue, and for other purposes.

Mr. LONDON. Mr. Chairman, in order to meet the extraordinary expenditures of the so-called preparedness program it is proposed to provide the revenue by increasing the income tax, by a tax on munitions, and by a tax on inheritances. Tagged onto these purely revenue features of the bill are the antidumping provision, the provision for the appointment of a tariff commission, and the provision relating to protection on dyestuffs.

So far as the revenue-raising features of the bill are concerned, the Democrats are on the right track. If there is any criticism to be made, it is that the surtax on large incomes is not large enough.

The same thing is true of the inheritance tax. The power of transmitting large sums of wealth to distant relatives has assumed, under present industrial conditions, a character entirely different from that which it had centuries ago. To transfer by inheritance millions of dollars means to transfer the power of millions of dollars, which in the ultimate analysis means the power to control the lives of others.

It is difficult to see how, in a democracy, men will with indifference contemplate the inheritance, through the mere accident of consanguinity, of large estates, of tremendous power in the shape of capital. While we object to the power of making laws being transferred from father to son by inheritance, we do permit the acquisition by inheritance of a financial power which confers the right to legislate for industry, commerce, finance, and to shape the life of the country. As a matter of public policy, and not only as a source of revenue for the support of the Government, the tax on inheritance should be increased.

No one can with earnestness claim that the accumulation of millions of dollars is due primarily, or even in large part, to personal effort. None of our great inventors, none of our scholars, authors, artists, teachers, have left millions of dollars to their children. The millionaire is a product of conditions which enable the individual to utilize the services of thousands of men, or the increasing values of land or other natural resources, for personal aggrandizement.

Accumulated capital represents the efforts of thousands of men, the accumulated result of the labor and strivings of thousands of fellow men. It is in all respects the collective product of a collective effort. It is a community product, and community wealth.

And in no country of the world is the right or the duty to tax large inheritances so clear as in the United States. In a country with unlimited resources, big enough and fertile enough to support in comfort five times the present population, we have permitted with the free and easy-going way of a young democracy the concentration of the overwhelming power of capital in the hands of a small number of people.

Thus, 2 per cent of the people of the United States own 60 per cent of its wealth. It is not that inordinately large wealth gives its possessor a larger share in the joys of life that constitutes a danger to democracy. Democracy does not envy the rich their riches. Capital means the power to give work or to withhold work, to give an opportunity to live or to refuse it, and it should be against the public policy of a democracy to permit the transmission by inheritance of the power to control the lives of the people.

The tax on munitions is also rather insufficient. While the European war continues and while the fever of "preparedness" is permitted to interrupt the normal life of this country, the munition makers will glean a pretty substantial profit; and one of the benefits of the munitions tax will be to place at the disposal of the Government information as to the extent of the traffic and as to the size of the profit.

It has always been the contention of the Socialists that, so far as the great masses of the working people are concerned, there is no essential difference between the Republicans and Democrats. By the antidumping clause, the tariff commission clause, and the dyestuff provision, that supposed bone of contention between the two parties—the tariff—is eliminated as an issue. The Democrats have bodily stolen, swallowed, and assimilated the Republican tariff policy.

The truth is that the tariff has never been a real issue between the Republicans and the Democrats. The protectionist has no party, and for that matter no country. He is essentially a shopkeeper. He divides the world into two parts—the industry in which he is interested and the rest of the world. One of the speakers who preceded me, a Democrat, elected on the Democratic ticket, coming from a section where the boot and shoe industry is the dominant industry, expressed the hope that the tariff commission would find some way of giving adequate protection to the boot and shoe industry of his State. The rock-ribbed Democratic State of Louisiana all at once discovered that it was progressive, because the local sugar industry wanted protection. And the Democratic Party hastened to retrace its step in favor of free sugar—surely one of the necessaries of life—and continued the tariff on sugar.

Within the last few years we have been witnessing a realignment of political parties and a revaluation of political ideas. Thus we find the Democratic Party adopting the Republican tariff policy, and what is even more significant for the former party of State rights, we see a Democratic Congress federalizing the State militia, while the Republican Party refers the question of woman suffrage to the States.

Mr. DENISON. Will the gentleman yield?

Mr. LONDON. Yes.

Mr. DENISON. Has not the Democratic Party referred woman suffrage to the State?

Mr. LONDON. Yes; but they have always favored State rights, and they are consistent from a Democratic standpoint. The Republican Party, the party of a concentrated national policy, can not refer the question to the States except as a political exigency.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. LONDON. Yes.

Mr. SMITH of Michigan. What position does the Socialist Party take on the question of woman suffrage?

Mr. LONDON. No member of a civilized community should be denied a voice in the shaping of opinion and in crystallizing opinion into law, whether it be man or woman.

Mr. SMITH of Michigan. The gentleman from New York is not objecting to the fact that the question has been referred to the States.

Mr. LONDON. The right of a woman to vote is as inalienable and as sacred as the right of a man to vote and to participate in the legislation of the country. However, that is a side issue. I mean that is beside the issue at the present moment, for we are discussing the revenue bill.

With the tariff removed as an issue; with the curse of the war lifted; with the nations of the world taking stock and asking themselves why all this bloodshed, sacrifice, and devastation; with the people of the United States taking second thought; with the brain of the American people disburdened of

the nightmare of "preparedness" born of the war; with the political field clear, there will be only one issue—the issue of the masses against the classes.

We will stop talking tariff. We will stop yelling "Preparedness!"

Conservation of human life, the restoration of the natural resources to the people, the taking hold by the people of the socially necessary means of production and distribution, the widening of the boundaries of human liberty—in short, industrial democracy against industrial oligarchy—will become the issue along which men and parties will have to divide.

I predict that within our lifetime and within our generation the platforms of all political parties will be compelled to deal with the social problem. Just as the numerous parties which preceded the Civil War had the abolition of chattel slavery and the preservation of the Union as the main issue, just so will the political forces of America divide on the issue whether the industrial oligarchy shall survive and democracy shall perish, or whether this Republic shall be rejuvenated, with wage slavery dead and gone forever.

The Socialist movement is the Abolitionist movement of the twentieth century.

## Naval Appropriation Bill.

### EXTENSION OF REMARKS

OF

### HON. BEN JOHNSON,

OF KENTUCKY.

IN THE HOUSE OF REPRESENTATIVES,

*Friday, August 18, 1916.*

Mr. JOHNSON of Kentucky. Mr. Speaker: Whenever it becomes my duty to cast a vote as a member of this body I console myself, at least, not only with the belief but with the firm conviction that that vote is cast not only upon the moral side of the question, whatever it may be, but also upon that side of the question which carries with it the welfare of the great masses of the people.

When the bill carrying appropriations for the continuance and increase of the navy was before the House I cast my vote for it. The bill, after having passed the House, went to the Senate, where many millions of dollars were added to it, and 157 new ships were authorized to be built.

The question which is now before the House is: Shall Senate amendment No. 238 be accepted or rejected?

I will here quote the provision which was contained in the House bill, for which I voted, and then I shall quote the Senate amendment No. 238, which was inserted by the Senate in lieu of the House provision.

The House provision is as follows:

HOUSE BILL.

INCREASE OF THE NAVY.

For the purpose of further increasing the Naval Establishment of the United States the President of the United States is hereby authorized to have constructed five battle cruisers carrying suitable armor and as powerful armament as any other vessel of their class, to have the highest practicable speed and greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $15,000,000 each.

Four scout cruisers, carrying suitable protection and armament suited to their size and type, to have the highest practicable speed and greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $4,500,000 each.

Ten torpedo boat destroyers to have the highest practicable speed and greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $1,000,000 each: *Provided*, That four of said torpedo boat destroyers herein authorized shall be built on the Pacific coast: *Provided further*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific.

Fifty submarines, of which number three shall be of a surface displacement of about eight hundred tons each, to cost, exclusive of armor and armament, not to exceed $1,100,000 each, and the remaining 47 submarines shall be the best and most desirable and useful type of a submarine which can be procured at a cost, exclusive of armor and armament, not to exceed $625,000 each, and the sum of $9,387,000 is hereby appropriated for said purposes, to be available until expended.

Fifteen of the submarines herein authorized shall be built on the Pacific coast: *Provided*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic plus the cost of transportation from the Atlantic to the Pacific.

One fuel-oil ship, to cost, exclusive of armor and armament, not to exceed $1,265,000.

One ammunition ship, to cost, exclusive of armor and armament, not to exceed $2,600,000.

One hospital ship, to cost not to exceed $2,250,000.

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels: *Provided*, That the Secretary of the Navy is hereby authorized to build any of the vessels herein authorized in such navy yards as he may designate.

Construction and machinery: On account of hulls and outfits of vessels and machinery of vessels heretofore and herein authorized, to be available until expended, $47,366,860.

On account of submarine torpedo boats heretofore authorized, to be available until expended, $5,282,593.

Armor and armament: Toward the armor and armament for vessels heretofore and herein authorized, to be available until expended, $33,896,060.

Ammunition: For ammunition for the vessels herein authorized, to be available until expended, $11,329,925.

Total increase of the Navy heretofore and herein authorized, $107,262,438.

Senate amendment 238 inserted by the Senate is as follows:—

INCREASE OF THE NAVY.

For the purpose of further increasing the Naval Establishment of the United States, the President of the United States is hereby authorized to undertake prior to July 1, 1919, the construction of the vessels enumerated below:

Ten first-class battleships, carrying as heavy armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action; four of these at a cost, exclusive of armor and armament, not to exceed $11,500,000 each, to be begun as soon as practicable.

Six battle cruisers, carrying suitable armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action; four of these to cost, exclusive of armor and armament, not to exceed $16,500,000 each, to be begun as soon as practicable.

Ten scout cruisers, carrying suitable protection and armament suited to their size and type, to have the highest practicable speed and greatest desirable radius of action; four to cost, exclusive of armor and armament, not to exceed $5,000,000 each, to be begun as soon as practicable.

Fifty torpedo-boat destroyers, to have the highest practicable speed and greatest desirable radius of action; 20 to cost, exclusive of armor and armament, not to exceed $1,200,000 each, to be begun as soon as practicable: *Provided*, That not less than four of these shall be built on the Pacific coast: *Provided further*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast, plus the cost of transportation from the Atlantic to the Pacific.

Nine fleet submarines.

Fifty-eight coast submarines, of which number three to have a surface displacement of about 800 tons each, to cost, exclusive of armor and armament, not to exceed $1,200,000 each, and 27, which shall be the best and most desirable and useful type of submarine which can be procured at a cost, exclusive of armor and armament, not to exceed $700,000 each, shall be begun as soon as practicable; and the sum of $8,217,000 is hereby appropriated for the construction of said submarines, to be available until expended. Not less than 12 of the submarines herein authorized to be begun as soon as practicable shall be built on the Pacific coast: *Provided*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast, plus the cost of transportation from the Atlantic to the Pacific.

One submarine, equipped with the Neff system of submarine propulsion, exclusive of armor and armament, $250,000: *Provided*, That the owners of the Neff system of submarine propulsion will construct, in accordance with drawings, plans, and specifications provided by them, one coast-defense submarine of about 150 tons displacement when submerged, carrying armor and armament similar and equal to that of the "C" class of submarines, with fittings, equipment, machinery, devices, appliances, and appurtenances of every kind with latest improvements, complete in all respects, and suitable for naval purposes: *Provided further*, That the money appropriated for this purpose shall not be paid to the builders of said boat until the same has been completed, passed satisfactory service tests, and been accepted by the Secretary of the Navy; but upon such completion, tests, and acceptance by the Secretary of the Navy the sum appropriated shall be paid.

Three fuel ships, one at a cost not to exceed $1,500,000, to be begun as soon as practicable.

One repair ship.

One transport.

One hospital ship, at a cost not to exceed $2,350,000, to be begun as soon as practicable.

Two destroyer tenders.

One fleet submarine tender.

Two ammunition ships, one at a cost, exclusive of armor and armament, not to exceed $2,350,000, to be begun as soon as practicable.

Two gunboats, one at a cost, exclusive of armor and armament, not to exceed $860,000, to be begun as soon as practicable: *Provided*, That the 66 vessels directed herein to be begun as soon as practicable shall be contracted for or shall be begun in navy yards with six months from the date of the approval of this act.

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels: *Provided*, That the Secretary of the Navy is hereby authorized to build any of the vessels herein authorized in such navy yards as he may designate.

Construction and machinery: On account of hulls and outfits of vessels and machinery of vessels heretofore and herein authorized, to be available until expended, $59,000,194.

Increase of the Navy, torpedo boats: On account of submarine torpedo boats heretofore authorized, to be available until expended, $5,282,593.

Increase of the Navy, armor and armament: Toward the armor and armament for vessels heretofore and herein authorized, to be available until expended, $47,110,000.

Increase of the Navy, ammunition: Toward ammunition for the vessels herein authorized, to be available until expended, $19,485,500.

Total increase of the Navy heretofore and herein authorized, $139,345,287.

It will be seen that the House provision called for 72 ships at the total cost of $103,502,000; whereas, the Senate amendment (238) calls for 157 ships at a total cost of $324,020,000, thus increasing the number of ships by 85 and also at the same time increasing the appropriation approximately $220,000,000.

It will also be seen from the Senate amendment No. 238 that not only the appropriation for the number of ships is increased and that the amount of money is also increased, but other large amounts are added for other and incidental purposes, so that Senate amendment 238 increases the total amount to be expended under the caption of "Increase of the Navy" many millions.

In my judgment the number of ships authorized by the House bill and the amount which they were to cost was ample, indeed. So, as just said, the question now arises: Shall the House abide by its former action, or shall it recede from its former action and accept Senate amendment 238 carrying the large, additional appropriations contained therein?

Two years ago when the war broke out between Germany and the Allies the best naval experts of the world conceded that the navy of Great Britain stood first, that of the United States second, and that of Germany third. Since that time the British navy has destroyed a great number of German vessels, the tonnage displacement of which amounts to the enormous figure of more than a hundred thousand tons. In the meantime the German navy has inflicted as great loss upon the navy of Great Britain. Nobody will dispute that notwithstanding the losses which the British navy has sustained that it still easily outranks the navy of any other nation of the world. If there was anyone two years ago who seriously contended that the German navy was greater and stronger than the navy of the United States he certainly will not make that contention since the great losses which have been inflicted upon the German navy during the last two years. The result is that the navy of Great Britain is still first, that of the United States is far more certainly second, and that of Germany is still third, but not as good a third as it was two years ago.

We are now asked to appropriate approximately $660,000,000 to further increase the strength of our navy. Let us now see what the effect will be after we have expended this $660,000,000 gathered from taxes levied upon the people throughout the length and breadth of this land. Nobody can be found who will contend that after we have spent this enormous sum of money our navy will be anything else except second to that of Great Britain. As our navy is now made up we could not meet the navy of Great Britain in battle; and just as certainly will no one insist that our navy would be able to stand any chance whatever of success in battle with the British fleet after this $660,000,000 has been spent. If that is true, and no one will dispute the correctness of that assertion, then, as compared with the navy of Great Britain, we will be no better off after spending the $660,000,000 than we now are.

The building program adopted by the House before the Senate put on its amendment (238) would have been far more than ample to have kept pace with any additions which Germany might have made to her navy. If our navy was better than Germany's before Germany sustained all of her recent losses the fact remains, as I have just said, that the navy of the United States is certainly far ahead of that of Germany since Germany has sustained so many losses.

During the two years that Germany has been sustaining her losses the United States has all of that time been increasing the size and strength of her navy.

All that could be accomplished by the additional expenditure provided in Senate amendment No. 238 would be to add to the strength of the navy of the United States only on account of Germany, when our navy is already concededly much stronger than that of Germany.

I not only can not see any good reason, but I can not see any reason at all why the House should concur in the Senate amendment and spend all of the additional millions therein provided for when that expenditure would still leave us behind Great Britain and would still leave us occupying the position which we now occupy toward the German navy.

If a man of large stature and giant strength can whip a man of small stature and little strength, I can not see the necessity of the big fellow, if he is courageous, for calling other people to his assistance in a difficulty between the two of them.

If the navy of the United States can not defeat the navy of Great Britain, and such is conceded by all men; and if the expenditure of the large amount of money provided for in Senate amendment 238 would still leave the navy of the United States far smaller than that of Great Britain, then why spend all this money upon Great Britain's account?

Again, if the navy of the United States, as now constituted, can easily defeat the navy of Germany, then why take from the people the money provided for in the same Senate amendment?

I wish to repeat that if the Senate amendment No. 238 should become law we will still be behind Great Britain and still ahead of Germany. In other words, the expenditure of the money will not change the relative position of our navy to that of either of these countries. Therefore, I ask, Why tax the people to raise this money?

The House bill, freed of the Senate amendment 238, not only provides for continued naval construction but it provides more in this direction than any Congress before has ever provided.

But, Mr. Speaker, that is not all. Senate amendment 238 not only makes provision for the building of ships which may be commenced at this time, but it authorizes the construction of ships of certain described classes to be commenced as late as the year 1919. This Congress is not all wise. It can not see into the future. It must determine the future by the past. The past has demonstrated that not only every year and every month but even every day brings to light new inventions which teach us that our practices of the past contained much that was both in efficiency and economy.

Several times during the present European war the question has arisen with the great naval constructors of the world as to which it was best to build, dreadnaughts, battle cruisers, or submarines. The question remains unsettled, and it will remain unsettled until the censorship has been lifted by both Germany and the Allies and we have ascertained the real truth concerning the several naval engagements between those two powers.

It seems beyond the range of possibility that that war can continue until 1919. I insist that we should neither authorize nor appropriate the people's money in any unusual amount for the construction of any particular kind of ship until we have come to know which we need worse in event the unexpected should happen and we should become involved in war.

Some may say that we can not afford to wait until that war is over before we go further with our naval program. With them I agree, but let me remind all such that two years ago Congress appropriated the money for the construction of two great dreadnaughts, and that the keel of neither of these vessels has yet been laid. A ship of this class can not be built in less than 33 months. It is not only possible, but it is absolutely certain, that before the two ships which were authorized two years ago are completed many changes will have to be made in their construction as the result of scientific advantages of which we do not now know. It has even been said that between the time one of these big ships is authorized and the time of its completion in many vital respects it becomes obsolete before it even floats upon the water.

By the Senate amendment we are asked to authorize the construction of 157 ships of certain size and description and approximate cost. The present Congress is neither more patriotic nor wiser than subsequent American Congresses will be. Between the present Congress and 1919 there will be five sessions of Congress. I can not understand why this Congress should endeavor to forestall and anticipate the wisdom to be gained by Congresses to sit between now and 1919. There is no Member of the present Congress who will not better know in 1919 what sort of navy we had best have than he now knows. In my judgment the present Congress should authorize such vessels and only such vessels as we can at least have under way before a new Congress takes charge of affairs.

I think the same argument holds good not only as to the present Congress but as to each subsequent Congress; and I can not but believe that it will be a serious blunder upon the part of the present Congress to bind future Congresses to a program of shipbuilding which, when the time comes, had best be changed. Some may answer that when that time comes the future Congress would have the power to change. I deny that for the reason that the future Congress which might desire to make changes would be bound by contracts already made with the shipbuilders under the provisions of Senate amendment 238.

In conclusion I wish to repeat as concisely as I can the two main reasons why I oppose the Senate amendment. Those two reasons are: First: The expenditure of this large amount of money would not put our navy ahead of that of Great Britain, and we are already ahead of Germany without the expenditure of the money. Second: The present Congress should not undertake to bind five succeeding sessions of Congress to any navy-building program when it is absolutely certain that before the ships are built shipbuilding will change in many vital respects.

It is agreed upon all hands that the work upon some of the ships provided for in the Senate amendment will not commence before 1920. If that be correct the building program provided for in the Senate amendment can not be completed before 1922. I can not resist the belief that that date is too far in the future

for us to undertake to say what character of ships should be built at that time.

I do not wish to be understood as not being in favor of ample "preparedness." I am very decidedly in favor of "preparedness." However, my belief as to the extent to which we should be prepared is not in accord with the ideas of "preparedness" entertained by the shipbuilders and the manufacturers of munitions of war. I believe that the "preparedness" provided for in the House bill is ample. We must be prepared against any invasion which might come, but it is not necessary for us to be prepared to invade any other nation for the purpose of conquest, because the policy of this Nation is and should be against conquest. I am not in favor of having that kind of "preparedness" which would tempt any American to seek an invasion of the homes of any other nation for the purpose of conquest.

For the reasons which I have given I shall cast my vote against the Senate amendment, believing that the provisions of the House were even more than ample. Neither can I refrain from expressing the opinion that the Senate amendment looks more to the financial welfare of the shipbuilding and armor-plate companies than it does to the peace, happiness, and prosperity of the people of the United States.

---

## Prosperity.

### EXTENSION OF REMARKS

OF

### HON. EDWIN Y. WEBB,

OF NORTH CAROLINA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. WEBB. Mr. Speaker, what is prosperity? Webster answers: "Advance or gain in anything good or desirable." To keep out of war is good. Wilson has upheld our national honor on every side and has kept us from war. American honor is undimmed, untarnished, and unstained; the flag flies gloriously and America has the respect of all the world. All this without war, without a Belgian atrocity, without the bloody sacrifice of the Nation's men, without the tears of a nation's widows, without the wails of orphans, without the destruction of property, without the misery and woe that follow the strides of hellish war.

Next to the peace, safety, and happiness of the Nation comes commercial prosperity. This, too, has come in plenty under this Democratic administration. Its presence in every section of this broad land and in all of her diversified industries is apparent even to a Republican.

This Nation has risen under this Democratic administration out of the commercial depression that lingered from the Roosevelt money panic as if by magic and has taken on new life and vigor.

Our Republican friends, who, during the first Democratic Congress of this administration, took up valuable space in the CONGRESSIONAL RECORD trying to convince a waiting world that Democratic rule meant soup houses and ruin—even they have ceased from their labors.

As some evidence of the prosperity that this country is now enjoying, I call attention to the fact that our gold reserve has increased over $1,000,000,000, and that we now have gold, including a redemption fund, of $2,400,000,000, and that on July 1, 1916, the money in circulation was $432,902,929 more than it was one year ago, or an increase from $35.59 per capita to $39.23. It is estimated that the gold importations to this country up to this time for 1916 must exceed the enormous total of $300,000,000. To this must be added the tremendous wealth that has been piled up in our national and State banks. Nothing more plainly indicates the general prosperity of this country than the splendid condition of our banks. The Comptroller of the Currency informs us that in March, 1916, the resources of the national banks amounted to $13,838,000,000, which exceeds by $370,000,000, the greatest resources ever shown in the history of the National Banking System, and is an increase since March, 1915, of $2,271,000,000. To the above astonishing figures must be added those for the State banks.

The balance of trade in favor of this country is far in excess of any previous year in our history, and is greater than any other commercial nation ever enjoyed in any year.

The total exports of this country for the 12 months ending June 30, 1916, amounted to the enormous sum of $4,345,000,000, which was a gain of $1,576,000,000 over the previous year.

In order to show the full commercial activities of this country we must add to this tremendous export trade the sum of $45,000,000,000, which represents the value of the commerce between the States of the Union in a single year.

We are told by office-seeking Republicans that the prosperity of this country is dependent upon our trade in war material. The fallacy of this contention becomes apparent when we examine the report from the Department of Commerce. For this same period it is estimated that of all our total exports, only $478,000,000 was for ammunition and firearms. This is only about 11 per cent of our exports, less than 1 per cent of our total commerce, and less than 0.01⅞ per cent of our total manufactures.

As showing the healthy condition of our trade, I call attention to the fact that we sold about $345,000,000 worth of commodities to Canada last year, which was $35,000,000 in excess of the amount sold there the year before. This was mainly a healthy domestic trade with western Canada, unaffected by the inflation of war orders.

The increased exports to the South American countries is another indication of the healthy growth of our commerce. The Department of Commerce shows in a statement issued July 3, 1916, that the exports from the United States to South American countries alone during the past fiscal year amounted to approximately $175,000,000, which is the greatest export trade we have ever enjoyed with these countries. The exports for the preceding year were $99,000,000, showing a gain of about $76,000,000. Our total exports to the West Indies, Central and South American countries is estimated, for the last fiscal year, at $450,000,000.

The Washington Post, which is independent Republican in politics, on June 14, 1916, in its leading editorial said:

> The Post has frequently of late called attention to the fact that the prosperity of this country is not dependent to any great degree upon what are known as war orders, and that after the war ceases huge demands from the belligerent countries for other commodities will come to an extent which will fully make up the decline in exports of war materials.

After setting out the statistics of exports to the various countries and our imports from these countries, the editorial sums up as follows:

> Review of these statistics is most convincing of the continued prosperity of this country after the close of the European war.

This same paper on March 20, 1916, in another leading editorial starts out by saying:

> He is, indeed, a business man difficult to please who is not gratified by the constantly increasing volumes and values of our foreign and domestic commerce.

Pulitzer's Review, a Republican magazine, after reviewing the facts gathered by the Federal Reserve Board and also independent reports from widely separated districts, sums up from this data as follows:

> The facts and figures here presented do not indicate in any sense a business spurt or any movement of a sporadic nature. They show, on calm consideration, a wonderful but healthy growth, not confined to any section of the country, but widely dispersed and covering all fundamental industries.

The tremendous wealth that we are piling up in our Treasury and our banks, and the record-breaking volume of domestic and foreign commerce that is constantly reaching higher levels are but indicative of the prosperity of our mills, mines, and farms. These are the agencies that produce the commodities of our commerce.

I venture the assertion that there is not a manufacturing plant in this broad land equipped to make any staple article of commerce that is closed down, or even running on short time, for the lack of orders at remunerative prices.

If there was such a one I am sure our Republican friends, who are staking their chances to return to political control of this Nation upon the issue of vicious Democratic legislation which they argue will drive this country on the rocks of commercial ruin, would have already brought it forward and given it an airing in the CONGRESSIONAL RECORD. Its absence there is proof that it does not exist.

It is a matter of common knowledge that our manufacturers are enjoying the greatest era of prosperity that has ever been known to exist. It is estimated that the total output of the manufactories of the United States for the year 1916 will equal $30,000,000,000, and there is no branch of this great industry that we hear of or read of that is not operating at a good margin of profits.

We have always heard that the iron and steel business was a good barometer of general business conditions. Mr. Elbert H. Gary, chairman of the United States Steel Corporation, which

does not manufacture any munitions of war, in a statement on July 3, 1916, said that—

The steel business of the United States for domestic use and for export is better than ever in its history. Production is larger, profits are greater, and workmen are receiving higher wages. Unfilled orders of subsidiary companies of the corporation amount to nearly 10,000,000 tons. The corporation is producing at the rate of 51,000 tons a day.

The Manufacturers' Record of June 22, 1916, says:

The value of the output of the steel works and rolling mills of the United States, which was $919,527,244 in 1914, will this year, by virtue of an increase of nearly 100 per cent in output in iron and steel products, and a very large increase in value, probably run to $2,500,000,000.

The same condition exists among the manufacturers of cotton goods. The South to-day is the greatest cotton manufacturing center in this Nation. I have in my district in North Carolina more cotton mills than there are in any other district in the South. During the Roosevelt and Taft administrations these mills had a hard time. Much of the time they were unable to show any profits, and many of them, at times, were forced to close down for want of orders.

To-day there is not a mill that is sufficiently equipped for operation that is not working on full time and making large profits. Every old spindle and every old loom that can be worked into shape to produce a marketable product is added to the chorus of spindles and looms that are singing, all over my district and the South, of Democratic prosperity. The only limit to the prosperity of the cotton manufacturer is his ability to fill orders within a reasonable time.

The report from the Geological Survey of June 30, 1916, is equally encouraging to those engaged in the mining business. This report shows that the output of American mines for the first six months of this year established a new high record for production. Manganese, copper, lead, and zinc are being mined in unprecedented quantities. Ore shipments from the Lake Superior region for the first five months of 1916 were 83 per cent greater than those of the corresponding period of 1915. The same is true of the production of other minerals.

The Cranberry Iron Mines, in my district, has taken on new life under the Democratic administration. Wages have been increased and the mines are being worked to their full capacity. The output of these mines is selling for from $8 to $10 per ton more than at normal times in the past. A highly reputable citizen of the neighborhood writes—

that all the old dumps that were counted waste under each succeeding Republican administration ever since the mines have been in operation have been and are now being worked and taken up under the present administration of Woodrow Wilson, and I am informed by the foremen of the mines, who are Republicans, that said wastage is now paying good dividends.

Mica miners in my district are reaping a harvest. This same gentleman, writing of mica, says:

As to the mica industry, it was never so prosperous in the memory of man—mining on the most extensive scale ever known in the history of this country, and the highest prices obtained for mica ever known.

An editorial in a leading weekly paper in my district says that mica has been bringing better prices for the last two years than has ever been known since it was found to be useful, and that more men are at work for it to-day than ever in the history of mica.

How has the farmer of this Nation fared under this Democratic administration? We are more dependent upon the prosperity of the American farmer for the Nation's growth and development than upon the prosperity of any other industry. His prosperity reaches out to the millions of homes and gives contentment, happiness, and comfort to those engaged in feeding the world and in furnishing the raw materials for clothing the world. Not only the advancement but also the stability and continued existence of this Government is bound up in a contented and prosperous rural population. We have read of governments being overthrown and dominant political parties being turned out of office because of discontent resulting from hard times and scant rewards for labor, but we have never heard or read of such calamities resulting from prosperity which produces contentment and happiness.

We have read with some amusement how the Republican candidate for President has on his recent speaking tour through the West prescribed for the western farmers. He has been telling them that they should vote for a party that would pass a protective-tariff law and thereby insure their continued prosperity. We note that he is not offering his remedy to produce prosperity, for he recognizes the fact that it exists to-day all over this country; but he is offering this remedy against some calamity that he prophesies will overtake this country at some indefinite future time if the country does not elect him and adopt Republican policies.

Is it not unreasonable to expect a grateful people to condemn the party in power under which it has been so prosperous? It is not usual to pour medicine into a healthy man or radically change the treatment when the patient is doing well. The sensible thing to do under such circumstances is to continue the treatment that had proven successful. The farmers of this Nation have enjoyed the most prosperous times they have ever known under this Democratic administration.

The following paragraph is taken from the New York World, under the caption "Off-color calamity":

We have had many calamity campaigns in this country, conducted first by one party and then by the other, but this is positively the first in which the calamity referred to is all out of sight, somewhere around the corner, away off in the dim future. It will be interesting to observe what effect this malicious animal magnetism has upon a great people, who never before were so prosperous.

During this administration our farms have yielded abundant crops, which have sold at unprecedented prices. According to the figures given out by the Manufacturers' Record the gain in the value of all farm crops in the United States for 1915 was in excess of those for 1914 by $526,070,000. Of this gain $317,209,000, or a little more than 60 per cent, was in the South.

Of all our industries the cotton farmer has suffered most from the European war. He has been completely cut off from the great manufacturing districts in central Europe. In spite of this great loss of markets, which has held back the price from what it would have been, cotton has maintained a higher price for the last three years than for any other three years since the close of the Civil War. It is now selling on the spot markets of the South at 15 cents per pound.

Wheat is not the product of any one section of this country. It is claimed for wheat that it is grown in every country and in every climate on the globe. No other cereal is so widely distributed over the face of the earth as is wheat. It is harvested every day of the year somewhere and the song of the reaper is perpetual. While the wheat grower of the Middle West is sitting by his January fire, his wheat fields blanketed in knee-deep snow, the South American wheat grower is sweltering in the harvest fields. This great world product and necessity of life is to-day selling on the market around $1.50 per bushel. The average price for wheat, too, has made a high record during the last three years.

It is unnecessary to attempt to enumerate the different products and show how each has sold for record-breaking prices. This could be done with corn, oats, hay, beef cattle, stock, and all the other products that come from the farm that go to sustain life.

I can not pass from the list of farm products without a special mention of wool. The effect of the Democratic tariff on sheep raisers caused so many prophecies of dire calamity by our Republican friends that I must take this opportunity to allay their apprehensions by reading from a statement on the "High price of wool" by the Department of Agriculture, given out on July 13, 1916, as follows:

Unusually high prices prevail for wool. The average price paid to producers of the United States for unwashed wool during June was 28.7 cents per pound, which compares with 23.7 cents, 18.4 cents, 15.6 cents, 18.7 cents, 15.5 cents, respectively, in June of the past six years. These estimates are based upon reports of crop correspondents of the Bureau of Crop Estimates.

With every branch of commercial industry strained to meet the unprecedented demand for commodities at ever-increasing profits it is needless to say that the wage earner has come in for his share of prosperity.

The Washington Times, a Republican newspaper in this city, which has never been accused of friendship for this administration, on April 29, 1916, gives a tabulated list of 33 leading industries in this country, showing the number of men employed and the increased monthly pay roll effective May 1. This list totals 706,500 men and shows the total increase in monthly pay roll of $5,368,872, or a yearly increase of $64,426,464. The New York correspondent of this paper has the following to say as to the situation:

May day will usher in an unprecedented labor situation in the United States.

The day formerly marked in Europe by labor disturbances will dawn in the United States with the American laboring man taking his dinner pail and hustling off to his work, knowing that from that time on he will draw down a daily increase of $204,616 in wages.

The increase in the wages paid to the men employed by these 33 companies is no exception. The wages paid the workingmen in all the other enterprises in this country have likewise been increased. Every department of industry is employing record-breaking numbers of operatives and caring for record-breaking amounts in pay rolls.

The present prosperity of the United States rests upon safe and sure foundations. Those Republican calamity howlers who predict that our great prosperity can not last, and that we will

meet an awful fate unless a Republican President and a Republican Congress is elected are taking counsel from their experiences under past Republican administrations and losing sight of the steadying influence of the wise and just laws which have been enacted by this Democratic administration, and of equally wise and just laws which, if they are continued in power, they will enact to meet the commercial needs of this country as each new emergency arises.

If we were still operating under the cramped and inflexible currency system which was given to us by the Republican Party, I admit there would be some danger of a collapse. These laws, which were more useful to crush than to build up the commerce of the country, have been shattered, and we have a new currency system, bearing a Democratic brand, safe enough to insure its stability and flexible enough to meet the needs of the country. Under it the country may grow without restriction to the full limit of healthful and legitimate expansion.

This wise Democratic legislation has won the approval of Republicans since its beneficial results have been seen. This feeling of confidence is shared by the business world, as shown by the stability of markets. There is nothing now on the commercial horizon to indicate disaster, and the Republican prophesy of calamity seems born out of a desire for office.

Mr. William B. Ridley, a former Republican Comptroller of the Currency, in an interview adds his testimony to the value of the Democratic currency law in the following language:

Of almost equal importance is the improvement in our financial system, due to the establishment of the Federal reserve bank, which gives us the machinery and organization for utilizing credits and such a mobilization of our reserve money as to make impossible any such sudden derangement of our financial matters as we have frequently seen in the past. It was extremely fortunate that this reform in our financial machinery was in operation soon enough to be of assistance during the crisis brought on by the war.

Another piece of constructive Democratic legislation which is especially for the benefit of the American farmer is the rural-credits law. The organization of the farm-loan banks will make him independent of the money centers and relieve him from the oppression of the loan sharks who have too often oppressed him in the past. This law, when it gets in active operation, is expected to do for our farmers what the reserve banks are now doing for the commercial world.

In spite of the great prosperity which they are now enjoying the owners of those industries that received unjust advantage under the high protective tariff laws enacted by the Republican Party are clamoring for the defeat of the Democratic candidates and for Republican victory in order that they may again have this unjust advantage. Any candidate that they support will be expected to give them this reward in return. The Democratic tariff law reduced the tariff in the interest of the great masses of our citizens, and by the income tax we are forcing the rich of the country to contribute out of their incomes toward the support of the Government, a burden that they have heretofore not borne their just share of.

With such a wonderful record of achievements and such wonderful prosperity all about us, thoughtful men of this Nation will ask themselves the question, "Why make a change?"

## Aviation.

### EXTENSION OF REMARKS
OF
### HON. MURRAY HULBERT,
OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr HULBERT. Mr. Speaker, on Thursday of this present week the Harlem Board of Commerce in my congressional district gave a luncheon to celebrate the inauguration of the first flying yacht club in America, which was attended by more than 600 people, several of whom arrived from distant points in neighboring States in hydroplanes. It was impossible for me to attend and participate in this notable event because of the impending consideration of the railroad strike legislation; but it was particularly gratifying to find such animated appreciation of the importance of this movement among the people whom I represent, and I am sure I did not mistake their very evident interest in the subject of aviation when I introduced and advocated the $14,000,000 addition to the Army appropriation bill for aviation.

Now comes an announcement from the Postmaster General demonstrating the commercial and economic value of the aeroplane as a carrier of the mails.

Some time since the Post Office Department advertised for bids for providing a more frequent and efficient mail service in Alaska, and I herewith submit a statement issued by Assistant Postmaster General Praeger:

ALASKA, ROUTE NO. 678012.

From Seward by Knit, Susitna, McGrath, Tokotna, and Flat to Iditarod.

Frequency, twice a week all the year; weight limit, 1,000 pounds.

The only bid received May 12, 1916, in response to the aeroplane advertisement of February 12, 1916, was the following bid for route 678013, Seward to Iditarod:

Earl L. Byers, $49,500. No bond.

That bid is at the rate of 62.6 cents a mile and 23.5 cents a pound on the basis of the full weight limit being carried both ways every trip.

The rate for the present winter service (November 1 to April 30) on the Seward-Iditarod route is $22,865 for the period of each year, 82.1 cents a mile and 92.5 a pound. The length of the aeroplane route, however, is stated as 380 miles (air line), whereas the star route between the same points by trail is 526 miles.

Were the aeroplane route established, it is estimated that the present service could be changed as follows:

| | |
|---|---|
| *Reductions.* | |
| Seward Iditarod route (discontinue) | $22,865 |
| Cordova to Fairbanks route (reduce) | 30,651 |
| Fairbanks to Tanana route (reduce) | 9,250 |
| Tanana to St. Michael route (discontinue) | 35,000 |
| Holy Cross to Iditarod route (discontinue) | 6,715 |
| Tanana to Unalakleet route (omit) | 1,200 |
| Susitna to Knit route (discontinue) | 465 |
| Ophir to McGrath route (discontinue) | 320 |
| Total saving | 106,466 |
| *Increases.* | |
| Seward to Iditarod (aeroplane) | $49,000 |
| Iditarod by Kaltag to Nulato | 12,880 |
| Kaltag by Unalakleet to St. Michael | 7,200 |
| Tanana to Ruby | 2,048 |
| Ruby to Yukokakat | 280 |
| Total increases | 71,908 |
| Reductions | 106,466 |
| Increases | 71,908 |
| Net saving to the department | 34,558 |

The time of transit of mail in winter from Cordova by Fairbanks to Nome is approximately 30 days.

The time from Seward by Iditarod (aeroplane) and Kaltag to Nome would be about 18 days.

## Statement of Thomas A. Edison, Announcing His Support of President Woodrow Wilson.

### EXTENSION OF REMARKS
OF
### HON. EZEKIEL S. CANDLER,
OF MISSISSIPPI.

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. CANDLER of Mississippi. Mr. Speaker, under the leave granted me by the unanimous consent of the House of Representatives I publish in the RECORD the statement of Thomas A. Edison, the great inventor, although a lifelong Republican, announcing his support of President Woodrow Wilson and giving in a concise and pointed way his reasons therefor. This article was called to my attention by Mr. Migue Oliver, a laboring man, who, like many other laborers in the United States, is in his humble way supporting the President because of the great service he has rendered the country, and especially for the reason that he is the sincere friend of the laboring man. Mr. Oliver, like many others, appreciates the fact that while the President is the friend of labor and those who toil, and fair to them, he is also fair to every calling, avocation, trade, and business in the United States, whether it be great or small, and that the President is a great American, who treats everybody justly, and is the friend of humanity, rich and poor, and believes in equal and exact justice to one and all. Mr. Edison's statement, which is published in the New York Times, Monday, September 4, 1916, is as follows:

EDISON FOR WILSON—NOT AN UNTRIED MAN—SAYS PRESIDENT HAS GIVEN US PEACE WITH HONOR AND HAS EARNED TRUST—SHOWS OPENNESS OF MIND—SPEECHES PROVE HUGHES'S CAPACITY FOR HINDSIGHT IS HIGHLY DEVELOPED, INVENTOR DECLARES.

Thomas A. Edison, although a lifelong Republican and a supporter of Col. Roosevelt for the Republican presidential nomination, announced yesterday through the Democratic national campaign committee that he intends to vote and work for the reelection of President Wilson. Mr. Edison said:

"Not since 1860 has any campaign made such a direct call on simon-pure Americanism. The times are too serious to talk or think in terms of Republicanism or Democracy. Real Americans must drop parties and get down to big fundamental principles.

"More than any other President in my memory Wilson has been faced by a succession of tremendous problems, any one of which, decided the wrong way, would have had disastrous consequences. Wilson's decisions so far have not got us into any serious trouble, nor are they likely to.

"He has given us peace with honor. The talk about the United States being despised is nonsense. Neutrality is a mighty trying policy, but back of it are international law, the rights of humanity, and the future of civilization.

"With reference to Mexico, I think the President has acted wisely, justly, and courageously. It was right that the United States should not have recognized such a murderous personality as Huerta. I do not believe that we should have intervened, nor do I believe that we should intervene now. Mexico is a troublesome neighbor just now, but war and conquest are not going to make her a better one. Both against England and against human slavery the United States worked out its salvation through revolution, and it was a pretty slow, trying process.

"It has been said that Wilson at first was against preparedness. Perhaps he was, but when convinced that intelligent public opinion was overwhelmingly in favor of it, he changed. That is the proper thing for our President to do. A President defiant of public opinion would be a dangerous man in our system of government.

"His attitude on the tariff shows an equal openness of mind. A tariff commission will take the whole problem out of politics. It is my hope that experts will be named, and that the body will be continuing and vested almost with the dignity of the Supreme Court.

"They say he has blundered. Perhaps he has. But I notice that he usually blunders forward. You can't get 100 per cent efficiency in a democracy. I don't know that we ought to want it. We would be machines, and we would have to sacrifice too much of freedom.

"As I said at the start, it has been just one big thing after another with Wilson. I have never known so many dangerous questions brought up for decision to any one President. Now he has the general strike of the skilled railway men, which, if carried out, will throw the whole country into confusion, and prove a calamity that, in certain eventualities, will have results bound to extend over a long period of time. He is acting with his usual courage and sanity.

"In my opinion, Mr. Hughes, if President, would find it difficult to decide on the best course for the Government to take in this strike. His capacity for hindsight, as we learn from his speeches, is highly developed, but as to his foresight, we are not equally well informed.

"Mr. Wilson has now had about four years of experience, and he has earned faith and trust. I do not think it a logical or sensible thing to change to an unexperienced and untried man just for the sake of change, or without much better reasons being given for the change than I have noticed.

"Roosevelt was my choice. He has had experience, and is one of the best of Americans, but the machine-controlled Republican Party would not have him. Therefore I am for Woodrow Wilson."

Mr. Edison is on a camping trip with Henry Ford and John Burroughs, the naturalist, and he sent his statement from Saratoga.

---

## John Ericsson.

---

# SPEECH

OF

# HON. HALVOR STEENERSON,

OF MINNESOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, August 7, 1916.*

The House had under consideration the bill (H. R. 5) for erecting a suitable memorial to John Ericsson.

Mr. STEENERSON. Mr. Speaker, I did not know until this moment that there would be an opportunity to speak in support of this bill. John Ericsson was not only great in his profession, but he was a pioneer in science. He blazed the way patiently and laboriously where no one had gone before. He was born in an obscure mountain district of Sweden in 1803 and died in New York in 1889. He emigrated at an early day to England, and after having made important inventions and discoveries there came to the United States in 1839.

While in England he competed with Stephenson as the inventor of the locomotive. He invented the first fire engine. He is known to fame especially because he was the inventor and builder of the *Monitor* and because of his connection with the first successful application of the screw propeller in navigation. The British Admiralty and naval engineers did not become interested in Ericsson's work, but his ideas were appreciated by the American consul at Liverpool—Mr. F. B. Ogden—and he placed at his disposal funds to construct a small ocean steamer, which was subsequently sent across the Atlantic. Mr. Ogden and Capt. Tobert Stockton, United States Navy, induced him to come to the United States, and he arrived in New York in 1839, and two years later was employed in constructing the U. S. S. *Princeton*, which was the first steam warship to have its machinery below the water line and to use the screw propeller. He soon became known for the great number and novelty of his inventions, such as artificial draft for steam boilers which does away with smokestacks and saves fuel, the caloric engine, the sliding telescope, machinery to check the recoil of naval guns, torpedo-boat destroyers, and apparatus for deep-sea sounding. In the later years of his life he perfected a solar engine, fuel heat for which is obtained from the sun, and made valuable studies of solar physics. After his death, at the request of the Swedish Government, his remains were sent on an American warship to be interred in Sweden.

The Secretary of the Navy on that occasion, among other things, said: "Of the innumerable applications of mechanical art that are the fruit of his genius, many so long ago passed into general use that they have ceased to be associated popularly with his name; but his achievements in the field of naval science will remain forever a monument to his memory. To the United States Navy he gave the first *Monitor*, and in her he gave to all the navies of the world the germ of the modern battleship." On the same occasion Mr. George H. Robinson said: "We send him back crowned with honor; proud of the life of 50 years he devoted to this Nation, and with gratitude for the gifts he gave to us. Was he a dreamer? Yes. He dreamed of the practical application of screw propulsion, and the commerce of the world was revolutionized. He dreamed of making naval warfare more terrible, and the *Monitor* was built. After one trial, at a most critical period of this Nation's history, where were the navies of the world? The London Times said: 'England has no navy.' Again he dreamed, and the *Destroyer*, with its submarine gun, was born. He dreamed of hot air, and behold 10,000 caloric engines. He dreamed of the sun's rays in sandy deserts, where water was hard to get, and the solar engine came; and so he dreamed and worked for 70 years. He bore the strain of unremitting toil, and at the end his last words were: 'This is rest.' Well earned, benefactor of the world!" Admiral Schley, in accepting the charge, said: "Ericsson's genius created a new instrument of war, and it is not too much to say the latest modern battleships are but modifications in one form or another of his original idea as perfected in the little *Monitor*." He was a strong sympathizer with the Union cause, and in designing the first *Monitor* he remarked: "The ironclad intruder will thus prove a severe monitor to those leaders (of the southern rebellion). On these and similar grounds I propose to name this new battery *Monitor*."

The *Monitor* was launched January 30, 1862, 100 days after the laying of the keel, and she fought the *Merrimac* on March 9, 1862. Before the end of 1864 Ericsson had designed and built of this type 12 additional ships.

Ericsson believed that the art of war was in its infancy, and that when perfected man would be forced to live in peace with man. "This glorious result has been the dream of my life, and will unquestionably be attained before the end of the century," he said. On another occasion he remarked that his motto was: "The liberty of the seas will be the happiness of the earth." He added, "My only object is that of seeing the sea declared by all nations as sacred, neutral ground. It is the highway of mankind." "His sympathies were always against the powers disposed to infringe upon the liberties of others, and his brains always at the service of those whose attitude was that of defense against them." (Church, vol. 2, p. 157.)

It may be said of Ericsson that he found the American Navy of wood, propelled by sail and paddle wheels, exposed to hostile shots; that he left it with machinery under the water line, moved by screw propellers, and ironclad. He found it vulnerable, and left it invincible.

It is characteristic of the people of Sweden to be independent, daring, and brave, and these qualities are requisite in the pioneer, whether in the paths of science or in other walks of life. There are a great many of the countrymen of John Ericsson in my district and in my State. They came there as pioneers, nearly all of them, with small means, and they have helped to lay the foundations of one of the greatest commonwealths of the Union. They have contributed their full share toward its civilization, and its upbuilding upon enlightened principles of freedom and liberty. I think this quality of mind and character that makes a successful pioneer is one of the most admirable qualities in a human soul. [Applause.] It is well, therefore, for the people of the United States to build this monument, not only because we owe a great debt of gratitude to John Ericsson as the inventor of the *Monitor*, which rendered such signal service to the cause of the Union in the Civil War, but as commemorating and holding up to admiration those characteristics of mind and soul which make the pioneer, to whom the young should look up with emulation.

Recognition of his genius and services to mankind is growing as the years roll by, and this monument will but symbolize the love the American people cherish for the memory of a great man. [Applause.]

## The Ownership of the Railroads.

### EXTENSION OF REMARKS
OF
### HON. WARREN WORTH BAILEY,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,
*Monday, September 4, 1916.*

Mr. BAILEY. Mr. Speaker, the irrepressible conflict between the rights and liberties of the people and the arrogance and greed of the railroad cormorants is reaching a critical stage. The recently averted strike has forcibly demonstrated the danger and folly of intrusting to individuals the control and management of enterprises that are completely monopolistic.

The idea, assiduously inculcated by the privileged classes, that railroads are the private property of the stockholders is as preposterous as it is pernicious.

Railroads are public and not private property; the fact that they are managed as if they were private property does not alter their character.

A railroad is a public highway and its managers are public agents or State officials. It is impossible to regard them in any other light or conceive any other relation. A railroad that is not managed by public agents is not a public highway. The State could not exercise its right of eminent domain if a railroad were private property. To take the property of one person and bestow it upon another, even with just compensation, would be such an arbitrary exercise of the sovereign power that no State constitution would tolerate it.

Mr. Speaker, Judge Jeremiah S. Black, of Pennsylvania, one of the ablest jurists this country has produced, clearly defined the legal relations existing between the State and the persons whom she authorizes to manage her highways, in an opinion rendered in the case of the Erie & N. E. R. R. *v.* Casey (2 Casey, pp. 307-324). The opinion of this great judge and fundamental Democrat is here given in full:

JUDGE BLACK'S DECISION.

The authority given by the act of assembly of October, 1855, to the defendant to take possession of the railroad is asserted by the plaintiff's counsel to be an act of confiscation—a taking of private property for public use without compensation. If this be true, the injunction ought to be awarded, for no legislature can do such a thing under our Constitution. When a corporation is dissolved by a repeal of its charter, the legislature may appoint or authorize the governor to appoint a person to take charge of its assets for the benefit of its creditors and its stockholders; and this is not confiscation any more than it is confiscation to appoint an administrator to a dead man or a committee for a lunatic. But money or goods or lands which are or were the private property of a defunct corporation can not be arbitrarily seized for the use of the State without compensation paid or provided.

This act, however, takes nothing but the road. Is that private property? Certainly not. It is a public highway solemnly devoted by law to the public use. When the lands are taken to build it on they are taken for public use; otherwise they could not have been taken at all. It is true the plaintiffs had a right to take tolls from all who traveled or carried freight upon it, according to certain rates fixed in the charter, but that was a mere franchise, a privilege derived entirely from the charter; and it was gone when the charter was repealed.

The State may grant a corporation or an individual the franchise of taking tolls on any highway, open or to be opened, whether it be a railroad or river, canal or bridge, turnpike or common road. When the franchise ceases by its own limitation, by forfeiture or repeal, the highway is thrown back on the hands of the State and it becomes her duty as a sovereign guardian of the public interests to take care of it. She may renew the franchise, give it to some other person, exercise it herself, or declare the highway open and free to all the people. If the railway itself was the private property of the stockholders, then it remains theirs, and they may use it without a charter, as other people use their own—run it on their own account—charge what tolls they please—close or open it when they choose proper—disregard every interest except their own. The repeal of charters on such terms would be courted by every railroad company in the State, for it would have no effect but to emancipate them from the control of the law and convert their limited privileges into a broad unbounded license.

On this principle a corporation might be rewarded, but never punished for misconduct. Repeal of its charter instead of bringing it to a shameful end would put "length of days into its right hand, and in the left riches and honor." But it is not so. Railroads made by the authority of the Commonwealth upon the land taken by her right of eminent domain and established by her laws as thoroughfares for the commerce that passes through her borders are her highways. No corporation has any property in them, though corporations may have franchises annexed to and exercisable with them.

Such a franchise the plaintiffs had, but they have it no longer. The right to take tolls on a road is an incorporeal hereditament which may be granted to a corporation or to an individual, but the grantee has an estate in the franchise.

But what estate? The estate endures forever if the franchise is perpetual; for years if it be given for a limited period; and at will if it be repealable at the pleasure of the legislature. This corporation, after its privileges are abused, had an estate at will, and the Commonwealth chose to demand repossession. That terminated the estate as completely as an estate for years would be terminated after the expiration of the term. The grant was exhausted, the corporation had lived its time out. Its lease of life was expressly limited at the day of its creation to the period when the legislature should dissolve it for misconduct. When the legislative will had spoken the hour had come. Having no right to keep the franchise any longer, it would be absurd to claim compensation for taking it away. To say that the stockholders have a right to compensation for the franchises is to say the charter could not be repealed at all, with or without compensation. If they had no right to retain them, they have no claim to compensation.

A brief recapitulation of the main points in the case may serve to make the grounds of judgment somewhat plainer.

1. The charter was granted with a reservation of the right to repeal it if the franchise should be abused or misused.
2. We are satisfied that, in point of fact, those franchises were abused and misused.
3. After that event happened the general assembly was invested with the full power to repeal the charter, and the corporation held their franchises from the State merely as tenants at will, in the same manner as if there had been an unconditional reservation of the right to repeal.
4. After the interest of the corporation had been cut down by their own misconduct to an estate at will the legislature can only enlarge the charter, so as to give it a perpetual grant, or put the corporation on another term of probation.
5. The judicial proceedings against the corporation did not and could not disarm the legislature of its reserved right to repeal, or enlarge the estate of the corporation in its franchises, nor change the terms of the original grant, for these are things which the judiciary can not do, nor the executive, either.
6. The power of the legislature is not restricted by the rules of pleading and evidence which the courts have adopted; and therefore the State may act in the legislature upon a truth which she would have been estopped to show the court had not the legislature interfered.
7. The power to repeal for abuse of corporate privileges is a different right from that of demanding a judicial sentence of forfeiture.
8. The charter being constitutionally repealed, the franchises are as a necessary consequence resumed to the State; and the road remains where it always was—public property.
9. The corporators can not be entitled to compensation, for they had no property in the road; and after their default they held the corporate franchises at the will of the legislature, and the exertion of that will in the resumption of the franchises did them no injury but what they agreed to submit to.

The injunction which the plaintiffs have moved for is refused.

Mr. Speaker, I believe the doctrines above laid down by the distinguished Pennsylvanian have never yet been called into serious question. The railroads are public highways. Those who operate them merely possess a franchise under which they are permitted to exercise control and to charge for carrying passengers and goods. They have no property in the highways themselves, and if they shall forfeit the franchises they have been granted by misconduct or failure on any account to render the service they undertook to perform, it is within the province and it is the duty of the people to recover their own, and that without compensation to the holders of the franchises. It is obviously absurd to say that men should be compensated for a failure to perform a service which they bound themselves to render.

JUSTICE GAYNOR CONFIRMS JUSTICE BLACK.

The late Justice Gaynor when on the appellate bench of New York rendered a decision in the Brooklyn Rapid Transit case practically along the lines laid down by Justice Black in the case above cited. In issuing a writ enjoining the transit company Justice Gaynor laid down the principle that the corporation could be excused only by an act of God from the performance of the public service it had undertaken to render and for the doing of which it had obtained its charter and franchises. These it was plainly forfeiting when it failed to render public service by reason of a quarrel with its employees over working conditions and rates of pay. No such quarrel could absolve it from its obligations to the public. It was bound either to render the service required by its charter or it was to forfeit that charter and its franchises, these reverting to the public from which they were derived.

It seems to me, Mr. Speaker, that these principles should be kept clearly in mind in connection with any effort on the part of the American people, through Congress or legislatures, to deal with the serious problem of the railroads. We were face to face only a few days ago with a great industrial war. There was and there still is a quarrel between the railroads and their men. For the moment only this quarrel has been composed by the adoption of an eight-hour law, but everyone clearly understands that this composition is only temporary. The real issue remains unsettled. At any instant the quarrel may break out afresh and the public may again be brought face to face with a danger which in some aspects is more terrible than that of foreign invasion.

How shall we go about dealing with this momentous issue? It should be remembered that the issue does not concern the railroads and their help alone. It concerns the great body of the people—farmers, mill workers, miners, merchants, professional men, manufacturers, the entire community. We are bound to think of the larger interest involved, and surely that larger interest rests with the masses who are neither owners of railway stocks and bonds nor engaged in railway work.

But railroad owners and railroad workers do not agree regarding conditions and terms of employment. They are widely at variance concerning their respective rights. They are threatening to suspend the performance of their duties while they fight out their differences, leaving the great public meanwhile to look on and suffer, as indeed it must.

Is it not easy to apply the principles laid down by Justice Black to a situation such as this? Are not the rights of the public paramount to those of the holders of railway stocks and bonds? Can they set these securities up against the claims of the public to service? Is it for a moment to be thought of that the public shall stand aside while the railroad owners and the railroad operatives engage in a bitter altercation which may plunge the whole Nation into desperate want and unthinkable turmoil and trouble?

THE FUTILITY OF FORCE.

The railroads are demanding compulsory arbitration; their employees are denouncing this as involuntary servitude. It is not my purpose to inquire into this. What I hope to do is to throw a little light on the real problem and I hope on the real solution. But one thing I want to say in passing. An army which cuts itself off from its base of supplies is a defeated army at the very start, and the industrial army which resorts to the cessation of work in an effort to enforce its demands does this very thing. Its base of supplies is its employment, its wages, its weekly or monthly pay. It may have a considerable reserve supply; its war chest may be well filled; but just the same it must of necessity grow weaker and more vulnerable every moment after it cuts itself off from its base. The very stars in their courses fight against an army so situated. And so, while always the friend and champion of labor, always concerned for its welfare, always devoted to causes which I have believed to be such as to promote labor's independence, it has never seemed to me prudent for labor to resort to force. It has been a rather doubtful reliance. I have felt that had labor employed a thousandth part of the energy and the resources to the work of liberation that it has devoted to the exercise of main strength in the settlement of industrial disputes, there would be little occasion at this moment for Congress or the country to be worrying about what the near future may bring forth as a result of frictions and misunderstandings between the railroads and their employees. Occasions for friction and misunderstanding would long since have been effectually forestalled.

PUBLIC RIGHTS ARE PARAMOUNT.

Justice Black lays it down as a fundamental principle that the railroad is a public highway. The rights of the public in it are paramount. It may grant for a period or at will the privilege to corporations or individuals of collecting tolls thereon, but it remains nevertheless a public highway, and the rights of the public therein may be asserted at any time when the public interest demands. Let us keep this thought clearly in view, and let us apply it fearlessly to the problem calling for solution.

Personally I do not look with entire favor on public ownership and operation of railroads. I think it far better than the system we now have. But a better system, as I conceive it, is one which would maintain the railroads much as the rivers and the common roads are now maintained. No one would think of turning over a river or a canal or a common road to an individual or a corporation for its exclusive use and enjoyment, yet we turn over the iron highway precisely so. We give to an individual or a corporation the exclusive right to the control of the shortest and best line between two given points—between New York and Chicago, between St. Paul and Portland, between St. Louis and Los Angeles, between Kansas City and Denver, between Washington and New Orleans.

In the case of a river, a canal, or a common road we throw it open to all comers on equal terms. Anyone may operate as a carrier upon, through, or over it merely by complying with the regulations prescribed by the public. It is thus retained at all times and under all circumstances as a public convenience; it never becomes the instrument of private greed or of corporate ambition.

We know this is not true of the iron highway. That is monopolized; it is under private control; it renders service to the public only when and how those controlling it choose. It may be turned at any moment into an instrument of extortion; into an engine of oppression; into a huge club to be held over the head of commerce and industry; into a cunning device for controlling the lives and fortunes of millions of men and women dependent upon it for daily bread.

Why should this sort of highway be treated differently from all other highways? Why should it be turned over to individuals or corporations? Why not put it on an even keel with the river, the canal, and the common road? Why not permit anyone who chooses to operate over it as freely as the individual or the corporation may now operate on, through, or over the river, the canal, and the common road?

BOTH PRACTICAL AND SIMPLE.

Is this impracticable? Not at all. It is not more so than the common use of the common road, the river, and the canal. Of course, proper regulation of traffic would have to be provided. But there would be no difficulty in that. Nothing could be simpler. There are many iron highways to-day over which more than one set of trains are operated without confusion. It should be as easy for the public to provide regulations for the joint use of the iron highway as it has been to provide regulations for the joint use of the river, the canal, and the common road.

And this, Mr. Speaker, seems to me the real solution of the problem which is to-day perhaps the gravest lying before the American people. The plan I suggest would make competition as free on the iron highway as it is at this moment on the river, the canal, and the common road. It would avoid the danger of a great body of public servants which has haunted the dreams of so many opponents of public ownership. And it would make transportation rather than stock jobbing the real business of the railroad man. He would cease watching the ticker and turn his attention to securing freight and passengers. He would become a public servant in the highest and best sense instead of a public taskmaster. He would take his rightful place in society as a contributor to its development and upbuilding rather than as a collector of tribute and, as too often happens, a conspirator against the public rights. And I very earnestly hope that the American people may have the wisdom to make this possible through the assertion of their rights to free and open highways of every character.

---

**Is Congress a Coordinate Branch of the Government?—Republican Independence v. Democratic Subserviency.**

---

## EXTENSION OF REMARKS

OF

## HON. JULIUS KAHN,

OF CALIFORNIA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. KAHN. Mr. Speaker, commentators on the Constitution of the United States have frequently called attention to its wonderful system of checks and balances. The framers of that immortal document devised a scheme of government embracing three coordinate branches—legislative, executive, and judicial.

It was intended that each should perform its special functions without interference from either of the other branches. It was hoped that each would be entirely independent of the others and, being independent, each would act according to its best judgment. Pressure was not to be brought by any one branch upon a coordinate branch.

But in very recent years under the present Democratic administration the Executive has entirely subordinated the legislative branch, and the latter has become the mere mouthpiece of the former. The Executive takes snuff and the legislators sneeze. The Executive expresses a wish and the legislators scurry to enact it into law. Individual opinion of the legislators in these days is made entirely subservient to the will of the Executive. Oh, what a change has come over the Congress in recent years.

Mr. Speaker, I have served as a Member of the House of Representatives practically eight terms. During six of these the Republicans controlled the Government in the executive and legislative branches. Somehow or other Congress was differently constituted in those days. I recall how President McKinley sent a message to Congress during my first term of service, in which he stated that it was our plain duty to grant free trade to the island of Porto Rico.

The Republican majority in the House was very small. As I now recall, the Republicans had but 6 votes to spare—and yet they had the courage to express their own views, which were in opposition to those of the Executive. They felt that for the time being free trade with Porto Rico might embarrass the tobacco and sugar industries of this country, and had the courage to vote against the desire of the President of the United States. Judging by more recent events, if the present Chief Executive had expressed such a desire the present Democratic

majority would have fallen over each other in their haste to obey the Executive's will.

During the administration of President Roosevelt the Executive had numerous tilts with Republican Congresses. The Members of the Senate and House on many occasions manifested their independence of the Executive, and convinced the country they were, in fact and in deed, a separate and coordinate branch of the Government. They had the courage of their convictions, and they did not fear to express those convictions even though they might incur the displeasure of the Executive by so doing.

In fact, in one of his annual messages, the President took occasion to scold Congress for having refused some special appropriations which he had requested. The House thereupon appointed a select committee which called upon the Executive to make good his charges against certain members of the Appropriations Committee. He failed to do so—and the House promptly struck the offending language from his annual message. Imagine our Democratic friends doing such a thing to the present Chief Executive.

Take the administration of Mr. Taft. He urged strongly the passage of a Canadian reciprocity bill. He used all the powerful influence of his great office to get the Republican Members of Congress to stand with him on this proposition. A majority, however, using their own judgment and acting as their consciences dictated, refused to sanction the legislation. They gave additional evidence to the country that a Republican Congress could still be independent of the Executive and maintain its entity as a coordinate branch of the Government.

None of these Republican Executives ever went so far as to go to the Capitol, send for Members, and bring personal pressure to bear upon them to induce them to vote for the Executive's recommendations. I do not recall a single instance in our country's past history when the Executive used such means to secure the passage of the legislation he advocated.

It is time for Congress to take note of these things. It is time for the country to take heed. The continuance of such a course by future Executives, and the continued subserviency of future Congresses to the Executive will, will undermine our institutions and destroy our Government.

## The Texas Situation.

### EXTENSION OF REMARKS
OF
### HON. J. HAMPTON MOORE,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. MOORE of Pennsylvania. Mr. Speaker, the country is still very much interested in the recent primary election in Texas. While Maine has attracted the orators of both political parties and is usually regarded as a weather vane showing the way the political wind blows, Texas looms up in the present campaign as a fair indicator. The pleasant little controversies some of us have had in the House on several occasions recently have contributed much to our general information on this subject. A year ago, for instance, no Republican would have dreamed of a vote of 102,000 for an anti-Wilson senatorial candidate in Texas, and yet former Gov. Colquitt, who claimed that President Wilson was not treating Texas fairly, notwithstanding that Attorney General Gregory and Postmaster General Burleson both hailed from that State, succeeded in polling that enormous vote. Gov. Colquitt, himself a Democrat, succeeding in polling that vote notwithstanding he had boldly and openly proclaimed the Wilson administration "the greatest failure in history."

IS WILSON LOSING TEXAS SUPPORT?

Some good Democrats from Texas, chagrined at the size of the Colquitt vote and perturbed over the defeat for renomination of many of the Wilson-Burleson Members of the House, have endeavored to explain the situation with a view of proving that Texas is not drifting from her Democratic moorings. They point to the recent combination of anti-Colquitt candidates in favor of CULBERSON, whose nomination was thus made sure, but even that does not clarify the situation. One of my Texas correspondents further adds to the mystery about the Texas upheaval. He thinks the Texas voter is not well pleased with the administration, and reasons thusly:

There are 700,000 qualified voters in Texas. CULBERSON received only 155,000 votes. This is Wilson's full strength in the State, and is 70,000 less than he received in 1912. All the professional politicians, the has-beens and the hopes-to-be, their kinsfolk and friends, are back of the CULBERSON vote. No consistent Texan can vote for Wilson's maladministration in Mexico.

Thus we are given a glimpse of one of the causes of dissatisfaction in Texas. The President's Mexican policy has made him enemies. The people of Texas are right along the border and, of course, they understand what they are talking about.

THE EIGHT-HOUR INTERFERENCE RESENTED.

Another source of trouble down there results from the President's eight-hour day propaganda. Eight hours on the farm or in the cotton field would be a difficult problem for the industrious people of Texas. Witness the statement of Col. H. N. Pope, president of the Texas Farmers' Union, issued from Fort Worth, Tex., yesterday. I commend it to those who have been studying the Texas attitude toward President Wilson's administration:

[From the Washington Herald.]

TEXAS FARMERS' UNION SCORES STRIKE ACTION—PICTURE CONGRESS AS IN FEAR AND TREMBLING BEFORE TRAINMEN.

FORT WORTH, TEX., *September 3.*

H. N. Pope, president of the Texas Farmers' Union, has given out the following statement commenting on the eight-hour law passed by Congress Saturday:

"The people of this Nation have during the past week passed through the most humiliating experience this Government has ever endured. A few labor-union leaders have stood at the portals of Congress demanding that Government give them a ransom or they would wreck society.

"This Nation, instead of meeting the situation bravely, has delivered the goods in fear and trembling. Our American Congress has stood within the shadow of the goddess of justice and voted an increase in wages to 400,000 trainmen, who are the highest paid laborers in the world, and never at any time mentioned the 350,000 trackmen, who are perhaps the poorest paid workmen in the world, and who must subsist almost wholly upon the crumbs that the trainmen leave upon the table.

"When cotton was selling for 6 cents per pound two years ago, and poverty stalked over the Southland, causing a greater financial loss to the southern plowmen than the freeing of the slaves, Congress confessed inability to cope with the situation and stepped aside, letting this awful burden fall upon the backs of the tillers of the soil. The organized plowmen plead with Congress for relief, but we were told that it would not be constitutional for the Government to undertake to fix the price of cotton or to advance money on cotton in storage, and that Congress was a slow-moving body and could not meet emergencies."

PROTECTION SENTIMENT GROWING IN TEXAS.

There is still another Texas viewpoint which merits consideration. Texas is looking ahead in an industrial and commercial sense. It is not a far cry to protection in Texas just now, and the more the effects of Mr. Wilson's free-trade notions are studied the less they seem to impress some of the forward-looking men of the State. Mr. M. A. Cooper, president of the Cooper Grocery Co., of Waco, Tex., is evidently one of these. From the American Economist I quote about Mr. Cooper that which is pertinent to this discussion:

HE'S A TEXAS DEMOCRAT—BUT ALL THE SAME HE WANTS HUGHES AND ANOTHER PROTECTIVE TARIFF.

A Texas Democrat may easily be a Texas protectionist if he happens to be a big business man with a grasp broad enough to take in conditions as they are, and is not blinded by politics so as to be able to see things clearly and intelligently. Mr. M. A. Cooper, president of the Cooper Grocery Co., of Waco, Tex., is that kind of a Texas Democrat. His company has large stores in Waco, Temple, and Hillsboro, Tex., and does a wholesale business of millions of dollars a year. Mr. Cooper buys goods from 40 different concerns in New York City, has traveled extensively in the United States, Mexico, and Europe, and has always taken a keen interest in business conditions everywhere he has gone. He is a railroad director and has large interests in many directions. Mr. Cooper while on business in New York was interviewed by a Herald man and is quoted as saying:

"I don't believe that the end of the war is going to hurt us much in Texas. We haven't made much money here directly out of the war, and its end won't make a great deal of difference to us, but the rest of the country will suffer unless there is a change in the tariff. Oh, yes; I'm a Democrat. Why, man, I come from Texas; of course I'm a Democrat. But I'm a Samuel J. Tilden-Grover Cleveland Democrat. I believe in a tariff to protect our manufacturers, and I believe in a tariff for revenue. I believe in business protection. That's where Germany got ahead. She built a tariff wall around herself and protected her industries. I haven't any patience with all this folderol of a stamp tax that they call a war tax. I'll tell you what it is, it's a deficiency revenue tax. We've got to have a tariff big enough to run the expenses of the Government and big enough to take care of our home industries, or we won't have home industries after a while.

"The Democrats have snipped off too much of the tariff; now it must be put back. If they don't put it back, if we continue to have a low tariff, I'll give the European countries a year's time after they stop fighting to flood this country with goods at such low prices that we can't compete with them. If they want to do any dumping, let them dump the raw material into this country, and dump their good people here, too, to become American citizens, help manufacture the raw material into goods for the market, and draw American wages for their work. We can take care of all the raw stuff and the good people they can send us, but we've got to protect our manufacturing interests or we won't have them. If we don't have a change in the tariff, and a quick change, too, we shall be at the mercy of the pauper labor of Europe, and our business will go to the dogs.

"You say you are a Democrat?

"Been one all my life.

"Well, which one of the presidential candidates do you think can better be trusted to bring about the necessary changes in the tariff?

"I have found that the big business men, the moneyed men, of the country place more faith in Mr. Hughes than in Mr. Wilson. They seem to think he is safer from a business outlook. We've had too many

side shows in the tax line in this administration. I find that most business men throughout the country believe that we are at the top of the high tide now, and they fear that there will be a slump after the war and we'll be left high and dry unless very decided action is taken, and taken soon, to give us real protection, so that we can hold on to what we have.

"We have quite a lot of manufacturing establishments and plenty of business and solid banks, and they are full of money. The factories are doing well, and their business is increasing fast. It will continue to increase if our Government wakes up in time and keeps foreign competitors from stealing it away. Only a real tariff will do that, as I said. The quicker they get busy at Washington on that proposition the better. We don't want to get up some fine morning and find we are too late, and that the tide has turned and left us floundering in the mud."

## The Eight-Hour Law.

### EXTENSION OF REMARKS
OF
### HON. S. D. FESS,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. FESS. Mr. Speaker, now that Congress has capitulated, the strike order revoked, the threatened cessation of all transportation with the possibilities of untold suffering by the innocent public averted, the Government temporarily abdicated and permanently humiliated, it is not out of place for the public, who must pay the bill, to calmly inquire of the issue of the immediate future in the light of the recent past.

We who were ordered to legislate in a panic under the threat that if it were not done by midnight Saturday, September 2, the strike order would take effect at 7 a. m. on Monday, September 4, did not all view the problem in the same light. There are Members of Congress who urge and would vote at once for Government ownership and operation of railroads. There are others who urge and would vote at once for compulsory arbitration of labor disputes. These views touch the extremes. All of us must see that if mutual agreement upon contract, not only in the making but in the respecting of it can not be secured, then the other alternatives are Government ownership or compulsory arbitration.

Mr. Speaker, for many reasons I can not go with my Socialist friends on the first proposition. I do not care to enter upon the reason why I sincerely deplore it, this almost inevitable remedy. The present situation points strongly toward it. On the other hand, compulsory arbitration also has its objectionable features. I would dislike to vote to compel any worker to continue at work when he desires to discontinue for any reason. However, I might see my way clear to vote for such a law when it is placed as an alternative to insure against untold suffering such as might follow a total tie-up of all transportation lines. But it would be the last resort. Most of us will agree that neither of these remedies should be resorted to, especially under panic. Either one suggests the failure of legal procedure to adjust disputes. Here was a contest that had been before the public for months. It was a dispute of wages between the employers and the employees in which the innocent third party, the public, had no concern save to see equity done. The employees desired 10 hours' pay for 8 hours' work and time and a half for all overtime. The employers contended such increase, which would amount immediately to perhaps from $50,000,000 to $100,000,000 annually, and ultimately it might reach $300,000,000, as it must finally extend to the other 80 per cent of the employees, could not be agreed to unless the guaranty was given that the Interstate Commerce Commission would permit an increase of rates. It will be noted the dispute was not fixing the day, but fixing a basis for pay.

There was no contention that men should not be required to work but 8 hours, but that their pay should be 10 hours for 8, and pay for overtime.

The mediation commission offered its services but were informed by the employees that the subject could not be mediated. The employers requested the dispute to be referred to an arbitration body, either to the Interstate Commerce Commission or a commission to be appointed by the President, or a board made up of one member chosen by each side to the contest and a third to be chosen by the two. All of these suggestions were disagreed to by the employees. Upon the refusal of the employers to concede the demands of the employees the latter submitted the matter of a strike to a vote of the members composing the brotherhoods. The strike was ordered by a vote of over 90 per cent of the employees.

The President then summoned the representatives of both sides to the Capital. The country applauded this step. He heard the employees' case first and then the employers. August 14 the press carried the following statement:

WHAT THE PRESIDENT AND HIS CONFEREES SAY OF THE PROSPECT OF A STRIKE SETTLEMENT.

After yesterday's meeting at the White House with railway union leaders and with railway managers President Wilson said:

"I have met both sides and have gone over the case with the utmost frankness. I shall not be able to judge until to-morrow whether we have found a feasible basis for settlement."

Judge Chambers, of the board of mediation, said:

"The ice seems to be melting a little. I am very optimistic that the President will be able to accomplish something."

One of the leaders of the four brotherhoods, after leaving the White House, characterized the conference with the President as "most encouraging," and added:

"The outlook for the prevention of a general strike is hopeful."

"As long as the matter is in President Wilson's hands we will have no statement to make," said A. B. Garretson, president of the Order of Railway Conductors and chairman of the Big Four Brotherhood.

No expression whatever was obtainable from the railroads' representatives.

On the 15th the President made his proposition for settlement—first, that the railways grant the men's contention for 10 hours' pay for 8 hours' work; secondly, that the men agree to arbitrate the question of time and a half pay for overtime.

This proposal was favorable to the men, as it conceded their first contention and left open to arbitration their second. The employers expressed surprise that the President required the concession of the increase of wages as a basis for arbitration of the overtime punitive pay. They insisted that the entire matter was so complicated and involved such possibilities to their stockholders, their bondholders, and the public at large, who, in the last analysis, must pay the bills, that it should be submitted in its entirety to an arbitral board. The heads of the four brotherhoods told the President that they could not consent until the committee of 600 would agree to it. The New York Times on the 17th carried the following items:

PRESIDENT READY WITH ULTIMATUM.

The President's plan of settlement would give the men the eight-hour day and about two-thirds of the increase in wages they would have gotten under their original demands. The workers would receive the regular rate of pay for overtime, instead of pay-and-a-half. It would give the engineer who now receives $4.80 for a 10 hours' run $6 for the same run, whereas, under the time-and-a-half arrangement, he would receive $6.60 for the 10 hours' run, which would mean two hours overtime.

BOTH SIDES UTTERLY SELFISH.

The railroads think this plan of settlement unfair. As one of the officials expressed it to-night: "The railroads are sweating blood. To-night we are determined not to give in. No one knows what to-morrow will bring." While the stand of the railroads is utterly selfish, they say it is no more so than that of the brotherhoods. They say the brotherhoods have deceived the President into believing they are really after the eight-hour day and better living conditions, while what they really want is more money.

What holds the railroads back from open defiance of the President is the effect it might have upon the public and Congress. They fear that if they defy him and the Democrats are returned to power in November, they will fare badly at the hands of Congressmen who "represent the people." They are sure they can beat the unions and would rather have the strike called and both sides leave Washington to-night to fight it out than to face the demand of the President to-morrow to accept a settlement bitter to them. It was the railroads who called in the board of mediation, the failure of which led to the summons to Washington. One of the managers said to-night: "It will be a hot day when we ask Washington to help us out again."

The 600 chairmen of the brotherhoods came to Washington on special trains late this afternoon and went down Pennsylvania Avenue to the labor headquarters at the National Hotel in street cars, waving hats and suitcases. The first thing they did was to hire a hall to meet in to-morrow and then to mark time until the President calls them to the White House to-morrow afternoon to submit his proposals to them.

There seems to be no doubt that the men will accept. The chairmen were brought here at the request of President Wilson after the four heads of the brotherhoods had told him they had no power to accept a basis of settlement which meant a modification of their demands.

One of the brotherhood presidents said to-night: "I guess we will take what the President offers, but I hope to goodness the railroads do refuse it. We will show them a stunt the devil never dreamed of. They have got a licking coming to them, and we are the boys to give it to them."

W. G. Lee, president of the trainmen, said:

"We don't see any politics in the situation and we don't care anything about politics. The President knows we are after the eight-hour day and he knows we are going to get it. He has acted accordingly, for he knows we are right."

A. B. Garretson, head of the conductors and leader of the workers, said:

"It is up to the railroads. If they want peace they know how to get it. If they want war they know how to get that."

WILL MEET MANAGERS FIRST.

The President conferred with neither side to-day, but spent much of the day preparing the appeal he will make to-morrow. The managers will go to the White House at 9 o'clock in the morning, and the President will see the workers' representatives at 3 o'clock in the afternoon. Both sides will get time to decide upon their replies, and it is generally believed that the success or failure of the President's effort to avert the national railroad strike will be known on Friday.

Judge W. L. Chambers, of the Board of Mediation, carried messages from the White House to the managers several times. It was after the receipt of a message from Judge Chambers that the managers

held a conference at the New Willard Hotel to-night, but, after it was over, they said there had been no change in the situation, and that they had not agreed to any concession.

There was much concern over the situation among Democrats at the Capitol to-day. Some of the leaders dug up a bill introduced by Representative CULLOP last January and reported to the House on March 17, which provided for a Federal act guaranteeing to switchmen and telegraphers the eight-hour day, and proposed to include engineers, firemen, conductors, and trainmen in the same bill. But these efforts were dropped when the Congressmen learned from the White House that neither the railroads nor the brotherhoods wanted an eight-hour day by Federal enactment. It is not generally believed that Congress will take any action in the premises unless the President decides that a law is needed to create the Federal commission he will propose.

In connection with the Federal investigating commission idea, it is recalled that when he was a member of the Industrial Relations Commission Mr. Garretson signed a report which advocated the extension of the mediation provisions of the Newlands Act and the creation of much the same powers as the President would vest in his proposed Federal commission. Mr. Garretson believed, as the President does, that the commission should not have the power to enforce any decree.

While it has been discussed, it is not believed that the railroad situation will result in a compulsory-arbitration law. The railroads would agree to such an act, but it is opposed by organized labor on the ground that the Government of the United States has no power to say what a man shall work for or that he shall work when he does not want to. Eminent lawyers have said that such an act might be held to be unconstitutional.

There was considerable interest in Washington in a conference to-day among Samuel Gompers, president of the American Federation of Labor; Mr. Garretson; and W. S. Stone, grand chief of the engineers. Neither of the three would tell what was said in their discussion of the railroad situation. The brotherhoods are not affiliated with the American Federation of Labor. However, several weeks ago Mr. Gompers made a public statement in which he said that the federation would give the brotherhoods its moral support. Mr. Gompers is a close friend, both personally and politically, of the President, and it is known that he is anxious that the President shall find a quick road out. He is anxious for all the representatives of labor to do what they can to aid the President. It was after the talk with Mr. Gompers that the labor leaders seemed especially favorably disposed toward the proposal the President will put before them to-morrow.

NONBROTHERHOOD MEN WANT PEACE.

In the meanwhile employees of the railroads not in the brotherhoods are sending petitions to the White House urging that there be arbitration or some settlement of the issues, to the end that they, who have nothing to gain, may not be thrown out of work by a strike. It was said to-night that petitions signed by more than 27,000 men, claiming to represent 80 per cent of the railroad employees of the country, have reached the White House. The leaders of the brotherhoods say that these petitions mean nothing and that the railroads are responsible for them.

All in all, the railroad managers are to-night the most worried men who have been in Washington in a long time. They don't know what to do. At midnight they had not decided what to tell the President to-morrow. While they have taken formal action not to grant his appeal, none of them would be quoted as saying they would not change their minds by 9 o'clock in the morning.

They have all along refused to believe that arbitration, that for which labor so long fought, would not be accepted if capital agreed to it. They proposed arbitration to the brotherhoods in June; they proposed arbitration to them again in August; they proposed arbitration to the United States Board of Mediation and Conciliation; and they proposed arbitration to the President. They were willing to have arbitration by the Interstate Commerce Commission, they were willing to have arbitration by the Newlands commission, and finally they offered to arbitrate without the guaranty that there would be a railroad man on the board, leaving the President free to name all the arbitrators. And they still fight for arbitration, for principle's sake, they say, so that the industry of the country may not be thrown into chaos by unbridled strike threats.

The railroad managers, who contend that the Interstate Commerce Commission, the rate-making body, is the proper tribunal to consider what they regard as the correlated question of wages, were interested to-day in the argument of Chief Counsel Joseph W. Folk, of the commission, before Justice Stafford in the matter of the Louisville & Nashville rate case, when he contended that that commission had the broadest of powers and had the right to conduct the widest of investigations into all railroad matters, including wages.

Milton H. Smith, president of the road, had refused to answer certain questions as to the political activities of the Louisville & Nashville. Attorneys for the road said that the commission was investigating merely the regulating of commerce, and that the commission had no power to delve into the affairs of the road not directly related to the question at issue.

Mr. Folk declared that the Interstate Commerce Commission was "the agent of Congress to investigate all matters relating to the conduct of railroads." He said that the consideration of wages paid to employees was a proper province of the commission. Justice Stafford took the case under consideration.

The railway managers took under consideration the President's proposal, which they finally rejected upon the grounds that it would be unjust, discriminatory, and unworkable to a large extent. They also pointed out the alleged fact that the proposal did not establish an eight-hour day, but merely an increase of wages. They insisted upon their original position of arbitration. The President treated his proposal as an ultimatum and went over the heads of the managers and summoned the presidents of the roads to the Capital. The telegram follows:

THE WHITE HOUSE,
*Washington, August 17.*

Discussion of the matters involved in the threatened railroad strike has reached a point which makes it highly desirable that I should personally confer with you at the earliest possible moment, and with the presidents of any other railroads affected who may be immediately accessible. Hope you can make it convenient to come to Washington at once.

WOODROW WILSON.

On the 18th the New York Times carried the following:

UNIONS SPARRING FOR TIME—THEIR 600 CHAIRMEN LISTEN TO MR. WILSON FOR 50 MINUTES, BUT FAIL TO ACT AS HE ASKS—EXPECT ACCEPTANCE LATER.

The 600 brotherhood chairmen marched to the White House at 3 o'clock down Pennsylvania Avenue, four abreast, led by the presidents of the brotherhoods. They were received by the President in the east wing of the White House, where he outlined to them the settlement plan. Its terms were:

First. That the railroads grant the men the eight-hour day.

Second. That all collateral questions be submitted to a commission to be authorized by Congress.

The collateral questions include the men's demand for time and a half for overtime, and the railroads' counter proposal that no man be paid more than once for the same period of work.

Facing the 600 chairmen representing the 400,000 engineers, firemen, conductors, and trainmen, President Wilson spoke for 50 minutes. He told the men he had decided to ask the railroads to give the men the eight-hour day, not primarily to prevent a strike, but because he believed it was right for them to have it.

At the close of the meeting the following semlofficial statement was issued from the White House:

"The President's suggestion asks both sides to accept the eight-hour day on the present basis of pay.

"It also asks that the collateral questions shall be submitted to a commission to be authorized by Congress.

"Until the union leaders vote on the suggestion and the railway executives pass upon it, the White House can not discuss the existing situation."

UNIONS FAIL TO RATIFY.

The 600 union men then marched to the Bijou Theater to consider the President's plan. It was favored by the heads of the four brotherhoods, and it was expected that it would be ratified with a whoop. But to the surprise of all but a well-organized faction of the brotherhoods it was not ratified, and after an hour of debate the chairmen adjourned to meet again to-morrow morning.

On the same day the four railway brotherhoods accepted the President's plan. Thirty-one railway executives, whom the President had called to the White House, agreed to fully consider the plan. These men represented property values of $10,000,000,000. They represented one-half of the total mileage in the United States.

The table following shows the mileage and the capital stock of the lines involved.

| Official. | Road. | Mileage. | Capital stock. |
|---|---|---|---|
| R. H. Aishton, president | Chicago & North Western | 8,107 | $200,000,000 |
| W. W. Atterbury, vice president. | Pennsylvania | 4,511 | 600,000,000 |
| W. G. Bierd, president | Chicago & Alton | 1,052 | 40,000,000 |
| B. F. Bush, receiver | Missouri Pacific | 7,232 | 240,000,000 |
| M. J. Carpenter, president | Chicago, Terre Haute & Southeastern. | 374 | 4,300,000 |
| A. T. Dice, president | Reading | 2,217 | 140,000,000 |
| H. B. Earling, president | Chicago, Milwaukee & St. Paul | 10,075 | 282,898,300 |
| S. M. Felton, president | Chicago Great Western | 1,427 | 96,000,000 |
| W. J. Harahan, president | Seaboard Air Line | 3,123 | 100,000,000 |
| Fairfax Harrison, president | Southern | 7,022 | 350,000,000 |
| Hale Holden, president | Chicago, Burlington & Quincy. | 9,395 | 110,833,100 |
| J. H. Hustis, president | Boston & Maine | 2,334 | 42,655,190 |
| W. J. Jackson, receiver | Chicago & Eastern Illinois | 1,036 | 30,700,000 |
| L. E. Johnson, president | Norfolk & Western | 2,043 | 137,000,000 |
| Julius Kruttschnitt, chairman. | Southern Pacific | 10,587 | 394,451,800 |
| H. R. Kurrie, president | Chicago, Indianapolis & Louisville. | 622 | 15,500,000 |
| J. L. Lancaster, vice president. | Texas & Pacific | 1,943 | 50,000,000 |
| L. F. Loree, president | Delaware & Hudson | 1,924 | 55,711,500 |
| R. S. Lovett, chairman | Union Pacific | 7,824 | 496,178,700 |
| C. H. Markham, president | Illinois Central | 4,773 | 123,552,000 |
| E. J. Pearson, vice president. | New York, New Haven & Hartford. | 2,004 | 176,400,787 |
| Ralph Peters, president | Long Island | 393 | 12,000,000 |
| E. P. Ripley, president | Santa Fe | 11,628 | 381,186,000 |
| T. M. Schumacher, vice president. | El Paso & Southwestern | 1,027 | 35,000,000 |
| A. H. Smith, president | New York Central | 5,969 | 400,000,000 |
| G. W. Stevens, president | Chesapeake & Ohio | 2,371 | 100,000,000 |
| W. H. Truesdale, president | Lackawanna | 985 | 42,277,000 |
| F. T. Underwood, president. | Erie | 4,606 | 217,000,000 |
| Henry Walters, chairman | Atlantic Coast Line | 4,697 | 36,000,000 |
| Daniel Willard, president | Baltimore & Ohio | 4,535 | 270,250,000 |
| J. H. Young, president | Norfolk Southern | 900 | 16,000,000 |
| Total | | 123,838 | 5,285,440,377 |

The managers gave out the following statement:

The issue squarely before the country is a result of the threat of the train-service brotherhoods to tie up the commerce of the country if their wage demands are not granted is whether the rights of employees and employers are to be determined by impartial public arbitration.

The railroads have earnestly urged these men to join with them in seeking a determination of the justice of their extraordinary demands through the orderly process of arbitration. They are ready and anxious to lay all matters in controversy before a tribunal to be chosen by the Government or by the President of the United States.

Arbitration in any form has been rejected by the representatives of the train-service brotherhoods.

CALLS IT MATTER OF PAY.

The theory upon which they have rejected arbitration is that the demand for the eight-hour day can not be arbitrated. Even though these employees were in truth demanding an eight-hour day, such a demand is one the justice of which surely should be determined by a public board.

But they were not asking for an eight-hour day. It is beyond dispute that the acceptance of these demands, whether under a threat of a national strike or by the award of a board of arbitration, would have no other result than a great increase in the wages of these employees, already highly paid and constituting less than one-fifth of the railroad workers. Absolutely no change would be made in the hours of service, and the employees would resent any effort of the managers to reduce their hours of service.

The railroads are standing firmly for the principle of arbitration in industrial disputes. If arbitration is to be rejected, what hope can there be for industrial peace in the future?

Arbitration—the right to hearing before an impartial jury—was fought for by the workers as a sacred right. But now that the workers are more powerful in collective bargaining than the employers, these workers declare they have nothing to arbitrate, and resort to a strike as the more powerful weapon.

The railway presidents, after consideration of the proposals made by the President and the answer of their managers, voted to indorse the position of the managers and insist upon arbitration. The statement of the railroad presidents is as follows:

The representatives of the railroads here present have given careful consideration to the proposals submitted by you for an adjustment of the critical conditions confronting us. May we again express the grave sense of responsibility upon our shoulders to discharge, as faithful trustees of the public interest, the duty to maintain and operate these properties as agencies, efficient at all times to serve the continuous public demand for transportation service; as faithful trustees also to protect, in so far as it is in our power, the interests of the owners of these properties committed to our charge?

In the previous stages of these negotiations the conference committee of managers has consistently adhered to the policy of arbitration as a fundamental principle. It is essentially the common right of every citizen, of whatever station in life, to be heard, to have his day in court. It is indeed a substitute for wasteful litigation recognized long since in the codes of all civilized countries.

A denial of the right to be heard does not exist under any form of government with which our race has ever been familiar, and the common acceptance in international affairs, in the adjustment of public and private rights under our Federal and State Governments, of the principle of arbitration as an approved method for the friendly settlement of the serious contentions of the parties, has put the right to claim arbitration as a method of settling such controversies beyond question. For these reasons we have supported our committee in their continuous demand, and in those important particulars upon which no agreement could be reached arbitration should be accorded upon any reasonable basis that might be adopted.

WOULD ARBITRATE EIGHT-HOUR DAY.

The eight-hour day—I shall not at this time stop to fully analyze or comment upon the importance of the difference between the eight-hour day as commonly understood in the building and manufacturing trades and the so-called eight-hour basic day demanded in this controversy—the eight-hour day is, in our mature judgment, when considered in connection with railroad-train service, a question upon which honest minds may differ, and is therefore necessarily a subject for arbitration. In that manner the contention of the parties may be considered and a fair answer given.

Social questions affecting the ordinary workday, in which for six days a week a regular daily routine is pursued, are those which determine how long during each of those periods the laborer should work; and, while in some States eight hours has been adopted as the desirable or compulsory maximum, this broad land is to-day teeming with the contented and efficient industry of millions of workers that are working more than eight hours a day. The precedent, therefore, exists—it exists in fact—and the right or wrong of it, as we feel, has not yet in this country passed beyond the realm of debate.

But these are not our problems. The railroad day is a different thing, as has been patiently and, I infer, many times explained. Railroad trains run throughout the 24-hour period; the public demands that they run on Sundays and holidays; they start at any hour that the necessities may demand; they can not stop until a terminal is reached, and many conditions, stated and accidental, render it impossible to restrict the hours of railroad labor to a fixed standard.

In a general movement of some years ago the present 10-hour basic day was negotiated and approved by the representatives of railroad labor throughout the country, and has continued with some exceptions to the present day. These exceptions have been worked out under local conditions, different often from the general conditions affecting the question.

In several important arbitrations of railroad rates of pay and conditions of service within recent years—the last within two years, involving 98 railroads, serving the entire territory between Chicago and the Pacific coast—the 10-hour basic day was incorporated in the demands of the organizations parties thereto and made the basis by them of the rates and rules awarded by the Federal board.

At the present time, in a controversy now pending over the identical questions involved here and in which numerous important railroads and a national organization of switchmen are parties, an arbitration through the friendly offices of the Federal Board of Mediation has been agreed to, wherein the question of an eight-hour basic day has been submitted as an arbitrable question.

CALLS ARBITRATION IDEAL.

We stand for the principle of arbitration for the settlement of industrial disputes. Arbitration is the ideal toward which public sentiment and legislation of this country have been steadily tending for the settlement of disputes between employers and employees, particularly in the case of public-service corporations, rather than the strike and the lockout, with attendant disturbances and paralysis of public business.

Arbitration has been provided by legislation, both State and national. So late as 1913 the Federal law was perfected or improved by amendments framed in conference with some of the railroad labor leaders now refusing to arbitrate, and includes in its scope all controversies in railroad service. We invoke that principle now and are willing for the Interstate Commerce Commission to arbitrate the whole question. More than that, we are willing for the President of the United States to appoint a commission of disinterested persons to arbitrate all matters in dispute if neither the Interstate Commerce Commission nor the machinery of the Newlands Act is satisfactory to the labor leaders.

But we have been met with a refusal to arbitrate in any manner, and are now asked to surrender the principle and to add an additional burden of many millions per annum to the cost of railroad transportation in this country for the benefit of a class who are among the most highly paid and favored workmen in the world. This is demanded under the guise of a plea for an eight-hour day. It is in reality only an indirect plea for an enormous increase in wages.

REFUSAL ADMISSION OF WEAKNESS.

The intricate and technical nature of the case and the complexity of the facts make the controversy preeminently one for arbitration by an impartial tribunal with authority to examine into every factor and reach a decision fair and just to the employees, the owners, and the public, which ultimately must bear the burden. To refuse to arbitrate is an admission of the unreasonableness of the demand. Moreover, the refusal is by those demanding a vital change in an existing status. For a party to demand a change of such a status and accompany the demand with a refusal to arbitrate is in conflict with right standards of conduct. In this instance for those demanding a change to refuse to submit their demands to arbitration is indefensible.

To say that such a demand as that now presented for a revolutionary change in the arrangements that have grown up in the development of the railroad business and involving so many complicated facts and relations and such vast additions to the cost of the country's transportation is not arbitrable is to destroy the principle of arbitration and if successful would, in our judgment, tend immediately to discard all of the legislation, State and national, which has been enacted in recent years and set the country back to the old days of strikes, lockouts, public disorder, and business anarchy for the settlement of questions inherent in the relation of employer and employee.

The view that so important an issue as this may not in conscience be honestly debated and, therefore, arbitrated, raises this question above and beyond the lesser contentions of hours of service or payment of wages—it raises it in gravity beyond the social or monetary questions affecting the parties before you, because it tends to force, by the great weight of your spoken word, the railroads to surrender a right to be heard, a right expressly recognized by the policy of the Federal legislation enacted for the purpose of adjusting these disputes, and under the ban of your disapproval, expressed before the bar of public opinion, to accept as indisputable conditions requiring, as we believe, an enormous sacrifice in efficiency of service and cost of operation of these properties. An adjustment in this manner will not stop with this controversy. It will be repeated in every industry wherein to-day industrial peace exists without controversy.

It will, by the force of this high precedent, place in peril all that has been accomplished in the peaceful adjustment of labor controversies by methods of arbitration, and, therefore, we present to you our respectful but earnest request that you do not lend the weight of your great influence against this right which we claim to be heard, but support the railroads in this crisis in the effort to maintain this great principle of arbitration.

In giving out the statement the railway presidents added this:

"Mr. Holden then explained that in accordance with past custom and the requirements of the situation, complete authority to conduct negotiations in behalf of the railroads in the present controversy had been conveyed to the conference committee of managers. He further explained that the executives present had authority only to speak for the properties each represents. It is understood that telegrams were sent from the White House to other railroad executives of the country, and the conference adjourned, pending their arrival."

The President then made this statement for the public:

I have recommended the concession of the 8-hour day—that is, the substitution of an 8-hour day for the present 10-hour day, in all the existing practices and agreements. I made this recommendation because I believed the concession right. The 8-hour day now undoubtedly has the sanction of the judgment of society in its favor, and should be adopted as a basis for wages, even where the actual work to be done can not be completed within eight hours.

Concerning the adjustments which should be made in justice to the railroads and their stockholders in the payments and privileges to which their men are now entitled, if such adjustments are necessary, there is a wide divergence of opinion.

The railroads which have already adopted the 8-hour day do not seem to be at any serious disadvantage in respect to their cost of operation as compared with the railroads that have retained the 10-hour day, and calculations as to the cost of the change must, if made now, be made without regard to any possible administrative economies or readjustments. Only experience can make it certain what rearrangements would be fair and equitable either on behalf of the men or on behalf of the railroads. That experience would be a definite guide to the Interstate Commerce Commission, for example, in determining whether, as a consequence of the change, it would be necessary and right to authorize an increase of rates for the handling and carriage of freight (for passenger service is not affected).

I therefore proposed that the demand for extra pay for overtime made by the men and the contingent proposals of the railroad authorities be postponed until facts shall have taken the place of calculation and forecast with regard to the effects of a change to the eight-hour day; that in the meantime while experience was developing the facts I should seek, and if need be, obtain authority from the Congress to appoint a small body of impartial men to observe and thoroughly acquaint themselves with the results, with a view to reporting to Congress at the earliest possible time the facts disclosed by their inquiries, but without recommendation of any kind; and that it should then be entirely open to either or both parties to the present controversy to give notice of a termination of the present agreements, with a view to instituting inquiry into suggested readjustments of pay or practice.

This seems to me a thoroughly practical and entirely fair program, and I think that the public has the right to expect its acceptance.

It will be observed that the President's plan required the employers to concede their contention of arbitration by granting the eight-hour day as a basis of pay as a condition for arbitration of the overtime punitive demands of the employees. This position precluded the eight-hour question as an open one. It foreclosed arbitration on that issue.

On the 21st the railway heads rejected the President's terms and urged that the demands go before a public tribunal for final decision.

STATEMENT OF RAILWAYS.

That the railroads should grant, under threat of a national strike, a $50,000,000 wage preferment to a small minority of their employees without a hearing before a public tribunal is inconceivable in a democracy like ours.

All questions at issue—wages, hours, costs, operating conditions—these are submerged by the greater issue: Shall arbitration be abandoned in the settlement of industrial disputes?

If we are to throw arbitration into the scrap heap, what hope can there be in America for industrial peace in the future?

A nation-wide strike is unthinkable when the railroads are urging that all the matters in dispute be placed before any tribunal constituted by public authority.

Arbitration is urged by Congress as a final method for settling controversies as to both hours and wages on the railroads. The Newlands law of 1913 was enacted by unanimous request of the four railroad brotherhoods and the representatives of the railroads, and yet the leaders who urged this law now take the position that a question of hours is beyond arbitration.

But wages, not hours, are involved in these demands. No proposal has been made to establish an eight-hour workday. The demand is for an eight-hour pay basis, and this is the interpretation given by the President in the proposal now before the railroads. The employees have emphatically made it known that they do not want eight hours' work for eight hours' pay—a real eight-hour day.

ILLUSTRATION SHOWS INCREASE.

A simple illustration will suffice to show how the eight-hour basis of pay would work out. Take, for example, a freight employee paid 5 cents a mile with a day's guarantee of $5 for 100 miles or 10 hours or less. It is proposed to make this guarantee the same for eight hours or less. On a freight run of, say, only 60 miles in 10 hours, he earns $5 for his time. It is now proposed that for this work he be paid $5 for the first eight hours and $1.25 for the other two hours, a total of $6.25, increasing his pay 25 per cent.

If, by reason of traffic delays, he is held idle on the sidetrack, so that he does not complete his trip until the end of 12 hours, he now is paid $6 for his time, no matter how little work he performs. The demand is to pay him $7.50 for his 12 hours' service.

Meanwhile, the employees would continue to have the same opportunities as now to make still larger pay on the mileage basis. For example, the man on a 5-cents-a-mile rate, making, say, 150 miles in only seven hours, earns $7.50 for his day's work. If after this he is called for a short period of emergency work, say only two hours, he gets another full day's guarantee of $5, making $12.50, in this example, for only nine hours' service.

Many other schedule provisions increase the wages of these well-paid men without increase in their hours of service. It is because of these opportunities to take pay under mileage or arbitrary rules that their yearly earnings are so far beyond those of other workers charged with no less responsible duties.

WOULD COST $50,000,000 YEARLY.

The proposal from the President now before the railroads is:

1. To adopt the eight-hour day "as a basis for wages, even where the actual work to be done can not be completed within eight hours," to quote the President's words.

2. To increase the hourly rate of pay 25 per cent.

The result of the acceptance of this proposal would be:

1. No change in the length of the train workday.

2. An increase in wages of more than $50,000,000 a year to about four-fifths of the train employees, or less than one-seventh of all railroad employees. In other words, an unfair wage preferment would be granted, without investigation and under threat of a national strike, to one man in seven in the railroad service.

If these wage demands are just, in whole or in part, then a public tribunal, appointed by the President, as we have urged, would speedily so determine.

The weight of public opinion must determine this issue. We can not believe that it is the calm judgment of the country that we should sacrifice the principle of arbitration in industrial disputes under a threat to tie up the commerce of the country.

The following telegram is but one of many indicating the interest the public was taking in the outcome of the contest:

The Merchants' Association of New York believes that the pending labor controversy between the railroads and their employees should be submitted to impartial arbitrators for complete development and analysis of all the facts; that the decision of such arbitrators should be binding; and that, pending such decision, the present status should be maintained. The concessions demanded by the employees involve an enormous increase in the cost of railroad operations. It is claimed by the railroad officials that such increased cost without corresponding increase in revenues will be disastrous to and cause the bankruptcy of many of the existing railroads, and seriously impair the power of all to provide efficient service for the public. We believe it vital to the well-being of the Nation that the principle of arbitration be established as a reasonable and just means of settlement in industrial disputes; that the present controversy is beyond question of the class that can and should be settled by arbitration; that no person confident of the justice of his cause should refuse to submit such an issue as the present to the judgment and decision of unbiased umpires; and we further believe that such refusal, coupled with a strike which will inflict unparalleled suffering and loss upon the entire Nation, will deserve and receive universal condemnation and alienate from those responsible all public sympathy.

We therefore respectfully but earnestly protest against the adoption of a so-called compromise which upon an ex parte showing will concede to the employees the major part of their demands, disregard the principle of arbitration upon which alone a just settlement can be based and which may ultimately inflict suffering and injury upon the public either by depriving it of sufficient railroad service or by forcing it to pay increased charges.

On the 22d the press carried the following statement:

[Special to the New York Times.]

WASHINGTON, *August 21.*

Senators are discussing among themselves legislation to prevent a recurrence of the situation now confronting the transportation systems of the country through the threatened strike of 400,000 trainmen.

Some Senators favor enacting a law fixing the eight-hour day for interstate railroads and empowering the Interstate Commerce Commission to investigate methods to enable the roads affected to meet the additional drain on their incomes. Another suggestion is the enactment of a statute providing for compulsory arbitration of industrial disputes. The fact that President Wilson has been converted to the idea of compulsory arbitration is regarded as giving impetus to the idea.

Other Senators hold, however, that if there is to be compulsory arbitration the law must provide that the Federal Government shall furnish protection for the men employed to run trains in place of those who may refuse to work under an arbitral award.

That the Government may compel the railroads and their employees to accept Federal intervention and arbitration of their disputes is conceded by Senators, but the ability of the Government to enforce the awards of its arbitrators to the extent of compelling men to return to work under the terms fixed by the arbitrators is rejected as out of the question.

Senator WEEKS, of Massachusetts, called a meeting of the New England Senators to-day to discuss the railroad controversy with members of the trainmen's union. The conference will take place to-morrow morning. The trainmen desire to lay before Congress their views on compulsory arbitration. Delegations of trainmen from other regions called to-day on their Senators and Representatives and expressed their views as to what should be done to prevent the transportation systems of the country from being tied up.

On the same day the press carried the following:

It was generally believed in Washington to-night that a majority of the railroad presidents were almost ready to accept Mr. Wilson's proposal for the eight-hour day in principle, if they could be assured of three things:

1. That they, as well as the brotherhoods, should have a say as to what was meant by the eight-hour day, and that if there was a difference of opinion it should be arbitrated.

2. A reasonable guarantee that if they can prove that the eight-hour day places a new financial burden on the roads, the roads may increase their freight rates.

3. That they be protected by arbitration against the demands of other employees for the eight-hour day, asking that the proposed Federal commission be made a permanent body.

On the 26th Holden, the spokesman for the railroad presidents said: "The railway presidents' conference having concluded its discussions the committee of eight has asked for an appointment with the President and is waiting his pleasure."

Rival agreements on the 26th:

WHAT THE MEN WILL ACCEPT.

1. That the men receive the 8-hour day, with the present 10 hours' pay for the proposed 8 hours' work.

2. That overtime be paid for on a pro rata basis.

3. That all other issues between the railroads and the men, except these, be settled by a Federal commission.

These modifications by President Wilson were pronounced satisfactory by the men after they had demanded 10 hours' pay for 8 hours' work, with all overtime to be paid for at the rate of time and a half.

WHAT THE RAILWAYS WILL ACCEPT.

1. That the Interstate Commerce Commission authorize the railroads, starting at once, to keep two sets of maintenance books, one on the basis of the present rate of pay, and one on the basis of the men's original demands.

2. That the President name a board of arbitration to consider the whole of the issues between the railroads and the brotherhoods.

3. That the difference in amounts between what the two sets of books show be subject to the draft of the arbitrators to pay the men whatever increase in wages they may fix, the 8-hour day proposition being left to the arbitrators.

President Rea, of the Pennsylvania lines, gave out the following statement of the railway situation:

For the managements of the railways to yield to the demands and threats of the labor organizations, and to accept President Wilson's proposal, would be to destroy at one blow the principle of arbitration as the paramount and recognized method of settling labor disputes. The threatened strike would be postponed, it is true, but we would have no assurance that it would be permanently prevented. Except that the principle of eight-hour day would be considered, the issues of the very controversy now pending would be left unsettled, while the future of the railways would indeed be rendered dark and uncertain.

These, in brief, are the reasons why the heads of the railways, with a full appreciation of the solemn and weighty responsibility resting on them, as well as of their duty to the public and to their shareholders, have been forced to the conclusion that it is better to face the alternative of a strike than to surrender.

Let any man who questions the soundness of this conclusion consider, in the light of their history of the last 10 years, the position in which the carriers now find themselves.

The great labor movements culminating in the present one began a decade ago, almost simultaneously with the adoption of effective regulation. From that time the managements have been in a desperate struggle to prevent net revenue from being so impaired as to destroy the credit of the railways and completely stop their development. After the first large increases in wages, appeal was made to the Interstate Commerce Commission for advances in rates, which the commission in 1911 denied. Even in the face of this railway managers were undaunted and in good faith applied all their energy and ability to increasing efficiency. Never in the history of any industry was more hard, conscientious, able, and successful work done to increase efficiency than has been done on the railways of this country during the last 10 years.

"What has been the result? The labor movement has continued, and one arbitration board after another has awarded advances in wages. In spite of increased efficiency the companies could not stand the strain, and in 1914 again appealed to the Interstate Commerce Commission. This time the commission decided that their earnings were not adequate, and granted some advances in rates, but before this relief was accorded there were more miles of railway in the hands of receivers than ever before, and new construction had reached the lowest ebb since the Civil War.

"This period of profound depression has been followed by a year of comparative prosperity in the railway business, due almost entirely to an abnormal increase in traffic which it is recognized can not be permanent. And now, after this brief period of prosperity, it is proposed that the roads shall make sacrifice of principles and grant wages which would cause an increase in expenses that would wipe out all of the advances in rates that have been granted, and sweep away the economies that have been achieved by the exertions of 10 years.

"And who is to get the benefit of this? The public? No. All the employees of the railways? No. A single group of employees, constituting only a small percentage of the total number, is to get it all. And are these the poorest paid employees? They are very much the highest paid. Are they the most loyal? Not if the acts of the leaders of their organizations are to be accepted as having their approval, for they are the very group of employees who, through their legislative committees, have been engaged for years in lobbying at Washington and every State capital for full crew, train limit, and other legislation designed to reduce the efficiency of operation, and who at this moment are refusing to arbitrate and threatening to tie up every railway in the country and paralyze its commerce and industry.

"The railways have no assurance, if they grant the demand for a counterfeit 'eight-hour' day, that the added expense thus imposed will be offset by an adequate increase in rates. They have no assurance that they will secure arbitration of the other demands of these employees. They have no assurance that they will secure arbitration of their own proposals to the employees. Nor have they any assurance that they will be given protection by Congress from strikes in future.

"Let me emphasize the fact that history is but repeating itself in the present crisis, for two years ago there was equal menace of a strike on the western roads. In response to the appeal then made to their patriotism, the railway managers yielded. Nothing was done either by the President or Congress as the result of that experience to prevent the development of the like situation which now again faces the railway managers, but, on the other hand, they are confronted by practically the same ultimatum, and that they shall even sacrifice the one remaining principle of arbitration.

"The railways know that if they yield to the present demands of a comparatively small percentage of the total number of their employees they will receive like demands from the rest, and that these concessions to all employees will cost at least $200,000,000 and probably $300,000,000 a year. They know, too, that if they submit now to the proposition made to them by the President they will be denounced by the business interests of the country for having given up the principle of arbitration when every factor in the dispute points to the justice of their cause.

"Confronted by such conditions, and borne down by a solemn sense of their responsibility to their employees, to business interests of all kinds, to the 100,000,000 people of the United States, and to their stockholders, what could the heads of the railways do but refuse to yield, and then calmly but resolutely face the possibilities of the situation in full confidence that their action will receive the unqualified indorsement and support of the business interests of the country and the public at large, who have as yet been denied all opportunity to be heard."

On the 28th a secret strike order which had been issued was published to take effect September 4:

[Special to the New York Times.]

WASHINGTON, *August 28.*

Here is a copy of the secret strike order handed in sealed envelopes to the 640 brotherhood chairmen who left Washington to-day. In addition to this order, secret instructions were issued to the members for their guidance in the event of a strike. The strike order reads:

BROTHERHOOD OF LOCOMOTIVE ENGINEERS,
BROTHERHOOD OF LOCOMOTIVE FIREMEN AND ENGINEMEN,
ORDER OF RAILWAY CONDUCTORS,
BROTHERHOOD OF RAILWAY TRAINMEN,
*August 14, 1916.*

*To all local chairmen, members, and others employed in classes of service represented by the B. of L. E., B. of L. F. and E., O. R. C., and B. R. T.*

SIRS AND BROTHERS: This is to advise that a vote of the employees in train and engine service on the eight-hour day and time and one-half for overtime proposition was overwhelmingly in favor of a strike.

Notwithstanding this, your representatives have been unable to effect a satisfactory settlement, and a strike under the laws of the respective organizations becomes effective September 4, 1916, at 7 a. m.

Impart this information so that those interested will understand that they are to promptly obey.

Fraternally, yours,

_____
*General Chairman.*
_____ *R. R.*

The instructions, which counsel obedience to the law in the event of a strike and define the duties of members and their local chairmen, follow:

*Brotherhood of Locomotive Engineers.*
*Brotherhood of Locomotive Firemen and Enginemen.*
*Order of Railway Conductors.*
*Brotherhood of Railway Trainmen.*

SIRS AND BROTHERS: In connection with the strike you will observe the following instructions:

DUTIES OF MEMBERS.

1. No man in road service involved in the strike will perform any service after the hour set to strike, unless he has already begun his trip and has actually left the terminal. If the train has left the terminal, he will complete the trip and deliver the engine and train at the end of the run or tie-up point, if tied up under the law, after which he will perform no further service until the close of the strike. Men in other than road service will leave the service at the appointed time.

So far as your legal right to strike is concerned there is no difference between a mail train and a freight train. You have identically the same right to refuse to perform service on a mail train as you have to refuse to perform service on a freight train.

2. All men on strike will keep away from the companies' property, except such men as are designated certain duties to be performed by authority of the organization.

3. Every man should understand that the laws of the land must be obeyed. Acts of violence of any nature will not be tolerated by the organizations.

4. The local representatives will arrange for a hall for meeting purposes at all terminals, using one of their own lodge rooms, if available. Immediately after the strike becomes effective all men will assemble at the hall secured for meeting purposes. When thus assembled an organization will be perfected by the election of a chairman, vice chairman, and secretary. No person will be permitted to be present in the meeting hall other than those who are on strike except by permission of the assembly.

5. The secretary will arrange a roll call (alphabetically), with each organization on a separate sheet. Roll will be called twice daily, morning and afternoon. The names of the nonmembers will be kept separate on the roll from the names of those who are members of the organizations. All strikers will be required to answer the roll call and also to be in the halls, where halls are provided, during the day at all times unless excused by committee action or by chairman of the meeting. The secretary will also keep a record of the proceedings from day to day.

6. In the conduct of every strike there are numerous irresponsible persons, not members of the organizations, who take occasion to engage in acts of violence and disorderly conduct, and such actions are usually attributed to members of the organizations, and great care should be taken by every member of the organizations to avoid associating with such persons, and such conduct should be discouraged, so as not to cast reproach upon the cause.

7. Some railroad officials may endeavor to coerce or mislead the men by asserting that men at other points have not quit or that they have returned to work. Such information should be discounted, and all strikers should apply to their officers and committeemen for information, and be governed accordingly, and no member or nonunion man will return to work until the strike is officially declared off, when all will return to work at the same time, without prejudice and with all former rights.

DUTIES OF LOCAL CHAIRMEN.

1. The local chairmen of each organization on each division of railroad will jointly supervise the prosecution of the strike on the territory over which they have jurisdiction.

2. Local chairmen are expected to keep in close touch with the situation and use every honorable effort to further the cause, and will report daily, preferably by night letter, to their respective general chairmen as to the condition of affairs. Wherever it is possible for local chairmen to report to the four general chairmen jointly in one communication it should be done.

3. Expense incurred for telegrams will be borne jointly.

4. When deemed advisable the four local chairmen will agree upon assistant chairmen for their respective organizations to be located at outlying points, and said assistant chairmen will report to their respective local chairmen.

5. Clearly defined cases of disloyalty or inefficiency on the part of any representative of the organization should be reported to the other organizations, and necessary action either as to discipline or to safety measures taken at once.

DUTIES OF GENERAL CHAIRMEN.

1. The general chairmen of each railroad involved in the strike will supervise and be responsible for the conduct of the strike upon the line of railroad over which he has jurisdiction, and will make reports by night letter to the grand officer having general supervision over that line of road. Expense incurred by so doing will be paid in accordance with the laws of the respective organizations.

2. On roads where, because of the number of strikes involved, it becomes necessary for the general chairman to have assistants, he may designate other officers and members of the general committee or a joint board, as in his judgment may be necessary, to successfully carry on the strike.

3. In the absence of instruction from the grand officer in charge of the district, the general chairmen will agree among themselves as to the points at which they will be located during the strike, and they will immediately advise the officer in charge of the district and each of their local chairmen where they are located and proper address. The four general chairmen should keep each other advised as far as possible as to their location and movements.

DUTIES OF GRAND OFFICERS.

The grand officers of the four organizations will be assigned to certain districts, and each grand officer so assigned will have general supervision of the strike in his respective district and over all members on strike and others associated with them in that district.

Grand officers will keep the executives of the four organizations advised of the exact situation in their district.

ASSIGNMENTS OF OFFICERS.

Grand officers will be assigned to the following cities: Boston, Chicago, New York, St. Louis, Washington, Baltimore, Richmond, Kansas City, New Orleans, Atlanta, Houston, Cincinnati, Pittsburgh, Denver, Buffalo, Detroit, Los Angeles, St. Paul, San Francisco, Seattle, and Portland.

Fraternally, yours,

A. B. GARRETSON,
*President Order Railway Conductors.*
W. S. STONE,
*Grand Chief Engineer Brotherhood of Locomotive Engineers.*
W. G. LEE,
*President Brotherhood of Railway Trainmen.*
W. S. CARTER,
*President Brotherhood of Locomotive Firemen and Enginemen.*

UNION STRIKE ORDER CAN'T BE RESCINDED, LEADERS' ANSWER TO PRESIDENT'S APPEAL.

[Special to the New York Times.]

WASHINGTON, *August 28.*

President Wilson called the brotherhood heads to the White House to-night and asked them if they had issued a secret strike order, a copy of which he had obtained, calling a strike for 7 o'clock a. m. Labor Day. They acknowledged that the order had been issued. The President said he was shocked and surprised, and appealed to the brotherhood heads to have the order rescinded. They told him that the order was beyond recall and that the strike was inevitable.

The President took the foregoing action after he had conferred in the afternoon with a committee of railroad presidents, who told him of the secret action taken by the unions. Leaving the White House, the railroad presidents issued this statement:

"At a conference at the White House to-day at 2.30 p. m., between the President and the committee of eight of the railroad presidents, a suggestion was laid before the President in the nature of a proposition for progress toward a solution of the questions at issue, and this was left with him for his consideration.

"The committee expects to see the President in the near future, but before leaving the committee pointed out to him that if the reports that the date for declaring the strike had been fixed for September 4 were true, it would force an early conclusion of the negotiations and compel the presidents to return to their properties to prepare for the issue."

News that copies of the strike order were in the hands of the railway presidents occasioned no surprise among the brotherhoods. After it became known yesterday that they suspected three of their number of acting as spies for the railroad heads, they said frankly that 'they expected the strike order soon would be in their employers' hands.

"There was one traitor among the 12 Disciples," one of the brotherhood heads said, "and our average appears to be higher than that."

Every effort was made to keep the call of the union leaders at the White House secret. When they left they all declined to discus their conference.

On the 29th the President took the matter before Congress, where he proposed speedy legislation covering the following items:

First. Immediate provision for the enlargement and administrative reorganization of the Interstate Commerce Commission along the lines embodied in the bill recently passed by the House of Representatives and now awaiting action by the Senate, in order that the commission may be enabled to deal with the many great and various duties now devolving upon it with a promptness and thoroughness which are with its present constitution and means of action practically impossible.

Second. The establishment of an eight-hour day as the legal basis alike of work and wages in the employment of all railway employees who are actually engaged in the work of operating trains in interstate transportation.

Third. The authorization of the appointment by the President of a small body of men to observe the actual results in experience of the adoption of the eight-hour day in railway transportation, alike for the men and for the railroads; its effect in the matter of operating costs, in the application of the existing practices and agreements to the new conditions, and all other practical aspects, with the provision that the investigators shall report their conclusions to the Congress at the earliest possible date, but without recommendation as to legislative action, in order that the public may learn from an unprejudiced source just what actual developments have ensued.

Fourth. Explicit approval by the Congress of the considerations by the Interstate Commerce Commission of an increase of freight rates to meet such additional expenditures by the railroads as may have been rendered necessary by the adoption of the eight-hour day and which have not been offset by administrative readjustments and economies, should the facts disclosed justify the increase.

Fifth. An amendment of the existing Federal statute which provides for the mediation, conciliation, and arbitration of such controversies as the present by adding to it a provision that, in case the methods of accommodation now provided for should fail, a full public investigation of the merits of every such dispute shall be instituted and completed before a strike or lockout may lawfully be attempted.

Sixth. The lodgment in the hands of the Executive of the power, in case of military necessity, to take control of such portions and such rolling stock of the railways of the country as may be required for military use, and to operate them for military purposes, with authority to draft into the military service of the United States such train crews and administrative officials that circumstances require for their safe and efficient use.

"There is one thing we should do," said the President, "if we are true champions of arbitration. We should make all arbitral awards judgments by a record of a court of law, in order that their interpretation and enforcement may lie not with one of the parties to the arbitration, but with an impartial and authoritative tribunal."

The proposed legislation did not please either side of the controversy. It displeased the railway heads; it abandoned the principles of arbitration by demanding that the main demand of the trainmen be conceded and then appoint a commission to report upon its workings. The employers asked that the investigation be made first and upon the findings of the commission make the changes warranted.

The men did not like it because it provided against a strike during the pendency of an investigation. They claimed that was equal to compulsory arbitration, to which unions are unalterably opposed.

Many third parties did not like it, because it provided for an increase of rates on the roads, which was a question for the Interstate Commerce Commission to determine without a direct command from Congress.

The consensus of the railway presidents may be summed up thus:

First proposal: That the Interstate Commerce Commission be increased. The railroads have all along asked for this measure and are heartily in favor of it.

Second proposal: Establishment of the eight-hour day by law. This is what the railroads refused to concede in the President's plan of settlement and the one proposal the adoption of which they will fight to the last ditch.

Third proposal: Creation of a commission to investigate the working of the eight-hour day. If they must accept the eight-hour day, the railroads would be glad to have this commission in power.

Fourth proposal: Approval by Congress of consideration by the Interstate Commerce Commission of an increase in freight rates. The railroads are dubious about the benefit of this proposal, believing that the commission may regard it as an attempt to dictate a semijudicial decision.

Fifth proposal: Establishment of a commission to investigate labor disputes and prohibition of strikes while inquiry is on. This is one of the things the railroads asked for.

Sixth proposal: Giving the President power to operate trains for military purposes. The railroads are in favor of any measure that will keep more trains running in case of a strike.

* * * * * * *

Before the railway presidents parted they held a final meeting to-night, after which they issued a statement, in which they said:

"The situation created through the issuance of the strike order by the brotherhoods makes it necessary that the railroad executives return to their homes to protect their properties in the emergency impending; as a consequence they are planning for an early departure.

"In leaving Washington they are unanimous in their expression of satisfaction with the results of their conference, so far as the position of the railroads is concerned. Briefly summarized, the important points developed by their deliberations here are:

"First. A renewed insistence upon the principle of arbitration as the only proper method of settling labor disputes. The railroads have given the employees every possible consideration in this respect by offering to arbitrate their differences, either through the Interstate Commerce Commission, under the Newlands Act, or by a commission to be selected by the President of the United States.

"Second. An increased realization of the responsibility of the railroads toward their other employees, the shippers, the industrial, commercial, and general public, which they have been made to feel by thousands of telegrams insisting upon the maintenance of their position.

DENY RESPONSIBILITY FOR STRIKE.

"The railroad executives came to Washington upon the invitation of President Wilson and in good faith have worked continuously and earnestly in a sincere effort to solve the problem in justice to all the parties at interest. These efforts were still in progress when the issuance of the strike order showed them to be unavailing. Responsibility for the threatened strike does not rest with the executive.

"The counterproposition made at the request of the President last week and presented to him formally to-day represents the unanimous sentiment of the railroads and is the utmost concession to the demands of the men which in the interest of peace they feel able to make.

"Any other course would involve the surrender of a vital principle and impose undue burdens upon industry and commerce, impair railroad credit, and prevent railroad progress to meet the rapidly increasing commercial demands of the country.

"The strike, if it comes, will be forced upon the country by the best paid class of laborers in the world at a time when the country has the greatest need for transportation efficiency. The problem presented is not alone that of the railroad or business world, but one involving democracy itself, and sharply presents the question whether any group of citizens should be allowed to possess the power to imperil the life of the country by conspiring to block the arteries of commerce."

On the day the President appeared before Congress the committee of eight representing the railroads went to the White House and read to the President their final refusal of his terms. The statement in full follows:

We are unable after the most earnest consideration, to agree with the proposal of the President of the United States, which is that we accept without arbitration "the substitution of an eight-hour day for the present ten-hour day in all of the existing practices and agreements." This is the main point in controversy, and we can not surrender it without an opportunity to be heard in some form of fair arbitration.

We do not assent to the statement that "the eight-hour day now undoubtedly has the sanction of the judgment of society in its favor." We believe that society has not yet recorded its judgment upon this subject.

We are not in this controversy, however, dealing with the conditions relating to the eight-hour day in the industrial world. The difference between the eight-hour day in business and manufacturing interests and in the railroad train service day has been fully explained. The railroad day is a basis for computing pay and overtime, the length of daily service being controlled by variable conditions.

The demands involved in this controversy have not been presented, in our judgment, for the purpose of fixing a definite daily period of labor nor a reduction in the existing hours of labor or change in methods of operation, but for the real purpose of accomplishing an increase in wages of approximately $100,000,000 per annum, or 35 per cent for the men in railroad freight train and yard service represented by the labor organizations in this matter.

After careful examination of the facts, and patient and continuous consultation with the conference committee of managers and among ourselves, we have reached a clear understanding of the magnitude of the questions and of the serious consequences to the railroads and to the public involved in a decision of them.

As trustees for the public served by our lines and for the great mass of the less powerful employers (not less than 80 per cent of the whole number) interested in the railroad wage fund—as trustees also for the millions of people that have invested their savings and capital in the bonds and stocks of these properties, and who through the savings banks, the trust companies, and insurance companies are vitally interested to the extent of millions of dollars in the integrity and solvency of the railroads of the country—we can not in conscience surrender, without a hearing, the principle involved, nor undertake to transfer the enormous cost that will result to the transportation of the commerce of the country.

The eight-hour day, without punitive overtime, involves an annual increase approximating in the aggregate $60,000,000, and an increase of more than 20 per cent in the pay of men already the most highly paid in the transportation service. The ultimate cost to the railroads of an admission in this manner of the principle under contention can not now be estimated; the effect upon the efficiency of the transportation of the country now already under severe test under the tide of business now moving and at a time when more instead of less effort is required for the public welfare would be harmful beyond calculation.

The widespread effect upon the industries of the country as a whole is beyond measure or appraisement at this time, and we agree with the insistent and widespread public concern over the gravity of the situation and the consequences of a surrender by the railroads in this emergency.

In like manner we are deeply impressed with the sense of our responsibility to maintain and keep open the arteries of transportation, which carry the life blood of the commerce of the country and of the consequences that will flow from even a temporary interruption of service over the railroads, but the issues presented have been raised above and beyond the social and monetary questions involved and the responsibility for the consequences that may arise will rest upon those that provoke it.

The questions involved are, in our respectful judgment, eminently suitable for the calm investigation and decision by the public through the agency of fair arbitration, and can not be disposed of to the public satisfaction in any other manner. The decision of a commission or board of arbitration having the public confidence will be accepted by the public and the social and financial rearrangements made necessary thereby will be undertaken by the public, but in no less deliberate or orderly manner.

The railroads of the country can not under present conditions assume this enormous increase in their expenses. If imposed upon them it would involve many in early financial embarrassment and bankruptcy and imperil the power of all to maintain their credit and the integrity of their securities. The immediate increase in cost, followed by other increases that would be inevitable, would substantially appropriate the present purchasing power of the railroads and disable them from extending and improving their facilities and equipment, to keep abreast of the demands of the country for efficient transportation service.

For these reasons we are with deep regret unable to accept the suggestion made by the President of the United States.

We propose, however, as a basis of settlement, the following:

(A) The railroads will, effective September 1, 1916, keep the time of all men represented in this movement upon an eight-hour basis, and by separate account, monthly, with each man maintain a record of the differences between the money actually earned by him on the present basis and the amount that would have been earned upon an eight-hour basis—overtime on each basis to be computed pro rata. The amounts so shown will be subject to the decision of the commission provided for in paragraph C of this memorandum and payable in money, as may be directed by said commission in its findings and decisions.

(B) The Interstate Commerce Commission to supervise the keeping of these accounts and report the increased cost of the eight-hour basis, after such period of actual experience, as their judgment approves or the President may fix, not, however, less than three months.

(C) In view of the far-reaching consequences of the declaration made by the President accepting the eight-hour day not only upon the railroads and the classes of labor involved directly in this controversy, but to the public and upon all industry, it seems plain that before the existing conditions are changed the whole subject, in so far as it affects the railroads and their employees, should be investigated and determined by a commission to be appointed by the President, of such standing as to compel attention and respect to its findings. The judgment of such a commission would be a helpful basis for adjustments with labor and such legislation as intelligent public opinion, so informed, might demand.

The railroads will accept the findings of such a commission upon the issue of an eight-hour basis of pay as compared with the present basis, as well as upon any other matters now in controversy that may be submitted to it by either party.

The commission should consist of not less than five members, and should also be authorized to hear and determine all questions that may arise in the application of the findings of said commission or in the working out of such plan as it may propose.

The presidents of the railroads are prepared to continue negotiations on the subject with genuine anxiety, within the limits of their conviction above expressed, to find a solution of the situation.

On the 31st the Senate Committee on Interstate Commerce gave hearings of six hours—three hours to each side of the controversy. These hearings occupy 157 printed pages. On the same day Chairman ADAMSON of the House Committee on Interstate and Foreign Commerce, acting upon the belief that unless legislation satisfactory to the brotherhood was enacted by midnight September 2 the strike would take place, introduced his measure, which omitted the features of the President's recommendation offensive to the brotherhood. The following statement, printed in the Washington Star of the 31st, indicates the panicky situation:

HOW HIGH OFFICIALS ARE STRIVING TO-DAY TO AVERT STRIKE OF RAILWAY TRAINMEN.

President Wilson goes to Capitol to consult leaders in both Houses regarding legislation.

Renewing his efforts to have strike postponed, the President summons the four brotherhood heads to the White House at 2 o'clock.

Should President's personal appeal to brotherhood chiefs prove in vain, he is prepared to issue a statement calling publicly on members of the brotherhoods to bring about recall of its strike order.

Labor leaders in Congress tell brotherhood chiefs they will do labor lasting injury and provoke public wrath by persisting in their determination to strike unless Congress passes proposed legislation before Saturday midnight.

Leaders in both Houses agree—and President assures brotherhood officials—that prospects are an eight-hour law and provision for a commission to investigate wages will be enacted by Congress before Sunday.

Railroad managers and presidents, brotherhood chiefs, President Gompers of the American Federation of Labor, Assistant Attorney General Todd, and members of the Interstate Commerce Commission attend hearing before Senate Interstate Commerce Committee.

Postmaster General Burleson confers with President and insists mails be carried on every train moved if strike comes. If employees offer to run mail trains, he will insist that railroad furnish equipment.

Embargoes by railroads against perishable food supplies prove spur on Congress to hurry strike legislation.

Recall of 15,000 militiamen from duty on Mexican border is believed to be precautionary measure in connection with impending strike, as these troops are from States that are important railroad centers.

House took strike legislation into its own hands. Chairman ADAMSON of the Interstate Commerce Committee, supported by Speaker CLARK and Majority Leader KITCHIN, introduced a bill for eight-hour day and investigating commission, proposing under special rule to rush it through House and to Senate by Saturday.

Conference of administration officials at Capitol considered law of 1862 as authority for President to operate trains, especially for carriage of mails. No authority has yet been found a repeal of this statute.

The press of the same day contained the following evidence of activity:

After the Senators departure Majority Leader KITCHIN, Representative ADAMSON, and Postmaster General Burleson went into conference with the President.

ADAMSON BILL HELD UP.

Postmaster General Burleson and Representatives KITCHIN, ADAMSON and HARRISON, the latter a member of the Rules Committee, had been closeted in the majority leader's office in the House going over the Adamson bill. They discussed the situation, and meantime Mr. ADAMSON, who had planned to introduce his bill immediately, held up that measure pending their conference with the President.

Representative ADAMSON, chairman of the Interstate Commerce Committee, said:

"We will pass the eight-hour bill introduced to-day in the House to-morrow. That will include the provision for an investigation of the effect of the eight-hour day on the railroads. That, we believe, will prevent the strike."

Following the conference the President returned to the White House.

"I have just been keeping in touch with things to see that they keep moving, and they are moving," said the President as he left the conference with congressional leaders. The president's face beamed with a broad smile.

PRESIDENT'S EXPECTATIONS.

The President expects that the action of the railroads in issuing embargo orders against perishable freight, thus affecting food, will have some effect in quickening action by Congress.

Statements of brotherhood leaders that if the eight-hour law is passed by Saturday night the strike order will be rescinded led the President to redouble his efforts to have the measure rushed.

The panicky conditions of House leaders were displayed by their total subserviency to the wishes of the brotherhoods, as indicated by the following statement of the press:

The House leaders arranged at the conference for expedition of the bill through the House. The Rules Committee, anticipating a probable lack of quorum of the Interstate Commerce Committee, will report a special rule to discharge that committee from consideration of the bill, so that it may be taken up and passed by the House Saturday afternoon at the latest.

BROTHERHOOD CHIEFS TO SEE IT.

Majority Leader KITCHIN, immediately after the conference with the President, directed that the House eight-hour bill as drawn should be carefully revised and gone over and that it be submitted to the brotherhoods for approval and assurances before it is passed.

"We are not going to pass anything unless it will stop the strike," said KITCHIN. "Mr. Garretson told the Senate committee that they wanted a penalty provision put in the bill.

"All we propose is an eight-hour day and for an investigation of the effect, pending which there shall be no interference with present wages. We want to see if the brotherhoods will agree to that."

PRESIDENT IS ACQUIESCENT.

From some of the Democratic leaders it was learned that the President favors some other plan and more effective legislation, but that if he can not get it at once he would accept the House proposal if it is put through.

"The House ought and will take prompt action," said Representative HARRISON, of Mississippi, following the conference. "The indications are that the Senate may not be able to act before Monday.

"The matter is of such grave importance that it demands quick and drastic action by Congress, without parley and without delay. I favor reporting a rule to put the bill through the House, allowing a reasonable time for debate, but without unnecessary delay.

"The responsibility is on the House and on Congress. Congress will act as once."

Further evidence of this panic that overcame official Washington, from the President down to janitor, was the presence of the President throughout the morning of the 31st in his office in the Capitol, where he could keep in close touch with every movement. The constant fear of the leaders that they might not meet the requirements of the four brotherhoods was told in this dispatch, printed in all the Washington papers September 2:

While the House was at work the three brotherhood heads, at the invitation of Democratic Leader KITCHIN, occupied the Ways and Means Committee room near the entrance to the House floor, and were in constant consultation with the labor spokesmen in the House. They were insistent that the eight-hour day provision go through without any of the arbitration or wage-fixing amendments put forward during the debate. Representative CASEY, of Pennsylvania, was constantly on the go between them and Representative KITCHIN, and Representative KEATING, of Colorado, who conducted their fight on the floor. When the vote was taken they obviously were pleased. Their failure to make statements was attributed to fear that anything they might say would have an undesirable effect upon deliberations in the Senate.

Mr. Speaker, this measure was born in fright, fathered by fear, cradled in partisan politics, and carried through to final action under duress. It was brought into the House by special rule, ordered upon its passage by 4.30 of the same day, sent to the Senate, which was then in session awaiting action of the House, where it was debated until 10 o'clock that night when agreement was reached to take a final vote by 6 p. m. of the next day, which was Saturday, to enable the President to sign it before the time limit fixed by the brotherhoods beyond which the strike order would not be revoked. The Senate displaced their own plan or proposal in order to take up the House bill and to save time and possible disaster to leaders refused the slightest amendment, to avoid the necessity of going back to the House for concurrence. I do not believe the history of legislation furnishes a duplicate of such action. This in my judgment was the high-water mark of national humiliation if not degradation, as one Member put it, as well as the low-water mark of national honor and dignity. It is but a suggestion of what is before us, and what will happen if this element of fear is to dominate the legislative body in the future as in these days just prior to an election. I am not inveighing against

the representatives of the 400,000 men nor am I asserting that they have no just ground for their claim.

The increase of wages may be warranted. I do not know; neither did any of us know. Information is necessary before intelligent action can be taken. We have not that information, and while there is so little consideration given for the 99 per cent of our population I can not foreclose arbitration of the dispute to vote for the contention of less than 1 per cent in a panic. These representatives of labor are to be congratulated upon their personal achievement in frightening Congress to its knees. The time chosen was well planned. They found a Congress in session that they had reasons to believe would do their bidding. This is not to say that they desired to bring the matter to Congress at the onset. The President did that for them. The history of the last Congress, as well as this, is such that they would not risk much in coming to this body. This Congress is not different from the Sixty-third Congress, which took the first step of a series of which this panicky act is but the third step. The first was when Congress obeyed the demands of certain leaders to exempt labor unions from the operation of the Sherman antitrust law. That was in 1913. President Wilson, not yet obsessed with the second-term germ, signed the sundry civil bill with the exemption, but he denounced in specific terms the exemption. He gave his reasons for signing the bill that there were other funds with which to prosecute such violation, otherwise a veto would have been interposed. Then came the second step, the Clayton bill—not a rider of an appropriation bill, but a legislative act—which wrote into statute law the legal exemption of certain classes of citizens—to be specific, labor unions—from the operations of antitrust laws. The bill passed both Houses and the President signed it, so far as we know without batting an eye. Here by law we declare that certain classes are free to do acts which if done by others would be criminal. That was sowing to the wind, and we are now reaping the harvest. In a panic, in the face of a threat to stop all transportation unless certain conditions are met by a certain time, this Congress, the legislative body of 100,000,000 American freemen, legislates upon a doubtful constitutional question, offers a remedy to avert a threatened danger that may prove worse than the disease. This Congress proceeds to do a thing in fear, under duress, and proposes a perfectly foolish procedure of investigation of the thing done, after it is done, to see whether we were right or wrong in doing it. We do this upon the demand of and for a small fraction of our people against the protest of the employers, and place the additional burden upon the public without consulting the public or even knowing our grounds, save that we can not help ourselves. Both House and Senate, in the presence of crowded galleries, rang out throughout the day the notes of fear that unless we compel the employers to grant the concession the country will face untold suffering. They were but repeating the statement of the President, which virtually was a dictation to Congress to order the public to pay the bills whether right or wrong. Such abject abdication of Congress has no precedent. Instead of capitulating to either side of this controversy, we should have, on the part of the public, ordered the two sides to compose their differences through arbitration.

Mr. Speaker, it will appear to be criticism which at no time is pleasant to say that the President made a fatal plunder when he abandoned the principles of arbitration by ordering one side to surrender its contention without arbitration. If the future did not hold such tragic possibilities as the outcome of this action makes inevitable, I would withhold the criticism. The evils toward which we are rapidly going are manifold. This step of abandonment of arbitration when taken by the head of our Government in an official command to the Congress sets a precedent against the best possible method of settling labor disputes from which we will not recover soon. It opens the Pandora box. The action caused the President to cease to be a mediator and made him a partisan dictator. It involves humiliation to Congress and dire possibilities to the country.

A second error was his abandonment of his plan laid before Congress in his public address to govern future events. This abandonment clearly indicates that he was in a state of panic which made him unwilling to insist upon any item not agreed upon by the four brotherhoods. From start to end he played to the one side in this controversy as demonstrated by the events here depicted. Nothing was done to offend the brotherhoods and nothing was left undone to please them. Even his signature to the resolution was affixed by the use of four pens, one for each brotherhood—a great play.

In the light of these events it may well be asked why all this staging. Mr. Gompers in his ready-made statement may have furnished the answer in his call upon union labor to support Mr. Wilson. The same answer is vocal about the corridors of both Chambers of Congress and in the hotel lobbies, where are heard assurances from Democratic leaders that Wilson has "cinched" the labor vote. While it was perfectly apparent that this element was in the play thus staged it is not conclusive that it will have that result. The average union man does his own thinking, and the mere suggestion of a delivery of his vote to any man or party by any head or committee will not set well. On the other hand, favors granted to the 400,000 men directly affected will not appease the 1,600,000 others engaged in the same employment but not included in this resolution.

Then the 2,000,000 union labor membership is but a small fraction of the great body of labor which will be called upon to help make up the increase ordered by this resolution. Explanations may be demanded. The uncertain effect that such legislation will have directly upon the business of the country and indirectly upon the vast body of labor is another item that must be considered. This play has two viewpoints. The American public are the final judges of what is equitable burden, and must be reckoned with ultimately when it is put upon them without their consent. They pay the bills, and will have a right to demand some consideration.

Mr. Speaker, my vote against this resolution was cast without fear or favor, because of my desire to avert a worse situation that we must all face sooner or later, because of the inevitable outcome of such legislation. It closes up the safe method of arbitration in a contest that is not temporary, but must be cumulative and which is just beginning, between forces which ought to be friends in cooperation rather than enemies in battle array.

When we openly abandon this method to adjust these inevitable conflicts we abandon constructive for destructive plans. We openly refuse peaceful methods and resort to the test of physical force and endurance. This is the contest this Government will face in the very near future. I have always stood for what I thought was the rights of labor, not only in organization, but in employment. In the Ohio constitutional convention, of which I was vice president, we gave authority to the legislature to enact laws to secure the eight-hour day, workman compensation, insurance against occupational diseases, minimum wage, and other items, all of which I supported by voice and vote; but we also urged arbitration as the best method of settling labor disputes.

Under no circumstances would I have supported any measures to foreclose that method of adjustment. I have voted here in Congress for the shorter hours. If this resolution were an eight-hour day instead of a raise of wages under the guise of eight hours, I would not have hesitated to cast my vote for it, provided I was convinced that it could have been made workable. But that was not the issue. The determinant with me was whether we should foreclose arbitration in future disputes and invite open warfare between these mighty forces.

Mr. Speaker, at a former time, when the Congress was not in a panicky state of mind, I gave my views of the relation between capital and labor, which I still hold. I then said:

"Two views of labor have been held by the race—one looked upon it as an involuntary compulsion to be shunned as an evil; it was variously pronounced a task, a burden, a curse. The other view looked upon it as an opportunity, not necessarily an end in itself, but rather a means to an end—the end being the achievement. The former view was due largely to the stratification of society, which was built upon the basis that labor was of the many for the sake of the few. Even in the most cultured days of Greece the great mass of the population, fully nine-tenths, were mere slaves of the small proportion known as citizens. When the scholars of that country were gathered in the academic groves of Athens to be taught by Plato and Aristotle most of the teachers were consigned to a life of labor with no control over their time or talent.

"The same deduction in a sense could be made of feudal Europe down to the thirteenth century. In a smaller measure this stratification could be seen in modern Europe.

"Probably it is true that our own country, the home of the great middle-class population, offers the best concrete examples of a reversal of the rule so long observed. Here we can see the promised fruition of a principle that labor is not a curse but a blessing. There is one steady tendency to be observed—power and privilege gradually slipping from the few, and an equally noticeable growth of these among the many. The one is constantly lessening while the other is increasing.

"In our own country there is a constant growth of appreciation for the average man. The credentials of success of preferment are no longer birth, name, possessions, position, or accident. The poor of to-day may be the rich of to-morrow. The laborer of to-day may be the captain of industry to-morrow.

The weak of to-day may be the strong of to-morrow. The ruled of to-day may be the ruler of to-morrow. This possibility dates to the honor with which labor is held in the world. Whatever may have been its level in the past, it is one of honor in the future. The mere fact that the laborer of to-day may become the employer of to-morrow is an assurance that is destined to be held in proper regard. Long ago our country admitted that it was not the thing done, but the manner in which it was done that dictated its rank. Some labor with brain alone—the professions—others labor with hand alone—menial service—while still others labor with hand directed by trained brain—that is the skilled worker. It is the purpose of modern society to multiply this skilled class. This is the purpose of the vocational school which has taken such deep hold upon the country that Congress has now a bill before both bodies providing Federal aid for such training to the amount of $7,000,000 annually. It is the conviction not only of the vocational commission, but of most thinking people, that our future welfare as a Nation lies in our ability to insure a happy and successful worker. The vast mass of our people must live by the work of their hands. The problem is to guarantee not only the maximum of product, but also the acme of joy to the worker. As I said on the floor of the House—

"'The first and chief duty of any government republican in form, in which its character must depend upon the intelligence of the body politic, is education, the broadest possible educational training to service to the State and Nation.

"'The real function of government is to produce a high-grade citizenship. Indeed, that is the ground for government, with all the burdens entailed. This citizenship may and must be viewed from two angles—first, the State, and, second, the individual. The character of the citizen's activity is twofold; it is purely mental, which until recently expressed itself in professional occupations; or it may be physical largely, which is seen in manual labor. The latter represents the great bulk of any nation's people The educated product of a community is divided into three groups, viz, the college graduate, the high-school graduate, and those who leave school before the high school is reached. The college graduate represents less than 2 per cent, the high-school graduate numbers less than 6 per cent, while those below the high school are at least 93 per cent. Most obviously the 93 per cent must be the chief concern of the State.

"'With no systematic vocational program, our present system does not reach the great mass of the youth by giving that sort of education that will best fit them to adjust their lives to the work they must follow after leaving school. The maximum results of education stop short of the professional rank. It is not adapted to the most needed knowledge and training; it does not seek to produce the highest skill, and really is that unsettling process for failure rather than success.

"'The country's error with the great mass of our people is due to the wrong conception of the object of education, which is confined to simple culture, with little reference to the real work of the citizen.

"'Broad, general culture is the chief goal of the teacher—the altruistic leader. In this class are placed all great educational lights and leaders—Pestalozzi, Kant, Fichte, Arnold, Channing, Wayland, Horace Mann, and Emerson.

"'Most of these spiritual leaders regarded education its own reward. A boy or a girl should be educated primarily because he was a human soul which would be most sinful to allow to remain unopened. The chief measure of any system of education was the amount of soul power expressed by spiritual appreciation that could be realized.

"'While this conception should be kept before the Nation, it is perfectly apparent in this workaday world that this goal is not the lot of the vast mass of the human family. The Nation must face the problem as it is and not as it ought to be; however, the final goal should not be lost sight of. In the condition which confronts the Nation rather than a theory, over 90 per cent, or 9 pupils out of every 10, will be called on by the State to make a living by the employment of manual labor—work with their hands. A system of education that does not care for the nine-tenths is notoriously faulty. This great body of pupils are not necessarily what they are by choice, but by circumstances which they can not control, whether by lack of foresight and ability is not at issue. However, the State, by a proper system of education, can minimize the evil influences and multiply greatly the useful products of the talents awaiting development. The system should seek to enable the youth to command his environment. If he is on the farm and is to follow the plow, sow the crop, and reap the harvest he should be trained to do it, not as his father did, necessarily, but in the best way to compel the earth to yield its maximum product with a minimum expenditure of energy. His agriculture should be scientific. If he is in the city, then the work of his hand should not be after the methods of his ancestors for generations past, but should reflect knowledge of the subject, science, and skill in handling—art.

"'The interests of the farm call for agricultural training schools. The congested urban life calls for vocational schools, combining the science of the technical school and the art of skill of the industrial school.

"'What has been accomplished, and how, on the farm? What can and should be done among the urban peoples?

"'The real purpose of the State should be to keep open to every youth an equal opportunity to make the most of life. It should assist in clarifying purpose and presenting opportunity. The boy who is to till the soil should be led to it in the best possible way. The boy or girl who is to work in a shop should be educated for it. In other words, the State should assist in preparing every citizen for some vocation. This duty is twofold—first, its reflex upon the worker, and, second, its effect upon the State.'

"I see no better way to solve the problem of labor and capital, which becomes acute at periodic times, than a proper conception on the part of both of the rights and duties of each, which must be expressed by the word 'cooperation,' and which in turn demands efficiency on the part of labor and rational consideration on the part of capital. The sensitive feature of this problem is revealed continually by numerous items, such, for example, as the recent report of the Industrial Commission on Unemployment in the United States. All are agreed on the fact of unemployment. It is not psychological. But there is a wide difference as to the causes. The significant difference is displayed by the 183 witnesses affiliated with labor in contrast with the 181 affiliated with the employers of labor."

"A careful study of these divergences reveal the acute difference. One group assigns one line of causes; the other an entirely different line. If there is no agreement on the cause, there can be none on the remedy. This confusion may be due in part to a failure in comprehending the real situation, in part to prejudice, and in part to the work of propaganda. So long as the problem is viewed as a contest rather than as a cooperation extravagances must be expected.

"John Stuart Mill once said you must always demand more than is possible to grant in order to secure as much as possible. If this policy is pursued, and the demands become regnant, as is so often the case, these two great forces become armed camps of opposing forces instead of affiliated bodies for mutual helpfulness. A proper conception of this problem would avoid the unwisdom of the demand for legislation discriminating between citizens in a Republic, where every citizen is equal to every other citizen under the law. No thoughtful citizen can contemplate such legislation with equanimity. A law which declares an act unlawful if performed by one man and lawful if committed by another is more serious to this Republic than is at once discerned. It is based upon a misconception of the relation of capital and labor. This same serious situation is revealed in such statements as 'the business man holds the balance of power in Congress,' or 'labor has the balance of power.' Such propaganda proceeds upon the basis that the two are enemies.

"The solution of this problem lies in a better comprehension of the relation of capital and labor. This relation depends upon a recognition of the rights of both. Capital has rights that labor must respect; labor has rights that capital must respect. These rights are not antagonistic but cooperative. So long as the two are regarded as at enmity, the problem is serious and both must suffer. Capital, which assumes all the risk, must be conceded a profitable investment; its owner must be granted the right of contract, with the remedy for its violation. Labor, on the other hand, must be conceded fair wages, reasonable hours, steady employment, and the right of contract, with remedy for violation. It can also demand certain assurances, as against insanitary conditions and caution against injury, and so forth.

"Capital must depend upon a degree of cooperation and efficiency on the part of labor in order to insure labor's rights. On the other hand, labor must depend upon the willingness of capital to guarantee those rights not merely as rights of labor but as duty of capital.

"The profits of capital must look to the efficiency of labor, and the efficiency of labor must look to the profits of capital. The two must be in accord; each must see the other's advantage, else both must waste."

Mr. Speaker, instead of the Nation's Congress legislating in a panic, in a manner which all openly deplore and many expressly declare themselves helpless to do otherwise, it would be more in keeping with the public welfare and the dignity of legis-

lation to calmly and deliberately go forward to meet in an orderly, not a revolutionary, way the problem that is inevitable. Above all, we should not openly invite great complications by a craven surrender of principle in order to avert a possible period of suffering. Had the strike leaders refused to revoke the order—which I do not believe they would have done, in the face of public sentiment—it is quite apparent that it would have been very brief at best, if it would have more than interrupted traffic temporarily. It would have been better, in my judgment, to have kept free from taking sides until public interests would have demanded the Government's intercession, and then by a decree that if the adjustment can not be reached the Government would serve the public until it could be done. This strong hand will inevitably be called into requisition. The Government's function is not to decide between contestants, but to induce them to compose their differences. In the sight of recent events the future will be ominous.

## EXTENSION OF REMARKS

OF

## HON. JOHN R. FARR,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, September 1, 1916.*

Mr. FARR. Mr. Speaker, with other preeminent attainments, ex-President Theodore Roosevelt is distinguished as a close student of history, and ready and forceful in the application of the lessons of history to the emergency of a particular occasion.

When he heard the Republican candidate for the Presidency, Charles E. Hughes, make his masterful arraignment of the administration of President Wilson in his speech of acceptance of the nomination in New York, July 31, 1916, Col. Roosevelt, in an interview given to the newspapers, said:

Just before coming in to listen to Mr. Hughes's just characterization of Mr. Wilson's failure to protect the lives and property of Americans in Mexico and on the high seas, I happened to look up John Fiske's Critical Period of American History, and was struck by the following two sentences:

"A government touches the lowest point of ignominy when it confesses its inability to protect the lives and the property of its citizens."

"A government which has come to this has failed in discharging the primary function of government and forthwith ceases to have any reason for existing."

Mr. Hughes has pointed out in his speech, with self-restraint but with emphasis, that it is precisely this primary function which Mr. Wilson's administration has failed to discharge, and that it is precisely this point of ignominy to which he has reduced the Nation over which he is President.

**American Industries After the European War—History Constantly Repeats Itself.**

---

## EXTENSION OF REMARKS

OF

## HON. JULIUS KAHN,

OF CALIFORNIA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. KAHN. Mr. Speaker, about twenty-three hundred years ago Thucydides, the Greek historian and philosopher, declared that history constantly repeats itself. The truth of that assertion has been demonstrated time and again during the brief existence of these United States. Our history has repeated itself constantly and will continue to do so, no doubt, during all the years of our national life. But the surprising thing about it is that we learn nothing from past experiences. The lessons of past history are entirely lost upon us. Let me give an illustration that is particularly apt at the present time.

During the War of 1812 and the period of the Napoleonic wars, by reason of British orders in council, Napoleon's decrees, nonintercourse acts, and embargoes, our foreign trade was practically wiped out. In consequence our home industries grew at a rapid rate. The attempt to shut off our foreign trade resulted in the upbuilding of American factories, mills, and workshops. Despite the damage to our shipping the country was exceedingly prosperous. Our tariff duties were not high, but the war prevented the mills and workshops of Europe from dumping their manufactured products on the markets of the United States. Napoleon, however, met his Waterloo on June 18, 1815. The armies of Europe were gradually disbanded and the soldiers returned to the farms, the mills, and the factories. The conclusion of peace immediately threw our ports open to foreign trade. It was not long before the producers of Europe were dumping their surplus productions into our markets. These soon became glutted. Shiploads of cottons and woolens and ironware came in a veritable flood to our shores. The agents of the producers offered them for sale on most liberal terms. They gave long credit. So steady and constant was the stream of goods, wares, and merchandise sent to the United States that they were finally put up at public auction and disposed of to the highest bidders.

Lord Brougham justified the speculative character of this trade on the ground that—

It was well worth while to incur a loss upon the first exportation in order by the glut to stifle in the cradle those rising manufactures in the United States which the war had forced into existence contrary to the natural course of things.

No American interested in the upbuilding of the industries of his country should ever forget that statement. It has been the principle upon which all those foreign producers who would destroy American enterprise have constantly acted.

From 1815 to 1816 the importations doubled. American woolen mills were compelled to shut down, and many of the owners were ruined. The manufacturers of iron on the Atlantic seaboard shut down their furnaces and put out their fires. Congress was memorialized by the cotton manufacturers of New England and Pennsylvania for protection against the low-priced goods from England and India. The manufacturers of paper and the printers protested against the competition of Holland and France. The sugar planters of Louisiana, the manufacturers of cordage of Massachusetts, the hat makers of New York, the gunsmiths of Lancaster, Pa., and the owners of hemp factories in Lexington, Ky., all demanded protection against European competition.

As a result of these insistent demands, on February 12, 1816, Mr. Dallas, then Secretary of the Treasury, submitted a protective-tariff bill to Congress. Many increases in import duties were subsequently enacted by the Congress, but they were insufficient to keep out the flood of foreign importations. Up to this time the tariff had not been framed with the sole idea that American manufacturers were to be protected from the cheap labor of Europe and Asia. But ultimately the tariff act of 1824 was intended to afford such protection.

During the period between 1819 and 1824, by reason of the enormous importations of foreign goods, the factories in the United States languished and the country was in a state of panic. The tariff act of 1824 afforded considerable relief, but the duties were still found to be insufficient. Therefore in 1828 the tariff rates were still further increased. This law of 1828 was denounced by South Carolina and other Southern States, and finally led to the compromise tariff of 1833, which was said to give "a lease of nine years to protection." Under this latter act the duties were practically scaled down by one-tenth of the excess over 20 per cent each year, until in 1842 there would remain a horizontal rate of 20 per cent ad valorem on most all imported commodities. These latter tariff measures stopped the influx of foreign goods into our markets and resulted in the further upbuilding of American industries. However, about this time the tariff became a sectional issue. The cotton growers of the South demanded free trade. The manufacturers of New England and the Middle States demanded protection for their growing industries. And then in 1846 the so-called Walker tariff was enacted into law.

It was a tariff for revenue only. It was stated to be the lowest tariff this country had ever known. It was followed by great prosperity, and the Democrats have constantly endeavored to credit that prosperity to the Walker tariff of 1846. Republicans, on the other hand, assert that the tariff law had absolutely nothing to do with this prosperity. It was due to other causes, they maintain. In the same year that the Walker law was enacted we declared war against Mexico, and for two years we were engaged in a struggle with that country. During this period, with thousands of men taken from the industrial centers of the country to fight in the armies of the United States, thus reducing the supply of labor, the country was prosperous despite the low tariff.

In the same year, 1846, Elias Howe invented the sewing machine, which immediately came into use and materially re-

duced the cost of production of manufactured cotton and woolen goods. In the year 1848 gold was discovered in California. It added materially to the world's supply of the yellow metal. In 1851 this supply was again enhanced by the discovery of gold in Australia. Then came the Crimean War in Europe. There were great demands for the products of American farms and workshops, which added greatly to the prosperity of the United States. By reason of these events the Republicans insist that during that period any kind of a tariff law would not have interfered with the prosperity of the United States. That prosperity, they claim, resulted from all these collateral and fortunate circumstances I have narrated. Then, in 1857, by reason of the apparent prosperity of this country, Secretary Walker advised a still further reduction of import duties.

The tariff act passed in that year cut down all the rates in the various schedules considerably below those that had been in force since the passage of the law of 1846. And then came the panic of 1857. There is no doubt that the lowering of the tariff duties by the act of March 3, 1857, helped materially to bring about this crisis. Mr. Blaine in his "Twenty Years in Congress" expressed this view, as follows:

The protectionists therefore held that the boasted prosperity of the country under the tariff of 1846 was abnormal in origin and in character. It depended upon a series of events exceptional at home and even more exceptional abroad—events which by the doctrine of probabilities would not be repeated for centuries. When peace was restored in Europe, when foreign looms and forges were set going with renewed strength, when Russia resumed her export of wheat, and when at home the output of the gold mines suddenly decreased, the country was thrown into distress, followed by a panic and by long years of depression. The protectionists maintain that from 1846 to 1857 the United States would have enjoyed prosperity under any form of tariff, but that the moment the exceptional conditions in Europe and in America came to an end the country was plunged headlong into a disaster from which the conservative force of a protective tariff would in large part have saved it.

Thus our past history should teach us what to do to-day. Do we want a repetition of what we went through right after the Napoleonic wars and the Crimean War? Is not history repeating itself to-day in the Underwood tariff law of 1913? The Speaker of this House, Hon. CHAMP CLARK, in addressing the House when the Underwood tariff bill was passed, proclaimed it the lowest tariff law that had ever been enacted by the American Congress. He said it was even lower than the Walker tariff of 1846. Be that as it may, the customhouse records disclose the fact that during the few months it was in operation prior to the outbreak of the European war at the beginning of August, 1914, the manufactured imports from the factories of Europe, and especially in woolen and cotton goods, increased enormously.

Our own factories began to close down just as they did during the low-tariff period following the Napoleonic wars. Again the flood of manufactured goods which reached our shores was causing our own mills and workshops to shut down. History was repeating itself. Our workmen were thrown out of employment and hundreds of thousands of factory hands were idle. Soup houses were established in many communities in the industrial centers of our country.

However, the outbreak of the European war cut off the importations from the countries across the Atlantic. Soon after the beginning of the war the factories of this country began to manufacture munitions of war and all kinds of supplies to be used by the armies of the belligerent nations. As a result we have had prosperity in those sections of the country which are engaged in this manufacture. But what will be the aftermath? The mills and factories of England have not been destroyed. They will be ready to resume operations the moment peace is declared. Germany has not been invaded. Her factories, too, are intact. When peace shall be proclaimed her soldiers will return to the arts of peace. The factories of England and Germany will be running again, full blast. Both countries will be in need of ready money to replenish their empty treasuries, and again the products of their mills, their factories, and their workshops will be dumped on the American market under the low tariff duties of the Underwood law.

I hope the lessons of the past will not be lost upon my countrymen. I hope that realizing the dangers that confront American industries they will elect to the Senate and to the House enough Members pledged to the enactment of a protective tariff to insure the passage of such a law. If they will but take a page from their own history, the history of the first half of the nineteenth century, they will elect as President the Republican candidate who is pledged to the enactment of a protective tariff.

Why even Great Britain is beginning to seek remedial legislation to prevent the dumping of the goods of other nations into her ports at the close of the present war. She has always been considered a free-trade country. Her business men are among the shrewdest traders in the world. On July 13, 1915, a "subcommittee of the advisory committee of the board of trade on commercial intelligence, with respect to measures for securing the position after the war of certain branches of British industry," was appointed. This subcommittee investigated the conditions that will probably arise after the war in the following lines of enterprise: Paper manufacture, the printing trades, including color printing, the stationery trade, the jewelers and silversmiths' trade, cutlery, fancy leather goods, glassware, table glass, laboratory ware, and glass bottles, china and earthenware, electrical apparatus, brush, and so forth, trade, and hardware.

Among the remedies suggested and recommended in the report is that of tariff protection. The report was made on the 11th day of January, 1916. It states:

We are bound to say that so far as our particular inquiry has gone, though some amount of weight has been attached to the various proposals put forward, * * * they were all regarded as of secondary importance in comparison with one question, and that is the possibility or otherwise of tariff protection after the cessation of the war. Practically all of the representative firms and associations consulted by us asked for a measure of protection.

If that represents the attitude of the British manufacturers, how much more important is it that laws be enacted for the protection of American industries. With our high scale of wages, our better working conditions, how much greater is our need for protection. Let us prepare our country against the certain flood of manufactured goods from Europe that is bound to come under the existing Underwood tariff law. Let us not be deaf to the voice of the past. A protective tariff framed by a Republican Congress pledged to the principles of protection and signed by a Republican President will alone avert financial catastrophe when this cruel European war is over.

## Defense of Mr. Samuel Herrick.

## EXTENSION OF REMARKS

OF

## HON. ROYAL C. JOHNSON,

OF SOUTH DAKOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. JOHNSON of South Dakota. Mr. Speaker, in a recent article in an Oregon paper appears the following:

WASHINGTON, *August 7, 1916.*

Congressman SINNOTT, greatly pleased by the passage of his bill appropriating $94,000 for the relief of the settlers of Sherman County, Oreg., who were dispossessed by the Eastern Oregon Land Co., is strongly of the opinion that attorneys claiming fees for services in securing passage of the bill are entitled to nothing on that account.

Samuel Herrick, a Washington attorney, has contracts with a number of the claimants providing that he is to receive 20 per cent of the sum realized for presenting their case to Congress. The bill provides that not more than 5 per cent shall be paid on account of such claims, and Mr. SINNOTT says Herrick is not entitled to that.

HERRICK OF NO ASSISTANCE.

"Herrick was of no assistance at all in securing passage of this bill," says the Oregon Congressman. "He was rather a detriment than a help.

"When I came to Washington I went into this matter fully to determine why it was that this legislation had not made headway. I found that bills before Congress, which Herrick had prepared, failed to distinguish between good claimants and those who admittedly had no claim, although a report of Special Agent T. B. Neuhausen detailing the merits of the different claims was available.

"Many of the items in the bill thus presented could not be defended and the measure was consequently held up.

SINNOTT INTRODUCES BILL.

"In conversation with Herrick I learned that he had drafted the bill without reference to Neuhausen's comment on these claims. I then introduced the bill which has passed, in which I included meritorious claims that I felt could not be successfully attacked. This bill has passed through my efforts and the efforts of other members of the Oregon delegation. Herrick had nothing to do with it, and no one owes him anything for services, so far as I can see."

Mr. Herrick is a fellow citizen of mine, a resident and voter of South Dakota, and known to me to be an upright, conscientious, and able lawyer, particularly in his specialty of public land and mining law. Graduating from the Columbian Law School of this city at the very head of a class of 83, he has since made good and fulfilled the promise thus held out. When I was attorney general of the State of South Dakota I had occasion to learn of his capability and qualities in a land case against the State, in which he had been employed by my predecessor in office. Only last winter he was again employed by that State in some important litigation in the United States Supreme Court, involving the constitutionality of the State primary law, and was successful therein. He likewise appears for the State of Mississippi in all of its land grants, has one or more cases pending for the State of Florida, a large number

for the State of Louisiana, and represents many important interests before the Interior Department and the courts, though his services are usually to be found on the side of the lowly homesteader.

As an instance of the way in which Mr. Herrick is regarded by men in public life, I quote the following from a letter of introduction given August 20, 1908, to the then Secretary of Agriculture by Hon. Francis W. Cushman, long a member of this party from the State of Washington and known, loved, and revered here as "the Abraham Lincoln of the House." In this letter Mr. Cushman says:

I do wish to say that from a long and intimate acquaintance in Washington City with Mr. Herrick that I not only regard him as a lawyer of unusual attainments, but one of the most intelligent and conscientious men I have met in Washington City. I have had considerable business with him, and I have been impressed with his sincerity and uprightness.

The following might be quoted from a letter to Mr. Herrick, dated August 28, 1908, from Hon. HENRY F. ASHURST, then district attorney of Coconino County, Flagstaff, Ariz., and now United States Senator from that State:

I have received and carefully read the brief filed by you in support of the appeal of the H. E. of Victor La Londe. I congratulate you very heartily, for it is the best brief, the most complete, the most concise, and the strongest I have ever read in an H. E. contest, and I have had more than 60 cases before the department in which briefs were filed in my behalf by other attorneys.

If we lose this case, it will not be your fault; and if we win it the glory will all be yours.

The late Senator Kittredge, from my own State, wrote Mr. Herrick on August 26, 1907:

I again extend congratulations to you for the success with which you are meeting in the numerous South Dakota cases.

The following recommendation was given by the Hon. Jesse J. Dunn, of Oklahoma, who was chairman of the first constitutional convention of that State and subsequently chief justice of the supreme court of that State, a man described by the gentleman from Oklahoma [Mr. FERRIS], in a letter dated March 17, 1908, as "one of the best and brainest men we have in Oklahoma. This statement does not only come from me, but would come from almost any citizen in the State." Mr. Dunn wrote a Wichita (Kans.) firm on January 17, 1907, thus:

We recommend Mr. Herrick of your city, who we regard as the very best land lawyer in the United States. He has done a great deal of business for us and has always done it in the best and most satisfactory manner and for the most reasonable fees.

The following is from a letter to him, of March 17, 1907, from the Senator from North Dakota [Mr. MCCUMBER]:

I fully appreciate your good work in this matter, as in all others you have had to do with, in which you have been interested.

The following is in a letter from the late Senator Kittredge, dated Sioux Falls, September 13, 1913, to Mr. Henry Heinz, of Elkton, in that State:

Mr. Herrick is an attorney in whom I am sure you can place the utmost confidence. He has done a great deal of work for South Dakota people on my recommendation, and has been very successful.

The late Senator Heyburn, on December 2, 1908, wrote Mr. W. M. Freeman, of Meadows, Idaho, a client of Mr. Herrick, as follows:

You can rest assured that you will get an impartial hearing in your contested land case. You have an excellent attorney, who will present your case in the most favorable light possible.

The Hon. Phanor Breazeale, formerly a Member of this body from Louisiana and later practicing attorney in Natchitoches, La., wrote on February 24, 1908, to Mr. Herrick, as follows:

We beg to assure you of our deep appreciation of your prompt and courteous attention to all matters sent you, and especially of the splendid way in which you handle all matters for us. We are proud of this success and take no credit to ourselves. We will continue to send all our business to you, and only wish we had more of it.

The gentleman from Nebraska [Mr. KINKAID] wrote on August 18, 1908, as follows:

It has been my pleasure to know Mr. Herrick for the last three or four years, during which I have recommended constituents needing the services of an attorney in the Department of the Interior to employ Mr. Herrick, and through my recommendation he has been employed in several cases, and the services so rendered have proved satisfactory. I can only add that I regard Mr. Herrick as a reliable and worthy attorney and gentleman.

Similar letters might be quoted from former Congressmen Burke and Martin, of my State, both of whom recommended the retention of Mr. Herrick in land cases on many occasions, and both of whom I believe were never disappointed in him; also letters from other Members and former Members of both branches of Congress. But in view of the above, it seems hardly necessary.

As to this attorney's handling of matters before Congress, I will quote only one letter, namely, that written to him on March 4, 1907, by the Hon. Myron T. Herrick, then president of the Yak Mining, Milling & Tunnel Co., of Leadville, Colo., formerly governor of Ohio, and recently ambassador to France, a statesman of preeminent business qualifications and ability to judge men. He wrote as follows:

It seems to me that you have nearly broken the record. The passage of your bill has been marvelous.

After thorough investigation of the matter I am of the opinion that the criticisms of Mr. Herrick's services by the gentleman from Oregon [Mr. SINNOTT] were entirely uncalled for and unjust, and that, as a matter of fact, the passage of the measure in the form advocated by the gentleman from Oregon operated as an injustice to the settlers whose claims were eliminated.

The claims originated in 1900, when litigation over the title to certain lands in the overlapping limits of the Northern Pacific Railroad grant and The Dalles military wagon road grant resulted in a decision sustaining the latter grant and ousting the settlers who had been encouraged to go upon the lands by the Interior Department, most of whom had been allowed homestead entries thereon and many of whom had received patents.

In 1904 (33 Stat., 51) Congress directed an investigation of the claims of these settlers, and the Interior Department conducted a thorough investigation by Special Agent Neuhausen and two high officials in the Secretary's office, in the course of which nearly every tract of land was personally visited and a lengthy report to Congress was made. For several years nothing further transpired and the matter languished, but in August, 1908, one of the settlers and claimants, Uriah Serviss by name, came to Washington on behalf of himself and the others, and after consultation with a leading trust company of this city secured the services of Mr. Herrick. The matter was taken up vigorously with the then Oregon delegation, and bills were introduced in both the Senate and the House.

Upon reference to the Interior Department, report was made by Secretary Ballinger, neither approving nor condemning the measure, but suggesting that if any relief were given it be upon the basis of the Neuhausen report, as any further investigation would not be worth while. Accordingly, the Senate passed the bill not once, but twice or three times, the amount appropriated being $250,000, or so much thereof as might be necessary, and the amount going to each settler being the sum recommended by the special agent.

That Mr. Herrick was instrumental in presenting these claims to Congress and securing the active assistance of the Oregon delegation appears from a letter written him on November 15, 1909, by Senator Bourne, requesting him "to inform me regarding the nature of the claim and its status." Also by a letter addressed to him by Senator CHAMBERLAIN on December 9, 1909, reading thus:

I will be glad to confer with you in reference to this matter and to take such steps as may assist in having the Government do justice to these men. I can learn better the status of the matter by a talk with you than from the statements of the settlers.

The bills failed of passage in the House, but in the Sixty-second Congress favorable report was secured from the subcommittee of the Committee on Claims after presentation of the matter by Attorney Herrick, and favorable report was also made by the entire committee.

It was then that the gentleman from Oregon, Mr. SINNOTT, appeared on the scene, having been elected to Congress five years after the work was undertaken by the attorney mentioned, and after legislation had been passed twice by the Senate and had been favorably reported by the House Committee on Claims. Without reference to the opinion of others who had read the Neuhausen report, he rejected more than half of the claims as illegal or unworthy and prepared a bill appropriating some $96,000; also providing that no attorney should receive more than 5 per cent of any claim for his services. The attorney consulted with him, offered to cooperate with him fully, and to appear before the committee or subcommittee at any time.

The bill was passed, however, without any hearing given to said attorney, or anyone else, and went to the Senate. Mr. Herrick then appeared before the Senators from Oregon, Messrs. CHAMBERLAIN and LANE, urging that the elimination of more than one-half of the claims was unjust, and requesting a hearing in order that he might present their merits, and also argue as to the unconstitutionality of the provision in re attorneys' fees. Under date of July 7, 1916, the Senator from Oregon, Mr. LANE, wrote Mr. Herrick agreeing to give him the hearing, but several days later rendered a report from the committee recommending passage of the House bill without amendment. The bill then passed the Senate without discussion on July 31, and became a law on August 11, 1916 (Private, No. 93).

With regard to the provision as to attorneys' fees, it is evident from the above statement that there is a very serious

question as to its constitutionality. It was first inserted in a bill before Congress five years after Attorney Herrick entered upon the work, and after the bill was introduced in three different Congresses, was passed by the Senate twice, was favorably reported by the House committee once, also after he had rendered services before a committee of Congress wholly without compensation, but in reliance upon the contracts which he had received in the year 1908, and subsequent years. That Congress should, after eight years of such work, provide by statute that his compensation, fixed by contract, should be reduced 75 per cent, would seem to be clearly a violation of the fifth amendment to the Federal Constitution, declaring that no person shall be deprived of liberty or property without due process of law.

Precisely the same question came before the Supreme Court of the District of Columbia a year ago in the case of Moyers & Consaul *v.* Fahey (at law, No. 57944). The provision in the omnibus claims act of March 4, 1915, fixing 20 per cent of the amount recovered as a maximum amount to be received by attorneys for services rendered in the prosecution of the claims appropriated for, was held by Justice Gould, in a carefully considered opinion, to be unconstitutional and void, and judgment was given the attorneys for the full amount of their claim, namely, 33⅓ per cent (Washington Law Reporter, vol. 43, pp. 691–694). No appeal was taken from this decision, and the question is therefore settled law in this District, so it would seem that Attorney Herrick will have no difficulty in winning out by proper proceedings in the courts. The inquiry naturally presents itself, however, as to the insistence of the gentleman from Oregon, Mr. SINNOTT, upon such a provision in an appropriation act when the courts of this District had only a few months before declared a similar provision (though not nearly so confiscatory a one as this) to be contrary to the Constitution of the United States.

Not only was this provision without the authority of law, but it was unsatisfactory and, in a measure, repudiated by some of the claimants themselves. Thus C. K. Mills, of Weiser, Idaho, wrote Mr. Herrick on March 11, 1915, as follows:

> I will say that I am pleased to hear from you and think that you should go ahead as you think best, as we people would have gotten nothing at all had it not been for your services. I personally will pay the 20 per cent as per contract.

Ella G. Marshall, widow of Warren D. Marshall, claimant No. 25, and who is included in the present act, also wrote on March 11, 1915:

> I am very sorry that you lost such a big part of your commission, but I certainly, for one, appreciate your efforts in our behalf.

R. H. Grosser, claimant No. 166, wrote his attorney on May 22, 1916, that:

> We did not think it was right that they should cut down the amount you received. We believe you did the best you could and hope you can get another bill through.

March 5, 1915, Mrs. Uriah Serviss, widow of the first abovementioned claimant, thus wrote:

> I know my husband would have paid you just what he agreed to, and I shall do so, and I know you have earned it. When the claim is paid you will receive your compensation. My husband had confidence in you, and I am willing to trust you to do what is best for me in this matter.

Again, on August 10, 1916, after the passage of the present bill providing for her claim, Mrs. Serviss again wrote Mr. Herricks as follows:

> I fully realize that you have worked long and efficiently in my behalf and interests, and therefore leave the matters of fees entirely with you. Whatever you decide on will be entirely satisfactory to me, and upon receipt of the warrant I will at once remit the amount of your charge to you.

So, on March 20, 1915, Harry Smith, of Oakland, Cal., thus addressed his lawyer:

> I suppose by the time another Congress meets that we will be forbidden to have an attorney to represent us, as I see that they have cut your commission down to almost nothing, but I admire a man that keeps staying with them. * * * It will do no good to pass this bill after we are dead and gone, as a great many are already.

C. W. Barzee, of Portland, Oreg., claimant No. 104, thus wrote Mr. Herrick on March 4, 1915:

> I note the provision that your percentage shall be changed to 5 per cent. This change should not affect the deal between you and your clients. You demanded nothing from us by way of expense to us; [it] is a clean gain, as the proposition was lost cause to us through the dilatory method of Congress. Rest assured that I shall deal fairly with you.

This same claimant, however, must have imbibed some of the ideas of the gentleman from Oregon during the following year, as on August 15, 1916, he thus wrote:

> I had previously been in correspondence with Representative SINNOTT regarding this matter, and have again taken it up with him. I will refrain from sending power of attorney until I hear from him thereabout. * * * I insist that this matter must be settled there and not individually among the clients. I shall await a reply from Mr. SINNOTT, and in the meantime you may confer with him regarding my claims in this letter.

Thus it seems that the activities of the gentleman from Oregon to reduce, or cut out entirely, attorneys' fees have not been confined to the introduction and passage of bills and to the giving of interviews to leading Oregon dailies, but have included epistolary communications to individual claimants.

With regard to the reduction in the number of claims from 203 to 67 and in the amount of the claims from $250,000 to $94,648.13, a consideration of the record should prove to any legal mind the injustice done to fully two-thirds of these claimants. Twenty-four of these were rejected in a body because they "made homestead claims to land in the overlapped area, but they since made homestead entry of other lands." The report admits they were probably entitled to some relief, but offers the excuse that "the report of Agent Neuhausen does not give sufficient data from which to make an intelligent estimate of the damage caused in each case." However, the Interior Department had repeatedly stated that uselessness of another investigation, and accordingly Congress should either have appropriated the full amount recommended by the special agent or else so much of such amount as the Interior Department should conclude to allow in each case.

Again, some 42 of the claims were rejected in a body, because "the applicants in these cases occupied the land in the first instance with the hope of obtaining title from the railway company, and the title of the railroad company failed." This reason was manifestly insufficient, because it makes no difference what the original idea of the settlers was so long as they claimed from the Government as homesteaders under the then ruling of the Interior Department, made improvements, and brought about cultivation under such claims, and later were ousted under the decision of the United States Supreme Court sustaining the title of the Wagon Road Co. In all our experience with Government claims I believe this to be the first instance where a valid claim against the Government has been rejected upon the ground that the claimant first had some erroneous idea irrespective of the real merits of the claim. Congress is going rather far to deny a right asserted under the United States laws and the departmental decisions, because the possessor of that right had some years previously an idea or intention of adopting a different course than the one he subsequently adopted and the one under which he sustained the loss for which the Government is responsible.

A large number of the other claims were rejected "because no entries were ever allowed by the Government." This likewise was no good ground for rejection, because, since the claimants lived on the land and suffered injury by reason of their ouster and loss of improvements, it is immaterial whether or not entry had been allowed. As a matter of fact, the Neuhausen report (No. 1442, 63d Cong., 3d sess.) showed that a large number of the homestead applications had been rejected because litigation was then pending in courts and that the Secretary of the Interior had thereupon reversed the local officers and directed allowance of the entries. The report of First Assistant Secretary Jones, dated September 4, 1914, found on page 19 of said report, stated that the department twice instructed the local officers by telegram, once in 1893 and once in 1897, to allow no entries on these lands. In view of the situation thus arising, with litigation pending in the courts and with proceedings before the Interior Department, the settlers without entries were just as well justified in proceeding with their improvements and cultivation as were those having entries of these lands.

With regard to some of these claims, we find a reduction in the amount without any reason assigned therefor.

Thus the two claims of Hiram E. Powell, deceased, were reduced from $3,108 to $2,000, while the two of Otis P. Messinger were cut from $3,040 to $2,000. The two of T. S. Hill, deceased, were changed from $3,520 to $2,000; those of Rufus H. King, from $3,920 to $2,000; that of Adolph Perrault, from $2,885 to $2,000; and, finally, that of Uriah Serviss, who had probably been more instrumental than any of the other individual claimants in ultimately securing a measure of relief, was reduced from $4,165, recommended by Special Agent Neuhausen, to a bare $2,000—and that in the face of the fact that after the ouster the Wagon Road Co. refused to sell him the land for less than $8,000, the letter of the secretary of the company to that effect being found on pages 142 and 143 of the Neuhausen report, supra. Possibly the fact that Uriah Serviss has for a number of years lived in the State of California and not in Oregon may account for the lack of interest in his claim and the allowance to him of a totally inadequate sum. Another feature of the report accompanying the bill introduced by the

gentleman from Oregon and recently enacted into law is the circumstance that several of the claims, namely, Nos. 126, 127, 128, 129, 130, 132, and 133, have received no mention whatever, and were omitted without any reason being assigned therefor. This is rather strange in view of the statement in the report—No. 160, Sixty-fourth Congress, first session—that—

It is doubtful whether the report of Special Agent Neuhausen has ever been read by anyone representing the Government.

After thus indicting at least a considerable portion of two Senates of the United States, of the entire membership of the Committee on Claims of the Sixty-second Congress, not to mention Secretary Ballinger and other Secretaries of the Interior and their assistants, it would seem as though some slight mention should be given to seven of these claims, especially as all of the others are treated by number in regular order, and the slightest care would have demonstrated that seven of them were thus omitted.

That few Oregonians favored a reduction of the amount of these claims in the sum of more than three-fifths is evidenced by the fact that so late as December 10, 1915, the Senator from Oregon [Mr. CHAMBERLAIN] introduced a bill (S. 1167) in the same form in which it had been introduced in previous Congresses by himself and Senator Bourne, and appropriating "the sum of $250,000, or so much thereof as may be necessary."

In this connection it is to be noted that none of the prior bills, and which have been so severely criticized, appropriated a lump sum for the payment of these claims, but only so much of such sum "as may be necessary," and then specified the sum as the amount recommended in the report of Special Agent Neuhausen. As to some of these claims Neuhausen recommended no relief to be extended, and consequently under the terms of these bills none would have been received by the claimants. Consequently the criticism above quoted, "that bills before Congress which Herrick had prepared failed to distinguished between good claimants and those who admittedly had no claims," falls of its own weight. Both the qualifying words after the mention of $250,000, the further provisions as to the maximum amount to be paid each settler, and the authority given the Secretary of the Interior to make the payments constituted ample safeguards against any excessive amount being paid to any claimant.

My object in discussing this case so fully is twofold: First, in my opinion an injustice was done Mr. Herrick by the publication of this article and, as a citizen of South Dakota, it is my duty to state the facts if he has been unfairly treated. Again, it appears that Members of Congress oftentimes indulge in much criticism of residents of Washington that is uncalled for, and criticism is made when it would not be made if the person attacked were given the right to vote and to take the same part in public life as that taken by residents of the several States. There is no redress for these attacks, and the publicity goes throughout the entire United States. No matter what course may be taken by others, I feel it to be my duty to defend any citizen of South Dakota when in my opinion he is unjustly attacked, and the statement of this case is made solely in the defense of Mr. Herrick, with no desire to criticize any other individual.

## Has President Wilson Kept Us Out of War?

### EXTENSION OF REMARKS

OF

### HON. JULIUS KAHN,

OF CALIFORNIA,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, September 2, 1916.*

Mr. KAHN. Mr. Speaker, it has often been asserted that President Wilson has kept us out of war. I deny the assertion. We had war with Mexico for the second time in our history when we invaded her territory at Vera Cruz. We again had war with Mexico when we invaded her territory after the raid on Columbus, N. Mex. One might just as well say that Belgium is not engaged in war. Her territory, too, was invaded. Unlike the Mexicans, the Belgians fought back. The Mexicans only made sporadic attempts to fight back. In these attempts they killed and wounded American soldiers. If the Mexican people had been imbued with the spirit of the Belgians, we would not have escaped so easily.

If anyone doubts that we made war on Mexico when our marines and sailors landed at Vera Cruz, ask the mothers and fathers of the boys in blue who were killed on the streets of that Mexican seaport whether they believe we were at war with Mexico.

Ask the boys who were wounded on that occasion and for many weeks suffered intense pain as they lay groaning upon their cots in improvised hospitals whether the President kept us out of war.

Ask the wives and the mothers and the sisters of the Mexicans who were killed at Vera Cruz whether we were at war with Mexico.

Ask the wife of brave Capt. Boyd, who was killed at Carrizal, whether we were at war with Mexico.

Ask the mother of brave Lieut. Adair, who was also killed at Carrizal, whether we were at war with Mexico.

Ask the relatives of the United States soldiers who were treacherously slain at Carrizal whether we were at war with Mexico.

Ask the relatives of the 18 American civilians who were butchered at Santa Ysabel in Mexico whether we were at war with Mexico.

Ask the mothers and the sisters of those who were slaughtered in the raid on Columbus, N. Mex., whether we were at war with Mexico.

Ask the citizens of Brownsville, Red House Ferry, and Progreso post office and Los Peladas whether, in the attacks of Carranzista adherents, accompanied by looting, burning, and the killing of the peaceful inhabitants of those places, the President has kept us out of war.

Ask the women and children who were threatened with death at Tampico by an infuriated Mexican mob whether the President has kept us out of war.

Ask the thousands of American citizens who were called upon to abandon their property in Mexico and return forthwith to the United States whether the President has kept us out of war.

Ask the hundreds of those refugees who are in the United States to-day, practically penniless and in want, who were forced to leave their property and homes in Mexico because the Wilson administration refused to give them the protection to which they were justly entitled, whether the President has kept us out of war.

Ask the thousands of peaceful Mexicans who have suffered all the privations of hunger and famine during the period of "watchful waiting" whether the President has kept us out of war.

And, finally, ask the wives and the children, the dependent mothers and fathers and sisters of the 150,000 national guardsmen who have been called from their usual peaceful avocations and who will be encamped on the Mexican border for the Lord knows how long, whether the President has kept us out of war with Mexico.

In 1912 the Democratic platform proclaimed this high-sounding doctrine:

The constitutional rights of American citizens should protect them on our borders, and go with them throughout the world, and every American citizen residing or having property in any foreign country is entitled to and must be given the full protection of the United States Government, both for himself and his property.

In the campaign of 1912 the President was very insistent in saying that—

The Democratic platform means what it says. It is not molasses to catch flies.

Surely the way this plank has been executed by the present administration is proof positive that not a word of it was intended to be carried into effect but that it was only "molasses to catch flies."

How the lives and property of American citizens have been safeguarded on the border I will leave for Mr. Lansing, the Secretary of State of this administration, to describe. After several years of "watchful waiting" the Secretary of State sent a letter to the head of the de facto government in Mexico in which occurs this remarkable language:

The progress of the revolution in Mexico: Continuous bloodshed and disorders have marked its progress. For three years the Mexican Republic has been torn with civil strife; the lives of Americans and other aliens have been sacrificed; vast properties developed by American capital and enterprise have been destroyed or rendered nonproductive; bandits have been permitted to roam at will through the territory contiguous to the United States and to seize, without punishment or without effective attempt at punishment, the property of Americans, while the lives of citizens of the United States who ventured to remain in Mexican territory or to return there to protect their interests have been taken, and in some cases barbarously taken, and the murderers have neither been apprehended nor brought to justice. It would be difficult to find in the annals of the history of Mexico conditions more deplorable than those which have existed there during these recent years of civil war.

It would be tedious to recount instance after instance, outrage after outrage, atrocity after atrocity, to illustrate the true nature and extent of the widespread conditions of lawlessness and violence which have prevailed. During the past nine months in particular, the

frontier of the United States along the lower Rio Grande has been thrown into a state of constant apprehension and turmoil because of frequent and sudden incursions into American territory and depredations and murders on American soil by Mexican bandits who have taken the lives and destroyed the property of American citizens, sometimes carrying American citizens across the international boundary with the booty seized. American garrisons have been attacked at night, American soldiers killed and their equipment and horses stolen; American ranches have been raided, property stolen and destroyed, and American trains wrecked and plundered. The attacks on Brownsville, Red House Ferry, Progreso post office, and Las Peladas, all occurring during September last, are typical. In these attacks on American territory, Carranzista adherents, and even Carranzista soldiers took part in the looting, burning, and killing. Not only were these murders characterized by ruthless brutality but uncivilized acts of mutilation were perpetrated.

Representations were made to Gen. Carranza, and he was emphatically requested to stop these reprehensible acts in a section which he has long claimed to be under the complete domination of his authority. Notwithstanding these representations and the promise of Gen. Nafarrete to prevent attacks along the international boundary, in the following month of October a passenger train was wrecked by bandits and several persons killed 7 miles north of Brownsville, and an attack was made upon United States troops at the same place several days later. Since these attacks leaders of the bandits well known both to Mexican civil and military authorities as well as to American officers have been enjoying with impunity the liberty of the towns of northern Mexico. So far has the indifference of the de facto government to these atrocities gone that some of these leaders have received not only the protection of that government but encouragement and aid as well.

Depredations upon American persons and property within Mexican jurisdiction have been still more numerous.

That is the indictment of the Wilson administration in Mexico by its own Secretary of State.

And yet our Democratic colleagues have the effrontery to tell the people of the United States that President Wilson has kept us out of war.

## The Eight-Hour Law.

### EXTENSION OF REMARKS
OF
### HON. JAMES T. McDERMOTT,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. McDERMOTT. Mr. Speaker, the eight-hour law for railroad employees that was passed Friday gave none of the absent Members a chance to vote. We were notified to be here to-day and vote, and I am here; and had I been here Friday I would have voted for this law, as it is what the men who run the trains wanted; and eight hours is long enough for this hard, nerve-racking work. I am glad to be here to-day to help in the final passage of this great humanitarian law and proud of the Democratic Party, which looks after the interest of the American workman, and it is with pleasure that I am here to-night to see the Speaker of the House of Representatives sign this excellent bill on its final passage before being presented to the President for his signature.

## Improvements in the Postal Service.

### EXTENSION OF REMARKS
OF
### HON. ARTHUR B. ROUSE,
OF KENTUCKY,
IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. ROUSE. Mr. Speaker, the story of postal administration under the Wilson administration is a story of the administration for the first time of the largest governmental business enterprise in the world on a strictly business basis.

The net surplus of postal receipts and expenditures for the four fiscal years 1913–1916 under President Wilson is more than $1,800,000.

During the four fiscal years 1905–1908, during Roosevelt's second term and under Postmasters General Cortelyou and Meyer, the postal deficit amounted to $48,739,639.34.

During 1909–1912, during Taft's administration and under Postmaster General Hitchcock, this postal deficit aggregated $24,937,657.40.

And but for the abnormal conditions in the fiscal year 1915, when the European war caused the only postal deficit recorded under Wilson and Burleson, the surplus for the four years would have amounted to from fifteen to twenty millions of dollars. It may amount to from thirty to forty millions during the next four years if Democratic administration is continued.

In the year ending June 30, 1908, the number of miles of mail service rendered annually by the Postal Service, exclusive of that performed by city and rural carriers, was 538,438,722. In the year ending June 30, 1912, this figure was 578,165,266, and in the year ending June 30, 1916, this annual mileage of mail service had become 618,116,956.

Surpluses of $3,800,000 and of $3,500,000 were paid into the Treasury for the fiscal years 1913 and 1914, respectively, and the surplus for the last fiscal year ending June 30 is $5,742,445. After annually recurring deficits the Wilson administration has put the Postal Service upon a self-sustaining basis.

THE SQUARE DEAL.

To provide equal service for everybody, to give the very best service everywhere, to eliminate "pull," privilege, and waste all along the line—these have been the guiding rules of the Postal Establishment under Democratic control.

Private interests doing work for Uncle Sam have been required to give honest measure for honest pay.

Postal employees of all grades have been compelled to place efficiency of the service above all other considerations. There has been open, fair competition in the bidding upon all contracts for furnishing postal supplies, and contractors have been required to live up to their contracts.

Principal officers of the great corporation which handles all the huge mail-transfer service in Greater New York bribed postal clerks for paltry sums to alter the records so that the rich corporation could evade payment of penalties for failing to meet contract obligations.

The general manager of the company, one employee of the company, and one post-office employee were sent to the penitentiary. The company was purged of every officer and employee of the company to whom was attached the least suspicion. The company was fined $50,000, sufficient to cover the losses of the Government.

The results of Postmaster General Burleson's administration of the Postal Savings System have been phenomenal. Under his guidance the number of depositors has increased from 310,000 at the beginning of March, 1913, to 603,000 at the end of June, 1916, while the amount deposited has increased during the same period from $30,000,000 to $86,000,000. The gain of nearly 50 per cent in the per capita deposit is convincing evidence of the prosperity of the working people of this country, who are the principal patrons of the postal savings banks.

HUGE GROWTH OF POSTAL SAVINGS.

Postmaster General Burleson urged upon Congress the necessity of removing the hindering restrictions imposed by the original postal savings act of June 25, 1910, on the amount that may be accepted from a postal savings depositor. In response to his recommendation an act was passed and received the approval of President Wilson on May 18, 1916, which enables any person to deposit any number of dollars, and at any time, until the balance to his or her credit amounts to $1,000, exclusive of accumulated interest. By the terms of the original postal savings act no one could deposit more than $100 in any one calendar month, nor have a balance to his credit in excess of $500, exclusive of accumulated interest. As a result of these restrictions, it has been estimated that as much money was refused at the post offices as was accepted. The removal of the hindering restrictions has been followed by an immediate and pronounced increase in postal savings deposits, which will ultimate in restoring a large part of the hidden money of the country to the active channels of industry and commerce.

Rapid progress has been made to secure stronger and safer mail cars. This tends to protect from death or injury the 21,000 railway mail clerks who are directly engaged in the railway transportation of mails.

Since March 4, 1913, 847 all-steel and 203 steel-underframe full railway post-office cars, a total of 1,050, have been placed in service, and 223 wooden full railway post-office cars have been retired from service. Of a total of 1,411 full railway post-office cars, there are now but 361 full wooden cars up to the construction requirements of the department, of which 337 are steel reinforced.

Also, railway postal clerks are afforded the added protection granted by the new liability law, which provides leave with pay for injuries sustained while on duty and relief for their relatives and legal representatives in case of death.

RURAL FREE DELIVERY.

When the present Democratic administration came into office between 2,000 and 3,000 petitions from patrons living in the rural districts asking for the establishment of rural free-deliv-

ery service were pending before the Post Office Department. To-day there are but 20 such petitions pending. Up to the close of 1915 there were authorized by the Post Office Department under the Wilson administration a total of 8,942 new rural free-delivery routes and extensions. It is a record without parallel in the postal administration of the country. More than 430,000 families have been accommodated with new or improved rural service between March 4, 1913, and March 31, 1916. Some of the conspicuous instances of the extension of the service where badly needed and with the number of families served are: California, 17,608 families; Illinois, 12,860; Indiana, 11,675; Iowa, 11,605; Kansas, 9,021; Michigan, 12,727; Minnesota, 14,650; Missouri, 25,844; Ohio, 21,526; Pennsylvania, 28,127; West Virginia, 10,718, and so through the list of States in the same liberal proportion.

REAL CIVIL SERVICE.

Under the Taft administration 47,000 fourth-class postmasters, although all were political appointees, were covered into the classified civil service by Executive order. This order was annulled by and provision made under Mr. Burleson for filling all fourth-class offices paying $500 a year or more by competitive examination. A limit was placed at $500 because of the difficulty of obtaining an eligible list of at least three applicants in the very small towns. A genuine civil service has been introduced in lieu of a system which merely perpetuated a political régime.

Mail service to all of the belligerent nations of Europe has been maintained. Parcel-post exchange with Germany and Austria was continued until last November, when the only steamship lines available refused to handle the business.

Extensions have been made in the international parcel-post and money-order systems which greatly improve the facilities of exchange between the United States and the countries of South and Central America. Parcel-post and money-order conventions have recently been negotiated with Brazil and Argentina, the two largest of the South American Republics. Five other new parcel-post treaties have been put in operation.

Five treaties have been concluded establishing the 2-cent letter rate from the United States to the Bahamas, Barbados, British Honduras, Dutch West Indies, and the Leeward Islands.

POSTAGE TO PAN AMERICA.

The Postmaster General is vigorously pushing negotiations to obtain treaties applying the 2-cent letter rate throughout the Western Hemisphere. The improvements already made are materially assisting the development of commerce with the Latin-American nations.

A parcel-post treaty with China has just been negotiated and became effective August 1. This will do much to help American trade expansion in the practically limitless field open among the 400,000,000 people of the Chinese Empire.

The Post Office Department is assisting materially in purifying the advertising columns of magazines and newspapers. It has joined heartily in the movement which tends to prevent acceptance by publishers of advertisements of a fraudulent nature.

In contrast with the lax attitude of the Taft administration on the subject, the fraud-order statutes have been relentlessly enforced against all fraudulent enterprises which use the mails in the circulation of their advertising "literature." During the last fiscal year 57 fraud orders were issued. In the same year 1,900 lottery schemes were barred from the mails.

## The Political Situation.

# SPEECH

OF

# HON. MEYER LONDON,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, July 21, 1916.*

Mr. LONDON. Mr. Speaker, I hesitate to participate in a purely political discussion. This sort of speechmaking, to the effect that under a Democratic administration every hen will be laying three eggs and under a Republican administration only two and one-half eggs, does not appeal to me at all. The truth is, you can not judge of the effect of the Underwood tariff because of the abnormal conditions which now confront the world, so that all this talk about the effect of the tariff and what would have happened if something had not been what it was is purely speculative. It is self-evident that tariffs must ultimately be decided by civilized nations on the principle of reciprocity, on the principle of mutual accommodation, and of mutual advantage.

The Republicans love to indulge in talk about the United States becoming a world power; about abandoning the policy of isolation; about expanding the export trade. If we are to increase our foreign commerce, we can not pursue a selfish, narrow policy which disregards the interests of other nations. If every nation is to build around itself a Chinese wall of protection and exclusion, how can the exchange of articles among nations be profitable to any nation?

It was under protection that the wealth of the country concentrated in the hands of a few. The farmer has been so thoroughly protected that 37 out of every 100 farmers are tenant farmers, farmers without farms. It was under protection that a majority of the industrial workers reached the stage of destitution. It was under protection that child labor assumed such alarming proportions that even the most hardened reactionaries had to yield to child-labor legislation.

The tariff is no longer an issue between the two parties. The Democrats have absorbed enough of protectionism to be hardly distinguishable from the Republicans in that regard.

So far as the industrial and the agricultural workers are concerned, the two parties look very much alike.

The Democratic Party is essentially a middle-class party. It is the champion of the small man who wants to become big at the expense of other small men and primarily at the expense of the propertyless worker who has nothing to sell but himself.

It has set out to incorporate in the law of the land a number of measures which it believes will check the course of economic centralization.

It has announced that it would smash all monopolies and limit the power of the trusts. It would promote competition. And a number of laws having for their object the propping up of the middle class have been enacted by the Democrats.

But the economic law has proven stronger than statutory law. Not a trust has been dissolved. Not a single article of necessity has become cheaper.

And while the Republican Party represents the industrial oligarchy, and while the Democratic Party takes under its protecting wing the despairing middle class, both parties appeal to all classes, and particularly to the worker, because, strangely enough, while he has nothing else, he has a vote.

Both of you promise higher prices to the farmer and a reduced cost of living to the consumer, bigger profits to the employer and higher wages to the worker, higher rates to the railroad companies and lower rates to the shipper. You promise everything to everybody at the same time. You seek to accommodate all groups and all interests of society, no matter how irreconcilably they conflict. Necessarily you must resort to imagination. Necessarily you must exhaust your capacity for running away from facts; necessarily you find yourselves enmeshed in discussions that are not based upon the foundation of reality. You talk prosperity. Now you are prosperous. Only heaven knows how little you are responsible for that prosperity.

Mr. DAVIS of Texas. Will the gentleman yield?

Mr. LONDON. Yes.

Mr. DAVIS of Texas. The gentleman charges our prosperity largely to the European war and the good crops——

Mr. LONDON. I do not want to say that. I simply say that this habit of political parties to attribute temporary prosperity or temporary economic adversity to the influence of the party then in power is superficial, is foolish, and is beneath the dignity of statesmen. That has been done by both parties.

Mr. DAVIS of Texas. The gentleman admits that times are universally better than heretofore?

The SPEAKER. Does the gentleman from New York yield to the gentleman from Texas?

Mr. LONDON. I do.

Mr. DAVIS of Texas. The gentleman admits that times are universally better than they were?

Mr. LONDON. I believe that, judged by existing standards, there is considerable business and considerable activity to-day, but to what extent is that activity due to the war and to what extent is it due to what you have done? Let us assume that every bill you have passed is of the best. What have you done to increase that prosperity? I am not arguing for the Republicans, because I am opposed to that line of argument which attributes prosperity to the result of your action in Congress. I am a Member of the National Legislature and am very proud of it, but I do not believe in the cure-all power of legislation. I do not believe you can bring prosperity forthwith by an act of Congress.

Mr. DAVIS of Texas. Will the gentleman yield for a question?

Mr. LONDON. Yes.

Mr. DAVIS of Texas. He admits that prosperity is here?

Mr. LONDON. Yes.

Mr. DAVIS of Texas. Then if there is no other way to account for it we can account for it by the fact that all things work together for good to them that love the Lord, and the Democrats love Him this time.

Mr. LONDON. Oh, if you are going to attribute things to the love of the Lord, the question is not how much you love the Lord, but how much the Lord loves you. That is the real question.

Is the rural credit bill claimed by the Democratic Party as the cause of prosperity? Do you claim that the Clayton Act has contributed to prosperity? Has the good roads act contributed to prosperity? You have increased the Army and the Navy and increased the appropriations by six or seven hundred million dollars. Has that contributed to prosperity? Analyze measure after measure and honestly tell me which of them has contributed to prosperity. Then, you claim that the Underwood tariff has contributed to prosperity. The Underwood Tariff Act has not had a chance. Before the effect of that tariff became known the impatient people turned out so many Democrats from the House that it almost destroyed your majority. The people did not give you a chance to test the Underwood Tariff Act before the war. So you can not honestly claim that prosperity is due to the Democratic Party or Democratic statesmanship. [Applause on the Republican side.] On the other hand, the Republicans in the intensity of their partisanship refuse to give you credit for the good things you have done.

The one great accomplishment of the President, an accomplishment which should ungrudgingly be conceded, is that he has kept the country out of war. [Applause.] This is a great deal in the present frenzied state of the world. And while I am on this subject I want to remind you of the fact that I was the only one to vote against the Villa expedition, an expedition which has brought this country pretty close to the verge of war.

We Socialists will keep up our work of educating the masses. We will maintain our stout opposition to war and to everything that leads to war. While you talk military preparedness we will teach the workers to prepare for industrial democracy. Using their economic and political power, they will learn that there is no relief for the propertyless man except in the collective ownership and democratic management of the Nation's resources.

## Address of President Howard Edwards, of the Rhode Island State College.

---

## EXTENSION OF REMARKS

OF

# HON. WALTER R. STINESS,

OF RHODE ISLAND,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. STINESS. Mr. Speaker, under the leave granted by the House I insert in the RECORD the baccalaureate address of President Howard Edwards, of the Rhode Island State College, entitled "The Legacy of the Fathers":

BACCALAUREATE ADDRESS OF PRESIDENT HOWARD EDWARDS, OF THE RHODE ISLAND STATE COLLEGE, JUNE 13, 1915.

"And the chief captain answered, With a great sum obtained I this freedom. And Paul said, But I was born free." Acts xxii: 28.

Thus spoke two men concerning the freedom of citizenship under the Roman Empire. The soldier, to indicate the value that he placed upon it, emphasizes the greatness of the sum that he paid for it; the apostle, prizing the privilege none the less, glories in the greater claim that his fathers were also free and that the precious boon came to him by inheritance. He was born free. Such is the attitude toward Roman citizenship of men at the two extremes of mental outlook and environment, the one by profession a soldier, the other an apostle of Christian righteousness. Now, the freedom which these two men so highly valued was that of the Roman Empire, such freedom from personal harm as might survive under the absolutism of an Augustus or Tiberius Cæsar, a Caligula, a Claudius, or a Nero, to whose cruelty and luxurious lust Paul later owed the loss of his life. There is no comparison between the freedom of even the noblest Roman of Paul's day and that of the humblest human being in this American Republic of ours. The question that for many months has been knocking upon the door of my mind and calling more and more insistently for a reply is, Do our young people, especially in our colleges, begin to realize the preciousness of American citizenship? Do they stand ready, if necessary, to guard it with their lives?

THE PRICE OF OUR FREEDOM.

For this freedom of ours did not come by chance, and will not be perpetuated by nerveless sentimentalism and careless short-sightedness. Our fathers bought this freedom with a great price. They bought it at Bunker Hill, at Valley Forge, at Bennington, and at Yorktown. They paid the price of four years of civil war that "this Nation, under God," might "have a new birth of freedom and that government of the people, by the people, and for the people" might "not perish from the earth." They have transmitted this freedom so purchased to us, and we can proudly boast that we are born free. Shall we guard and maintain it? Shall our children also be born free? The answer is with you, young men, in the attitude you take toward national policies and national duties.

No sane man desires war; no wise man but would go very far to avoid its unspeakable horrors. We do not need to be told of them; they leap at us from the pages of every newspaper we take up. But likewise no sane man does not recognize that great powers of evil are still abroad in the world and that they are restrained and can be controlled only by physical force. Inside the Nation we call this control the police force of city or of state. Outside, between nations, there exists no police force, and every nation must guard its own existence and keep its own honor by preparedness of its own force, just as the man of earlier days, before efficient police control, taught first of all his own hands to protect his head. It is idle and worse not to face the facts of the world in which we live because we long for and labor for the conditions of an ideal world which does not exist, and the one ugly fact that we can not ignore is that righteousness can not afford to allow unrighteousness to control and exercise the physical forces of nature and of man.

THE JINGO DANGER—WHERE?

I find it, therefore, exceedingly disturbing and alarming to read from a leader of opinions, for instance, that "force never settled anything." Then our Revolutionary War, which settled the independent status of this Nation, and our Civil War, which settled the question of slavery and welded the confederation of States into a Union, were dreadful orgies of crime, accomplishing nothing.

Again I read, "In many of our universities large numbers of students have sent many letters and petitions to President Wilson urging the Government at Washington not to allow"—what? The inconceivable barbarities of Belgian invasion? The drowning of new hundreds of innocent women and children? No, no; alas! no. Their petition is simply "not to allow the country to be dragged into war."

I have received lengthy warnings about "militaristic jingoism" in this country. Men have written me to protest against the military drill required by law in our colleges, and rarely carried on voluntarily. No doubt you have seen, as I have, severe strictures upon the organization of the boy scouts. Really I am at a loss to know what it all means, except that I fear that it means disaster and shame to my country under present world conditions. Where is this dreaded jingo spirit? How does it express itself? The National Army uses every inducement, yet is not able to keep itself recruited up anywhere near its exceedingly modest legal limit; the Navy is largely undermanned and, in recent maneuvers, showed itself both lacking in necessary units and unable to prevent the landing of any respectable force upon our shores. There is not a State in the Union whose volunteer forces are equal in numbers or training to the demands that riot and insurrection have at times made upon them. Our powder works have until recently fairly gone into hysterics over "farming with dynamite" in order to furnish a market for their product. With 35 years' experience in military schools no one knows better than I how difficult it is to keep up any sort of interest and discipline in the military drill. Where does this dreaded jingo militarism have its local habitation? Really I can only explain the antimilitarism of some of our people by assuming that they are trying to exorcise militarism from Germany by disbanding the police force in Providence. They are subduing castles in Spain by tilting against windmills—in New England. They would cause their own children to take a bath every time they see a street gamin with a dirty face.

THE REAL DANGER.

If this were all, it might be passed over with a smile, but it is far from being all. The first duty which every nation owes its people is protection against outside attack, and for this protection the nation must rely upon the training, the valor, and the willingness to make necessary sacrifices that have been bred into its men. Our pacifists are weakening the very foundations of national safety by teaching our men to eschew and despise the means of defense. They call us to peace! peace! when there is no peace, when the whole earth is filled with tumult and violence. They talk of a million men, in case of a call for defense, rushing to arms in 24 hours. Where are the arms they would rush to? Where the ammunition? Where the trained leadership? Where the commissariat? Where the hospital corps? What they are really asking is that a mere mob futilely offer itself for sacrifice, and that an organized government should never be forgiven for asking.

Optimism is an excellent philosophy—the right and, indeed, the only proper kind of philosophy. But to refuse to face facts because they are unpleasant or undesired, to wave aside as phantoms things that are real and tangible is not optimism, but rather either folly or cowardice. I, too, am an optimist. I hope that my house will not burn; and, indeed, being a careful man, I really believe that it will not burn. Nevertheless, seeing that the houses of others equally careful have burned and do burn, I insure my house. So I hope that we may not be involved in war. I can not say at the present time that I do not believe we shall be so involved; but, be that as it may, I know that others equally undesirous of war and equally innocent of any offense have been visited with fire and sword and barbarities unutterable. I know that the one great nation of central Europe whose lands have not been ravaged, whose women and children have not been ravished and tortured, is the one and only nation that was thoroughly prepared for war. I know that at this very time this Nation of ours, conscientiously seeking to perform all its duties as a neutral to all the warring nations, has been deliberately attacked in the exercise of its primal rights; its property has been wantonly destroyed and the innocent live of more than a hundred of American men, women, and children have been taken. I know that from the very beginning of this war the doctrine of "frightfulness" has been deliberately adopted and utter disregard of all convention or law, human or divine, has been consistently shown. The fire is all around our house. Shall we not insure now, before it is too late?

THE NONARMAMENT PROPAGANDA.

Under the conditions now existing, it is difficult to speak of the propagandists of nonarmament, of restricted armament, or of disarmament with due moderation. With an armed and mutinous crew

in this world ship of ours, it is simply madness to insist that the officers throw their revolvers overboard. When insurrection is raging in a city and murderous mobs are burning its houses and pillaging its treasures we do not insist on disbanding the police; on the contrary, we call on the governor to send armed troops, and woe be unto us if he does not have them to send.

Among these apostles of peace and disarmament are some of the noblest people this country has produced. In the list I find the names of intimate friends, some of the finest characters I have ever known; yet in denouncing their propaganda at this time I am profoundly convinced that I am doing God and my country whatever service in me lies. The time may come, and I pray God it may come soon, when the civilized world can organize peace and control the earth with a federal police system; but that time is not now, and it can never come as long as a single powerful nation is animated by the doctrine of a Bismarck, a Moltke, and a Treitschke, and is dominated by the medieval brain of a Hohenzollern or a Hapsburg.

OUR DUTY UNDER A PEACE LEAGUE.

Meanwhile for any single nation to attempt disarmament or to refuse adequately to arm itself is to invite dishonor, disgrace, and disaster. Why not face the facts fairly and fully? With the present feeling in Germany, does any man doubt that the one thing standing between us and attack from Germany is not the rectitude of our intentions nor the unpreparedness of our Army and Navy, it is simply the navy of England and the army of the allies. I repeat it, if we do not have war with Germany it will be simply because the warring of the allies prevents Germany at this time from undertaking it. Does it not seem unmanly, un-American, despicable to hug to ourselves the delusion of superior virtue in not preparing to do for ourselves that which we, with no single word of gratitude, receive through the blood and agony of men whom we condemn for maintaining armaments? I will go much further. The advocates of disarmament recognize that the mere casting away of arms will not suffice to keep peace on the earth; that somewhere there must be a force at hand to quell disorder and prevent just what has happened in Belgium and Luxemburg; and their solution of the problem, indeed the only conceivable one, is that the other nations should combine to quell by their united force the aggression of any recalcitrant nation. Now, it must be clear that this plan or any plan like it demands two things—first, the clear determination of the fact of aggression; second, in every nation a sense of responsibility for the crushing of aggression and a readiness, in the fulfillment of that responsibility, to take up arms for suppressing and punishing aggression.

The case of Belgium is a case in every way adapted to test the sincerity and logic of the disarmament advocate. It is made to order, so to speak. Never can we hope for the clearer establishment of the fact of unprovoked aggression. Not only does the court of the world's opinion convict Germany of it, but she herself through her highest official admits it. What, then, about national sense of responsibility to suppress the aggression, and willingness to take up arms to meet the duty? Has the disarmament propagandist been urging us to take up the cause of Belgium? Has he been heard to insist that Navy and Army be modernized and strengthened so that we might do our fair share in suppressing this supremely wanton lawlessness? Does the ease or difficulty of the task in any way affect, in his eyes, the imperativeness of the duty? It is despicable in the sheriff to carry out the sentence of the law on a poor wretch without arms and without friends but to let the rich and powerful offender go free; and worse than that, such a course renders the law itself contemptible and the sheriff's office a farce. If the cry of Belgium did not awaken in the pacifist the sense of responsibility, it is idle to expect that any future similar contingency would call forth unselfish action in men and in nations, whether bound in a general compact or not.

ENGLAND'S ACTION.

But there was one nation that did hear the cry of Belgium and is now battling for her redemption. Whatever may be said of England in the past, and there is much in her past to condemn, to me she is glorified to-day by the purity of her cause, the clearness of her vision, the greatness of her sacrifices, the steadfastness of her purpose, and the loyalty of her heart. I do not mean for a moment to imply that England was entirely altruistic in going to war. But I do mean that none of the causes leading to her decision was unworthy or sordid, and that the one cause which united the nation and decisively turned the scale for war was Belgium's wrongs. I make no apology for this digression. It is simply the tribute due to a noble deed nobly done.

THE FATHER'S LEGACY.

Our fathers gave to us a legacy, not only of a united nationality, but also of a broad and teeming land, and a theory of organized government. Of these last two I do not deem the latter less valuable than the former.

It is a wonderful land—this broad belt of plain and prairie, of mountain and table-land, extending from Atlantic to Pacific, a land far surpassing the fabled wealth of Ormus and of Ind, a land of a hundred million of busy people, of great cities and smiling countryside, a glorious land of peace and plenty, of unity and concord, of liberty, opportunity, and intelligence. Yet beyond all this is a heritage of institutions, traditions, human ideals far more wonderful and precious. The best material things of life—the air, the sunshine, the rain, the blue sky, and the green earth—come to us so abundantly and so naturally that we scarcely think of them as blessings at all. Nay, we frequently grow irritated at their monotony of abundance, and restlessly seek for change even at the expense of comfort. So it seems to me that we frequently comport ourselves toward our institutions and traditions, taking them as a matter of course and failing to give thanks; and sometimes, alas! even doing our utmost, through indifference or greed, or lust of power, or fear and cowardice, to destroy them. Only recently I read from a responsible source, with much other material of the same kind, that it is far from being established that republican government is the ultimate form for insuring the welfare of society and preserving the covenant ark of civilization.

Now I do not know what is in the womb of time, but I do know that at present there are but two essential forms of government, the one autocratic, claiming its power from above or from conquest, and holding its will supreme, and the other popular, holding its power as delegated from the people, and pledged to hear and heed the mandates of public opinion. It matters not what names and disguises a government may take, the essential fact is the acknowledged origin and source of power. England, for instance, has a King, but under the transparent veil of royalty and aristocracy, the Government is that of the commons—representatives of the people duly chosen. In fact, theoretically and legally, the commons are the people and are all-powerful. On the other hand, Mexico, under the form of a republic when it had a Government, was really an autocracy pure and simple.

AUTOCRATIC GERMANY.

Germany is an autocracy. Its Emperor says so, and there is no word of denial from the German people. "We Hohenzollerns," said he, "take our crowns from God alone, and to God alone we are responsible in the fulfillment of duty." * * * "Only one is master of this country; that is I. Who oppose me I shall crush to pieces." Says Bismarck: "With us there is no sovereign will but that of the king. It is he alone who wills, because he alone has the right to do so." In a State so ruled it is obvious that a free press and a free tribunate can not exist, and so we find in the first 14 years of William the Second's reign 6,000 prosecutions for lese majeste, an offense the exact limits of which no one knows; we find a police force from whose arbitrary control there is for the people practically no appeal; we find an army whose sole head is the Emperor, and whose youngest lieutenant takes social precedence of the wisest philosopher or mere scientist; we find a revolution in the atmosphere of education, and among the university men there are now the "most loud-voiced jingoes, the blind admirers of unscrupulous success." Along that line to-day is the surest road to preferment. Where the whole pyramid of society thus stands on its apex, it is not surprising to find the sober and veracious Munsterburg telling us that "In the German view the State is not for the individuals, but the individuals for the State."

A GENUINE DEMOCRACY.

The United States, on the other hand, has the popular form of government. Our fathers gave it to us. They placed the pyramid upon its base. They taught us that power originates among the people governed, and that the governing officials appointed by the people are the servants of the people. They arranged a government of checks and balances so designed that no official might be able to usurp dangerous power unto himself. We have an untrammeled press, local self-government, an independent judiciary, and full and free opportunity for each citizen to develop his own individuality and initiative. With us the State exists for the people.

There are those among us who are inclined to smile at the resounding phrases of the Declaration of Independence, who look with suspicion upon the qualifications of the people to rule themselves and view with complacency the growing social stratification in our country. But, nevertheless, there is none among us who does not feel deep down in his soul that somewhere in these stately periods there lies a truth inestimably precious to mankind, the secret of humanity's progress, and the key to human destiny. It assures us of equality in delegating power to our servants in office, equality of privilege, responsibility and treatment before the law, equality of opportunity for self-development, equality of burdens and duties toward society, and equality of reward for whatever of success is achieved. The only inequality it permits is the inequality of that phrase of divine wisdom: "He that is greatest among you shall be your servant."

And in the main this attitude of service has been largely characteristic of our rulers; for the man who is daily compelled to recognize that his power is that of his office and not of himself, that it is delegated to him only for a certain time and for a definite purpose, can not and will not so far mistake the situation as to assume to dispense as benignant favors to his subjects the duties that he owes to his fellow citizens.

Here, then, are the two ideals of government. In one, the individual exists for the State, which is incarnated in the glory and power of a Hohenzollern dynasty; in the other the State exists for the welfare of the individual, which means for the highest development and happiness of all the people. Which is better, autocracy or democracy? Which is more effective for the welfare of mankind? My own conviction is that popular government with all its faults—its inefficiency, its lost motion, its costliness, its failures—is infinitely preferable to even the autocratic efficiency of Germany. For a century and a quarter we have tried this "mob government," as Bismarck called it, and I confidently maintain that, measured in terms of human happiness and advancement, no autocracy of either the past or the present can begin to show equal results through an equal period of time.

AUTOCRACY INCOMPETENT.

Autocracy requires an autocrat—a man, or a dynasty, or a coterie that somehow is assumed as peculiarly fitted to rule. Now the one uniform teaching of history is that there is no dynasty or arbitrarily limited or designated class of men that is preeminently fitted for the profession or trade of governing. No class of men ever existed wise enough and morally strong enough to be permanently trusted to legislate for other and different classes, however poor and degraded. History consists of a dreary succession of failures in government, and these failures are the failures of monarchism.

Why, look you, we have to-day the most gigantic collapse of civilization the world has ever seen. Somebody has failed and failed horribly in his function of governing. Who is it? Hapsburg Francis Joseph, to celebrate the fiftieth anniversary of his reign in Austria-Hungary, seizes Bosnia and Herzegovina. The Serbian race bitterly resents this action. A plot is formed, and the crown prince, Hapsburg Francis Ferdinand, is assassinated. Meanwhile in Germany the pride and insolence of Hohenzollern William have grown until he measures himself only with God. For 40 years the whole nation has obediently passed its daily life under the discipline of martial law and the military camp, and has been made mad with preachments about the German superman, pan-Germanism, and Machtpolitik. The nation, the army, the navy, the airships, the submarines, all are ready for the glorious adventure of world dictatorship. The slogan had long before been announced in the Emperor's words, "Nothing must be done anywhere on the globe without the sanction of Germany's ruler." The assassination of one of the Lord's inchoate anointed is too opportune an occasion to be lost. Hohenzollern and Hapsburg put their heads together. Forthwith an impossible 48-hour ultimatum goes to Serbia—48 hours, when it took President Wilson's Cabinet 10 days merely to perfect the phrasing of a note simply reiterating what had been said in a previous communication! Nations stood aghast at the impending chaos. They pleaded for time even to think. But no; for absolutism "the day" had come, the hour of triumph had struck. Europe resounds with the tread of marching columns; the horrors of Belgian invasion are upon us. For the death of one princeling millions of innocent men must die, womanhood must be outraged, and childhood tortured, burned, shot, and drowned. The cause of civilization must be set back a hundred years, an unborn world must groan under the burden of a colossal debt; and, even so, the end is not yet.

This, young men, is not merely a gigantic failure of absolutist government; it is deliberate treason against the human race. Popular government or misgovernment has nothing parallel to offer. Anarchy itself can only feebly rival the horrors of this debacle.

And this, although the most stupendous, is far from being an isolated example of autocracy's crass incompetence to fulfill its metier of governing. Wars are symptomatic. They mean always inefficiency or folly or criminality in government somewhere. Take away from human history the dynastic wars and the wars of misguided ambition, and how many would be left? The whole history of the Hapsburgs is a history of dynastic wars, in which the interests of those governed are sacrificed to the fury of efforts to obtain and maintain crowns for the sprigs of a family exceedingly commonplace in character and attainments. The autocracy of George III cost England her American colonies. That of the Louises of France plunged her people into the excesses of the French Revolution. The autocracy of Napoleon deluged Europe in blood. The nascent autocracy of southern slaveholders forced on America her Civil War. And the record is the same everywhere; whenever and wherever a few have obtained firm and exclusive hold upon the reins of power, no matter under what disguise of form, there always we find disastrous failure in the functioning of government itself.

AUTOCRACY'S AMBITION.

German apologists for this war will tell us that the present German territory is not large enough for the enormous increase of its people in numbers, that it lies in central Europe, threatened on all sides by other nations, that all the earth is practically taken up, that the German race is a race of supermen whose kultur (efficiency) will be lost to the world unless the nation can find room to develop, that this war was sooner or later inevitable—in order, of course, to dispossess some other nation or nations and to allow this new-born giant among nations to take his "place in the sun."

So far as the "threatening ring of iron" is concerned, the state of unpreparedness in England and Russia, and to a considerable degree in France (well known, be it said, to the Germans), clearly disproves any existing danger to Germany. The threatening danger was evidently in the reversed direction, viz, from Germany to her neighbors. Again, as to the country being too small for the increase of its population, the contention ignores the fact that no single part of the earth is closed to the German man and woman. Asia, Africa, Australia, America, North and South, all are absolutely open to him, provided only he does not come as an armed band to dispossess those already here. Millions of them have been welcomed here and have found home, happiness, and fortune among us. Their welfare does not demand enlargement of Hohenzollern dominion. They are not pining for the efficiency of the German Army service, for the suppression of the right of free expression, for 300 trials per year for lese majeste. There is room here for millions more, and all that we shall ask in return for giving them the heartiest welcome and exactly equal privileges with ourselves is that they will leave the Kaiser and Kaiserism at home behind them.

When, therefore, we hear about compression and the consequent inevitability of a war for expansion, we ask, expansion of what? And the only logical answer is the expansion of an imperial government, of the glory of a dynasty, of the range of one man's ambition. "The people exist for the state and the state is I, William Hohenzollern."

THE IMMEDIATE DANGER.

It is this ruthless spirit of Machtpolitik, the right of might, that the allies are warring against to-day. It is this spirit that has unified against Germany the solid opinion of all farseeing Americans who value the heritage their fathers bought with unflinching courage on the battle field. Think of it! It is the spirit that laid waste the cathedrals of innocent Belgium and extorted heavy indemnities from her starving people, that in order to simply terrorize drowned the innocent children on a *Lusitania*—it is this spirit that Mr. Bryan would meet with a year of senile discussion and a powerless Hague convention at the end. It is this spirit that the pacifists are aiding and abetting with their nonarmament propaganda among our school children and our college boys. How the powers of hell must rejoice over the blindness of good and honest men.

Do we say to ourselves in the face of this spirit, "A thousand shall fall at our side and ten thousand at our right hand, but it shall not come nigh us?" Why? Is not England its greatest foe, and are not our fields and factories England's one source of supply? Has not Germany used every means short of physical attack to have us place an embargo on shipments of ammunition and supplies? Is it not openly complained that, by stopping supplies, we could end the war in three weeks? I can not for a moment believe that, at Germany's behest, we will cravenly break a fundamental requirement of neutrality, basely betray the allies into the hands of their enemies, and by closing our markets not merely end the war but decide it, and in favor of Germany. In the effort, therefore, to preserve our honor and good faith, we are incurring the bitter anger of Berlin, and haughty Berlin's anger means war, unless under the stress of present conditions on her battle lines she shall find her advantage in temporizing with us and speaking us fair.

There are not wanting other occasions for German antagonism. Our Monroe doctrine is one of the foremost. Bismarck called it "a species of arrogance peculiarly American and entirely inexcusable." There is no doubt in my mind that Germany will one day call upon us to repudiate it or to take measures, in concurrence with the South American nations, to defend it. Germany fiercely resented our taking the Philippines over. Dewey tells us that, 17 years ago in the blockade of Manila, the Germans assembled in the bay a stronger fleet than his own; that Von Diederich and his officers were discourteous and offensive to the last degree; and that finally a cruiser deliberately landed provisions. Then, just as Wilson is doing to-day, the American admiral submitted an ultimatum. He sent his flag lieutenant to Von Diederich with his compliments and the message that if he wanted a fight he could have it right now. The action of landing provisions was promptly disavowed and not repeated. Even then, however, in the final action to take Manila, Von Diederich moved his ships into a threatening position against Dewey. Then occurred a significant thing. The British senior captain, Chichester, ranged his British ships between those of Von Diederich and Dewey's fleet. There is more, but I have not time to tell it now. And yet the poseur Bryan talks about our "memories of an historic friendship with Germany!"

THE CONCLUSION.

What does it all mean? It means the same old story of autocratic inefficiency and unwisdom in government. It means the inevitable antagonism of Divine-right dynasties toward government from and of the people. It means the need of wise organization like that of the Swiss to meet an attack that will some day surely come. It means that the realities of life are stern and harsh, and that duty must be met, not by Utopian dreams of ease and happiness, but by courage and wisdom, steadiness of purpose, and sacrifice even unto death.

Other than the direct relation of humanity with the Divine, I know of nothing more sacred than true patriotism. And so, on this quiet Sunday afternoon, as I stand before you for the last time as instructor and guide, I have thought it best under the conditions that face us once again to discuss with you your country's needs. You have been trained as scientists and workers. You have also learned the privileges and duties of citizenship. You go out to-morrow from our halls into the service of the Republic. As you pass out with the stamp of approval from your college, let her last word to you be a clarion summons to wisdom, loyalty, and "the last full measure of devotion" to your country.

You whom the fathers made free and defended
Stain not the scroll that emblazons their fame;
You whose fair heritage spotless descended
Leave not your children a birthright of shame!

—Holmes.

## Democratic Efficiency Puts Through Constructive Program for National Defense.

## EXTENSION OF REMARKS

OF

## HON. CYRUS CLINE,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. CLINE. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to discuss the subject of preparedness, showing Democratic efficiency in creating a thoroughly constructive program.

THANKS TO DEMOCRATS, AMERICA "PREPARES"—DEMOCRATIC EFFICIENCY PUTS THROUGH CONSTRUCTIVE PROGRAM FOR NATIONAL DEFENSE.

Preparation for national defense by land and sea, preparation adequate, sane, and democratic—this sums up in a phrase the efficient accomplishment of President Woodrow Wilson and the Democratic Party controlling the Sixty-fourth Congress.

Preparedness is no longer agitation. It is fact. It is written into the laws of the United States in response to the overwhelming popular demands of the people thereof.

The program thus embarked upon is neither militarism nor pacifism. It is the strong and reasonable program of a great nation whose servant is a great political party. It is a program untouched by partisanship and weakened neither by pork, favoritism, nor private interest.

In its essentials it is the program of the military and naval experts who in the past decade have been unable to secure performance from the Republicans. It recognizes for the first time the position of the United States as a world power, ready to meet aggression and ready to resent interference with the principles of real Americanism—not the Americanism of the privileged few, but the Americanism of the real Americans.

REGULAR ARMY 216,000.

Adequate preparedness and complete reorganization of the military and industrial resources of the Nation have been made by the Wilson administration in the Army reorganization bill and in the Army appropriation bill. (President Wilson's veto of the Army appropriation bill had solely to do with its revision of the Articles of War. Its repassage with all appropriations and other provisions probably will have taken place before the textbook is issued.) The completed program is the most comprehensive ever enacted by an American Congress. By the terms of it the peace strength of the Regular Army has been increased from a paper strength of 100,000 men to a peace strength of 216,000, capable of expansion in war times to 256,000. The National Guard has been federalized and raised to a peace strength of 467,000. A Regular Army reserve, a National Guard reserve, an officer reserve corps, and an enlisted reserve corps have been established. A reserve officer training corps has been created, and generous provisions for citizens' training camps have been enacted. A council of national defense, which will prepare the industries of the country for readiness in time of a grave emergency, has been brought into being—an achievement of the greatest importance which must be counted as a failure on the part of previous Republican administrations. The total appropriation in the Army bill was, in round figures, $267,600,000, or materially less than $3 per capita for each inhabitant of the United States.

THE PREPAREDNESS RECORD—ADEQUATE FUNDS.

Appropriations providing for the safety of the United States are:

| | |
|---|---|
| Army | $267,000,000 |
| Navy | 315,300,095 |
| Fortifications | 25,748,000 |
| Military Academy | 2,238,000 |
| Army and Navy deficiency | 27,558,000 |
| Total appropriations | 635,844,095 |

SPECIAL ACHIEVEMENTS.

Complete reorganization of industrial resources.

Regular Army increased from paper strength of 100,000 to peace strength of 216,000, capable of expansion in war times to 256,000.

National Guard federalized and raised to peace strength of 467,000.

A Regular Army reserve, a National Guard reserve, an officer reserve corps, an enlisted reserve corps.

Generous provision for citizens' training camps.

A council of national defense.

Four dreadnaughts and four battle cruisers (eight capital ships) the first year.

Twenty torpedo-boat destroyers and 30 coast submarines with auxiliaries to be begun at once.

Ten battleships, 6 battle cruisers, 10 scout cruisers, 50 torpedo-boat destroyers, 9 fleet submarines, 58 coast submarines and auxiliaries before July 1, 1919.

COMPLETE NAVAL REORGANIZATION.

Adequate preparedness and complete reorganization of the naval resources of the Nation have been made by the Wilson administration in the naval appropriation bill. By the terms of it the building program has been made permanent and consistent with the growing needs of the United States as a world sea power.

Four dreadnaughts and four battle cruisers, an all, eight capital ships, are to be built during the first year.

The enlisted strength of the Navy has been increased to 68,500 men, expansible during emergency to 87,000 men. Twenty torpedo-boat destroyers, 30 coast submarines, together with auxiliaries, will be begun at once. The continuing program calls for the construction before the 1st of July, 1919, for 10 battleships, 6 battle cruisers, 10 scout cruisers, 50 torpedo-boat destroyers, 9 fleet submarines, 58 coast submarines, and auxiliaries.

The Naval Militia has been federalized. The Naval Flying Corps has been put on a permanent basis.

CRITICS ARE OVERWHELMED.

Provisions have been made for scientific research and for coordinating the Navy with the industrial life of the country. Naval training cruises have been for the first time established. The achievements of the naval appropriation bill are in the opinion of naval experts, without regard for political party, of the greatest importance, and established the Democratic administration's record for accomplishment so securely that Republican criticism has been reduced to the pettiest kind of carping.

The adequacy and efficiency with which the Democratic Party has met the military needs of the country are conclusively shown by the fact that, without exception, every national defense measure enacted by Congress during the last year received the practically unanimous support of Republican as well as Democratic Members of the House and Senate. The majority of these measures passed without a roll call. For example, there was no roll call in the House when, on June 26, it passed the Army appropriation bill. There was no roll call in the Senate on this bill. The Hay Army reorganization bill passed the House in March with two dissenting votes, one being cast by Representative FRED A. BRITTEN, of Illinois, a Republican, the other by MEYER LONDON, of New York, a Socialist. Otherwise, all the Republican Members of the House, including the loudest agitators for a large Army, agreed to the Democratic program.

There were no roll calls in either House or Senate on the fortification bill, appropriating for the coast and other permanent defenses.

When the Navy bill passed the House for the first time, on June 2, the roll call showed 360 yeas to 4 nays, 7 answering "present." Two of those who voted against the Navy bill, BROWNING, of New Jersey, and GRAHAM, of Pennsylvania, are Republicans. RANDALL, of California, the third who voted against the Navy bill, is a Prohibitionist, and LONDON, the fourth, is a Socialist. Among the seven who dodged by answering "present," Republican Minority Leader JIM MANN, of Illinois, was the most prominent. Four other Republicans joined MANN—COLEMAN, of Pennsylvania; MOORE, of Pennsylvania; NELSON, of Wisconsin; and ROGERS, of Massachusetts. Although the Democrats hold the majority in the House, but two Democrats—TAVENNER, of Illinois; and WEBB, of North Carolina—answered "Present."

On the final vote in the House on the conference report in the naval appropriation bill, the yeas were 283, the nays 51. The Democratic bill was passed with the vast majority of the Republican minority supporting it. Yet, among the 15 Republicans who voted against the bill were some of the Republican leaders in the House—CAMPBELL, of Kansas; LENROOT and NELSON, of Wisconsin; MONDELL, of Wyoming; and ANDERSON, of Minnesota. Any Republican criticism of the Democratic bill must take these facts into consideration.

REPUBLICANS OPPOSE KAHN'S AMENDMENT.

On March 23 there was a vote in the House on the so-called "Kahn" amendment to the Hay bill. This amendment proposed to increase the size of the Army from the original 140,000 to 220,000. A majority of Democrats and Republicans voted down this amendment. Among the prominent Republicans voting against it were RODENBERG, of Illinois; GREEN and WOODS, of Iowa; CAMPBELL, of Kansas; LA FOLLETTE, of Washington; ESCH, of Wisconsin; and MONDELL, of Wyoming. There was no partisanship in this roll call.

Upon the question of appropriating $11,000,000 to build or buy a factory for the manufacture of armor plate, there was a roll call March 21 in the Senate on what is known as the Tillman armor plate bill. To save money by breaking up the control of prices by the armor plate ring was the object. The opposition was led by Republican Senators, including Senator OLIVER, of Pennsylvania, who was charged on the floor of the Senate with being financially interested in the Steel Trust. The bill passed by 58 to 23, with 14 not voting. The 23 voting against the bill were all old-guard Republicans—GALLINGER, CURTIS, DU PONT, LIPPITT, LODGE, PENROSE, SMOOT, and WEEKS. Eight Republicans voted with the Democratic majority—BORAH, of Idaho; CLAPP, of Minnesota; CUMMINS, of Iowa; KENYON, of Iowa; NORRIS, of Nebraska; POINDEXTER, of Washington; and WORKS, of California. The Republican opposition was not, therefore, solid.

The progressive Republicans stood with the Democrats, and that simple fact tells its own story.

On July 21 the Senate passed the Navy bill by a vote of 71 to 8; 6 of the 8 voting against the bill were Republicans. Such vigorous critics of the Wilson administration as LODGE, of Massachusetts; GALLINGER, of New Hampshire; PENROSE, of Pennsylvania; SMOOT, of Utah; and WEEKS, of Massachusetts, voted for this keystone measure of the Democratic preparedness program. Criticism by the Republican Party of the Democratic naval program, indorsed by Republicans in both House and Senate, must take these facts into consideration.

DROPPED BACK UNDER TAFT.

Among the many offenses against the Navy with which the Democracy has been charged is the rather surprising one of responsibility for the loss of our superiority over the German Navy, and the responsibility also for our lack of battle cruisers, which are now to be supplied. Both charges were made by the Republican minority in the House, and they also maintained that it was the aim of the Republican administration to make us the second naval power in the world. It will be recalled that until December, 1911, the Democrats were in the minority in both the Senate and House, and for 16 years the President had been a Republican.

The General Board of the Navy was requested recently by Congressman BUTLER, of Pennsylvania, a Republican, to state how it was that the German Navy obtained its superiority over ours, and, taking displacement as a basis of comparison, the board said: "Considering displacement of ships built, the United States advanced from third to second place in 1907 and dropped to third in 1911."

It should be borne in mind that the Democratic House did not meet in regular session until December, 1911. On the basis of ships built, our position was, therefore, lost while the Republicans were in absolute control of the legislative and executive departments.

"Considering displacements of ships built and building," said the General Board, "the United States advanced from third place to second place in 1909, held this place for a short time only, and dropped to third place again in the same year, 1909."

The basis of ships built and building is a more accurate index to naval strength than the basis of ships built only, for, as the case at point illustrates, a nation can be superior to another, and by building little while that other nation builds much, lose its superiority in a very short time. And on the basis of ships built and building, we held second place "for

only a short time and dropped to third place again in the same year, 1909," two years before the Democratic House entered office and four years before the administration and Senate became Democratic.

During Mr. Roosevelt's four years, when the world began to build dreadnaughts, the United States authorized 6 capital ships, the German program authorized 13, including battle cruisers, leaving us a deficiency of 7. In Mr. Taft's first two years we authorized 4 capital ships, the German program authorized 7, leaving us a deficiency of 3. Taking the six years together, we authorized 10 capital ships to Germany's 20. There is not much evidence here of any determination on the part of the Republican administrations to build a navy superior to Germany's. In those six years the General Board had in mind the construction of a navy superior to Germany's, and it recommended the construction of 20 battleships, the same number the Germans authorized. We authorized 10. The General Board was certainly not the author of our program. Who was?

ROOSEVELT'S MESSAGES CONVICT HIM.

The answer is found in President Roosevelt's messages to Congress for 1905 and 1906. He recommended the following in his message of December 3, 1906:

"I do not ask that we continue to increase our Navy. I ask merely that it be maintained at its present strength. * * *

"This can be done by a well-settled program of providing for the building each year of at least one first-class battleship equal in size and speed to any that any nation is at the same time building; the armament presumably to consist of as large a number as possible of very heavy guns of one caliber, together with smaller guns to repel torpedo attack; while there should be heavy armor, turbine engines, and, in short, every modern device. Of course from time to time cruisers, colliers, torpedo-boat destroyers, and torpedo boats will have to be built also. All this, be it remembered, would not increase our Navy, but would merely keep it at its present strength."

December 5, 1905, President Roosevelt said in his annual message:

"It does not seem to me necessary, however, that the Navy should—at least in the immediate future—be increased beyond the present number of units. What is now clearly necessary is to substitute efficient for inefficient units as the latter become worn out or as it becomes apparent that they are useless. Probably the result would be attained by adding a single battleship to our Navy each year, the superseded or outworn vessels being laid up or broken up as they are thus replaced."

It was in accordance with these recommendations that the United States at the outset of a new era in battleship construction adopted the standpat policy by which we were foredoomed to lose our position as second naval power.

It was in accordance with President Roosevelt's suggestion that Congress in 1906, and again in 1907, authorized only one battleship, while in 1906 the General Board recommended three, and in 1907, two. It was in accordance with the policy enunciated by Secretary Meyer, under Taft, when, in his first report, he said: "Germany is now second among the principal naval powers in warship tonnage built and building. The United States is third," and recommended, "in order to keep the appropriation for the Navy Department within the economical limit set for the Government," only two battleships and one repair ship. Hence, no headway was made in the Taft administration toward retrieving the relative strength we had lost under Roosevelt.

In the last two years of the Taft administration when the Democrats had control of the House, it must be remembered, the Senate was Republican and the President was a Republican. In these two years Germany authorized five capital ships and we authorized two. On coming to the program of the Wilson administration, we find that for the first time in years we authorized a larger program than Germany. In our first two bills we provided for five capital ships to Germany's four, and are this year providing five capital ships against the three contemplated by the German program at the outbreak of the war. In three years, in other words, we are authorizing a total of 10 capital ships to the 7 which were contemplated by the German program. Is it the Republicans or the Democrats who have maintained our naval prestige?

As regards battle cruisers, the General Board of the Navy in its first two reports submitted under this administration did not recommend their construction. It recommends them this year, and they are being provided. It is true that the General Board did recommend two battle cruisers in their recommendations of 1912, but the Secretary of the Navy, Mr. Meyer, did not provide for them in his estimates. Every battle cruiser in the British Navy at the outbreak of the war was authorized while the Republicans were in absolute control of this country, and Great Britain did not authorize or construct a single battle cruiser between March 4, 1913, and the outbreak of the war, while the Wilson administration was in power.

THE TRUTH ABOUT OUR SUBMARINES.

Our submarines have come in for pretty severe handling from the partisan critics of the Navy. It is possible to dispose of much argument by acknowledging, as Secretary Daniels has readily and frankly acknowledged for the last two years—that our submarines are not all that is desired.

But where does the responsibility lie? Every submarine in the Navy to-day was authorized, built, or contracted for under Republican administration. It was not until three years ago that submarine difficulties were treated seriously in the Navy Department.

We had, and have, an unsatisfactory motor, battery, and engine, and yet under the old régime only the youngest officers, lacking in theoretical and practical experience, were assigned to submarines and were expected to solve their problems. Only one officer was assigned to each of the 16 submarines in commission, and 14 of these officers were ensigns.

No reflection upon their industry or their ability is intended, but it is a most serious reflection upon those charged with the administration of the Navy that no experienced officers were assigned to this duty. Facts certainly warrant the belief that our submarine troubles to-day are due to no other cause than the indifference with which the problem was regarded in the past. It remained for this administration to take up the work in earnest, to solve the problems and to place the flotilla on its feet, and much success has already been achieved.

The flotilla has been detached from the destroyer flotilla and made an independent command, under an admiral. The number of officers assigned to submarines has been increased so that two instead of one are now assigned to each of the larger boats. Officers of experience have been selected. The cooperation of manufacturers has been sought, and before assuming his duties aboard ship an officer is now instructed at the works where the engines, batteries, and motors are manufactured, so that he knows his machinery.

SCHOOL FOR UNDER-SEA NAVIGATION.

In accordance with the recommendations of Admiral Grant a six months' course of instruction at the submarine base at New London is given every officer before he is assigned to duty on board submarines. He will then be appointed to a subordinate position, and receive command of a boat only after he has demonstrated his ability in theoretical study and actual practice. This submarine base and school at New London was opened by the Wilson administration.

The problem has also been seriously taken up in other quarters. It is being studied by the engineers of the Navy ashore and afloat, with a view to perfecting machinery and improving the craft generally. As a result of these studies larger submarines have been recommended and provided, and in every respect the situation is exceedingly well in hand. With half the labor, half the study, half the work, the submarine question has received under this administration the old régime could not have turned over to its successors this important branch of the service in such a pitiful condition.

The Navy is to-day better organized, better balanced, better officered, better manned, better armed, and better supplied with ammunition, and is more efficiently and economically administered than ever before in its history. Every branch of the service has been improved and the organization of both the Navy Department and the Atlantic and other fleets developed to the highest state of efficiency.

ARMING THE NATION.

We have been carried too close to the rocks of war during the past two years to believe that those rocks do not exist. And looking into the future we can perceive that if our sovereignty is not challenged, if our peace is not assailed, it will only be because the world knows that we are strong enough to defend ourselves from every foe.

For these reasons this administration has done more for our Army and our Navy than any administration in our history.

More than this, it has mobilized the resources of the Nation to meet the needs of war. It has placed the wealth of the country back of the strength of the country, the toiler back of the soldier and the sailor. (From Martin H. Glynn's keynote speech.)

PRIOR FIVE-YEAR RECORDS BEATEN.

"We have made more real progress in the last two years," said Capt. J. S. McKeen, "than any previous five-year period in any experience in the Navy. I do not think I have ever

known a time when everybody in the service from top to bottom was working as hard with their heads and hands to prepare the fleet for active service."

Admiral Benson, the Chief of Naval Operations, asserts that "Cooperation between the various bureaus and offices of the department with the office of the Chief of Naval Operations has been most cordial and complete, and the practical result has been all that could be desired." And he adds, "A thoughtful consideration of the work that has been accomplished will show that all is being done now that could reasonably be expected from a so-called 'General Staff.' In my opinion the organization that exists in the department and that is now in successful operation is accomplished in a purely American and businesslike manner all that could possibly be expected from the creation of a general staff, and is doing this in a much more satisfactory way."

Says Admiral Dewey: "Our own General Board is, I think, the best General Naval Staff in the world."

Rear Admiral Knight, president of the War College, where high officers of the Navy are instructed in strategy and tactics, testified that "Secretary Daniels has done more for the War College than any of his predecessors."

The existing shortage of enlisted men, like the shortage of officers, is attributable to conditions inherited by the administration. It was presented with a shortage of men too great to be overcome entirely in any three years of peace, and a prejudice to service in the ranks that had to be corrected before any gains could be made.

The Republican administrations made no claim to having enough enlisted men to man all vessels for war. The authorized strength of the Navy was far below the number that would have been required, and in the 16 years of Republican incumbency they made no provision for a reserve with which to fill the gap. The reason the authorized strength was not made sufficient to man properly all vessels was because Republican administrations could not fill the ranks to the limited strength authorized by Congress.

ENLISTED MEN PROMOTED.

Showing the number of warrant officers of the Navy appointed ensigns under the Roosevelt, Taft, and Wilson administrations:

| | |
|---|---|
| Roosevelt, 4 years | 10 |
| Taft, 4 years | 5 |
| Wilson, 3½ years | 17 |

Showing the number of assistant paymasters appointed from among enlisted men under the Roosevelt, Taft, and Wilson administrations:

| | |
|---|---|
| Roosevelt, 4 years | 1 |
| Taft, 4 years | 3 |
| Wilson, 3½ years | 15 |

Prior to the act of March 3, 1915, pay clerks were selected by individual paymasters from any source within or without the Navy. Under the new law all pay clerks are appointed by the Navy Department from the enlisted personnel.

INCREASE IN AERONAUTICS.

Showing the expenditures for aeronautic purposes under the Roosevelt, Taft, and Wilson administrations:

| | |
|---|---|
| Roosevelt, fiscal year, no expenditure. | |
| Taft, fiscal year 1912 | $24,532.79 |
| Taft, eight months / Wilson, four months } fiscal year 1913 | 56,032.90 |
| Wilson, fiscal year 1914 | 194,492.46 |
| Wilson, fiscal year 1915 | 219,429.20 |
| Wilson, fiscal year 1916 | 884,679.28 |
| Wilson ($3,500,000 for aviation, $400,000 for aeronautic station, Pensacola, Fla.), fiscal year 1917 | 3,900,000.00 |

Showing the total expenditures under the Taft and Wilson administrations:

| | |
|---|---|
| Taft | $61,888.06 |
| Wilson | 5,217,278.57 |

At no time since the Spanish War has the Navy had enough men to man all vessels for war, and until recently we have not had enough to man properly all ships on a peace basis, with some in reserve. For years we built ships without authorizing the men to man them.

When Mr. Roosevelt began his second term, the authorized strength of the Navy was 34,500 men. It was inadequate, and 3,000 additional men were recommended during his first year. In all, during his second term, 7,500 additional men were authorized, a number just sufficient to man the new ships authorized during the same period, which required, under the old schedule, since found inadequate, 7,155 men. But it failed to provide a reserve or to cut down the previously existing shortage, which was given as a legacy to the Taft administration.

INHERITED SHORTAGE OF JACKIES.

The ships authorized in the Taft administration require, under the old schedule, 9,886 men, and George von L. Meyer, who was Secretary during all four years and who has criticized the present administration for its lack of men, recommended an increase of only 4,000 men and 1,000 apprentices, which was 4,888 short of the number required to man the ships authorized during his incumbency. Meyer, moreover, failed to provide a single man toward overcoming the accrued shortage of preceding years. Congress, however, authorized an increase of 6,000 men and 1,000 apprentices (4,000 were voted by the Democratic House), which was still over 2,000 short of the number needed for new ships, and made no provision toward reducing the previous shortages. That administration failed also to establish a reserve. The increase in men actually enlisted was about 3,200.

The Wilson administration became heir to the accumulated shortages of the Roosevelt administrations, augmented by the shortages of the Taft administration, and it is held responsible for their shortcomings by the very persons to whom they are due. It must be remembered that, though the authorized strength of the Navy was many thousands short of the number actually required, the Navy was turned over to the Democrats about 5,000 men short of the number allowed. There were actually fewer men in the Navy when President Taft and Secretary Meyer left office than there were eight months before, although Congress had in the meantime authorized an increase of 4,000 men and they had the best season of the year in which to recruit. Under Secretary Meyer there were 10,360 cases of desertion, and of the experienced men with good records, honorably discharged upon their completion of enlistment, only 52 per cent reenlisted.

This condition of affairs the Wilson administration was obliged to face when it entered office. It was as prompt in remedying it as it was in its effort to remedy the shortage of officers. Congress has this year provided for vocational training in the Army. Secretary Daniels three years ago established it in the Navy, and the innovation gradually filled the ranks. It was not possible at once to overcome the prejudices toward the service which the conditions just enumerated must certainly have caused, but enlistment, instead of declining, increased, and in three years 6,331 men have been added to the Navy, which is nearly double the increase made in four years under President Taft.

INCREASE IN OFFICERS.

Showing by comparison the number of midshipmen appointed at the Naval Academy under the Roosevelt, Taft, and Wilson administrations:

| | |
|---|---|
| Roosevelt, 4 years | 978 |
| Taft, 4 years | 945 |
| Wilson, 3 years | 1,473 |

INCREASE IN ENLISTED MEN.

Showing the enlisted personnel of the Navy, as authorized by law:

| | |
|---|---|
| Roosevelt: | |
| Authorized, 1905 | 37,000 |
| Authorized, 1908 | 44,500 |
| Taft: | |
| Authorized, 1909 | 44,500 |
| Authorized, 1912 | 51,500 |
| Wilson, authorized, 1916 | 79,064 |

Showing increase under each administration:

| | |
|---|---|
| Roosevelt | 7,500 |
| Taft | 7,000 |
| Wilson | 27,564 |

The act of 1916 permits the President, at his discretion, in an emergency, to increase the Navy to 87,000, which would be an increase of 35,500 over the Taft administration.

NAVY YARD INCREASE.

Number of men: Showing the total number of employees in the principal navy yards in the United States as of date June 1, 1913, and July 1, 1916:

| | |
|---|---|
| 1913 | 16,898 |
| 1916 | 24,383 |
| Increase | 7,485 |

Daily pay: Showing the total daily pay of such employees in 1912 and in 1916:

| | |
|---|---|
| 1912 | $46,027.35 |
| 1916 | 73,091.12 |
| Increase | 27,063.77 |

Comparison of pay: Showing the average daily pay of such employees in 1912 and in 1916:

| | |
|---|---|
| 1912 | $2.723 |
| 1916 | 2.997 |
| Increase | .274 |

ATTACK THEIR OWN INEFFICIENCY.

As critics of the Navy, the Republicans have had, perhaps, knowledge of what they did and what they did not do. For 16 years they administered the affairs of the Navy Department. They left it deficient, and they knew at first hand its faults, which exist for no other reason than that in their 16 years of control they have not corrected them; and, knowing where the Navy

was weak, they have, with poor grace, set about to belittle the efforts of the present administration to make the Navy a real efficient fighting organization and to overcome the shortcomings for which the Republicans alone are responsible.

The fact that the Navy is short of officers and that officers with little experience have been assigned to important duties has been made much of by Republican critics of the Navy. But responsibility for the present shortage can not be placed on Democratic shoulders. If the Republicans had been as solicitous for the welfare of the Navy while in power as they profess to have become in the last three years there would be no shortage to-day of which to complain.

The Navy is short of officers to-day because 6, 8, and 10 years ago the Republicans failed to appoint sufficient midshipmen to the Naval Academy. The United States depends upon graduates of the Naval Academy for its officers—the number commissioned from other sources is so insignificant as to be disregarded—and the first midshipmen to enter the academy under this administration will not graduate until June, 1917. Only time, with the aid of increased midshipmen, can remedy the condition. The Democrats have increased the midshipmen, and are providing engineers, aviators, and instructors to give some necessary immediate relief; but as it takes four years to graduate an ensign, the lack of officers can not be charged to this administration.

The administration could not remedy the shortage of officers immediately, but it at once set about to correct the conditions so that at the very earliest time possible the fault would be overcome. Within two months after entering office, and long before any suggestions from outside sources, Secretary Daniels recommended, and Congress authorized, an extension of law, allowed by the Republicans to lapse, providing for two midshipmen to each Member of Congress. This has permitted about 300 additional midshipmen to enter the academy in the last two years. The Democrats have this year provided that the number of midshipmen shall be in the ratio of three instead of two to each Member of Congress, making 531 additional appointments immediately available, or a total of over 800 additional midshipmen, which have been provided for in the first three years of Democratic administration. The Republicans failed to make increase in the number of midshipmen and actually allowed the law which provided for two midshipmen to lapse—and that is why we have not sufficient officers to-day.

DETAILS OF ADVANCEMENT.

Turning now to other details of constructive achievement in the Navy, what do we find?

For the first time a continuing policy has been adopted for the accumulation of reserve ammunition and for other necessary adjuncts for a Navy strong enough and ready to maintain the rights of the Republic.

The Sixty-fourth Congress also appropriated $3,900,000 for aeronautics and the aviation station, continuing the wise policy of the Sixty-third Congress, which made the first specific appropriation ($1,000,000) for aeronautics. The appropriation by the Sixty-third Congress has permitted the development of naval aeronautics so that an aviation ship is now in the fleet, and the Aviation Corps has been increased to 18 machines and 160 officers and men, as compared with 4 machines and 4 officers in March, 1913. The larger appropriations by the Sixty-fourth Congress will insure a larger expansion.

The construction of new craft has been prosecuted more rapidly under Wilson than in former years. For example, it took seven years to build the *Virginia*, which was launched in 1906. It took nearly five years to construct the *South Carolina*, which was launched in 1909. At a period when it was more difficult to secure material and labor than ever before in the history of the country, by virtue of the prosperity ushered in by the Wilson policies, the *Pennsylvania*, just completed, was finished in three years and three months, and the *Arizona*, which is nearing completion, in about the same time. Delays in construction of two ships authorized by the last Congress were necessitated by elaborate tests essential for securing underwater protection against torpedoes, and by the inability to secure bids from private contractors within the sum appropriated. Notwithstanding these difficulties, these two ships will be completed in less time than any ships were completed during either the Roosevelt or the Taft administrations. All new ships are now equipped with electrical propulsion, a forward step in which the United States leads the navies of the world.

When the Wilson administration undertook the regeneration of the Navy, it was found that there was no mining division and that there were few mines. Contracts were made at once to purchase mines abroad—none could be had in this country—but the European war made it impossible for the contractors to fill the orders. Fortunately, the Navy Department had in its contract obtained the right to manufacture mines in this country, and it is doing so in its own plant. A mining division has been organized complete. Now, for the first time in the history of the American Navy, its position with regard to mines and mining is satisfactory. Moreover, the mines built in this country have been built at a cost of between $175 and $200 less than the price contracted for their purchase abroad, and a large saving has been effected. For every 100 mines the Navy had when the Wilson administration came into office, there are now 400, i. e., four times as many, and the number is being multiplied daily.

A like shortage in torpedoes has been remedied, and for every hundred torpedoes we had on hand in 1913 we now have 158 more ordered or in process of construction, and the Navy Department is constructing torpedoes in its own plant at a saving of over $1,000 on each torpedo. It has also increased the capacity of torpedo works 433 per cent. Not only are more torpedoes provided for less money, but the Navy Department has won its suit to prevent a private company from selling its torpedoes to foreign nations, thereby disclosing Navy secrets. In rendering its decisions, Judge Cox made this wise declaration, which indorses the policy of the Navy Department under this administration:

> This case illustrates the importance of the United States having a manufactory of its own for the manufacture of torpedoes and other implements of war, which are improved and changed from time to time by the addition of ingenious mechanism, which should clearly be kept secret unless our enemies are to profit equally with ourselves in every improvement which the ingenuity of our Army and Navy officers may suggest.

RESERVE OF MUNITIONS.

Showing the percentages of total orders placed during each administration:

| | Per cent. |
|---|---|
| Projectiles: | |
| McKinley–Roosevelt | 5.1 |
| Roosevelt | 8.6 |
| Taft | 22.4 |
| Wilson | 63.9 |

| McKinley–Roosevelt | 17.1 |
| Roosevelt | 20.0 |
| Taft | 23.4 |
| Wilson | 39.5 |

ADEQUATE POWDER SUPPLY.

As the Navy increased its production of powder, the private manufacturer decreased the prices from 80 cents to 53 cents a pound, by direction of Congress after an investigation into its cost. The Navy manufactures powder for 34 cents a pound, including all overhead charges, and this administration has increased the capacity of the powder factory from 3,000,000 to 6,000,000 pounds per annum, insuring an adequate supply at minimum cost.

For years the manufacturers of armor plate had been charging the American people excessive prices for armor plate. All three companies manufacturing armor plate offered bids of identically the same price. Such bids were not accepted, and more than $1,100,000 was saved on three ships by insisting upon competition. But this large saving still left the price far above a reasonable sum. The Sixty-fourth Congress has appropriated $11,000,000 to build an armor-plate plant where armor plate can be manufactured at a price of $230 a ton, as against $454, the price which was being paid when the Wilson administration was inaugurated. In addition to cheapening the cost of production, an additional advantage of a Government armor-plate plant would be to encourage and give opportunity to its experts to steadily improve the quality of the armor to be used on naval craft. No process is perfect, and the study and experiment will produce superior armor. Secrets of production discovered by Government experts will belong exclusively to the American Navy.

It has also appropriated $705,611 toward a projectile factory, to cost double that sum, insuring an adequate supply of superior ammunition, not now obtainable, at cost price. By obtaining competition, $1,077,210 was saved on a single contract for projectiles. A Government factory guarantees competition with private manufacturers and the best quality of projectiles.

Private shipbuilding yards must increase their facilities to construct the large program authorized. It was the practice before the Wilson administration to build no ships in any except two navy yards, and their facilities were limited. The Wilson administration has equipped, or provision has been made by the Sixty-fourth Congress to equip, every navy yard to construct naval craft, and it will be possible in the future to secure more

rapid construction of new ships for the Navy in both private and public yards. The fact that the Government can build in its own yards will, in normal times, insure competition in building and secure prices more reasonable than would be possible if it depended almost entirely upon private shipbuilding yards as the Republicans did.

There has never been a time when so many men were employed at the navy yards as under the Wilson administration, and the large program this Congress has authorized will make it necessary to increase the number of skilled workmen in our 10 navy yards. The number of employees in July, 1916, was 24,383, as compared with 16,898 on June 1, 1913, before the new policy of building ships and making other material in navy yards was adopted. The total daily pay roll as of June 1, 1913, was $46,027.35, as against $73,091.12, the total daily pay roll as of July 1, 1916. The average daily wage prior to June, 1913, was $2.723, while the average daily wage of July, 1916, was $2.997, an average increase of wages of 27.4 cents per day.

The ordnance experts of the department have designed and completed and placed on latest dreadnaughts the best antiaircraft gun in the world.

WORLD'S BEST BIG GUN.

They have also produced a large-caliber gun that will shoot straighter, shoot farther, and hit harder than any gun now in use in any foreign navy. Sixteen-inch guns are to be placed on new dreadnaughts.

The unworkable organizations of both the Navy Department and the Atlantic Fleet, in which is centered the chief strength of the American Navy, have been supplanted by better ones. Without violating the American ideal of subordinating the military to the civil power, the fleet and the department are now so organized as to effect the most successful operation afloat and ashore.

THE ARMY'S RECONSTRUCTION.

High praise has come from conservative, nonpartisan experts for the Hay-Chamberlain law reorganizing and modernizing the land forces of the United States.

The statement can not be contradicted that it is the best and only comprehensive measure looking to military preparedness that has ever been passed by Congress—

Says Maj. William D. Connor, of the General Staff Corps.

In general terms—

Declares a curt War Department memorandum—

it may be said that this is the first comprehensive legislation for national defense. It provides, as far as can be foreseen, for the needs in men and material, and it has been pronounced by all who are competent to judge as the best military legislation that the country has ever had. Certain parts of it are more or less experimental, but without experiment no advance will be made, and if any part of the experiment does not work that part can be corrected by new legislation.

There will hereafter be four classes of soldiers in the United States: First, the Regular Army; second, the National Guard; third, the enlisted reserve corps, all of which shall exist in time of peace; and, fourth, the Volunteer Army, which will be raised only in time of war. The peace strength of the Regular Army is approximately 11,000 officers, not to exceed 175,000 combatant troops, and approximately 40,000 noncombatant troops, including the unassigned recruits. The National Guard will consist of about 17,000 officers and 440,000 men. The number of men who will join the enlisted reserve corps can not be foretold. They are practically enlisted specialists for the technical departments of the Army recruited in time of peace for use in time of war only, and are subject in time of peace to short periods of training yearly. Volunteers can be called in time of war when and in such numbers as Congress shall authorize.

The Army will be increased 34½ regiments of Infantry, 10 regiments of Cavalry, 15 regiments of Field Artillery, 93 companies of Coast Artillery, 5 regiments of Engineers, 2 battalions of Mounted Engineers, the necessary number of auxiliary troops in the Medical Department, Quartermaster Corps, Signal Corps, and the unassigned recruits, and in addition thereto the number of Philippine Scouts that may be determined upon by the President, not to exceed a maximum of 12,000.

The number of general officers of the Army has been increased from 7 major generals and 17 brigadier generals to 11 major generals and 36 brigadier generals. This will provide the necessary general officers to command the divisions and brigades and furnish the general officers for the General Staff.

GENERAL STAFF EXPANDED.

The General Staff Corps has been increased from 38 officers to 57 officers, and the duties of the General Staff remain the same as they were before the writing of the new bill. This important corps has been nearly doubled, and with its increased numbers the General Staff will be better able than heretofore to perform its important functions.

In order to provide for the Regular Army officers necessary for duty with the National Guard, duty at the various colleges where military instruction is given, for recruit duty, military attachés, etc., provision is made for a detached officers' list, which provides 1,022 officers in addition to those necessary with organizations. This supplies the officers necessary for the various duties prescribed by law without taking them away from their organizations. Up to the present time promotion has been more or less unequal at different times in the different branches of the service, and to a certain extent this detached officers' list will be utilized to equalize promotion in the different branches, and for the same purpose authorization is given to transfer officers from one branch of the line to another to fill the vacancies created by the new act.

STIMULATE ENLISTMENT.

The present enlistment contract provides for a seven-year enlistment, four of which shall be with the colors and three with the reserve. Under the new law these periods are reversed—that is, three years with the colors and four in the reserve, but an important addition is made, namely, that at the end of one year's service any enlisted man within the continental limits of the United States may be discharged if he has become proficient in that time. This is an important proviso and will, it is believed, increase the number of enlistments. In addition to that, provision is made for paying the enlisted men in the reserve $24 a year, and the President is authorized to utilize the personnel of any department of the Government, such as postmasters, mail carriers, etc., to keep track of reservists, and also to use the postmasters (except first class) to obtain recruits for the Army.

Enlisted men are prohibited from engaging in any civil occupations, whether for pay or otherwise, that would put them in competition with men in civil life.

OFFICERS' RESERVE CORPS.

An officers' reserve corps is provided which will authorize the commissioning of civilians up to and including the grade of major in the various branches of the Army. These men can be selected and trained in time of peace, and the officers so obtained will be far better prepared than any volunteers that could be raised hurriedly at the outbreak of war. In order to obtain these reserve officers, a reserve officers' training corps is authorized which will consist of units at the various colleges, academies, and universities throughout the country where military education and training will be given which, in connection with six weeks' field training each summer, will give a personnel for the officers' reserve corps that is far better equipped for the duties of an officer than any heretofore available.

In order to provide the enlisted men for the various technical staff corps and departments, an enlisted reserve corps has been authorized, which will consist of men whose daily occupation in civil life specially fits them for duty in the Engineer, Signal, and Quartermaster Corps and in the Ordnance and Medical Departments. This enlisted reserve corps will provide the railway operatives, bridge builders, chauffeurs, hospital attendants, nurses, telegraphers, etc., required for the departments and corps mentioned. It is impracticable to keep in the Regular Army the number of men of these classes that will be necessary in time of war, and the enlisted reserve corps will provide for the deficiency.

No provision is made for a volunteer force in time of peace, but in place thereof the ideas embodied in the business men's camps of 1915 have been provided for, and the new law provides that all expenses in connection with attendance at such camps shall be borne by the Federal Government.

NATIONAL GUARD FEDERALIZED.

The National Guard is, within the limits of the Constitution, federalized. The maximum number authorized is 800 for each Representative and Senator in Congress and such number from the Territories as the President shall prescribe. This will probably give a total of about 17,000 officers and 440,000 enlisted men. The organization of the National Guard will conform to that of the Regular Army, as will also its equipment and armament.

The President is authorized to organize the National Guard into brigades, divisions, and other tactical units and to prescribe the kind of organizations that shall be maintained in the various States to insure that these brigades and divisions will be complete in all respects. Certain qualifications are required of officers of the National Guard, and although these officers will still be commissioned by the governors, they will not be recognized by the Federal Government unless they fulfill the prescribed qualifications. Regular Army officers may

be commissioned in the National Guard if the governors so desire. Enlistments in the National Guard will be for six years, three years with the colors and three years with the reserves, but a man may serve out his enlistment, if he so desires, instead of going into the reserve. Hereafter the enlistment contract for the National Guard will contain an oath of allegiance both to the State and to the United States, and not only enlisted men but officers must subscribe to such an oath. The President is not only authorized to call out the National Guard for the constitutional purposes, but is also authorized to draft them into the service of the United States, whether they desire to come or not, and also to draft the additional men that may be needed to keep such National Guard units at war strength in case the National Guard reserve authorized by this act is not sufficient for that purpose. Ample provision is made for the protection of Federal property in the hands of the National Guard, and in case property is lost or destroyed through neglect or in any other way that could have been avoided the States must replace the property so lost.

Under the new law horses can be supplied to the mounted organizations of the National Guard, and provision is made for their care and maintenance.

BETTER TRAINING FOR MILITIA.

The National Guard will be required to have 48 periods of armory training each year and 15 days' field training, and in case the prescribed amount of training is not undergone the President may withhold the funds appropriated for the National Guard as he sees fit. In addition to that, the Secretary of War may require such additional study on the part of the officers as he may deem necessary. During periods of field training the National Guard will be paid at the same rate as the Regular Army, and for the armory training a generous rate of pay is authorized. National Guard officers and men may be sent to various service schools and will be paid during such periods. The National Guard will be subject to the laws and regulations governing the Army of the United States from the time that they are required to come into that service, and after that time there is no evading the Federal law. A uniform system of courts-martial for the National Guard is authorized, the limitations of which are fixed by law. This will tend to uniform procedure and practice in all the different States. When the National Guard is drafted into the service of the United States, they will be entitled to all the rights of the existing pension laws.

In order to encourage target practice, the Secretary of War is authorized to establish ranges and to supply rifles, ammunition, and instructors for rifle clubs in various parts of the country.

WILSON CONSISTENT THROUGHOUT.

President Wilson's attitude on the question of national defense has been consistent throughout. He has stood against turning America into a military camp and against universal compulsory service, but in his first communication to Congress in which he discussed this subject at length, he declared:

> We must depend in every time of national peril, in the future as in the past, not upon a standing army, nor yet upon a reserve army, but upon a citizenry trained and accustomed to arms. It will be right enough, right American policy, based upon our accustomed principles and practices, to provide a system by which every citizen who will volunteer for the training may be made familiar with the use of modern arms, the rudiments of drill and maneuver, and the maintenance and sanitation of camps. We should encourage such training and make it a means of discipline which our young men will learn to value. It is right that we should provide it not only, but that we should make it as attractive as possible. * * * It is right, too, that the National Guard of the States should be developed and strengthened by every means which is not inconsistent with our obligations to our own people or with the established policy of our Government. And this, also, not because the time or occasion specially calls for such measures, but because it should be our constant policy to make these provisions for our national peace and safety.

This was the message of the President, delivered in person to Congress at the first opportunity after the outbreak of the European war in 1914. In this same message the President warned the country against nervousness and hysteria:

> We shall easily and sensibly—

He predicted—

> agree upon a policy of defense. * * * Our policy will not be for an occasion. It will be conceived as a permanent and settled thing, which we will pursue at all seasons, without haste and after a fashion perfectly consistent with the peace of the world, the abiding friendship of States, and the unhampered freedom with all whom we deal.

POLICY OUTLINED IN 1915.

One year later, on December 7, 1915, the President defined at greater length his policy of preparedness and outlined the program essentially as Congress subsequently enacted it. A democracy, he declared, is not belligerent and will not maintain a large standing army. "War," he said, "has never been a mere matter of men and guns. It is a thing of disciplined might. If our citizens are ever to fight effectively upon a sudden summons, they must know how modern fighting is done, and what to do when the summons comes to render themselves immediately available and immediately effective. And the Government must be their servant in this matter, must supply them with the training they need to take care of themselves and it."

Industrial preparedness, the ability readily to mobilize the industries of the country, was also urged by President Wilson at this time. "I take it for granted," he said, "that I do not need your authority to call into systematic consultation with the directing officers of the Army and Navy men of recognized leadership and ability from among our citizens who are thoroughly familiar, for example, with the transportation facilities of the country and therefore competent to advise how they may be coordinated when the need arises, those who can suggest the best way in which to bring about prompt cooperation among the manufacturers of the country, should it be necessary, and those who could assist to bring the technical skill of the country to the aid of the Government in the solution of particular problems of defense."

The President has been frequently misquoted and misrepresented because in his message of December, 1915, he declared that the administration "had not been negligent of national defense. We are not unmindful," he said, "of the great responsibility resting upon us. We shall learn and profit by the lesson of every experience and every new circumstance; and what is needed will be adequately done." For their own partisan purposes this passage was misunderstood by Republican press and politicians, and the impression was sought to be conveyed that President Wilson had declared that the country, in his opinion, was adequately prepared and needed no new legislation, no increase in either Army or Navy, no modernization of its land and sea defenses. But the President's own words answer this charge and prove it to have been without basis and unfounded.

FIRST MOBILIZATION OF INDUSTRY.

Up till the Wilson administration no administration in the history of the United States had made any effort to cope with the problem of industrial preparedness. For decades before the outbreak of the European war the industries of Germany had been mobilized. Not only had the Imperial German Government tabulated the manufacturing plants, the railroads, and the mines of the nation with a view to securing prompt cooperation for the national defense, but the authorities had listed the names of every citizen so that in time of stress they might know whom to send to the trenches, whom to call upon for the manufacture of munitions, what shops to turn into the control of the quartermaster's department, and so on. In France, as in Austria and in Germany, every horse and wagon suitable for military service was listed and the records were kept by areas so that at any time the Governments could ascertain in any stated district what horses and wagons were available, their condition, and their readiness to respond.

The national-defense act, passed by the Democratic Congress and signed on June 3, 1916, by President Wilson, was the first treatment, comprehensive or otherwise, of the subject of the mobilization of the industries of the United States.

To this administration belongs the credit, then, of having prepared in times of peace the industries of the United States for effective use for national defense in time of war. For the first time in the history of the country an industrial inventory of the United States was prepared under the direction of the Government by the Committee on Industrial Preparedness of the United States Naval Consulting Board. This gigantic task, which was virtually completed before the 1st of August, 1916, reveals just what plants the country over can use their equipment to produce the thousands of things necessary for the Goverment's use in a national emergency. By the closest kind of cooperation between Congress, the Army and Navy Departments of the Federal Government, and the business interests of the country, a firm and enduring foundation for the Nation's defense has been raised.

ANNUAL REPORTS REQUIRED.

The national-defense act provides for the sending of annual educational orders to American manufacturers in order to teach them during peace how to turn out the military and naval supplies needed in an emergency. An industrial reserve will also be created so that in time of war the skilled mechanic may be kept at work where his services are most valuable instead of being sent to the firing line.

Both the inventory and the legislation growing out of it are the result of a remarkable three months' campaign made by a volunteer, unpaid organization of business men and engineers created by the Wilson administration. It marks a new era in

the relations of the engineer, the manufacturer, and the citizen generally in the safeguarding of the National Government, as well as a much closer coordination between various governmental agencies. In many States undeveloped resources have been classified and given publicity and new industries are promised as the result of information gathered.

Business men the country over received the investigators with the greatest courtesy and cooperation. In only a few cases did they refuse to give the desired information, and then usually under a misunderstanding of the committee's plans, which was quickly cleared up. More than 30,000 concerns, each doing an annual business of over $100,000, were classified, in addition to many smaller plants with equipment peculiarly suited to turn out material for the fighting line. At the time of the Mexican crisis Chairman Coffin sent out urgent telegrams to the chairmen of all State boards, subdivisions of the industrial mobilization committee, urging all possible haste in preparing to supply the needs of the Army, and Secretary Baker, of the War Department, detailed five Regular Army officers, two of them members of the General Staff, to the committee headquarters in New York.

Compliance with all orders given by the Government for products or materials is made obligatory and are to take precedence over all other orders and contracts. Operators of plants equipped for the manufacture of arms or ammunition are required to manufacture and furnish these supplies upon the order of the Government at a reasonable price.

COUNCIL OF NATIONAL DEFENSE.

Important new legislation was enacted in the Army appropriation bill of 1916. The most important single item in this bill was that which created the Council of National Defense for the coordination of the industries and resources for national security and welfare. This council, the need for which has long been set forth by military experts, and which, incidentally, was never recognized by Republican administrations, consists of the Secretaries of War, Navy, Interior, Agriculture, Commerce, and Labor, together with an advisory commission nominated by the President to serve patriotically without compensation. By the terms of the statute it is enacted that the duty of this Council of National Defense shall be:

To supervise and direct investigations and make recommendations to the President and the heads of executive departments as to the location of railroads with reference to the frontier of the United States so as to render possible expeditious concentration of troops and supplies to points of defense; the coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad; the utilization of waterways; the mobilization of military and naval resources for defense; the increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce; the development of seagoing transportation; data as to amounts, location, method, and means of production, and availability of military supplies; the giving of information to producers and manufacturers as to the class of supplies needed by the military and other services of the Government, the requirements relating thereto, and the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation.

SWISS IDEA ADOPTED.

Another section of the Army appropriation bill sets aside $300,000 for the establishment of indoor and outdoor rifle ranges. These ranges will be under the control of the War Department, in charge of a "director of civilian marksmanship," and will be utilized to encourage and train citizens in the art and science of rifle shooting. This is in line with the Swiss idea of universal military service, and paves the way for the accomplishment of President Wilson's hope that there should be in America "a citizenry trained and accustomed to arms."

## Threatened Railroad Strike.

### EXTENSION OF REMARKS
OF
### HON. COURTNEY W. HAMLIN,
OF MISSOURI,
IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. HAMLIN. Mr. Speaker, I was quite anxious to have an opportunity to submit a few remarks on the bill H. R. 17700 while the same was being considered in the House, but inasmuch as everyone knew that if the threatened railroad strike which had been called for 7 o'clock a. m. Monday, the 4th, should be averted by the passage of that bill, there was no time to be lost in speech making; and being extremely anxious to avert that great calamity, I was very willing to forego my desire to speak and do everything I could to hurry the bill to a final vote.

General leave being granted to all Members to extend remarks on that bill, I am now availing myself of that opportunity, not primarily for the purpose of making any statement in relation to it myself, but to incorporate as a part of my remarks a statement furnished me by three distinguished trainmen of long experience and of high standing in their community and whose integrity can not be questioned.

I think a careful perusal of that statement of facts will give one a pretty clear insight into the reason or cause for the controversy between the railroads and the brotherhoods. The statement follows:

STATEMENT.

From 1888 to 1904 the rate of pay for train and engine men on the Frisco line, based on 100 miles or less, 10 hours or less, would constitute a minimum day; overtime to be computed on a 10-mile per hour basis in through freight service: Engineers, $4 per hundred miles or less; conductors, $3 per hundred miles or less; firemen, $2.28 per hundred miles or less; two brakemen, $4 per hundred miles or less; total, $13.28 per hundred miles or less for crew of five men.

During this period of years the roads were allowed to grant rebate to shippers, and light trains, rapid movement, prompt delivery of all shipments, all roads in competition with each other; each road striving to get the business resulting in such a rapid movement of through freight of all commodities that the engineers at $4 per 100 miles were able to earn on an average of $180 per month, and yet have all the rest and recreation needed, except at times when the volume of business was so great the company to move the business promptly would compel the men to work excess of hours, making excess of mileage that finally resulted in the passage of what is known as the "16-hour service period for trainmen" by the Federal Congress.

About the same time the antirebate bill was passed by Congress. Then the roads went from extreme fast-freight movement to extreme slow-freight movement, and the building of larger locomotives, and as the locomotives became larger, trains heavier, responsibility greater, and work harder, the rates of pay increased up to, and are at the present time, as follows: On the same basis of 100 miles or less, 10 hours or less, constitute a minimum day, all overtime computed on the 10-hour basis: Engineers, $5.45 per 100 miles or less; conductors, $4.18 per 100 miles or less; firemen, $3.75 per 100 miles or less; two brakemen, $5.56 per 100 miles or less; total, $18.94 per 100 miles or less for crew of five men. An increase cost to the roads of $5.66 for 100 miles of service of each train crew.

This on its face shows a very heavy increase in operating cost to the roads, and unless the service of each train crew brought in a greater revenue return in tonnage handled would leave a large deficit to the roads to meet.

Now, what are the true facts in the case? One train crew of five men to-day receive in wages $18.94 per 100 miles, and with one modern superheated locomotive haul five times the tonnage per train that one crew receiving $13.28 hauled prior to the increase in tractive power and weight of the modern locomotive. Let us look at the result from a revenue basis and operating cost to the road.

Were the railroads to-day using the old slide-valve, saturated steam-pressure, light-weight, and small power locomotive in use from 1888 to 1905, it would require five locomotives, manned by five crews of 25 men, whose pay per 100 miles of service would be $66.40, to move the tonnage one crew costing $18.94 moves at the present time—a saving in wages of $47.46 per 100 miles of service.

But this is not all the roads save by the modern superheated, increased tractive power locomotive of to-day, because the modern locomotive of to-day costs less than 60 per cent of the cost of the five locomotives of the old class that has been discarded, and less than 50 per cent of the cost in up-keep, maintenance, and fuel of the five old locomotives; or, in other words, if the railroads of to-day were moving the commerce of the United States with the same class of locomotives used from 1888 to 1905, they would require 350,000 locomotives as against 70,000 at present; 1,720,000 train and engine men, as against 350,000 at present, and at least three times the shop facilities, and three times the number of shop and other employees.

Yet, with this stupendous saving in number of locomotives, in shop facilities, and in number of men employed, with one crew of five men doing the work, and hauling more revenue tonnage per train than five crews of 25 men under old conditions could possibly do, with a saving of $47.46 per each 100 miles in wages saved—the general managers say they can not grant the eight-hour day, as it would bankrupt the roads to do so.

Let us see about this: Here is a true statement of one average train on the Frisco, moved from Monett, Mo., to St. Louis, Mo.: Train consisted of 35 loads, 1,700 gross tons, 975 net tons, and, as per the waybills, freight charges per 100 miles $819.80; from which deduct wages of train crew, $18.94; variable charges, oil, fuel, water, maintenance, $61.80; total cost per 100 miles, $80.74; balance, less cost, $738.06; company received $23.42 per car 100 train-miles; train crew received 57 cents per car per 100 train-miles, leaving balance to company, less wages, of $22.85 per car per 100 miles. This train consisted of oil and was handled 119 miles in eight hours. Now, if true, our eight-hour day would increase costs 33⅓ per cent; company would then have $22.74 per car per 100 train-miles to our 76 cents per car wages per 100 miles.

Let us explain further: Here is one train of 1,700 gross tons, 975 net tons, moved over one division of 119 miles, Springfield to Newburg, in eight hours.

Why this fast movement, and why not the same movement on all classes of freight moved over the road? Simply, this was an oil train. The oil company ship thousands of cars and get preference in the service. The same fast movement of packing-house products, the same fast movement with perishable freight or other commodities that the companies are by law held liable for damage through loss by slow movement. But the vast per cent of all shipments of the nonperishable class, unprotected by law or special privilege, is moved at the companies' own time and pleasure by tonnage drags, doubling hills, and health-destroying hours of service of the trainmen.

With this result to the enginemen: Although receiving $5.45 per 100 miles, as against $4, their average monthly wages have fallen from $180 to $145 per month, and their death and disability rate is constantly increasing.

The membership of the Brotherhood of Locomotive Engineers, as per our insurance reports, is about 70,000. Our laws require a man to have one year's experience as a locomotive engineer before he can become a member. The company requires a man to fire at least three years before they will promote him to be an engineer. The mortuary statements of the engineers' insurance department show the average life of the insured members to be over 11 and under 12 years. Thus the average life of a man in locomotive service on the railroads is less than 16 years. Our brotherhood pays out each year for death, disability, and personal injury to members over $2,000,000.

Now, remember, before the company will hire a fireman or promote him he must pass a first-class physical examination. With men so physically perfect when we take them in as members, why is the death and total disability ratio so high? We answer without fear of truthful contradiction—long hours of service, rain or shine, sleet or snow; exposure to all kinds of weather; hard-riding, filthy, insanitary locomotives; filthy, insanitary eating, drinking, and sleeping facilities when out on the road away from home. No provisions made by the company to provide sanitary eating and sleeping quarters when tied up by the 16-hour law, and for years and years and years forced to drink filthy water out of public ponds and engine water tanks, so that the average healthy man, physically perfect when promoted as an engineer, has his health destroyed and is relegated to the grave or scrap heap in less than 12 years.

While Wall Street manipulators are making their millions by our long hours, by our hard work, one crew of 5 men moving the tonnage that formerly took 5 crews of 25 men; while the presidents and general managers do their work in luxuriously furnished offices, steam-heated in winter, with electric fans and distilled ice water in summer and palatial private cars to travel in, so that their high salaries of from $18,000 to $100,000 a year can be paid.

If Congress and the public would go into this, they would soon learn the violation of the 16-hour law, some 78,000 cases now pending; they would soon learn the true cause of car shortage so detrimental to the producing and shipping classes of our country, and they would soon learn that a Federal law to compel all railroads to move every loaded or empty car billed out at least 100 miles every calendar day of 24 hours would reduce the car shortage 50 per cent, put the small shipper on equal terms with the big shipper and those of special privilege, and the roads could handle the present tonnage of freight and earn the revenue thereon in at least one-third less time than at present. Of course, this would upset the Wall Street manipulators, as they could not show such a large revenue per train-mile that now permits them to issue unlimited stocks and bonds, injecting volumes of water into the same and unloading them on the public, and putting the proceeds into their own profits.

The managers point to passenger engineers' wages of $211 to $225 per month. That is true, but the engineer must ride 4,800 to 5,100 miles every 30 days to earn that wage, or 57,600 to 61,200 miles a year, while the freight engineer would have to work 5,755 hours a year, or over 18 hours out of every 24—a thing impossible for a human being to do.

---

## The Banking and Currency Law.

### EXTENSION OF REMARKS
OF
### HON. CHARLES H. SLOAN,
OF NEBRASKA.

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. SLOAN. Mr. Speaker, some weeks ago, when the rural-credits bill was being considered, I listened to a number of the majority Members proclaim that the enactment of that legislation would do for the farmers what the Glass-Owen currency law had done for the business men. The claim was made so frequently that it seemed to be accepted.

Then the frequency of its statement grew monotonous and challenged an investigation. That investigation revealed the fact that if the rural-credits law promised no more to its beneficiaries than the Glass-Owen law produced it was little better than a vain thing.

An investigation of the workings of the Glass-Owen legislation will prompt the inquiry of what it has done to the business men rather than what it has done for them. I shall not criticize or discuss the Glass-Owen legislation or the banking and currency act from a partisan standpoint, because it was to some extent supported at different stages by members of both parties and individuals of various political tendencies. A reasonably careful following of the new banking system during its life, beginning November 16, 1914, up to July 1, 1916, causes some to marvel why the majority Members are claiming exclusive credit for this legislation, instead of charging joint responsibility against minority Members for aiding in any way its enactment into a law.

Congress, like any other body, gains respect for action when it deserves it. But it can not claim the respect of the business world by asserting merit when palpable failure obtains. The reiterated boast, made day after day during the last month, of special credit to the majority for the enactment of the banking and currency law if not contradicted by anyone would convince the public that the minority, as well as the majority, was ignorant of the actual workings of the new banking and currency act.

A brief statement of facts leading up to the enactment of the present law might be interesting. For nearly 20 years the present majority party found expression of itself on the money question in the "free coinage of silver." In the battle of the standards, the people of the United States supported the Republican Party. When the standard of business value was established, sound control of credits became the next consideration.

The Republican Party in Congress organized a monetary commission which pursued one of the greatest investigations ever undertaken and completed by man. Out of it was evolved the so-called Aldrich, or Aldrich-Vreeland plan of banking and currency. This plan had for its basis:

First. The gold standard of value.

Second. A system of banking and currency based upon three fundamental factors:

(a) Central control.

(b) Bank ownership.

(c) Asset currency.

The defeat of the Republican House in 1910 prevented the enactment of these principles into law because the Democrats of the Sixty-second Congress opposed the plan.

At Baltimore in 1912 the Democratic Party declared against the Aldrich plan of reform in our banking and currency. Although Democracy was successful at the polls, the country had become convinced that that plan was sound in principle, and if wisely planned and enacted into law it would be workable.

The Banking and Currency Committee of the House of Representatives employed a verbal artist at an expense of $4,817 to draft a bill embodying the essential elements of the Aldrich-Vreeland plan, but so concealing the important features that prejudiced majority Members might be induced to support it. This being accomplished it was up to the majority Members to vote for the bill because they could not see the Aldrich features, or at least did not recognize their importance. It was also up to minority Members to consider favorably the proposed legislation because it included these provisions.

The bill was materially modified in the Senate, and upon its return from conference received new support; not that it was thought to be a workable measure, but that it was a basis for later amendment; because the basis of the bill was merely one step in the evolution of the banking and currency legislation, begun quite a number of years ago, and it remains to be perfected in years to come.

It has not been and is not a success. Supreme authority in the majority party claimed that it prevented panics in the early months of the European war. Sufficient answer to that is the fact that the Reserve System was put in operation three and one-half months after the European war began. Further, the Aldrich-Vreeland Emergency Currency Act, a Republican measure, was in force at the outbreak of the war, and served the purpose of preventing a panic. The system thus far, while furnishing a basis for success under amended terms and management, is not a success, and it is due to the American people to be so told by those in any wise responsible for its enactment.

The first test of success or failure of the system is, Has it paid? National banks were forced into the system under penalty of forfeiting their charters. As compensation for this compulsion they were assured of 6 per cent return upon their money invested. Some of the regional banks have not paid actual expenses, say nothing about declaring a dividend up to July 1, 1916. Others have had a slight excess of earnings over expenses, and others have been enabled to pay small dividends.

First test: The total earnings of all 12 banks from November 16, 1914, to July 1, 1916, was $4,078,811; total expenses, $2,597,565. Net earnings for same period, $1,481,246, or at the rate of $1\frac{6}{10}$ per cent per annum on the enforced capital investment.

Second test: If the system were not a profitable one to the enforced investors, still, if it has served the public well, that might palliate the first objection—

Has it served the public?

(a) Investments in the primary channels designed by the bill itself have only in a limited way been made.

In the primary function of the system rediscounting through member banks $3\frac{1}{2}$ per cent of the resources of the system is now (May, 1916, average) engaged. Of the $596,316,000, mostly of liquid wealth taken from the channels of finance and commerce and placed in cold storage in these banks, only $20,183,000 is invested in the primary purpose for which the system was created. I speak of this as the primary purpose of the system, because in the act itself it is given that place in section 13, where there is an enumeration of the active business functions of these regional banks. Further, the report which was filed by the Banking and Currency Committee of the

House in support of the Glass bill, section 13 was discussed and rank given it as I have stated. On page 48 of that report will be found the following discussion:

In section 14 is set forth the fundamental business purpose of the bill in providing for rediscount operations. The Federal reserve banks are at the outset authorized to receive current deposits from their stockholders or from the Government or from other Federal reserve banks, in so far as the latter may need to keep funds with them for exchange purposes.

The fundamental requirement throughout all of the discount section of the proposed bill is that antecedent to the performance of a service by a Federal reserve bank for a member bank which applies therefor the member bank shall indorse or guarantee the obligations which it offers for discount. Subject to this requirement the proposed bill, first of all, provides that notes and bills having a maturity of not over 90 days and drawn for agricultural, industrial, or commercial purposes or the proceeds of which have been used for such purposes shall be admitted to rediscount.

It will be noted that the foregoing discussion refers to section 14, but in the rearrangement of sections, section 14 of the Glass bill became section 13 of the completed act.

(b) Of the secondary or permissive investments authorized in section 14 of the act (15 of the Glass bill) there is 25 per cent of the total resources now engaged. In other words, the secondary or permissive investments are 7½ times as great as the fundamental investment for which the system was organized. A discussion of these secondary investments might be interesting, and is found on page 52 of that report, as follows:

It will have been observed that the transactions authorized in section 14 (14 of the bill, 13 of the act) were entirely of a nature originating with member banks and involving a rediscount operation. It is clearly necessary to extend the permitted transactions of the Federal reserve banks beyond this very narrow scope for two reasons:

1. The desirability of enabling Federal reserve banks to make their rate of discount effective in the general market at those times and under those conditions when rediscounts were slack and when, therefore, there might have been accumulation of funds in the reserve banks without any motive on the part of member banks to apply for rediscounts or perhaps with a strong motive on their part not to do so.

2. The desirability of opening an outlet through which the funds of Federal reserve banks might be profitably used at times when it was sought to facilitate transactions in foreign exchange or to regulate gold movements.

This leaves out of $596,916,000 resources only $168,537,000 earning assets.

(c) Of these secondary or permissive investments there are: United States bonds, $54,959,000; bills bought in open market, $51,155,000; and municipal warrants, $39,154,000. This leaves unengaged and unearning 71½ per cent of the total resources, or $428,379,000.

Of the $20,183,000 of member's bills, over $15,000,000 was taken from member banks by the Richmond, Atlanta, Dallas, and Kansas City reserve banks—the last named does little business in the northern half of the tenth district. Little more than $5,000,000 taken from member banks by the Boston, New York, Philadelphia, Cleveland, Chicago, St. Louis, Minneapolis, and San Francisco banks. Of the bills being bought in open market, being purely investment and not to facilitate banking movement, only $3,157,000 were taken by the said southern group, while $47,997,000 were invested by the northern group. Of the investment in Government paper, the southern group took $16,470,000, while the other group took $38,420,000. Of the municipal warrants, the southern group took $1,274,000, while the northern group took $40,965,092.

These facts demonstrate clearly that the reserve bank up to the present is not performing its function as designed by its supporters, except in a very limited area, and in that limited area to a very narrow extent. The total amount of the members' notes discounted would not exceed the bills payable in an ordinarily strong bank in one of the good-sized cities of the United States.

Of the investments, out of an average total of $596,916,000 resources only three-fifths of 1 per cent, or $3,669,000, is agricultural or cattle paper.

A large, general purpose of the act, so far as the public is concerned, was to enable business men and institutions to realize on their credits and prevent failures. The law has been in effect something less than three years, and has been in operation somewhat less than two years. Its effect in prospect and in operation is evidenced by the failure record of the country.

The amount of farm paper purchased and discounted amounted in the month of June to only $3,669,000. Of this, $2,654,000 was taken by the four southern banks, leaving only $1,015,000 of agricultural and cattle paper for the eight banks occupying the large agricultural and live-stock region of the North, stretching from the Atlantic to the Pacific. These eight banks had only about one-sixth of 1 per cent of their resources so invested.

Perhaps the apparent discrimination against this agricultural and live-stock paper which appears in the discount rate accounts in part for this small investment. The following is a table of discount rates published by the Federal reserve banks, in effect June 22, 1916:

*Discount rates of each Federal reserve bank in effect June 22, 1916.*

| | Maturities of 10 days and less. | Maturities of over 10 to 30 days, inclusive. | Maturities of over 30 to 60 days, inclusive. | Maturities of over 60 to 90 days, inclusive. | Agricultural and live-stock paper over 90 days. | Trade acceptances. | | Commodity paper. | Paper bought in open market. |
|---|---|---|---|---|---|---|---|---|---|
| | | | | | | To 60 days, inclusive. | Over 60 to 90 days, inclusive. | | |
| Boston | 3 | 3½ | 4 | 4 | 5 | 3 | 3 | [1] 3½ | |
| New York | 3 | 4 | 4 | 4 | 5 | 3½ | 3½ | | |
| Philadelphia | 3½ | 4 | 4 | 4 | 4½ | 3 | 3 | [1] 3 | |
| Cleveland | 3½ | 4 | 4 | 4½ | 5 | 3 | 3½ | | |
| Richmond | | 4 | 4 | 4 | 5 | 3½ | 3½ | [1] 3½ | |
| Atlanta | | 4 | 4 | 4 | 5 | 3½ | 3½ | 3½ | [2] 3½–5½ |
| Atlanta (New Orleans branch) | | | | | | [3] 3½–4 | [3] 3½–4 | | |
| Chicago | 3½ | 4 | 4½ | 4½ | 5 | | | | |
| St. Louis | 3 | 4 | 4 | 4 | 5 | [4] 3 | [4] 3½ | 3 | |
| Minneapolis | | 4 | 4 | 4½ | 5 | 3½ | 3½ | 3½ | |
| Kansas City | 4½ | 4½ | 4½ | 4½ | 5 | 3½ | 3½ | 3 | |
| Dallas | | 4 | 4 | 4 | 4½ | 3½ | 3½ | 3 | 3–5 |
| San Francisco | 3 | 3½ | 4 | 4½ | 5½ | 3 | 3½ | [5] | |

[1] Rate for commodity paper maturing within 90 days.
[2] Rate for bills of exchange in open market operations.
[3] Rate for trade acceptances bought in open market without member bank indorsement.
[4] A rate of 2 to 4 per cent for bills with or without member bank indorsement has been authorized.
[5] Rate for commodity paper maturing within 30 days, 3½ per cent; over 30 to 60 days, 4 per cent; over 60 to 90 days, 4½ per cent; over 90 days, 5 per cent.

It will be observed that agricultural and live-stock paper discount averages nearly 1½ per cent higher than the other classes of paper in which the system invests its money. As this paper is based upon values for which there is a ready market, and perhaps the steadiest market of all our American products, it would seem to be an absolutely unfair discrimination against the farmer.

The President of the United States, on the 2d day of September, 1916, while standing on the lawn of ever-deepening shadows, formally repudiating, so far as in him lay, the one-term plank of the Baltimore platform, said:

For the farmers of the country we have virtually created commercial credits by means of the Federal reserve act and the rural credits act. They now have the standing of other business men in the money market.

As the rural credits system has not been put in operation, of course, no one can tell much about its workings. So the "creation of farmers' commercial credit," such as it is, must be attributed to the reserve act. As the money charged on farmers' paper for the use of money, according to the rates fixed by the reserve system, amounts to about 30 per cent more than the cost to those issuing regular commercial paper, the real benefit to the farmer can only be discovered through a powerful administration lens.

Perhaps the best concrete evidence of the system's failure to perform its proper function is shown in the rapidly increasing number of failures throughout the country.

The following is a record of the failures in the country, beginning with 1913, in which the reserve act was considered and enacted by Congress.

| | Failures. |
|---|---|
| 1913 | 14,553 |
| 1914 | 16,759 |
| | Failures. |
| 1915 | 19,032 |
| 1916 (estimated by doubling the actual number in first half of year) | 18,990 |

The average annual number of failures for 1909, 1910, 1911, and 1912 was 13,567.

Average for 1913, 1914, 1915, and 1916, 17,333.

Average for 1915 and 1916, years reserve act was in operation, 19,011.

Record for a recent week:

Bradstreet's reports business failures in the United States for the week ending August 24, as follows:

| | |
|---|---|
| Week ending Aug. 24, 1916 | 300 |
| Weeks corresponding to this week: | |
| 1915 | 296 |
| 1914 | 297 |
| 1913 | 269 |
| 1912 | 228 |

It should perhaps be said, though as no excuse or palliation, that the volume of liabilities have not kept pace with the number of failures. The significance of that is the fact that the system is not rendering the aid to small or moderate business which ought to have the preferred call, if any there be, over big business, which can and does take advantage of war stimulated conditions.

It is to be hoped that a future Congress will by wise amendment and a prudent management and proper modification cause our banking system to become of use and service to the people and to commerce, but a proper respect for ourselves and the intelligent judgment of the country would forbid our boast when an apology for failure is due either from Congress or the system's management.

---

**The So-Called Eight-Hour Law.**

## EXTENSION OF REMARKS

OF

## HON. CLIFTON N. McARTHUR,

OF OREGON,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. McARTHUR. Mr. Speaker, there is nothing in the so-called "eight-hour law" just passed by Congress that in any way limits a day's work to eight hours. The measure in question merely provides for extra wages for certain classes of railroad employees who may work more than eight hours per day. It is therefore not an eight-hour law, but a law for the regulation of wages. I am in sympathy with eight-hour legislation, as my record in the legislature of my own State shows, but I do not approve of the measure just passed nor of the manner of its passage. I do not believe it is the function of Congress to legislate as to the wages of employees other than those in the Government service. In the passage of this law Congress has invaded a new field and has invited all laborers whose products are shipped in interstate commerce to come here and demand that their wages be increased. We have let down the bars for the admission of all kinds of disputes between capital and labor. We have created a precedent that will bring trouble not only to ourselves but to future generations.

I hold to the belief that Congress in order to promote the general welfare has the right to legislate as to the length of hours that men may work in moving trains in interstate commerce, and I am ready and willing to consider such legislation upon its merits, but not as a subterfuge for something else. I question the authority of Congress to fix wage schedules, and venture the opinion that the country does not approve of the law just passed—even if it be the means of averting the threatened strike. Furthermore, I am not sure that the railroad employees themselves desire to have Congress fix the amounts of their compensation.

EIGHT-HOUR LEGISLATION UNSOUGHT.

The American Federation of Labor, at its Philadelphia convention in 1914, adopted the following:

> The American Federation of Labor, as in the past, again declares that the question of the regulation of wages and the hours of labor should be undertaken through trade-union activity, and not to be made subjects of laws through legislative enactment, excepting in so far as such regulations affect or govern the employment of women and minors, health and morals, and employment by Federal, State, or municipal government.

In other words, the forces of organized labor do not propose to surrender the power to fix wage schedules, but intend that it remain within the jurisdiction of the several unions. This position was reiterated at the annual convention of the American Federation of Labor held in San Francisco last November, and was stoutly defended on the floor by Mr. Samuel Gompers, president of that organization. While the railway brotherhoods are not affiliated with the American Federation of Labor, it is highly probable that the rank and file of their members are of the same opinion. In permitting their chieftains to take this question into politics the brotherhoods have done the cause of labor incalculable harm, and in refusing to arbitrate their differences with the railroads they have struck down a principle which the Federal Government has been trying for years to establish and which society accepts as the most helpful and equitable method of settling disputes between capital and labor.

I know hundreds of members of the various brotherhoods, and many of them are among my warmest personal friends. I can not believe that the rank and file of these splendid organizations approve of the methods employed to pass this bill.

CLASS LEGISLATION ENACTED.

The bill which Congress has just passed is class legislation in that it recognizes less than 20 per cent of the railroad workers. The other 80 per cent—the switchmen, towermen, section hands, trackwalkers, shopworkers, agents, and laborers—do not come within the purview of the bill. Why this favoritism? If the trainmen are entitled to more pay, how about the great army of hard-working men in the section crews whose backs are bent "day in and day out" under the strain of the pick and crowbar? How about the poorly paid men in the switch towers, who share with the locomotive engineers the responsibility for the great loads of human freight? I am not an expert in transportation matters, but, according to my vision, we have enacted a rank piece of class legislation.

I do not pretend to say that the claims of the brotherhoods for an increased wage are unjust. I have no knowledge or information upon the subject nor do I believe that half a dozen Members of this body have more than a superficial knowledge as to the matter at issue. If the men are entitled to more pay, they should receive it; but the decision that grants the increase should be made only after a full examination as to all the facts. I wish to see every laborer in the country amply paid for his labor and services, but I object to seeing his wages fixed by legislation, particularly where there is no knowledge as to the justice of his claims.

BURDEN FALLS ON SHIPPER.

Railroad officials tell us that the increased cost of operation to American roads because of the recent act will approximate $60,000,000 per year. The brotherhood men admit that it will approximate $20,000,000. The general public will likely strike a balance between these figures, but in any event the increase will amount to many millions of dollars, which will come home to the American shipper—the farmer, merchant, stockman, lumberman, and manufacturer—in the shape of increased freight rates, which, in turn, will add to the already high cost of living. In controversies such as we have just witnessed the general public always bears the brunt of the burden and pays the bill.

CONGRESS ACTS UNDER THREAT.

The worst feature of the measure just passed was the manner of its enactment. The bill was rushed through both Houses of Congress without investigation or mature consideration, and practically without debate. It was rushed through under duress, under the threat of a great railroad strike. Congress had no opportunity to exercise its discretion or to say whether or not the demands of the brotherhoods are just. Congress cringed and crawled, debased itself, humiliated the country, disregarded the principle of arbitration, discredited organized labor, and made no permanent settlement of the great question at issue. Congress did, however, establish a precedent whereby any class of citizens—laboring, capitalistic, or other—may come here and, under threat of a strike or other situation involving the welfare of the country, demand hasty and improper legislation. In this respect Congress has surrendered its sovereign lawmaking power and has served notice on the country that government no longer rests upon the people's will, through their chosen representatives, but rather upon the demands of some class or group of citizens. It is a shameful spectacle to see Congress thus violating the established traditions of the country and the priceless ideals handed down by our fathers.

If government is to be a thing of worth, it must not depart from fundamental principles, even in the face of expediency. Had our fathers acted the part of cowards and weaklings instead of holding to their cherished ideals and convictions there would have been no Declaration of Independence and

no emancipation proclamation. In the hasty consideration and enactment of this bill there was more concern, both here and at the White House, over the result of the next elections than over the welfare of the next generation.

WILL LET VOTERS DECIDE.

With my convictions upon orderly constitutional government and the right of Congress to legislate without fear, duress, or undue influence, I voted against the bill just passed. If my political enemies desire to make a campaign issue out of my action, I shall take the question to the people of my district. If they sustain my position, I shall rejoice. If they do not, I shall accept their verdict manfully. There are some things that I prize higher than a seat in Congress. One of them is my self-respect—something that I could not retain had I yielded to the demands of expediency and voted for this bill.

In conclusion, I wish to quote the following editorial from to-day's issue of the New York Tribune:

FAITHFUL AMONG THE FAITHLESS.

Cowardice and demagogy trampled over principle and honor in the stampede at Washington to do the bidding of the four railroad labor unions. Congress consented to the sacrifice of self-respect, which was necessary in order to seal the President's shameful submission to the threat of a strike order.

But there was a remnant in each branch—larger relatively in the Senate than in the House of Representatives—which refused to bow to the dictatorship of the four brotherhood leaders. The 56 Republicans and 2 Democrats in the House and the 26 Republicans and 2 Democrats in the Senate who voted against a complete surrender of legislative power to a lobby sitting with stop watches in the gallery have written their names on an imperishable roll of honor.

---

## Wilson's Demand for Mexico Is Justice.

---

## EXTENSION OF REMARKS
OF
# HON. CLAUDIUS U. STONE,
OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. STONE. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD I include the following:

WILSON'S DEMAND FOR MEXICO IS JUSTICE—STORY OF PRESIDENT'S COURAGEOUS REFUSAL TO FORCE ARMED INTERVENTION UPON A HELPLESS PEOPLE.

President Wilson's faith in democracy and the unselfishness of the United States in international dealings have been so strikingly expressed in his Mexican policy that it may be said to constitute the greatest contribution which the country has made in many years to the progressive thought of mankind.

While Europe suffered the throes of the most horrible war that ever has afflicted humanity, the United States, under President Wilson's guidance, maintained peace with her stricken neighbor, holding fast to the principle that a small nation's sovereignty is entitled to the same consideration as that of a great power.

Frowning upon two elements of our citizenship who sought to compel the Government to undertake armed intervention in Mexico—that section of the property holders who wanted intervention as a measure of protecting their wildcat investments, and the politicians of the opposition who were willing to work any injustice in order to advance their partisanship—the President has steadily refused to take any course not consistent with Mexico's right to solve her own internal problems.

Two considerations have animated the President in the formulation of his Mexican policy and have compelled his adherence in it throughout his administration, namely:

The firm conviction that all nations, both the weak and the powerful, have the inviolable right to control their internal affairs.

The belief, established upon the history of the world, that Mexico will never become a peaceful and law-abiding neighbor of the United States until she has been permitted to achieve a permanent and basic settlement of her troubles without outside interference.

In applying these principles the President has been animated by a generous spirit of forbearance, inspired by the possession of superior power and by a desire to aid rather than coerce a sister Republic. Thus he has not been as ready to turn to the effective last resort of physical force to assure the protection of the rights of American citizens and to compel compliance with the demands of this Government as he might have been had Mexico been better able to protect herself. Limitations to this forbearance were fixed in his mind, however, and on three occasions it became necessary for him to disclose them. The first demonstration of the iron firmness which lay back of the President's sympathy for Mexico came in 1914, in the attack on Vera Cruz, which drove Victoriano Huerta, the insolent and murderous despot at Mexico City, from power. It was demonstrated again when interventionist conspirators crossed the American border and killed American citizens at Columbus, and, finally, when American soldiers were attacked by Mexicans at Carrizal.

The Wilson Mexican policy is of a piece with the new statesmanship which will regulate the international affairs of the world when the lessons of the European war have been learned and applied. One of the safeguards which civilization is sure to set up against a recurrence of such a war as is now being waged is an instrumentality to protect the sovereign rights of weak nations. The world is moving inevitably toward a new era wherein nations will recognize and be held to the same moral code that is now recognized by individuals. Conscience, and not the possession of superior power, will dictate a Republic's policy toward a smaller sister Republic.

In advance of the formulation of these principles into an international code and while Europe was atoning for her failure to recognize them, President Wilson has applied them directly in his conduct of American relations with Mexico. At times Mexico has transgressed the custom and practice of nations which would be applied under the mandates of the most advanced international courts, and in the absence of such mandates the United States has of necessity done its own police work. Thus it will be seen that America once again, through the operation of this Mexican policy, has arisen to the pioneer service of mankind. Thus it will be seen that when mankind begins to apply the principles which will prevent future wars this American principle of the inviolability of the sovereignty of small nations will be placed first in the code.

ALL LATIN AMERICA INVOLVED.

Our relations with Mexico have been so closely interwoven with our relations with the other Republics of the Western Hemisphere that it was impossible for the President to conduct the one without regard to the other. All Latin America looked on intently as the United States dealt with Mexico. Suspicion, which had been engendered by the long years of misunderstanding and mistrust, preceding Mr. Wilson's administration, made the Mexican policy in the eyes of our neighbors a real test of the sincerity of the friendly protestations the United States was making to all the Governments of America. The more fortunate Republics of Central and South America clearly were of the conviction that they could expect no better treatment for themselves in less fortunate circumstances than the United States would mete out to Mexico.

A clear conception of the Mexican policy is possible only when one realizes that coincidentally with the handling of the Mexican situation the President has been engaged in formulating a cooperative policy for Pan America. This policy was designed not only to promote trade relations whereby the prosperity of the United States would be increased, but also to develop a sort of international brotherhood here in this hemisphere which will serve as a model for all mankind. The Mexican policy has accomplished a great deal in this respect. It has quieted the suspicions of Latin America. For the first time in our history the Latin American Governments are at heart friends of the United States. Friendships are the most valuable resources of nations as well as individuals; and in strengthening the bonds of good-will between the Republics of this hemisphere Mr. Wilson has rendered a patriotic service of highest order.

The sincerity of the unselfish friendship of the United States was put to the test in Mexico, and as a result of the manner in which that test was met and of its effects upon our relations with other Governments, we are better prepared for he uncertainties of a future which may be troublous. Indeed, it is a far cry from the attitude of suspicion general among Latin Americans at the time of Mr. Taft's withdrawal from the Presidency to a condition of international amity in this hemisphere wherein the following important statement from Señor Suarez, the Chilean ambasador to the United States, could escape comment from the newspapers of the country, supposedly because it had ceased to be news:

Side by side with the thinker stands the statesman, who has radically changed the relations among the people in this continent and has built an American international policy of mutual esteem and cooperation in these very moments praised and applauded by the whole continent.

It is not the first time that, from the very august chair to which he has been elevated by the love and respect of his fellow citizens, the President of the United States—now in our midst—appeals to the sentiments of the American countries in behalf of the welfare and progress of our Americas. The strengthening of constitutional government

throughout all nations in the continent, the vigor and purity of our democracies, and the mutual cooperation for the defense of our national rights and privileges have been the salient features of his continental policy, and when the moment came of showing with deeds the absolute sincerity of his fraternal principles, as was the case in the unfortunate circumstances which gave rise to the mediation conference at Niagara Falls, he has without any hesitation whatever placed his authority and his influence on the side of peace and love among the sister nations.

HISTORY'S CERTAIN VERDICT.

No American whose perceptions have not been clouded by selfishness or misleading propagandas can escape a feeling of pride when the principles on which the President's policy was based are fully comprehended. It is indeed a matter of deep and sober gratification to realize that when the great intellects of the future turn back the pages of history to study the origin of the movement designed to make an end of all ambitious and greedy wars, they must add another tribute to the list which mankind has awarded America for her unselfish services.

How intense and incapable of being altered by partisan assaults must be the pride which Mr. Wilson himself feels in the contribution he has enabled his country to make to the noble ideals of mankind. It can be understood best by recalling an incident in the early days of his administration, when Mr. Wilson expressed to an inconspicuous little woman with whom he was conversing in his White House office the hope that there would be no war during his administration. That was before the outbreak of the European war and before the interventionist hydra had reared its head in America. One had to turn to history for an appreciation of war's horrors and for a contrast with the tender mercies of our day of peace. Since that time Mexico has placed a severe restraint upon the President's efforts to maintain peace throughout his administration. There have been times when war seemed almost inevitable, but each test has been met by firmness and a consistent adherence to the ideals which Mr. Wilson recognized. And so the President stands to-day, attacked as bitterly as Lincoln ever was attacked.

There have been times when the counseling of selfishness, if listened to, might have withdrawn the President from the path he has followed. Criticism and malicious partisanship have made the path difficult at times, and always there has been the probability that his personal fortunes would be served best were he to adopt the easy course of sending the American Army into Mexico. The President has not sought anything in his own behalf, however.

I am willing—

said President Wilson in reference to his Mexican critics—

no matter what my personal fortunes may be, to play for the verdict of mankind. Personally it will be a matter of indifference to me what the verdict on the 7th of November is, provided I feel any degree of confidence that when a later jury sits I shall get their judgment in my favor. Not my favor personally—what difference does that make—but my favor as an honest and conscientious spokesman of a great national convention.

It is impossible to grasp the vital significance of President Wilson's Mexican policy without a broad knowledge of conditions which had prevailed in Mexico before President Wilson was inaugurated. The Mexican problem in its present form had existed for the American Government ever since our frontier was extended to the Rio Grande. There had been peaceful periods, in which for the most part order had been maintained and international obligations fulfilled, but intermittently there had arisen provocative circumstances similar in character to those with which President Wilson has had to deal. The peace and order which was thus capable of being interrupted was a superimposed peace and order, and not a normal expression of the contentment of a self-regulated people. When the people maintained the peace it was because they were forced to do so, and not because justice reigned in the land. Thus it was that the history of Mexico, like the history of every aspiring people, pressed upon President Wilson's consideration the truth that no permanent good relations could exist between this great northern Republic and the one immediately to the south of us until she had been left free to put her house in order, however painful that process might be and whatever the demands it might make upon the forbearance of the United States. Let us summarize the historical conditions which had given rise to the Mexican trouble of the Wilson administration:

THE DIAZ TYRANNY.

Porfirio Diaz, surrounded by the old feudal lords of his feudal states—the great Spanish-Mexican landlords, mine owners, generals, and advocates—called for foreign capital in Mexico, and it came; American, French, English, German, Belgian; and it got what it came for. At first the concessions granted were reasonably fair. The privileged persons became powerful. They formed a ring called the "Friends of Diaz," and as he grew old he fell more and more under the influence of these men who controlled the natural resources of the country. They formed a political party, self-styled "Cientifico," because the program was to develop, according to modern, scientific methods, the resources of Mexico.

Railroads were built; telegraphs and telephones were installed; old mines were reopened; new mines discovered; oil was struck; lands in great tracts were cultivated and made productive; later, factories and new industries were established. Under the stress of competition for concessions the foreigners, Americans among them, bribed the "friends of Diaz" or took cientificos into business with them as partners or shareholders, and then, to hold what they had or to get more, they corrupted the little political bosses, the legislatures, and the Congress, and the courts. Mexico was more corrupt than any American State ever was, and for this reason: Not only American methods of corruption but all the corrupting arts of all countries represented by the foreign capitalists were mixed and perfected there.

Labor was cheap and good. Slow and unskilled, it was patient, willing, obedient, teachable. But principally it was cheap. A few cents, gold, a day was good pay. Thence came the trouble.

As Mexico grew rich the Mexicans grew poor.

The masters had Diaz reintroduce and extend the peonage system, under which a worker and his children were bound by debt to the land, mines, or factories. A peon who left a master could be brought back by the jefes politico (political bosses), who had all the machinery of law and the army at their call. There was no escape for the worker except when one master outbid another in bribes to the jefe politico. Sometimes, toward the end, the workers on the land or in a factory would strike, but Diaz sent his soldiers and ruthlessly cut them down. There never was a successful strike in Mexico in the days of Diaz; there were few of any sort.

The Mexican people had from the earliest times possessed land. Around each village was an ample circle of soil called "communal," which was open to any native of the community to use as he chose. And many a Mexican chose to work upon this communal land or his own little rancho rather than in the mines or on the large plantations. Some Indian tribes held in common great stretches of country and never did work for wages. It was really only the natural service of the individuals enslaved by debt who went out to work for the masters, and they had relatives and friends who, free at home, kept up the atmosphere and the hope of liberty in Mexico. Diaz took away from his people their communal lands.

His people resisted, and he had to use fraud and force. His troops had to kill off some tribes completely and break up others by shipping the most spirited of them into actual slavery in Yucatan and tropical Mexico, where they died like flies.

The grand, the underlying cause of the Mexican revolution was the will of the Mexican people to be free and independent. The dramatic setting of the first revolt shows that. The centennial of Mexico was opened in Mexico City in September, 1910. It was supposedly a celebration of the victory of Mexican independence from foreign control, but really it was a glorification of Diaz and his delivery of Mexico into foreign control. But the Mexicans understood, and on November 20, before the last of the foreign visitors was gone, the Mexican people had risen in arms, and the revolution, which has been going on all the five years since, was begun.

MADERO'S FAILURE.

A poor little rich man's son led it—Francisco I. Madero. One of a large, rich, and very powerful Mexican family, he had been educated in Europe and the United States, and, inspired with the "radical notions" of the cafés and the labor unions, he had been going about Mexico preaching to the peons and workers at the crossroads and street corners "land, liberty, and free elections, and no reelections to a constitutional government." Diaz and his friends, Madero's own family, regarded Pancho Madero as crazy, and they let him go on as harmless. But the people heard him gladly; they followed him; and by the beginning of 1911 Mexico was afire with a new hope. Madero had to flee to the United States, but on May 10 the revolutionists took Juarez. Madero entered the city, and on May 26, Diaz, who knew his people, resigned and departed from Mexico City in an armored train to Vera Cruz, whence he sailed away in a foreign battleship to Europe.

The tyrant was gone; the tyranny remained.

The "friends of Diaz," who did not know the people, the cientificos, stayed. They made De la Barra, one of themselves, provisional president, but Madero, at the head of his revolutionary troops, entered Mexico City and became the actual head of the Government. He was selected titular president on October 2. Meanwhile, however, the cientificos, the Madero family leading, surrounded Madero and possessed him. Venustiano Carranza, one of Madero's original leaders in the North, went to

Mexico City, saw what was happening, and he warned President Madero.

Just as some of them helped start Madero's revolution, so the foreigners in Mexico assisted at his downfall and caused the other revolutions. There were exceptions; some Americans favored Madero and his ideals, but generally the foreigners hated the revolution and all its works and words, and so they joined, both openly and privately, with Huerta and the little group of privileged cientificos in their plot for a "palace revolution" against the revolution of the people.

The plot was not to set up Huerta but a more "regular" government with a man like Felix Diaz as the dummy president. Diaz's name was used to gain foreign credit. But Huerta was in charge. A friend of Madero and his general in chief, he was also in command of the conspirators. He had the city thrown into disorder; started mock battles which, however, ran the streets with blood, for the fighters thought the battles were real, and they killed one another by the hundreds. Decane Tragica—the 10 tragic days of that pitched battle within the City of Mexico were indeed a reign of terror, and Huerta, in command of both sides, ordered Madero's loyal regiments to march up to the machine guns of the enemy until they were killed or mangled in the streets. When Huerta thought the city had enough of terror he stopped the bloody sham, and on February 18 arrested President Madero, Madero's cabinet, and his loyal brother, Gustavo. And he shot Gustavo that night. The next day, by the false pretense that it was for the good of Mexico, he obtained the resignations of President Madero and Vice President Suarez. He did not pass on the power as the plotters had planned, however, but he proclaimed himself dictator. Two days later, on February 22, Madero and Suarez were both treacherously shot "while trying to escape"—a fiction repeated so often in Mexico as to deceive no one.

Huerta made use of his control of the Federal army at Mexico City to establish himself in the seat of the murdered President Madero. Then he sent this message to President Taft:

I have overthrown the Government, and henceforth peace and order will reign.

TAFT WATCHED AND WAITED.

President Taft did not alter the policy he had evolved for dealing with Mexico. It was a policy of cautious waiting, the character of which was emphasized by Mr. Taft in March, 1912, when he threw the weight of his administration against an intervention resolution introduced in the Senate as a result of the killing of a number of American citizens by Mexicans at the Arizona border. Mr. Taft's views as to America's duty were not changed by the events occurring at Mexico City in the closing days of his administration, as was shown by his utterance at Washington February 26, when he said:

We must not in a case like Mexico—for it differs from the Central American Republics—take such action as shall give them to believe that we are moved by selfish purposes, or arouse them to opposition to us. We must avoid in every way that which is called intervention, and use all the patience possible, with the prayer that some power may arise there to bring about peace throughout that troubled country. * * * But I have no sympathy—none at all, and the charge of cowardice does not frighten me—with that which prompts us for purposes of exploitation and gain to invade another country and involve ourselves in a war, the extent of which we could not realize, and the sacrifice of thousands of lives and of millions of treasure.

A precedent still more important than the Taft policy existed for policy Mr. Wilson was to follow. It was the policy followed by President Lincoln in a similarly unsettled period of Mexico's history. That policy was enunciated by Mr. Lincoln through this communication from his Secretary of State:

For a few years past the condition of Mexico has been so unsettled as to raise the question on both sides of the Atlantic whether the time has not come when some foreign power ought, in the interest of society generally, to intervene—to establish a protectorate or some form of government in that country and guarantee its continuance there. You will not fail to assure the Government of Mexico that the President neither has, nor can ever have, any sympathy with such designs, in whatever quarter they may arise or whatever character they may take on. The President never for a moment doubts that the republican system is to pass safely through all ordeals and prove a permanent success in our own country, and so be recommended to adoption by all other nations. But he thinks also that the system everywhere has to make its way painfully through difficulties and embarrassments which result from the action of antagonistic elements which are a legacy of former times and very different institutions. The President is hopeful of the ultimate triumph of this system over all obstacles as well in regard to Mexico as in regard to every other American State; but he feels that those States are nevertheless justly entitled to a greater forbearance and more generous sympathies from the Government and people of the United States than they are likely to receive in any other quarter.

AN INHERENT PROBLEM.

Thus the stage was set for President Wilson. Thus developed one of the most burdensome legacies that one American President ever handed down to another. The first decision which the President was called upon to make was between the recognition and the nonrecognition of Huerta. The facts were clear and beyond partisan argumentation.

On the one hand, the President could recognize the dictator, thus throwing the tremendous moral support of the United States upon his side, and, so to speak, clamp his Government down upon the aspirations of the Mexican people. Some of the President's advisers, who believe that the United States should be guided only by consideration for its selfish interests, thought this the wise thing for him to do. They believed that the United States could well afford to sacrifice Mexican liberties in order to facilitate the establishment of an orderly period in which American lives and American property would be safe. Even that justification has been removed, however, by subsequent disclosures, for it is known now that Huerta would have had the greatest difficulty in maintaining his control of the government even if he had had the moral support of the United States. His hold upon the government was a slender one, and he was incapable of dominating the outlying States, particularly those of the north, where the radical thought of Mexico flourished.

On the other hand, the President could refuse the recognition and support of the United States. He could take the position that the United States was unwilling to interfere in Mexican affairs in behalf of him who proclaimed, "I have overthrown the Government." He was free, if he chose to do so, to await developments and to maintain an attitude of preparedness to serve the sister Republic when opportunity should offer itself.

It was a clear choice between right and wrong, a clear opportunity to avoid unpardonable commitments. The President did not hesitate. Only eight days elapsed after his inauguration before he was ready to announce to the world the decision he had made.

Cooperation is possible—

Said the President in a formal statement issued from the White House—

only when supported at every turn by the orderly processes of just government based upon law, not upon arbitrary or irregular force. * * * We can not have sympathy with those who seek to seize the power of the Government to advance their own personal interests or ambitions. We are the friends of peace, but we know that there can be no lasting or stable peace in such circumstances. As friends, therefore, we shall prefer those who act in the interests of peace and honor, who protect private rights and respect the restraint of constitutional provisions.

It was the service of notice that the United States Government, under President Wilson's administration, would not recognize Huerta or any other ruler in Latin America whose accession to power was made possible through the treacherous murder of his constitutional predecessor.

ENTER CARRANZA.

In a little while the revolutionary movement was revived under the leadership of the governor of Coahuila, Venustiano Carranza. From the first it prospered. The Mexican people were prepared to rally around any leader who raised revolt against Huerta, whom they called "the foreign-chosen traitor" and in whom they saw tyranny restored to power.

In May, 1913, President Wilson sent John Lind as his special representative to tender the good offices of the United States to Mexico. He felt that as the friend of Mexico the United States ought not to hold back from offering its aid, and that our position as Mexico's nearest friend in the regard of the nations of the world made this duty encumbent upon us. Lind sought to persuade Huerta to agree to a free election, in which Carranza's followers and the Huertistas were to take part on a basis of equal suffrage; Huerta was to bind himself not to be a candidate. President Wilson pledged himself through Lind to recognize and to give all practicable assistance to the administration to be constituted by the proposed election and to facilitate a settlement in every way honorable and consistent with international right.

Huerta insolently rejected these proposals, and the President, while deploring his attitude, felt that the United States was not called upon to do more at that time. He declared in an address to Congress August 27, 1913, that but a little more time was needed in order that the situation might work itself out. Meanwhile, he thought it the duty of the United States to show "what true neutrality will do to enable the people of Mexico to set their affairs in order again."

The succeeding weeks established overwhelmingly that the dictator, proclaimed as the "iron handed," was incapable of maintaining peace and order in Mexico and of fulfilling the international obligations of a government. None realized this better than Huerta himself. He was too wise to believe that he could continue to rule unless he had foreign support or unless some abnormal condition arose which might unite all Mexico behind him. With the support of the United States denied

him, he set out to create the condition which he believed would make his control durable.

It was to stir the Mexican people by his insolence toward the United States and, if necessary, to provoke intervention.

DICTATOR'S REMOVAL ESSENTIAL.

Huerta's gradual weakening was reported to the Congress of the United States by President Wilson in his annual message delivered December 2, 1913. In that message the President reiterated his belief that there could be no certain prospect of peace until the dictator had surrendered his usurped authority. The President's information regarding the condition of affairs in Mexico justified his assertion that Huerta had forfeited the respect and the moral support even of those who at one time had been willing to see him succeed. "Little by little he has been completely isolated," said the President. "By a little every day his power and prestige are crumbling and the collapse is not far away. We shall not, I believe, be obliged to alter our policy of watchful waiting, and then, when the end comes, we shall hope to see constitutional order restored in distressed Mexico by the concert and energy of such of her leaders as prefer the liberty of their people to their own ambitions."

Meanwhile, Huerta and his underlings omitted no opportunity to try the patience of the United States. A series of insulting incidents, which had included offenses against the sovereignty of the United States, culminated April 9, 1914, when a quartermaster and a boat's crew from the United States ship *Dolphin* were arrested at Tampico by officers of Gen. Huerta's army and paraded through the streets of the Mexican city. Two of the men were taken into custody while aboard the *Dolphin's* boat, which had the flag of the United States at her bow and at her stern. The American sailors were released quickly and the officers responsible for the arrest apologized. Gen. Huerta himself later expressed regret.

The arrest was regarded by Admiral Mayo, in command of the American naval vessel at Tampico, as an affront to the flag, and the admiral demanded a full salute in atonement for it.

President Wilson informed the Congress on April 20 that he had upheld Admiral Mayo's demand, and had felt it his duty to insist "that the flag of the United States should be saluted in such a way as to indicate a new spirit and attitude on the part of the Huertistas."

The President was moved to this conclusion by a consideration of the other offensive acts of the Huertista officials. These had included the arrest and temporary imprisonment of a mail orderly from the battleship *Minnesota* at Vera Cruz, and the withholding of an official dispatch from the State Department to the American Embassy at Mexico City by the authorities of the Mexican telegraph service.

SEIZURE OF VERA CRUZ.

The President felt that these affronts had been perpetrated by Huerta's representatives in retaliation for the failure of the United States to recognize the dictator. When Huerta ignored the American ultimatum demanding a salute to the flag, President Wilson ordered the seizure of the port of Vera Cruz by the American naval forces then in Mexican waters. The seizure occurred on April 21. It was accomplished after the death of 19 American sailors and marines, and approximately 100 Mexicans. The action was directed solely against Huerta and the forces he controlled. The President made it clear that the undertaking to which he applied the American forces was not war against Mexico, but a stroke against the individual and his followers who had perpetrated insults against the United States. Huerta's insolence had become intolerable. The President's forbearance and his kindly sympathy for the Mexican people could not justify him longer in permitting a continuance of Huerta's insolence. It should be remembered that always in the President's mind there had been reservations as to the extent of the sacrifices which the United States Government could make in order to avoid armed clashes with one of the offending Mexican factions. The purpose behind the Vera Cruz expedition was much the same as that in the President's mind later when he ordered Gen. Pershing to lead an expeditionary force into northern Mexico to break up the Villista faction, which was behind the Columbus raid. In both cases the President felt himself eminently justified in utilizing the power of the United States in crushing the faction of Mexicans who were deliberately and with sinister designs engaged in the commission of intolerable wrongs against the United States.

The American forces were not sent into Vera Cruz to compel a salute to the American flag. When Huerta refused the President's ultimatum, he created a need that more complete reparation be given for his offenses. That was the sort of reparation which the President was intent upon procuring. In a word, it was to break the waning power of the dictator and to bring his bloody reign to an end, since in no other way could normal international relations be restored. Estoppage of the delivery of a shipment of arms on board the German steamship *Yperanza*, consigned to Huerta, which was due at Vera Cruz the morning of the seizure, was but an incidental consideration in the order for the capture of that port. The fact that arms later reached the Mexicans through another port is irrelevant to the weighing of the Vera Cruz incident, for it did not alter the certainty that the President's main purpose would be realized.

Although the American naval and military forces were prepared for it, the President did not order a campaign into the interior of Mexico. The seizure of the principal port in Huerta's possession the President regarded as all that was needed at that time.

A. B. C. POWERS MEDIATE.

When the United States had been in comparatively peaceful possession of Vera Cruz nearly two weeks, the Governments of Argentina, Brazil, and Chile applied a sudden, sharp test to the sincerity of the friendship which Mr. Wilson had been expressing for the sister Republics of the Western Hemisphere. Possibly fearing that if the United States went further in its Mexican expedition their own sovereignty might become involved, the Latin-Americans proposed to mediate the differences between the United States and Huerta. President Wilson recognized the vital importance of the mediation proposal to our relations with the Latin-American Governments, and with a vision of the golden opportunity offered for winning the friendship and confidence of Latin-America he accepted. His acceptance did more than anything that had occurred in many decades to convince the Latin-Americans that the United States had no designs upon their territories.

Huerta, in view of the desperate straits in which he found himself, also accepted the mediation, but while the A. B. C. conference was being held at Niagara Falls his power crumbled completely away. July 7, 1914, he fled from the capital and sailed into exile, followed by the opprobrium of all his patriotic countrymen.

Venustiano Carranza had been the civil leader of the revolutionary movement which had come into control of the government at Mexico City upon Huerta's withdrawal. His chief military commander was Francisco Villa, who had made a brilliant record as a strategist and a leader of the Constitutionalist soldiers. They were jealous of one another, and Villa's recalcitrance was intensified by his belief that Carranza intended to relegate him to a subordinate position not in keeping with his achievements as a leader of the victorious army. Weeks passed, however, without an actual break between the two, and with Huerta gone, the United States had no reason to retain possession of Vera Cruz, so on November 23, 1914, the port was evacuated and turned over to the representatives of the new government at the Mexican capital.

The Constitutionalist movement did not fulfill the bright promises which it had held out for the future of Mexico. Dissension and discord broke out within its ranks. The jealousy and envy which Villa and Carranza entertained for one another came to a head in a convention at Aguascalientes, which had been called to choose a provisional President pending a general election. Defeated in this convention, Villa withdrew and went to northern Mexico to organize the soldiers in that region who were loyal to him. Open warfare between the two divisions of the Constitutionalists followed, although Carranza remained in control of the capital and gradually gained other advantages over his opponent.

CARRANZA'S RECOGNITION.

For a year the administration held aloof, playing no favorities in the matter of its control of shipments of arms into Mexico and hoping that the opposing factions would bring order out of chaos without any activities on the part of the United States. A year sufficed to disillusion the President and his advisers, however. Thereupon the administration consulted with the six ranking diplomatic representatives of the Latin-American countries as to the practicability of recognizing a government in Mexico. The Latin-American representatives and Secretary of State Lansing invited both Villa and Carranza to participate in a conference designed to adjust their differences. The manner in which this invitation was received decided the conferees of the United States and the Latin-American countries. Villa's followers accepted, apparently without reference to the wishes of one another or their chieftain. Carranza's followers deferred to his wishes in the matter and indicated that they represented a united front. To the United States and the six Catholic countries engaged in the peace conference the inference was plain that the side which gave evidence of such superior organization,

unity, and harmony held out the brightest promise for Mexico's salvation. As a result, Carranza was recognized as head of the de facto government of Mexico by the United States and the countries with which we were advising.

Thereafter Carranza's campaign against Villa was more successful. Gradually Villa's forces disintegrated into independent bands, and the territory he controlled diminished. He became little more than a leader of bandits, who skulked in the mountains and in the thinly populated areas of Northern Mexico, where they were able to elude the forces of the de facto government.

Villa, hopeless of making headway against Carranza as things stood, adopted Huerta's policy of attempting to provoke American intervention. He hoped by arousing their national pride to rally to his standard many of Carranza's soldiers and to present himself to the ignorant Mexican people in the guise of their would-be savior from a foreign invader. The bandit leader went about his work with deadly earnestness. January 12, 1916, he caused the murder of 17 American citizens near Piedras Negras, Mexico. March 9 he personally led a raiding band across the border and attacked the town of Columbus, N. Mex., which was guarded by a detachment of American Cavalry.

The conscience of the American people demanded that the perpetrators of this outrage be given swift punishment. Villa's conspiracy to provoke intervention had fallen short of its goal, but he had brought about a situation wherein it was evident that the United States could not rely upon Carranza's soldiers, who were few in number along the international boundary, to suppress the brigands of northern Mexico. The President dealt with this situation in the same firm manner in which he had dealt with Huerta's offenses against American sovereignty. He ordered an adequate armed force under Gen. Pershing to pursue Villa into Mexico and to crush or disperse his lawless bands. Pershing's instructions also were to get Villa, if possible, dead or alive.

PROMPT PUNISHMENT.

The Pershing column was ready in 10 days. It had to be a complete little army, equipped for any sort of emergency, for the danger existed that once on Mexican soil our forces might, through misconception of its purpose, be attacked from other quarters than by the followers of Villa.

President Wilson took all available means to convince the Mexican people that the Pershing expedition was directed solely against the persons responsible for the Columbus raid, and by careful handling he reduced to a minimum the possibilities of a rupture with the Carranza Government. Formal assurances were conveyed to Carranza that the sovereignty of Mexico was not to be trenched upon. So favorable was the impression made at Mexico City that the chief of the de facto government suggested the negotiation of a reciprocal agreement to provide for the pursuit of raiders across the border by either Government. In that tense period also the President reaped the harvest of the good seed which had been sown throughout Latin-America by his policy of cooperation. Carranza was encouraged to defer his efforts to procure the withdrawal of the Pershing expedition by the attitude of the Latin-American Governments and by the official utterances with which the President and the State Department followed up their first assurances to the Mexican Government. The propriety of the American policy was emphatically set forth in a statement made public by Secretary of State Lansing, March 13, in which it was said that "what is now being done is deliberately intended to preclude the possibility of intervention."

Meanwhile, the soldiers under Gen. Pershing engaged in a vigorous pursuit of Villa and his outlaws. Unassisted by the Carranza soldiers, the hard-riding American cavalry clashed frequently with bands of Villistas and drove them into the hills. Villa was wounded and sought refuge in some mountain retreat where he was enabled to avoid capture.

The pursuit had taken the American forces more than 300 miles into Mexican territory. As time passed without the capture of Villa, the Mexican populace became more and more restless, and it became evident that they regarded the expedition as an affront to their national pride. Events gradually assumed a more ominous aspect. The increasing suspicions and complaints of the Mexican people brought such pressure to bear upon Carranza that it looked as if his control of the executive authority would be lost unless he took steps to bring about Pershing's withdrawal. Carranza himself was forced to assume an attitude which seemed to indicate a total lack of appreciation of the patience and forbearance which the American Government had displayed in the past. He opened a series of interchanges which began with inquiries as to how long the American troops were to stay in Mexico, and culminated in a demand for their withdrawal. An attempt was made in May to work out an agreement for the joint patrol of the border through a series of conferences between Gen. Obregon and Gen. Scott, the Chief of Staff of the United States Army. Carranza repudiated the arrangement which these officers had agreed upon and returned to his note writing. In April word was conveyed by Gen. Trevino to the officers of the American forces that if they moved in any direction save toward the American border, their movement would be regarded as an unfriendly act. Pending some determinations of the questions which Carranza had raised, the American troops were warned to avoid clashes, if possible, and to keep in mind "the single purpose of the expedition." The President was wholly intent on avoiding any mischance which might subject the future of relations between Mexico and the United States to its full influence.

THE CARRIZAL EPISODE.

In March a body of American troopers had clashed with the inflamed inhabitants of Parral. The tension produced by this incident and by the attitude of the Mexican Government was increased to the breaking point on April 12, when an engagement occurred at Carrizal between a detachment of American Cavalry, under Capt. Boyd, and a considerable number of Carranzista soldiers. Capt. Boyd was in pursuit of bandits. The engagement followed efforts by the Carranzista commander to prevail upon Boyd to turn back. The Mexican soldiers have steadily charged that Boyd provoked the fight through disobedience to his instructions. The American Government has never conceded the justification of this charge.

It looked like war for a while. Impassioned by the reports of the death of American troopers at Carrizal, the American people were prepared to make short shrift of Carranza's explanations. To the public mind there appeared but one proper method of dealing with the situation; it was to hold the Mexican Government to strict account for the acts of its soldiers, if it assumed responsibility for these acts. It was the course the President decided upon.

Delaying only long enough to get official information as to what had occurred, the President sent an ultimatum to Carranza, demanding the release of the American soldiers captured at Carrizal and the return of all their equipment and the property of the United States taken with them. At the same time he ordered the National Guard to the Mexican border and prepared to enforce his demands unless Carranza assented to them voluntarily.

The crisis was robbed of its acuteness by Carranza's yielding to the American ultimatum. He did release the prisoners and returned them to American territory, thus turning back the relations between his Government and the United States to their former status.

The interventionists were not satisfied with what had been done. The old cry for a settlement of all our difficulties with Mexico upon a warlike basis was renewed. The surface aspects of the situation had been changed by the tension resulting from the Columbus and Carrizal incidents, but the President was capable of realizing that the fundamental issues were unchanged.

PRESSURE FOR WAR.

There was a powerful pressure for war—a terrible war—by a well-armed, powerful Nation against an unarmed, bankrupt people exhausted by five years of civil strife, but who still retained enough of patriotic feeling to unify them against an invader. It was the old, old question whether the United States should impose a peace on Mexico; whether, for the sake of the interests of a few of its citizens, it should permanently suppress Mexico's upreaching toward freedom and self-government. What killing irony it would have been, even in these trying circumstances, for this custodian of mankind's ideals—herself composite of all the peoples of the earth—to say to Mexico, "The germ of self-government in you is incapable of fructifying. Your revolutions lead only to new revolutions, and not freedom and peace as did the revolutions of France. You must submit to a dictator; you must be governed by an iron hand, and the United States will see to it that you are."

President Wilson and the Democratic administration, contemplating this prospect, said, "No; there will be no glory in such a war." The President thought of war in Europe, of the clear prospect for a Pan American understanding with all our neighbors, the Latin Americans, and of its message of peace to Europe through agreement not to intervene in and exploit the little nations of the world. The President defied those who were pressing him to intervene in an epoch-making speech delivered at New York in June. In that speech the President told of the prayers that were being conveyed to him from unknown men and humble women, "Mr. President, do not allow anybody to persuade you that the people of this country want war with anybody." And he declared himself the spokesman of such

people. Then he epitomized his defiance of those who were threatening to make political misfortune the price of his failure to bring on a war in his declaration that, regardless of the imminence of the presidential election, he was resolved to play only for the verdict of mankind.

Mr. Wilson's speech was immediately registered in a changed attitude on the part of the Government at Mexico City. It paved the way for negotiations for a settlement of all existing differences by a joint commission to be composed of three Americans and three Mexicans, to whom might be referred the problem of protecting our border first, and, second, of clearing up and clearing away all the causes of misunderstanding between the United States and Mexico, to the end that has been the President's aim, always, everywhere—peace.

Thus the story of the Wilson-Mexican policy closes at it began, a story of peace—peace. War if necessary, but not for mere misunderstandings; not for lack of patience, and certainly not for exploitation.

**The Star-Spangled Banner and the Germans in America.**

SPEECH

OF

# HON. WILLIAM P. BORLAND,

OF MISSOURI,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. BORLAND. Mr. Speaker, the 12th of this month marks the one hundred and second anniversary of a brilliant victory of American arms at one of the critical periods of our national history. The defense of Fort McHenry and the repulsion of the British attack upon Baltimore was one of the few bright spots in the dark years of our second war with Great Britain. This battle occurred September 12, 1814, just 102 years ago. The war up to that time had been a series of straggling battles in which the great military power of England had not been exerted with any strength of purpose, and in which the Americans had lacked a general plan of defense.

In the summer of 1814 an American raid into Canada, which was probably unauthorized by the American Government, was seized upon by the British as a pretext for retaliation. The British Government sent a well-organized fleet and a well-equipped land force to the Chesapeake Bay with the avowed purpose of laying waste cities and destroying private property in retaliation for the harmless raid into Canada. This expedition, under Gen. Ross, advanced upon Washington, and finding it unprotected, entered the city and destroyed its public buildings with a vandal hand. The combined land and naval forces of the enemy then descended upon Baltimore. The situation was critical. Baltimore was not only a rich commercial city, it was the seat of the principal maritime trade of the Nation. The real design of the British was to separate the Northern States of the Union from the Southern States.

The Northern States had shown so much hostility to the war that the British believed that a sudden blow separating them from the South would drive them into an alliance with Canada. The Southern States were loyal to the Federal Government and its policy, but they were without the equipment of men, money, and ships possessed by the commercial ports of the North. Their loyalty could not express itself in substantial support. If the British had succeeded in their plan the situation of our struggling country would have been extremely unfortunate. The citizens of Baltimore, upon the approach of danger, rallied with great gallantry and interposed a bold resistance to the enemy. In the assault by the land forces of the British their commander, Gen. Ross, was killed and with him went much of the spirit of the attack. Fort McHenry then became the key of the situation. The British Admiral Cockburn undertook to run past the fort for the purpose of attacking and destroying the city. The fort was defended by an invincible German-American, Maj. George Armistead. His resistance was so stubborn that it completely surprised the British commander. For more than 30 hours the British hurled shells, bombs, and torpedoes into the fort. Instead of reducing the fort into submission the American defender made a spirited reply whenever a British ship would venture within range. It is said that no grander spectacle has ever been witnessed in the annals of war than this prolonged bombardment of Fort McHenry. All through the night the booming of the guns, the roar and shriek of the shot, and the bursting of the shells resounded over the little fort. It was enveloped in a dense volume of smoke lighted by the lurid flashes of the cannon and the sudden burst of the shells. It was from this scene that the inspiration was drawn by Francis Scott Key for his song, "The Star-Spangled Banner," the national air of all America. Key was a young lawyer who was imprisoned on one of the British ships. He saw and heard the fateful preparations for the bombardment of the fort and the sacking of the city. His heart sank as he thought of the fate in store for his country. Through the long night of vigil he watched with anxious eyes the terrific assault upon the fort. When the first light of dawn began to penetrate the pall of smoke he strained his tired and fevered eyes to see whether the fort was still holding out. As the rising sun showed him the Stars and Stripes still waving over the little fortress he burst into the song which has become immortal.

> Oh, say, can you see by the dawn's early light
> What so proudly we hailed at the twilight's last gleaming?

This scene has been dwelt upon so often by lovers of American history that I need do no more than to recall it to your minds. What I wish to emphasize is one of the side lights upon this great historic event—the fact that the gallant defender of the fort, Maj. George Armistead, was a German-American. We have heard much of the part played by the Puritans of New England and by the cavaliers of Virginia in the development of our infant Nation, but we often overlook that strong, rich strain of German blood which, fitting in as it did in Pennsylvania, New York, New Jersey, and Maryland, in the very center of the Colonies, formed a sort of backbone of colonial life. Little has been said about the tremendous strength added by the Germans and the conspicuous part which they played both in making us a free people and in preserviag our national life. There never has been a time when the Germans were not a military people. From the days when Arminius, whom the Germans call Hermann, beat back the victorious legions of Cæsar from the right bank of the Rhine and put the first check to the proud sweep of Roman arms down to the time when Gen. Custer, the sturdy little German-American, went down, revolver in each hand, in the fateful battle which closed his brilliant career in winning the West for civilization, the Germans have had a long line of military heroes. The German immigration to the American Colonies began very early. October 6, 1683, Pastorius and his little band settled in Germantown, Pa. From then on an increasing tide of Germans entered the wilderness of the New World. In 1710 the horrible devastation of Germany caused by the Thirty Years' War sent thousands of Germans to this country. They endured without flinching the privations of leaving their ancestral home and crossing to a strange land under a foreign flag, surrounded by people of a different language and all the handicaps of pioneer life. They prospered in their new home by the qualities of thrift, industry, and perseverance. They seem to have established cordial relations with the Indians by friendliness and honest dealing. Among all the figures of colonial life there seem to have been but two who had the complete confidence and respect of the red men. One was William Penn, the Quaker, and the other was Conrad Weiser, the German colonist. Upon Weiser's tact and knowledge of Indian character and the respect which they had for his honesty of purpose the Colonies were compelled to rely. He protected the settlements from the secret attacks of the French, who inflamed the hostile savages.

In 1755, the year of Gen. Braddock's defeat, the German frontiersmen in Maryland and Pennsylvania organized a regiment which they called the Royal American Regiment, and which from then on was the chief protection of the frontier. The American Revolution was supported by the Germans with their lives and their property, although the revolution was begun and fostered by the English colonists. The hearty cooperation of the Germans in the cause of American freedom is very remarkable, considering the separate place to which their language and customs had assigned them among the English-speaking colonists. The revolution is brilliant with the names of German heroes. The fiery little Von Steuben, who swore at his soldiers and then put his arms around their necks; the calm, determined Baron De Kalb, with his wonderful grasp of military strategy; the preacher, Muhlenberg, who preached to his little congregation on freedom and then threw off his pastor's gown and appeared before them in a captain's uniform, placed himself at the head of 300 men and marched out of the church to join the Continental Army. We become so interested sometimes in hearing about our Pilgrim Fathers that we overlook the sacrifices of our German fathers.

Fortunately for our country, the Germans continued to come after our Nation had achieved its independence. The wars of Napoleon, who trampled human rights under foot in pursuit of his mad ambition, drove thousands of Germans to this new land to seek a home. When the second war with Great Britain came the Germans had made themselves a permanent part of our na-

tional life. Maj. Armistead was but one of the many heroes of that race who bore arms for their adopted country. The succeeding years of our national history has but strengthened this German element and established it the more firmly as a permanent part of American life. The troublous times in Germany in 1848 sent over a fresh immigration. These newcomers were in many respects the highest type of emigrants America has ever received. Most of them were scholars of more than usual ability. They were writers, speakers, editors, and statesmen. They came largely from the great student body of Germany. Germany was even then taking its place as the scientific and classical university of the world. To-day the American flag floats over 12,000,000 Germans and the imprint of their genius is seen upon every department of industrial, intellectual, social, and political effort.

One of the strongest traits of the Germans is their love of home. The German is always a home builder. Every German family is a distinct economic and social gain to the community. They establish themselves firmly and root themselves to the soil. They love to acquire land and to improve it to its highest productive capacity. The sweetest word in the German language to German ears is "home," a word which seems to be entirely absent from the Latin languages. The saddest word in their language is the one which signifies homesickness. The fragmentary literature which has been collected about the German colonists in America is filled with this pathetic idea of homesickness. With all the persecution of war and feudal misgovernment their thoughts still centered around their dear Germany. The name of their Fatherland was rarely spoken or written without the adjective "dear." The persecutions which would drive such a people from their ancestral home to the perils and hardships of the wilderness must have been extreme.

The Germans are great lovers of family life and all the little celebrations and holidays of the year that are based on family ties. Their literature is full of this delightful trait and in this they have added to and strengthened a similar trait in the English and American character. The German kindergarten and all the child life and literature which the Germans have created has found eager acceptance among their fellow Americans.

One of the strongest traits of the German character which made them such magnificent pioneers in reclaiming the wilderness and building up a new nation was their sturdy independence, thrift, and self-reliance. A German is always thrifty; he always makes the most of his opportunities; he always lives within his own resources, and he makes a specialty of attending to his own business before he undertakes to attend to anybody else's. These qualities of self-reliance have made the Germans a powerful force in this new country. The qualities of thrift have put into their keeping much of the industrial wealth of the Nation. Their willingness to keep within their own rights has kept them out of all squabbles and conflicts with other races and has clothed them with a dignity which commands respect from their neighbors. It has seldom happened that any difference of race, language, customs, or religion have brought the Germans into conflict with their neighbors, although these things have been a fruitful source of discord among other people. The qualities of German thrift have been a valuable asset to the American Nation. Recently I was looking over the report of a bank examiner of my own State of Missouri, and I found to my surprise that while the Germans number only about 10 per cent of the population of that State, more than 60 per cent of the bank directors bore unmistakable German names.

Of all the racial traits of the Germans the most powerful influence from a political and social standpoint is their love of human freedom. They believe in both religious and political liberty. Their first advent to this country was caused by political oppression and religious intolerance. The Germans never acquired slaves and in some cases they separated themselves from their neighbors more on this ground than on any other political principle. The first reported instance of the German colonists in America raising their voice on questions of public policy was their protest against the slave trade. Their Dutch cousins were not so conscientious on the subject, and neither were their English neighbors at that time. This sturdy love of freedom cropped out again in the earliest Declaration of Independence preceding the War of the Revolution. The first demand that the colonies should be free is known in our American history as the Mecklenberg Declaration. This was before the Continental Congress had met at Philadelphia to declare the colonies free and independent States.

The German love of personal and political liberty has strengthened greatly the American Nation. It has contributed much toward the success of our experiment of free government. I do not know that any historian has attempted to trace the influence of this sentiment upon American political life. Some German-American scholar ought to undertake this task. In my own judgment we owe much to our German cousins, not only for their part in developing our country but in establishing it upon a sound political basis. America owes to her German son the credit of having settled the wilderness, developed the country, and established civilization in all the pioneer days of our country. She owes him the credit of having defended her flag, established her freedom, and repelled her enemies. She owes him the credit of having created her wealth, built up her industries, and broadened her commerce. She owes him the credit of having endowed her with intellectual life, musical and artistic taste, and scientific research. She owes him credit for much of the literature, life and light of childhood and the home. But above all she owes him credit for his steadfast adherance to the cause of human liberty and political and religious freedom which has made the true greatness of the American Nation. May our 12,000,000 Germans increase and prosper. This is their country. They began with its earliest struggles and they have shared its hardships. They are entitled to the rewards of its success. It was over one of the victories of their heroes that we unite in singing "The Star-Spangled Banner, O long may she wave o'er the land of the free and the home of the brave."

---

**Flood Sufferers.**

---

# SPEECH

OF

# HON. JOHN L. BURNETT,

OF ALABAMA,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, August 2, 1916.*

The House had under consideration the Senate joint resolution (S. J. Res. 160) appropriating $540,000 for the relief of flood sufferers in the States of North Carolina, South Carolina, Georgia, Alabama, Florida, and Mississippi, and for other purposes.

Mr. BURNETT. Mr. Speaker, the disastrous floods in Alabama, so far as the ones with which I am most familiar, occurred some four or five weeks ago. The rains were continuous for a week or 10 days, and the Alabama, the Tombigbee, the Coosa, and other rivers of that State became very much swollen and submerged all the adjacent low country. The members of the Alabama delegation realized that unless they secured an investigation and a report by the War Department they would not be able to make out their case, and we at once asked the Secretary of War to take the matter up with the officials of the War Department in Alabama, and engineers were sent into the various flooded districts and made investigation and report, and in that report they embrace that portion of Georgia that is contiguous to the Coosa River and its tributaries, which were in the same condition as the rivers of Alabama. The report to the Secretary of War on the flooded conditions in Alabama is printed in yesterday's CONGRESSIONAL RECORD of the Senate proceedings. I will read that report:

WAR DEPARTMENT,
*Washington, July 29, 1916.*

Hon. JAMES HAY,
*Chairman Committee on Military Affairs, House of Representatives.*

SIR: I have the honor to bring to your attention facts concerning the effects of recent floods in the South, and to urge that appropriate action be taken by Congress looking to the temporary relief of persons that have been rendered destitute.

The areas affected include parts of the States of North Carolina, South Carolina, Georgia, Alabama, and Mississippi. The conditions in the various districts of these States, concerning which complaints of suffering and destitution have been made, were investigated by the Engineer Department, and the reports received are transmitted herewith. These reports show that in some sections there is extreme destitution now existing that calls for immediate relief, and, moreover, that in many sections the destruction of the crops has been so extensive that great suffering is liable to occur before the full crops of another year can be harvested, unless relief of some kind can be afforded in the meantime.

The people most affected are the small tenant farmers. These people usually cultivate the land on shares, or in some form by which practically all the crop is mortgaged or pledged before it is harvested, and sometimes even before it is planted, so that the credit of these small farmers is exhausted.

In some cases, as on the Alabama River, the situation is made more desperate by the fact that this loss was preceded by two years of unfavorable conditions which left not only these tenants but the landlords in much more straitened circumstances than usual. In some cases the landlords are still able and willing to give aid, but in many cases are unable to do so, as their own property is so heavily pledged that they can not obtain further credit. In some localities local agencies have been affording relief, but their means are about exhausted, and great suffering will result unless some outside assistance is given.

In general, the homes of the flood sufferers have not been affected, so that there is no need for the issuance of tents.

There are two measures of relief that appear to be called for. One is to supply seeds so that the devastated lands can be planted with quick-growing crops to provide food for the population and animals. It is stated, for instance, by the district officer at Montgomery, Ala.,

that turnips, rape, collards, peas, beans, and sorghum can still be grown in the flood district on the Alabama River, and he estimates that there are 4,955 families in that district that should be supplied with seeds, at a cost of about $13,000. Another method of relief is to supply the destitute with some form of employment at a moderate rate of pay, which will enable them to secure provisions and other necessaries until they become self-supporting, either through the growing of new crops or other private employment.

It appears advisable to issue some rations but only for the period necessary for the planting of seeds referred to above. After this, the women and children can care for the crops and the men should be offered work on the county roads, under the supervision of Federal officers and in cooperation with the local officials, at a rate of pay somewhat less than current wages. Under these conditions it is probable that only those in need who can not otherwise supply means of support would apply for employment, and the number to be aided in this manner would tend to diminish as the men secure more lucrative employment in other ways. In some cases it will be practicable to employ some of the destitute in clearing drift, overhanging trees, etc., from navigable streams, but the main reliance apparently should be placed upon road work as affording the quickest and the most generally useful form of relief work. Such emergency work on roads would not, of course, be as effective as if the improvements were carefully planned in advance, but some good results should be accomplished and the principal end would be achieved of requiring work in return for funds expended.

Two estimates have been made covering necessary relief work. One for the first period of 30 days to meet the most urgent and immediate needs, and one for such time thereafter as some form of relief work must be continued. These estimates are as follows:

| | |
|---|---|
| For first 30 days | $240,000 |
| For subsequent time | 300,000 |

It is probable that some of the local communities affected can assist in the relief work outlined above, but there are doubtless some where the destruction of property has been so great that they will be unable to participate in the provision of the necessary funds.

Should Congress deem that Federal aid should be extended, it is recommended that an appropriation of $540,000 be made, and that its application along the lines indicated be authorized, contingent upon the consent and cooperation, as far as practicable, of local authorities. The necessary Federal supervision of relief work can be undertaken by this office, or such other Government bureau as may be selected by Congress for the purpose.

Very respectfully, NEWTON D. BAKER,
*Secretary of War.*

Mr. ADAMSON. Will the gentleman yield?

Mr. BURNETT. Yes.

Mr. ADAMSON. I wish to say at that point that the Chattahoochee River has been dealt with in a separate report which the gentleman from Alabama has not deemed necessary to read. While the territory affected by the flood is not as extensive as that on the larger Alabama and Coosa Rivers, the suffering is just as intense and the damage inflicted has been just as severe on a smaller number of people, and I am glad to see that the resolution is so drawn as to cover all that affected territory and all the people who have suffered real loss in that State.

Mr. MANN. Will the gentleman yield?

Mr. BURNETT. Well, I was going further to answer the gentleman's question. In regard to what action has been taken I desire to call attention to a telegram from the governor of Alabama, in which he says—and, by the way, this is dated the 24th, and a subsequent investigation of the engineers shows greater damage than that spoken of by the governor. Gov. Henderson says in the telegram that great distress has been occasioned in almost every portion of Alabama by reason of the unprecedented floods in the State. He says that in Dallas County alone 2,300 families, mostly negroes, have been made homeless and destitute.

In another telegram which I have here he says that he has issued a proclamation calling on the people in the State to aid those in distress from the floods.

He further says that the State has no funds with which to relieve the sufferers.

In this connection I desire to say that if the legislature were to be called together, if I remember correctly, it would require some 30 days or more to assemble it, and the time that would intervene before the legislature could render aid would destroy to a very great extent the emergency conditions and render aid useless. Many people would suffer by the delay.

As stated by the War Department, only certain crops, mostly the hay crops, can be grown now. Not only that, Mr. Speaker, but our delegation, fearing that as a result of this flood typhoid fever would break out all over that country, took the precaution a few days ago to go to the Secretary of War and ask him in regard to sending antitoxin typhoid serum to that section. He referred us to the Surgeon General's Office, and it was there stated that they would be glad to supply a reasonable quantity of serum. We telegraphed the governor at once and asked him to take the matter up with his health officers in Alabama and have them make investigations, and day before yesterday we received a telegram that typhoid fever had broken out through this overflowed region, and asking for serum. The War Department at once dispatched such quantities as they could spare, and in his telegram the governor says that more will be needed. That is only one section of the country to which attention is called, but other sections, according to the report of the engineers, are almost as bad. The tenants in the southern part of the State are mostly colored people, and are in especially bad condition.

On the upper waters of the Coosa and its tributaries, where my district lies, the sufferers are mostly white tenants, and many of them are under mortgages. The low price of cotton two years ago almost bankrupted many people in our State. Then a great part of the southern section of the State was infested last year by the boll weevil, which almost finished everything. The landlords have suffered in those ways as well as the tenants. They have not only lost the rents by reason of the overflows, but they have lost the advances that they have made to their tenants to live on. So these landlords are in poor condition to relieve the distress.

The reports made in the Senate yesterday by Senator OVERMAN, of North Carolina, and reports made here by gentlemen from other sections of the South show that the conditions are exceedingly bad in other States as well as in Alabama.

Mr. Speaker, gentlemen who are not familiar with our rivers and with the condition of our people can have but little idea of the distress brought about by these floods. I will give you an extract from a letter of Mrs. Pattie Stone, a constituent of mine, a most excellent lady, and a writer of considerable note in our section.

She gives the following touching and pathetic incident, which is but one of many of similar nature:

FARILL, ALA., *July 28, 1916.*

DEAR MR. BURNETT: I am so glad to read from the papers that you know what the recent flood has done to the farmers of Coosa Valley and that you want Government to help the ones who are suffering from this flood, so please pardon me for making a suggestion in behalf of the ones who are entitled to Government's help. Ask Government to come to the aid of each individual who has planted and worked with his own hands crops of corn and cotton that has been under water and ruined by this 1916 July flood.

Take as an illustration our neighbor, Jim Candler, who is a renter on the Davis place. Mr. Candler has a wife and eight small children. In a sense, the four younger ones are babies. In the heat and frost year after year the four older children help their father make his crop, and this year he has lost it in the overflow of the Coosa. Talk about "Child life in the factory." It is a picnic compared to the life of the barefooted, pale-faced children who make the bulk of the cotton crop of the South.

Mr. BURNETT, these are the children who are crying to Government now. In their names make the appeal for help. Nothing has ever been done for these suffering children.

Yours, sincerely, (MRS.) PATTIE STONE.

It continues to rain, making it almost impossible to get in late crops, as we had expected.

A letter from Tatum & Clifton, of Cedar Bluff, Ala., says:

I will try to tell you something about our condition on Coosa and Chattanooga and Little Rivers. We have lost all of our bottom corn and part of the cotton. We would like to know if there is any possible chance of our Government to help us in some way, of money or provisions or for you to present our case before your honorable body and send a man here to investigate the damage done to our fair land on account of high water. We have numbers of farmers that haven't got a bushel of meal or corn. We merchants have already furnished men on all the rivers all they could possibly have paid if the water had not got the crops. So we are ruined already, and we can't see how we can possibly furnish these men until they can make another crop. Please see if you can get our Government to send a man here to see what can be done for us. There are several families who have left home, and have nothing to go back to when the water goes down. So we call on you to do all in your power as our Representative to help our country in some way.

Laster Bros., a firm of most excellent gentlemen of Cedar Bluff, Ala., write me a letter to the same effect. In fact, I have scores of letters from reputable citizens of Cherokee County, Ala. stating the deplorable conditions existing in the overflowed sections of that county.

Mr. Speaker, whenever the distress signal has been hung out by our brethren, whether from the North, East, or West, my colleagues in Congress from the South have always been ready to answer.

When the Macedonian cry was sent to us from the flood sufferers in Ohio we answered their cry. When the little city of Salem, Mass., was swept by the fire fiend we responded to their call. When San Francisco was wrecked by fire and earthquake we hurried to the relief of her stricken people. We did not wait to ask whether the sufferers were from north or south of Mason and Dixon's line, but our only query was, "Are they in distress? Do they need our help?"

Mr. Speaker, I am happy to state that without a single exception every Democrat and Republican Member of Congress from every State in this great Union is now ready to aid my stricken people. To the leader of the Republican minority I acknowledge our grateful appreciation of his splendid aid. One objection from him, or from any other Member of this House, would have prevented the consideration of this resolution; but no objection has been made. May the Spirit of Him who rides upon the storm and who holds the waters in the hollow of his hand reward you who have come to our relief. [Applause.]

**Operation of the Rural-Credit Law.**

## EXTENSION OF REMARKS

OF

## HON. ADDISON T. SMITH,

OF IDAHO,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. SMITH of Idaho. Mr. Speaker, while I voted for the Federal farm-loan act, usually referred to as the rural-credit law, I regret that its provisions are not more liberal and I fear it will be a great disappointment to the majority of borrowers who desire to secure a loan on their farms at a lower rate of interest than they are now compelled to pay, regardless of the claims of administration leaders. In addition the requirements are such that in many communities it will be difficult to organize local farm-loan associations, in the absence of which the prospective borrowers would be very greatly handicapped in securing a loan. While numerous statements have appeared in the press regarding the operation of the law, none has come to my notice which is more explicit and succinct than the one which appeared in a recent issue of the journal, the Farming Business.

Those who desire to avail themselves of the advantages of the rural-credit law are making many inquiries in regard to its operations, and it is believed that the following statement will acquaint them with the provisions of the law and enable them to determine whether or not they desire to avail themselves of its provisions.

Only members of a local farm-loan association may borrow money under the provisions of this law. In order to become a member of such an association one must live upon and operate a farm owned by him, or he must be about to purchase such a farm home which he will occupy and operate. These specifications prevent the absentee landlord and the speculator in farm lands from borrowing money through these new channels.

A member of one of these associations must borrow through it not less than $100 and can not borrow more than $10,000. He shall not be charged more than 6 per cent a year on this loan, and may be charged less than that. The loan must be secured by first mortgage on the farm land owned, lived upon, and operated by him as a farm home; the mortgage must be for the full amount of the loan and must not exceed one-half the value of the land, plus 20 per cent of the value of the insured permanent improvements located upon the land. The loan may be made for a term of 40 years. Interest and principal of the loan shall be paid in a number of equal installments, the number of these annual installments to be equal to the number of years for which the loan is made. The accompanying table will illustrate how a loan of $1,000 would thus be paid off in 20 years.

The money secured by such a loan may be used for any of the following purposes, but may not be used for any other; in case it is used otherwise the local association through which the loan was secured may reduce the amount of the loan and force the borrower to pay in at once the amount of the reduction, or it may force the payment of the entire loan:

1. To pay for land for agricultural use.
2. To purchase equipment, fertilizer, and live stock necessary for the proper and reasonable operation of the mortgaged farm.
3. To provide buildings and various improvements of the farm lands which are mortgaged.
4. To liquidate the indebtedness of the owner of the land which is mortgaged.

The essential features of procedure in the organization of a local farm-loan association for the purpose of borrowing money under the terms of this law are as follows:

1. Get together at least 10 persons living in your community who are eligible, according to the facts set forth in the earlier part of this discussion, to secure loans under this law. These persons must each intend to secure a loan of not less than $100 nor more than $10,000, and the total amount of loans desired by these persons must equal at least $20,000, but may amount to more than that.

2. Draw up articles of incorporation after a general plan which will be prepared in the near future by the newly appointed Federal Farm Loan Board. All the persons desiring to become members of this association must sign these articles of incorporation.

3. Elect a board of at least five directors from among those who have signed the articles of incorporation. These directors shall then elect a president and a vice president from among its members, a loan committee of three from among the members of the association, and shall also elect a secretary-treasurer, who may be, but need not be, a member of the association. The secretary-treasurer is the only officer who shall receive a salary, and the amount of that salary shall be determined by the board of directors.

4. The loan committee shall investigate all applications for loans to be made by the prospective members and the security which is offered for mortgage, no committeeman being permitted to pass upon a loan on land in which he has personal interest.

5. Each member shall pay to the secretary-treasurer an amount of money equal to 5 per cent of the loan which he wishes to secure, this amount to be applied to the purchase of stock in the loan association when finally and permanently formed, these shares of stock to have a par value of $5 and to be sold at par. These shares of stock shall be held by the association as additional security for the repayment of the loan to be received.

6. The board of directors shall then make affidavit to the effect that each of the subscribers to the articles of incorporation is the owner, or is about to become the owner, of farm land which is eligible as security for a loan under the provisions of the law; that the loan desired by each person is not less than $100 nor more than $10,000, and that the total amount of loans desired by the associates is not less than $20,000; that the affidavit is accompanied by an amount of cash equal to 5 per cent of the total amount of loans desired, this sum to be used in purchasing for the association capital stock in its Federal land bank; that a temporary organization of the association has been made by the election of a board of directors, a loan committee, and a secretary-treasurer who signs the affidavit. This affidavit and the required amount of cash, which has already been paid in by the members for the purpose of purchasing stock in their own associations, shall be forwarded to the Federal land bank controlling their territory.

7. The directors of the Federal land bank shall then send a representative to investigate the solvency and the character of the applicants and the value of the lands offered as security for their loans. If the report of this representative is satisfactory, they shall then forward the application with their formal recommendation to the Federal Farm Loan Board.

8. If the Federal Farm Loan Board shall approve the application, it will issue a charter to the local association and forward it to it through the Federal land bank through which the application was made. This charter will specify the territory in which this association may make loans. On receipt of this charter the association is authorized and empowered to receive from its Federal land bank the sums of money which are to be loaned to its members.

9. The local association shall then issue the money to its members on receipt from them of first mortgages on the lands which have been approved as security for the loans for which they have applied.

After such a local association has once been established it may make loans to other persons living in the territory specified in its charter. On receipt of an application for a loan from some person not a member, the loan committee will investigate the character and solvency of the person, determine that the money is to be used for the purposes specified in the act, inspect and approve the land offered as security and recommend the loan to the board of directors. The applicant must pay into the treasury of the association a sum equal to 5 per cent of the loan which he desires to secure, or this may be deducted from the total loan when the money is issued to him. This sum is to be used in payment for capital stock in the association, the applicant thus becoming a member. The board forwards the application, together with a sum equal to 5 per cent of the face value of the loan, to its Federal land bank. The bank sends out a salaried inspector to investigate the applicant and his land, and on receipt of his written approval the bank shall forward to the local association the sum desired. Then the association will issue him the money on receipt of a first mortgage on the property he offered as security for the loan. The officers of the association shall then indorse the mortgage, thus guaranteeing its payments as due, and forward to the bank which furnished the money for the loan.

Each member of such an association shall be liable for its debts and undertakings to the extent of twice the value of his capital stock in his association. The association must indorse and become liable for the payment of all mortgages taken from its shareholders by its Federal land bank.

Each association may accept deposits from individuals and pay interest on them at not to exceed 4 per cent a year. These deposits shall be used to purchase bonds of the Federal land

bank of its district, bearing not to exceed 5 per cent interest. This limited banking power of the association makes it possible for it to earn money with which to pay expenses not covered by fees which it is permitted to collect, and to earn dividends in addition to those received from its stock in its Federal land bank. Until such time as these sources of income are sufficient to meet its expenses, the association is empowered to make assessments upon its members pro rata according to their holdings of association stock.

After the act has been in operation one full year, and no loan association has been formed in his territory, one may secure loans from the Federal land bank of his district through local agents approved by the Federal Farm Loan Board. These agents are to be banks, trust companies, mortgage companies, and savings institutions chartered by the State in which they operate. As compensation for such services they may receive actual expenses incurred in making the loan, and each year for the life of the loan receive not to exceed one-half of 1 per cent of the unpaid portion of the principal of the loan, this latter sum being paid the agent by the Federal land bank from the payments on the loan collected by it. Thus the cost of the loan to the borrower is no greater when he gets it from the Federal land bank through his local bank than it would have been had there been a local association in his community. Remember, that for the first year loans can be had only through a local farm loan association, the purpose of this requirement being to stimulate the organization of such associations.

*Table of payments for $1,000 loan.*

| Annual periods. | Total annual payment. | Interest at 5 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $80.24 | $50.00 | $30.24 | $969.76 |
| 2 | 80.24 | 48.48 | 31.75 | 938.00 |
| 3 | 80.24 | 46.90 | 33.34 | 904.67 |

## The Legislative Record of the Wilson Administration.

### EXTENSION OF REMARKS

OF

### HON. DAN V. STEPHENS,

OF NEBRASKA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. STEPHENS of Nebraska. Mr. Speaker, the wonderful record of legislative performances of Wilson's administration is better understood by an examination of the following classification of the principal laws passed during the last four years. This record falls naturally into two divisions: First, the period of reformation or creation of the necessary machinery of government, namely, the reform of the rules of the House of Representatives and the election of Senators by direct vote of the people. Without these two great reforms in the legislative machinery reform legislation was impossible. The second division is a record of laws passed affecting the welfare of all the people. A glance at the outline tells the story quickly, and it is a wonderful story, too. Search the records from George Washington down to the date of the beginning of this reform, when "Cannonism" was overthrown by a Democratic House, with the aid of Progressive Republicans, and be convinced that these four years show for the first time in our history that the masses of the people are really in control of their Government.

Never before that good year of 1910 had the people's voices been loud enough to reach intrenched privilege snugly resting behind the breastworks of the rules of the House of Representatives, and behind State legislatures that chose their Senators. For a hundred and twenty years many good laws have been added to our statutes, but in the main the good results to the people leaked through the upper crust of the privileged class, and the benefits to the people were largely incidental. On the other hand, there were many laws specifically enacted for the benefit of special classes and interests and directly opposed to the interest of the country generally. But in the whole period there were practically no laws enacted specifically for the benefit, directly and only, of the great masses of the people. The line of demarcation was the year 1910. From that day to this the change in the character of legislation is nothing short of a revolution. The legislation enacted since 1910 for the common folks is beyond the dreams of the most optimistic reformers. All the reform legislation of the hundred and twenty-one years preceding does not compare even favorably with the legislation of this short period. If there are any who doubt it, I challenge them to make the comparison and be convinced.

Now look at this brief outline of the laws passed:

THE REFORMATION IN LEGISLATIVE MACHINERY.

(a) Reform of rules of House of Representatives in 1910 destroyed the last trenches of special privilege in that body, and the people took control.

(b) The constitutional amendment providing for the election of United States Senators by direct vote of the people enabled the people to control the Senate for the first time in our history.

THE PERIOD OF PERFORMANCE THAT FOLLOWED.

(a) Legislation of national character.

1. New method of raising revenue through a tariff, income tax, inheritance tax, and tax on munitions of war, as contrasted with the method of raising all the revenues on the consumption of the people, forcing the poor man to pay the same as the rich man to the support of the National Government.
2. The establishment of a nonpartisan tariff commission, which will result in taking the tariff out of politics.
3. Antidumping legislation, designed to prevent wholesale dumping of pauper-made products on our shores at a price ruinous to our own producers.
4. A law empowering the President to refuse clearance to ships of belligerent nations from our ports when such nations discriminate against our commerce or tamper with our mails.
5. Legislation establishing a Bureau of Foreign and Domestic Commerce for studying foreign conditions of markets and showing our producers how to reach them with products of our farms and factories.
6. The Federal reserve bank act, protecting the country from money panics and securing to business an elastic currency, and a stability it had never known before in our history.
7. The Clayton antitrust law, that adapts the old, stiff Sherman law to new conditions and makes its enforcement practicable. It prevents interlocking directorates.
8. The Trade Commission law, that enables the Government to regulate business without destroying it. It is designed to correct abuses and aid business to obey the law, and by a system of reports prevents the growth of monopoly.
9. The creation of a merchant marine, by providing that the Government construct and buy ships and operate them if necessary in its efforts to establish service between our ports and the Central and South American Republics and other countries where adequate service does not exist in order that our surplus products may find a market.
10. Parcel-post legislation, that created a people's express between their homes and the market.
11. The legislation for national defense, that completely reorganizes the Army and provides for the second greatest Navy in the world. Cleveland's administration built the "White Squadron," our first fleet after the Civil War, and which Roosevelt sent around the world, and Wilson's administration has authorized the greatest ships ever built by man. The national defense is well provided for.
12. Legislation providing for a commission to cooperate with foreign countries looking toward disarmament after the European war is over, and to stop the useless competition of nations in naval building.

THE PERIOD OF PERFORMANCE THAT FOLLOWED—Continued.

(a) Legislation of national character—Continued.

13. Law providing for a mediation and conciliation commission to arbitrate disputes between capital and labor.
14. Laws providing for the conservation of water-power sites, forest and mineral lands, owned by the people, and for the construction of a Government railroad in Alaska, and the leasing of the lands by the Government and returning of the profits to the National Treasury.
15. A law preventing the sale of habit-forming drugs.
16. A law providing for Government war-risk insurance during the European war, in order that our products may move freely to foreign markets.
17. A law compelling the publication of campaign expenses both before and after election.

(b) Legislation for farmers.

1. Agricultural extension act, which brings the college to the farm, where Government experts demonstrate on the farm, with the whole family, including the farm hands, as students, just how scientific information can be turned into money.
2. The warehouse act, providing for Government supervision of warehouses, in order that certificates may be issued on imperishable products of the farm, to furnish a basis for credit at the banks, affording farmers the opportunity to hold grain for better market.
3. A law establishing a bureau of markets, to aid in an intelligent distribution of farm products.
4. A law providing for grading grain under Government supervision, thus assuring an impartial grade and affording an opportunity to sell by grade before shipping the grain.
5. A law providing for a hydroelectric nitrate plant, designed primarily to furnish nitrate for Government powder, but all surplus to be sold direct at cost to farmers for fertilizer, this being the most needed element in soil building.
6. A law appropriating a large sum for the eradication of hog cholera, the ravages of which costs this country nearly $100,000,000 a year.
7. A law creating 12 great land banks, designed to furnish credit to the farmers and finance all farm loans at a very low rate of interest, known as the rural-credit act.
8. A law providing for national aid to States for building good roads. In the next five years the Government will appropriate $85,000,000, which is to be duplicated by the States to stimulate road building.

(c) Legislation for labor.

1. A law was passed establishing a Department of Labor in the President's Cabinet, giving for the first time in our history to those who work with their hands a voice in the administration of our Government.
2. A law freeing our sailors from bondage as well as those of other countries who make our ports. Ever since men learned to sail ships, this class of labor has fared no better than slaves in actual bondage, and this law is their "break of day."
3. A law freeing children from labor in factories by preventing their products from entering interstate commerce. It will now be more profitable to employ men and let the children grow up.
4. A law providing for a just compensation to Government employees who are injured or killed in the line of duty.
5. A law providing for a Children's Bureau in the Department of Labor to investigate infant mortality, birth rate, orphanage, juvenile courts, desertions, dangerous occupations, accidents, and diseases of children.
6. A law providing for an industrial investigation looking to the conservation of our best resource, the citizen, by throwing light on abuses and recommendation of legislation.
7. A law preventing the manufacture of the white phosphorous match and other poisonous matches which produced the loathsome disease known as "phossy jaw."
8. A law preventing the abuse of courts in issuing injunctions in labor disputes without a proper showing justifying such action beyond question.

THE PERIOD OF PERFORMANCE THAT FOLLOWED—Continued.

(c) Legislation for labor—Continued.

9. A law establishing an eight-hour day on practically all work done for the Government of the United States.
10. A law establishing the eight-hour day on all railroads engaged in interstate commerce.
11. A law providing for a Bureau of Safety Appliances, designed to remove causes for railroad accidents.
12. A law preventing the importation of pauper-made goods.
13. A law extending the Public Health Service and looking to the eradication of infantile paralysis and other dread diseases.

---

## "Americanism."

---

### EXTENSION OF REMARKS

OF

### HON. DUDLEY DOOLITTLE,

OF KANSAS,

IN THE HOUSE OF REPRESENTATIVES,

*September 4, 1916.*

Mr. DOOLITTLE. Mr. Speaker, the American people believe in fair play. The person or the newspaper that practices deception will sooner or later be found out and repudiated. I had hoped I should not feel it necessary to say anything of this kind again this year to clear up misstatements, either of misinformed persons or of unreliable professional politicians and the ultrapartisan subsidized press.

*I have no controversy with the man or woman who honestly differs with me, but I would make sure his or her source of information is reliable, and not tainted by subsidized, hostile newspapers and professional politicians.*

In 1914 the tariff was the chief bone of contention and the subject of much misinformation, deception, and false publication.

This year, if I have been able to discover what it is that partisan leaders and biased newspapers are trying to make into an issue, I should say it is to induce the people to believe that the country is in a bad way, both at home and abroad, because of the so-called "incapacity" of the Government as run by this administration. Let us look into this manufactured issue a little.

First let us get straight on the condition of the Treasury. THERE IS NO DEFICIT. The surplus of receipts over expenditures for the last fiscal year, ended June 30, 1916, was $78,737,810.11, and the total net balance in the Treasury was $174,965,231.97, the largest since 1908.

I shall state some facts that bear on the "issue" and shall ask some very proper questions in return. I will not attempt to enumerate all or even the major number of things accomplished by a faithful, hard-working Congress and President, who have had more and larger matters to tackle and settle than have been surmounted in all the years since Abraham Lincoln and the Union Armies freed the slaves and preserved the Union.

The currency and banking laws have been made anew from stem to stern. The Government itself now controls the currency, and not the national banks. In the midst of a time when 14 nations of the earth are at war no money stringency is here. *Banks at this very moment are actually reducing the interest rate to the borrower, and interest on real estate loans is the lowest in the history of the country.* Was it "incapacity" that put this law on the statute books?

Times are good; prices paid our farmers for their products are good; wages are the highest ever known; any man who wants to work can have a job; working conditions are much better and are improving constantly. The war has added an abnormal demand for the products of our farms and factories, and *only 8 per cent of our huge exports are war munitions.*

May I ask what the professional partisan critics of the record of the administration would repeal, or not do, or what would they substitute? *Anybody can tear a watch to pieces, but a competent person is required to put one together.*

I can name some important things a certain former governor, Supreme Court justice, and now candidate for President has done that this administration would not have been likely to do.

I do not believe that this administration would have vetoed the 2-CENT FARE BILL, but Gov. Hughes did.

I do not believe that this administration would have vetoed the bill that placed MEN AND WOMEN SCHOOL-TEACHERS ON THE SAME SALARY BASIS where they did the same work, but Mr. Hughes as governor of New York vetoed it.

I do not believe that this administration would have concurred in the Supreme Court DECISION AGAINST THE DANBURY HATTERS, whose HOMES were subjected to levy and SHERIFF'S SALE to pay judgments rendered against these employees for damages claimed by their employers because the men struck and REFUSED TO WORK, but committed NO VIOLENCE; but Justice Hughes concurred in this decision.

This administration has made impossible any more such harsh interpretations by courts; the Clayton antitrust law expressly exempts labor unions and farmers' organizations from its provisions, announcing to all mankind that human labor is not a commodity for exploitation and speculation.

I know that this administration would not have defeated the ratification of the INCOME-TAX AMENDMENT; but Gov. Hughes defeated it temporarily when he sent his fateful message to the New York Legislature urging its defeat.

I do not believe this administration would have vetoed the "full crew" bill for railways, but Governor Hughes vetoed it.

Would they repeal the currency and banking law I have just mentioned, known as the Federal reserve act? This measure was a party pledge and passed by this administration; it received votes from all parties so satisfactory were its conditions.

FEDERAL RESERVE LAW.

H. R. 7837, Sixty-third Congress, first session. Conference report adopted in House December 22, 1913, by vote of 298 to 60; 245 Democrats voted yes; 2 Democrats voted no; 53 Republicans voted yes; 58 Republicans voted no. (See p. 1477, permanent RECORD.) Passed Senate December 19, 1913. Yeas 54, nays 34. (See p. 1230, permanent RECORD.) Signed by President Wilson December 23, 1913.

Would they repeal the Underwood tariff law with its income-tax feature in it?

UNDERWOOD TARIFF LAW.

H. R. 3231, Sixty-third Congress, first session. Conference report adopted in House September 30, 1913; 250 Democrats voted yes; 1 Democrat voted no; 5 Republicans voted yes; 103 Republicans voted no. (See p. 5818, temporary RECORD.) Passed Senate September 9, 1913, and signed by President Wilson October 3, 1913.

This law may require some amendment, and the country will have the services of an expert nonpartisan Tariff Commission to guide it. This commission is provided for in the new revenue bill, which also *increases the tax on large incomes and taxes profits on war munitions and estates of $50,000 or over to defray preparedness expenses.*

REVENUE BILL.

H. R. 16763, Sixty-fourth Congress, first session. Passed House July 10, 1916; 200 Democrats voted yes; no Democrat voted no; 39 Republicans voted yes; 139 Republicans voted no. (See p. 12362, temporary RECORD.) Now pending in the Senate.

Amendments have been offered in the Senate that will give the President power to retaliate against any country that "blacklists" our business firms; to withhold clearance papers from any vessel that refuses a cargo at an American port bound for a neutral port or cargo of noncontraband if ship be not already loaded; to stop commerce with any nation that tampers with our mail. I believe these amendments in some form will become a part of the law.

Would the professional faultfinder repeal the Trade Commission law that is rendering such good service that the American National Live Stock Association and the Kansas State Live Stock Association, together with thousands of cattle feeders and meat consumers, have *asked that it undertake the regulation of the meat packers, and which task it is about to commence?*

FEDERAL TRADE COMMISSION LAW.

H. R. 15613, Sixty-third Congress, first session. Conference report adopted in House without roll call or division. (See p. 14943, permanent RECORD.) Passed Senate August 5, 1914. Yeas, 53; nays, 16. (See p. 13318, permanent RECORD.) Signed by President Wilson September 26, 1914.

Would the same prejudiced politicians and the subsidized press repeal the child-labor bill?

CHILD-LABOR BILL.

H. R. 8234, Sixty-fourth Congress, first session. Passed House by a vote of 337 to 46, February 2, 1916; 169 Democrats voted yes; 44 Democrats voted no; 168 Republicans voted yes; 2 Republicans voted no. (See p. 2174, temporary RECORD.) Reported to Senate April 19, 1916. Passed Senate August 8, 1916. Signed by President Wilson September 1, 1916.

Or the

SAFETY OF RAILWAY EMPLOYEES.

S. 3769, Sixty-fourth Congress, first session. Passed House April 28, 1916, without roll call or division. (See p. 7947, temporary RECORD.) Passed Senate April 20, 1916, without roll call. (See p. 7427, temporary RECORD.) Signed by President Wilson May 4, 1916.

Or the

BUREAU OF LABOR SAFETY.

H. R. 155. Sixty-fourth Congress, first session. Passed House January 19, 1916, without roll call or division. (See p. 1424, temporary RECORD.) Pending in Senate.

Or the

WORKMEN'S COMPENSATION LAW.

H. R. 15316, Sixty-fourth Congress, first session. Passed House July 12, 1916, by a vote of 285 to 2; 145 Democrats voted yes; 1 Democrat voted no; 140 Republicans voted yes; 1 Republican voted no. (See p. 12577, temporary RECORD.) Now pending in Senate.

Would the hired critics repeal and put to naught the efforts to help the old soldiers, their widows and their children? Would they defeat our efforts to provide sustenance for dependent families of our soldiers who have been called to guard the Mexican border from marauding outlaws? *Would they push these men over the line into Mexico to wage war on that poor, weak, sick, and troubled country?*

COMPENSATION TO CERTAIN FAMILIES OF SOLDIERS.

H. R. 16734 (now contained in the Army appropriation bill), Sixty-fourth Congress, first session. Passed House July 1, 1916. The vote was 297 to 2. One Democrat and 1 Republican voted no. Passed Senate August 24, 1916. Signed by President August 29, 1916.

Or the

INDIAN WAR PENSION BILL.

H. R. 655, Sixty-fourth Congress, first session. Passed House February 16, 1916, by a vote of 221 to 108. (See p. 3079, temporary RECORD.) Passed Senate May 9, 1916, without roll call. (See p. 8677, temporary RECORD.) Now in conference.

Or the

SPANISH WAR WIDOWS' PENSION BILL.

H. R. 54, Sixty-fourth Congress, first session. Passed House February 16, 1916, without roll call or division. (See p. 3061, temporary RECORD.) Pending on Senate calendar.

Would these carping professional politicians, who say the administration is without capacity to accomplish anything, repeal the farm-loan bill?

FARM-LOAN BILL.

S. 2986, Sixty-fourth Congress, first session. Passed House May 15, 1916, by a vote of 295 to 10; 186 Democrats voted yes, no Democrat voted no; 108 Republicans voted yes, 10 Republicans voted no. (See p. 9037, temporary RECORD.) Passed Senate May 4, 1916—yeas 57, nays 5. (See p. 8387, temporary RECORD.) Signed by President Wilson July 17, 1916.

Or the bill

TO PREVENT GAMBLING IN FARM PRODUCTS.

Amendment to H. R. 12717, Sixty-fourth Congress, first session. Passed House May 2, 1916, as amendment to Agricultural appropriation bill. Vote on amendment was 107 to 21 on division. (See p. 8246, temporary RECORD.) Passed Senate July 12, 1916. Signed by President Wilson August 11, 1916.

Or the

WAREHOUSE BILL.

Amendment to H. R. 12717, Sixty-fourth Congress, first session. Passed House May 2, 1916, as amendment to Agricultural appropriation bill. The vote was 286 to 42; 163 Democrats voted yes; 11 Democrats voted no; 125 Republicans voted yes; 31 Republicans voted no. (See p. 8247, temporary RECORD.) Passed Senate July 12, 1916. Signed by President Wilson August 11, 1916.

Or the

GRAIN-GRADES BILL.

H. R. 12717, Sixty-fourth Congress, first session. Passed House May 2, 1916, as an amendment to Agricultural appropriation bill without roll call or division. (See p. 8246, temporary RECORD.) Passed Senate July 12, 1916. Signed by President Wilson August 11, 1916.

Or the

LEVER AGRICULTURAL EXTENSION BILL.

H. R. 7951, Sixty-third Congress, second session. Conference report adopted in House May 2, 1914, without roll call or division. (See p. 7646, permanent RECORD.) Passed Senate Feb-

ruary 7, 1914, without roll call. (See p. 3130, permanent RECORD.) Signed by President Wilson May 8, 1914.

Or the

GOOD-ROADS BILL.

H. R. 7617, Sixty-fourth Congress, first session. Bill passed House January 25, 1916, by a vote of 282 to 81; 163 Democrats voted yes, 13 Democrats voted no, 128 Republicans voted yes, 68 Republicans voted no. (See p. 1688, temporary RECORD.) Passed Senate May 8, 1916, without roll call. (See p. 8562, temporary RECORD.) Signed by President Wilson July 11, 1916.

*Would they tie up in port what few merchant ships we have, unable to get insurance on hull or cargo because of the high premium charged by private and foreign marine insurance companies?* We gave American ships Government insurance at reasonable cost.

WAR-RISK INSURANCE LAW.

S. 6357, Sixty-third Congress, second session. Passed House August 29, 1914, by a vote of 230 to 58. One hundred and ninety-one Democrats voted yes; no Democrat voted no; 39 Republicans voted yes; 56 Republicans voted no. (See p. 14449, permanent RECORD.) Passed Senate August 21, 1914, without roll call. (See p. 14086, permanent RECORD.) Signed by President Wilson September 2, 1914.

Would the corporate interests influence the narrow partisan leaders to play back into the greedy hands of foreign shipowners and private corporations by repealing the American merchant-marine law commonly known as the ship-purchase bill?

SHIP-PURCHASE BILL.

H. R. 15455, Sixty-fourth Congress, first session. Passed House May 20, 1916, by a vote of 211 to 161; 194 Democrats voted yes; no Democrat voted no; 16 Republicans voted yes; 161 Republicans voted no. (See p. 9488, temporary RECORD.) Passed Senate August 18, 1916.

And provision for "preparedness," concerning which many people are greatly interested, has been amply made. Let us hope we may never have to use it; but if we should, then the hope of my good friend, whose letter I shall read, shall have been fulfilled:

AMERICUS, KANS., R. F. D. 2,
*March 12, 1916.*

Hon. DUDLEY DOOLITTLE, *Washington, D. C.*

DEAR SIR: I am for Wilson's brand of preparedness for five special reasons, and they are five sturdy boys who call me Daddy. Young jayhawkers, every one of them, but men by and by and with enough patriotic blood in their veins, I am sure, to spring to their country's call when needed. Give them a fighting chance with guns, ammunition, and equipment, so if they must lay down their lives the enemy will have paid the cost in advance. And, Friend DOOLITTLE, us hayseed farmers want your farm-loan bill. Keep boosting.

Yours, truly, STEVE BURCH.

*Would the paid disturbers of national peace have us at war with Mexico and with Germany or any other country?* Do the American people want war? Diplomacy has but two weapons—words and deeds; words mean negotiation, deeds mean war. Peace with honor is what the country wants, and, thank God, we have it.

To the membership of this House and to the people of our beloved Republic I put the candid, sober question, Has not the administration considered well and wisely the matters of domestic concern and skillfully guided the gigantic questions of foreign emergencies?

I ask as a final question, Would the professional, spy-glass critics whose business it is to hunt for "issues" and trouble prevent the greatest railroad strike in history, or would they subject the country to business paralysis, untold damage to shippers, enormous losses to railways and employees, and dire calamity to the public?

EIGHT-HOUR LAW FOR CERTAIN RAILWAY EMPLOYEES.

Passed House September 1, 1916, by a vote of 239 to 56; 169 Democrats and 70 Republicans voted yes; 2 Democrats and 54 Republicans voted no. Passed Senate September 2, 1916, by a vote of 43 to 28; 42 Democrats and 1 Republican voted yes; 2 Democrats and 26 Republicans voted no. Signed by President Wilson September 3, 1916.

I favored the Clark amendment to include all railway employees in the eight-hour law—the telegraphers already had it. The question may be asked: Why was not all labor considered. The answer is, of course, that the legislation was an emergency measure enacted in great haste to prevent a national calamity—the strike, and that Congress has no authority over any concern that is not engaged in interstate business. Some railroad companies say they can not afford it—22 railroad companies already have the eight-hour day under State laws and are prospering, without bluffing the public on higher freight rates. The Interstate Commerce Commission handles all rate questions.

I have no fight with railway companies. They are wonderful institutions, and the very threat of their trains being stopped shows how vastly important they are to the country. They deserve and they receive fair treatment and are the only business under the sun that is *guaranteed fair profit by the Government.* Some of them are vastly overcapitalized and their stock is "watered." The Union Pacific, for example, is worth about $40,000 per mile, but it is capitalized for $150,000 per mile, and it earned 20 per cent the last year. The public "paid the freight" that made the dividends. The boards of directors of all railways skillfully plan to pay dividends on their capital, with scant thought of their own ample salaries or of squeezing out some "water." Money invested in legitimate railroad securities should be given the same fair consideration as capital invested in any other enterprise, *but if a railroad corporation can not pay its employees fair wages for an eight-hour day without reducing the dividends on "watered" or legitimate capital stock, then let dividends be reduced or water squeezed out, not freight rates increased.* THERE WILL BE NO INCREASE IN FREIGHT RATES.

Kansas, with 1,750,000 people, has the 2-cent passenger fare and the roads are doing well. New York, with 12,000,000 souls, wanted to try it, but Gov. Hughes vetoed the bill—the "New Haven" Railway, whose overcapitalization and watered stock later became a scandal, was one road that feared its dividends would be molested. The companies in Kansas feared it would break them, but they tried it and it succeeded. The eight-hour day law THAT PREVENTED THE STRIKE is an experiment and the act itself provides for a commission to learn its effects and report to Congress for further consideration.

The eight-hour workday is correct in principle and has succeeded to the *benefit of humanity and without violence to legitimate capital wherever tried.* Congress might have ignored the President's appeal and waited until after the commission had investigated and let the country suffer the consequences of the strike that was ordered to begin this very day. *The administration met the crisis. It is better to prevent a fire than to talk waterworks after the town is burned up!* Surely this is not the work of "incompetents."

AMERICANISM IN FOREIGN AFFAIRS.

*The whole world looks with hope, honor, and respect on the flag of the only first-class nation on earth that has not been drawn into the vortex of a mangling death of horror and destruction.*

In his farewell address George Washington said:

If we remain one people, under an efficient Government, the period is not far off when we may defy material injury from external annoyance when we take such an attitude as will cause the neutrality we may at any time resolve upon to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

As a Nation we are neutral.

War on all sides of us—half the world trying to kill each other—and we have so far escaped war and the entanglements of war and the unspeakable horrors that go with it; *men's wives and children's mothers are not watching and waiting with tear-stained eyes and broken hearts for the husband and father who will never return.*

Let me commence with my native State, Kansas, with which I am most familiar. Born at a time when the Nation faced a fearful crisis, which later was met, but through the necessity of men's blood and women's tears. A posterity of patriotic children live who glance with hallowed look upon the crutch, the empty sleeve, of the men who wore the blue. And there was factional border warfare on our soil between those exponents of a free State and those who would make it a harbor for slavery; it was the life blood of human beings, our ancestors, that christened Kansas and made appropriate our State motto, "Ad astra per aspera." Thus christened, this grand old State has ever since held her own, and more, with the sister States of the Republic; *the State that once bore the name of "bleeding Kansas" has justly and happily acquired the title of "smiling Kansas."*

Such are the results and the blessings of peace, Christianity, industry, and unity. The blazed trails and the cumbersome ox-drawn prairie schooner, filled with its precious load of human beings from other States—aye, note, from other countries—from France, Ireland, England, Germany, Belgium, Sweden, have ceased and unloaded and passed on. We live together beneath a shining sun, in a cosmopolitan, patriotic land, the protecting wings of whose Government stretch forth over former Frenchman, former Irishman, former Englishman, former German, former Belgian, former Swede, and the rest, alike, without

prejudice or favoritism, as we dwell in harmony and tranquillity under the security of one Constitution, a common God, a single flag. Many of our citizens came from the war-ridden countries; some came for one purpose and some for another reason, but they all came to better their financial, their social, or their religious conditions. We welcomed them then with open arms, and we welcome them now as loyal fellow citizens; the condition imposed upon them was one—renunciation of all foreign allegiance and the oath of loyalty to the Republic. *The people of the United States are not a collection of jealous races of alien or unpatriotic sympathies; we are a Nation.*

*It does not make any difference where a man was born; it does not make any difference what his name may be; it does not make any difference where his sympathies lie in this world war; but if he has declared his allegiance to the Government of the United States, he must talk and act like a straight-out American when the interests of this country are at stake.*

May we everlastingly forget our racial origins in the Old World in a new birth of a stronger, broader American freedom in this Republic. A "hyphenate," according to the dictionary, is any citizen who is not of native American extraction, and the appellation as used here casts no reflection on his loyalty and patriotism. *A hyphen in the name is nothing, but a hyphen in the heart is destructive of unity, home, and country.*

Thank God, the so-called "hyphenates" of my acquaintance are not hyphens in the heart. I cherish among my warmest friends former French, Germans, Swedes, and Irish, and I do not make friends with anybody who cares more for the interests of another country than for the interests of our own country.

The other day I was concerned to read Col. Roosevelt's assurances to the correspondent of a French newspaper, the Petit Parisien, that Mr. Hughes would be a more satisfactory President for the allies than Mr. Wilson, and I was equally concerned when I read that the German-American Alliance had told our German voters that Mr. Hughes would be a more satisfactory President for Germany than Mr. Wilson.

It is evident that somebody is mistaken, but one thing is sure: Whether Mr. Hughes would be a better President for the allies or Germany is not the question. If it should come to that issue, the claims made for Mr. Hughes will be entitled to respectful consideration. *But in this year of our Lord 1916 the United States is not undertaking to elect a President for the allies or for Germany; the American people are electing a President for themselves.*

Let me personify a few brilliant examples of so-called "hyphenated" patriotic courage, skill, and devotion, whose names to-day stand for the things they stood for, worked for, and fought for: The French general, La Fayette, not an American citizen, but a loyal supporter when brawn, brain, and money meant so much, perhaps success itself, to George Washington; the German, Carl Schurz, Senator and general, whose intellect and patriotic service to the Union won fame for him and thanksgiving from a grateful people of this, his adopted country; the Swede, Capt. John Ericsson, who invented the *Monitor* and saved the Union Navy and blockade from destruction by the Confederate *Merrimac;* the Irish commodore, John Barry, the father of the American Navy, whose services to America are memorialized forever by the beautiful statue unveiled by President Wilson two years ago in the very heart of the National Capital.

In the War of the Rebellion the Irish-Americans, the German-Americans, the Swedish-Americans, and our other loyal "hyphenates" in name laid down their lives at the Union's altar; these heroes are high on America's honor roll. In the War with Spain, the former blue lined up with the former gray, shoulder to shoulder in common cause, the Teuton with the Slav, the Latin with the Anglo-Saxon. As they fought then, so have they remained in peace, a solid unit.

May it ever be so. Storms may beat from without our land, may lash our shores and cloud the air, but we remain true to our citizenship, faithful to our flag, and serene within; no harm can overthrow us.

This flag will not fall, nor totter; we made it in 1776; in 1812 a slur came from without our country, in '61 it came from within; in '98 the flag went down with the *Maine* for a moment, and this year of 1916 we add to its ensign of freedom that touch which makes the whole world akin—humanity.

*The time must never come when the mantle of the American flag shall fail to protect the lives of the people whose forefathers gave up their lives that it should live and hold the complete respect of the civilized world.* Born in a cradle of liberty, watched over by a starry heaven, it bears the likeness of the azure skies, and holds them, stars and all, the reflection of a divine benediction.

We bid godspeed to the country of Washington, of Jefferson, of Lincoln. Again we pledge our loyalty, be this our native land or our foster land, this grand old Commonwealth whose past is sacred, whose present is sublime, and whose future is inspired. We reconsecrate ourselves to God and country, a noble, stanch, united people, living in peace and happiness. *We declare our abiding faith in the one, first, and only land we owe allegiance, the United States of America!*

Through the war clouds of other shores may the sheen of purity from our flag show forth as the guiding cloud by day and the pillar of fire by night to lead the sons of earth to the end of war, to the dawn of a lasting peace.

*Peace with honor is our country's demand;* it is the guiding spirit of the quiet, patient man at Washington. A fine pilot for perilous times, a good example for saner times. Sit tight, Woodrow Wilson.

*We may differ on home matters, politics, and partisanship, but the waters at our boundary coast line wash away and dissolve completely those differences in the common good, but some critics of this administration are coming perilously close, if not quite, to making the campaign an issue of war or peace.*

From the prostrate forms of war's tortured victims will rise the Phœnix of an eternal peace, and emblazoned upon its shining front at the most heavenward point I foresee the emblem of humane, intelligent, dispassionate statesmanship in bold relief triumphantly raised over the blackened, worn-out, bloody form of Mars, and behind it the red, white, and blue of Old Glory, held aloft by the hallowed hands of Christian mothers, from whose silent lips come forth the fulfilled prophecy: "The heart of America is the heart of the world."

Then, indeed, will be "Peace on earth, good will toward men."

May the compass star of our sincere faith and equity continue to be our guide, the foundation of our country's greatness. *May the home of religious freedom be an ally of Christ in His eternal efforts; we can not serve two masters. "Thou shalt have no other gods before Me." We can not serve two flags!*

If this be "incompetency" and "incapacity," Mr. Speaker, may *God deliver us from the blind partisanship of professional politicians and the turmoil of yellow journalism that would swerve us from this path.*

---

**The Need of Forest Reserve Roads.**

---

# SPEECH

OF

# HON. CLIFTON N. McARTHUR,

OF OREGON,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, June 28, 1916.*

The House had under consideration the conference report on the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

Mr. McARTHUR. Mr. Speaker, a glance at the map of the United States shows that large areas of many States are now included in national forests, formerly known as forest reserves. The people of the West are in sympathy with a national-forest program that will develop forest areas to the greatest possible usefulness and at the same time conserve a fair amount of their timber and other resources to posterity. I will say, however, that the whole national-forest scheme has in the past been unreservedly condemned by many people because of the tendency to bottle up reserve areas and to include therein large tracts of agricultural land, thereby preventing that development and home building so essential to a prosperous and self-respecting community. The present administration of the Forest Service, under the able and broad-gauged leadership of Chief Forester Henry S. Graves, has, however, adopted policies that are promoting a rational development, and many erstwhile enemies of the reserve idea are now friendly to it. One of the policies to which Mr. Graves and his able corps of assistants are committed is a comprehensive system of road and trail development through the forests, a plan that they will be able to carry out if this conference report is adopted.

By the provisions of the pending bill, as amended by the Senate and agreed upon in conference, there is hereby appropriated $1,000,000 per year for the period of 10 years for road construction in the national forests under a plan whereby the Federal Treasury will eventually be reimbursed out of the receipts of the national forests derived from the sale of timber and for grazing charges, etc. The bill provides that the State, county,

or Territory in which a particular road project is located shall enter into a cooperative agreement with the Forest Service for the survey, construction, and maintenance of such road. This guarantees the cooperation of the State and its subordinate divisions and means that the Federal Government will be met halfway in the financing and construction of many proposed roads. This plan will prove beneficial not only to the Forest Service but also to the communities in which the proposed roads are located.

The Forest Service is one of the most useful agencies of our Government, and is doing splendid work in the matter of fire protection and fire fighting, the benefits of which extend not only to Government-owned timberland, but also to countless homesteads and large bodies of privately owned timber adjacent to and in many instances actually within the boundaries of the reserves. Another important work successfully carried on by the Forest Service is the supervision of and charge for the grazing of sheep, cattle, and other live stock within the reserves. During the year 1915 approximately 7,280,000 sheep and 1,725,000 cattle, horses, and mules were pastured in the national forests. Local settlers and stockmen have the preference on these ranges, but the areas are allotted in a businesslike way and at a nominal cost. Under the regulation of the Forest Service the range is improved, instead of being overgrazed and denuded, as has been the case with many outside public lands. Incidentally there are no more range wars, with their bloodshed and property destruction, as there were in the old frontier days of the West.

The most important work of the Forest Service is its policy of reforestation. This work has been undertaken in many sections of the West, particularly on burned-over lands. Most of these lands are high on the mountain sides and unfitted for anything but tree culture. It will be years—in some instances centuries—before this new crop of trees will be ready to harvest, but we at least have the satisfaction of knowing that we are providing a timber supply for posterity. This work of reforestation should be encouraged by all patriotic citizens.

Another laudable work carried on by the Forest Service is the protection of watersheds, from which many cities and towns in the great western country secure their drinking water. The Forest Service regulations prevent pollution and diminution of the water supply of many cities and towns, and thereby greatly benefit the public health. The numerous national forests of the West contain large mineral wealth and undeveloped water power. Mineral deposits within the national forests are opened to development exactly as in unreserved public land, and there will eventually be much progress in this line. Our water-power laws are not yet sufficiently liberal to attract capital and insure development, but it is to be hoped that this Congress will give us some practicable water-power legislation, to the end that some of the great water-power properties in our forest reserves will be put to beneficial use.

Another great asset of our national forests is the magnificent scenery. In practically every State in the Rocky Mountain and Pacific coast sections the national forests contain scenic wonders that are incomparable. In my own State, one of the national forests embraces the world-famous Crater Lake and another contains the Josephine County Caves, or the "Marble Halls of Oregon," which, in the opinion of many, surpass the great Mammoth Cave of Kentucky. The people of the United States have not learned to capitalize their scenery, but let us hope that they will hereafter adhere more closely to the doctrine of "See America first." They can not, however, see all the great works of nature in the West unless these attractions are made more accessible by reason of good roads.

A well-defined policy of road construction in our national forests will not only increase the effectiveness of the Forest Service, enhance the value of the public domain, encourage water-power development, make the marketing of timber easier, facilitate the movement of live stock, lessen the fire risk, and attract sightseers, but will be of great convenience to settlers and homesteaders who reside on the scattered agricultural areas within the forests. Many of these settlers have in the past given up in despair because of lack of public roads and schools. The passage of this bill means roads, which in turn mean schools and other agencies to civilization. These advantages can be obtained for the settler without risk to the growing timber or other property in the forests.

I have said enough to show the large part that the national forests play in our western life. We do not object to a policy of conservation that develops without waste and conserves without stagnation. We are willing that these large areas shall be withheld from taxation, but we insist that land capable of agricultural development be thrown open to entry. We join hands with the Federal Government in the matter of fire patrols and are willing to meet the Forest Service halfway in every laudable undertaking. We do not want our magnificent national forests to pass into the hands of the few at the expense of the many, nor do we want them to stagnate for want of development. In brief, we stand for a rational policy without waste or monopoly and with a due regard for the welfare of future generations.

I regret to note the opposition to forest road construction from gentlemen in this body. They take a very narrow view of the situation. They are so wedded to the theory of conservation that they would bottle up our national forests and not permit any development whatever. Such a policy is not only harmful to the West but will eventually breed reaction against the whole national-forest plan, and will in due time overthrow it. Let us then consider the different phases of the conservation question in a broad and conciliatory spirit and adopt policies that will be beneficial to the great body of the people. The old idea of bottling up the forests was abandoned when the name "forest reserve" was changed to "national forest."

Nothing is more important to the people as a whole than good roads, and there is no more important feature of this bill than section 8, which relates to roads through national forests. In fact, it is altogether a most important section, for it is the only guaranty that the large forest areas of the West will ever receive recognition in the matter of road construction. The Federal Government has no business spending money on roads that run through thickly settled communities while the public domain is crying for development. If the entire amount provided in this bill were to be spent in the construction of roads across the public domain the bill would be of much greater value to the American people than it is in its present form. The bill recognizes the national forests, however, and for this reason I trust that section 8 will be adopted and the conference report agreed to. [Applause.]

## Mexican Situation.

### EXTENSION OF REMARKS
OF
### HON. AARON S. KREIDER,
OF PENNSYLVANIA.

IN THE HOUSE OF REPRESENTATIVES.

*Wednesday, September 6, 1916.*

Mr. KREIDER. Mr. Speaker, a few days ago while making some observations on the floor of the House I said that the so-called Mexican question was one of our own making and that but for the attitude of Woodrow Wilson there would be no Mexican question to bother us to-day.

Mr. Speaker, in order to bring this matter clearly and fairly before the House I shall recite actual facts as they occurred and are on record. In other words, I shall recite a little history prior to and leading directly to the overthrow of Madero and the acquiring of the presidential office by Victoriana Huerta, whom President Wilson refused to recognize.

In the fall election of 1910 Francisco I. Madero was a candidate for the Presidency of Mexico in opposition to Porfirio Diaz.

In November of the same year, namely, 1910, Madero started a revolution which was successful, and on June 8, 1911, he made his triumphal entry into the City of Mexico, reaching the capitol a few hours after an earthquake had shaken the city and killed about 300 people. The Mexicans, always superstitious, acclaimed Madero as a savior of the nation and gave him a great reception.

President Diaz had resigned the Presidency on May 26, 1911, just 12 days prior to the arrival of Madero.

From that time until to-day there has been no peace in Mexico. The country has become thoroughly honeycombed with various revolutionary propagandas; not for a single day has the country been free from turmoil and strife. Madero had many enemies throughout Mexico, and they kept his armies busy. These revolts were led by such men as Cuidad Juarez, Emilio Gomez, Pascual Orozco, Bernardo Reyes, Felix Diaz, all these and a number of others of less prominence were leading revolts, each for himself, in central and northern Mexico, while Zapata was continuing his revolt in southern Mexico. Such, in brief, was the condition just prior to the overthrow of Madero.

Now, let us consider in a little more detail the actual occurrences just immediately preceding and resulting in the overthrow of Madero and his subsequent murder.

On October 13, 1912, Felix Diaz seized Vera Cruz. On October 23 Madero's forces entered Vera Cruz and captured Diaz, took him to Mexico City, and put him in jail there. At first Madero declared he would be put to death, together with Bernardo Reyes, who was captured while leading another revolution in northern Mexico. Many petitions were made to Madero to spare the lives of these two men, and he postponed action. In the meantime the secret agents of Diaz and Reyes were working against Madero in the army, and early on Sunday morning, February 9, 1913, the First Cavalry and part of the mounted police and other soldiers liberated Diaz from Belem prison, while cadets from a military school at Tialpam, a suburb of Mexico City, liberated Gen. Reyes from the penitentiary.

Reyes and Diaz with their liberators went to the national palace and attempted to take possession of it, but were repulsed by the Twenty-ninth Infantry, which formed the palace guard. There was a sharp fight. Gen. Reyes was killed at its beginning, and machine guns were turned loose on the roof of the palace, sweeping the crowded Zocalo or Main Street and Avenida de San Francisco—San Francisco Street—both of which were thronged with people going to church. Diaz and his men were driven off after many of the cavalrymen had been killed, and according to the official records of the police 910 noncombatants were killed on the plaza alone; men, women, and children were killed throughout the length of San Francisco Street as well as in other parts of the city. Diaz and his men stormed and captured the arsenal about a mile from the national palace, taking it after a fight lasting half an hour.

Here they found large stores of arms and ammunition and prepared for a siege. All day Sunday and Monday they remained quietly in this arsenal while Madero was gathering his forces to oust them. The battle began in the city on the morning of February 11 and continued until February 18, with a daily cannonading and machine-gun and rifle firing between the arsenal and the palace and many other places where batteries had been planted. During this time more than 1,000 persons, mostly noncombatants, were killed and about 18,000 wounded. On February 18 Gen. Huerta, who had been commanding the Madero forces, met Diaz and came to an agreement for the overthrow of Madero as the only means to stop the fighting and slaughter of citizens. It was agreed at that conference that Huerta should become the provisional president and that Diaz should have the naming of the new cabinet. Madero was arrested at the national palace and his brother, Gustavo Madero, was arrested in the Gambrinus Café, where he was entertaining friends at dinner. Madero and Pino Suarez were locked up in the palace and Gustavo Madero was taken to the cuidadela (arsenal). On the night of February 22 Madero and Pino Suarez were removed from the palace and taken from the penitentiary, but were murdered shortly after midnight close to the walls of the penitentiary. Gustavo Madero was murdered in the cuidadela the morning after his arrest under the excuse that he had attempted to escape.

Before Madero and Pino Suarez were removed from the palace they were forced to sign their resignations, thus making Pedro Lascurain, minister of foreign affairs, President according to the constitutional provisions of Mexico. Lascurain was President for exactly 26 minutes. He immediately appointed Victoriana Huerta as his minister of foreign affairs and then resigned, making Huerta the President.

These in brief are the actual occurrences as recorded by history. I do not deny, nor do I assert, that Gen. Huerta was guilty or even had guilty knowledge of the murder of Madero and Suarez. No evidence has ever been produced to show that he had such knowledge or that the killing occurred at his direction. He was guilty, however, in carrying out a conspiracy for the purpose of deposing Madero. Whether he was justified in entering into such a conspiracy for the purpose of avoiding the further killing of noncombatants in the City of Mexico and the destruction of the city itself, a city of over 400,000 inhabitants, each one can decide for himself.

On March 11, 1913, President Woodrow Wilson formally announced that the United States would not recognize assassination as a means of acquiring office, and would only recognize a government in Mexico which should be formed after a genuine and free election. It might be stated here that all of the leading Governments of the world, such as England, Germany, France, Russia, and Japan, had and did give such recognition, and the fact remains that whether he was recognized by the United States as such or not he was in deed and in fact the head of the only government that existed in Mexico at the time, and it is also an acknowledged fact and testified to by subsequent events that he made great progress in establishing law and order throughout Mexico. This no doubt was possible because the leading and most influential revolutionary factions had thus combined and he was in direct control of both armies, and it is an established fact that Huerta was the strongest and best qualified leader of all the contending factions.

Notwithstanding this fact President Wilson had made up his mind that Huerta must go. First, he tried persuasive methods, and sent John Lind to Mexico City as his personal representative with instructions that Huerta eliminate himself from the Mexican situation. Of course Huerta refused to do this.

Shortly before the overthrow and death of Madero, Venustiano Carranza, then governor of the State of Coahuila, started a revolution against Madero, but as soon as he heard Madero was dead and Huerta was President he directed his revolt against Huerta. Apparently it made no difference to him who was in control of affairs; he was "agin the Government."

At about the same time the noted outlaw and bandit, Francisco Villa, and his band of cutthroats became more bold in the States of Sonora and Chihuahua, robbing, plundering, and killing innocent, defenseless men, women, and children, looting banks, business houses, stealing cattle, slaughtering them, supplying the markets in Chihuahua, and driving large numbers of cattle across the border and selling them in this country. Villa was also anxious to start a revolution, but found he was seriously handicapped by the lack of rifles and ammunition. Carranza was also unable to make headway because he, too, was lacking in rifles, machine guns, and so forth. For it must be remembered that President Taft had placed an embargo on the exportation of guns, rifles, and munitions of war of any and every kind, so that only such quantities were available that could be smuggled into the country. It having become generally known not only in the United States but in Mexico as well that President Wilson was determined to drive Huerta from power, representations were made in behalf of these revolutionists and, notwithstanding the fact, that in August, 1913, in a mesage to Congress, President Wilson declared:

I shall follow the best practice of nations in the matter of neutrality by forbidding the exportation of arms or munitions of war of any kind from the United States to any part of the Republic of Mexico * * * We can not in the circumstances be the partisans of either party to the contest that now distracts Mexico, or constitute ourselves the virtual umpire between them.

The President committed what many people consider a crime against both the Mexican and the American people for, on February 3, 1914, he lifted the embargo on arms and munitions of war. He violated his pledge to the people and to Congress. He did not, as he said he would—

forbid the exportation of arms and munitions of war of any kind from the United States to any part of the Republic of Mexico—

but he did, by this act making it possible for Villa and Carranza to more effectively wage the kind of warfare they were carrying on, and he did by this action—

constitute himself the virtual umpire between the warring factions in Mexico.

At this time Villa was well supplied with money which he had stolen, and he bought ammunition in immense quantities.

From this time on this administration continued to give the revolutionary party every moral support possible. For it seems the President depended on Villa and Carranza to do by force what he failed to do by peaceful methods. The administration winked at the continued murder of our citizens and the destruction and confiscation of their property.

This Government never raised its voice or lifted a finger in their defense or in their behalf. It was only when a Mr. Benton, an English subject, was deliberately murdered by Villa or by his orders that the then Secretary of State told Mr. Villa to please not murder English subjects, and advised him that we had, in a way, made ourselves responsible for the safety of Englishmen in Mexico, and England was rather cranky and seriously objected to having her nationals ruthlessly killed and murdered. On the same day there was also an American engineer by the name of Gustave Bauch killed by Villa, but as he was only an American we have not learned that his killing resulted even in provoking "official correspondence" in regard to the matter; but as the reports of the murders of Americans became more and more frequent, and fearing public opinion, the President directed the Secretary of State to order all Americans out of Mexico and advised them to leave, and at his request the Congress of the United States, on September 16, appropriated money to bring—

destitute Americans away from Mexico.

Villa, in the meantime, being now fully equipped with arms and ammunition and having plenty of money at his command, continued to make satisfactory headway with the revolution, with Carranza posing as the "first chief."

On April 7, 1914, a boat's crew from the U. S. S. *Dolphin* was arrested by one of Huerta's officers at Tampico while the town was being defended from an attack by Villa forces. The immediate cause of arrest, it is said, was due to the fact that the boat's crew anchored at the point where the city of Tampico had laid its water mains, a place at which it was unlawful for any boat to anchor. However, when a superior officer learned of the arrest, and before any of the American sailors were put in jail, they were escorted back to their boat and due apology was made. This, however, seemingly did not satisfy Admiral Mayo, who was in command of the United States naval forces at Tampico. He demanded that an apology be made and the American flag be saluted because of the insult. Huerta apologized through Nelson O'Shaughnessy, the Mexican chargé d'affaires in Mexico City, but refused to order a salute to the flag until he had received a report on the occurrence and until he was satisfied that the salute would be returned. There was then considerable correspondence as to how many guns should be fired, Huerta contending that the *Dolphin* was only an auxiliary vessel, and that 6 guns only should be fired as a salute, but the President insisted it must be 21 guns, or he would take immediate action to bring it about. So, on April 21, without authority from the Congress of the United States, under instructions from President Wilson, Admiral Frank F. Fletcher landed marines and sailors from the American fleet in Vera Cruz Harbor and seized the customhouse. The Mexican soldiers fought as well as they could, but Admiral Fletcher took the city and the hills around it, losing 17 killed and a number of wounded; two of the wounded died later. Next, President Wilson invited Argentina, Brazil, and Chile to cooperate with the United States to restore order in Mexico, but nothing came of their conferenec.

The United States having now cut off one of the avenues through which Huerta was receiving his supplies from foreign countries, the case of Huerta became hopeless. It might be stated here that at the time Vera Cruz was taken one of the objects in taking it was to prevent a German vessel from landing its cargo of arms and ammunition for Huerta. These munitions of war were landed at another port.

From this time on Huerta found himself losing ground rapidly, and on July 15, 1914, he resigned as President of Mexico and went to Kingston, Jamaica, and then to Spain. Francis Carbajal succeeded Huerta and remained in office about a month. The constitutional army entered Mexico City August 15 and took peaceful possession; Carbajal left the country. Carranza established his headquarters in Mexico City. It was then we were told of the success of the "watchful waiting" policy, and expressions of approval and joy proceeded from the Democratic side of this House; but, alas, that peace was of but short duration. Villa and Carranza quarreled, as anyone familiar with the character of the men anticipated.

Villa, feeling that he was the "pet" of this administration and would surely receive its moral support, issued an ultimatum that Carranza must retire. Carranza refused to retire, and a convention of the revolutionary chiefs was called to decide upon the establishment of a government. That convention was in control of Villa and remained in session until November and then proclaimed Gen. Eulalio Gutierrez Provisional President of Mexico, and Villa immediately undertook to see that Gutierrez was installed in office and began his march to Mexico City, reaching there with little opposition from the Carranzistas. Carranza, having fled from the capital, went toward Vera Cruz. The Americans evacuated Vera Cruz on November 23, 1914, and shortly thereafter Carranza made the seaport his capital. Of course, it can not be denied that the American occupation of Vera Cruz was without results. Our Army cleaned up the city, made it sanitary, did some necessary plumbing work, and incidentally collected over $1,000,000 of revenue belonging to the Mexican Government.

About this time the people were becoming thoroughly disgusted with the conditions in Mexico and the attitude of the administration, so the President thought it was about time to "say something"; accordingly, on the 8th of January, 1915, at Indianapolis, apparently having become disgusted with his own policy of meddling and interfering, and had no doubt decided to abandon same, he made this statement:

> I want to say a word about Mexico, and not so much about Mexico as about our attitude toward Mexico. I hold it as a fundamental principle that every people has the right to determine its own form of Government. * * * It is none of my business, it is none of your business, how long they take in determining it. It is none of my business, and it is none of yours, how they go about the business. * * * And so far as my influence goes, while I am President nobody shall interfere with them. * * * Have not European nations taken as long as they wanted and spilled as much blood as they pleased in settling their affairs, and shall we deny that to Mexico because she is weak?

How unfortunate it is that it took President Wilson from March 4, 1913, to January 8, 1915, to reach the conclusion that it was none of *his business* "how the Mexicans go about in establishing their Government," and that *as far as his influence goes*, while he is President, "nobody shall interfere with them."

Had he practiced at the beginning of his administration what he now preaches and "*restrained himself*" from "*interfering*," as he now purposes to restrain "*others*," there would be no "*Mexican question*" to-day. But instead of that he did "*interfere*," he did make it "*his business*" to see to it what was done and how it was done, even to the extent of dictating who should or should not be candidates for the Presidency at the forthcoming election.

Now, having seen the utter failure and the disastrous results of his impractical and uncalled-for interference, he proceeds to wash his hands of the whole affair, notwithstanding the fact that he was directly responsible for it. In doing so, he even calls attention to the fact that the European nations were spilling as much blood as they pleased, and "Shall we deny that to Mexico, because she is weak?"

This certainly was granting a blessed privilege to the Mexicans—a privilege "to spill as much blood as they pleased"—apparently regardless whether it was American or Mexican blood that was being spilled. This was the President's thought, no doubt, at that time, but it did not last long. By June he was convinced that the continuous fighting was having a disastrous effect upon "his policy." So, on June 2, he issued a warning to the leaders of the Mexican factions, which was telegraphed to the American consular offices in Mexico for circulation, in which he recited the disastrous effect his policy had wrought upon that country and declared that Mexico was starving and without a government. However, to his most solemn but unsought advice the factional leaders in Mexico—each in the field at the head of armed forces engaged in desperate conflict where death was the penalty of failure—naturally they paid no attention; they preferred to take his other advice and assurance that they were entitled and privileged to "spill as much blood as they pleased and as long as they pleased," and disregarded his advice, but confidently relied upon his declared intention that—

> So far as my influence goes, while I am President nobody shall interfere with them.

And also, no doubt, relied upon what he said at Columbus, Ohio. In this speech he used these words:

> The Mexicans may not know what to do with their Government, but that is none of our business. So long as I have the power to prevent it, nobody shall butt in to alter it for them.

There is no doubt that these speeches of the declared intention of the President had an effect in shaping the course and trend of events in Mexico.

Mr. Speaker, continuing the history of this unfortunate condition which we had created through our interference, we find that Guiterrez was forced out of the Presidency on January 16, 1915, and Roque Gonzales, another provisional President, was appointed by the revolutionary chiefs; but he, too, was forced to leave Mexico City, being President for two days. Carranza's army then took possession. Immediately after this occurrence Villa proclaimed himself in charge of the Mexican Presidency. Things were then moving fast. On February 16, 1915, Carranza's forces, under Gen. Obregon, were compelled to evacuate the capital and Emilio Zapata marched in and took possession of the city. This revolutionary leader had until the event of Villa been considered the most brutal, heartless, and unprincipled of all the rebel generals. He had been operating in southern Mexico, but when he left southern Mexico and took possession of Mexico City a new revolution in the south was started, headed by Ignacio de la Torre. Such, indeed, was the condition created by the administration.

The fighting between Villa and Carranza forces continued, and on April 7, 1915, Obregon defeated Villa in a terrific battle near Celaya.

From this time on the star of Villa seemed to become more and more beclouded, and apparently fate had decreed that, after all, Villa, after having received all the favors and support of the administration, would not be permitted by the Mexicans themselves to occupy the presidential chair, however much this might be desired by President Wilson or his administration.

In May the Carranza forces took Saltillo. On June 1, 1915, the Carranza forces captured San Luis Potosi, and four days later they defeated the Villa forces at Aleon.

In the first week of August Carranza again occupied Mexico City. In September Gen. Obregon took Chihuahua and Torreon for Carranza. Villa's power, it will be noticed, gradually diminished. About this time, regardless of the constant fighting and warfare and the inability of either faction to maintain order, President Wilson decided to recognize Carranza, which he did

on October 19, 1915, and caused his Secretary of State to issue the following communication:

DEPARTMENT OF STATE,
*Washington, D. C., October 19, 1915.*

MY DEAR ARREDONDO: It is my pleasure to inform you that the President of the United States takes this opportunty of extending recognition to the de facto government of Mexico, of which Venustiano Carranza is the chief executive. The Government of the United States will be pleased to receive formally in Washington a diplomatic representative of the de facto government as soon as it shall please Gen. Carranza to designate and appoint such representative, and, reciprocally, the Government of the United States will accredit to the de facto government a diplomatic representative as soon as the President has had opportunity to designate such representative.

I would appreciate it if you could find it possible to communicate this information to Gen. Carranza at your earliest convenience.

Very sincerely, yours,

ROBERT LANSING.

The reasons for this selection of Carranza over Villa were never adequately put before the American people. It had not become apparent that Mr. Carranza had obtained such a commanding position in Mexican affairs as would justify this selection of him as an ally of the United States. Nevertheless, we all hoped that the President had adequate reasons for believing Mr. Carranza to be capable to restore order with the support of our Government. But in the light of succeeding events it would seem this was not the case. It appears that Villa was and is no more willing to eliminate himself from the Mexican situation than was Huerta. Perhaps if the President would send a special representative to Villa he might be induced, as a favor to the administration, to do so. Whether he would or not, he certainly should in view of the many favors and considerations shown him by the administration in the past. The fact that unrest, turmoil, murdering of innocent men, women, and children, depredations upon American persons and property within Mexican jurisdiction was going on immediately before as well as after the date of the recognition of Carranza is perhaps best illustrated by quoting from Secretary Lansing's note to Gen. Carranza under date of June 20. I read from the third paragraph:

It would be tedious to recount instance after instance, outrage after outrage, atrocity after atrocity to illustrate the true nature and extent of the widespread conditions of lawlessness and violence which have prevailed. During the past nine months in particular—

Notice this letter is written on June 20. Nine months previous is September 20, one month before Carranza was recognized—

the frontier of the United States along the lower Rio Grande has been thrown into a state of constant apprehension and turmoil because of frequent and sudden incursions into American territory and depredations and murders on American soil by Mexican bandits, who have taken the lives and destroyed the property of American citizens, sometimes carrying American citizens across the international boundary with the booty seized. American garrisons have been attacked at night, American soldiers killed, and their equipment and horses stolen. American ranches have been raided, property stolen and destroyed, and American trains wrecked and plundered. The attacks on Brownsville, Red House Ferry, Progreso Post Office, and Las Paladas, all occurring during September last, are typical.

Now, remember this is not an assertion on my part; it is the language which the Secretary of State used in describing conditions that existed during the months preceding and since the recognition of Carranza by President Wilson. In October, the very month in which Gen. Carranza was recognized, a passenger train was wrecked by bandits, and several persons killed, seven miles north of Brownsville, and an attack was made on United States troops at the same place several days later. It is said, and commonly reported, that the bandits who led these attacks and committed the murders and outrages are well known both to the civil and military authorities in Mexico, as well as to American officers, but they have been allowed by Carranza to enjoy with impunity the liberty of the towns of northern Mexico.

To show the trend of affairs, I shall again quote from Secretary Lansing's note, in the fourth paragraph of which he says:

Depredations upon American persons and property within Mexican jurisdiction have been still more numerous. * * * For example, on January 3, troops were requested to punish the bands of outlaws which looted Cusi mining properties, 80 miles west of Chihuahua, but no effective results came from this request. During the following week the bandit Villa, with his band of about 200 men, was operating, without opposition, between Rubio and Santa Ysobel, a fact well known to Carranzista authorities. Meanwhile, a party of unfortunate Americans started by train from Chihuahua to visit the Cusi mines, after having received assurances from the Carranzista authorities in the State of Chihuahua that the country was safe and a guard on the train was not necessary. The Americans held passports of safe conduct issued by authorities of the de facto government. On January 10, the train was stopped by Villa bandits, and 18 of the American party were stripped of their clothing and shot in cold blood, in what is now known as the Santa Ysobel massacre. Gen. Carranza stated to the agent of the Department of State that he had issued orders for the immediate pursuit, capture, and punishment for this atrocious crime.

This is an official description of conditions that existed in Mexico since recognition has been granted.

Everyone remembers the raid on Columbus, N. Mex., on March 9, 1916. It was then that the President decided to "do something," fearing public opinion, so he starts what he calls a "punitive expedition" fully one week after the raid was committed, and lets it be known that the purpose of this expedition is to catch Villa and hang him to the nearest tree. Now, the truth is that no sane-man familiar with Mexican conditions was ever of the opinion that the punitive expedition would catch Villa. It was known that he was retreating into a country where he personally is regarded as a hero and has the good will of the entire population and where he was absolutely safe. Nevertheless, the punitive expedition started and invaded Mexican soil and territory without the consent of the Government which we had recognized and which we had publicly declared to the world, by such recognition, was able to maintain order and protect life and property. This punitive expedition passed between two lines of railroads, neither one of which we were allowed to use, until we had penetrated possibly 240 miles into the interior of Mexico. Of course, we did not catch Villa; we knew we would not when we started, but Wilson felt he had to "do something." This resulted in the Carizal affair, which occurred on the morning of June 21. The details of this unfortunate affair we are all familiar with, certain of our officers and men were killed and 17 taken prisoners, the balance escaping. After this occurrence, we sent a demand to Carranza for the immediate release of the prisoners. That demand was complied with in the following manner. The prisoners were brought to the border of the United States and turned over to the American authorities after having been robbed of their belongings, stripped of their uniforms and clothing, and after having suffered every indignity it was possible for the Carranza authorities to heap upon them.

After this success (?) of the administration the President grew bold again, apparently having remembered that the bodies of the dead soldiers should be brought to America; and, on June 29, eight days after their death, and after representation had been made by the President through Gen. Bell, our consul at El Paso was informed by Gen. Trevino that we could have the bodies of the dead soldiers if we wanted to go after them, but we were told we must pay all expenses. It must be borne in mind that Gen. Bell had made the request that the Mexican Government deliver the bodies for burial, but that request, of course, our ally, Mr. Carranza, would not grant. Furthermore, no request for the disavowal of this attack has been made, so far as the public has been informed. No demand for reparation has been made, and apparently the "grave consequences" with which Carranza was threatened by President Wilson have not materialized, except that when the Mexican commissioners meet ours, I am informed, they will demand damages for the Mexican soldiers killed and wounded by our men in that unfortunate affair.

The punitive expedition still remains in Mexico, although we have withdrawn partly and have moved Gen. Pershing to within about 120 miles of the border, which was done at the demand of Gen. Carranza. This, however, is as far as the President would withdraw this expedition. He tells us it is needed to guard the border. If any sane, living man can tell me how a small force of men located 120 miles away from the border in the interior of Mexico is going to protect the border, I am willing to acknowledge that the President is using good judgment in maintaining this force in Mexico. The truth is that if we really want to defend and protect our border, the troops should be somewhere near the border; or if it were necessary for the Mexican outlaws to pass by where Gen. Pershing is located in order to get to the border, there might be some sense in having Gen. Pershing remain where he is. We all know that such is not the case, and we all know that Gen. Pershing can not possibly serve any useful purpose to the United States where he is now located, but he is a constant menace to the peace of both countries, being obliged to maintain his line of communication, which is liable and subject to an attack at any moment. Instead of using these soldiers to protect the border, he has called the National Guard of the States to the border to perform this duty.

The latest action of the Government has been to appoint commissioners, who are now meeting with commissioners appointed by Gen. Carranza to "arbitrate" our differences. The question naturally arises, What are these men to arbitrate? We presume the things enumerated in Secretary Lansing's letter. Are they to arbitrate the murders of American citizens, the ravaging of American women, the destruction of American property, and the desecration of the American flag? These in brief are our grievances against Mexico, and I submit that they are not matters for arbitration. No, no; it is simply a continuation of the vacillating, un-American, and shameful course which the administration has followed from the beginning. At the very

outset of the Wilson administration the President made up his mind to depose Huerta. He has done so, but at a sacrifice of American honor and integrity. It took him two years and seven months to find some one to recognize instead of Huerta. It would be a pertinent question to ask why are the Mexicans so extremely bitter against all Americans. There is only one answer to it, and that is because of the spineless, vacillating, weak, and undignified policy pursued by the administration, by our actions always doing what we should not do, and failing to do what we should do, we have created universal contempt in Mexico for everything American. Even Carranza seems to have lost all respect for us, notwithstanding we gave him recognition at a time when we should not have done so. That this hatred exists is strikingly brought to light when we remember the answer given by Admiral Mayo when he withdrew the *Dolphin*, the *Des Moines*, and the *Chester* from Penuco River against the protest of Consul Miller and at the very moment when the Americans were collected in the Southern Hotel surrounded by a howling mob of Mexicans. It must be remembered that the Americans had assembled, complying with the instructions of the Secretary of State to leave Mexico, but Admiral Mayo states that he withdrew his ships without taking the Americans on board fearing that they—the Americans—would be murdered before they could board the ships should they attempt to do so. This truly is an unfortunate condition to find ourselves in, and it is needless to say had it not been for the German ship *Dresden* and the English ship *Hermione* no doubt additional murders would have been committed; but the German commander had no fear of the Mexican mob; he steamed right up to the city, cleared the streets, dispersed the mob, and made it possible for our citizens to board the ships, while our own ships were skulking out of the harbor like whipped dogs, afraid to save our own people from a howling mob. Can any real American avoid the blush of shame and a spirit of indignation in the presence of such national "humiliation"? Truly American honor, American prestige, and the dignity of the American flag has been sacrificed, and yet notwithstanding this record we hear exclamations from our Democratic friends, "God bless Wilson; he has kept us out of war."

Mr. Chairman, the truth is that President Wilson's position on the Mexican situation is now and has been dead wrong from the very beginning. It has created a situation which is costing this Government over $500,000 every day. We have already taken over $50,000,000 from the Treasury to pay the incidental expenses. The Democrats tell us they will sell $125,000,000 of bonds, every dollar of which will be needed to pay the expenses of the border patrol. This is not taking into account the many millions which must be paid later, and the money provided either by the sale of bonds or the levying of additional taxes. But this, Mr. Speaker, is as nothing when compared to the loss of hundreds upon hundreds of American lives. I know of no way of measuring human lives, human misery, and suffering—in gold.

Nor yet is this all. The national flag, that flag with the stars and stripes, representing the blood of our fathers and the tears of our mothers; that emblem of liberty, the pride of our Nation, has for the first time in our history been lowered and found trailing in the dust. Yes, more than this, it has been dishonored and been regarded as but a filthy rag, even to the extent that our nationals in foreign lands did not dare claim it as their own except at the risk of their lives.

Yes; "God bless Wilson; and may He forgive him for the humiliation and dishonor he has brought to the American people."

Mr. Speaker, it would be perhaps more easy to bear the burden thus cast upon us if some good somewhere had resulted from such a policy; but what are the conditions in Mexico to-day? Starvation, famine, want, robbery, plunder, rapine, assassination, and murders are the order of the day. Every crime and every cruelty that ignorance and hate can invent has been perpetrated, and still there is no end.

Mr. Speaker, whenever the question of Mexico is discussed some Democrat in his solemn majesty arises and, with a look of superior wisdom, inquires, "What would you do? What would you have done?"

Answering that question and speaking for myself, but believing that I voice the sentiment of the American people, I will enumerate at least some of the things that should have been done.

First, Huerta should have been recognized—

Because he was the legal and lawful President of Mexico, and was recognized as such throughout the entire civilized world;

Because he was the head in reality and in fact of the only government Mexico had and to which the Mexican people could look for the maintenance of order within and to which the nations of the world could look for the fulfillment of international obligations;

Because he was a thorough disciplinarian, firm, shrewd, resourceful, and experienced in military and civil affairs of the nation;

Because the Mexican people themselves looked for, and in him they hoped to find, the one man able to restore law and order throughout the land and fulfill international obligations;

Because at this time all the contending revolutionary forces had united all the armies under his direct command and control, and no revolution worthy of the name existed anywhere in Mexico; and

Because to do otherwise was sure to inflame in the hearts and minds of the ignorant masses the revolutionary spirit and honeycomb the entire country with a spirit of unrest and discontent; and, lastly,

Because recognition would have resulted in peace for Mexico and no Mexican problem for the United States.

Had the President not made this serious mistake, all the things that have happened since would not have happened, but he took exception, as he said in his message which I have quoted, and believed that Huerta was not entitled to recognition because of the manner in which he became president. Yet it was not shown when recognition was desired, in fact it never has been shown that Huerta was guilty or even had guilty knowledge of the impending murder of Madero. The truth is that all the evidence produced since that most unfortunate occurrence indicates that Huerta had no such knowledge.

Some of the things the President should not have done:

President Wilson should not have promised to retain an embargo placed by President Taft on arms and ammunition and then later, without notice, betray the people and the Congress of the United States by lifting the embargo.

President Wilson should not have given the moral support of this administration to Villa, the outlaw bandit, nor to Carranza, in their efforts to overthrow an existing Government in a border country.

President Wilson should not have provoked a quarrel with a man he refused to recognize as the head of the Government and, at the same time, demand from the man, the individual, a national salute of 21 guns for an imaginary insult for which ample apology had been made.

President Wilson should not have sent the entire American Navy to Mexican waters when there was only one antiquated old vessel in possession of the Mexican Government.

President Wilson should not have ordered Admiral Fletcher to take Vera Cruz and thereby sacrifice the lives of 19 American sailors—at least not without the authority of Congress.

President Wilson should not have allowed the contending factions in Mexico to murder American citizens, men, women, and children, and destroy and confiscate their property.

President Wilson should not, if he chose not to recognize Huerta, have meddled in Mexican factional affairs and given aid and comfort to one faction at the expense of the other, thereby creating contempt and hatred in the Mexican mind against all Americans.

President Wilson should not say one thing and do directly the opposite.—Witness Indianapolis speech.

President Wilson should not have sent the punitive expedition into Mexico after the Columbus raid, but should, before the raid, have given adequate protection, knowing the anti-American feeling and the probability of Villa making just such a raid.

President Wilson should not refuse to withdraw the punitive expedition, because it can do no possible good. Its only effect is to increase the danger of further international complications and, if such a thing is possible, to further increase the anti-American feeling in Mexico.

President Wilson should not have called the National Guard to the border at such tremendous expense to the Government and at such great inconvenience to the men. He has ample force to patrol the border by using the Regular Army of the United States; and if arrangements are made with the Mexican authorities to protect the Mexican side of the border, there is no need of the State militia being retained on the border.

President Wilson should under no circumstances have picked a quarrel and interfered with Mexican affairs if he is "too proud to fight" and defend the honor and dignity of American citizenship and the American flag.

President Wilson should have dealt fairly, openly, and honestly with the Mexicans. He should have practiced what he preached. He should have recognized that he is simply the representative of the American people, and that it is his duty as such to jealously guard their interests, their lives, and their property. Had he done these things and left the others undone, I repeat, there would be no Mexican question to-day.

## President Wilson's Administration of Foreign Affairs.

EXTENSION OF REMARKS

OF

# HON. WILLIAM S. BENNET,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. BENNET. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD I include an article printed in the North American Review, by David Jayne Hill, on the subject of President Wilson's administration of foreign affairs.

The article is as follows:

PRESIDENT WILSON'S ADMINISTRATION OF FOREIGN AFFAIRS.

[By David Jayne Hill.]

Nothing is so important to the success of a nation in its intercourse with other nations as clearness, firmness, and continuity in the foreign policy of its Government. If foreign policy is to possess these qualities, it must not in any degree be affected by personal or partisan considerations. It must be based solely upon the national interests, with a due sense of the national responsibilities.

So long as a political administration adheres to this conception of its duty, it deserves the support of every citizen in whatever public action may be necessary. It would be an unworthy and unpatriotic act to weaken the Government in an emergency or to turn a national misfortune to political advantage. There are, however, circumstances that not only justify, but imperatively demand, a critical examination of the course pursued in the conduct of foreign affairs. These circumstances exist when there has been a radical departure from the established policies of the country. If, in addition, there has been a conspicuous failure to defend the rights of the Nation or its citizens and to provide for their protection, or to perform the obvious duties of a responsible Government, not merely criticism but public condemnation is demanded. When, however, such aberrations and failures are boldly defended as wise and commendable, and are boasted of as glorious achievements, they become unavoidable political issues, flung into the arena of debate in a manner that renders it impossible to ignore them.

We challenge comparison of our record—

Reads the Democratic platform of 1916—

with those of any party of any time. * * * Our foreign affairs were dominated by commercial interests for their selfish ends. * * * Under our administration, under a leadership that has never faltered, these abuses have been corrected, and our people have been freed therefrom. * * * It has made the honor and the ideals of the United States its standard alike in negotiation and in action.

Passing by the calumnious assertion that, prior to the present administration, "our foreign affairs were dominated by commercial interests for their selfish ends"—which has for its obvious purpose simply to forestall argument by abuse—in a quite different spirit, and with close attention to demonstrable facts, we shall examine in the course of this review the "record" on which are based the boast of a "leadership that has never faltered," and the pretense that the "honor and the ideals of the United States" have been "the standard of this administration in negotiation and in action."

When we inquire in what specific negotiations and actions this standard has been applied, we receive the answer: "Well, the President has kept us out of war"; as if such a merely negative incident as being "kept out of war," when no nation has desired to declare war upon us, were a complete fulfillment of the demands made by the honor and ideals of the United States.

Peace, without doubt, is one of our most cherished ideals; but no one will contend that a peace that has not been disturbed by threats is anything to boast about. The fallacy now being thrust upon the country is that there is no middle ground between the course pursued by the administration and war. These, it is pretended, were the only alternatives, and between them a choice was necessary. Had it not been for the wisdom of the administration, we are assured, we should have had war. By whom, we ask, were these alternatives presented? By whom, and when, and how, were we forced to this happy choice?

But, unfortunately, the "record" shows that, upon two separate occasions, neither of which demanded warlike action, the administration has provoked a dangerous situation, and has committed every act characteristic of war, including the invasion of foreign territory and the destruction of innocent lives, and has subjected our soldiers and sailors to every danger and consequence that war involves. That this unavowed belligerency has been characterized by an extraordinary combination of intrusiveness and timidity, of deferred decision and untimely action, and has been so hesitating as to make it ineffectual and so fruitless as to render it inglorious, does not in the least degree redeem these vacillations from being in reality acts of war. And if it be a noble service to have kept us out of war, what shall be said of the blunders that have needlessly involved us in it without a benefit?

There is, therefore, no reason why the most considerate and loyal patriot, having always in mind the true interests of his country, should entertain the least scruple about subjecting the administration's conduct of foreign affairs to a dispassionate review. On the contrary, in consideration of the extreme delicacy of our relations to other Governments at a time like the present, when the whole future of this Republic may be compromised by an error, it is of supreme importance that every citizen should satisfy his mind whether or not the national safety, prestige, and honor have been properly maintained, and to consider whether the course pursued deserves a renewal of confidence by the electorate.

Before entering upon a statement of the specific acts of the present administration at Washington and of the conditions they were intended to meet, it is desirable to consider the attitude of mind and the preparation for wise and effective action upon international questions with which the President approached his task.

Having long been a student of political theories and conversant with the history of the United States, about which he had written ably, the President was exceptionally fitted to set a high value upon experience in diplomacy; a fact which might properly have led him to surround himself with men of experience in these matters. On the contrary, making a clean sweep of the higher diplomatic representatives of the United States soon after his inauguration and promptly filling their posts (with some notable exceptions) with political supporters, the President selected for the head of the Department of State a statesman whose eligibility for that office was generally recognized as consisting mainly in the fact that the President owed to him his nomination to that office.

As if to make amends for the lack of experience in the conduct of international business on the part of his Secretary of State, the President named as counselor of the department one of the most distinguished international jurists in the country. Had this highly competent authority been placed in responsible charge of the department and its decisions left to his judgment, there would no doubt have been continuity and consistency in the course pursued; but for reasons that will presently be stated the service of this experienced adviser was rendered practically nugatory, except in matters relatively inconsequential; and after a year of ineffectual effort to serve as a balance wheel to the erratic energies of his superior officer, this learned and experienced counsellor, finding his advice unacceptable, in despair resigned his office.

In a matter of such vital interest to the country as its foreign relations, it has been felt that the Nation should enjoy the benefit of having in its service its best expert talent, and of keeping merely partisan interests and influence remote from the actual work of the Department of State, which should represent the whole country, and not merely a part of it that has won the election. Like the Army and the Navy, the foreign office and the Diplomatic Service when once properly organized should be kept as free as possible from purely partisan influence. It is discouraging, therefore, to read in the learned history of America's Foreign Relations, by Prof. Willis Fletcher Johnson, an entirely nonpartisan work, that with the advent of the present administration a change, "lamentable in character and some of its results, was the restoration of the partisan spoils system in the Diplomatic and Consular Service. For a number of years," this writer continues, "the civil service merit system had been increasingly applied to those departments. Men were promoted from place to place in accordance with their deserts, and were retained in the service without regard to political affiliations. But under Wilson and Bryan all that was changed. Some of the most expert and valuable diplomats of ambassadorial and ministerial rank were curtly dismissed to make room for inexperienced men who had been politically useful to the incoming administration. In some minor yet highly important places, especially in Latin-America, this process was carried to a scandalous extreme. The Secretary of State actually sent out a request to be informed of places to which 'deserving' members of his own party might be appointed; 'deserving' having reference only to their partisan and factional labors in promoting his political interests. In at least one con-

spicuous case this process resulted in the appointment of a man so grossly unfit as to give rise to an international scandal."

There was, however, another radical change brought in by the new Secretary of State, which has received less comment but has even more vitally affected the interests of the Nation and its prestige as an international influence than the one already mentioned.

Secretary Bryan came to his office with the consciousness that much distinction had been already won, and was yet to be acquired, by the advocacy of universal peace. Twice the Nobel prize had been awarded to distinguished citizens of the United States for their efforts in this direction. Great and powerful organizations had been formed for the promotion of peace, and President Taft had received much commendation for his efforts to advance the cause of the judicial settlement of international disputes, but without compromising the dignity and prestige of the United States.

With a noble infatuation, the new Secretary resolved to outdo all his predecessors. They had advocated courts of justice. He would apply a scheme that would make war impossible. No matter what circumstances might arise, the United States should never meet them with armed resistance. He would create a new era in human history. He would demonstrate that all men belong to one great fraternity, in which brotherly love should dominate over all selfish passions. To accomplish this only one thing, he thought, was necessary, namely, that some one nation, great in area, wealth, and population, should announce to the world that it was not only perfectly harmless but was willing, temporarily at least, to endure injury, insult, humiliation, and even contempt if thereby it could convince the world that the total abandonment of armed resistance and foreign aggression was possible to a great and powerful nation. This conspicuous example once placed before the world, every civilized nation, in admiration of such noble conduct, would for very shame mend its morals and manners and thus produce a universal reign of peace.

By nature an intuitionist, the Secretary considered all this entirely practicable. No one, it appeared, had ever treated international affairs in a strictly generous and neighborly way. He would try it. The "people" everywhere, he believed, would like and approve it. It would be original, even revolutionary; but so much the better. The Secretary, who had been considered the oracle of his party, was in need of a new watchword. "Free silver" had been repudiated. "Imperialism" had not been taken seriously. "Public ownership of railroads" had received little sympathy from his own party. "Predatory wealth" had not carried him to the Presidency. But "Universal peace"—that was a sentiment to conjure with.

With little comprehension of the real aims, methods, and ambitions of foreign Governments, and utterly oblivious of the deep antagonisms that were at that very moment brewing the stupendous conflict that has since shaken the whole of civilization to its foundations, Secretary Bryan felt no need of explicit information, and most certainly derived none from the outposts of our foreign service, for a long time wholly absorbed in the details of seeking domiciles in foreign lands, into whose purposes of state they had not penetrated. With a feeling that most Governments were too plutocratic really to represent the "people," he placed his reliance upon the power and disposition of the masses of mankind to overrule mere absolute authority. Taking as his standard the intelligent, independent, and well-instructed masses of our American citizenship, he believed all "peoples" to be like them. Their Governments might, perhaps, be warlike, ambitious, and dangerous; but he intended to have the "peoples"—whom he regarded as just, generous, and really devoted to peace—clearly understand that it was with them and not their rulers that he desired to deal.

It was a noble aspiration and does credit to the Secretary's private feelings, but the error was to suppose that private feelings are the materials of which public policies may be made.

Consistently with his theory of the perversity of rulers and the virtue of the ruled, he felt a lofty scorn of all official rules and precedents, and resolved to sweep aside not only all impediments of form and cermony, but all conventional customs and legal precedents as well, and to deal with nations as he would with his kindly neighbors, believing that, like them, all foreign "peoples" were really good at heart and would be equally ready to make everything over on a new pattern to be prescribed by him.

Personally, the diplomats all liked Secretary Bryan, as everyone does who personally knows his kindly optimism; but no one at first took him quite seriously. Then it was perceived that by yielding to his one supreme wish to become the hero of universal peace all minor matters could be easily disposed of, and as no one stood in fear of aggression by the United States, there was on the part of other nations no obstacle to embracing an opportunity for exercising a free hand in any direction they chose, with the assurance that the American Government, committed to a policy of inaction and postponement, would in no way interfere with whatever plans and purposes they might have in mind.

It would be incredible, if the facts did not compel the admission of it, that the appointed guardian of the interests and honor of a great nation in its world relations should so far forget the fiduciary character of his position as to believe himself entitled to substitute for settled public policies his own fantasies regarding international relations, and to leave practically out of consideration the responsibility of the Nation for the maintenance of existing international law, the right of the Nation to equal treatment everywhere, and of all citizens to the protection of their legal rights. What, for example, would be thought of a policeman whose idea of his duty permitted him publicly to announce that on his beat no one would be arrested and no one sent to jail? But this was precisely what Secretary Bryan did. He informed his colleague, the Secretary of the Navy, it was reported, that there would be no need to increase the number of ships in the United States Navy, or ever to use those already in existence; for, while he remained in charge of foreign affairs, there would be no war with any nation.

As all his subsequent conduct shows, Secretary Bryan was most earnest and sincere in making this statement, and was, no doubt, proud to have his intention published at home and abroad.

He was promptly taken at his word, and with equal promptitude he proceeded to carry his theory into execution. The previously existing arbitration treaties, which contained a reservation of questions involving the "independence, vital interests, and honor" of the country, the Secretary found insufficient; for the defense of these might some time lead to armed conflict, to which he was totally opposed. He therefore at once began negotiations with more than 30 powers, great and small, binding the United States to complete passivity in all circumstances for one year, until a mixed commission had decided whether or not a violated right might be enforced, or a wrong prevented, thus giving to great foreign powers an opportunity to inflict upon us an irreparable injury, and to small ones a way to escape punishment by subsequent apology or change of Government, in abeyance of our right to take preventive measures at the proper time.

The result of these treaties was that the United States was solemnly pledged, upon its honor, not to resent actively any insult, injury, or humiliation that any one of the adherents to this agreement might for any reason offer, and to rest content with making only a verbal protest until an entire year had elapsed. These treaties made no provision with regard to alliances between the other signatories contemplating possible united action which might involve the interests of the United States. They offered to the United States no immunities or exemptions in case, as a neutral power, it should be exposed to injury resulting from their mutual quarrels; and the cosignatories made no such agreements with one another as the United States made with them. In effect, therefore, the Bryan treaties simply eliminated from the thoughts and plans of Governments, hitherto restrained by consideration of what action the United States might take, all concern regarding the views or purposes of the administration at Washington—which, they were assured, would do nothing. And this assurance was perfectly well founded. There was a complete commitment of the United States to a passive policy, regardless of conditions, leaving all the adherents to these treaties free to do to one another, or with one another, and against the interests of this country, whatever they pleased.

Even the moral and advisory influence of the United States was thus seriously impaired; for, with the certainty that immediate action by our Government was out of the question, the advice of the United States no longer possessed any international value. It could not, under the new treaties, employ its military resources, such as they were, even to defend its own rights or those of its citizens until a year of discussion had ended.

The mistake in urging these engagements, by which the United States ceased to be an active agent in international affairs, was not, of course, in the earnest aspiration for universal peace; but in proclaiming and pledging the passivity of this country at a time when nearly the whole world was about to be involved in war, and when the influence of a nation depended wholly upon a belief in its firm determination to defend its own interests and stand fearlessly for its own principles. It is incredible that any well-informed person could have imagined

that such a scheme as that put forth by the Secretary of State could be made universal; or that it would be adopted by any of the great powers, not in formal alliance, as between themselves; and the effect has been just what might have been foreseen. It was an act of self-effacement on the part of a great nation in the midst of a world conflict, in which there was no need that it should participate, but which a valiant and self-reliant nation of the magnitude and former prestige of the United States might have influenced in important ways, had it not previously and voluntarily exposed itself to the complete neglect of other nations. Such a power as the American Republic has in the past sometimes shown itself to be, might have made itself the effective guardian of neutral rights, which have been violated in every manner conceivable. But, knowing beforehand that the United States, whatever happened, would positively take no action, the merely formal protests of our Government have been treated with inattention, and sometimes with open and continued defiance.

One historian has presented this situation even more emphatically than this. "Amidst this unprecedented profusion of irenic efforts," he says, 'and probably in part because of them and as a counterblast against them, preparations for the world's greatest war were at first furtively and then openly pushed to completion." Certain it is that when this conflict began no trouble was taken to inquire what the position of the United States would be regarding it; and sometime before that several European powers that had uniformly waited for the action of the Government of the United States before making a decision openly and unitedly recognized a Mexican government which President Wilson peremptorily refused to recognize. Before the administration was a year old it was evident that the prestige of this Government, which previously had taken the initiative in great world crises, and had been able to promote peace between great powers, no longer existed. Ineffectual in its own sphere of influence, as it soon showed itself to be, it had already become in the Eastern Hemisphere a completely negligible quantity.

What, in these conditions, was to become of the traditional primacy of the United States—as the oldest, largest, and most powerful of the American Republics—in affairs primarily American?

In 1913 Salvador, Guatemala, Panama, Honduras, and Nicaragua, and, in 1914, Bolivia, Costa Rica, Santo Domingo, Venezuela, Peru, Uruguay, Argentina, Brazil, Chile, Paraguay, and Ecuador, in the order named, were cosignatories with the United States of the treaty providing that all disputes between each of them and the United States, "of every nature whatsoever," should be referred to an international commission in which these Republics had equal representation, and that no action in any case should be taken for one year.

In this engagement there was no condition named regarding a change of Government, the assumption being that national entity is always persistent and that the parties bound by this contract are the de facto Governments of these Republics, whatever they may be. Upon no other assumption could these treaties possess any value or lead to any consequences.

The effect of this agreement theoretically was, of course, to end the tradition of primacy on the part of the United States and to place all these American Republics absolutely on an equal footing, regardless of their form of political organization, their governmental changes, or their responsibility for their conduct. Practically, however, as an older and more responsible member in this family of States, the tradition of the primacy of the United States could not be wholly ignored, for Europe, debarred by the Monroe doctrine from meddling with American affairs, held the United States in some degree responsible for law and order in this hemisphere; and it was certain that as soon as the regulative influence of this Government was wholly withdrawn that of European nations would take its place.

This obvious fact did not, of course, escape the attention of the present administration, but its doctrine of passive endurance removed the possibility of effective action and left the field open for a merely pedagogical intervention, laying down the rules that good Republics were expected to obey, with an intimation that bad ones would be held in disrepute, but overlooking the fact that the Secretary of State had sequestered the rod behind the teacher's desk.

An occasion for the first lesson was the condition of Mexico. The Madero Government, established in 1911, had been confronted with revolt in 1912, and early in 1913 had been overthrown by a counter revolution. In February of that year Gen. Victoriano Huerta, one of the ablest of the Mexican generals, having possession of the City of Mexico, Vera Cruz, and a considerable portion of territory, was endeavoring to pacify the country, which contained 6,000,000 Indians, 6,000,000 half-breeds, and about 3,000,000 white men, of whom only about 1,500,000 could read and write, scattered over 2,000,000 square miles, with an average of less than 20 persons to the square mile.

This situation at the close of President Taft's administration had caused grave concern in the United States. Would Huerta, who had superseded Madero in authority in Mexico, be able to subdue the anarchy of the country or would it continue? And if it did continue, how would it be possible to prevent American soil from being used as a base of supplies for a chronic revolution? That was a problem that President Taft had been compelled to face, and he had solved it by asking Congress to give him power to suspend the exportation of arms and munitions to any American country that might be employing them for domestic violence. This power was accorded to him and exercised by him, the Huerta control was making rapid progress, and European countries, confident of his success, were supplying him with financial aid; when, on February 23, 1913, only nine days before the expiration of President Taft's term of office, Madero, who had already resigned the Presidency, was shot and killed while a prisoner of state in the City of Mexico.

That the entire Mexican situation was an inheritance from President Taft's administration, and that President Wilson merely followed his example in the treatment of it, has been repeatedly asserted, with the inference that all responsibility for trouble in Mexico must be attributed to the previous administration. It is true that President Taft had not recognized the Huerta government, but it is also true that he had not committed this country to a policy of absolute nonrecognition. Without embarrassing his successor in the closing days of his Presidency, he left the question to be decided in the light of Huerta's future attitude and behavior toward the United States, and his de facto power and disposition to perform the duties of a responsible government.

The new administration pursued an entirely different course. Assuming without conclusive evidence that Huerta was personally responsible for Madero's death—a conclusion which Huerta himself denounced as a malicious accusation, and of which the American ambassador to Mexico, the Hon. Henry Lane Wilson, who had spent many years of service in Spanish-American countries, expressed strong doubts—it not only resolved never, under any circumstances, to recognize a government of which Huerta was the head, even though he were elected to the Presidency by the Mexican people, but to overthrow and destroy his authority, and supersede it by the organization of a new government in harmony with Mr. Wilson's own conception of what a truly constitutional government should be. In this unprecedented course, the action was not only in strong contrast with that of President Taft, who refused in any way to meddle with the internal affairs of Mexico, but a complete innovation upon the traditional policy of the United States, which had uniformly been to leave every independent country free to form and accept such a government as it is able to sustain, and to hold that government responsible for the protection of American life and property within its borders, and liable to the payment of indemnity for a failure to protect them.

Whatever his private character may have been—and it is no concern of ours what it was—Gen. Huerta indisputably was, and was declared by competent authorities to be, the head of a de facto government having its seat in the City of Mexico. Not only so, but his was the only responsible authority to which an appeal for justice could be made in that Republic.

In laying down the novel and dangerous doctrine that he would not recognize any Government in Mexico unless it was de jure according to his own standard of constitutionality," the President made himself the arbiter of a people's destiny; and, instead of aiding them in the support of a Government such as they were able to possess, he decreed that they should be subject to continued anarchy until they could evolve out of social chaos a form of government which he could sanction, to be placed in the hands of men whose private characters he could personally approve.

To carry out such an unprecedented program unusual means must be adopted, for the ordinary machinery of diplomacy is ill adapted to such an enterprise. Determined to overthrow Huerta, who was protecting American lives and property, the President, preferring advice from less responsible sources, at first ignored and then recalled the American ambassador; and, although still maintaining diplomatic relations through a chargé d'affaires, began privately to inquire, through insurgent Mexicans, as to who in Mexico could best carry out his purpose to destroy Huerta's government and establish one to his own liking.

Selecting as his "personal spokesman and representative" in Mexico the Hon. John Lind, a statesman of Scandinavian origin unfamiliar with the laws, language, and people of that country, the President instructed him to inform Gen. Huerta that fighting in Mexico must cease; that he must promptly abdicate; that he must pledge himself not to be a candidate for the Presidency of Mexico; that a constitutional election must be held; and that a government thus constituted, and none other, would be recognized by the United States.

So far as Huerta was concerned, this mission was utterly futile; and Lind, finding his orders disregarded, soon retired to a cloistered retreat at Vera Cruz, where he could hold parley with discontented Mexicans, by whom he soon became convinced that there were influences at work in Mexico which, if fostered and encouraged by the United States, could make serious trouble for Huerta. In the meantime the latter's secretary of state for foreign affairs, Señor Gamboa, in a strictly diplomatic and highly dignified note, replied that President Wilson had entirely misconceived the situation; that Gen. Huerta's position as "provisional President" was strictly in accordance with the laws and constitution of Mexico; that of the 27 States, 3 Territories, and 1 Federal District composing the Republic, the Government had 18 States, the 3 Territories, and the Federal District under absolute control, with an army of 80,000 men in the field to pacify the other States; that it was practically impossible to stop hostilities in that country so long as rebels secretly obtained arms from the United States (as they were said then to be doing); that the opposition to Huerta was of a wholly unwarranted character; and that the question of the Presidency must be decided at the polls by the Mexican people at their next election. In reply Lind was instructed to repeat the demand for a constitutional election, at which Huerta must not be a candidate, adding that if these conditions were complied with a loan of money would be supplied by the United States. Gamboa indignantly spurned this type of "dollar diplomacy" as a virtual attempt at bribery; Lind remained at Vera Cruz to watch the effect of his deliverances; the chargé d'affaires continued to reenforce them at the City of Mexico, where he was most kindly treated by Huerta; and on August 27, 1913, President Wilson announced at Washington to an acquiescent but somewhat disquieted Congress his conviction that Huerta should be compelled to retire from authority in Mexico and some other person be selected for the Presidency of that country.

Perceiving that without the employment of armed force, directly or indirectly, his recommendations were nugatory, he then instituted a system of secret diplomacy unparalleled in history since Louis XV, sending his private agents, responsible to himself alone, into Mexico to ascertain which one of the several rebel leaders would be most effective in overpowering Huerta and most amenable to his purpose in constituting a new government for Mexico. In the meantime six great powers had recognized the Huerta government and their citizens were taking its securities.

Although the bandit Francisco Villa, at that time well known in Mexico as a professional brigand, and later furnishing the occasion for an invasion of Mexico by an army of the United States—in preference to Carranza, Zapata, and the others—was favored by the secret agents as the most auspicious candidate for the political regeneration of Mexico, no effort was made to discourage any of the other insurgent elements, on the principle that the first necessity was to destroy Huerta; yet at that time the only safe place for American residents in Mexico was within Huerta's jurisdiction, and wherever his authority was effective, as in the City of Mexico, their persons and their property were as safe as in New York.

As a result of the secret conferences of his agents in the insurgent camps the President, on December 2, 1913, officially announced to Congress his policy of "watchful waiting"; that is, of waiting to see which of the insurgent forces would succeed in destroying Huerta's government. On February 3, 1914, in order to facilitate this operation, he officially removed the embargo on the shipment of arms and munitions to Mexico, thus completely reversing the policy of President Taft; and any group of marauders was at liberty to equip itself for the successful looting of the country. Villa was enabled to gather to his standard a large and well-furnished army; and four months after "watchful waiting" was announced, on April 2, 1914, after 11 days of hard fighting, this bandit had captured from the Federal troops the important town of Torreon.

In the meantime evidence was pouring into the Department of State showing that in the zone of insurgent activity American citizens, unable to obey the department's injunction to escape from the country, were being robbed and killed and their women violated in their houses or on the way to the United States; that churches were being desecrated, priests assassinated, and nuns outraged. Upon protestation by a Catholic clergyman that these abominations were the work of the followers of Carranza and Villa our Secretary of State is said to have retorted, as if in extenuation, that he was informed that the followers of Huerta had committed similar outrages on two American women from Iowa; but he did not say what action had been taken by the department in that case.

Does the correspondence with the Huerta government show that indemnity for such outrages was ever demanded? There is no sign in the instructions to Lind that any American interests were to be protected. On the contrary, the instructions read that he is "to give every possible evidence that we act in the interest of Mexico alone, and not in the interest of any person or body of persons who may have personal or property claims in Mexico." There is no published complaint regarding the exposure of life or property within Huerta's jurisdiction.

Repeatedly the Senate has asked for the reports of outrages committed upon American citizens in Mexico and for the correspondence with the Huerta government, but these requests have been declined as "incompatible with the interests of the United States." Although the exchange of notes with European Governments has been followed by their prompt publication, only a few isolated communications between the United States and Mexico have been published in any form. The private correspondence of the secret agents has never been open, even to congressional inspection. From other sources, however, we know that Lind was obsessed with the idea that the crux of the Mexican problem was the Anglo-American relations, and that the way to solve it was by the removal of the embargo on arms, thus enabling the insurgents to destroy Huerta's government, and then to recognize the one that would best please the Government of the United States, Villa being at that time the most promising candidate for that distinction.

That there was united opposition to the President's course in Mexico on the part of the great powers there is no doubt. All were amazed at it, and to some extent resented it. It was not the nonrecognition of Huerta's government, but the attack upon him which they deplored. They knew that the overthrow of Huerta meant a long period of anarchy in Mexico unless the United States intervened with overwhelming force to prevent it. That ultimate American occupation was the real underlying purpose was suspected and, of course, not desired. Still if nothing was meant but the destruction of an existing government, with no intention of constructing another except by the slow, devastating process of Mexican insurgency, what was to become of foreign interests in Mexico?

Were there, then, actual combinations by the European powers to sustain Huerta and defeat the Government of the United States? Their archives will some day answer this question. We know that in November, 1913, the Multicolor, an illustrated newspaper published in the City of Mexico, brought out a cartoon in which England, Germany, and France were represented as painting the White House green, the expression "to paint green" being a Spanish idiom for insult and vituperation.

In January and February, 1914, there were other indications of strained relations. When, therefore, on March 5, 1914, just a year after he had entered actively upon his office, the President read to Congress, as out of the blue sky, an imperative message, couched in language so extraordinary and so mysterious as to arouse the curiosity of the whole country, it was felt that the Nation was facing a crisis, the more portentous because its true nature was in no way explained.

In this message the President demanded the immediate repeal of a clause in the Panama Canal act of August 24, 1912, providing for the exemption of tolls for our coastwise vessels, legislation which his own party platform had specifically approved, and which he himself had personally supported. It had been argued that in passing from New York to San Francisco an American coasting vessel was virtually merely skirting the shores of the United States, notwithstanding the fact that its course enveloped the whole of Mexico. But other powers had interests in Mexico. Was there a united protest filed in Washington regarding exclusive jurisdiction over the Panama Canal as an American possession? It is not intended here to discuss this subject. But we can not overlook the dramatic form of the President's urgency. "Without raising the question whether we were right or wrong," on the ground that foreign nations took a view of it different from our own, he declared, "I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure."

Who could deny to the President a request thus urged? Who could refuse, however much puzzled, to come to the rescue of the administration's foreign policy, so soon menaced with possible disaster? But what necessity made this rescue so imperative? The archives may some day answer. Perhaps the President was merely frightened. In any case, we are left to wonder what could be of "greater delicacy and nearer consequence" than the performance of an international duty if that were the sole cause for action unless it might be a national right, if that also was to be considered? And if it was merely a question of right or of duty, why not submit it to judicial determination, and thus forever dispose of it in a legal manner? But a crisis in foreign policy that required immediate retreat! Who exacted it? For what purpose was it exacted? What permission, otherwise to be withheld, was to be obtained for it? The country has not been informed. Perhaps the immediately subsequent action of the Government at Washington may throw some light upon it.

---

**Eight-Hour Day.**

## EXTENSION OF REMARKS

OF

## HON. CHARLES A. LINDBERGH,

OF MINNESOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. LINDBERGH. Mr. Speaker, the controversy between the railways and their employees is not one of whether the trainmen receive as much in proportion to the value of their service as persons working in other places do, on or off the railways. It is not a dispute between the toilers. It is a claim by trainmen for an absolute right—not all of their rights, but for an eight-hour standard day. Other laborers, on the railways or elsewhere, are not barred from taking steps to secure their rights. Organized wealth can not hide behind the plea that trainmen should ask for nothing merely because they may have more pay than other toilers, even if that is so. It is not comparative wages, nor comparative income of the toilers in different fields of labor, that the railways want.

You can depend on it that the railways do not want the "comparative-pay" problem considered; for when that is done it can be done right only by considering the relations of capital and labor as a whole, not merely the workers on the railways, but the workers in all fields of enterprise, whether for wages or otherwise. That has never been done. When it shall be done it will provide the means by which all the toilers will get better pay than the best paid do now. Congress, legislatures, executives, courts, and commissions have all neglected the "comparative pay." The railway magnates have smiled with satisfaction because they did, and I wonder that so astute persons should have suggested a comparison, even in the limited way they did.

The authorities that have administered the Government laid down the rule that has given capital a so-called "reasonable profit," but in applying the rule the rights of toilers in all the fields of activity, whether working for wages or working on their own account, farming, manufacturing, in general business, or otherwise, their respective and relative rights with capital have not been weighed or taken into account in applying the rule of the so-called "reasonable profit" to capital. Therefore, the rule as applied is wrong. Capital has secured too much. Farmers, wage workers, and plain workers generally, as well as the smaller business enterprises, are entitled to more than they get. Capitalists are not entitled to the bulk of the wealth. Nevertheless they have it. Considering these facts, and knowing that the public officials are responsible for the failure, it has been a wonder to me that the voters did not long ago strike and select officials who would apply the rule equitably.

We are so accustomed to seeing business done for speculation primarily, rather than from necessity, that we allow many business absurdities to be practiced that destroy economy. The idea that many existing practices could be abandoned to the everlasting benefit of humanity seems not to have occurred to the masses.

The United States has greater and better resources than other countries. We need not go to them, or have them come to us, for our prosperity. We do not, however, make use of our resources for America first. What are those who call themselves the only "true Americans" doing with our resources? Take a peep at a couple of items of foreign commerce. That will be sufficient to tell the tale.

Petroleum, out of which we get gasoline and some other products, is an important commodity of great use to Americans. Petrol, before Europe took our export, cost the American consumers only 75 cents per barrel for Kansas-Oklahoma grade, and $1.54 for Pennsylvania grade. The export raised the price on one from 75 cents to $1.55 per barrel and on the other from $1.54 to $2.60 per barrel. The American consumption for 12 months in 1915 and 1916 was 211,933,000 barrels and the export was 55,466,086 barrels. The cost was increased 80 cents on the western product and $1.06 on the eastern per barrel. Allowing for an equal consumption of each, the increased cost of one was $84,000,000, and of the other $111,000,000—an additional burden to American consumers for petrol alone in a single year, of $195,000,000. The sum exceeds by a very large amount the total amount collected for the 55,466,086 barrels exported.

August 3, 1914, copper cost the American consumer 12¾ cents per pound. May 3, 1916, copper, because of export, had risen to 29½ to 30 cents per pound. The American consumption of copper is also vastly more than the export. Anyone can see what happens to the plain American consumers because of raising the price from 12¾ to 29½ and 30 cents. That is the kind of trade organized wealth wishes to force Americans to maintain a large Army and Navy to fight for. On copper alone for a single year American consumers were forced to pay an additional cost of approximately $120,000,000 over normal prices—all because of juggling in foreign trade for speculation. The supply of copper is forever less. Each generation of Americans will be forced to pay additional billions because of this sort of speculation.

On iron and steel the loss to American consumers was even greater than on the items named. Shoes would show another great loss to American consumers, and so I could run through the items of export and before I had them half tabulated it would prove that the export trade serves principally as an adroit device to jack up prices to American consumers, thereby forcing the American people to pay in excess of the price we would otherwise pay, a sum more than equal to the value of all exports.

The exports for 12 months in 1915 and 1916 were $4,334,000,000, offset by $2,198,000 imports only. The American press, largely under the wing of organized wealth, seeks to make us believe that we are getting rich by giving away more than we get in return. They seek to make us believe what organized wealth has, we too have. Instead, we are forced to pay interest, rents, and dividends on what it has. They say we are getting richer. The rich Americans are getting richer, and the rest of us are forced to work for them.

The figures I have given are for war times and, of course, larger than they are in times of peace. The same practice is followed all the time—the speculators handle the business, domestic and foreign, solely as a speculative scheme.

True, most American toilers are busy just now working, and wear and eat more than they did before we exported so much; just now busy, like the farmer's team during seeding time—but we have not the favorable status of the farmer's team which is always fed and sheltered, work or no work. Organized wealth, on the other hand, when the toilers protest because they do not secure their rights, threaten to stop the "feed." Now that trainmen demand an eight-hour day, organized wealth calls on its United States Chamber of Commerce, with its kindred civic and commerce aids in the cities, to bamboozle Congress by taking "referendum votes," votes secured by organized wealth for organized wealth. The misfortune of it is that the honest members in these associations are made to believe that there are no cards "stacked" for special privilege. On March 10, 1916, I extended remarks under the head, "A nation muzzled by false national honor." Facts are there presented sufficient to prove to any unprejudiced mind that the United States Chamber of Commerce and many affiliated associations were created for the express purpose of building up a machine in the interest of organized wealth, and to do its bidding in the manner that is very evident at different times here in Congress.

UNITED STATES IN THE WAR.

The railways just now are desperate, because the truth of the situation, though disguised by the subsidized press, is that Wall Street has forced us to take part in the European war. The American people do not generally realize it, but when certain European countries guaranteed to certain Wall Street speculators the privilege of scalping enormous profits from American purchases and contracts of various kinds, it implied that in the event these countries should finally need help in order to win Wall Street would have fanned up some blaze in our own country to bring it about. We have been party to the war as effectively

as if our Army and Navy was used. We have sent from our country in 12 months alone goods and materials amounting to $4,334,000,000, most of which were supplies to carry on the war, and in order to extort money from our people, the prices of gasoline, copper, and numerous other commodities were raised to make us pay additional sums more than equal to the value of the total exports. Fine condition, is it not, when Wall Street can force us into war at its option? The extraordinary "preparedness" propaganda is a part of that scheme. Wall Street passed through Congress the super Army and Navy bills. Wall Street wishes to be in shape to force and finally enter our Army and Navy into a war of foreign conquest, if that serves its interests best. It wants the Army and Navy to do with it as it pleases.

Senator LA FOLLETTE stated it truly in a speech in the Senate, on July 19 last. His speech plainly includes the facts that show that organized wealth can bring about war at its own sweet will, and may do so to satisfy its own greed, and therefore has paid a part of its profits from the wars to carry on the so-called "preparedness" campaign, in order to get a large Army and Navy to deal with for its own purposes.

July 5, 1916, with your consent, I extended some remarks, and I believe I stated some conditions that can not be successfully challenged. Among other things, I said:

"We have heard a great deal of late about the rights of Americans in foreign lands. I have not fooled myself by any false notions of these, nor do I hold the rights of Americans, wherever they are, as of light importance. On the contrary, I respect them as of the highest importance, but if any distinction in regard to their rights were to be made between Americans at home following their honest, peaceful pursuits in the United States and Americans abroad, I should resolve that distinction in favor of maintaining the rights of Americans at home. When that is done there will be no lack of vigor on the part of those at home to protect those abroad who may be acting within their proper province. We have over a hundred million at home all the time, while there are but a few thousand abroad at any time. I do not favor indifference to the rights of the hundred million at home pursuing their occupations in the United States and strict vigilance to maintain the privileges, at whatever cost, of the few abroad. I am for America first. When United States Americans secure their rights while in America there will be protection for those elsewhere, too."

Organized wealth frames everything, domestic and foreign, to crystallize its rule. It does now, has heretofore, and seeks in the future, to rule politics, government, and business, all three, in order to maintain the special privilege it already has and to get as much more as it believes it can fool the people to suffer, and is invading foreign fields at the expense of our people. It employs tricks which, if they become generally known, it is not conceivable that the plain people will be so supine as to permit to continue. I discussed the methods of organized wealth July 5, 1916, in the RECORD under the head of "Invisible government and the consequences of it." Organized wealth is at work against the trainmen also, as I will quote a few lines from my remarks of July 5, as follows:

"Mr. Speaker, I extend these remarks in the hope that they may be of interest to the country, for I know that the facts that I present are important and should be understood by everyone. No matter what individual professions and party claims may be to the contrary, it is apparent to anyone who has been more than four years a Member of Congress that the will of the people in regard to legislation is seldom consulted. The price of leadership here is exactly the opposite of carrying out in good faith the will of those whom we are elected to serve. Wholesale deception of the electorate has been and is now the means most successfully used to secure office and remain in public life. Committees that meet in secret and party caucuses held behind closed doors restrict legislation strictly to such measures as are desired by 'special privilege,' or to manipulate and emasculate legislation made to conform to popular demand in the title clause only. The bosses know how, and they use their knowledge, when all other means fail, to so manipulate a disagreement between this body and the Senate as to completely avoid in conference such a compliance with the popular will as would in any degree benefit those who send us here and pay our public salaries.

* * * * * * *

"The plain truth is that neither of the great dominant political parties, as at present led and manipulated by 'invisible government,' is fit to manage the destinies of a great people, and this fact is well understood by all who have had the time, and have used it to investigate. So far as these parties are concerned the people may truly say, 'For here is no continuing city, but we seek one to come.'

* * * * * * *

BIG BUSINESS ON THE JOB.

"Enormously important problems will arise as a result of the wars. The trusts are determined to control these problems in their own favor, and use every adroit method to parade the machine officeholders as the only 'true Americans' in office. The Senate, being the smaller body, and practically having a veto on many problems that are presented that are of foreign concern, it is the body most sought by 'big business.' The Senate has become the seat of the most vicious political practices that politics makes possible. It is not, however, so much to get new laws and further special privileges that big business now so desperately seeks to control the Senate for an additional period. Big business needs no more laws, but it wants to control in order to prevent any laws from being passed in the interest of the people which would destroy the special privileges it already has. It frequently spends hundreds of thousands of dollars to elect to the Senate men whom it can control. It is important to know how it is done.

"I think there was a conflict in my own State over the office of Senator between two of the candidates, either of which in the absence of the other's candidacy would have been acceptable to 'big business.' One of these had been governor for a long time, and the special interests knew by his record that he would do nothing to disturb big business even if it were gathering in most of the profits from the work of the toilers. He had certainly done nothing to disturb them while he was governor. The other of the candidates that would be satisfactory was a trained and special attorney for many of the trusts."

* * * * * * *

The primaries immediately at hand, enormous sums of money supplied by the Money Trust, Steel Trust, and other big business, to be tapped, to make it go the way the trusts wished. The typewriters, telegraph, the telephone, and all the other agencies were put to work simultaneously, and no time was left for the people to learn other than from those who had become interested through the channels described. The leadership of each organization, including the church, had different purposes in supporting the same man, and each expected to be satisfied, but the rank and file of the people who are the members will find that by following blindly the leadership, they have again placed their necks in the yoke of the influences that have created a Government by and for the trusts instead of by and for the people.

Wall Street market reports discussed a recent slump in stocks. It was claimed that the President had pledged to make good to the railways their loss for an eight-hour day by giving them an increase in freight rates and make the public pay the bill. Stocks fell, because it was claimed Wilson might be defeated; but this was soon offset by a counterstatement, as follows:

It did not seem to occur to the traders that the Democrats can go out only to make place for the Republicans, and that such a new administration would be friendly to big business. * * *

That is it exactly. That results in the end from partisanship rule. The leaders in both of these parties have been ruled by organized wealth. Partisanship government is wrong in principle, but it took time to demonstrate that in practice. I say this without reflection upon the individual citizen or the public official who is partisan, for after all, when one finds a condition which is too big and too strongly rooted for any one single handed, or less than a majority, to uproot, we can not condemn him for being partisan. But I do not deceive myself, nor wish to deceive any one else with the idea that there is any prospect of having fairness out of any partisan system. Furthermore, if the real facts were placed before all men and women, so they might see how they are deprived of the best advantages, it is not conceivable that they would continue to follow a system which inevitably leads to special favors. The revilers of human rights now supply the literature that conceals actual facts and conditions, and pretend that certain conditions exist that do not exist. Since the people do not supply their own literature, they accept what comes to them with doubts, but the doubt is so vague that not many have the time or opportunity to sort out from the common mass of literature the true from the sham. It is not the voters in the dominant parties who are subservient to organized wealth, but "big business" has employed tricks to fool the rank and file of the voters; so instead of electing officials to represent the people in their own interests, the voters have unwittingly elected men whom "big business" rules. Yes, the Wall Street market reports deal with the facts frankly as shown by the quotation. Hundreds of other such reports are available, but I will not cumber the records with them.

If this Government was administered for the people instead of for party leaders and organized wealth there would be no strikes to deal with. Strikes have no justification, except in the fact that organized wealth has violated the most sacred laws of government and perverted government into a rule for itself.

Under those conditions strikes are not only excusable when orderly, but are sometimes necessary. With partisan control, however, we can not rid ourselves of the rule by organized wealth. Organized wealth furnishes the "dough" for the dominant political party campaign committees. It thereby retains a "stand in" with the party leaders. It pays the campaign expenses of the candidates that it can depend upon and pays the subsidized press for booming them and for excoriating their opponents. The voters are so often deceived by this method that they elect a majority of the officials, who wittingly or unwittingly are ruled by organized wealth. Therefore "big business" gets practically what it wants and prevents the people getting what they need most.

No one who understands American politics need be ignorant of the purposes of the President's message in regard to the strike. No assurance is given to the American people in the message, when practical politics are taken into consideration. It is good enough in its appearance upon paper. It is committed to the eight-hour day, which, measured with any longer period, is right; but we would have the eight-hour day anyway, and the main effect of the President's intervention is to secure, if possible, an increase of commissioners on the Interstate Commerce Commission to consider a raise of freight rates—exactly what the railways are fighting for. Right there is the trap. If in enlarging the commission politics are played, as they were in the creation of the Federal Reserve Board, the commission would be packed with new commissioners who would take the view of organized wealth in making the adjustment. It will all be covered up by the "fine hand" of "big business," like the perfidity of the Federal reserve act was.

Before the passage of the Federal reserve act "big business" made the people believe that it was opposed, but has now hired all the prominent writers who would swerve their language for money to praise it and publish the articles. Since the passage of that act organized wealth feels secure. It has "Uncle Sam" in its grasp and the credit of the Nation to back its schemes. It owns the large banks, and they rule the Federal reserve banks. "Uncle Sam" gives them all the credit they want practically free. With the use of that credit they exploit the world and charge the American people the "freight."

I challenge anyone to present an argument with a grain of truth in it denying that American credit has been extended to Europe and other countries and made the excuse to keep the interest rates high in America. The big banks are robbing the railways by high interest rates, and the railways come to the Interstate Commerce Commission to have it jack up the freight rates. The big railway magnates own these big banks, so they can rob the smaller stockholders in the railway and at the same time appeal to the people for sympathy. You can see the game. It is all to increase the income for the big banks, and incidentally the railway dividends may get a little by increasing freight rates.

If the Wall Street bunch had not ruled for the last 30 or more years and had not engaged to have America supply materials and back up the credit of Europe to carry on the war, interest rates would now be less in America. Over $1,000,000,000 credit has recently been given to foreign lands, out of which sharp financiers scalped a big profit. But their direct profit is a mere bagatelle compared with the profit they make by keeping the interest rates high to American consumers of credit. As there are near $100,000,000,000 debts and stocks which the American people pay interest on, the sharp financiers find it to their advantage to juggle domestic and foreign credit. By juggling of credits they are able to keep the rates of interest 2 or 3 per cent above what they otherwise would be. At even 2 per cent it costs the American people an excess of $2,000,000,000 annually. The injustice of it is that this credit is supported by the very people to whom it is charged. It could not be done except for the deposits the people place in the banks, coupled with the Government backing the same speculators with the Government credit.

Organized wealth knows full well that Europe will be bankrupt when the war ends—in fact, is now. Europeans are now living largely upon products from American toil, for which but small pay will ever come back. We produce for them instead of for ourselves. It is our "system," or rather the one forced upon us. Bonds and notes of foreign countries gotten by sharp financiers are sold to American small investors. When the crash comes, as it will in a few years, organized wealth will have unloaded. It has already scalped its profits, so what does it care except to keep things smooth as long as there are other schemes to play before the public will be permitted to know.

Even organized wealth may get a jolt from Europe. Europe is trading its gold for our valuable products. About 1908, on the floor of this House, when the Aldrich-Vreeland monetary forces were doing the groundwork for the Federal reserve act, I suggested that Europe might see before America would that gold is not indispensable as a money, and might before we realized that unload its gold on us in exchange for our valuable products, and then demonetize gold. When the war closes we may find all the gold of the world on our hands or have contracts for it. We will be the big creditor nation, and instead of having used our vast products for Americans first, that we might have plenty and be happy, we will have parted with much of our goods, thus forcing the American consumers to pay billions of dollars more than they otherwise would, and the plain people still not have enough, and in payment we may find ourselves in possession of what Europe can by simple decree destroy the value of. All the rest of the world may demonetize gold and make American greed look like 10 cents.

There is a remedy for all this, but that remedy would not suit organized wealth. The remedy is Government ownership of the principal instruments of production and distribution; that is, the public utilities, the transportation, financial exchanges, facilities for the transfer of information, and insurance. With public ownership and operation of these there would be no such monopolies as exist now, and no 2 per cent of the population would own 60 per cent of the wealth as it is now.

There would be a development of business for the people themselves, not as speculators nor as the victims of speculators, but development along the lines of production for the use of the people. Why can we not be busy producing for ourselves to secure greater conveniences instead of for foreigners? We can increase and conserve our products for America first. No sane, thinking person can believe that we need a foreign field in which to sell our goods. For whatever we need from abroad we can easily exchange of what we have that foreigners need. That is all the foreign commerce that is worth anything to the American people. I realize that it will be said that we were not busy before the war commenced, and that we have been since, and that that is proof that we need foreign commerce. I admit that if we let organized wealth rule, as we have been doing, that they will let us work and produce just when it suits their selfish purposes, but that is no reason why we should not know that if Government and business were run on a system suited to all our needs, we would find ourselves in possession of the instrumentalities to keep most profitably busy all the time.

I do not make this statement as one to fully cover the social problems, but merely to call attention to some of the inconsistencies in our work here in Congress. I have simply called attention to some things that the subsidized press have never dared to discuss with any degree of liberality. But, Mr. Speaker, to merely think of these things will lead to nothing. I appeal to you and to my colleagues, but more particularly to the American people, to consider these remarks and certain other remarks which I recently extended, on invisible government and the consequences of it, not because they are my remarks but because I have assembled some facts that seriously present problems for the people to solve. The people of our own country are paying billions of dollars annually that amounts to simple extortion. I call attention to the money, transportation, war, and other trusts, united as they are, forming the "power behind" the "political machines" that is forcing us to build a Navy and create an Army, with the intention to use that Navy and Army in wars of conquest, and not primarily intended as preparedness for a defense of our national rights. It is, on the contrary, for the selfish purpose of promoting the schemes of organized wealth. Anyone who reads the evidence and examines the records and sees the signs everywhere visible knows that the people will have to be more alert than they have been heretofore if they prevent its going through. The evidence on which the Navy and Army bills were based prove that conclusively to any unprejudiced person. Nothing but an inordinate fear for the safety of the country can justify those who believe in "America first" to stand for the program. But that does not prevent organized wealth putting it over the people and finally making them believe that it was wise, because if they force us into wars, they will say, "Why, here you see how wise we were when we advised the Nation to go into the extraordinary expenditures to start with, for here we are in the awful throes of war, and what if we had not been prepared?"

Mr. Speaker, colleagues, and Americans everywhere, in the inception the remedy lies with the people. As a people we can not afford to be partisan any longer. The evidence has accumulated, and the proof is conclusive, that government by party simply means government run by leaders who are ruled by organized wealth. There is one way only to have a government of, by, and for the people, and that is for the voters to strike against partisan rule—the rule which means the few against

the many. If the voters continue to elect men to Congress and other high places who are in sympathy, thought, or association, either a part of, or under the influence of, organized wealth, it can only result in further increase in the cost of living and creation of a still greater financial imperialism. No one who loves his country or honors the Star-Spangled Banner, the flag of the brave and true, should allow himself to be lashed into party prejudice to help foist upon the United States the forces that now rule. In the name of that flag and for the people let us obliterate party lines when these important measures are presented, for the American people will place the country above party and vote for the men who stand by the people's cause.

Organized wealth keeps its eye on politics. It makes that a part of its business. It contributes liberally to the leading politicians whom it can rule, and these politicians, say to the voters, "Don't mix politics and business." "Big business" sees to it that it has control of the politicians, because that enables big business to control legislation to suit its business. It mixes politics with business. Look at its United States Chamber of Commerce. Look at all the civil and commercial clubs and associations that it has organized. Look at numerous other ways, too many to mention, it has for controlling politics and influencing legislation. Whenever any one tells the plain people upon the farms, in the shops, in the stores, and elsewhere, that they should not mix business with politics, they are simply the mouthpieces of organized wealth. The running of government is a real business matter, the most important business, and connects with all other business, and vitally effects the results of the work of everyone.

---

**Address of Cardinal O'Connell, of Boston, at the Convention of the American Federation of Catholic Societies, at New York, August 20, 1916.**

---

## EXTENSION OF REMARKS
OF
# HON. PETER F. TAGUE,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. TAGUE. Mr. Speaker, under the leave granted me by the House to extend my remarks in the RECORD, I will insert the speech of Cardinal O'Connell, of Boston, before the American Federation of Catholic Societies, at New York, August 20, 1916:

[From the Boston Post, Monday, Aug. 21, 1916.]

CHURCH AMERICA'S BEST DEFENDER—STANDS ALWAYS FOR LIBERTY UNDER LAW, SAYS CARDINAL O'CONNELL—DEMANDS REAL LIBERTY.

NEW YORK, *August 20.*

Cardinal O'Connell, archbishop of Boston, spoke on the topic "Our Country" at the opening to-night of the convention of the American Federation of Catholic Societies. His address follows:

"OUR COUNTRY."

"A land, broad and fair and free, its shores washed by two mighty oceans; its giant mountains guarding priceless treasures; its trackless forests yielding the hoarded wealth of centuries; its mighty rivers bearing the fortunes of untold millions; its endless myriads of resources still but scarcely touched and beneath their surface boundless realms of prosperity and abundance; that is our country—that is what in our admiring love for it we, the children of this great Nation, are wont, with good reason, to call God's own country, America. No empty rhetoric is this; not fancy, but fact furnishes the reason of our enthusiasm for such a birthright as every citizen of America can call his very own.

"Were this a gathering of financiers eager for still greater wealth, of merchant princes yearning for still bigger markets, of adventurers sighing for still richer fields, the story of this country's material resources, of mines still hidden, of rivers still wasted, of railroads still unplanned, in a word, the recounting of the money power of all these things still waiting to be energized, would be a theme to thrill such an audience, eager to learn more and more of all of America's future and America's promise to those who can wrest her secrets from her and lead the way to her boundless treasure house.

"And yet, when all that fascinating story has been exhausted, the true core of the hold America has upon our faithful love still remains unrevealed. And so to those who like you here present are dominated not by mere material aims and hopes and selfish purposes, but by nobler and higher impulses and instincts and ideals, the enumeration of the sources of wealth of our country, while interesting enough to hear, will still leave you not unimpressed but almost apathetic and cold. And the reason is not far to seek.

MILLIONS BORN ONLY TO TOIL.

"For well you know that out of the teeming millions of our population few indeed will ever be asked to sit at the banker's desk; few, very few, will ever occupy a chair at the board meeting whose sole business is to count its wealth and make it grow to even larger proportions. By far the great bulk of the people in America, as elsewhere, will ever bear the burden of the day and the heat, and the unknown millions here, as in every other land, must daily bend to the weight of toil and labor, a toil and labor which well we know grow at times into a burden almost intolerable. Surely to these millions the story of the wealth and resources of America must have but a small fascination, since they know full well that they will never either see them or touch them or hold them.

"There is but one thing in all this world that for these millions of toilers can lighten their burden and lessen the weight of their labor. It is that sacred light shining through the gloom of the workman's life which converts its heavy burden into a joyous hope. It is that sacred spark of heavenly fire which, amid all the benumbing pettiness of a sordid life, gives him the courage and the spirit of life, his eyes to the level of every man, however far above him, with a sure sense of fundamental equality.

FREEDOM HIS HAPPINESS.

"It is the knowledge that he is a man as any other man, whatever his station; that he is neither chattel nor thing nor possession, but an individual, a person, free in body, in mind, and heart; in a word, the one thing that constitutes his earthly happiness is his freedom. That is the wealth dear to the human heart beyond all the kingdoms of the world. And that, more than all the treasures of this country, is the very heart and core of the love we all bear for America.

"It is because America is the home of freemen and because over all alike waves her sacred banner of liberty that we love her with a love next only to that we owe to the kingdom of God. It is because every man living on her sacred soil can say those three little words, 'I am free,' whether he be rich or poor; that whatever his race or color or creed, he can tread the earth upright and freely measure the power of his brain and the strength of his sinews with all the other millions of men about him; it is because he has a Government which he helps to make and an opportunity which he helps to create; that he is hemmed in by no legal disadvantage; that he is neither bondsman nor serf nor slave; it is because of this, and this alone, that every citizen of this land loves her with an undying love and strives for her stability and perpetuity.

NO MAN LAW TO HIMSELF.

"Take away freedom from a nation and what is all the rest? The deep mines of gold and silver and copper, the endless wealth of industries, with the comforts and luxuries they purchase, what are all these without freedom? Nothing, nothing, less than nothing. It is as if you had blinded a man and then in mockery bade him gaze at the beauty of the heavens. Even in a gilded cage the prisoner beats upon the bars, tears them and rends them, or dies still crying the heart-rending cry of the human soul—liberty.

"And what is liberty? Since it means so much to all human life that nothing can take its place or supplant it, it is well to study just what it is and what depends upon it. One thing we know is certain—that upon our answer hangs not only our own individual happiness but the very existence of America itself. For if it is true that America has given us liberty, it is truer still that liberty alone can preserve America. This is no paradox, but the simplest truth. Let us see. If by liberty is meant that every American is a law unto himself, then let me say here frankly and fearlessly that neither America nor any other land ever had the right to grant such liberty. For America, good as she certainly is, never has intended to be so good as to destroy herself. And nothing is more certain than this, that any nation granting to each man the right to be a law unto himself, that moment signs her own death warrant.

FREEDOM UNDER LAW.

"There certainly can be no need to labor this argument. Is there anyone in the whole land who does not see that under such terms of liberty there can be neither crime nor criminal, neither court nor prison, neither law nor lawgiver, nor property, nor rights, nor State, nor Government? Such liberty of America would mean her suicide. That much must be clear to everyone. And since we see all about us courts and legislatures, the officers of government, and the prisons for criminals, the clear interpretation must be that even American liberty means freedom with restraint, a freedom according to standards fixed and settled by law. Indeed, liberty and law must always go hand in hand.

"Now let me ask, since restraint must ever accompany true liberty, in what is a free man truly free? The only answer to that question is he is free for good, not for evil. And here we are at once before another all-important question—What is good and what is evil? And since it is the purpose of civilized government to answer that question in every statute it frames, we pass immediately to the dilemma, between the horns of which every organized State must finally be driven, either the absolutism of tyranny formulating its own inflexible decrees of right or wrong, and maintaining itself by force alone, or the divine right of justice resting upon the eternal principles of God and inscribed upon the Nation's statute books as the highest guide to all her citizens.

NO LAW WITHOUT GOD.

"This means, if it means anything at all, that as there can be no liberty without law there can be no law without God. And so every human being in search of liberty must inevitably accept one or another of these three things—absolute anarchy, absolute State tyranny of the law founded upon the eternal principles of Divine justice, either the whim of a tyrant resting alone on force of arms or sacred law founded upon the principles of religion, or no law at all. Let him seek and seek forever, but from this inexorable logic he can never hope to escape.

"It follows very clearly from this that the State which throws off religion must by inevitable necessity accept either anarchy or tyranny, and both end in utter destruction. No one who knows anything at all of past history can help seeing that this is the positive teaching of facts. The whole story of Rome and Greece and Assyria and Egypt point clearly to this one only conclusion. Every single one of them was founded on a religious basis of law. And whatever of strength they gathered or gained they wrested from popular faith in those principles. As in time the falsity of their superstition became manifest their false divinities were thrown to the winds. Yet utterly false as they were they lent some fundamental ideas of a spiritual responsibility to a power outside and above themselves.

WARNING VOICE OF HISTORY.

"So long as that idea of responsibility lasted it gave strength to authority and power to the nation. When the people discovered the folly of their own incredulity all authority went with it and anarchy was at the door. And soon luxury, effeminacy, avarice, and the whole family of human vices weakened every shadow of law, and the greatness and power of all these nations utterly disappeared. For a short while the tyranny of absolutism was substituted for the restraint, in which even their superstitions served to hold them. But soon the

tyrants met the usual fate of all tyrants, the door was suddenly wrenched open, the eternal enemy, the barbarian, stood in the threshold, and a great empire had fallen.

"It is a far cry from America to ancient Assyria and Egypt, and yet from out the graves of fallen empires the warning voice of history speaks even to this youngest of all the nations, our own America. But nearer, much nearer, comes many another warning. Not once, but a hundred times, have even the modern Christian nations learned the awful cost of that lack of eternal vigilance which alone can safeguard liberty.

EUROPE REAPS HARVEST.

"And even to-day poor, blood-drenched Europe, though she strive to hide even from her own eyes the true cause of this suicidal war, is at last thoroughly convinced that the Voltaires and the Vivians, the Haeckels and the Nietsches, the Tolstois and the Huxleys, the Kants and all the rest of that monstrous brood, who for now many years have impoisoned the thought and embittered the heart of the student youth, are now reaping their terrible but abundant harvest.

"The children before whose eyes the crucifix, the sign of renunciation and restraint, was torn from the wall of the schoolroom, and from whose little books the very name of God was blotted out in infamy, the generation trained in the selfish principle whose chief dogma was 'Let us live to-day for to-morrow we die,' are dying by the millions. And unless an all-merciful God soon rescues Europe, only a small fragment will be left to tell the story, the bitter, heart-rending story of how much sorrow and suffering it takes to lead a nation out from the blindness of infidelity up again to its ancient vision of God, of the law of Christ, and of the happiness of a Christian state.

THIS NATION ON TRIAL.

"No, the lessons are not far to seek; but who, even now, takes the pains to read them? Even to-day when all Europe is expiating its crime against God and its desertion of His law on every square of our great cities an apostle of open infidelity is shouting his gospel, his appeal to the millions. Freedom, freedom, is their cry and their shibboleth. Free thought, free life, free love, that is their trinity and their whole gospel. We know there are thousands—yes, hundreds of thousands—who are rushing to meet that cry—men who want neither law nor restraint nor government of any kind. Their conventicles are wide open, their existence is no secret. But there are millions—yes, millions, and the number is growing yearly—who though not openly joining their ranks have accepted their principles. Anyone who knows anything at all of this country must know that this is the actual condition of things; and knowing that, can he for one moment doubt that this Government and this Nation are on trial for their very life in a thousand tribunals all over the land?

LAYING AX TO ROOT OF TREE.

"Do you think that people like these, who have cast aside God and law, are merely looking calmly on while a few, by fair means or foul, are gathering in such wealth as even emperors have never dreamed? And do you think that the child whose only catechism teaches him that God is a myth, that property rights are legal robbery, and that marital laws are sheer nonsense, is going to grow up to-morrow an inactive witness of the intolerable conditions all about him? Do you think that he is not waiting for the day when he will be big enough and strong enough to put into violent practice the solemn lessons so sedulously taught him? Why the very streets of the whole Nation are filled with the cries of every manner of doctrine against organized society and all that it stands for and everything upon which it rests. Here under our very eyes the ax is being laid to the root of the tree. We have only to look to realize that the very cornerstone of our Government is menaced from a hundred different angles.

"If ever America needed the whole-hearted love of her children, it is to-day. If ever she needed to prepare, not merely to guard against attack from without, but more, a thousand times more, against dangers which threaten her very existence, it is to-day—dangers all the more insidious that they don the cap of freedom and clothe themselves in the garb of guardians of liberty.

CAN DEPEND ON CATHOLICS.

"I know there are thousands, yes millions, of our best citizens who see these dangers and are alert to their malicious and corrupting influences. But of all that vast array of those who love America upon none may she so surely and reliably depend in every need and emergency as upon the 18,000,000 Catholics, who are proud to be at the same time subjects of the kingdom of God on earth and citizens of America.

"It is not we Catholics, but the leaders of all the non-Catholic bodies who openly declare that Protestantism has lost its hold upon the masses—that every year hundreds of their churches are closed and those still left open are half empty. It is not we, but the Protestant leaders themselves who say that the descendants of those who a century ago held a living faith in God, in Christ, and in the tenets of their belief have in our own day drifted into open infidelity and skepticism that has eaten out the whole fabric of their faith.

"And if they who best know avow these things, then undoubtedly they must be true. And if this is true, then it means just one thing—that the moral fiber and the moral principles upon which alone this Government depends for its strength is just so much the weaker; and it is equally true that American liberty has just so many less to defend it and to safeguard it.

"We are making no accusations here—we are merely repeating the very words of hundreds of those who are recognized as leaders and prophets among their own coreligionists.

GROWTH OF CATHOLICISM.

"But side by side with these admissions is the other fact which we know, and which they all know quite as well as we: One of the startling phenomena of the age is the tremendous growth of Catholicism in America—a growth so startling and so impressive and so urgent that each year it taxes to the utmost capacity the ever-increasing number and size of the churches and the tireless labor of bishops and priests whose care it is to minister to them.

"And it is well for the present and future of America that this is so, for here at least is a religious organization upon whose sterling and steadfast worth she can absolutely rely as the very corner stone of law and order, the prop and support of government, and a bulwark against corrupting forces of anarchy and decay, of irreligion and infidelity.

"Look out over the whole field of the Nation's activity and tell me what other organization in that whole field has her experience in dealing with the great masses of the people. What other organization has won as she has, and as she to-day right here in America possesses, the full confidence and loyalty and respect of the general population? Why are her churches forever overcrowded and her ministers forever overworked? Surely there must be an answer to this question.

NO GOVERNMENT OWNS CHURCH.

"Ask the ordinary man in the street and he will tell you it is because no government owns her, but all government needs her. It is because she will minister to the rich, but not one nor a thousand capitalists can purchase her or dominate her. It is because she holds the rich to a moral reckoning, and the richer and more powerful they are the less she flinches. It is because in a world which has gone mad for wealth she stands by the poor. It is because even from the poor she can still exact duty and virtue. It is because, though she loves all the outcasts and victims of the selfish world she can unflinchingly make them throw down the arms of vengeance and take up the cross.

"It is because she loves even the blackest sinner and sends to his knees the false-hearted pharisee. It is because before her altar all men are equal, not in words but in very truth. It is because not one of the 20,000,000 who in America call her by the tender name of mother, but knows that, though all the world forsake him, whether in shame or disgrace, in sorrow or in black despair, her arms are always open, through the whole day and through the darkest night, in love to his embrace, to strengthen him, to guide him, to comfort him. It is because of all the whole world he has found her alone always the same.

INFLUENCE OVER HEARTS OF MEN.

"These and a hundred other motives, if you care to listen, the man in the street will give you as the reason for the church's hold upon the people and the people's unwavering affection for the church. And this wonderful and universal influence over the hearts of men is the reason why no one who has the welfare of the whole people at heart can afford to ignore her.

"We are well aware of the suspicions with which she is regarded, the jealousy which her influence arouses. To the suspicious she answers, 'Here are my principles, read them; they are no secret, but the same for all alike.' And to those jealous of her influence she replies, 'Is thy eye evil because I am good?' Though her enemies and those who distrust her ask her brutally, 'What do you want, and what are you after here?' she answers frankly, honestly, and sincerely, 'Nothing but liberty. We want only what is our right, the right of every legitimate organization in this whole country; no more, no less.'

DEMANDS PERFECT LIBERTY.

"'We are strengthening your hand as a Nation by strengthening the moral fiber of the whole people. We teach them to love America even when often they can see small reason for unselfish affection. We teach them to obey your laws and respect your authorities; we care nothing for your mines, your wealth, or your riches. We are neither a trust nor a syndicate who seek to control your franchises or exploit your resources. We inculcate truest patriotism, founded upon divine law. We are here to help men to keep alive the light of their souls, the hope of heaven, the love of God. That and that alone is why we are working here. And for that we demand and insist upon our perfect liberty—a liberty which in the end brings far more help to you than you can summon from any other organization living under your flag.

"'We have not committed to this country the safeguarding of our lives, our fortunes, our property with any other understanding than that in return for our loyalty you guarantee us protection in what to us is the most essential of all human rights—religious liberty.

"'We ask no favor. Your protection of our liberty is no favor—it is a part of this dual contract between our country and ourselves. We pledge ourselves to keep our part—see to it that you keep yours as sacredly. We have a right, an unquestionable right, to legitimate representation in all the affairs of the country. If you discriminate against us you are not keeping your contract; we are not getting true liberty.

NOT TRUE LIBERTY.

"'If because a citizen is a Catholic a thousand plausible pretexts are set out to discard him and discredit him in your cabinets and your courts, you are not keeping your contract; this is not liberty. If you stand by inactive while under your very eyes—yes; through your very mails which we pay for—we are insulted, scurrilously maligned and openly villified, in filthy journals and nasty, indecent literature, unfit to be printed or read, spread broadcast that dupes and bigots may be poisoned against us, so that we may be robbed even of our public rights, then you are not keeping your contract; this is not liberty.

"'You are only wounding the hand, the strongest hand held out to help you; you are spurning the aid of those who again and again you have found in your hour of direst need the most willing to die for you.'

"Oh, yes; we know very well the whole litany of accusations against us. We give only a divided allegiance. We are scheming for government. These are all lies so patent that they need no answer. Indeed, those who fling them out will never listen to any answer. But I am going to answer them once and forever here to-night.

"As a cardinal I may be supposed to know what I am saying on this subject. And on my word as a gentleman of honor I am speaking the simple, absolute truth.

"I have known intimately, personally, and officially three sovereign pontiffs—three Popes of the Catholic Church. I am a priest now 32 years; I am a bishop 15 years, and a cardinal 5 years. I have had the closest relations with not only the Pope but the whole Roman cura. I know well every priest in my diocese and every bishop in this country. Yet never, never in all that experience have I ever heard spoken, lisped, or whispered, or even hinted, by any or all of these anything concerning America and American institutions but words of affection, of tender and kindliest solicitude for her welfare; never a syllable that could not be printed in the boldest type and distributed throughout the land; neither plot nor scheme nor plan; but only sentiments of admiration and love. If there is plotting I ought to know it. Yet absolutely and honestly of such things I have never heard even a whisper.

"This is my answer to all these insinuations. That I know the truth, I think, no one will deny; that after such a pledge I am still concealing the truth, that I must leave to those who, I repeat, will never listen to my answer.

ALLEGIANCE NOT DIVIDED.

"The Catholic civil allegiance divided? Why, look across the sea, to where all Europe is in arms. Every Catholic is fighting loyally, giving his very life for his own country. And though some of these countries have merited little gratitude from any Catholic, still the very priests are in the trenches, each a defender of his native land. Where, I ask of any honest witness of these facts under his very eyes, where is

this divided civil allegiance? And the Pope—is there one in this country who, after this war, will ever dare to accuse the Pope of interference in civil affairs or of weakening the loyalty of citizens?

"Behold him, the universal father of the faithful, looking out over all the world, and weeping and praying for the peace of all the nations, offering solace and counsel to all alike—a lonely, pathetic figure like Christ—begging the world to listen that he may heal all and help all. The world knows the truth to-day of the position of the Pope in relation to all the nations. Not another word is needed.

"Our country—the land which above all others we love most—God keep you free from such enemies, the worst of all that confronts you, whose hate would rob your most faithful sons of that for which they love you—liberty, true liberty, blessed holy liberty—the freedom to worship God.

"Beyond our lives we love our faith, and with these same lives we stand ready to defend the land which gives us liberty.

PURPOSE OF FEDERATION.

"These are the sentiments of every Catholic throughout the land, these the sentiments of every member of the Catholic Federation of America. It is that these sentiments may be better understood and more widely known that the federation exists and works and strives.

"This great metropolis may well be proud of this gathering here to-night; yes, and America may well thank God that the Catholic Church, heeding neither malice nor slander, goes peacefully along her glorious way, fortifying the souls of men with the hope of a blessed immortality, and building up the strength of the nations as she passes. For they who adore the King of Kings and recognize His dominion over all the world are always they who also learn to bow reverently to the just mandates of earthly authority.

"Such, America, is your good fortune—that while from a thousand sides your very existence is threatened by false and pernicious principles, the Catholic Church and this Catholic federation stand ever ready in your defense by safeguarding the sanctity of law and the sacred principles of government.

"The Catholic Church and all her children abiding here love America with a sacred and undying love for the liberty she has promised to secure for her. Let America also learn to love the Catholic Church and Catholic federation as the stanchest safeguard of American liberty."

## Speech of Theodore Roosevelt.

"I come to advocate the election of Charles E. Hughes as President of the United States, and the election of a Senate and House of Representatives to support him, and to give some of the reasons why in my judgment it would be a grave misfortune for the people of the United States to reelect Mr. Wilson."

# EXTENSION OF REMARKS

OF

# HON. JOHN R. FARR,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. FARR. Mr. Speaker, under the leave granted by the House, I insert in the RECORD the speech of Theodore Roosevelt, made at Lewiston, Me., Thursday evening, August 31, 1916, as follows:

SPEECH OF THEODORE ROOSEVELT.

I come here to Maine to advocate the election of Charles E. Hughes as President of the United States, and the election of a Senate and House of Representatives to support him, and to give some of the reasons why in my judgment it would be a grave misfortune for the people of the United States to reelect Mr. Wilson.

I make no merely partisan appeal. I ask the support of all good citizens for our cause. I ask the support of all good Americans. And I not merely ask, but demand as a matter of right, that every citizen voting this year shall consider the question at issue from the standpoint of America, and not from the standpoint of any other nation.

The root idea of American citizenship, the necessary prerequisite for patriotic service at home and for service to mankind at large is that there shall be in our citizenship no dual allegiance. There must be no divided loyalty between this country and the country from which any of our citizens, or the ancestors of any of our citizens, have come. The policy of the United States must be shaped with a view to two conditions only: First, with a view to the honor and interest of the United States; and, second, with a view to its interest of the world as a whole. It is therefore our high and solemn duty both to prepare our own strength so as to guarantee our own safety and also to treat every foreign nation in any given crisis as its conduct in that crisis demands. The citizen who does not so act, and who endeavors to shape America's policy in the interest of the country from which he or his ancestors have sprung, is no true American, and has no moral right to citizenship in this country. Any attempt to organize American citizens along politico-racial lines is a foul and evil thing. Any organization of American citizens which acts in the interest of a foreign power is guilty of moral treason to the Republic. It is because of such action that I condemn those professional German-Americans who in our politics act as servants and allies of Germany, not as Americans interested solely in the honor and welfare of America; and I would condemn just as quickly English-Americans or French-Americans or Irish-Americans who acted in such manner.

Americanism is a matter of the spirit, of the soul, of the mind; not of birthplace or creed.

WE CARE NOTHING AS TO WHERE ANY MAN WAS BORN

or as to the land from which his forefathers came, so long as he is whole-heartedly and in good faith an American and nothing else. If the man is a good American, we care nothing as to his creed, whether he be Protestant, Catholic, or Jew; we care nothing whether his ancestors came over in the *Mayflower*, or whether he himself was born in England or Ireland, in France or Germany, in Scandinavia or Russia. Some of the very best Americans I have ever known were men who were born abroad; and in every great period of American history the Americans who deserved best of their country have included men of different creeds, men whose ancestors had for generations lived on this soil, and other men who themselves, or whose parents, had come from some of the lands of the Old World. But all these men alike acted as Americans and nothing else, and with an undivided loyalty to this Nation, and not with a half loyalty to this Nation and a half loyalty to some Old World nation.

During the last two years we have seen an evil revival in this country of non-American and anti-American division along politico-racial lines; and we owe this primarily to the fact that President Wilson has lacked the courage and the vision to lead this Nation in the path of high duty, and by this lack of affirmative leadership has loosened the moral fiber of our people, has weakened our national spirit, and has encouraged the upgrowth within our own borders of separatism along the lines of racial origin. When our own Government so acted as to bring shame on all our people, it shook the spirit of loyalty among those to whom it was vital that loyalty should be taught. Full-hearted allegiance is shattered by the government that fails to uphold the honor and interest of the nation by immediate and effective action when the lives of its citizens are menaced or taken by foreign powers.

THE CAUSE OF PREPAREDNESS THE CAUSE OF AMERICANISM.

The cause of preparedness is inseparably connected with the cause of Americanism, of patriotism, of whole-hearted loyalty to this Nation, and to all for which all the great men of this Nation in the past have stood. The events of the last two years have made it evident that the dreams of the professional pacifists were not merely dreams, but nightmares, so far as the unfortunate nations who trusted them were concerned. Moreover, in practice these pacifists have shown not only utter futility, but moral baseness. They have not only been helpless to defend themselves, but they have been so anxious to save their own skins that they have not dared to say one word against triumphant wrong and in favor of the right that was crushed by the wrong. There are few things more revolting than such an attitude when taken by professional moralists.

As the world now is, our great free democracy must understand that unless it can protect itself by its own strength—and its strength is not strength at all unless it is carefully trained in advance—it will sooner or later suffer the fate that China is suffering before our eyes. Thanks to the fact that President Wilson has sometimes led us wrong, and sometimes not led us at all, and that at the best he has merely followed afar off when convinced that it was politically safe to do so, we are at this moment no more prepared to defend ourselves than we were two years ago when the world war broke out. At last we have begun the work of restoring our Navy to the position it formerly held;

BUT IT WILL TAKE YEARS TO UNDO THE HARM DONE

when in 1910 the Democratic Party gained control of the House and stopped upbuilding the Navy; and it is entirely impossible to make the Navy what it should be made as long as we have a President who appoints and retains at its head a public official of the type of Mr. Daniels. Our Regular Army should be increased to a quarter of a million men, with a short-service term of enlistment; this would give us a mobile army of 125,000 men, enough to patrol the Mexican border without help from the National Guard, when Mr. Wilson halts between feeble peace and feeble war. But this is not enough. The events of the past two years have shown that no people can permanently preserve its freedom unless that people is trained to arms. Above all, this is true of a democracy. The enjoyment of right must go hand in hand with the performance of duty. Universal suffrage

can not be justified unless it connotes the performance by every voter of full duty to the State both in peace and in war. The man who refuses to fit himself to fight in righteous war for his country is not fit to vote in that country. We should follow the examples of the free democracies of Switzerland and Australia. There should be in this country a system of universal obligatory military training in time of peace, and in time of war universal service in whatever capacity the man or woman shall be judged most fit to serve the Commonwealth.

The policies of Americanism and preparedness, taken together, mean applied patriotism. There should be correlation of policy and armament. Our first duty as citizens of the United States is owed to the United States. But if we are true to our principles we must also think of serving the interests of mankind at large. In addition to serving our own country, we must shape the policy of our country so as to secure the cause of international righteousness, fair play, and humanity. Our first duty is to protect our own rights; our second to stand up for the rights of others. President Wilson has signally failed to perform either duty.

THEY CAN BE PERFORMED ONLY BY DEED.

Words alone are useless. But, above all, fine words about abstract qualities which are contradicted by unworthy deeds in concrete cases are much worse than useless, because they teach us habits of hypocrisy, and because they cause other nations to regard us with utter contempt. President Wilson, in his Decoration Day speech, said:

We hold dear the principle that small and weak States have as much right to their sovereignty and independence as large and strong nations.

These were the fine words. They were spoken about the abstract. When it became his duty to reduce them to deeds in the concrete Mr. Wilson immediately flinched. The case of Belgium exactly met his definition. It was a small and weak State (and a highly civilized and well-behaved State). Its "right to sovereignty and independence" was trampled under foot by a neighboring "large and strong nation." But as soon as the need for deeds arose Mr. Wilson forgot all about "the principle he held dear." He promptly announced that we should be "neutral in fact as well as in name, in thought as well as in action," between the small, weak, unoffending nation and the large, strong nation which was robbing it of its sovereignty and independence. Such neutrality has been compared to the neutrality of Pontius Pilate. This is unjust to Pontius Pilate, who at least gently urged moderation on the wrongdoers. The President's fine words were used merely to cloak ignoble action and ignoble inaction. All Americans proud of their country should keenly resent the wrong he thereby did their country.

As an American with exceptional international knowledge has said:

* * * A single official expression by the Government of the United States, a single sentence denying assent and recording disapproval of what Germany did in Belgium, would have given to the people of America that leadership to which they were entitled in their earnest groping for the light. It would have ranged behind American leadership the conscience and morality of the neutral world. It would have brought to American diplomacy the respect and strength of loyalty to a great cause. But it was not to be. The American Government failed to rise to the demands of the great occasion. * * *

At this moment Mr. Wilson and Mr. Wilson's fuglemen advance as his greatest claim that "he has kept us out of war." This claim can be seriously made only by individuals who indorse President Wilson's belief that deeds are nothing and words everything. War means a clash between the armed forces of two countries. Nowadays—thanks quite as much to the professional pacifists as to the militarists—it means, furthermore, the destruction of the lives of civilians and the property of civilians, as well as the property of the Government. Under President McKinley we had a war with Spain. Under President Wilson we are assured that we have had "peace" with Mexico. These are the words. Now for the deeds. During the War with Spain fewer Americans were killed by the Spaniards than have been killed by Mexicans during the present "peace" with Mexico. Let me repeat this. A greater number of

AMERICANS HAVE BEEN KILLED BY MEXICANS

during these years, when we are officially informed that we have been at peace with them, than were killed by the Spaniards during our entire War with Spain. Moreover, when the War with Spain was through it was through. But peace still continues to rage as furiously as ever in Mexico. Nor is this all. The instant effect of the outcome of the War with Spain was to put a stop to the dreadful butchery and starvation in Cuba and the Philippines, and the entry of both Cuba and the Philippines on a career of 18 years of peace and prosperity such as they have never known before in all their checkered history. But during these three years of Mr. Wilson's "peace" the Mexicans themselves have been butchered by their own bandits steadily and without intermission; and Mexican women and children have died by thousands—probably by scores of thousands—of starvation and of the diseases incident to starvation. In other words,

MR. M'KINLEY'S WAR COST LESS BLOODSHED

than Mr. Wilson's peace; and it reflected high honor on the American people; whereas Mr. Wilson's peace has been one of shame and dishonor for the American people, and one of ruin and bloodshed for the Mexicans themselves.

Mr. Wilson says we have had peace with Mexico. He says he did not wage war with Mexico. If he takes any comfort out of this denial, let us not insist upon the proper terminology, and admit that he merely waged peace with Mexico. Well, as one incident of his waging peace, we took Vera Cruz. Some 75 men wearing the American uniform were killed and wounded, and three or four times that number of Mexicans. In Mr. McKinley's war we took Manila, and Dewey's fleet lost fewer men in the operation that resulted in the fall of Manila than were lost in the taking of Vera Cruz. Under these conditions, of what earthly consequence is it to assert that the taking of Vera Cruz was an act of peace and the taking of Manila an act of war? Only by a misuse of terminology, only by the use of an incorrect nomenclature can we distinguish one military operation from the other.

The real difference was that Mr. Wilson became frightened and abandoned Vera Cruz, whereas Mr. McKinley did not abandon Manila. Mr. Wilson's operations were war just as much as Mr. McKinley's. But Mr. Wilson was beaten in his war. It was a war which was entered into pointlessly and abandoned ignobly; it was a war which failed; a war which did damage both to the Mexicans, and ourselves and which in its outcome reflected infinite dishonor upon our Nation. But it was a war nevertheless.

Again, in March last, Villa made a raid into American territory. He was a bandit leader whose career of successful infamy had been greatly aided by Mr. Wilson's favor and backing. He was at the head of Mexican soldiers whose arms and ammunition had been supplied to them in consequence of

MR. WILSON'S REVERSING MR. TAFT'S POLICY

and lifting the embargo against arms and munitions into Mexico. They attacked Columbus, N. Mex., and killed a number of civilians and a number of United States troops. On the next day the President issued an announcement that adequate forces would be sent in pursuit of Villa "with the single object of capturing him." On April 8 the announcement was made from the White House that the troops would remain in Mexico until Villa was captured. It was furthermore announced in the press dispatches from Washington that he was to be taken "dead or alive." Fine words! Only—they meant nothing. He is not dead. He has not been taken alive.

On May 12 the pursuit of Villa was formally abandoned. On June 1 the official figures of the dead and wounded during this futile expedition were published and they showed that the killed and wounded included

116 UNITED STATES SOLDIERS

and 95 American civilians. Since then the Mexicans have killed many more. I notice, for example, in the press that at Decatur, Ala., there has just been buried Claude Bates, an American soldier, who died July 24 of wounds received two days previously in a fight with Mexican bandits. Every week I have seen press statements of the killing of American Regular soldiers or American civilians on the border. I do not know the total number of these killings since June 1, but they include the Carrizal massacre. However, even before June 1, in this futile expedition against Villa, more Americans had been killed and wounded than in all the fights by land and sea during the Spanish War, save only the Battle of Santiago itself. In other words, during this murderous "peace" of Messrs. Wilson and Carranza, in less than three months

MORE AMERICAN BLOOD WAS SHED

than in the destruction of the Spanish fleet at Manila, and than in the destruction of the Spanish fleet off Santiago, and than in the taking of Manila, and than in the fight at Guasimas; in short, in all the operations combined during the Spanish War, save only the actual Battle of Santiago itself. And yet there are persons who seemingly take comfort in speaking of one set of operations as being war, and who praise the other set as being part of our "policy of peace"—the blood-stained peace of Messrs. Wilson and Carranza.

You do not have to accept my statement of conditions in Mexico. Accept the official statement of President Wilson's

Secretary of State to Carranza on June 20 last, which runs as follows:

For three years the Mexican Republic has been torn with civil strife; the lives of Americans and other aliens have been sacrificed; vast properties accumulated by American capital and enterprise have been destroyed or rendered nonproductive; bandits have been permitted to roam at will throughout the territory contiguous to the United States and to seize, without punishment, or without effective attempt at punishment, the property of Americans, while the lives of citizens of the United States who ventured to remain in Mexican territory or to return there to protect their interests have been taken, in some cases barbariously taken, and the murderers have neither been apprehended nor brought to justice. It would be difficult to find in the annals of the history of Mexico conditions more deplorable than those which have existed there during these recent years of civil war. It would be tedious to recount instance after instance,

OUTRAGE AFTER OUTRAGE, ATROCITY AFTER ATROCITY,

to illustrate the true nature and extent of the widespread condition of lawlessness and violence which have prevailed. During the last nine months in particular the frontier of the United States along the lower Rio Grande has been thrown into a state of constant apprehension and turmoil because of the frequent and sudden incursions into American territory and depredations and murders on American soil by Mexican bandits, who have taken the lives and destroyed the property of American citizens, sometimes carrying American citizens across the international boundary with the booty seized. American garrisons have been attacked at night, American soldiers killed and their equipment and horses stolen, American ranches have been raided, property stolen and destroyed, and American trains wrecked and plundered.

The attacks on Brownsville, Red House Ferry, Progreso post office, and Las Palades, all occurring during September last, are typical. In these attacks on American territory Carranzista adherents, and even Carranzista soldiers, took part in the looting, burning, and killing. Not only were these murders characterized by ruthless brutality, but uncivilized acts of mutilation were perpetrated.

And this is Mr. Wilson's own official account of the "peace" he has secured in Mexico! In this official statement President Wilson gives the final result of his policy in Mexico for the past three years. I call your attention to the fact that he states that the attacks on the four enumerated American towns in September last were "typical," and says that—

In these attacks on American territory there were Carranzista adherents and Carranzista soldiers, who took part in the burning and killing. Not only were these murders characterized by ruthless brutality but uncivilized acts of mutilation were perpetrated.

President Wilson therefore explicitly shows that the Carranzistas, not once but repeatedly, made attacks on American towns and killed American citizens and mutilated them in September, 1915. Yet on October 19, 1915, less than a month later, this same President Wilson, through his same Secretary of State, formally announced to Carranza's agent that it was his "pleasure" to take the opportunity "of extending recognition to the de facto government of Mexico, of which Gen. Venustiano Carranza is the chief executive." President Wilson thus recognized the government which, his own Secretary of State declares, had been less than a month previously engaged in repeated assaults upon Americans and in the invasion of American soil, the Government at whose head was Gen. Carranza, who, less than two months previously, on August 2, 1915, had contemptuously refused to pay any heed to any representations of President Wilson on behalf of mediation, saying that "under no consideration would I permit interference in the internal affairs of Mexico." President Wilson did not merely kiss the hand that slapped him in the face; he kissed that hand when it was

RED WITH THE BLOOD OF AMERICAN MEN, WOMEN, AND CHILDREN

who had been murdered and mutilated with, as President Wilson, through his Secretary of State, says, "ruthless brutality."

In all this shameful history of Mr. Wilson's dealings with Mexico during the past three years nothing has been more shameful than his conduct at Tampico.

At that time the particular bandit Mr. Wilson was favoring happened to be Villa. This, however, is of no consequence. Mr. Wilson has sometimes helped the different Mexican leaders of bandits against one another; now Villa against Huerta; now Carranza against Villa; but he has never stood up effectively for American rights against any of them. When he has ventured to take action against any of them, he has always hastily abandoned the attempt as soon as the resistance by the bandit involved became serious.

At Tampico there was a general movement of attack by the Mexicans on Americans and other foreigners. We had a squadron of American warships in the neighborhood. The Wilson administration declined to permit this squadron to be used to defend the lives of American men and the honor of American women, and the commanders of the German and English ships at Tampico had to step in and perform the task our representative had so basely abandoned. At the very time that the Mexican mob had surrounded the building in which the Americans had taken refuge and was howling for their blood the American fleet, in spite of the protests of the American naval commander and in accordance with wireless orders from Washington, was forced to steam out of the harbor and

LEAVE THE AMERICANS TO BE MASSACRED

by the Mexicans or rescued by the Germans or English. The case has been set forth in full and without successful contradiction by an expert in naval matters, Mr. Reuterdahl. I wish to say with all gravity and in all seriousness that in this case the offense of the murderous Mexican mob was not as serious as the offense of the American administration.

On August 27, 1913, President Wilson said with marked oratorical effect: "We shall vigilantly watch the fortunes of those Americans who can not get away from Mexico." "Vigilant watching"—"watchful waiting"—the phrase matters nothing; for there never is any deed to back it up. Three years have passed since the date of this oration; three years of incessant elocution on the part of Mr. Wilson; three years of repeated invocations to humanity and peace by Mr. Wilson; and Mr. Wilson still continues to "vigilantly watch the fortunes of those Americans who can not get away." There are not many of them left now. Hundreds have been killed, and Mr. Wilson has watched their fortunes as disinterestedly as if they had been rats pursued by terriers. This administration has displayed no more feeling of responsibility for the American women who have been raped, and for the American men, women, and children who have been killed in Mexico, than a farmer shows for the rats killed by his dogs when the hay is taken from a barn. And now the American people are asked to sanction this policy in the name of peace, righteousness, and humanity.

Throughout this time President Wilson, in pursuance of the policy he enunciated in his message to Congress in December, 1914,

HAS KEPT THIS COUNTRY UNPREPARED TO FIGHT

any foreign foe. But he has allowed all of the factions in Mexico to prepare themselves to kill American soldiers and American civilians. In his message above quoted he says that he will "follow the best practice of nations in matters of neutrality by forbidding the exportation of arms and munitions of war of any kind from the United States to any part of the Republic of Mexico." This was on August 27, 1913. On February 2, 1914, he changed his mind—Mr. Wilson may have a single-track mind, but, as has been remarked, in that event he possesses unexampled switching facilities—and lifted the embargo on arms and munitions. On February 5 the papers published the news of the great rush of arms and ammunition across the border to the Mexican armies. A couple of hundred of American soldiers, sailors, and civilians were killed or wounded during the next two months. And on April 23, 1914,

MR. WILSON AGAIN CHANGED HIS MIND

and ordered that the embargo on arms be restored. But on May 15 he changed his mind again, and the embargo was lifted so far as shipments to Tampico and other Mexican ports were concerned. On May 27 the cargoes of arms which we had refused to allow to land at Vera Cruz were accordingly landed elsewhere and sent to Huerta, while on June 2 the Carranzistas got theirs through Tampico. On September 9 the embargo was lifted everywhere, and during the next few months military supplies of all kinds crossed the border for all of the Mexican factions.

On October 29, 1915, when all the factions had been amply supplied, Mr. Wilson again restored the embargo as to all factions excepting the Carranzistas. On October 29 last, therefore, Mr. Wilson specifically permitted arms to be sent the adherents of the very same Carranza, who according to his own Secretary of State, in the month of September, 30 days previous, on four specific occasions, invaded American territory and butchered American citizens, mutilating them before or after death. On the date when this embargo was thus raised the names of 276 Americans who had been murdered had been officially placed on file. How many others had been murdered can not at present be told.

President Wilson took Vera Cruz in 1914, as we were officially informed at the time, to get a salute for the flag, and to prevent the shipment of arms into Mexico. He did not get his salute. He did not prevent the shipment of arms,

BUT SEVERAL HUNDRED MEN WERE KILLED OR WOUNDED.

And then he brought the Army home without achieving either object. President Wilson sent an army into Mexico in 1916, as we were informed at the time, to get Villa "dead or alive." They did not get him dead. They did not get him alive. Again several hundred men were killed and wounded. Again President Wilson is bringing the Army home without achieving his object. Of course it is a mere play upon words to say that these were not "wars." They were wars and nothing else; ignoble, pointless, unsuccessful little wars; but wars. They cost

millions of dollars and hundreds of lives, squandered to no purpose; they accomplished nothing, but they were wars. And yet Mr. Wilson's defenders say that he "has kept us out of war." As a matter of fact, his policy in Mexico has combined all the evils of feeble peace with all the evils of feeble war. He has secured none of the benefits of war, but he has not avoided war.

HE HAS SACRIFICED THE HONOR AND THE INTEREST

of the country, but he has not received the 30 pieces of silver. In fact, when Mr. Wilson forgets himself he admits that we have been at war; for example, on May 11, 1914, in an address over the dead marines at the navy yard in Brooklyn—in which, by the way, he in effect claimed sympathy on the ground that his feelings had been as much lacerated by sneers as the bodies of the dead men by bullets—he said that the marines had been engaged in a "war of service." A war of service to whom or what? Certainly not to the United States nor to Mexico nor to humanity at large. Was it to Mr. Wilson?

As it is with "war" so it is with "intervention." President Wilson has again and again said he would not "intervene" in Mexico. As a matter of fact, he has intervened continuously. On January 8, 1915, he announced that the Mexicans had the right to "spill blood," to spill as much blood as they pleased, without interference. The fact that the blood they were spilling included the blood of American citizens, both soldiers and civilians—and among them women and children—evidently did not weigh with him. On December 10, 1915, he said that it was "None of our business what the Mexicans did with their government, and so long as I have the power to prevent it nobody shall butt in to alter it for them." Yet at that very time he had been "butting in" for two years, and he has been "butting in" ever since; and he has avowed that he wished to alter it for them in all kinds of ways, from land tenures up and down. But as he never followed any policy of either intervention or nonintervention with any resolution,

ALWAYS YIELDING AT THE CRITICAL MOMENT

to some bandit chief of whom he became fearful, both his spasms of intervention and his spasms of nonintervention have alike been entirely futile. In August, 1913, he sent a special envoy to Mexico to tell Huerta he would not recognize him. He announced this himself in a note in October, and on December 2 he announced he would not deal with the Huerta government. This was intervention and nothing else. It was such intervention as if, in 1877, some European Government had declined to recognize Hayes as President and insisted upon the seating of Tilden. Mr. Wilson intervened when he backed Villa against Huerta; he intervened when he turned against Villa and recognized Carranza.

At one time Mr. Wilson's policy of intervention produced such unhappy results that on June 2, 1915, he issued a formal warning to the Mexican factions, in which he said that "Mexico is apparently no nearer a solution of her tragical troubles than she was when the revolution was first kindled. She has been swept by civil war as if by fire. Her crops are destroyed, her cattle confiscated, her people flee to the mountains to escape being drawn into unavailing bloodshed, and no man seems to see or lead the way to peace and settled order. There is no proper protection either for her own citizens or for the citizens of other nations resident and at work within her territory. Mexico is starving and without a government." A delightful picture of the effects of Mr. Wilson's policy, by the way! He therefore tells Mexico that unless "within a very short time" the Mexican leaders get together for the relief and redemption of their prostrate country the United States "will be constrained to decide what means should be employed" to deal with the situation. But, as usual with Mr. Wilson, this solemn warning

MEANT PRECISELY AND EXACTLY NOTHING,

and the Carranzistas and Villistas and the rest knew that it meant precisely nothing. They knew that Mr. Wilson would either not back up his words by deeds at all or else that he would back them up so feebly that by a sufficient show of resistance he could be forced to abandon his purpose.

Some of the defenders of Mr. Wilson, in answer to Mr. Hughes's merciless indictment of Mr. Wilson's course, have sought to justify Mr. Wilson by attempting to turn the whole issue on the character of Huerta, who was the de facto President when Mr. Wilson became President of the United States. They ask Mr. Hughes, "Would you have recognized Huerta?" The answer is that any one of several courses could have been adopted, provided only that the course adopted had been followed with resolution and with full acceptance of the responsibility involved.

There was much to be said in favor of the policy of recognizing Huerta and avoiding intervention. There was also much to be said in favor of the policy of refusing to recognize Huerta, which was intervention, and then of fully accepting the responsibility implied in intervention. But there is nothing to be said in favor

OF WABBLING BETWEEN THE TWO POLICIES

and neither recognizing Huerta nor accepting the responsibility for the chaos caused by failure to recognize him. Yet this was the course Mr. Wilson followed.

There was no excuse for the recognition of Carranza, in view of Mr. Wilson's failure to recognize Huerta. All the objections to Huerta applied with greater force to Carranza. Mr. Wilson's apologists say that Huerta was the murderer of Mexicans. But Mr. Wilson himself, as quoted above, has shown that

CARRANZA WAS THE MURDERER OF AMERICANS.

Therefore Mr. Wilson treats the murder of Mexicans as a bar to recognition, but not the murder of both Americans and Mexicans. And now, having condoned the repeated murders of Americans by the Carranzistas, and having abased himself before Carranza, and having aided in placing Carranza in power, what is Mr. Wilson's reward, and who pays it? The reward is that Mr. Wilson has to place 150,000 troops on the border to partially prevent the raids and murders that his friend Mr. Carranza will not or can not prevent; and the payment is made by the soldiers who are slain and by the families of the guardsmen who go in want because their husbands and fathers have been called to the border to make good Mr. Wilson's refusal to let the Regular Army administer such punishment to the bandits as to inspire in them a healthy fear. Instead, Mr. Wilson's course has been such as to encourage them into a feeling of boastful impunity. Mr. Wilson's course has been precisely like that of a police commissioner who declined to permit his policemen to use their night sticks against burglars and instead insisted that the householders should sit up all night so as to scare the burglars away.

It should be a cardinal rule of conduct in international as in individual affairs never to hit if hitting can possibly be avoided, but never under any circumstances to hit soft. Mr. Wilson has been engaged in continual hitting, but he has always hit soft, and whenever his opponent has hit back he has promptly dropped his arms, stopped hitting, and taken refuge in platitudes about peace, nonintervention, and humanity. Where, however,

HIS OPPONENT WAS SUFFICIENTLY WEAK,

as in the case of Haiti, he has dropped these platitudes and has (with "blood spilling") intervened. Haiti did not behave as badly to us as Mexico behaved; but Mr. Wilson intervened, fought the Haitians, shedding their blood and the blood of our troops, took possession, and now has our armed forces in control of Haiti and directing its government. His course of action in Haiti can be defended only if his course of action in Mexico is unqualifiedly condemned, for such action was far more needed in Mexico than in Haiti. But there was a difference in the two cases, and to Mr. Wilson it was a vital difference. Haiti was weaker than Mexico. No one was afraid of Haiti.

It is not a pleasant task to point out these lamentable failures in our foreign policy during the last few years. If they were unimportant to the Nation, if they only affected Mr. Wilson personally, I would gladly keep silent about them. If they were isolated and exceptional, I would pass them by; but they are

TYPICAL OF THE POLICY OF DRIFT

to which this Nation has been committed during these great and terrible years when we have needed at the helm a firmer hand than at any other time since the Civil War. If the policy of drift is sanctioned by the Nation and is permitted for a sufficient length of time, we shall surely face national shipwreck.

We are told that the mass of the voters, the mass of the American people, will approve the policy of the administration, the policy of drift, the policy of spineless failure to do our duty to ourselves and to others because they believe in "safety first." Such being the case, it is worth while examining just what "safety" or "safety first" means, and how far a policy based only on considerations of safety is materially advantageous and morally justifiable.

To treat "safety" as an indispensable element of any continuous national policy is eminently proper. It is indispensable to wisdom that we shall shape our military policy so as to make ourselves—our home country, our Canal Zone, all our islands—absolutely safe against successful attack by any great European or Asiatic military power.

TO THIS EXTENT SAFETY COINCIDES WITH DUTY.

But this ultimate safety in the future is to be obtained not by shirking but by performing our duty in the present. When President Wilson two years ago assured the American Nation that there was no need for preparedness, no need for worry about our military shortcomings, no need for self-sacrifice and

effort in order to make good these shortcomings, he was sacrificing our future safety to considerations of momentary political popularity obtained by pandering to popular desire for the enjoyment of material ease and the avoidance of effort and of serious facing of duties. Mr. Wilson then put "safety first" as compared to duty; but he put it last as compared to momentary enjoyment of ease and material pleasures and lazy refusal to face facts. I hold that this was exactly the reverse of what he ought to have done. I hold that it is our clear duty to sacrifice some of our present ease and soft enjoyment of material things in order to

GUARANTEE OUR FUTURE NATIONAL SAFETY.

I hold that we should provide for the ample safeguarding of the heritage which our fathers left us and which our children should receive from us undiminished. I therefore believe, as I have before said, that not only should we provide a big and efficient Navy and a small and efficient Regular Army, but that we should also provide for a system of obligatory military training of our young men on the Swiss and Australian models. With all my heart I believe in insuring the safety that can only come through the full performance of duty, by the exercise of courage and forethought under the compulsion of a high sense of honor and patriotism.

But this is not in the least what Mr. Wilson's advocates mean when they ask us to support him, because he and they are for "safety first." They are for the unworthy safety that is merely obtained by the abandonment of duty. They are for the momentary safety which shortsighted men secure when they purchase escape from present risk and effort

AT THE COST OF FUTURE DISASTER.

They are for the "safety" of each man to spend his time in money making and in flabby ease at the cost of remaining untrained and unfit to render service to the Nation in the Nation's hour of need. They are for the mean safety which this Nation secured when it treated The Hague conventions, which it had signed, like scraps of paper and declined to make even a protest on behalf of tortured Belgium. They are for the safety this Nation temporarily secured by tame submission to the murder of its men, women, and children on land by Mexican bandits, and at sea in the *Lusitania* and similar cases by German submarines. This kind of "safety first" means duty last, honor last, courage last. I do not believe in it. I believe that it is obtained at the cost of moral degradation in the present and at the risk of national ruin in the future.

In Maine there are many seafaring folks. I can illustrate what I mean about the use and abuse of the word safety by the Life-Saving Service. This is a service especially designed to secure greater safety for ships' crews and generally for persons whose lives are imperiled on the water. It is a service to secure safety. But the safety is secured only because

SOME BRAVE MEN ARE WILLING TO RISK THEIR OWN LIVES

in order to save others' lives. They do not put "safety first" as far as they themselves are concerned. If they did, no lifeboat would ever be launched from a life-saving station. But the men on a sinking ship who crowd into the lifeboats ahead of the women and children do put "safety first." I will say this for them, however, when they get ashore they do not wear buttons to commemorate the feat—as some of our opponents in the present campaign do.

Life-saving medals are granted every year. Each medal means that a life has been saved, and each means also that in order to save it another life has been put in jeopardy. The "safety first" class does not get such medals. Every life-saving crew is composed of men who are tough, hardy, and well trained. They put safety first as far as self-indulgence and soft ease and mere money-getting are concerned; otherwise they would be helpless in a storm. But where duty and safety are concerned, they put duty first and safety last.

I wish to see this Nation act in similar fashion, both as regards its own safety and as regards the performance of international duty. I wish to see it by forethought, by effort, and hard training, and by the cultivation of a broad and intense feeling of

NATIONAL ENDEAVOR AND NATIONAL PATRIOTISM

to so develop its courage and its efficient strength as to be able to hold its own against any possible aggression; and then I wish to see it put duty first, not safety first, when any small, well-behaved people is treated as Belgium has been treated. I stand for the safety that is obtained by the performance of duty. I do not stand for the safety that is obtained by the sacrifice of duty.

I believe that when the American people realize that the issue is squarely before them they will put duty first and not safety first; and I believe that only by so doing will they secure real and ultimate safety. I believe that they will support a policy of national action demanding a spirit of national courage. The American people are at heart moral idealists and enthusiasts, and in the past they have again and again responded to some appeal for practical action, calling for idealism to perceive it and enthusiasm and self-devotion in order to achieve it.

The men who came across the ocean in the seventeenth century to found here a new nation

WERE MEN OF COURAGE AND ENERGY,

inspired by idealism and enthusiasm. Under that inspiration they attempted and accomplished the American Revolution and later entered on the experiment of self-government, founding a new nation, "conceived in liberty and dedicated to the proposition that all men are equal." There were men of little faith among them, men of the "safety-first" type, of the professional pacifist type, but in the end our forefathers rejected the leadership of these men and followed the leadership of Washington.

Since then our population has been swollen by immigration, and our immigrants have generally been men of courage, energy, and enterprise; a large proportion have been

MEN OF MORAL ENTHUSIASM.

They dared to leave the Old World on the chance of starting a new life for themselves and their children under new conditions. On the whole, the men and women who were called to our shores were the picked men and women of their countries. A nation drawing its blood from such sources is fundamentally sound, and in the end it will support a plan which combines practical action with genuine idealism.

LINCOLN AND SLAVERY.

In 1860 the question whether the American people would allow the indefinite extension of slavery on the American Continent became acute. Conservatism said, Let well enough alone; timidity said, Let us have peace; business interests said, Safety first; the spirit of pacifism said, Let us compromise, for the evils of slavery are not to be compared with the evils of civil war and possible dissolution of the Union.

To these arguments, so plausible that apparently they carried the great majority of the Nation and had the support of multitudes of the best men, both in church and state, Abraham Lincoln answered in his Cooper Union speech: "Either slavery is right or wrong; if it is right, we ought to do all that the South asks of us; if it is wrong, we have no right to allow it in territory under our control." To this principle he adhered through the political campaign which elected him, through the dark and dangerous days of the interregnum after his election, and through all the tragedy of the Civil War. The American people responded to the appeal and sustained in practical fashion

THE GREAT MORAL PRINCIPLE LINCOLN SET FORTH

and embodied. They put duty first and safety second. I do not believe that we of this generation have sunk so far below our sires as to be incapable of responding in similar fashion to a smilar appeal.

In 1896 Mr. Bryan initiated the campaign for free silver. He was a popular speaker. The arguments for free silver were popular, and indeed plausible. They were: Our bonds are payable in coin; why substitute gold? If silver has depreciated, gold has appreciated; why sacrifice the debtor class to the gold-bugs? Recognized experts have declared in favor of bimetallism. Why abandon it? Why ask the consent of Europe to continue it? Why not go it alone? The simple answer was, It is not right for a nation to pay its debts to the world in anything less than the world's currency. As fairly representing the national conviction which led to the national action, I quote a statement at the time by a noted clergyman: "It is rarely morally wise to do to another what he thinks unjust. It is never morally right to enter on a course of action as to the justice of which the actor is himself in doubt. These principles are as applicable to nations as to individuals." It was right to show that free silver would bring material disaster to the Nation; but it was primarily the moral appeal to the conscience of the people which defeated Mr. Bryan in 1896.

In 1898 the conditions in Cuba had become unbearable to the American people. When full knowledge was obtained of what had been done in the island it raised in this country a storm of moral indignation which was irresistible. The argument of the pacifists at that time was the same as the argument of the pacifists of to-day. They varied between an

UNHEALTHY SENTIMENTALITY

and a still more unhealthy materialism. They said that we were not concerned with the injustice practiced by a foreign Government on a foreign people; that it was no business of ours; that the Cubans should be permitted to fight their own battles; and that the "blood spilling" in Cuba was not our affair. The answer then was the answer we ought to make now. We are our brother's keeper; injustice, whenever and wherever per-

petrated, does concern us; and whether we act or not, no considerations of self-interest should prevent our legitimate expression of that concern.

Then followed the question of the Philippines. The arguments of the so-called anti-imperialists were very much like the arguments of the pacifists of to-day. Again they varied between an unhealthy sentimentality and an even more unhealthy materialism. They said that the Philippines were on the other side of the globe, and would never repay what they cost us in money; that serving the Filipinos would not offset the sacrifice of the lives of American soldiers; and they alternately advocated letting the Germans or Japanese take the islands and letting the islanders take care of themselves and spill as much blood as they desired. The answer was in spirit identical with the answer of Abraham Lincoln to the pacifists of 1860. For we said that

WE OWED A DUTY TO THE PEOPLE WE HAD SET FREE

and would not abandon them to anarchy and chaos. Again we appealed primarily not to the pocket, but to the conscience; not to self-interest, but to the sense of honor, of the American people. Again the appeal was successful.

Since 1912 we have had four years of a policy which has been an opiate to the spirit of idealism. It has meant the relaxation of our moral fiber. Horror of war, combined with a sordid appeal to self-interest and to fear, has paralyzed the national conscience. We have been told that Americans, if they do not wish to be killed, should leave Mexico and should keep off the ocean; that to save a few American lives it is not worth while to hazard the lives of American soldiers; that Mexicans should be allowed to spill blood to their hearts' content; that the European war is no concern of ours; that even as between Belgium and Germany we should be neutral not only in act but in sympathy. Not once has President Wilson squarely placed before the American people the question which Abraham Lincoln put before the American people in 1860: What is our duty? Not once has he appealed to moral idealism, to the stern enthusiasm of strong men for the right. On the contrary, he has employed every elocutionary device

TO LULL TO SLEEP OUR SENSE OF DUTY,

to make us content with words instead of deeds, to make our moral idealism and enthusiasm evaporate in empty phrases instead of being reduced to concrete action. America as a Nation has been officially kept in a position of timid indifference and cold selfishness. America, which sprang to the succor of Cuba in 1898, has stood an idle spectator of the invasion of Belgium, of the sinking of the *Lusitania*, of the continued slaughter of our own citizens, and of the reign of anarchy, rapine, and murder in Mexico.

Nevertheless, I believe that the American people were ready for the same kind of appeal which was made to them by Abraham Lincoln in 1860, by the advocates of an honest currency in 1896, by the advocates of the Spanish War in 1898, by the advocates of nationalism in 1900. But the appeal was not made. On the contrary, Mr. Wilson invoked the spirit of timidity and selfishness. He made no effort to invoke the sense of duty. He put "safety first"—the immediate safety of the moment, to be obtained by shrinking from duty. He did not even put American rights first; still less did he put American duty first.

His task was not an especially difficult or dangerous task; but it needed a brave heart and a steady hand. Under his lead America could and should have put itself at the head of all the neutral nations, by its example if not by direct diplomatic agreements, in demanding that the war should be conducted in accordance with the usage of civilized nations; that international law should be observed; that the rights of neutrals and noncombatants should be respected. If this spirit had animated our administration, there would probably have been no invasion of Belgium, no fears of a like fate to terrorize other smaller nations, no torpedoing of merchant vessels, no bombarding of churches and hospitals, no massacring of women and children, no murder of Miss Cavell, no attempted extermination of the Armenians and Syrian Christians. We can not undo what has been done. But we can repudiate what has been done. We can regain our own self-respect and the respect of other nations for this country. We can put in power an administration which will throughout its term of power protect our own citizens and live up to our national obligations.

It is just that this Nation should concern itself with its rights; but it is even more necessary that it should concern itself with its duties. As between Mr. Hughes and Mr. Wilson, who can doubt which is the man who will with austere courage stand for the national duty? Mr. Wilson's words have contradicted one another, and all his words have been contradicted by his acts. Mr. Wilson's promise has not borne the slightest reference to his performance. We have against him in Mr. Hughes a man whose public life is a guaranty that whatever he says he will make good, and that all his words will be borne out by his deeds. Against Mr. Wilson's combination of grace in elocution with futility in action, against his record of words unbacked by deeds or betrayed by deeds, we set Mr. Hughes's rugged and uncompromising straightforwardness of character and action in every office he has held. We put the man who thinks and speaks directly, and whose words have always been made good, against the man whose adroit and facile elocution is used to conceal his plans or his want of plans. The next four years may well be years of tremendous national strain. Which of the two men do you, the American people, wish at the helm during these four years; the man who has been actually tried and found wanting or the man whose whole career in public office is a guaranty of his power and good faith? But one answer is possible, and it must be given by the American people through the election of Charles Evans Hughes as President of the United States.

---

## The Appeal to Cæsar.

### EXTENSION OF REMARKS

OF

### HON. BENJAMIN G. HUMPHREYS,

OF MISSISSIPPI,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. HUMPHREYS of Mississippi. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD, I include an editorial from the World of Monday, September 4, 1916.

The editorial is as follows:

THE APPEAL TO CÆSAR.

By the terms of the Adamson bill, the United States Government assumes control over railroad wages as well as over railroad rates.

Neither the unions nor the railroads seem to realize as yet that as a result of their eight-hour controversy Government regulation of interstate common carriers has entered into a new phase.

Both the union leaders and the railroad presidents assume that the Adamson bill arbitrarily establishes an eight-hour day for train crews. It does not. It establishes an experimental eight-hour day to enable Congress to obtain information upon which to take definite action.

By the terms of the act an eight-hour day is to go into effect January 1. The President is to appoint a commission to study the practical workings of this eight-hour day. The activities of the commission are to cover a period of not less than six months nor more than nine months. The eight-hour day is extended for 30 days after the report of the commission, the whole question having again become subject to the will and authority of Congress.

Out of this must necessarily come a new railroad code under which railroad labor, no less than railroad capital, will be subject to the control of the United States Government.

In the meantime the first duty of the Government is to ascertain the facts. That is what the Adamson Act provides for. That is what the President's settlement proposition provided for. There can be no just and intelligent judgment without a knowledge of the facts, and the facts are known to nobody. All that the President, Congress, and the public have had to guide them are two conflicting sets of assertions—one put out by the railroad press agents and one put out by the union press agents. Nobody knows which side is telling the truth or whether either side is telling the truth.

When the railroad presidents demanded arbitration of the eight-hour day they well knew that there could be no arbitration of an eight-hour day except after a practical experiment over a limited period, as the President suggested. All that an arbitration board could do in the absence of such a practical test would be to guess at the probable effect of an eight-hour schedule in the operation of freight trains. That is not arbitration. That is gambling. The railroad presidents might as consistently have asked the union leaders to shake dice for an eight-hour day or play poker for it, each side taking its chances on the dice being loaded or the deal crooked.

That is what the railroad proposition amounted to. The offense of the unions did not lie in the rejection of a false and fraudulent arbitration, but in their determination to throttle the American people in order to coerce the railroads.

What is coming as a result of the Adamson Act is true arbitration, based on definite information—the kind of information that a court of law demands in deciding such causes. It is arbitration by Congress, not merely by voluntary consent of labor and capital. The next logical step is to give the Interstate Commerce Commission the same power to regulate railroad wages and working conditions that it now has to regulate railroad rates. The two things necessarily go together, for there can be no just regulation of rates which ignores wages and working conditions.

The railroad unions can not complain of this, for they invited it. When they accepted the appeal to Cæsar, they accepted all the inevitable consequences of the appeal to Cæsar. 'Government regulation of wages is a two-edged sword, and the unions in the long run will find it no more satisfactory to them than the railroads have found Government regulation of rates. But the railroads were responsible for forcing the Government to regulate rates, and the unions are responsible for forcing the Government to regulate wages.

Much economic history has been made in the last week—far more than either the railroads or the unions or the general public seem to realize. Wage issues in railroad operation will never again be a personal matter between employer and employed. There will never again be another railroad strike or a serious threat of a railroad strike. The Government of the United States is no longer a neutral in such labor wars. It is the supreme power and its fiat is law, subject only to such restraints as the Constitution of the United States may impose.

## Conscription for American Citizens—How the Thing Was Done in the National Defense Act.

### EXTENSION OF REMARKS

OF

### HON. GEORGE HUDDLESTON,

OF ALABAMA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, September 5, 1916.*

Mr. HUDDLESTON. Mr. Speaker, under leave to extend my remarks I want, before the close of this session, to call the attention of the House and of the country to that section of the national-defense act approved June 3, 1916, which abandons the volunteer principle upon which American defense has always proudly rested, and provides for the hateful continental system of "conscription," the last refuge of Old World tyranny, the stronghold of militarism itself.

We discussed it briefly in the House a fortnight ago. I raised the point extemporaneously, and did not have with me at the time the data necessary for a full discussion of it. Since that time I have been asked by several Members for details regarding my assertion that the national-defense act has a clause in it providing for the "conscription" of American citizens in time of war. Apparently my charge was news to most of the Members of the House. I am satisfied that it was, and I think a frank review of that particular piece of military legislation will be useful to the Members and to Congress and may help in bringing about at the short session of Congress next December the speedy repeal of that obnoxious and un-American clause.

The story is briefly this:

When the Hay bill, so called, providing for the reorganization of the Army, was reported out to the House by the Military Affairs Committee, it contained no provision whatever for compulsory military service. I know this to be the fact because I looked the bill over with some curiosity on this point, a curiosity bred of the newspaper talk about the necessity for our adopting some form of compulsory military service if we were not to be ignominiously whipped by some of the war cripples of Europe. But there was no provision in it for any form of draft, save, indeed, the, to me, objectionable provision for "drafting" the National Guard into the Federal service. But so far as the general principle of our national defense was concerned, the bill did not tamper with it. According to its terms we were committed to a larger standing army and to a greatly increased National Guard, but we still stuck to the volunteer principle. To that extent the Military Affairs Committee had resisted the militarist propaganda of the various so-called "defense leagues."

But on Wednesday, March 22, on next to the last day of debate on the bill, the chairman of the Military Affairs Committee introduced a committee amendment providing for "reserve battalions for recruit training." It was an innocent amendment, and many of the Members were familiar with the general idea behind it. Those who, like myself, have seen military service and have studied, however slightly, the general problem of military organization, have been aware that the "reserve battalion" idea was one which America might well adopt.

This amendment provided that in time of war when various units of the National Guard are sent to the front there should be organized in the home towns "reserve battalions," which should recruit men, train them, and send them to the front as rapidly as they might be needed. The American practice has been that of herding the new recruits into new regiments instead of feeding them into the old regiments which are being decimated in active service. During the Civil War many regiments were reduced to two or three hundred men, or even less. It was the practice to consolidate several such regiments into one regiment. This always produced confusion in the regimental records and frequently jealousy and friction among the officers, if not among the men. All this confusion would be done away with by the committee amendment offered by the gentleman from Virginia. For the sake of the record, I will quote the amendment in full as it was read to the House:

Committee amendment: On page 57 insert as a new section, after section 43, the following:

"That when the National Guard and the enlisted reserve thereof of any State, Territory, or the District of Columbia is in the service of the United States in time of war there shall be immediately organized in such State, Territory, or District one reserve battalion for each regiment of Infantry, Cavalry, Field Artillery, or four companies of Coast Artillery ordered into the service of the United States, and such reserve battalion or Coast Artillery companies shall constitute the fourth battalion of any such regiment. Reserve battalions shall consist of four companies of such strength as may be prescribed by the President of the United States. When three or more regiments of the National Guard of any State, Territory, or District are in the service of the United States, the reserve battalions of such regiments may be organized into provisional regiments and higher units. If for any reason there are not enough voluntary enlistments to keep the reserve battalions at the prescribed strength, a sufficient number of the unorganized militia shall be called into the service of the United States to maintain each of such battalions at its proper strength. As vacancies occur in any National Guard organization in the service of the United States, from death or other causes, men shall be transferred from the reserve battalions to the organizations in the field, so that such organizations may be maintained at war strength. Officers for the reserve battalions or Coast Artillery companies provided for herein shall be assigned from the officers' reserve corps of the National Guard or Coast Artillery companies, such officers to be selected, if practicable, from the State in which the battalions are organized. Officers and noncommissioned officers returned to their home stations because of their inability to perform active field service may be assigned to the reserve battalion for duty, and all soldiers invalided home shall be assigned to and carried on the rolls of the reserve battalion until returned to duty or until discharged."

Down in the middle of that long section was the following sentence:

If for any reason there are not enough voluntary enlistments to keep the reserve battalions at the prescribed strength, a sufficient number of the unorganized militia shall be called into the service of the United States to maintain each of such battalions at its proper strength.

By "unorganized militia" is meant, under the terms of the national-defense act, all male American citizens between the ages of 18 and 45.

Somehow or other, the House entirely failed to grasp the significance of that clause. There was confusion and noise in the House and may have been inattention on the part of the Members. The chairman of the House Military Affairs Committee made a brief explanation of the amendment, omitting any reference to the "conscription" clause and practically confining himself to an explanation of the general idea of "reserve battalions." The minority leader, who makes it his business to scrutinize all the propositions upon which Members on that side of the Chamber will have to vote, made an effort to get at the gist of the amendment, but he got no more light than the rest of us. At any rate, his questions did not bring to light the "conscription" clause, even in its relatively innocent appearance.

Then the Speaker recognized the gentleman from Arizona [Mr. HAYDEN], who was said to be the author of the amendment. He spoke for five minutes and with great enthusiasm. He drove home to the minds of all the conviction that the English scheme of "reserve battalions" was a sensible one and worthy of adoption. Some of us wondered, and we wonder yet, why the Army authorities, who go about the country openly bewailing their inability to get sound military legislation out of Congress, had never put that sensible proposition before us. They left it to a civilian to propose.

But the gentleman from Arizona, like the chairman of the committee, failed to call our attention to the "conscription" clause. I do not want to think that he purposely ignored it. I do not want to think that he intended to "put one over" on the House. I prefer to think that he lacked sufficient time to round out his discussion of the amendment as fully and as candidly as he would have liked. And yet knowing, as he must have known, the traditions of the American people and the temper and convictions of this House, it is difficult to understand how he could have permitted the House to vote "conscription" into our national-defence system when a word from him would have sufficed to have stricken the obnoxious clause from the amendment without sacrificing the value of the amendment in the least.

Of course, it may be argued, as the chairman of the House Military Affairs Committee did the other day, that the word "called" should have warned the House that "conscription" was meant. The fact remains that it did not. You can comb this House from end to end without finding a Member, save the gentleman from Virginia [Mr. HAY] and the gentleman from Arizona [Mr. HAYDEN], who was aware at the time that the amendment embodied a "conscription" clause. And that is not strange. I consider the language thoroughly misleading. The word "called" does not suggest the idea of the "draft";

it suggests the idea of "volunteers." The President issues a "call for volunteers." The phrase is stereotyped.

The gentleman from Virginia [Mr. HAY] declared the other day, when I called the attention of the House to the way this thing had slipped through, that the word "called" meant the same as "drafted." You can find his language on page 13208 of the RECORD:

He [Mr. HUDDLESTON] bases his criticism on the fact that the word "call" was stricken out and the word "draft" substituted in conference. I do not now recollect whether that is true or not, but what is the difference between the President being authorized to call men out and to draft them? There is no difference, so far as the President is concerned.

That is remarkable language, in view of the contention previously made by the gentleman from Virginia on that very point. He now says that there is no difference between "called" and "drafted." But on March 23, when Members of this House did their best to force a change in the bill which would soften its language and provide for "calling out" the National Guard into the Federal service instead of "drafting" them, the chairman of the House Military Affairs Committee contended that the two words did not mean the same. Let me quote from the RECORD:

Mr. MILLER of Minnesota. Mr. Chairman, I have asked for five minutes of this time primarily that I might propound a question to the gentleman from Virginia [Mr. HAY]. We heard it stated on the floor yesterday that the word "draft" is obnoxious to the National Guard. I do not like the word myself. It seems to me that it is wholly unnecessary to whip a willing horse, and there is something a little obnoxious about the word "draft," because a draft has been resorted to historically only when patriotism was not sufficient to cause adequate enlistments. My inquiry is, if the word "order" could not be substituted for the word "draft" without impairing its legal effect?

Mr. HAY. The word "order" has not the same legal significance as the word "draft." Therefore the section would not, in the opinion of the lawyers who have looked into it, be constitutional if the word "order" was used. The word "draft" has a distinct meaning in all military bills and laws, and the word "order" does not mean the same thing. The word "order" presupposes that the force being ordered is already in the service of the United States; but as a matter of fact you can not, under the Constitution of the United States, order the militia into the service of the United States for the purpose of going beyond the boundaries of the United States. Therefore you have to draft them and divorce them from their status as militia in order that you may use them as Federal troops.

But the gentleman from Minnesota was not satisfied that a less objectionable synonym for "draft" could not be found. He persisted:

Mr. MILLER of Minnesota. Could we not substitute the words "call into the service of the United States"?

Mr. HAY. There would be the same trouble with that language.

Mr. CANNON. Why the same trouble? Why not amend it so that it would read: "He shall call by proclamation into the military service of the United States," instead of "He shall draft into the military service of the United States"?

Mr. HAY. The trouble about that is that it is the nature of the troops that we are dealing with. Now he can call volunteers into the service of the United States, but this language is necessary in order that they may cease to be militia.

Notice that language? He can "call volunteers into the service," but it would not be the same as "drafting" men into the service.

I think that ought to dispose of the contention that the House was sufficiently warned by the word "called" that conscription was intended. But the story does not end there. When the Hay bill, with this unknown provision in it, was adopted and sent to the Senate it collided with the Chamberlain bill, and with the latter was sent to conference. In conference the word "called" was changed to "drafted." When the compromise bill was reported back to the House the leader of the managers for the House, the chairman of the Military Affairs Committee [Mr. HAY], contented himself with presenting to us the entire draft of the bill without enumerating, as is usually done, the significant changes in it. Members had to read the entire bill from beginning to end to learn of the changes. As has been said, only by the greatest luck or industry could a Member have kept track of the changes in the bill. Members had the right to assume that no important changes had been made in the House bill.

The bill with its preposterous and impudent "draft" clause hidden in section 79 was adopted by both Houses and sent to the President for his signature. I have heard it stated that the President signed the bill entirely unaware of the significance, if not of the very existence, of this clause. I am inclined to believe that that is so. I believe that he was imposed upon, as the rest of us were.

Of course, Congress has the power to authorize the President to "draft" men in time of war. But that is a power which Congress has always kept in jealous possession. You may search the pages of our history without finding a single instance where Congress has yielded up this power to the military authorities in advance of any emergency. It is a power which democracies are reluctant to place in the hands of bureaucrats; but that is exactly where this bill lodges it. In time of peace, without a real enemy in sight, this Congress has unwittingly surrendered to the military authorities the power to conscript men.

Suppose there is a war on. Men may be enlisting freely both in the populous centers and in the agricultural sections. There is no attempt, under this bill, to adjust the situation. No; as soon as recruiting slackens temporarily in a given district the military authorities may step in, without further action of Congress, and clap on the "draft." Men loathe the "draft," and rightly. This bill, thanks to this "joker," gives them no protection against its steady extension throughout the country in time of war.

The gentleman from Virginia [Mr. HAY] made the point the other day that this bill exempts Quakers and others whose religious beliefs are opposed to war. But he did not call the attention of the House to the significant and essentially militarist change in the status of Quakers under this bill. Section 59, after reciting the usual exemptions from militia duty, such as the Vice President of the United States, naval and military officers, and so forth, adds:

And all persons who because of religious belief shall claim exemption from military service, if the conscientious holding of such belief by such person shall be established under such regulations as the President shall prescribe, shall be exempted from militia service in a combatant capacity; but no person so exempted shall be exempt from militia service in any capacity that the President shall declare to be noncombatant.

This is something new, gentlemen. You do not find it in American legislation on the subject of militia and militia exemptions. It was borrowed from Europe, a product of the great war, invented—not by the civil authorities, but by the military authorities—to get a hold upon those elements in the community which object to war. Under that clause the military authorities can seize a Quaker and put him at whatever line of work an epauleted military chief has deemed "noncombatant." They do not consult his conscience on the matter. They consult only their own wills. So they take him and put him to carrying shells, entrenching, or at ambulance work, thus releasing other able-bodied men for service in the trenches, or they put him at mine sweeping and send him to jail if—as I am told has happened—he insists, as a conscientious Quaker, upon sweeping up the deadly mines of his own country as well as those of the enemy country. In short, from the standpoint of the Quaker, this bill withdraws the main protection which he has earned by his hundred or so years of war against war. It abolishes his right of private conscience and it drives him, by the power of the State, to contribute indirectly—if not directly—to the murder of other men.

You can not read this bill to a Quaker and fool him into thinking that you have left him the freedom he has fought for, the right to abstain from taking human life. He knows that you have made serious inroads upon that freedom, a serious invasion of that sacred right.

But I am not interested primarily in the Quakers, though I think I can understand and respect their point of view. What I am primarily concerned for is the average American and the tradition—the self-respecting patriotic tradition—under which he has always fought his country's battles. This conscription clause, adopted without debate, changed in conference committee, and never reported anywhere to either House or Senate until the American Union Against Militarism called the attention of the administration to its existence, that conscription clause, if it is not repealed next December, will be the forerunner of a campaign for militarism of the worst sort. Mark my words—next December will see a well-financed campaign launched by the so-called "defense leagues" to retain their conscription clause in our statutes as a precedent for more militarist legislation. These "defense leagues" talk about the Swiss system. Don't let that fool you, gentlemen! They are not after the chocolate soldier. What they intend to evolve in this country, if they can do it through the power of the press and of great wealth, is the docile, well-trained, thoroughly regimented, helpless European conscript. Sometimes I think that they must realize that their wars are going to be wars of conquest, of markets, of greed, and of lust, and that they believe that without compulsory military service they can never drive the American people into those wars. Sometimes I think that is what they are after.

You see it stated once in a while in the newspapers that the "volunteer" system has broken down, that England had to give it up and resort to conscription. Gentlemen, that is an infamous lie, and the newspapers which industriously circulate it, could readily ascertain that it was a lie if they investigated. What are the facts?

Why, the facts are, according to the English official report made last May, that England had raised 4,000,000 men by the

volunteer system and that there remained only 560,000 men of military age available in England, Scotland, and Wales to be conscripted. Does that look as though the volunteer system had broken down?

Why, then, it may be asked, did England finally pass a conscription act? The answer is simple enough and it should be peculiarly within the comprehension of the Members of this House. The answer is "politics!" The Asquith ministry was and is a coalition ministry, made up of representatives of all parties and especially of the Liberals and the Conservatives. In theory this should have made for unity and strength; actually it seems to have made for weakness and disunion.

It was the responsible Liberal party which recruited the 4,000,000 men, but it had to do so under a persistent galling fire from the conservative London Times and the London Daily Mail. Those journals, owned by Alfred Harmsworth, Lord Northcliffe, were reactionary to the core, and they pounded the Asquith ministry as only powerful newspapers know how to pound. Concession after concession was made to them, but the Harmsworth journals demanded "conscription" as the price of peace, and they finally got conscription.

Why did the Government yield to them? Not from conviction, that is certain. They yielded to them because it seemed the lesser of two evils, the other evil being the fear and unrest and discouragement which those unscrupulous journals were breeding in the English people. That is why England adopted conscription.

You can not shake the testimony of English military authorities in behalf of the volunteer. Sir Gen. Ian Hamilton, who handled some 30 different bodies of volunteers during the South African War, has testified before the royal commission on the behavior of the volunteers:

When I saw them [the City Imperial Volunteers, made up of clerks, profesional men, and other indoor workers], during the Zand River action, they did not show the dash and go and confidence which they developed later. About a fortnight later, in quite a serious action at Dornkop, at Johannesburg, Gen. Bruce Hamilton, owing perhaps to indistinct orders from me, extended too far to his left, leaving a gap in our center between my two infantry brigades.

The City Imperial Volunteers were on his left, and I had to ask him to draw them in under fire. This is a very high test, and the City Imperial Volunteers came through it excellently. Altogether that day they behaved exceedingly well. At Diamond Hill I had the good fortune to be associated with some very distinguished regiments, and I can only say that I do not wish to serve with any better regiments than the Imperial Volunteers were then.

When he was asked how long it took these volunteers to get the skill and esprit de corps which he had described he said:

The City Imperial Volunteers were embodied on January 4, 1900. One wing embarked for South Africa on January 13, the other on January 20. The dates of Zand River, Dornkop, and Diamond Hill are, respectively, May 10, 1900, May 29, and June 12. At the last-named action the City Imperial Volunteers were the equal in fighting efficiency of a regular battalion of the line.

But that is 16 years ago. How about the present war? Well, I can not find anybody prepared to contend that the English and colonial volunteers have not held their own against German conscripts. I do not find it seriously maintained that they have not, even in those newspapers which are loudest for compulsory military service. And I can not forget that striking phrase of Maximilian Harden, the German publicist. In words that were guarded, but significant, he paid the German tribute to the English volunteer system when, contrasting the two, he said:

As a spiritual achievement many will place higher [than Germany's achievement] the voluntary enlistment of 3,000,000 island and colonial Englishmen.

I think Harden is right. I think the American people, with the exception of a small panicky fraction, place England's achievement higher than Germany's. They know which they would rather emulate.

The gentleman from Virginia [Mr. HAY], in defending the conscription clause, reminded the House that the North had resorted to the draft during the Civil War. Well, that is true, but it need cause no confusion. Gen. Upton's History of the Military Policy of the United States makes it perfectly plain that this was done not because of any breakdown in the volunteer system, but to remedy blunders which were made. Some of those blunders were by Congress—in enlisting men for short terms, as low as three months. When a man has served his term, when he has "done his bit," it is human nature for him to want to go home to see his family. He feels that it is "the other fellow's turn." The Northern armies melted away continually from that cause. Who can doubt that those same men, enlisted for three years or for "the period of the war," would have stayed in the ranks cheerfully to the end? Gen. Upton says they would have stayed to the bitter end.

But even with this absurd system of short enlistments the North would never have resorted to the "draft" but for an even more stupendous mistake, made not by Congress, but by the Secretary of War. It has been ascertained that there were in the North at that time available for military service 4,074,000 men, of whom, up to the spring of 1862, more than a million had enlisted and seen service. At that time there were 637,000 volunteers actually under arms—about 15 per cent of the total to be drawn upon—and the Secretary of War was so impressed by the number that he discontinued recruiting.

Realize the psychological effect of that. Think of the word going into every town and hamlet, into every home, that no more men were needed. Think, not only of the joy it created but think of the relief, of the let down. No more men were needed! That was the fact which "got home."

Well, that was in March, 1862, but by June, 1862, less than three months later, the Secretary of War had discovered his blunder and sought to repair it. He opened up recruiting offices. He called for volunteers. But he himself had put the North to sleep on the proposition of recruiting. No wonder there was apathy. In July the President made a call for 300,000 volunteers, but no one really credited the seriousness of the situation, and by August, driven by the necessity of advertising the real situation to the country, he announced that he would draft the State militia to make good whatever deficit there might be in the 300,000 volunteers. This was a good deal of a fiasco and seems to have prejudiced recruiting in general, so that Congress was appealed to. On March 3, 1863, Congress passed the "Act for enrollment and calling out the national forces," placing all able-bodied male citizens at the disposal of the President. It was a loose sort of conscription—not at all like the arbitrary conscription act which this Congress has adopted.

For example, that act allowed men to send substitutes, if they could get them, or to commute their personal service for a sum not exceeding $300. Those who paid the money were to be exempted from that particular draft and those who found the substitute were exempted altogether. Under that act there were four distinct enrollments or drafts. This is the way the totals run:

| | |
|---|---|
| The total male population of military age in the North | 4,074,000 |
| The number of volunteers under arms early in 1862 were | 637,000 |
| The number raised under the act of March, 1863, was | 1,369,343 |

But of these—

| | |
|---|---|
| The number of volunteers was | 1,076,558 |
| The number of voluntary substitutes | 144,012 |
| The number that escaped service by paying exemption fee | 86,724 |
| The number compelled personnally to serve | 61,947 |

Now we get to the point. The number of men actually conscripted in the North during the Civil War was 61,947. They amounted to 2.3 per cent of the total forces raised by the President from the beginning of that war to the close of it. They were not more than 4.5 per cent of all the men raised in the North after the passage of that conscription act. Even if you add to that insignificant number the substitutes who, freely and of their own accord, enlisted at the urging of, or for the accommodation of, some other man whose name had been drawn and who could not go—even if you add the number of those substitutes and credit it to the draft system, even then, taking the most favorable possible view of the efficacy of the draft, even then you can credit to compulsion less than 11.9 per cent of the recruits raised by the North after the draft act came into existence.

Capt. George L. Kilmer, late of the United States Volunteers and a noted military expert, declares that, "Conscription as a military measure proved a failure in the Civil War":

The fact that Germany's military efficiency is grounded in compulsory training and service probably accounts for the advocacy in certain quarters of compulsion as a measure of preparedness in this country. Experience in the Civil War is also cited in support of the argument.

If efficiency on the firing line be the test, and it should be, the records of the Federal draft in 1863–64 do not bear out the contention. There were about 1,300,000 voluntary enlistments before a draft was ordered, and the most notable battles of the war as well as the most signal Federal victories came in that period.

Out of 2,859,132 Federal enrollments 214,221 might be credited to conscription, as follows:

Conscripts held to service, 52,068; conscripts sent substitutes, 75,429; conscripts paid commutation, 86,724; total, 214,221.

Men to the number of 42,581, who were liable to be drafted, but had not been drawn, sent substitutes.

In point of fact conscription added just 52,068 soldiers to the Army ranks. Desertions were frequent among them and the substitutes. Among Regulars the desertions were 24 per cent, among Volunteers 6 per cent.

Germany's conscription hits the peasants hardest. The upper and middle classes escape its rigors, even though they serve.

The democratic equality in conscription is a delusion. Men who won't volunteer escape the dragnet or if caught turn out worthless at the front. "You can chain a conscript to a cannon wheel, but you can't make him fight."

It has been said that the South resorted to compulsory service. That is true; but that is the theorist's way of looking at it. While the Confederacy passed conscription laws, she raised

ber men on the volunteer basis. Everybody volunteered. Dr. Randolph H. McKim, D. D., who served in Lee's army, first as a schoolboy volunteer and later as a staff officer, declares that the southern army was "a self-levy, en masse, of all the male population in all save certain mountain regions." In his own school, for example, the Virginia State University, he says that 515 boys out of the 530 who were registered from Southern States enlisted in the army of the Confederacy. That was typical of recruiting in the South.

But, of course, the South did have conscription laws, and, being saddled with them, had various spasmodic attacks of enforcing them. Once in a while she would draw loyal men from the firing line and send them out to bring in the conscripts; but it was a waste of good men. Capt. Kilmer says of the southern draft:

Regarding conscription in the Confederacy, no statistics are at hand to throw a clear light upon the matter. A wide reading of the war records on that side leads me to the conclusion that it may have furnished a moral stimulus to enlisting to a limited extent, the same as it did in the North, but was, on the whole, a political mistake. While it forced some thousands into the ranks, they would have served the cause better by staying at home and raising and forwarding food for the willing fighters in the field. * * * It [the draft] neutralized the service of good men in uniform who left the front to enforce the draft upon unwilling mountaineers, drove thousands from the territory altogether, and may have acted against rather than for fighting efficiency.

The attempt to conscript soldiers into the Confederate Army drove thousands of southerners who were loyal to the Union into the Federal Army. Over 30,000 Federal soldiers were raised in Tennessee alone. These southern Unionists constituted some of the best soldiers in the Union armies. The war would have been greatly prolonged had these men been permitted to remain peaceably at home. The attempt to enforce conscription laws broke the back of the Confederacy.

If you want, in addition, the views of a soldier who has not sunk his Americanism in this militarism which has now so conspicuously infected Army circles, you can get them in the printed hearings before the House Military Affairs Committee, in the testimony of Gen. Nelson A. Miles, a gallant soldier who despises the draft and is not afraid of the volunteer system.

Mr. GORDON. In your judgment, could the continental army be filled without compulsion?

Gen. MILES. I hope not with compulsion.

Mr. GORDON. You are opposed to compulsory service?

Gen. MILES. Absolutely.

Mr. GORDON. Do you believe that we can raise 133,000 men each year for three years for the continental army without compulsion?

Gen. MILES. With compulsion, I hope not. I think it would be a very dangerous step toward centralization. As far as conscription is concerned, that was tried out during the Civil War, and with unsatisfactory results. I think there were 54,000 men added to the Army—54,000 additional to the 2,000,000 men—by conscription, but I do know that just at the time of the crisis of the Gettysburg campaign thousands of the best troops, drilled and disciplined men, in the Army had to be taken out of the field and sent back to suppress the riots caused by that unpopular measure. Approximately 10,000 or 12,000 were ordered to New York, and I know that there was a brigade in Pennsylvania which was organized at Huntington and, instead of being sent to the field, where they were needed, they were sent to Philadelphia to maintain order. It was a very unpopular measure at that time in that great crisis of the Nation.

Gentlemen, I am sorry that this thing has been done. I think of it much as Capt. Kilmer does, "not as a joke nor as a scandal but as a dark spot on the escutcheon of republican government." I hope and believe that this Congress has gone as far in the direction of militarism as it intends to go, and that at the next session, which opens in December, there will be a general nonpartisan agreement to pass an act repealing this conscription clause.

---

**John Ericsson.**

---

## EXTENSION OF REMARKS
OF
## HON. DUDLEY DOOLITTLE,
OF KANSAS,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, September 4, 1916.*

Mr. DOOLITTLE. Mr. Speaker, I use this means to express my approval of the bill we have passed providing for the erection of a suitable memorial in honor of Capt. John Ericsson. In this day of huge navies it is interesting to remember that it was John Ericsson who designed the "cheese box," known as the *Monitor*, which put to flight the Confederate *Merrimac* in Hampton Roads. The genius and skill of John Ericsson revolutionized naval construction. It is more than probable that had he not constructed the *Monitor* the Confederate ironclad *Merrimac* would have continued its work of destruction until every Union vessel had been put to flight or sunk. The result of the war might have been prolonged indefinitely to the dire calamity in both lives and property of both the North and South. During the Civil War young Ericsson—because he was a young man when he landed on American shores from his native land of Sweden—wrote to President Lincoln and offered his *Monitor*. He said:

Not only do I offer the invention of a vessel which, I believe, will successfully cope with the *Merrimac*, but I am willing to offer my life as well.

That was a valuable offer and a grand display of patriotism. The offer of his vessel was accepted with the successful results that history records. We are thankful to remember that his life was spared for further use and service to the country of his adoption.

He was an engineer of great ability. His life was industrious and sober, and the achievements of John Ericsson stand out as an inspiration to every man. He emigrated from Sweden in 1839, at the age of 36, and came to New York City. He first gained note as a constructor of a war vessel propelled by steam, which was the first one of the American Navy. His next effort was the planning and the building of the *Monitor*, which was offered to Napoleon III, who rejected it. The *Monitor* was further improved and offered to President Lincoln, who accepted it and sent the vessel forthwith to Hampton Roads, where the battle with the *Merrimac* soon followed. The Union blockade was held intact; the possible invasion of northern ports was prevented; and John Ericsson had contributed his full share toward the preservation of the Union.

It is a fitting honor that this memorial statue should be erected in the city of Washington to the memory of John Ericsson, of Bevmland, Sweden, who died March 8, 1889, at the ripe old age of 86 years. The Swedish Government requested that his remains be taken back to the land of his birth, and to-day a beautiful chapel is erected over his resting place. It is a fine thing in America, his adopted country, that it should now follow suit in thus honoring him.

---

**Democratic Achievements.**

---

## EXTENSION OF REMARKS
OF
## HON. KENNETH D. McKELLAR,
OF TENNESSEE,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. McKELLAR. Mr. Speaker, I wish to discuss as briefly as I may the record of this Democratic administration. That record is the principal issue in this campaign. If the Democratic Party has done well, it ought to be continued in power. If it has not done well, it ought to be defeated. I believe it has done well. There has been more remedial legislation, more progressive legislation, more legislation for the benefit of the whole people passed during this administration, and by the Democrats just prior to this administration, than under any similar period in the Nation's history. That it is good legislation is shown by the fact that the greater part of it has not only received the well-nigh unanimous support of the Democrats in Congress but the support of the Republicans as well.

We have provided for the election of United States Senators by the people.

We have passed an income-tax law by which wealth is made to bear its just proportions of the burdens of the Government.

We have established Federal reserve banks which, in my judgment, have done more to bring about the present prosperous condition of this country than perhaps all other factors combined.

We have passed the Clayton antitrust law, by which peace was brought to business. Before the passage of this law business men did not know what the law was, and sought to evade it. But now they know what the law is and obey it.

We have passed a law providing for a Federal Trade Commission to prevent unfair competition in business and unjust trade practices.

We have passed a rural credits law in order to lend farmers money on their farms at low rates of interest, so that they can better their condition.

We have enacted a good-roads measure providing for Federal aid to roads in the various States, so that our country may be built up.

We have passed an eight-hour law for the laboring men. We have passed more legislation for the betterment of labor conditions than any former administration.

We have passed the parcel-post law for the benefit of the people of the whole country.

We have extended the rural free delivery to all parts of the country.

We have federalized the National Guard and gave it its proper place as a defense of our country.

We have passed the reorganization of the Army bill, by which our Army is made efficient for the protection of the American people in the event of trouble. We have largely added to this Army and provided for a system of reserves which will give us ample protection should trouble arise, but which defense system will never lead to militarism.

We have enlarged our Navy, so that it is easily second among the navies of the world to-day, and we are going to make it first. It is our best means of defense. Conditions have arisen that require it, and we have authorized the expenditure of about $600,000,000 for the national defense this year.

We have established a system of vocational education and agricultural extension work throughout the length and breadth of the land, for the purpose of making young men and young women more efficient in the race of life.

We have passed a tariff law, by which the burdens of taxation have been reduced on the plain people, and under which tariff law the Government is receiving a larger income than ever before, and the people have prospered in a larger degree than ever before in the history of the Republic.

Though there has been a great world war going on for two years—and at first we had to enact special-taxation legislation because of this war—yet, under Democratic control, we have repealed those special stamp-tax laws, to the great convenience and benefit and saving of the whole country.

We have passed a tariff-commission bill to protect our trade relations at the close of the European war.

We have enacted a law to build up a merchant marine, so our people can sell their goods in all the markets of the world.

We have passed a child-labor bill prohibiting the working of young children in factories, and for the protection of the youth of our country.

These are some of the more important pieces of constructive legislation which a Democratic Congress and a Democratic President have together enacted into law. It is a splendid record. It is an unparalleled record, because not only have all these measures been enacted into law, but, with the exception of the tariff law, they have been approved not only by the Democrats, but by the Republicans as well—as shown by their votes on these measures. I am now going very briefly into several of the more important of these measures.

RURAL CREDITS.

In my judgment it is the most far-reaching, most progressive, and most efficient legislation that was ever passed by the American Congress in the interest of the American farmers. I need not tell you what large rates of interest ordinarily the farmers have to pay. When this new system is established three things will be certain—first, that any farmer who has the land can always raise money on it; second, that he can get it on long time; and, in the third place, he can always get it at a low rate of interest, not exceeding 6 per cent. When we consider the large quantity of lands not now improved, not now being cultivated, not now producing, and when we consider the high prices of all farm products, it is easy to see that this measure will be of incalculable benefit not only to the farmers of the country but to the entire people.

I have recently sent out a speech showing in detail just how the farmers of Tennessee can take advantage of this great measure, and I want to suggest that you all read it, as it tells exactly how you may receive the benefits of this act.

I am proud of the part I took in enacting this legislation.

GOOD-ROADS LAW.

Another of my hobbies in the matter of national legislation is the good-roads law. The first set speech I ever made in Congress was made on this subject. At that time anyone who spoke in favor of national aid to roads was dubbed contemptuously "a dirt-road statesman." For five years we fought to enact this law. In my late campaign I promised you that I would do all I could to have this legislation enacted, and I am again delighted to be able to say to you that we have won this fight.

Under the provisions of this law Tennessee will receive for her roads from the National Government in the next five years more than $1,700,000. And, again, the farmers and all the people will be vastly benefited by this act.

INCOME-TAX LAW.

For 20 years the Democratic Party has been fighting for an income tax. More than 20 years ago one was passed and declared unconstitutional, and since that time we have been fighting to have a constitutional amendment. It is a just and fair tax, and will never be repealed. The burdens of taxation are placed on those who are more able to bear them. No man who receives an income of $3,000 or more should object to paying the very small income tax assessed against him on his income. Incomes of less than that sum are not taxed at all. Everyone concedes the justice of this act.

CLAYTON ANTITRUST LAW.

Before the passage of the Clayton antitrust law, what is known as big business and the Government were constantly at loggerheads. In the Taft administration innumerable suits were brought against various corporations, alleging violations of the Sherman antitrust law. These suits greatly harassed business and made business men uncertain and fearful. Since the passage of the Clayton antitrust law these suits have ceased. Business men now know what the law is, and they do not seek to evade it. The result is that our big corporations are now conducting themselves within the law. In the passage of this law the Democratic Party has made good its pledge to bring peace to business.

FEDERAL TRADE COMMISSION.

In like manner and in furtherance of the project in bringing peace to business and to require big business concerns to obey the law, the Federal Trade Commission was established. Its object is to do away with unfair and illegal trade practices. It has already accomplished great good and is destined to achieve greater results in the future.

CHILD LABOR.

Several years ago I traveled through New England in an automobile. One afternoon we drove up to the most beautiful country estate my eyes ever beheld. The House was a marble palace. The grounds were more beautiful than the words of man can portray. There were automobiles and carriages and horses; golf course and tennis court. There were lakes and boats. There were beautiful trees and lawns. There were flowers and fruits and grasses of every kind and description. It looked as if all the luxuries of heaven and earth had been poured down on this one estate. We drove through the grounds and ran across its owner, who showed us with great pride over his beautiful villa and grounds. It was about 4.30 in the afternoon when we left.

As we continued our journey we soon came to a little village where there were a number of factories, cotton and woolen, and as we neared the village the 5 o'clock whistle blew, and there poured forth apparently innumerable children, mostly girls. Their faces were pinched and haggard. Their bodies were poorly clothed, and for the most part they were the pictures of poverty, penury, and woe. I asked who owned the factory, and was told that the gentleman on the hill who owned the great estate also owned the factory. As I looked at these God-forsaken-looking children I made up my mind then and there that if I ever found an opportunity to vote and work in favor of a child-labor bill I would lose no opportunity in doing so. That fall I was elected to Congress, and from the time I went there until recently I left no stone unturned to get a law passed by the Federal Government which would undoubtedly be enforced, protecting these innocent little children from such service as that, and see to it that their innocent young lives are not snuffed out and dusted out in these great mills.

This Congress has passed a law forbidding goods made by children less than 14 years of age, and in some cases less than 16 years of age, to be transported in interstate commerce. Of course, this means that these children will not be employed in factories.

My fellow citizens, I wish to say that if I had done no other act in Congress than to vote for this humane bill I would feel, having voted and worked for it, that my life as a Congressman had not been in vain.

PREPAREDNESS.

The great European war, which began a little more than two years ago, set all prudent men to thinking about our own military and naval resources in the event we also should get into trouble. At that time we had a little mobile Army of about 35,000 men scattered all over the face of the earth; some in Panama; some in Hawaii; some in the Philippines; some in China; some in Alaska; and some in the continental United States. We had a National Guard, but the Government had no control of it, and it was practically an unorganized force. Though the Republican Party had been in power for 16 years

on a stretch, and more than 7 years of it was under our warrior friend Col. Roosevelt, still the Army had been decreased under Republican rule, and very largely decreased, about 50 per cent, during the administration of Col. Roosevelt. Though it was claimed that we were likely to get into war with Japan in 1904 and 1905, still no preparation had been made in a military way by the Republican Party. There had been a gradual increase in our Navy ever since the time that William C. Whitney, in the second Cleveland administration, started it on the upward grade. When President Wilson came in our Navy stood third, or, perhaps, fourth among the great navies of the world. This was the condition of our military and naval resources at the beginning of the European war.

Like the prudent, careful President that he is, as soon as these conditions were ascertained President Wilson at once began a campaign for proper military and naval preparedness. He made many speeches over the country in reference to this important matter. I can safely say that a Democratic Congress has done more for the cause of real preparedness in this country than all the other Congresses have done in the 20 years preceding.

OUR ARMY.

We have reorganized the Regular Army and increased its authorized strength from 100,000 to 220,000 men. We have already increased its actual strength to about 120,000 men, and in five years the actual strength of the Army will be increased to 175,000 men. This, we believe, will be entirely adequate and effective for all of our needs in so far as the Regular Military Establishment is concerned. We have reorganized and federalized the National Guard of the various States. We have made it a concrete and systematic organization under the control of the United States Government. It is armed, disciplined, drilled, and controlled by the Federal powers. No better illustration of its effectiveness can be given than the fact that more than 100,000 of the National Guard are now mobilized on the Texas border, and it is just as effective as the Regular Establishment.

I served on the Military Affairs Committee of the House, and took an active part in securing the reorganization and the federalization of the National Guard, and believe that the country was never in a better shape to defend itself than it is under the present organization.

We have authorized the expenditure of $167,500,000 on our Military Establishment this year.

OUR NAVY.

About our Navy I can only say that this Congress has done more for the Navy than was ever done by any other Congress in the history of the Government. It has authorized the expenditure of more money for the Navy this year than any Government on the face of the earth ever authorized in one year for a navy. Our program for this year authorizes the building of 157 new war vessels, which, when completed, will in itself be larger than the navy of any other nation except Great Britain, Germany, France, and Japan. Added to the Navy we already have, which include 317 ships already built and 56 authorized, it will give us in the neighborhood of 530 war vessels and make our Navy second only to that of Great Britain; and if Great Britain suffers many more casualties in naval warfare in this war it may put us quite up with her. This vast establishment will cost a stupendous sum, and it means the upbuilding of the greatest Navy in the world. We are the only great Nation in the world that will have the money after this war with which to build a great Navy or to maintain a great Navy, and it is just certain to come that our Navy within the next two decades will be the largest and most effective Navy on the seas.

I believe in a great Navy, but I see no necessity for a great Military Establishment. I believe that we ought to have a great Navy because we are building up a great merchant marine and we are going to go out for the world's trade and commerce, and in order to get this trade and commerce in the largest and best way we should have a great Navy to protect our interests, wherever they may be.

MERCHANT MARINE.

Under Democratic administration prior to the Civil War in the neighborhood of three-fourths of our foreign trade and commerce was done in American ships. After the Civil War, under Republican rule, our flag practically left the seas, and to-day only about 15 per cent of our trade and commerce is carried on in American bottoms, and until the Wilson administration less than 10 per cent was in American bottoms. For years the Democratic Party has declared itself in favor of building up a merchant marine, and at last, after many efforts, we have passed a law under which we believe eventually American trade and commerce will be conducted in American ships. It is one of the most progressive measures that this Congress has passed.

FEDERAL RESERVE ACT.

If there had been no other measure passed by this Democratic administration, President Wilson would be entitled to a reelection and the Democratic Party continued in power by virtue of this measure alone. It has been in operation less than two years, and in that time it has been demonstrated that it is the greatest financial legislation ever enacted by this or any other Government. It has given competition in money markets. It has taken away the control of New York as the sole money market. If a country bank—and I mean by that any bank outside of New York City—wants money it now has two ways of getting it: It can borrow it from New York, as heretofore, or it can go to the Federal reserve bank of its own district and rediscount its paper and secure the money from such reserve bank at a low rate of interest. It has given elasticity to our currency system. It has made it impossible for money panics to come. It has enabled all legitimate business to get such money as their business requires. It has done more to bring about the present condition of prosperity in our country than, perhaps, all other legislation combined.

THE DEMOCRATIC PARTY AND THE MANUFACTURER.

It was claimed by our Republican friends that the Democratic Party was opposed to the manufacturing interests of this country. Nothing is further from the truth. The manufacturing interests of the country were never in better condition than they are to-day, after three years and a half of Democratic rule.

The Federal reserve act has given the manufacturer the financial assistance necessary for the development of his business. It has given him less interest rates. It has given him honest competition. The Clayton antitrust law has told him what the law is, and he is not hampered by being constantly sued for violations of the antitrust laws. We have given to the manufacturer the merchant marine act, which will increase his business abroad and work to his great advantage. We have also enacted a modification of the Sherman and Clayton antitrust laws, in so far as these laws apply to our foreign trade. In this way he will be able to combine with his neighbors and obtain foreign trade that he could not obtain now. We have instituted the Tariff Commission, which will protect his interests after the European war is over.

Surely the manufacturer has no cause of complaint against the Democratic Party. Surely he will not vote against the administration that has brought him his present prosperity.

THE DEMOCRATIC PARTY AND THE BUSINESS MEN.

Business in this country has never been in a better condition. It has never been more prosperous. It has never been as large. Business conditions are not due to accidents. The present good conditions, in my judgment, are due to Democratic policies. We have given business men a flexible and elastic currency system. We have done away with bank panics. We have told business men what they may lawfully do and pointed out what they can not do, and we have seen to it that lawful business may go unhampered and unprosecuted. We have given business men less interest rates. We have given them greater ease in securing money with which to operate their legitimate business. We have given them honest competition under fair and just tariff laws. We have provided against unlawful trade practices under the Federal Trade Commission. We are arranging to secure for them great foreign markets by providing for our own merchant marine. We have provided for securing larger trade and commerce by permitting them to combine in securing foreign business.

THE DEMOCRATIC PARTY AND LABORING MEN.

The Democratic Party has stood loyally by the laboring men. It has passed more laws for the betterment of labor conditions in the last four years than has ever been passed under any administration before. It has established a Department of Labor, with its chief as a member of the President's Cabinet. It has passed a law providing for a national employment bureau to help those who want work to obtain employment. It has passed an eight-hour law for women working in the District of Columbia. It has passed a child-labor law, which has been heretofore referred to. It has passed the employees' compensation act for injuries received. It has passed a seaman's act which is to abolish slavery on merchant vessels.

In this connection it has been said of us that we have been coerced by the labor unions in passing this labor legislation. Nothing is further from the truth. We have passed this legislation because the Democratic Party places the man above the dollar. We have believed that this legislation was right, and any unbiased man who will examine into it is obliged to come to the same conclusion. We believe in the rights of property.

We believe that they ought to be upheld and protected, but at the same time we believe in the rights and dignity of labor, and we believe they ought to be upheld. We do not believe that labor is a commodity, a property that is measured, bought, and sold as any other piece of property. On the contrary, we have believed that honest labor is the highest form of human energy and is entitled to be treated upon the same terms of humanity that the individual man is treated.

THE DEMOCRATIC PARTY AND THE RAILROADS.

While the Democratic Party has dealt justly and fairly with labor it has not undertaken to injure legitimate business, large or small. It has dealt with absolute fairness with the railroad situation. Under Republican rule prosecutions of railroad combinations were of almost daily occurrence. Many railroads were in the hands of receivers. Other railroads were unable to pay dividends. Their rolling stock was in bad condition. Many of their engines and cars were idle. Under Democratic rule all of this is changed. Every engine and every car is at work. Railroads are no longer being prosecuted by the officials of the Department of Justice. Such as have already been in the hands of receivers are now being reorganized. Earnings have greatly increased. After suffering from Republican rule, or misrule, they applied to this Democratic administration for permission to increase their rates. A small increase was granted, and this increase was acquiesced in by the whole country as being right. The result is, the railroads have made remarkable progress under this administration.

THE DEMOCRATIC PARTY AND THE FARMERS.

The acts of this administration benefiting the farmers are almost innumerable. Just before the administration came in the Democrats of the House forced the passage of the parcel-post law for the benefit of the country people. It has been a great success. Likewise, this administration has extended the rural free delivery. It has provided for farm-extension work. It has contributed to agricultural schools. It has regulated dealing in cotton futures. It has regulated warehouses and the use of warehouse receipts. It has given to the farmers the benefits of the Federal reserve act. It has taken the high tariff duties off of all farming necessities. It has instituted the merchant marine, by which farmers will obtain better markets for their products. It has authorized the contribution of $25,000,000 for country roads, which will be of great benefit to the farmers. But, above all, it has established the rural-credits system, which will mean more to the farming interests of the country than all other laws passed for the benefit of the farmers combined.

PEACE AND PROSPERITY.

But, over all and above all, the two things which this Democratic administration has given the country have been prosperity to our own people and peace with all the rest of mankind. Republicans may talk about our prosperity being temporary. That is but the expression of a political hope. They know just as well as we do that our present national prosperity is not temporary, but that it is based on a sound domestic condition and a firm and peaceful foreign policy.

We are prosperous because we have been at peace, and we have been at peace because of Woodrow Wilson. That is the whole situation in a nutshell.

MY PART IN THE DEMOCRATIC ADMINISTRATION.

Mr. Speaker, I have been in Congress just five years. I have been there during the entire time when these great measures, of which I have heretofore spoken, have been considered. I have supported them loyally. I have fought for them as valiantly as I knew how. I have taken part in their consideration. I am proud of each and every one of these laws. I believe that they, together with the determined stand of our President, have produced our present prosperity. I believe that the whole country approves of them. Nine-tenths of these laws were passed not only by the Democrats of both Houses, but a majority of the Republicans also voted for them.

WHAT THE REPUBLICAN PARTY STANDS FOR.

As I stated before, this is a Democratic year. We are standing upon our record. We are standing upon our present condition of peace and happiness in this country. We are standing upon favorable business conditions in this country. We are standing upon the present prosperity in this country. Any independent gentleman who may feel like supporting the Republican Party or the Republican candidates, let me ask you, What is it you want to change? Would you repeal a single one of the laws I have referred to? Would you do away with the present currency system? Would you do away with the rural-credits act? Would you do away with the election of United States Senators by the people? Would you do away with the income-tax law? Would you do away with the merchant-marine law? Would you do away with the child-labor law? Would you do away with the preparedness law? If you would not—and I do not believe you would do away with any of these laws—then is it not your duty to hold the party in power that has passed these laws?

MR. HUGHES.

Mr. Hughes, the Republican candidate for President, has been to Tennessee. He is a most excellent gentleman, but what great issue does he stand for? What great principle of government does he stand for that would cause you to want to vote for him? What policy does he stand for? In my judgment, the candidacy of Mr. Hughes has been a lamentable failure. He has made no impression upon the country. He stands for no issues. He has simply been over the country complaining of matters so small that they ought not be noticed by a candidate for the great office of President. He complains that a Republican Chief of the Census Bureau was turned out and a Democrat from Georgia—and there is not a better Democrat or man in the world than W. J. Harris—put in his place. He complains that some insignificant civil-service man was changed when he ought not to have been. He complains that the President ought to have recognized the assassin Huerta. He complains that the President ought to have prevented the sinking of the *Lusitania*. He complains that the negroes in Santo Domingo are not being properly treated. He complains, forsooth, that certain gentlemen from the South have important positions in Washington. His only issue is the bloody shirt.

These are the insignificant peccadillos that the candidate of a great party is running for President on. Shades of the immortal Lincoln, what a spectacle!

You will notice, however, that he does not attack a single one of the great measures that I have spoken of. He does not criticize any of these great constructive pieces of legislation passed by the Democratic Party during these four years. He admits that the country is more prosperous than ever before, and all that he can say is, in his judgment, it is temporary. How does he know it is temporary? We are told that Moses, Elijah, and Ezekiel talked with God, but all those of whom we have any record as having talked with God were gathered to their fathers many thousand years before Judge Hughes was born.

WHAT THE DEMOCRATIC PARTY HAS DONE FOR THE COUNTRY GENERALLY.

This is the fourth year of Democratic control of this Government. They have been years of peace and plenty. They have been years of growth and prosperity. They have been years of development and progress. We inherited bad business conditions from the Taft administration, and it took us some little time to get it straightened out; but we have done so, and all is now working well, notwithstanding we have been greatly handicapped by the world war. No financial panics have upset our country in these years. There have been no great upheavals to upset the laboring world. There have been no great panics to wreck capital. The laboring man has had his dinner pail full and has received the rewards of honest toil. The capitalists have received just returns upon their money and been made to bear their just proportions of the expense of the Government. The manufacturer, though no longer allowed to be the beneficiary of privilege and bounty as under Republican rule, has, under the just laws of competition and good business conditions, restored by the Democratic Party, relied upon energy and effort rather than upon bounty and privilege, and they, too, have prospered as has all the rest of the country.

The wheels of industry are no longer stopped as they were under Republican rule. Mills are no longer idle; but under a just tariff law every species of manufacturing industry has been quickened and the prosperity of the manufacturers is greater than ever before.

There never has been such good business in our country. Under the beneficent influence of the Federal reserve act, commonly known as the Democratic banking and currency system, business has grown and prospered in this country as never before. Business men have more money to operate on. They have larger business. They have more profitable business than ever before. Prosperity has not been confined to big business men, but the small business men have prospered as well. There has never been as much money on deposit in the banks. There has never been as much money deposited in savings banks as there is to-day. Nor has our business been confined to our own country. We have sold more of our products abroad than ever before. Our exports have reached the high-water mark. The banks of our country have prospered. The grocery merchants have prospered. The commission merchants have prospered. The dry goods merchants have prospered, and every species of trade and commerce has yielded greater profits than ever before to our people.

Under Republican rule our mines were closed down in large part. Many of our coal mines were shut down because so

many of our mills, which usually used their coal, were shut down. They could not use coal. Our iron mines and our copper mines were idle. Such of them that were running had labor strikes on their hands, and during the Taft administration Congress was largely engaged in investigating strike conditions; investigating the absorption of and shutting down of the little fellow by the big fellows; investigating the employment of children instead of men in factories and the like. Under beneficent Democratic rule the laboring men and their employers are making too much money to strike. The big fellows are not allowed to gobble up the little fellow; but each is allowed to work out his own prosperity under the just laws of competition. The result is that our mines are all open and running; our miners are employed, and the output of our mines and furnaces is greater than ever before.

Under Republican rule railroad building almost ceased. The Department of Justice was largely engaged in suing railroads or prosecuting their officers and agents. Whenever the department could get a little time from dissolving one of the trusts or breaking up a strike it would turn up the facts to put another railroad into the hands of a receiver. The result was the railroads were earning no dividends. They were discharging their employees; they did not have work for them to do. They were cutting off trains because the people did not have money enough to travel. They were parking their freight cars because they had no freight to haul. There were almost as many engines in the roundhouses as there were on the road. These were the conditions brought about by Republican misrule.

But what has been the result to the railroads under Democratic rule? Their rates were not sufficient to give them a just return on their money, and some of them were allowed to increase their rates very slightly. Business conditions under Democratic rule so improved that all the railroads have arisen out of the mire of distress and ruin in which they had been placed by the Republican Party, and to-day they are more prosperous than ever before. Every freight car is being used. Every passenger train is being run. Every engine is being utilized. Every railroad has its full quota of employees. Every employee is receiving a reasonable wage for his labor. Receiverships are becoming antiquated, and high financing in railroad stocks and bonds, due to Republican laws, has become a thing of the past, and the railroads to-day are giving the people better service and are more amenable to law than ever before in their history.

Even the Lord has been good to the Democrats in these four years of peace and plenty. Our crops have never been more bountiful. We have raised more cotton than ever before, and it has brought better prices. We have raised more corn than ever before, and it has brought better prices. We have raised more wheat than ever before, and it has brought better prices. We have raised more stock and cattle and hogs than ever before, and they have brought better prices. Of course the Democratic Party did not have anything to do with the sun and the rains which produced these crops and the cattle which brought forth their kind, but it did have all to do with the conditions under which they were produced, and therefore the Lord has bountifully blessed the Democratic Party.

PRESIDENT WILSON.

The Democratic Party has made a good fight in the last four years. It has carried out its platform pledges made at Baltimore. It has stood by the people. It has stood by the country. In President Wilson it has had the ablest political leader any party ever had. He has risen to every occasion. He has met every crisis. He has come out victorious every time. During nearly four years, with Congress in session nearly all the time, with the gravest questions that ever confronted an administration or a people, he has never lost a fight. He has kept us out of war. He has kept our country at peace, and through all we have been more prosperous than ever before in our history.

His enemies said that he was but a schoolmaster and unfit for the duties and responsibilities of the Presidency. His enemies said he could not get along with Congress. His enemies said he was obstinate and willful. His enemies said he was not a diplomat and would get us into war with Germany. His enemies said he would get us into war with Mexico. His enemies said he could not avert a railroad strike. His enemies said he was too proud to fight. Every conceivable calumny and abuse have been heaped upon him, but through all he has conducted himself in a dignified and praiseworthy way. Too proud to fight they said, and yet he has the largest army patrolling the border that has ever been in existence in America in times of peace. Too proud to fight, and yet he has the largest navy that ever existed in American waters. Unable to avert a railroad strike, and yet we have none, and the country's business is going on as peacefully and as prosperously as before. Not a diplomat, and yet we are at peace with all the world and America stands higher among the nations than she has ever stood in her history. Could not get along with Congress, and yet Congress has enacted his every wish into law. He is the greatest statesman since Jefferson. He is the greatest diplomat since Clay. He is the greatest politician and leader since Jackson. He is the greatest and most versatile President that we have ever had, and the strongest ruler among all the nations of the earth to-day. Against this wonderful man the pitiful candidacy of Mr. Hughes will melt away as the mist melts in the morning sunshine, and the 7th day of November will give us a victory in a larger and fuller measure than the Democratic Party has ever received at the hands of the American people.

---

**The Late Representative Brown, of West Virginia.**

---

# MEMORIAL ADDRESS

OF

# HON. CLAUDE KITCHIN,

OF NORTH CAROLINA,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, April 16, 1916.*

The House had under consideration House resolution 204, as follows:

"*Resolved*, That the business of the House be now suspended, that opportunity may be given for tributes to the memory of Hon. WILLIAM G. BROWN, Jr., late a Member of this House from the State of West Virginia.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House at the conclusion of these exercises shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. KITCHIN. Mr. Speaker, under the impression until a short time ago that these ceremonies were to take place next Sunday instead of to-day, I am here unprepared to do justice to the dead friend whose life and character we commemorate to-day. And yet so great was my admiration, so strong was my friendship, and so warm my attachment for our deceased colleague that if I did not utter some word of tribute upon this occasion, I should feel myself disloyal to a memory which I revere and honor.

I knew Mr. BROWN well. Perhaps I was one of the first of the older Members whom he met after his election to Congress. I shall always recall with much interest and a great deal of pleasure our first meeting. It was one morning in the short session of the Sixty-first Congress, just after he had been elected to the House at the preceding November election. I was sitting alone on a davenport looking down the lobby aisle behind the Speaker's desk, when I saw a Capitol guide and a gentleman coming along, the guide telling the history of this Speaker and that Speaker, as he pointed to their portraits on the wall. I watched this stranger gentleman. His manner and demeanor were so polite, so courteous, so genteel, and the lines of his face were marked with such strength of character and mind, and his countenance so full of affability and geniality that I said to myself, "That is more than an ordinary man." I sat there until the guide came along to the portrait of the Speaker above my seat, where they stopped. I looked carefully at this man, then a stranger to me, and I was convinced then that he was more than or ordinary man. After the guide had finished telling him about the life and character of the Speaker above me I struck up a little conversation. About that time the doorkeeper announced that the lobbies should be cleared. The guide said, "We must leave now." I then said, "My friend, where are you from?" He answered, "I am from West Virginia." I then asked his name. He replied "BROWN is my name." I said, "You are not this Democratic BROWN that carried a rock-ribbed Republican district over here in West Virginia in the last election?" "Yes; I am the man," said he. I said, "You do not need this guide." I then told the guide to turn Mr. BROWN over to me; that I would be his pilot awhile. I explained to him that he was entitled to the floor and escorted him into the House cloakroom, where I introduced him to dozens of Members, some of whom I see around me now. From that day until his death BROWN and myself were close, intimate friends. He attracted me at once. There was that indescribable something about him which, for lack of a better name, we call personal magnetism. He possessed it in a preeminent degree. I never knew a person, man or woman, who ever met Mr. BROWN that was not attracted by him. He won

you to him. You could not help admiring him; you could not help being attached to him.

BROWN was one of the most unassuming, unintruding men I ever saw. You will remember that in the Sixty-second Congress, to which he was first elected, the system of appointing committees had been changed; the power to appoint had been taken out of the Speaker's hands and given directly to the House, through the recommendation of the majority members of the Ways and Means Committee in the first instance, to the majority caucus so far as concerned the Democratic Members, and then by the caucus recommending to the House for election. Practically all the new Democratic Members had applied to the Ways and Means Committee for committee assignments. In looking over the applications for the committee assignments I found that BROWN had made no application. We majority members of the Ways and Means Committee had an understanding that we would make no promises to any Member as to assignments. One day while with BROWN I was tempted to break the rule a little, and I said, "BROWN, you have not made application for a committee assignment." He said, "No; I just leave it to you gentlemen; I am willing to serve anywhere you put me." I said, "I can not promise you anything, but tell me to which committee you had rather be assigned; on what committee do you think you could give better service?" He then replied, "Since you ask me, I would prefer the Banking and Currency Committee."

I recall, too, that when we reached the Banking and Currency Committee for its make-up I presented his name. He was unanimously nominated by the committee and afterwards unanimously elected by the House. We made no mistake. He measured up to every requirement of an able, wise, diligent member of that great and important committee.

One day BROWN was in my office, when a friend from North Carolina came in. In introducing BROWN to him, I said, "Here is one of God's noblemen." I had said it before, and I say it now, BROWN was really one of God's noblemen, and, as the gentleman from Indiana [Mr. CULLOP] said to-day, he was a real prince among men. He was a wise counselor. He did not take that active part in debates on the floor as some do, but when you talked with him in the committee room or in his office or in the cloakroom about any matter, you would get as good and wise judgment and conclusion from him as you would from any man. He had a balanced judgment; he had one of the most genial, lovable, and affable temperaments I ever saw, and it never betrayed him. He was a well rounded, perfect gentleman. That was the impression he made upon me when I first caught a glimpse of him in the corridor. He reminded me of what we call in our country an "old-time southern gentleman." He was not an old man, but in his courteous, genteel, and gracious manner and appearance he seemed to typify our conception of the "southern gentleman." I have served with few men in this House for whom I had a warmer affection. I suppose, outside of his committee colleagues in the Capitol, I was with him while in the Capitol as much as any man in the House. I was always charmed when I was with him. I left him with a delight and a sprightliness and cheerfulness of mind and temper that I did not have before. He could shake hands and look a man in the eye with more genuine sincerity and geniality than any other man I have met in Congress. My friends, as poor as has been my offering, I felt I could not miss this opportunity to pay a tribute to his memory and give my estimate of this fine and splendid gentleman, and wise and patriotic legislator, which his district, State, and Nation, as well as the House, have lost in his death.

---

**Guarding the Nation's Gateway—Humanizing Ellis Island.**

## EXTENSION OF REMARKS

OF

## HON. EDWARD KEATING,

OF COLORADO,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

**Mr. KEATING. Mr. Speaker, at my suggestion, Hon. Frederic C. Howe, commissioner of immigration at the port of New York, prepared the following statement in answer to the charges of immorality, laxity of administration, and neglect of duty made by Congressman WILLIAM S. BENNET, of New York, in speeches in the House of Representatives on July 18 and August 5, 1916.**

It is unnecessary for me to comment on Mr. Howe's statement. It speaks for itself; and I submit it with confidence to the candid judgment of my colleagues.

The statement follows:

THE NATION'S GATEWAY—A DETENTION CAMP.

My appointment as commissioner of immigration at Ellis Island coincided with the outbreak of the European war. Depressing as is the duty of separating the good from the bad in peace time, it became far more heartrending when Ellis Island was converted into a place of detention for hundreds of men, women, and children whose only offense was that they had been lured to a land of promise only to find it as well as the possibility of return to their native land closed against them. Even in ordinary times to be turned back at Ellis Island is a tragedy like that of the man and woman who have struggled for years to obtain a home; who have labored through the hot summers and the dreary winters; who have saved and sacrificed for something to hand on to their children; and who, on some bleak and desolate night, see it destroyed by flames. Such is a suggestion of the tragedy of those who come to America in search of a new home and who find its doors closed upon them. They have gazed across the seas for years. They have saved of their centimes for the passage. They have sold their small possessions, and, finally, with a hope such as none of us ever experienced, they make their way to the point of embarkation. Day by day they dream of America. The Statue of Liberty is the blessedest sight that ever greeted their eyes. They have but one fear, a fear that haunts them like a man under sentence of execution. They fear that they will be found wanting before the inspector who stands at our gates.

I doubt if we know of any apprehensions comparable to those which haunt the incoming alien from the moment his ties are broken in the land of his fathers to the moment he appears before the inspector. The husband may be chosen, the wife rejected. Fortune may favor the parents and frown upon the children. The family may be divided at the portal of a new life, for such is the mandate of the law.

The immigrant is poor. Otherwise he would not come. He does not know our language. He is frequently illiterate. Except for such concern as the Government gives him he is defenseless before all sorts of people who would exploit him.

Such is the condition of the alien in peace times. But the war closed the doors of Russia, Austria-Hungary, Germany, and Poland to those who were rejected. They could neither go forward nor back. Hundreds were caught midway between two worlds. They were propertyless; for the most part without money, clothes, or friends. They were dumped on Ellis Island for no graver offense than that committed by the ancestors of every one of us—the offense of loving the freedom which America offered better than the tyrannies of the Old World.

ELLIS ISLAND A DETENTION CAMP.

I found these hundreds filled the detention rooms at Ellis Island on my appointment. They spoke many tongues. An official was some one to be feared. There was a babble of pleadings, but the eyes of all spoke the same language. It was the language of hopelessness, of beseeching, of pleading. The new land could be seen from the gratings at Ellis Island, but it could not be touched.

Month followed month. The only resource that the immigrant knew was work, but work was denied them, for there was nothing to do in the grim detention rooms at Ellis Island. The immigrants rose with the dawn and waited through the long, long day in the hope that they might hear their name called by an official, a call which might mean freedom—it might mean despair.

The worst punishment that can be inflicted upon even hardened criminals is idleness. They go insane. They commit all kinds of offenses. Yet the 600 aliens at Ellis Island had nothing to do. One day was the same as another. Husbands were separated from their wives and families. They stayed in different rooms. They slept in different dormitories. They learned of one another's sorrows only when hunger drove them to the table. Their clothes wore out. They had no money. They had no recreation. They were not permitted to leave the building. They saw occasional friends. Some of them knew no language but their own and lived solitary and alone.

Prisons have long since been more humane than then. Yet these poor people had committed no offense, save the offense of preferring our country to their own. They were marooned in New York Harbor in a building erected for the speedy clearance of thousands of persons a day. It was not erected as a prison. It was not designed for the comfort of persons detained for any length of time. This was the condition which I found on my appointment.

HUMANIZING ELLIS ISLAND.

I have been criticized by Congressman BENNET in the House of Representatives in a speech which I could not answer, and which has gone all over the country, and which by direct statement or inuendo charged me with encouraging immoral conditions at Ellis Island. He stated that I permitted families to be together; that immoral cases were permitted to mingle with the other aliens, and that as a result of this mingling great harm was done and immorality resulted.

That I permitted husbands to be with their wives and children I admit. That I took them all from the hard benches of the dreary detention rooms and permitted them to go upon the lawns, where the tears streamed down their cheeks in sheer happiness to be close to the soil again, I also admit. I admit that I opened school rooms for the children. I induced societies to come to Ellis Island and conduct sewing classes, in which the women could clothe themselves and their children. I opened rest rooms, where women and sick children could go in the daytime. I opened a library and sewing room. I provided a play room and induced all sorts of organizations in New York to come to Ellis Island and cooperate in relieving the tedium. A great porch was opened to all of them. It was provided with swings and playthings. I filled the station with flowers and lighted its walls with pictures. For two years on each Sunday there have been great concerts given in the main inspection room by immigrant societies from New York. These concerts were the red-letter day of the week. Motion-picture plays have been given in the evening by benevolent-minded persons. Games have been provided for the men. They, too, were organized for a while into mat-making classes. I permitted the men and women to walk together upon the lawns, to be together upon the great porch, and to meet with one another, as they had done all their lives before, as they had done upon the boat coming over. But there were matrons about all the time. There were watchmen there. The representatives of the religious societies were coming and going all the time. The sun beat upon them on the lawns, and the electric lights in the detention rooms.

The immoral cases were kept by themselves. They stayed in one section of the lawn—quite naturally, for the other aliens stayed away from them. They were barred from mingling with the others on the great porch—300 feet long and 150 feet wide—but they did not mingle. In the first place they did not seek to mingle, and in the second they were not permitted to mingle. It was and is my opinion that the surest way to prevent immorality was to have everyone out in the open under the watchful eye of officials, rather than in a dozen different rooms which could not be adequately supervised, and it is a fact that the alleged immorality was not committed in the playground and porch; that was as impossible as in a public street. The only alleged immorality was when the aliens were being kept in their rooms separated and segregated from the others, and even then has never risen above the case of a prostitute and procurer who had been detained at the station for months.

RUNNING A PRISON IN AN IMMIGRATION STATION.

Warrant men and women arrested for some offense were being brought to the station from inland cities. These still further increased the congestion, for these immoral cases had to be segregated. They had to be watched. Their offenses were sometimes trivial and sometimes serious. And despite this mixture of races, despite the fact that 300,000 people have slept on Ellis Island during the last two years, no complaint was ever registered by anyone about conditions up to a few weeks ago, and no suggestion has ever been made by anyone that any improper act occurred among the ordinarily detained alien. There are 70 representatives of various organizations at Ellis Island. They represent almost every church, the Young Men's Christian Association, the Young Women's Christian Association, as well as many philanthropic foreign organizations. Hundreds of visitors come to Ellis Island each day to see their friends. There are 600 employees at the station. Complaint boxes are scattered about the walls. The office of the commissioner is open at all times. Yet despite this problem, for which Ellis Island was not prepared, there was no suggestion of immorality or of irregularity at this station up to within the last few weeks, and the suggestion referred to by Congressman BENNET came from prostitutes and procurers, and related to their own actions rather than to the actions of the ordinary immigrants detained here.

An investigation was immediately made of each of the cases referred to by Mr. BENNET. Sworn statements were taken. Watchmen, matrons, ministers, and representatives of religious societies were called in. The testimony was all to the same effect. There was no confirmation from any source of the statements of the prostitutes and procurers, one of whom offered to make a disclosure on condition that the Government would pay his transportation to South America, while the other made her statement after an altercation with the guards which had resulted in rather rough usage.

Anyone familiar with prisons, anyone familiar with this class, knows that one of their ambitions is to outwit the guards, and that "frame ups" are of constant occurrence. Yet the most exhaustive investigation failed to produce any evidence that would lead to an indictment of any employee, much less to his conviction.

RELIEVING THE CONGESTION—A SYSTEM OF PAROLE.

The war had turned Ellis Island into a detention camp. It was not built for that purpose. It consists of a series of widely scattered dormitories, two large women's and a men's day detention room, all located in the main administration building. In addition there is a narrow corridor with 10 small rooms, containing 8 or 10 beds each, which is used for two purposes: First, as a dormitory for first and second cabin aliens who could not be immediately landed for some reason or other, and, second, as detention quarters for immoral cases, such as prostitutes and criminals. The rooms are close together. Despite repeated appeals to Congress, no appropriation has ever been made for adequate and proper dormitories for first and second cabin aliens. As time went on, warrant cases were brought to the station for immediate deportation, otherwise to be held until the end of the war. They accumulated. Hundreds of other aliens were detained because of the ruling of the Department of Labor. What to do with these accumulations became a problem. They could not be sent back to Europe and they had been denied admission to the United States. The Department of Labor finally sent representatives to Ellis Island to reinvestigate all of these cases. Prolonged hearings were held. The life histories were gone into.

The Young Men's Christian Association and religious and philanthropic organizations of the island were invited to cooperate. Jobs were found for men. Homes were found for women. The department admitted them on parole subject to rearrest in case it became necessary. They reported to the station. They are inspected by our officials. They are under surveillance of the religious societies. By these means several hundred persons were temporarily landed. Among these were a number of men and women who were held as immoral cases. Of this total number, not more than half a dozen have gone back to their old life. The others have made good. They have learned their lesson. Many of them have made substantial savings. This is true of the women as well as of the men. These persons were treated just like offenders on parole or probation by the courts. Trusted by the Government, they have recognized that trust and acted accordingly.

It has been charged by Mr. BENNET that I admitted, or recommended for admission, a large number of immoral aliens. As a matter of fact, investigation of the records show that of this total number only nine were personally recommended for admission by me. Among this number was Juliette, an Italian woman. She had been arrested as a prostitute. Her husband, or alleged husband, was arrested and sent to Atlanta prison. Juliette had been at that station for nearly one year. She was spoken of most highly by the matrons. She had a little boy in Italy to whom she wanted to send money. The St. Rafael Society of Italian immigrants applied for her parole. I had indorsed the appeal which the department granted. The woman was given employment by one of the physicians in the public health service. She worked at this place for months. Her employer speaks in the highest terms of her. She then secured a second position, and her second employer spoke of her as exemplary. During the last week a thorough investigation has been made by a Federal inspector, who reports that there is no cause of complaint against Juliette whatever. This is one instance of many unfortunate women whom kindness, consideration, and help has reclaimed from their former life.

PROTECTING THE IMMIGRANT FROM "FRAUD AND LOSS."

Under the immigration law immigrant officials are charged with the duty of protecting the alien from "fraud and loss." I took this obligation seriously. That brought me into conflict with many powerful interests which for years have operated in and about Ellis Island. It included steamship companies, railroad companies, hotels, lodging house keepers, and a private contractor at Ellis Island.

Mr. BENNET says I have neglected my duty. Rather I have been too busy performing my duty. This complaint would never have arisen had it not been for too great activity on my part. That is the real trouble. Under the law the responsibility of protecting the immigrant from "fraud and loss" falls upon me. Under that provision I consider this to be one of my primary duties, and "fraud and loss" involves any kind of needless exaction or extortion to which the hundreds of thousands—in normal times nearly a million—of immigrants that enter this port annually are subjected. The rules require that the immigrant have a small sum of money, usually $25. And immediately upon admission the Government turns him loose to be preyed on by anyone who can get to him before he can get away from New York. What these agencies take they take legally, it is true; but it is none the less a dead loss to the immigrant. Immediately upon my appointment I started in to protect the immigrant from these interests.

In the first place, as soon as the immigrant is admitted he has to run a gantlet of a series of private agencies which have offices at the station. He runs the gantlet, first, of the money changers, who transfer European money into American money. Then he runs by the telegraph offices, who want him to send telegrams. Next he faces the railroad and steamship offices, who exchange orders or sell him transportation. Finally he passes by the food concessionaire, who sells boxes of food at 50 cents and $1 to the immigrant in transit. Every one of these agencies wants to make as much money as possible. Every one of them has employees whose jobs depend upon their success in promoting business. They urge the immigrant to buy food. I protested against these conditions, especially against having the feeding privilege in private hands. The Department of Labor, with the approval of the Department of Justice, approved of the taking over of the contract by the Government. We planned to take the element of profit out and at the same time insure that the immigrant could get wholesome food at cost. We also would free him from private agencies urging him to buy more than he needed. This precipitated a controversy.

Closely related to this form of exploitation were a number of others. I found that second-cabin aliens, who differ very little from steerage aliens, were examined on shipboard and dumped into Hoboken, New York, and Brooklyn. Hotels, saloons, lodging houses, expressmen—all kinds of persons—lived off the alien before he could get out of the city. Many of the aliens were compelled to stay overnight needlessly. They had to cart all their bundles, baggage, and possessions across the river, then down Manhattan, then across to Ellis Island—all at great cost to themselves. I urged that these aliens be inspected at Ellis Island, so that they could go immediately West without all this waste, which, according to those protesting against the change proposed by me, amounted to colossal sums, it being said that Hoboken alone would lose $700,000 a year by the change. The immigrants were poor. They were ignorant. They were dumped into a great city without anyone to protect them, and the privileges which all these agencies enjoy run and ramify into others.

The steamship companies pay the hospital charges for detained immigrants. They amount to a very large sum. I had an investigation made and found that we were losing $120,000 a year, which was a free gift of the Government to the steamship companies. I brought about an increase in their rates of from 200 to 300 per cent. It put the hospitals on a self-supporting basis.

I also attacked the in-transit privileges, and aimed to bring about a reform by which the $4 head tax collected by the steamship companies would be paid back to the immigrants who left the country.

These are but typical of the hostilities aroused, the groups incensed, and the interests disturbed. In normal times the food contractor does a business of probably $500,000 a year. A three-year contract may amount to $1,500,000. The actual investment in cooking utensils, labor, and supplies is probably under $20,000. The best offer we have been able to get to run this contract for the future has been on the basis of 10 per cent profit. On this basis the contract is worth $50,000 a year. It has been worth much more in the past.

THE FINDING OF THE DEPARTMENT OF LABOR.

In commenting on the statement of Congressman BENNET that I neglected my official duties, the Department of Labor made the following statement to the Committee on Immigration of the House, which was adopted by the committee and reported to the House:

"As bearing upon the above intimation of neglect, I beg to say, however, that the following substantial achievements in the efficient administration of the station have been effected by Commissioner Howe:

"(1) A thorough investigation with experts was made of the cost of the hospitals, which were alleged to be self-sustaining. The commissioner found that the hospitals were losing over $100,000 a year, which loss was being paid by the Government for the benefit of the steamship companies. He secured an increase in hospital charges to steamship companies which has increased the earnings of the hospitals by approximately $100,000.

"(2) He reinvestigated requests for money for permanent appropriations and after investigation reduced such request, in 1915, by $300,000.

"(3) He reduced, in response to war conditions, the operating salary costs of the Ellis Island station by approximately $100,000 a year.

"(4) He investigated the many immigration lodging houses and homes in New York and brought about a clean-up in a number of them.

"(5) He secured the cooperation of the commissioner of police to clean up the conditions which surrounded the barge office, and by so doing protected the incoming immigrants at New York from the individuals who had previously preyed upon them.

"(6) He investigated and brought about many reforms in the protection of the aliens en route from Ellis Island, both at Jersey City and along the route.

"(7) He organized all of the employees at the station into an association for making the wants of the employees known and for securing the cooperation of all the employees in the administration of the station.

"(8) He brought about a reorganization of the purchasing of supplies for the hospitals at a great saving and improvement in the service.

"(9) He made an investigation of the conditions under which landing of first and second cabin aliens were made at the various piers around New York, and ended many abuses and losses to which the aliens were exposed.

"(10) He brought about a change in the inspection of first and second cabin aliens on shipboard which greatly improved the service.

"(11) He made a number of studies at the request of the department as to means for increasing the efficiency and the rating of the employees.

"(12) He greatly increased the output of the Division of Statistics and brought about a complete change in the filing system.

"(13) He worked in cooperation with the board of education in New York for the opening of night schools for the education of adult aliens.

"(14) He organized a number of agencies looking to the protection of aliens in New York.

"(15) He organized a movement in 1916 for Americanization day celebrations throughout the country, and over 100 cities held citizenship celebrations as a result of the commissioner's efforts.

"(16) During the past two years Ellis Island has been almost free from the constant criticism on the part of foreign organizations and of the foreign press, which prior to his administration was continuous. It was directed at the alleged lack of kindness and consideration to incoming aliens. The nonforeign press of New York has been almost unanimous in its approval of his administration and the many changes and improvements which he has brought about.

"I remain, very respectfully, yours,

"W. B. WILSON, *Secretary of Labor.*

"Hon. JOHN L. BURNETT,
*"Chairman Committee on Immigration and Naturalization,*
*"House of Representatives, Washington, D. C."*

In the speech in the House September 5, Congressman BENNET further stated that I was so much occupied with outside activities that I could not attend to the duties as commissioner. He stated I was director of the People's Institute. This is not true. I have not been actively connected with the People's Institute since my appointment. He states I was chairman of the national board of censorship of the motion pictures. I resigned from office shortly after my appointment. He stated I wrote three books since my appointment. As a matter of fact I have written but one book, although three have been published.

Mr. BENNET says I have been absent from the station. Mr. BENNET is thoroughly familiar with immigration. He knows that 90 per cent of the immigration of this country passes through Ellis Island. We have thousands of appeals each year. There are over 600 employees here. I am called to Washington probably twice a month in connection with the immense volume of work passing through this station. I was sent to California by the department for one month, and later to South Carolina. We have been developing the Employment Division, which has called for many conferences, not only in Washington but elsewhere.

CONCLUSION.

Two years at Ellis Island, even with the rejected of Europe and the rejected of America as well, has done more to strengthen my belief in humanity than to weaken it. It has satisfied me that there is so much good in bad people that even from the point of view of control it is better and safer to appeal to the good than to awaken the bad. The alleged irregularities did not occur during the 22 months of trust and confidence when the immoral cases were on their honor. They occurred, rather, under the régime of punishment, close confinement, and distrust. I am more satisfied than ever I was that bad people can be trusted and that they respond to trust and kindness just as they respond to intrigue and outbursts when treated with harshness. And I am further convinced that most of the vice and the crime of the world are traceable to economic conditions; to involuntary poverty. For as soon as even arrested aliens, who were down in the bottom, were given a job, were encouraged by help and kindness, they have reacted to the new conditions and willingly abandoned their former professions and conditions. Of the hundreds of aliens admitted on parole only an insignificant number have gone back to their old pursuits or failed to vindicate the trust reposed in them. Human nature is much the same in every country and in every clime; and human nature gives back what it receives, whether that be kindness or punishment.

Two years' experience at the Nation's portals has further convinced me that our immigration laws fall far short of completion in dumping the alien at the port of entry and leaving him to his own devices, to be imposed upon and otherwise exploited by the many agencies that fasten upon him. He should be protected from private interests within the immigration station through the Government operation of the private concessions that now exist. Arrangements should be made to insure proper and cheap transportation to his destination. Cities, States, and Federal authorities should protect the alien at his destination, and arrangements be effected with the school authorities, health authorities, and other agencies for bringing him into immediate contact with American life. The average alien is willing to work; he is quite willing to identify himself with the best in America; and there is a terrible waste involved in permitting him to shift for himself, unaided, unprotected, and uninspired by the country toward which he has looked for years and for membership into which he has sacrificed everything that he possessed.

### Eight-Hour Bill.

## EXTENSION OF REMARKS

OF

## HON. HENRY W. TEMPLE,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. TEMPLE. Mr. Speaker, the so-called eight-hour law which passed the House last Friday and the Senate on Saturday was the subject of much discussion at the many celebrations of Labor Day on the following Monday, the first Monday of September.

Members of labor organizations and all other residents of this country have a very real interest in the satisfactory solution of labor problems, and therefore they are interested in this bill, so far as it may be believed to affect the solution of these problems.

There was a time when the right of laboring men to organize for the advancement of their own welfare was seriously challenged, but if there are any now who deny this right they express themselves very cautiously.

The changed conditions of modern industry have, of course, not modified the fundamental rights of men, but they have brought men into somewhat new relations with one another, and have, therefore, made some changes in the methods which men make use of to secure a recognition of their rights. Not many years ago a cabinetmaker, for example, owned his own tools, worked in his own shop, making pieces of furniture ordered from him by his customers. He owned the tools; he owned the shop; he owned the product of his own labor until he had sold it to a customer. For him there was no question of wages, of sanitation of the factory, of hours of labor; these things were in his own hands, under his own control. In such conditions a strike was not known. Not many years ago every little village, as well as every larger town, had its own small shoe shop, in which the owner employed perhaps a half dozen men, each of whom owned the bench on which he sat and worked, each owned his own set of tools, and each looked forward to the time when he would be the owner of such a shop. With the development of the large factory this state of affairs was changed. Labor-saving machinery multiplied the productive power of labor. The large factory could produce at less cost, and in many cases could produce a much better article than that made by hand. The small shop disappeared, and the man who worked with his hands no longer looked forward to the time when he would be the owner of a shop. The great multitude of men who make things with their hands expect to be wage earners throughout the working years of their lives.

The same number of men working with labor-saving machinery produce a much larger output. In almost every trade the application of steam and electricity to machinery has enabled the same number of men to produce a much larger quantity of goods than could have been produced under the old system. The same amount of labor produces more of that which satisfies the wants of men. The world is richer. No longer do men have to work 15 or 16 hours a day to produce that which will satisfy the bare necessities of mankind. Comforts, and even some luxuries, seem to have been brought within the reach of all. The world has advanced and the men who work with their hands have advanced with it, but the question may be seriously asked whether the men who work with their hands have had their full share of the world's progress. The laboring men of to-day have more of the comforts of life than the laboring men of three or four generations ago, but that is not a complete answer to the question whether they have had their full share of the world's advancement in wealth.

When each man worked for himself in his own little shop there was, as I have said, no question of wages, no question of the conditions under which he labored or of the length of the working-day that he could not settle for himself. He was his own employer. With the development of the factory system in which many men must work under uniform conditions, no one man of them can fix those conditions. They must either accept the conditions made for them by their employer and the wages offered to them by their employer, or they must in their own interest make a combined effort to secure for themselves such wages, such hours of labor, and such conditions about the factory as the nature of the business itself and the interests of the employer and the employee may justify.

It is not too much to say that labor organizations are the result of the factory system which grew up with the invention and development of labor-saving machinery. Labor organizations are intended then to secure for the laborer his just share of the world's progress. They are intended to secure just wages and proper conditions of labor, such as safety appliances, factory sanitation, proper compensation for injuries, child-labor laws, and the many adjustments which have been spoken of collectively as a program of social and industrial justice.

Along with the adjustment of wages and proper conditions of labor come also the adjustment of the length of the working-day. So long as labor organizations advocate their own interests in ways that are approved by public sentiment, so long as they seek to obtain a fair share—even their full share—of the progress which the world has made, they will be supported by public sympathy and approval.

There is a limit below which wages can not go. No man can be expected to work for less than will support him and his family decently, for less than will enable him to maintain a fair standard of living. On the other hand, there is also an upper limit above which wages can not go. No employer can afford to pay more than the amount by which the laborer's service increases the output of the plant. Only fair bargaining based upon prac-

tical experience can determine where the wages ought to be, but in every employment they must be found somewhere between these two limits.

A like principle applies to the length of the working-day. It must be fixed as the result of practical experience. In many trades an actual working day of eight hours has been determined by the customs of the trade. The Government of the United States has accepted the eight-hour day, and public opinion in general supports this as the standard. With this opinion I am myself in full sympathy and accord. I believe in the eight-hour day and hope for its adoption in all trades and for all laborers just as fast as the conditions of industry can be made to adapt themselves to this standard.

I believe in the eight-hour day because of its benefits to the worker. It benefits his health. It permits him to spend some leisure time in the advancement of his intelligence and in recreation and amusements. His leisure time may be used not only in the advancement of his own welfare, but it gives him an opportunity to have a better and more wholesome family life. If a workman leaves his home before daylight and works until night he has no opportunity to become acquainted with his own children or to meet his responsibilities in bringing them up. His family life can not be what it ought to be, and not only the members of his own family but also the community in which he lives will suffer the penalty. A shorter day gives the laborer time to do his duty by his family and time also for the performance of his duties as a member of the community by cultivating and manifesting a proper interest in the common welfare. Whether he will use his leisure wisely depends, of course, on the man, but the shorter day gives him at least a chance to be a healthier man, a better man, a better husband and father, and a better citizen. I believe in the eight-hour day.

The bill that passed the House last Friday and the Senate last Saturday is entitled—

An act to establish an eight-hour day for employees of carriers engaged in interstate and foreign commerce, and for other purposes.

This title is deceptive. The bill does not establish an eight-hour working day, even for the very limited number of railroad employees to whom it applies, and it applies to less than one-fifth of the railroad employees of the country. The Democratic majority voted against an amendment that would have given the bill a wider application. That amendment was as follows:

Add to section 1 the following: "*Provided further*, That this section shall also include and apply to station agents, train dispatchers, trackmen, office employees, workers in railway shops, and all other employees of a railroad carrier engaged in interstate carriage of passengers and freight."

There were 81 votes for this amendment and 120 against it, almost all of the 120 being Democrats. Whatever the bill may do it does not establish an eight-hour working-day, even for railway trainmen. To other workers it does not apply at all. When this law goes into effect the limit of the working-day for railway trainmen will be precisely what it was before this bill was passed. I understand that the general legislation covering this matter provides that men engaged in the operation of trains may not work longer than 16 hours, after which they are entitled to 8 hours off duty before they can be called for another period of 16 hours. Under the new law that condition remains unchanged.

The new law does provide that eight hours shall be the—

measure or standard of a day's work for the purpose of reckoning the compensation—

of certain employees, but it applies only to those employees who are actually engaged in the operation of trains. It does not even apply to all men actually engaged in this work, but only to those who are operating trains which carry persons or goods in interstate commerce. The bill specifically provides that the trains to which this bill applies must be used for the transportation of persons or property—

from any State or Territory of the United States or the District of Columbia to any other State or Territory of the United States or the District of Columbia or from one place in a Territory to another place in the same Territory.

It does not say from one place in a State to another place in the same State, for that would not be interstate commerce, and this bill is supposed to be dependent upon the interstate-commerce clause of the Constitution. To what extent this limitation may interfere with the general application of the law can be determined only by those who are practically familiar with railroad business. To what extent the present practice of the railroads may be modified to meet the limitations of this bill I do not know, but it is plain enough that the bill applies within limits which are somewhat narrow and probably not very well defined.

I do not know whether it will apply to trains going, for example, from Philadelphia to Pittsburgh, or from any place in Pennsylvania to another place in Pennsylvania, especially if the destination is a division terminal, where the train is broken up and scattered, some cars going to one railroad and some to another. Is such a train, as a train, engaged in interstate commerce? This is a question that must be answered by men who have experience in practical railroading or by men who have special knowledge of the laws governing railroads.

There is another limitation. The bill, in making eight hours the standard of measurement for wages, does, of course, give one material advantage to the limited number of men to whom it applies. So long as that provision of the law is in force, these men will receive for eight hours the wages they now receive for 10 hours.

It must be remembered, however, that the pay for overtime will be at no higher rate. If the original demands of the brotherhoods had been met, the men would have been paid at the rate of time and a half for overtime. This would have had a tendency to induce the management to give the men eight hours employment, and then, wherever at all practicable, to furnish a fresh crew, rather than work the tired crew for longer time at wages 50 per cent higher.

The public has certainly an interest in demanding that trains shall not be operated by exhausted men. I do not wish to risk my life as a passenger on a train drawn by an engine whose engineer has been 16 hours or longer at the throttle, or on a train that may collide with a freight train whose engineer has been exhausted by the strain of labor continued too long. The public has as vital an interest in a short-time working day for trainmen as the trainmen have themselves, but this law does not give the short-time day. Sixteen hours remain as the lawful limit. The eight-hour day is merely made the standard of measurement for the purpose of compensation.

I began a moment ago to speak of another limitation in this bill. Section 3 reads as follows:

That, pending the report of the commission herein provided for, and for a period of 30 days thereafter, the compensation of railway employees subject to this act for a standard eight-hour workday shall not be reduced below the present standard day's wage, and for all necessary time in excess of eight hours such employees shall be paid at the rate not less than the pro rata rate for such standard eight-hour workday.

The commission referred to in section 3 is to investigate during a period of not less than six months and not more than nine months, and the above section provides that the railroad shall not reduce the pay until 30 days after the report of the commission has been made. There is nothing whatever in this law or in any law now on the statute books that will prevent the railroads after that time from making such a reduction in the pay as will put the trainmen on precisely the present basis. Therefore, it seems to me that the sole beneficial effect of this bill will be to postpone until a few months after the November election the conflict, if, indeed, a conflict was impending, between the railroad management and the employees. If the men believe that they have received more than this, then it is my belief that someone has handed them a gold brick.

I was told that I ought to vote for this bill because I could never make laboring men understand the real nature of the legislation. Men who told me that I was right about the bill, that the bill ought not to pass, nevertheless advised me to vote for it because of this supposed difficulty in getting laboring men to understand the facts.

I put a higher estimate upon the intelligence of the average man. I believe that the average man can understand what I can understand, if the facts are placed fairly before him.

There are many other reasons also for refusing to support this bill. It was introduced in the House Thursday and referred to the Committee on Interstate and Foreign Commerce and ordered to be printed. On Friday at 11 o'clock, when the House met, the printed copies were ready for distribution; and not until that time did the Members of the House have an opportunity to begin to study the bill. An exception to this statement should be made. The members of the Committee on Interstate and Foreign Commerce had had an opportunity to consider the bill in committee on Thursday afternoon, but the membership of the House had not seen it until Friday.

A special rule was passed providing that the bill should be voted upon at half past 4 on Friday afternoon. When a bill is read for amendment, the rules and customs of the House require that it be read by paragraphs, and that at the end of any paragraph amendments to that paragraph may be offered.

The first paragraph of the bill was read; many Members offered amendments, and these amendments to the first paragraph were still being discussed when the hour fixed for the vote came. The remaining paragraphs of the bill were not read. This measure was passed under lash and spur. It received no

proper consideration, because there was no time for consideration.

Let me be distinctly understood. It was not the railroad employees that brought this matter to Congress. It was not the railroad employees that demanded of Congress to pass this bill through both Houses by Saturday night. Neither the railroad trainmen nor the railroad managers brought anything to Congress. They were proceeding with their own discussion in their own way when the President of the United States went to them with a proffer of his services in mediating between them. His proposals were not acceptable to the parties to the dispute and the President of the United States brought the matter to Congress, insisting that it be disposed of before the date set for the strike.

The bill which passed was only a part, and a very limited part, of the legislation demanded by the President of the United States. I will quote an extract from the address made by him on Tuesday, August 29, setting forth the whole program of which this bill which passed the House three days later is only a part.

I wish to call your attention also to the fact that while this bill was urged by Members of Congress as an emergency measure intended to avert the threatened strike, it was not so presented to the House by the President. Two days before the bill was introduced and three days before it passed the President said:

> These things I urge upon you not in haste or merely as a means of meeting a present emergency, but as permanent and necessary additions to the law of the land. * * * The time and the occasion only give emphasis to their importance. We need them now and we shall continue to need them.

The whole program, as outlined by the President in his address of August 29, is as follows:

> Having failed to bring the parties to this critical controversy to an accommodation, therefore, I turn to you, deeming it clearly our duty as public servants to leave nothing undone that we can do to safeguard the life and interests of the Nation. In the spirit of such a purpose, I earnestly recommend the following legislation:
>
> First. Immediate provision for the enlargement and administrative reorganization of the Interstate Commerce Commission along the lines embodied in the bill recently passed by the House of Representatives and now awaiting action by the Senate, in order that the commission may be enabled to deal with the many great and various duties now devolving upon it with a promptness and thoroughness which are with its present constitution and means of action practically impossible.
>
> Second. The establishment of an eight-hour day as the legal basis alike of work and of wages in the employment of all railway employees who are actually engaged in the work of operating trains in interstate transportation.
>
> Third. The authorization of the appointment by the President of a small body of men to observe the actual results in experience of the adoption of the eight-hour day in railway transportation alike for the men and for the railroads, its effects in the matter of operating costs in the application of the existing practices and agreements to the new conditions, and in all other practical aspects with the provision that the investigators shall report their conclusions to the Congress at the earliest possible date, but without recommendation as to legislative action, in order that the public may learn from an unprejudiced source just what actual developments have ensued.
>
> Fourth, explicit approval by the Congress of the consideration by the Interstate Commerce Commission of an increase of freight rates to meet such additional expenditures by the railroads as may have been rendered necessary by the adoption of the eight-hour day and which have not been offset by administrative readjustments and economies, should the facts disclosed justify the increase.
>
> Fifth, an amendment of the existing Federal statute which provides for the mediation, conciliation, and arbitration of such controversies as the present by adding to it a provision that in case the methods of accommodation now provided for should fail a full public investigation of the merits of every such dispute shall be instituted and completed before a strike or lockout may lawfully be attempted.
>
> And, sixth, the lodgment in the hands of the Executive of the power, in case of military necessity, to take control of such portions and such rolling stock of the railways of the country as may be required for military use and to operate them for military purposes, with authority to draft into the military service of the United States such train crews and administrative officials as the circumstances require for their safe and efficient use.
>
> This last suggestion I make because we can not in any circumstances suffer the Nation to be hampered in the essential matter of national defense. At the present moment circumstances render this duty particularly obvious. Almost the entire military force of the Nation is stationed upon the Mexican border to guard our territory against hostile raids. It must be supplied, and steadily supplied, with whatever it needs for its maintenance and efficiency. If it should be necessary for purposes of national defense to transfer any portion of it upon short notice to some other part of the country, for reasons now unforeseen, ample means of transportation must be available, and available without delay. The power conferred in this matter should be carefully and explicitly limited to cases of military necessity, but in all such cases it should be clear and ample.
>
> There is one other thing we should do if we are true champions of arbitration. We should make all arbitral awards judgments by record of a court of law in order that their interpretation and enforcement may lie, not with one of the parties to the arbitration but with an impartial and authoritative tribunal.
>
> These things I urge upon you, not in haste or merely as a means of meeting a present emergency, but as permanent and necessary additions to the law of the land, suggested, indeed, by circumstances we had hoped never to see, but imperative as well as just, if such emergencies are to be prevented in the future. I feel that no extended argument is needed to commend them to your favorable consideration. They demonstrate themselves. The time and the occasion only give emphasis to their importance. We need them now and we shall continue to need them.

This program, you will observe, provides, in the first place, for the enlargement of the Interstate Commerce Commission, and in the fourth of the proposed measures for an explicit approval by Congress of an increase of freight rates by authority of the commission in case the higher rate of wages makes that necessary. This leads one to inquire whether there is an understanding that the additional members of the Interstate Commerce Commission would be chosen from among those men who are known to be in favor of the increased freight rates. In other words, one may inquire whether this is a proposal to pack the Interstate Commerce Commission for the purpose of insuring a certain decision.

The bill which passed on Friday was perhaps intended to cover the second and third of the proposals of the President.

The fifth proposal asks for the adoption of a law similar to that known as the Canadian disputes act, which labor organizations in the United States have studied carefully, and to which they are opposed with practical unanimity. This plan makes strikes and lockouts alike unlawful until after a Government investigation of the dispute. One of the chief objections to this plan is that the investigation may sometimes be indefinitely prolonged by obstructive tactics employed by one or the other of the parties to the dispute so that the proposed strike or lockout may be rendered unlawful for an indefinite period of time, and a favorable opportunity may thus be lost.

The sixth proposal asks that the President be given power, in case of military necessity, to take possession of the railroads and draft the train crews and administrative officials into the military service of the United States, the President himself to be, in all probability, the sole judge of the military necessity of the case. This provision would place enormous power in the hands of one man, and if at some future time an accident of politics should place an unscrupulous man in the presidential chair the abuse of this enormous power would work incalculable disaster.

There is also in the program which I have quoted a seventh proposal, you will observe, which the President does not number as he does the first six. It reads as follows:

> There is one other thing we should do if we are the champions of arbitration. We should make all arbitral awards judgments by record of a court of law in order that their interpretation and enforcement may lie not with one of the parties to the arbitration but with an impartial and authoritative tribunal.

Compulsory arbitration with the award of the arbitrators enforced by an authoritative tribunal is a very extreme measure. The arbitrators might make an award which the employers would say would force them into bankruptcy. Nevertheless the award would be enforced by an authoritative tribunal. Or the arbitrators might make an award which the employees would deem unjust. Nevertheless the award would be enforced by an authoritative tribunal. Does that mean that the men would be forced to discontinue their strike and to go to work on the terms fixed by the arbitrators? The Constitution of the United States provides that neither slavery nor involuntary servitude shall exist in the United States except as a punishment for crime. This plan would be dangerously near to involuntary servitude.

The bill that passed last Friday is a part of this program. When the gentleman from Georgia [Mr. ADAMSON], chairman of the committee which reported the bill, was asked when the rest of the program was to be put through, he replied:

> We have been doing some things, but not all things, and in the language of the dying saint I want to assure the gentlemen that "We hope to meet again" in Congress to finish the work.

We have, therefore, the assurance of the President of the United States that this bill was not emergency legislation, but merely a part of the program of "necessary and permanent additions to the law of the land." We have the statement of the chairman of the Committee on Interstate and Foreign Commerce, the gentleman from Georgia [Mr. ADAMSON], that Congress will meet again and finish the work.

The whole program is so radical and so far reaching, so weighted with the possibilities of oppression and of incalculable disaster both to employer and employee, that it ought not to be driven through Congress with this stimulus of lash and spur. The least dangerous parts of it require very careful study and deliberation and some parts of it are so dangerous, so destructive of liberty, that all parts of it, because they are parts of a coherent program, should be looked upon with suspicion. I can not support any part of it if my support is to be construed as an implied promise to support the rest.

## The Eight-Hour Day.

### EXTENSION OF REMARKS
OF
### HON. CARL C. VAN DYKE,
OF MINNESOTA,
IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. VAN DYKE. Mr. Speaker, we are legislating to meet a condition; we are faced by one of the most serious industrial crises in the history of our country. It is a condition which, as the President has told us, has been gradually developing for a year past. One of the railway presidents, a member of the committee of railway managers, represented in the attempted railway settlement, tells us that the country has been seriously threatened with a strike for eight months. The developments of the past 10 days have brought that crisis to a focus.

Let us briefly consider the industrial conditions that have led to the present emergency. Beginning with October last, through the tremendous increase in the country's industrial development, the earnings of American railroads began to show a volume of increase unparalleled. The net earnings by months of the railway companies from October, 1915, to July, 1916, ranged from 40 per cent up to 70 per cent above the net earnings for the corresponding period the year before. Naturally, the trainmen who performed the work and were largely instrumental in producing these earnings expected a pro rata share in the volume of prosperity.

Moreover, the increase in the cost of living, due to the general rise of prices resulting from the European war, appeared to justify increased remuneration, if only on the ground that the income of the workmen and their families should hold its own. The United States Department of Labor reported in May last that the average cost of food in the United States had increased 12½ per cent in the year. If we consult the index figures of such authorities as the Annalist, Bradstreet's, Dun's, and the Wall Street Journal, of recent date, we find that the increased cost of leading food staples has increased, on the average, approximately 25 per cent as compared with 18 months ago.

On the ground, therefore, both of largely increased railroad earnings and of increased cost of living, the railway trainmen of this country were entitled in all equity to a readjustment of their compensation to the existing industrial conditions.

Over eight months ago, as stated by the railway officials, the brotherhoods sought to secure a readjustment from the companies. The latter were opposed to any changes. In June last a committee of trainmen met a committee representing the railroad owners in New York for further consideration of the issues involved. At that meeting the trainmen laid before the companies their conditions of work. They showed that they were required to work 10, 12, and sometimes even 16 to 20 hours a day for the wages they received, and called attention to the fact that there had been no reduction in hours or increase of pay since the boom in earnings which began about a year ago. They showed that although in the past 20 years there had been some increase in pay; that, on the other hand, there had been an absolute decrease in the unit cost of operation to the roads. The cost of labor for moving 1,000 tons of freight 1 mile had dropped from 2.979 cents in 1895 to 2.396 in 1915. On some of the leading roads the decreased labor cost per thousand tons moved reached from 20 to 50 per cent.

On the other hand, since 1900 the tractive power of locomotives has increased 33 per cent, capacity of freight cars 30 per cent, and tons carried by the average freight train 47 per cent. Moreover, railroad revenues per freight train per mile have increased from $1.65 in 1890 to $3.31 in 1914, as shown by the reports of the Interstate Commerce Commission. One crew is now doing the work formerly done by three or four crews 20 years ago.

The companies enlisted the services of the press and held that they could not afford to make any material changes in compensation or hours of day labor. They flatly refused to install the eight-hour day as the basis of compensation. They claimed at that time that the eight-hour day would cost them $100,000,000 per annum.

Thereupon the railway brotherhoods submitted the case to a vote of their members. Indeed, the vote on the eight-hour day was taken not only by the members but by nonmembers of the brotherhoods. The vote of the Brotherhood of Railroad Trainmen showed 98,557 in favor of the eight-hour day and only 3,256 against. The vote of the nonmembers of this union stood 29,481 for and only 1,060 against. In other words, 96.73 per cent were in favor of the eight-hour day. Outside of the four brotherhoods, the telegraphers, machinists, bridgemen, carpenters, and blacksmiths are also organized and in harmony with the proposition to secure the eight-hour day.

When the attitude of the railway men was made public the Federal Board of Mediation and Conciliation attempted to bring the opposing parties together and failed. President Wilson then stepped into the breach to stop a national crisis. As outlined in his message before Congress, he submitted a basis of settlement to the trainmen and to the officials. The men accepted his proposition; the companies refused.

Thereupon the 640 chiefs of the railway brotherhoods ordered a strike, to be effective at 7 a. m. September 4. The President appealed again to both the railway officials and to the brotherhoods. The railway officials refused to make any concession unless it should be coupled with a bargain for an increase of railroad rates. The President could not accept this condition.

The matter was then placed before Congress for final settlement. In conversation with some of the brotherhood chiefs, I suggested a meeting with the labor group in Congress with the view of settlement, if possible, in an amicable manner, the threatened disaster. This meeting was held in the Labor Committee room with the following men in attendance: Messrs. Garretson and Clark, of the Order of Railway Conductors; Stone and Wills, of the Brotherhood of Locomotive Engineers; Lee and Fitzpatrick, of the Brotherhood of Railroad Trainmen; Carter and McNamara; and Congressmen LEWIS, of Maryland, chairman of the Labor Committee; KEATING, of Colorado; BUCHANAN, of Illinois; CASEY, of Pennsylvania; and myself. It was decided there that although neither the brotherhoods nor the American Federation of Labor were asking for legislation on the eight-hour day, still certain bills could, if passed, avert the impending strike. This matter is now before us, and will, if enacted into law, save this country from one of the most horrible experiences made possible by industrial warfare.

It has been charged by those opposed to the passage of this bill that the railway brotherhoods of this country have come here to hold up Congress. Nothing is further from the fact. The 640 railway brotherhood chiefs came to Washington only when summoned by the President of the United States. The trainmen have not appeared before Congress except when summoned by the committees thereof. They have drafted and presented no measure; they have made no demands of any kind whatsoever upon Congress. Summoned to Washington by the President, and summoned to a hearing by the Commerce Committees of the House and Senate, they have presented the case as commanded by the officials of the United States Government. They have recited the facts that after eight months of delay, without redress and without chance of settlement with the officials of the railway companies, they finally, as the last resort, employed the only expedient at their command and ordered a strike.

If there is one party to this threatened industrial war which plainly has attempted to hold up the country, it is the railroad companies, who for over a year past have conducted an active and widespread campaign to compel the Government to grant an increase of rates. Every step in the history of the railway situation during the past eight months indicates from first to last a deliberate design to employ the threat of industrial war as a club to force increase of railroad rates. They have used the space—as admitted by one of the railroad journals—of 17,000 American newspapers, 3,000 dailies and 14,000 weeklies, and paid liberal advertising rates in pushing their propaganda.

As final evidence of their intent and purpose, their last proposition before they adjourned and left Washington was that they would grant the eight-hour day if guaranteed an increase in railroad rates. They have stated, on the other hand, that unless they obtained this rate increase they would rather force upon the country a strike than grant an eight-hour day. If, therefore, Members of the opposition in this body are looking for the party which for months has attempted a hold-up of this country, in order to force compliance with its selfish demands, let them look upon the organization of railroad managers who, in the face of the greatest increase in railroad earnings in this country's history, demand upon top of that an increase in railroad rates.

#### EIGHT-HOUR LEGISLATION.

Members opposed to this bill appear suffering under the delusion that there is something radical and unprecedented in the enactment of an eight-hour law. Certainly they can not be

very careful students of the industrial legislation and conditions of recent years. As a matter of fact, 40 of the 48 States of our Union have adopted eight-hour laws governing various occupations and lines of work. Likewise, the Territories of Alaska, the District of Columbia, Hawaii, the Philippines, and Porto Rico have eight-hour laws with which Members of Congress are supposed to be familiar. Moreover, Congress itself and the executive departments of the Government have installed eight-hour provisions as follows:

1. The eight-hour law extending the operation of the eight-hour day to work done for the Government by contractors and subcontractors, as well as work done by the Government.

2. The law providing an eight-hour day for all female employees in the District of Columbia, a jurisdiction over which Congress has complete power to act. This law is now in actual operation in the city of Washington without any of those grave business disturbances which overfearful persons had been led to expect.

3. The dredge workers' eight-hour law, to remedy a decision of the Supreme Court in regard to men engaged in dredging out rivers and harbors.

4. An eight-hour provision relating to civilians engaged in the manufacture of ordnance and powder production.

5. An eight-hour provision relating to post-office clerks and letter carriers.

6. An eight-hour provision relating to workmen employed under the naval appropriation.

7. A requirement that all coal purchased for the use of the Navy shall be mined in an eight-hour workday.

In nearly every State in the Union, as well as in our island possessions, an eight-hour day governs work on the public roads and also all public construction, whether by the Government or by contract.

In all the mining States of the country an eight-hour law governs the operation of the mines, smelters, and the hoisting machinery for the conveyance of both mining products and workingmen.

In a large number of States train dispatchers may be employed only for an eight-hour day, and in 10 States there is an eight-hour provision governing employment on street railway and electric trains. In the building trades of nearly every State in the Union eight hours, and in some cases less, represent the working day. Where the occupation is at all hazardous or involves human life it has been the custom of State legislators throughout the country to limit the hours and make the eight-hour day standard. It is demanded for the safety of human life. But on the basis of human life involved railway transportation stands far and away in importance above all other lines of industrial activity. American railways carried last year over 1,000,000,000 passengers; railways employ over 2,000,000 men, and they kill over 10,000 men, women, and children and injure about 200,000 per annum. Moreover, it is admitted that one of the most fruitful causes of this loss of life and limb due to accidents is the excessive hours of labor which the men are compelled to work.

The records of the Brotherhood of Locomotive Enginemen and Firemen alone show that they have paid out over $18,000,000 for the deaths and disabilities of their members. Last year the engineers contributed $2,270,000 to the widows and orphans of their killed. The trainmen paid $2,421,000 and the conductors $1,761,000 for the relief of their human wreckage. There is, therefore, on every ground ample justification for the President's declaration that ultimately, "backed by the favorable judgment of society," the railway men of America will secure the eight-hour day.

COST OF THE EIGHT-HOUR DAY.

For six months railway organs have proclaimed that the cost of installing the eight-hour day would be $100,000,000. This seems to have been a favorite figure in the railway propaganda business. When the air-brake law was pending it was likewise predicted that it would cost $100,000,000 to put into effect. When the safety coupler was proposed railway officials opposed it on the ground it would cost them $100,000,000 to install. Again, when electric headlights were demanded railway officials said it would cost them $100,000,000; and so for eight months past, until recently when they reached Washington, the eight-hour day would cost them just $100,000,000. Showing how easily they devise their offhand estimates, they now state that the eight-hour day will cost them just $60,000,000 to install. The railway brotherhoods, on the other hand, produce a detailed estimate showing that even if no change is made in train schedules, the cost of installing the eight-hour day for the men representing the brotherhoods will be only $27,000,000; whereas, if the companies will consent to a freight-train schedule of 12½ miles per hour instead of the present 10 miles per hour, there need be no additional cost to the companies in applying the eight-hour basis to the pay of the trainmen.

If there is any body of men in this country who are experienced and practical judges of train working and train costs of operation, it is the skilled men who compose the railroad brotherhoods. They state unequivocally that the railroad companies can just as well operate on the basis of a 100-mile freight day of 8 hours as on the 100-mile day of 10 hours, as at present. Furthermore, they point out that not only will the men benefit by saving two hours of labor per day, but that the shippers will be large gainers by more rapid shipment of the country's freight, and that the companies themselves will benefit through the more prompt handling of freight and through the greater skill and efficiency of the crews.

The charge made by nearly every Member of this House opposed to the pending bill that an eight-hour day automatically increases the pay of the trainmen 25 per cent is therefore purely gratuitous and utterly without foundation. In fact, no one knows what the difference in cost to the companies will be until the eight-hour day has been installed and can be carefully tested by experience. The history of the hours and the wages of labor in this and other countries demonstrates that as a rule reduction of hours and even increase of pay have not been followed by an increase in the unit cost of operation and production. This shows plainly in the railway history of this country. It is claimed by the roads that there has been a 30 per cent increase in the average pay of the men since 1890. But, as we have seen, the railroad revenues per freight train per mile have increased from $1.65 in 1890 to $3.31 in 1914, an increase of 100 per cent. Therefore there has been a decrease in the labor cost of operation to the companies along with the increase in pay and decrease in hours. The cost of engineer's service per 1,000 ton-miles since 1890 has been reduced from 65 cents to 35 cents. As Vice President Parks, of the Illinois Central, testifies, "The locomotive engineer is now hauling nearly 400 net tons per locomotive as against 200 tons 10 years ago, an increase of 100 per cent in efficiency."

In another industry we have a most notable example, in the case of the Ford automobile works. Since Mr. Ford declared $5 a day as the minimum wage in his factories his annual production has more than doubled and his earnings for the fiscal year just closed are reported at $59,000,000, one of the greatest miracles of modern industry. Personally, I believe that the installation of the eight-hour day in railway transportation in this country will do more for efficiency and economy and more for volume of business and of earnings than any other invention which has been installed by American railways.

WHO WILL PAY THE COST?

For the sake of argument, however, assume that to install the eight-hour day would cost the full $60,000,000 estimated by the railway officials. Members on the other side of this House say this is the amount which the public must pay. It is even held that the passage of this bill automatically and logically compels the American public to pay $60,000,000 in increased railroad rates. Let me at this point call the attention of those who are anxious for such a tax upon the people to be laid, that they have overlooked a certain large and important fact.

For the year ending June 30, 1916, as reported by the Interstate Commerce Commission, 155 railroads, or less than one-third of the total, reported net earnings, after deducting all operating expenses, amounting to $1,019,632,711.

For the preceding fiscal year ending June 30, 1915, the net earnings were $741,369,887.

The net gain of these 155 roads in net earnings for the fiscal year just closed, therefore, is $278,262,824. The increase is 37.5 per cent.

If, therefore, the railroad companies find that the eight-hour day is to cost them $60,000,000, or less than 25 per cent of the net earnings of these 155 roads, what logic is there in the assumption of Members on the other side of this House that railroad rates must be increased in order to install the eight-hour day?

The current issue of the well-known New York financial magazine, the Annalist, states that the 90 principal roads for the first half of 1916 show an increase of 45.2 per cent in their net earnings as compared with the year before. These 90 roads, less than one-fourth of the total, show a net-earnings gain of $122,000,000 for the six months' period.

The New York Commercial and Financial Chronicle shows that the gross earnings of 492 railroads for the first half of 1916 are larger than for the first half of the year before by $324,000,000. For a full year of 12 months the increase of 1916 over 1915 would undoubtedly exceed $600,000,000, or ten times the amount which even the railroad companies claim it will cost them to install the eight-hour day.

Why, then, should this Congress or the American people entertain a particle of fear that this bill will be a tax upon the public by forcing an increase of rates? Moreover, no such increase can be made except by the consent of the Government and of Congress, and, as we have seen by the reports of the railway companies as made to the Interstate Commerce Commission, no such increase is likely to be seriously considered either by Congress or the American people. The railroad companies are playing a desperate game for delay; they realize only too well that the demands of justice and of humanity are with the men. They know that it is only a matter of time that they must grant the eight-hour day. But Congress can not humor their selfish designs. The time to do justice is now, when the emergency of the Nation, as the requirements of humanity, demand this bill establishing the eight-hour day.

## Gandy Makes Report of His Work.

## EXTENSION OF REMARKS

OF

## HON. HARRY L. GANDY,

OF SOUTH DAKOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. GANDY. Mr. Speaker, it is fitting, indeed, as this session of Congress is drawing to a close that a Representative should review legislation and departmental affairs affecting the district he has the honor to represent. I therefore take this opportunity, under leave regularly granted me by the House, to call attention to many matters in which western South Dakota folks are interested.

RURAL CREDITS.

The present Congress placed on the statute books the first Federal farm-loan law this Nation ever had. While the bill was under consideration it received the praise of Members of Congress without regard to party affiliation, and out of 435 Members but 10 votes were cast against it. Under this law 12 farm-loan banks will be established, and the Federal Farm Loan Board is at this time engaged in conducting hearings at various places in the country to determine the proper locations for these loan banks.

Short-time loans and high rates of interest have seriously crippled the agricultural interests of this Nation and prevented the proper development thereof. I am confident that long-time loans with low rates of interest and the opportunity for payment on the amortization plan will be of great benefit to the country generally and western South Dakota in particular.

GOOD ROADS.

The good-roads bill enacted by Congress and approved by the President provides for the cooperative assistance of the Federal Government in the construction and maintenance of roads over which the mails are carried and an appropriation of $75,000,000 for five years' work—$5,000,000 the first year, $10,000,000 the second, $15,000,000 the third, $20,000,000 the fourth, and $25,000,000 the fifth year. The money appropriated will be apportioned among the States according to three factors: One-third in the ratio which the area of the State bears to the total area of all the States, one-third according to population, and one-third according to the mileage of rural delivery and star routes. South Dakota has of the total 2.58 per cent of the area, 0.638 per cent of the population, and 1.807 per cent of the rural and star routes. By consolidating those three factors we find that our State will be entitled to 1.675 per cent of the money appropriated. This will give us $83,750 the first year, $167,500 the second, $251,250 the third, $335,000 the fourth, and $418,750 the fifth, or a total of $1,256,250.

The bill also provides for an appropriation of $1,000,000 a year for 10 years for the construction of roads in forest reserves. This is entirely proper, for in these forest reserves the Government owns practically all of the land and the timber, and because of the Government ownership neither the land nor the timber is taxable. While a million dollars a year looks like a big sum of money, yet when it is realized that we have 151,281,066 acres in forest reserves that sum, in addition to the money which the States now receive from the sale of timber, seems small enough to start new highway work with. South Dakota has 1,129,208 acres of forest reserves, or 0.0072 per cent of the total area of the Nation. It has been decided by the honorable Secretary of Agriculture to apportion the million dollars each year on a combined basis of area and valuation of the forests, and on that reckoning there will be expended in the forest reserves in South Dakota each year for 10 years the sum of $8,115, or a total of $81,150.

WORKMEN'S COMPENSATION ACT.

There are pending in this Congress two bills which I introduced to pay damages to Government employees in western South Dakota who were injured while at work. States have made provision for proper compensation in the case of private employment, but very little provision had been made for employees of the Government. Some few lines of work were provided for in a compensation act, but this Congress passed a bill making provision for all of the employees of the Government. Thus, if one of the employees in the Indian Service, or the Reclamation Service, or the Forestry Service, or the public land service, or any one of the many other lines of Government work in western South Dakota, should suffer injury while engaged in line of duty, it will not again be necessary to introduce a special bill to pay a reasonable sum of damages for the injury.

THE CHAMBERLAIN-OACOMA BRIDGE.

On April 28, 1916, there was approved the law compelling the Chicago, Milwaukee & St. Paul Railway Co. to build a permanent bridge across the Missouri River between Chamberlain and Oacoma, S. Dak. Two years from that date are given for the railroad company to commence work and the structure must be completed within four years.

The necessity for action of this sort has been apparent for many years, for at best the pile and pontoon bridge constructed by the Milwaukee road when the extension of its line west of the Missouri River was undertaken is but a makeshift and many times each year the flood waters of the Missouri or drifting ice put it out of commission. In 1915 for a total of 35 days not a train crossed the bridge, and the record for 1916 is even worse than that. Constant agitation in South Dakota, protests by commercial clubs, action by the State board of railroad commissioners and resolutions by the State legislature availed nothing. It occurred to me that inasmuch as Congress alone has the power to grant permission to build a bridge across a navigable stream, Congress would have the power to remedy a situation which without question has retarded the development of the towns and of the country along the Milwaukee road between the Missouri River and Rapid City.

On January 24, 1916, I introduced House bill 8909 to repeal the act which permitted the building of the pontoon and pile bridge now in use and to grant permission for the building of a permanent bridge. That bill has become a law and, Mr. Speaker, undoubtedly before this time next year the construction of the bridge provided for will have been commenced. When that bridge will have been built a hope of years will have been realized and a long step will have been taken for the settlement, growth, and development of a large portion of western South Dakota that depends upon this line for railroad transportation.

LIVE STOCK DEMONSTRATION WORK.

Two Federal experimental farms are conducted in western South Dakota by the Department of Agriculture, the one at Newell, on the Bellefourche irrigation project, being an irrigated farm, and the one at Ardmore, in Fall River County, being a dry-land station. The Department of Agriculture has several other experimental farms in what is known as the semiarid region of the West, and every one of those farms has been operated solely on the theory of production. Practical experience in the West has taught us that to make farming successful we must not only have worked out the theory of production, but must also put into practical operation the theory of utilization of the crops and feeds that are raised. Outside of the horses that are kept for work, there is no live stock on these farms. Some years ago the Secretary of Agriculture became convinced that the equipment of these farms with live stock would do two things: First, the increase of the stock and the dairy products would tend to reduce the operating expenses; and, second, a careful, watchful feeding of the stock and notation of the results would furnish us with definite information as to the relative feeding values of the forage feeds that we are able to raise on the high prairies of the West.

Twice the Secretary of Agriculture included in his estimates an item of $87,500 "to conduct investigations and experiments in problems connected with the establishment of dairy and meat production enterprises on the semiarid and irrigated lands of the western United States, including the purchase of live stock and the erection of barns and other necessary buildings and the employment of necessary persons," but neither last year nor this year did the Committee on Agriculture include that item in the Agricultural appropriation bill as re-

ported to the House. During the consideration of that appropriation bill, on April 29, 1916, I offered an amendment to appropriate $40,000 for the work which I have just mentioned. After considerable opposition, as reference to the CONGRESSIONAL RECORD will disclose, that amendment was agreed to and was included in the bill as it was finally passed and approved by the President. I have every reason to believe that although the amount of money appropriated is not as great as was desired by the Agricultural Department, the Federal farms at Ardmore and Newell will be equipped with live stock during the present fiscal year.

FOREST RESERVE HOMESTEADS.

When the general forest-reserve homestead act was passed on January 11, 1906, one exception was made in the Nation, and that exception provided that agricultural lands within the forest reserve in Lawrence and Pennington Counties, S. Dak., could only be homesteaded by persons who occupied the lands prior to January 1, 1906. That exception practically closed a large number of agricultural tracts in the forests in those two counties. In 1907 and in 1912 acts of Congress were passed exempting certain townships from the provisions of that restriction, and on February 2, 1916, I introduced House bill 10668, repealing the restriction entirely. That bill passed Congress and was approved by the President on July 3, 1916, and under its provisions several hundred people will be enabled to obtain homes on agricultural tracts in the forests in those two counties.

MISSOURI RIVER POWER SITES.

Always watchful for an opportunity to advance the interests of South Dakota, I sought and obtained an appointment for an interview with the President in order to call to his attention the possibilities for power development on the Missouri River in connection with the location of the Government nitrate plant. After securing this appointment I invited the other Members of the South Dakota delegation in Congress to accompany me to the White House. That the President was interested in what we had to offer was apparent from the fact that he requested permission to keep the blue prints, profiles, and data which I had with relation to power possibilities at what are known as the Little Bend and the Big Bend sites. Since that time I have forwarded to the Board of Army Engineers of the War Department blue prints and information relative to power possibilities in the vicinity of Mobridge. I have received personal assurance, both from the President and from the Secretary of War, that South Dakota power sites will receive serious consideration and investigation before the location for the Government nitrate plant is decided.

The experts who testified before the committees of Congress with relation to the nitrate plant stated that for the most economical operation 30,000 horsepower of electrical energy should be provided, and it is indeed interesting to note that the report of the engineering firm of Church, Westinghouse, Kerr & Co., made after a survey and reconnoissance in 1911, places the minimum horsepower development at the Little Bend site, which is located about 50 miles north and west of Pierre, at 41,000 horsepower, based on the lowest flow of water that we have any record of in the Missouri River. The mean annual horsepower was placed at 120,000 and the maximum at considerable in excess of 200,000. Power sites undeveloped of that size are few and far between in the United States. The sites in South Dakota have the advantage of being far inland, where in time of war there would be no possibility of the plant falling into the hands of an invading enemy and thus cutting off the supply of nitrate for explosives; the distance is not great to the central farming States where fertilizer is needed, the Missouri River is navigable both above and below any of the power sites, and a plant could be so constructed that during the flood-water season of June, July, and August the surplus power could be utilized for irrigation purposes. I have every assurance that the location of the nitrate plant will be decided by a board of competent engineers, solely on the relative merits of the various sites put forth, and on the merits of the power sites on the Missouri River in South Dakota I am content to rest our case.

The building of a Government nitrate plant is a part of a general plan to have the Government manufacture a sufficient amount of its munitions of war to control prices, so that great corporations dealing in war supplies can not make undue profits out of the effort that is being made at present to place this Nation on a basis of reasonable preparedness. Early in this session of Congress, under the rules of the Democratic caucus, 53 Members of the House signed a caucus call and thus forced consideration of the issue of Government manufacture of munitions. At that caucus a resolution was adopted instructing the majority members of the Rules Committee to bring in a special rule making in order amendments to the appropriation bills having for their purpose the Government manufacture of munitions. I was one of the 53 who signed that call, and as a result of the caucus held a long step has been taken in providing for the increase of the manufacturing facilities of the Government. Provisions have been made for the nitrate plant, an armor-plate plant, and the increasing of the manufacturing capacity of Government arsenals and gun factories.

SECTION-GRAZING HOMESTEADS.

At the time the section-grazing homestead bill was under consideration in the House I offered an amendment to provide for a noncontiguous additional homestead under that act and called attention to the fact that persons who have made homestead entries for land of the kind proposed to be disposed of thereunder are entitled to such an amount of similar land as, when added to the land embraced in their former entries, will not exceed 640 acres, whether the additional adjoins the original or not. My amendment was amended by adding a proviso limiting the right of noncontiguous additional entries to 20 miles from the original entry and, with that addition, was agreed to. The section bill passed the House in January and the Senate on the last night of the session. It did not pass the Senate in time to have the Senate amendments agreed to by the House before adjournment, so final action will not be had until the December session.

NONCONTIGUOUS ADDITIONAL HOMESTEADS.

Under the half-section homestead bill, additional entries were limited to contiguous lands, and thus many persons, because of the fact that no vacant land adjoined their original entries, were deprived of the benefits of that act. The Public Lands Committee of the House, of which I am a member, reported favorably a bill introduced by Congressman TIMBERLAKE, of Colorado, providing for a noncontiguous additional entry under the enlarged act, but requiring full compliance with the homestead laws on the additional. That bill followed closely the recommendations of the Interior Department, and inasmuch as residence was required on the additional, it was limited to those who had offered proof on their original entries. Interior Department officials have all along opposed a noncontiguous additional with credit for residence on the original, and permitting a homesteader to have two noncontiguous unpatented entries at the same time. Inasmuch as the condition of the House Calendar made it necessary to pass this bill by unanimous consent it was thought best by western Members not to attempt to amend it there. The bill was amended in the Senate by adding a proviso excusing claimants from residence on the noncontiguous additional where the additional is within 20 miles of the original, and thus the bill was returned to the House. In order to keep down objections in the House, where the Senate amendment had to be agreed to by unanimous consent, there was added a limitation that the residence requirement would be excused only where the claimant is residing on his former entry.

Inasmuch as the bill had now been changed to provide for a noncontiguous additional with credit for residence on the original, the restriction of the benefits of the bill to those who have made proof on their original entries should have been waived, but after a conference of western Members it was felt that it would be unwise to attempt to amend the bill again for fear of losing it entirely. One objection would have been sufficient to have stopped its consideration at any stage of the unanimous-consent proceedings. It was thought that the benefits which would be received under the bill were too great to run the risk of losing it by again subjecting it to unanimous consent. While those who have not made proof are not provided for in this bill, yet they have the opportunity to make proof on their original entries and then take advantage of the new law. Fully appreciating the benefits that settlers in western South Dakota will derive from this noncontiguous homestead bill, I am indeed pleased that I had an opportunity both in the Public Lands Committee and in the conferences which were held concerning it to assist in its passage.

PROPOSED ANGOSTURA IRRIGATION PROJECT.

Two things have barred the way to the starting of any new reclamation projects at this time: First, the reclamation fund is already considerably short of having money sufficient to complete projects heretofore started; and, second, the demand for funds for preparedness and other national propositions has been so great that western Members of Congress have been unable to secure any further advances to the reclamation fund.

When the general reclamation act was passed on June 17, 1902, section 9 provided that the major portion of the funds arising from the sale of public lands within each State should be expended for reclamation in the State where the money originated. It was provided that the Secretary of the In-

terior might temporarily use funds from one State in another State, but that the expenditures should be equalized according to the money paid in each 10-year period. If that law still existed it would be apparent that South Dakota has not received her share of the reclamation funds, for the Belle Fourche project cost something over $3,000,000, and between eight and nine millions have been turned into the reclamation fund by the sale of public lands in the State. Section 6 of the act approved June 25, 1910, repealed section 9 above referred to, and there is now no requirement, limitation, or restriction with relation to any particular State, so far as the reclamation fund is concerned.

In the general appropriation bill providing for the Reclamation Service there is an item of $50,000 for the survey of new projects on a cooperative basis. In 1913 and 1914 the State of South Dakota, through its State engineer, spent quite a sum of money in surveying reclamation propositions in the Cheyenne River watershed and in making a report on the proposed Angostura project. I personally appeared before the Secretary of the Interior and the Reclamation Commission in an endeavor to have the expenditures heretofore made by South Dakota accepted as the State's cooperative share and thus permit the Reclamation Commission to go ahead with a complete investigation as to the merits of the Angostura project. Up to this time no decision has been reached on the question. Judge Will R. King, chief counsel for the Reclamation Service and member of the Reclamation Commission, is now in the West visiting various reclamation projects, and I am in hopes that in the near future he will visit the Belle Fourche irrigation project and also the proposed Angostura project.

An investigation of this project by the Federal Reclamation Service is very much to be desired, for unless a governmental report on the practicability and approximate cost of this project is available, we would stand no chance of having it included among the new projects to be constructed when a further advance of money to the reclamation fund is authorized.

LEAVE OF ABSENCE FOR NATIONAL GUARDSMEN.

After the National Guard had been called out for patrol duty on the Mexican border attention was called to the fact that there was no provision of law whereby homesteaders who were members of the guard would be relieved of residence requirements during the period of their service. All the law on the subject contemplated service by a homesteader in time of war, whereas in the present situation the guardsmen were called away from their homes, although a state of war did not then and does not now exist. Many bills were introduced on the subject by the various Members of Congress, and after due consideration I was authorized by the Public Lands Committee to report one of the bills. I later called the bill up for consideration in the House, where it was passed without objection. It has since passed the Senate and received the approval of the President.

TOWN SITE OF NEWELL.

The Government town site at Newell, on the Belle Fourche irrigation project, consisted of 640 acres of land, of which 40 acres were withdrawn for administrative purposes. Prior to the town lot sale in 1909, certain advertising literature was put out, wherein it was stated that out of the proceeds of the sale the Government would construct public improvements on the town site, such as water and sewerage systems, and so forth. At the time that statement was made there were pending in Congress certain bills under which public improvements could have been made on Government town sites, but that legislation failed to pass and not a dollar of money received from the sale of lots was ever expended at Newell. Twice in previous Congresses efforts were made to in a measure make good the word of officials of the Reclamation Service with reference to this town site, but those efforts failed.

After consultation with citizens of Newell and, realizing that it is perhaps impossible to secure any return of the money which has already been paid into the United States Treasury for lots at Newell, I introduced House bill 12889 authorizing the Secretary of the Interior to convey to the municipal authorities of the town site of Newell the unsold and unreserved portion of the town site and provide regulations under which the said authorities should sell the land and with the proceeds construct municipal improvements. The bill was referred to the Committee on Public Lands, and by that committee I was authorized to report it favorably, with an amendment instructing the Secretary of the Interior to sell the land and apply the proceeds to the construction of public improvements. The bill was amended on the floor of the House to provide that of the proceeds of the land sale not to exceed $15,000 should be used for public improvements, and as so amended it passed and received the approval of the President. Undoubtedly, under the representations that were made prior to the first lot sale the town of Newell is entitled to a greater return than $15,000, for the Government has already received approximately $60,000 from the sale of lots. However, a certainty is better than an uncertainty and under this bill Newell will receive the benefit of $15,000 from the sale of approximately 500 acres and thereafter will receive material benefit by this land having passed into private ownership and thus have been placed upon the tax list.

LEMMON RESERVOIR SITE.

The city of Lemmon, S. Dak., some years ago constructed a reservoir on 80 acres of land embraced in a homestead entry a few miles north of that city, across the line in North Dakota. It was thought that when the homesteader obtained title to the land the city would purchase it from him, but the homesteader never did perfect his title, so it turned out that the city had approximately $20,000 worth of improvements on Government land, with no law under which it could acquire title thereto.

A bill was introduced in and passed by the Senate under which, upon payment of $1.25 per acre, a revocable title was to be given to the city of Lemmon. Information reached me from the municipal authorities that the city desired to obtain a fee title to this land, so when the bill reached the Public Lands Committee of the House I secured an amendment to it providing for the appraisal of the land, exclusive of improvements, on the same basis that isolated tract land is appraised, and for the absolute sale to the city of Lemmon upon payment of the appraised price. As so amended the bill passed the House, the Senate concurred in the amendment, and the President signed it.

DEADWOOD ASSAY OFFICE.

For some time there has been a tendency in Congress to build up the big assay offices of the Nation at the expense of the smaller ones. In fact, an effort has been made to discontinue a number of the smaller offices. Notwithstanding the fact that the assay office at Deadwood ranks well in comparison with other offices in the West, it has been crippled by an expense allowance so small as to make it impossible to handle there the bullion which is mined in the Black Hills. But $500 was allowed last year for the contingent expenses of this office, and with chemicals, fluxing materials, crucibles, and so forth, rising in price the office was seriously handicapped. I made certain that provision for this office was made in the House in the appropriation bill and then personally went before the Appropriations Committee of the Senate in an effort to have the contingent-expense item raised. That effort was successful, and while the increase is not large, yet instead of $500 for contingent expenses the Deadwood assay office this year has $1,500, which will enable it to handle the Black Hills bullion, which of right ought to be credited to that office.

THE YELLOWSTONE TRAIL.

Indian lands in eastern Corson County were a stumblingblock to the Yellowstone Trail Association, which has worked hard for a good road from the east to the Yellowstone National Park and the coast. A year or two ago an offer was made to the honorable Secretary of the Interior to the effect that if one-third of the cost of the highway across these Indian lands would be paid for out of Indian funds the county of Corson and the trail association would jointly provide for the other two-thirds of the construction. On that basis Secretary Lane recommended an appropriation in the last Congress, but it failed. During the hearings on the Indian appropriation bill before the Indian Committee of the House, of which I am a member, an amendment was offered to the bill appropriating $5,000 for the work. At that time I assisted in securing the adoption of the amendment by the committee, and later assisted in securing its retention in the bill on the floor of the House. Under that appropriation work has already been commenced under the supervision of the superintendent of the Standing Rock Reservation. The completed highway will not only be a benefit to tourists and to white settlers of Corson County, but also to the Indians, for it will assist in providing a good road east and west across this big county, which is peopled by both Indians and whites.

DEPOSITING OF INDIAN FUNDS.

Of Indian funds there are two classes—individual Indian money and tribal Indian money. The Indians of the several reservations in western South Dakota have many hundreds of thousands of dollars of individual Indian funds, and by law that money is deposited in banks, the Indians receiving the interest which the bank pays thereon. When I became a Member of Congress I found quite a large percentage of the individual Indian funds on deposit outside the district. Believing that the depositing of this money in local banks in and adjacent to the reservation counties would assist in the development of

what we term the Indian country, I have persistently insisted, both before reservation officials and officials in the Indian Office here, that local banks be given the preference. In this effort I have in a measure been successful, and more than a score of banks in western South Dakota have been designated as depositories for individual Indian funds since my term began. These banks and others which had been designated before have on deposit approximately the maximum permitted by the Indian Office regulations. Local banks have been disposed to offer a higher rate of interest for these funds than big banks in other States, and thus the Indians have been benefited and are receiving larger returns on their funds.

Tribal Indian money is kept in the Treasury of the United States, and the Indians of South Dakota have nearly $6,000,000 here in Washington. On February 12, 1916, I introduced House bill 11419, empowering the Secretary of the Interior to withdraw tribal funds from the Treasury of the United States and make deposits in banks in the States in which the Indians reside. I have been unable as yet to secure action on that bill, but I shall continue to press it in the hope of securing its passage. The depositing of nearly $6,000,000 in the banks of South Dakota would work wonders in the development of the State, and at the same time, for the most part, the banks would be willing to pay more interest than the Government pays the Indians. Thus the Indians and the people of the State would both be benefited and the Federal Government would be relieved of the payment of interest on this sum.

BLACK HILLS CLAIM.

For many years the Sioux Indians have pressed their claim that they were not dealt with fairly in the matter of the cession of the Black Hills from their reservation by the agreement of September 26, 1876, which was ratified by Congress on February 28, 1877. The Fort Laramie treaty of April 29, 1868, restricted the Sioux Indians to South Dakota west of the Missouri River and the existing reservations on the east bank of the river, the Crow Creek, and the Yankton. That treaty was formally ratified by the Senate of the United States on February 16, 1869, and was proclaimed by the President on February 24, 1869. It guaranteed the inviolability of the restricted Sioux Indian Reservations against all encroachments by whites.

The story of the discovery of gold in the Black Hills and the subsequent rush of prospectors, together with the trouble with the Indians, although 40 years ago, is well known to South Dakota folks.

Notwithstanding the fact that the treaty of 1868 pledged the Government of the United States to the care and support of the Indians and the inviolability of their reservations, in view of the cession of territory which the Government then received, on August 15, 1876, a provision was written into the Indian appropriation bill by Congress saying that thereafter no appropriations should be made for the subsistence of the said Indians unless they should first agree to relinquish the Black Hills country. That threat had the desired effect, and on September 26, 1876, the Indians ceded to the Government 8,317,440 acres of land, included in which were the Black Hills. The Indians insist that in that agreement the Government did not pay them any consideration and did not undertake to do anything for them which it had not already pledged itself to do in the treaty of 1868. Thus they say that they practically gave away the Black Hills country.

The claims of many tribes of Indians against the Government have been tried before and adjudicated by the United States Court of Claims in Washington, and on February 3, 1916, I introduced House bill 10774 to permit the Sioux Indians to bring suit on their claim before the Court of Claims and thus secure a final determination of the matter. The bill was referred to a subcommittee of the Indian Committee, and after extended consideration was reported to the whole committee and a favorable report made to the House on June 23, 1916. The press of important national legislation and some objections in the House have prevented me from securing consideration of the bill. It now appears probable that no action will be had thereon before the December session, but inasmuch as it is well up on the calendar the House will undoubtedly dispose of it during the month of December before the consideration of annual appropriation bills begins, and I am very hopeful for its passage.

NEW SCHOOL BUILDING, RAPID CITY INDIAN SCHOOL.

The Rapid City Indian School has outgrown its present school building and the necessity for providing a new building has been apparent for some time. I secured the adoption by the Indian Committee of an amendment to the Indian appropriation bill authorizing the construction of a new school building to cost not exceeding $30,000, and that item remained in the bill as it was finally approved. It is my thought that when the new school building is completed the building now used for school purposes can be remodeled into a kitchen and dining room and the space now used for kitchen and dining room in the boys' dormitory can be given over to dormitory purposes and thus the capacity of the school will be materially increased.

TUITION OF INDIAN CHILDREN IN PUBLIC SCHOOLS.

Heretofore the Indian appropriation bill has carried an item of $20,000 for the payment of tuition in public schools for children whose parents are wards of the Government and nontaxpayers. That item was so small that when spread over the West no practical benefit was received from it. The Indian Committee, of which I am a member, put in the Indian appropriation bill which was finally passed a few weeks ago an item of $200,000 for tuition purposes. After a conference with Indian Office officials I wrote the county superintendent of each of the Indian reservation counties in western South Dakota that the department is now prepared and willing to pay the tuition of Indian children in public schools, where public schools are available. This will help the school districts, it will help the children, it will save money for the Government, and will help solve the school problem among the Sioux.

The Sioux school item in the Indian appropriation bill has been a "touchy" subject for some years on account of the fact that three mission schools are operated on Sioux reservations, the cost thereof being borne by the pro rata shares of the Indians whose children attend these schools. Including the capacity of those three mission schools the Government is still away short of having provided adequate school facilities for the Sioux children, notwithstanding the fact that by treaties and agreements it guaranteed adequate school facilities for all. Some people wanted to arbitrarily close the mission schools, without any regard for the lack of other school facilities for the children now enrolled there, while others wanted to have the Government immediately build school plants sufficient to take care of the children. My idea is that if the tuition is promptly paid quite a large number of these children can and will be taken care of in public schools. I assisted in securing before the conferees of the House and the Senate on the Indian appropriation bill a provision which was later adopted by both Houses, providing for a complete investigation and report on schools, school conditions, and the cost on various Sioux Indian reservations. That report must be made by the first Monday in January next, so that Congress next winter for the first time will have full and complete information available and can thus intelligently act on the Sioux school problem.

INDIAN FUNDS MUST BE APPROPRIATED.

In acquainting myself with governmental affairs in western South Dakota, both prior to and after my election to Congress, I was surprised to learn that heretofore the Indian Office had the right to expend the tribal funds of the Indians without the consent either of the Indians or of Congress. The Federal Government stands in the position of guardian to the Indians, and knowing that the money of the Federal Government can not be expended without appropriation by Congress, it occurred to me as passing strange that the money of the ward was not held as sacred as that of the guardian. On January 17, 1916, I introduced House joint resolution 105, providing that hereafter the funds of Indians should not be expended except upon appropriation by Congress. The idea embodied in that resolution was made a part of the Indian appropriation bill, and provision was made that except for per capita payments to the Indians themselves and money expended for educational purposes, no funds of the Indians shall hereafter be expended without Congress shall have first passed upon the appropriation.

MAIL SERVICE IMPROVED.

I have found time to work with the citizens of western South Dakota for various improvements in the mail service.

During my term of office new rural delivery routes have been secured for Bonesteel, Lucas, Buffalo Gap, Hot Springs, Rapid City, Nemo, Whitewood, Vale, Newell, and Timber Lake.

A new star route has been installed between Lead, S. Dak., and Buckhorn, Wyo., which not only furnishes Lead and Deadwood with direct mail communication with a large territory in Wyoming, but supplies mail to nearly 100 families en route. Several other star routes have been established, among which may be mentioned Cody to Wood, Bison to Strool, and Graham to Vetal. Bids are being considered for a star route between Hamill and Reliance, and if that route is established not only will the two post offices be benefited by the new service, but about 80 families will be supplied with mail en route.

An order has recently been signed by the Fourth Assistant Postmaster General for free delivery of mail in the city of Winner, and the new service there will become effective October 1, 1916.

MISCELLANEOUS.

The bill to provide for the pensioning of veterans of Indian wars, which passed the House a few months ago and is now pending in the Senate, provided that no pension should be paid unless the term of service was at least 90 days. The last Indian trouble in South Dakota occurred late in 1890 and early in 1891, but was not of 90 days' duration. In order that those who participated in this campaign might not be deprived of a pension, if pensions for Indian campaigns are to be paid by the Government, I secured in the House an amendment providing that the restriction as to 90 days should not apply where the term of active service was for the full period of the campaign, even if the campaign was not of 90 days' duration.

From the Public Lands Committee I reported a bill to renew the lease to the Phillips estate to certain public lands which are inclosed in the buffalo pasture near Fort Pierre. That bill passed the House and doubtless will pass the Senate before the close of the Sixty-fourth Congress.

In the legislative, judicial, and executive appropriation bill no provision was made for the office of the surveyor general of South Dakota, and if that bill had passed as it came to the House that office would have been closed. We still have some unsurveyed public lands in South Dakota, and in addition thereto mineral claims and forest-reserve homesteads are by metes and bounds surveys, which makes it necessary to continue the office of surveyor general for some time. I assisted in amending that appropriation bill to make provision for the South Dakota surveyor general's office on the same basis as last year.

I have not forgotten the veterans of the Nation's service, and I am pleased to report that several private pension bills introduced by me have been finally passed, and there is every prospect that more will be at the December session. I voted for the bills pensioning widows and orphans of veterans of the War with Spain and also for the bill raising to $20 per month the maximum amount of pension for widows of Civil War veterans, which is now $12 per month, which latter bill became a law.

IN CONCLUSION.

Mr. Speaker, in conclusion, it seems to me that I may be permitted to say with pardonable pride that the record of accomplishment speaks for itself. I have faithfully attended the sessions of Congress and carefully taken care of the departmental business of western South Dakota folks. Indian affairs, public lands, reclamation, forest reserve, and numerous other governmental propositions make the departmental as well as the legislative work heavy. The record is an open one, and it is submitted in order to more fully acquaint my constituents with the work of their Representative in Congress.

---

## The Eight-Hour Law.

## EXTENSION OF REMARKS

OF

# HON. JOHN M. EVANS,

OF MONTANA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. EVANS. Mr. Speaker, on Friday last this House passed House bill 17700. At that time I was anxious to submit a few remarks on the same, but, owing to the great emergency then existing, many Members of this House were willing to forego the opportunity to express their views, that the bill might become a law before the time set for a strike and thus avert a national calamity, a calamity probably fraught with more disaster to the American people than any that has befallen this country in the last quarter of a century. Three days after the passage and approval of that bill the House has graciously permitted me to express my views. I approved that bill and voted for it; and while I felt at the time the measure should have had more consideration and deliberation, I recognized the great emergency confronting the Congress and the people, and therefore willingly gave my vote for the measure.

That act has now been a law for three days, and we are now getting the opinion of the country on our work, and my observation leads me to believe our action will meet with the approval of the people. I regret, Mr. Speaker, to find a number of men in this House, taking their cue from the candidate of the Republican Party, now criticizing the measure. Yet the record shows a number of the gentlemen voted for the bill. I am not ashamed of my vote; I am proud of it, and my vote aided in averting a great national disaster.

We are advised, Mr. Speaker, that this legislation is to be made the principal issue in the coming campaign. If so, the Democratic Party welcomes the issue. The whole spirit of the times recognizes the justice of shorter hours for labor. Half of the Republican membership of the House voted for it. Every man on the other side of the House with Progressive tendencies voted for it, only the standpatters and leaders and bosses voted against it. It is true, I am sorry to say, that when the measure was voted on in the Senate every Republican, with one notable exception, aligned himself with the bosses of the House and voted against the measure. The one exception was the Senator from Wisconsin [Mr. LA FOLLETTE], and he voted for practically every Democratic measure that has passed that body during the present administration, and the people of his State have just shown their approval of his course by overwhelmingly renominating him.

Mr. Speaker, the question of an eight-hour day is no longer a debatable question. Society everywhere recognizes and approves the justice of it. It was not the real question at issue in the legislation passed. The real overshadowing question was, Should steps be taken to prevent a strike and avert a great calamity? The Democratic Party took the position that the strike should be averted. The Republican Party, in the language of some of its eminent leaders, wanted action. "Action" meant loss, suffering, bloodshed, if not civil war. The Democratic administration believed that an ounce of prevention was worth a pound of cure, and undertook to prevent rather than cure.

The difference between the two great parties in their dealing with great questions like this is well illustrated by an editorial in the New York World of recent date which, with your permission, I quote. It is as follows:

1907—1916.

Most of the criticism of the President and Congress for preventing a railroad strike by the only means available is either so maliciously partisan or so foolishly short-sighted that it hardly merits serious consideration.

This is not the first time that extraordinary conditions have necessitated a resort to extraordinary measures, and that it has been necessary for the Government to serve private interest in order to protect the public interest.

In the year 1907 the United States experienced one of the most disastrous panics of its history. Years were required to liquidate it.

In the midst of this panic President Roosevelt placed the resources of the United States Treasury at the disposition of J. Pierpont Morgan and a coterie of New York bankers.

Some of these men were immediately responsible for the panic, in the sense that it began in their determination to crush Morse. They did not intend to have a panic, but they loosed forces that they were unable to control.

When the panic became a fact, however, there was no time to waste in fixing responsibility. The thing to do was to stop it. The quickest way to stop it was to turn the Treasury over to Mr. Morgan and his associates and let them reestablish the market. This was done.

In theory there could be no act of government more reprehensible morally, legally, and politically than to put a group of Wall Street bankers into physical possession of the United States Treasury. No sane man would think of defending it as an established policy of government. Nevertheless there was no other method immediately available of meeting the crisis. The United States had an antiquated banking and currency law which encouraged panics, and the situation had to be met without an hour's delay.

The panic was stopped. Mr. Morgan and his associates are said to have made fortunes out of their operations, and probably they did. It could not have been otherwise; but their gains were small in comparison with the losses the country would have sustained if the panic had continued even a week.

Out of this situation, however, came the public sentiment that finally enabled President Wilson to obtain the enactment of the banking and currency law which has made the United States panic proof.

The country confronted a similar situation of disaster in the threatened railroad strike. The President and Congress took the swift and sure way to avert it. In itself this legislation is not defensible, but as an emergency measure it was the only common-sense course to take.

Out of it must come a code of labor legislation analogous to the banking and currency act. That code will not be adopted in a week or in a month, but it will be adopted. The machinery has finally been set in motion.

The main difference between Mr. Wilson and Mr. Roosevelt in these two crises is that Mr. Wilson took decisive measures before the damage had been done, and Mr. Roosevelt waited until after the damage had been done.

The President and Congress saved the country from a civil war and gave it time for calm, dispassionate action to prevent a similar crisis in the future. What would be the state of affairs in the United States to-day if less prompt and effective measures had been adopted by the Government? That is the complete reply to all this irresponsible criticism.

Was it not better, Mr. Speaker, that this strike should be averted than that it should be allowed to paralyze the country for weeks or months?

A great hue and cry is being made by our opponents that the administration and the party has surrendered the principle of arbitration. It is known to all men that the President tried to arbitrate this matter; that he worked as no President ever worked to bring these contending parties together on some

basis for arbitration, but the parties to the contest would not arbitrate.

There is no law compelling arbitration. To stand for arbitration and yet get no arbitration was but a vain and futile thing. As the President said in his message to the Congress:

> To stand firm for the principle of arbitration and yet not get arbitration seemed to me futile, and something more than futile, because it involved incalculable distress to the country and consequences in some respects worse than those of war, and that in the midst of peace.
>
> I yield to no man in firm adherence, alike of conviction and of purpose, to the principle of arbitration in industrial disputes; but matters have come to a sudden crisis in this particular dispute and the country had been caught unprovided with any practicable means of enforcing that conviction in practice (by whose fault we will not now stop to inquire). A situation had to be met whose elements and fixed conditions were indisputable. The practical and patriotic course to pursue, as it seemed to me, was to secure immediate peace by conceding the one thing in the demands of the men which society itself and any arbitrators who represented public sentiment were most likely to approve, and immediately lay the foundations for securing arbitration with regard to everything else involved. The event has confirmed that judgment.
>
> I was seeking to compose the present in order to safeguard the future; for I wished an atmosphere of peace and friendly cooperation in which to take counsel with the representatives of the Nation with regard to the best means for providing, so far as it might prove possible to provide, against the recurrence of such unhappy situations in the future—the best and most practicable means of securing calm and fair arbitration of all industrial disputes in the days to come.

Mr. Speaker, this is not the first time the parties to a great industrial dispute failed to arbitrate. I recall that after months of a coal strike in the State of Colorado this House sent a committee there to investigate the matter in the hopes of adjusting it; I had the honor to be a member of that committee. The strike had been on for six months when your Representatives reached the scene; untold hardships had been endured by men, women, and children. The State was paralyzed, crime was rampant, and during all those terrible months the striking miners had offered to arbitrate, but the operators said "we have nothing to arbitrate." They would not even meet in conference with the representatives of labor. Your committee tried to bring about arbitration but without success. The President of the United States begged the operators to submit the questions in dispute to arbitration, only to be told as we had been told by the mine owners that "We have nothing to arbitrate." Where are the men who are now condemning the President because he could not bring about arbitration in this railroad controversy? Were they then eager for arbitration; did any of them lift his voice in this House, asking for that principle, then; did any of the carping critics, through the press, then lend their support; did any of the men who have recently carried on a propaganda through chambers of commerce and other organizations, demand of the mine owners that the principle of arbitration was sacred and should not be violated? No, Mr. Speaker; it did not concern them then. When gunmen were shooting and burning women and children in Ludlow, it did not concern these critics that the principle of arbitration had been thrown to the wind, or that these helpless victims were being sent to their graves by as cruel and heartless a combination of capital as ever disgraced and ravaged a State.

Mr. Speaker, I am for the eight-hour law as passed this House. It may not be perfect, but it affords a measure of justice to hundreds of thousands of honest, industrious men who merit and deserve it and the principle of an eight-hour day is now a fundamental part of the law of the land. It has come to stay and, like the principle of arbitration, it will grow. And in addition to that it has averted the greatest calamity that has threatened the country in years.

---

## The Facts With Reference to the Legislative Record of Wilson's Administration.

### EXTENSION OF REMARKS

OF

### HON. WILLIAM R. GREEN,

OF IOWA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, August 22, 1916.*

Mr. GREEN of Iowa. Mr. Speaker, Chairman McCormick, of the Democratic national committee, evidently considers that the present political situation makes it necessary for him to claim everything for his party, in the hope that the truth, which is usually somewhat belated, will not be known until after the campaign is over. He has recently issued a statement with reference to a number of Federal legislative acts which he says constitute the record of the present administration, and on this record makes an appeal to the progressive and independent voter. An examination of the facts with reference to these measures shows that if it was intended to make the statement utterly incorrect and misleading, its author has achieved a great success. So far as these acts have any merit in them, they originated with Republicans, and most of them were passed by a Republican administration. The absurdity of his claims will appear from a brief review of the facts with relation to these laws, which are listed below:

#### RURAL CREDITS.

The rural-credits legislation was initiated by President Taft, who had a preliminary investigation made of the European system. During his administration an appropriation was made for a special commission to study the subject, and the bill which was subsequently passed was framed on this report. The Republican Party was first to declare in its platform in favor of rural-credits legislation at its convention in June, 1912. Later the Democratic Party also had a plank in its platform favoring an investigation into the subject. The bill was nonpartisan, as there were only 10 votes against it in the House and 5 in the Senate.

It appears that the initiative in this subject was taken by the Republican Party, which was first to declare in favor of national legislation on the subject, first to cause an investigation, and first to legislate with reference to the matter.

#### INCOME TAX.

The income tax and inheritance tax were both used by the Republican Party as far back as the Civil War. The income tax having been held to be unconstitutional, Senators CUMMINS and BORAH, Republicans, with the approval of President Taft, each introduced an amendment to the Constitution authorizing the Government to levy income taxes. In a modified form the amendment passed Congress in a Republican administration and was ratified by a sufficient number of States so that it went into force February 25, 1913, in the administration of President Taft.

#### FEDERAL RESERVE BANK ACT.

The Federal reserve act includes another important principle originated by the Republicans and subsequently adopted by the Democrats. It is often stated that this statute prevented the occurrence of a panic when the European war broke out. As a matter of fact, it was the Vreeland-Aldrich bill, passed by the Republicans in 1908, which the Democrats voted against but subsequently reenacted, under which the emergency currency was issued to prevent a panic in the early months of the war. While the Federal reserve act became a law in December, 1913, the organization had not been completed when the war broke out. The Republican platform of 1908 approved the Vreeland-Aldrich bill, declared in favor of a monetary commission to investigate and prepare a permanent currency system, which commission made its report in 1912. The Federal reserve act was not prepared in accordance with the report of the commission and has been enormously expensive, without any corresponding benefit. The reserve banks pay no interest on their capital, which is furnished by the national banks, or on the deposits made by the Government, all of which could be easily made to bring in large returns. With about $525,000,000 of resources, this last report showed only about $20,000,000 loaned on commercial paper. In an effort to get some returns the reserve banks have bought about $40,000,000 of municipal warrants, a somewhat precarious investment, and there is still over $350,000,000 of their resources which is earning nothing. The country banks have not been able to obtain the kind of paper which the law requires for discount with reserve banks, and the scheme is of no value to them. As planned and managed the reserve banks are a failure and the act creating the system should be completely revised.

#### GOOD-ROADS LAW.

This is a nonpartisan measure, passed in 1916. The movement for Federal aid to roads originated under the Taft administration, under which a joint commission of House and Senate was appointed to propose legislation for Federal aid. MR. SLEMP, a Republican Member of the House, first suggested the selection of a committee on roads, and every Republican voted for it in the House. The bill for Federal aid was reported from the Committee on Roads by unanimous vote—every Republican voting for it—and the Republicans of both House and Senate generally voted for the final bill. Like so many other measures for which the Democrats claim credit this legislation originated under a Republican administration and was supported by Republicans in both House and Senate.

FEDERAL TRADE COMMISSION.

The law which established the Trade Commission was an outgrowth of the statute which created the Bureau of Corporations, passed in 1908 by a Republican House and Senate and which provided for an investigation of violations of the antitrust law. It was thought best to expand the powers of this bureau somewhat, make it independent, and to have it managed by a commission instead of one man. This idea was advocated by President Roosevelt, and the Republican platform of 1912 favored the creation of a Trade Commission. The only controversy about it was as to the form of the bill. It differs from the Bureau of Corporations merely in having more officers and the right to make certain investigations independent of directions given by the President or Congress.

EIGHT-HOUR LAW.

The first eight-hour law was passed by the Republicans June 25, 1868, providing that eight hours should constitute a day for laborers, workmen, and mechanics employed by or on behalf of the Government. By the act of May 24, 1888, its provisions were extended to letter carriers, with extra pay for overtime. August 1, 1892—Harrison's administration—it was further provided that eight hours should constitute a day for laborers employed by contractors or subcontractors on United States public works, with a penalty. The further provision for additional penalties upon contracts and a consolidation of the former statutes was made under the act of June 19, 1912, and a further amendment was enacted March 3, 1913, which was passed for the purpose of excepting emergency work on river and harbor improvements.

The letter carriers were limited to 48 hours of the week under the act of June 2, 1900, and it was provided that their eight hours must be within 10 consecutive hours by the act of August 24, 1912. All the Federal eight-hour laws of any importance were passed during Republican administrations. The bill providing for an eight-hour law for certain female workers in the District of Columbia was introduced by Senator LA FOLLETTE, a Republican, and passed the House without a dissenting vote.

CHILDREN'S BUREAU.

The Children's Bureau was created during President Taft's administration, April 19, 1912, the bill having been favorably reported to both Senate and House in the Sixty-first Congress—1911. Seventeen votes were cast against it in the House—all Democratic.

INDUSTRIAL COMMISSION.

The Industrial Commission was also established under President Taft's administration on August 23, 1912.

PHOSPHOROUS-MATCH LAW.

The bill which was passed to prevent the manufacturing of phosphorous matches was originally introduced by Mr. ESCH, of Wisconsin—Republican—and specially advocated by him. It was signed by President Taft April 9, 1912. There were 31 votes against it in the House, of which all but one was Democratic.

CLAYTON ANTITRUST ACT.

The Clayton Antitrust Act is a Democratic measure which has weakened our antitrust laws and made them more difficult to enforce. That part which regulates the issuance of injunctions was given its most valuable feature by an amendment introduced by Senator CUMMINS, a Republican, which declared that labor was not a commodity.

Of this law Senator REED, a Democrat, said:

It is a sort of legislative apology to the trusts, delivered hat in hand, and accompanied by an assurance that no discourtesy is intended.

It has been on the statute books two years and not a single order has been made to enforce any of its provisions, although the Trade Commission was specially charged with its enforcement.

DEPARTMENT OF LABOR.

The statute creating the Department of Labor was passed during the administration of President Taft and went into force March 4, 1913.

SMITH-LEVER AGRICULTURAL EDUCATIONAL BILL.

This is merely a bill granting additional funds to agricultural colleges on condition that the State where the college is located appropriate an equal sum for instruction in education and home economics. It continues the work begun by previous Republican Congresses, which had heretofore appropriated large sums in aid of the agricultural colleges.

CORRUPT-PRACTICES ACT.

The first act of this kind was passed January 26, 1907. This act was amended June 25, 1910, and further amended by the act of August 19, 1911, which extended its provisions to primaries. This last provision was strongly opposed by the Democratic Members of the House, and was inserted by way of amendment by a Republican Senate. A further amendment was made by the act of August 23, 1912. The principle of regulation of Federal elections and primaries originated with the Republican Party, and all the laws on the subject were passed during a Republican administration.

PHYSICAL VALUATION OF RAILROADS.

Authorized by act of March 1, 1913, and approved by President Taft.

SHERWOOD PENSION BILL.

This was introduced by Representative SHERWOOD, a Democrat, as the Pension Committee was then Democratic. At the time the Democrats had a majority of 69 Members in the House, and only 97 Democrats out of 225 voted for the bill, while 130 Republicans voted for it. Of the 93 votes against the bill, 90 were Democrats. In the Senate 40 Republicans voted for it and 11 Democrats. All of the votes cast against the bill—16—were by Democrats. It will thus be seen that the bill was really a Republican measure and passed by Republicans. It was approved by President Taft May 11, 1912.

PARCEL-POST LAW.

The parcel-post law was enacted August 24, 1912, being attached as a "rider" to the Post Office appropriation bill. An amendment for that purpose was introduced by Mr. ANDERSON (Republican) in the House and was defeated by Democratic votes. In a Republican Senate, what is substantially the present act was incorporated as an amendment and subsequently approved by the House.

CHILD LABOR.

President Wilson expresses himself in opposition to a Federal child-labor law in his work on Constitutional Government of the United States (1911, pp. 178–179). The bill which recently passed the House had 337 votes in its favor and 46 against. Of the 46 against, only 2 were Republicans. The first Federal child-labor bill was introduced by Senator Beveridge, a Republican, and the first one to be passed was introduced by Senator GALLINGER, a Republican, prohibiting child labor in the District of Columbia. The Republican platform in 1912 also declared in favor of a Federal child-labor law.

It will thus be seen that out of some 20 measures for which Chairman McCormick claims the credit as a basis for his appeal to the Progressive and independent voter, that only 1, the Clayton antitrust act—a failure—is properly credited to the Democrats. Many Republicans voted against the Federal reserve act because of its form, and their objections have been abundantly justified by the manner in which the bill has operated. The other acts referred to were brought forward as nonpolitical and almost unanimously supported by the Republican Members of Congress, because they were in fact Republican measures. In asking the support of the Progressives, Chairman McCormick overlooked one exclusively Democratic measure, the Underwood tariff bill, with reference to which the Republicans will cheerfully accord to the Democratic Party all the credit which anyone can find has resulted from it.

---

## Nebraska—Its Semicentennial as a State.

### EXTENSION OF REMARKS

OF

### HON. CHARLES O. LOBECK,

OF NEBRASKA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. LOBECK. Mr. Speaker, I thank the Members of the House in Congress for the privilege of extending my remarks about my beloved State of Nebraska, of which I have the honor and privilege, in part, to represent in this Congress of the United States.

Thirty-six years ago I became a citizen of Nebraska, and as a commercial traveler I became familiar with the State; I visited every portion within its confines, became personally acquainted with many of the pioneer homesteaders, the pioneer merchants, knew of the experiences of these pioneer settlers

west of the Missouri River, and from my personal observation know of the marvelous growth of the State.

The United States acquired the territory of Nebraska through the Louisiana Purchase—1803. It was a part of Louisiana Territory in 1805 and of Missouri in 1812 and the Indian Territory in 1834, and organized as Nebraska Territory in 1852, and became a State in 1867.

The Nebraska territory has been claimed by three great nations of the earth—Spain, France, and England—and it is said the flags of these nations have in turn waved over some of its soil, but on September 29, 1806, Lieut. Zebulon M. Pike held a grand council with the Pawnee Indians, and then and there an old Indian took down the Spanish flag and laid it at his feet. He then took the American flag and raised it on a staff where the Spanish flag had floated, and to this day the Stars and Stripes have been the glorious emblem of the State, and the people of Nebraska have ever held it unsullied, and no State has had braver defenders of the flag and for what it stands than the people of Nebraska.

The stories of the early visits of the Spaniards, who came from Mexico under the leadership of Francisco Vasquez Coronado and his soldiers, who were the first white men to visit Nebraska plains, are very interesting. The early history of Nebraska abounds with stories of trappers and trading posts.

The Lewis and Clark expedition wintered, in 1804, in Nebraska, and the farthest western military post at the time in the United States was established by Gen. Atkinson and named in his honor in 1819, and abandoned in 1827. This fort was built adjoining the present city of Fort Calhoun, in my district, and this little city claims the first apple orchard in the State, the first county courthouse, and the first church parsonage in the State.

The history of Nebraska in 1827, down to the time when it was organized as a Territory in 1852, is the story of hardy pioneers, traders, and Indian troubles. The first free homestead in the United States was taken by Daniel Freeman in Gage County, Nebr., under the free homestead act which was passed May 20, 1862, and signed by President Lincoln. And this splendid act of Congress has done more to open up and develop western country than any other measure, for it encouraged men and women to come and secure free homes. They cultivated the soil, railroads were constructed, farms and cities built, and became permanent homes for millions of people.

And so it would be very interesting to place in the CONGRESSIONAL RECORD the many incidents that are told of the history of Nebraska, but space forbids. Probably some of the most interesting stories told in book form of the history of Nebraska are by Mr. Addison Erwin Sheldon, of the University of Nebraska, and Mr. W. H. Woods, of Fort Calhoun, who have collected an interesting fund of information in regard to the early history of the State, and to both these gentlemen the people of Nebraska are indebted to for much valuable knowledge.

A half century ago Nebraska was admitted into the Union of the States. Its advent was tragic, for it presaged the War between the States. It was carved out of the wonderful territory which the genius and farsightedness of Thomas Jefferson made possible.

For a quarter of a century Nebraska, after its admission, suffered as most new States of the West. It had many conditions to overcome. But the people of Nebraska come from hardy stock. They came from the affluent sections of the East, the sturdy yeomanry of the Middle West. They came from countries of Europe to assist in the work of building a mighty State. And Nebraska, celebrating its fiftieth anniversary next month, belongs to the wonder States of our great confederation. The country of Quivera is to-day the bread basket of the Nation. Its people represent law and order. Its soil is the best the generous sun shines on.

Nebraska is the home of a million and a half of the finest citizenship in all the world.

On this occasion I take the opportunity to concretely tell something of the present prosperity of my State that is very dear to me, and I tell it in the language of others versed in such matters.

I quote from the Omaha-World Herald of September 2, 1916:

NEBRASKA'S PROSPERITY AN AMAZING SPECTACLE—SYNOPSIS OF ANSWERS TO INQUIRIES REVEALS WEALTH AND OPPORTUNITIES NOT DREAMED OF—FIGURES COMPILED SHOW STATE A LAND OF FULFILLED PROMISE AND BOUNTIFUL RESOURCE.

Ten thousand people, scattered throughout every State in the Union and every Province in Canada, wrote the immigration bureau of the Burlington Railroad last spring, asking for information about Nebraska and stating that they wanted to come to this State to live. Many more applied to the Union Pacific Railroad for similar information, and with a similar purpose in mind, to come to Nebraska to live. Other railroads operating in this State received numerous requests from prospective citizens and the commercial clubs of practically every city and town tell the same story.

There is a big trend toward Nebraska and thousands have their eyes turned this way.

Roughly speaking, the same answer was returned to every seeker after information. The answer was expressed in various words, but in the main here are the reasons given each prospective citizen as to why he should come to Nebraska to live and grow rich. The figures were prepared by the Nebraska State department of labor and their correctness is vouched for by that bureau.

FACTS ABOUT THE STATE OF NEBRASKA.

Third largest wheat producer in the United States.
Third largest oats producer in the United States.
Fourth largest corn producer in the United States.
Second largest alfalfa producer in the United States.
Third largest stock market in the United States.
Largest single creamery in the entire world.
Largest butter market in the entire world.
Fifth largest butter-producing State in the United States.
Second largest smelter of fine ores in the world.

Spends more money per capita for education than any State in the entire Union and has a larger per capita permanent school fund than any State in the entire United States.

The value of the eggs laid by Nebraska hens in 1914 was greater than the output of all the gold and silver mines in Colorado and California combined.

Last year the Nebraska small-grain crop was worth more than all the tobacco raised and copper mined in all the world.

A freight train 12,000 miles long was required to haul last year's Nebraska crops to market.

Five counties in Nebraska raise more apples than the combined output of the States of Washington, Oregon, and Idaho.

Nebraska butter produced last year, if packed into 1-pound cartons and piled end-on-end, would make a stack 2,300 miles high.

Nebraska's agricultural and live-stock production for 1915 is worth more than all the coal mined in the entire United States the same year.

Nebraska's manufacturing plants turned out products worth $161,922,974.38 in 1914.

Nebraska's grand total of production in 1914—agricultural, live stock, dairy, fruit, and manufactured products combined—totaled, approximately, $700,000,000.

These are some of the reasons, in tabloid form, given to the thousands who last year asked why they should come to Nebraska to live.

Did any of these people come to Nebraska to live? They did. Next week in this space will be given the details of the present "trek" to this State.

But, really, the trend to Nebraska is nothing new. It has been under way for a number of years—10 at least.

Ten years ago 20 per cent or more of all Nebraska was Government land, subject to homestead entry. Only a few years ago there were 3,000,000 acres of free land in Nebraska. To-day there are less than 50,000 acres that can be homesteaded; not a single tract containing 80 acres is open for homestead; the free land is entirely gone.

Farmers and settlers now coming to this State must purchase their land farms; the Government has no more to give them.

The population on these millions and millions of acres that have been homesteaded in the last 10 years has changed the map of western and northern Nebraska, and has caused the land in other sections of the State to double and treble and quadruple in value. Small trading points have grown up at regular intervals throughout the territory. Good schools have been established. Churches have emerged from the sod buildings and are now housed in frame and brick structures. No longer do large herds of long-horned, wild-eyed Texas steers have the exclusive use of these lands. The range steer has moved out, the beef steer and the milch cow have moved in. Instead of the yip yipping cowboy, there is the put put of the automobile. The State is not blooming like a rose; it is blooming like a giant grain field.

Western Nebraska has arrived.

Among the thousands and thousands of letters received asking for information about Nebraska there were many unique ones, and the answers were fitted to the questions.

"I never raised anything but tobacco," wrote a farmer down in Kentucky. "Does Nebraska produce tobacco?"

And the answer read something like this: "Come on out. You can't make much raising tobacco out here, but our corn crop last year was worth more than all the tobacco raised in all the world. Raise corn instead."

"I've got the gold fever," wrote an Ohio man. "I want to go to Colorado or California and get a gold mine, but I haven't got enough money. Any gold in Nebraska?"

"Not in paying quantities," was answered him. "But come out here and get a little bunch of hens together. Nebraska hens last year scratched out eggs of greater value than all the gold and silver produced by all the gold mines of both Colorado and California."

"What is the railroad rate to Washington?" an Indiana fellow wrote one of the Omaha railroads. "I want to go out there and raise apples. I've been reading glowing accounts of that country as an apple producer. Would you advise Washington, Oregon, or Idaho? I understand all three are fine for apples."

"Better come to Nebraska instead," the railroad wrote him. "Five counties in Nebraska—Richardson, Otoe, Cass, Johnson, and Nemaha—produce more apples every year than do all the orchards of Washington, Oregon, and Idaho combined. Nebraska's horn has not been tooted like the horns of the Northwestern States."

"My wife is a good butter maker," wrote a Wisconsin farmer. "We want to move to Elgin, Ill., and start a butter-making dairy, but we thought we would write you first."

"Dear sir," was the reply, "Elgin don't manufacture a pound of butter, but Omaha makes about 20,000,000 pounds every year; it is the greatest butter manufacturing city in the entire world. Nebraska is the fifth greatest butter-making State in the Union. Come out here and start your dairy and get rich. The land is cheap."

In 1915 Nebraska raised 228,000,000 bushels of corn, worth $114,000,000; 67,000,000 bushels of winter wheat, worth $54,000,000; 4,000,000 bushels of spring wheat, worth $3,000,000; 75,000,000 bushels of oats, worth $20,000,000; 3,000,000 bushels of rye, worth $2,500,000; 4,000,000 tons of alfalfa, worth $24,500,000; 3,000,000 tons of wild hay, worth $19,000,000; 11,000,000 bushels of potatoes, worth $4,250,000; $34,000,000 worth of horses and mules; $40,000,000 worth of cattle; $33,000,000 worth of hogs; $42,000,000 worth of poultry and

eggs; $38,000,000 worth of dairy products; $10,000,000 worth of seeds; $10,000,000 worth of apples and berries; $20,000,000 worth of sugar beets and canning products; $23,500,000 worth of forage, ensilage, and minor crops. The manufactured products for the year were worth more than $150,000,000.

In the matter of schools Nebraska stands right up at the head, the percentage of illiteracy being only 1.9 per cent of the population. Iowa alone stands higher than Nebraska in literacy, the percentage in that State being only 1.7 per cent. Nebraska spends more money per capita for educational purposes than any State in the Union and has a larger permanent school fund per capita than any other State. The State owns many thousands of acres of the finest agricultural lands, which are leased, the proceeds going to the school fund.

Not only has Nebraska no public debt for which its citizens must pay interest every year, but the State has $10,000,000 in its treasury—loaned out at good rates of interest. Sixty counties have no bonded indebtedness and the remaining 35 counties are bonded for only $3,800,000.

Everybody's prosperous in Nebraska. The last census report gives Nebraska but 551 paupers in almshouses. In the matter of per capita wealth Nebraska stands fifth. The bank deposits for the State show $240,280,000, an average of $201 for every man, woman, and child in the State. The Federal Government report for 1915 places the share of each man, woman, and child in Nebraska in live stock and four leading crops of the State at $573.

Is a share in the prosperity of Nebraska worth having? Look at any other State; compare the schools, the churches, the modern conveniences, the pauper rolls, the prison rolls, the divorce rolls, the bank accounts, the big crops. Where is Nebraska's superior? Where is Nebraska's equal?

And now the question is asked, "Is the country all settled up? Are there any chances yet to get good land cheap?" The answer is:

"Western Nebraska to-day offers the same opportunity that eastern Nebraska offered to the fathers of the present generation." In eastern Nebraska land which 30 years ago could be bought for $10 an acre is now worth $150 per acre. In western Nebraska land may be bought to-day at from $10 to $25 per acre that will produce a crop whose cash value is considerably more than were the crops of eastern Nebraska land 30 years ago.

"Why are these lands not bought up by speculators and capitalists?"

The answer is this: "The farmer who reduces the raw prairie to a state of cultivation is the man who secures the reward. These lands, if left in their present unproductive condition, will not increase in value to any great extent, except in isolated cases. Put the land to the plow and such crops will be reaped as will give the property a ready value immediately—a far greater value than it has as raw land. And the crops produced on these cheap lands will be just as valuable as the crops raised on the high-priced lands of eastern Nebraska and Iowa.

There are all sorts of opportunties in Nebraska; there are all sorts of prosperity in Nebraska. Come out and get your share.

I also take pleasure in inserting a letter received from the Commercial Club of Omaha relative to a subject in which the people of Omaha are much interested.

This letter contains valuable statistics in relation to the agricultural production of the seven States adjoining and located in the far-famed Missouri Valley:

OMAHA, NEBR., *August 18, 1916.*

Hon. C. O. LOBECK, M. C.,
*House of Representatives, Washington, D. C.*

MY DEAR MR. LOBECK: As some of the reasons why Omaha is the logical location for and should be selected as the city in which to locate one of the 12 Federal land banks provided for in the Federal farm-loan act recently passed by Congress, I beg to submit to you the following statements and statistics:

Omaha occupies a position in almost the geographical center of four States, with an area of 282,895 square miles, or 181,052,800 acres, embracing probably the richest and most productive agricultural area in the world.

Within this territory there were (according to the last United States census) 515,646 farms occupied by their owners, and therefore eligible as borrowers under the Federal farm-loan act, of which 236,619 were mortgaged. If any considerable portion of these mortgages are to be refunded under the new law, it can be readily seen that a bank located at Omaha would not want for business.

As tending to show the agricultural character of this territory, Government statistics show that there was produced within it during the year 1915, 897,500,000 bushels of corn, valued at $461,772,000; 228,357,000 bushels of wheat, valued at $202,389,000; 119,481,000 bushels of oats, valued at $119,481,000; 10,323,000 bushels of barley, valued at $10,323,000; 4,342,000 bushels of rye, valued at $4,342,000; 23,386,000 bushels of potatoes, valued at $23,386,000; 9,564,000 tons of hay, valued at $135,546,000; 38,697,000 bushels of apples, valued at $26,276,000; 6,048,000 bushels of peaches, valued at $5,822,000.

There were on the farms within this territory on January 1, 1916, 4,805,000 horses, valued at $468,085,000; 730,000 mules, valued at $75,198,000; 3,640,000 cows, valued at $212,084,000; 8,474,000 other cattle, valued at $337,021,000; 20,715,000 hogs, valued at $182,044,000; 3,404,000 sheep, valued at $20,169,000.

As showing that this territory is naturally tributary to and that Omaha is the market town and clearing house for these products, there was handled at the Omaha stock yards during the year 1915, 1,218,342 head of cattle, 2,642,973 hogs, 3,268,279 sheep, and 41,679 horses and mules.

There was handled through the Omaha Grain Exchange during the year 1915 as follows:

| | Receipts. | Shipments. |
|---|---|---|
| | *Bushels.* | *Bushels.* |
| Wheat | 16,587,600 | 11,408,400 |
| Corn | 24,295,200 | 25,342,100 |
| Oats | 11,042,000 | 11,560,000 |
| Rye | 1,076,000 | 816,000 |
| Barley | 555,000 | 96,000 |
| Total | 53,555,800 | 49,223,000 |

As this grain is all received from the country tributary to Omaha and not as reshipments from other markets, it makes Omaha one of the largest primary grain markets in the country.

Omaha's bank clearings for the year ending July 31, 1916, were $1,109,194,759.83, making her the sixteenth city in the United States in volume of business.

Omaha is the largest butter market in the world. She is the third largest meat packing center, the second largest live-stock market, and the largest range-horse market in the United States.

She has 17 lines of railroads, of which six extend to the eastward, three to the northward, three to the southward, three to the Pacific coast, and two to the northwestward, thus affording the mail facilities which would enable a bank located here to handle its business expeditiously.

I am inclosing herewith some statistics, showing crop production for Nebraska as well as for six surrounding and adjoining States.

Trusting that the inclosed figures may be of value to you in your presentation of our case, I am,

Yours, truly, ROBT. H. MANLEY, *Commissioner.*

*Table showing acreage, production, and value of principal farm products in seven States tributary to Omaha.*

GOVERNMENT STATISTICS, 1915.

| | Acreage. | Production. | Value. |
|---|---|---|---|
| CORN. | | | |
| | | *Bushels.* | |
| Total for United States | 108,321,000 | 3,054,535,000 | $1,755,859,000 |
| Nebraska | 7,100,000 | 213,000,000 | 100,110,000 |
| Kansas | 55,550,000 | 172,050,000 | 87,746,000 |
| Iowa | 10,100,000 | 303,000,000 | 154,530,000 |
| Missouri | 7,100,000 | 209,450,000 | 119,366,000 |
| Colorado | 470,000 | 11,280,000 | 6,204,000 |
| Wyoming | 25,000 | 625,000 | 419,000 |
| South Dakota | 3,250,000 | 91,250,000 | 46,182,000 |
| WHEAT. | | | |
| Total for United States | 59,808,000 | 1,011,505,000 | 930,302,000 |
| Nebraska | 3,947,000 | 72,154,000 | 60,609,000 |
| Kansas | 8,525,000 | 106,538,000 | 94,819,000 |
| Iowa | 785,000 | 15,557,000 | 13,535,000 |
| Missouri | 2,773,000 | 34,108,000 | 33,426,000 |
| South Dakota | 3,725,000 | 63,762,000 | 54,835,000 |
| Colorado | 560,000 | 13,310,000 | 10,648,000 |
| Wyoming | 125,000 | 3,315,000 | 2,588,000 |
| OATS. | | | |
| Total for United States | 40,780,000 | 1,540,362,000 | 99,431,000 |
| Nebraska | 2,200,000 | 70,400,000 | 27,840,000 |
| Kansas | 1,650,000 | 43,725,000 | 16,178,000 |
| Iowa | 4,950,000 | 198,000,000 | 63,360,000 |
| Missouri | 1,225,000 | 31,850,000 | 12,103,000 |
| South Dakota | 1,725,000 | 72,450,000 | 20,286,000 |
| Colorado | 300,000 | 11,700,000 | 4,797,000 |
| Wyoming | 227,000 | 9,534,000 | 4,100,000 |
| BARLEY. | | | |
| Total for United States | 7,395,000 | 237,009,000 | 122,490,000 |
| Nebraska | 105,000 | 3,255,000 | 1,367,000 |
| Kansas | 270,000 | 8,370,000 | 3,515,000 |
| Iowa | 353,000 | 10,943,000 | 5,362,000 |
| Missouri | 5,000 | 125,000 | 79,000 |
| South Dakota | 750,000 | 24,000,000 | 11,040,000 |
| Colorado | 130,000 | 4,680,000 | 2,246,000 |
| Wyoming | 17,000 | 112,000 | 337,000 |
| RYE. | | | |
| Total for United States | 2,856,000 | 49,190,000 | 41,205,000 |
| Nebraska | 200,000 | 3,500,000 | 2,555,000 |

| Wyoming | 550,000 | 1,210,000 | 9,438,000 |

## The Daniels-Gardner Debate.

### EXTENSION OF REMARKS
OF
# HON. AUGUSTUS P. GARDNER,
OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. GARDNER. Mr. Speaker, in accordance with a leave to extend my remarks in the RECORD, granted me on September 2, 1916, I submit the following:

I. A list of questions publicly propounded by me to Secretary Daniels on August 24, 1916.

II. Secretary Daniels's answer of August 25, 1916.

III. My rejoinder of August 29, 1916.

If Secretary Daniels has replied to my rejoinder, I have not heard of that fact.

I. QUESTIONS FOR SECRETARY DANIELS, PROPOUNDED BY CONGRESSMAN A. P. GARDNER AT WEST SULLIVAN, ME., AUGUST 24, 1916.

"SIR: In your annual report submitted to Congress December 1, 1914, you entitled one of the subdivisions "Proof of preparedness of the Navy." You said: "The Navy is always ready; it lives in a state of preparedness." And further you said, "As far as the submarines themselves are concerned, it is believed that ours are on a par with any in the world."

"At the very time when you submitted that report were not the following facts in the possession of the Navy Department?

"Question 1. Was it not known to the department that every battleship then in commission was equipped entirely with torpedoes which Admiral Strauss, Chief of Ordnance, had six weeks previously declared to be obsolete?

"Question 2. Had not the senior naval adviser to the Secretary of the Navy, Admiral Fiske, three weeks previously, on November 9, 1914, submitted to you an official letter with the subject title "The Navy's Unpreparedness for War"?

"Question 3. Were not the scores of the target practice of the Atlantic battleship fleet for 1914 in the possession of the Navy Department at the time of your report, and did not they show that our naval gunnery had degenerated to an efficiency almost incredible? Did not those scores show that out of 21 battleships the proficiency attained in elementary target practice, on the Mayo scale, was as follows: Excellent, 2 battleships; good, 1 battleship; fair, 2 battleships; poor, 4 battleships; unsatisfactory (lowest rating of all), 12 battleships?

"Question 4. Is it not a fact that three weeks before your report to Congress alleging the preparedness of the Navy you wrote to Admiral F. F. Fletcher, commander in chief of the Atlantic Fleet, as follows:

"Information is desired as to the reasons for the unpreparedness of the submarine flotilla for active service. Your recommendation is desired as to the course to be pursued in the future to prevent such unpreparedness.

"Does all that sound like preparedness?

"I have noticed in some of your speeches a comparison of the number of vessels of the Navy in commission when you became Secretary and the number in commission at the present time.

"Question 5. Is it not true that of all 44 naval vessels authorized prior to this year by Congress during President Wilson's administration, only one has yet been put in commission?

"Question 6. Is it not true that on August 1, 1916, not one single stroke of work had yet been done on the dreadnaughts *Tennessee* and *California*, the destroyer *Caldwell*, and the submarines *O-1* and *O-2*, although Congress voted to build these vessels over 17 months ago on March 3, 1915?

"Question 7. Is it not true that you have on your hands 32 uncompleted submarines of which 1 was authorized by Congress in 1908, 1 in 1909, 4 in 1912, 2 in 1913, 8 in 1914, and 16 in 1915?

"Question 8. Is it not true that you have made a contract with the Electric Boat Co., allowing that concern three years in which to complete the building of the sea-going submarine *Schley*?

"Question 9. Is it not true that the superdreadnaughts *Nevada* and *Oklahoma*, which for the first time you put in commission this spring, were authorized over five years previously by Congress?

"Question 10. Is it not a fact that eight years ago 16 American battleships were mobilized for a trip around the world, whereas late last winter only 15 American battleships—not including the old *Kentucky*—could be mustered for Admiral Fletcher's maneuvers?

"Question 11. The official Navy List of August 1, 1916, shows that there are 19 battleships at present in full commission. Is it not true that three of them are operating with reduced complements of officers and men? Is it not also true that the destroyer flotillas are likewise operating with reduced complements of officers and crew?

"Question 12. Is it not a fact that on December 1, 1914, with a European war raging, you advised Congress to cut in two the Navy building program recommended by the General Board of the Navy? And is it not also true that you entirely cut out the General Board's recommendation of $5,000,000 for airships?

"Question 13. Is it not true that on July 30, 1915, the General Board of the Navy recommended to you that the Navy building program for this year should include 4 battleships, 4 armored cruisers, 6 scout cruisers, 28 destroyers, and 37 submarines? And is it not also true that you recommended to Congress to cut this program down to 2 battleships, 2 battle cruisers, 3 scout cruisers, 15 destroyers, and 30 submarines?"

NOTE.—An advance copy of the above questions was sent to Secretary Daniels on August 19, 1916.

II. Secretary Daniels's reply at Milbridge, Me., August 25, 1916:

[From the Waterville Morning Sentinel.]

REPLIES TO CONGRESSMAN GARDNER—SECRETARY DANIELS ANSWERS CRITICISMS ABOUT THE NAVY—MILBRIDGE'S GREATEST EVER—GOV. CURTIS AND ALSO SECRETARY BUNKER AMONG SPEAKERS.

MILBRIDGE, *August 25.*

This town and every other town within a radius of 30 miles turned out to-night to hear Secretary of the Navy Daniels, Gov. Oakley C. Curtis, and Secretary of State of Maine John E. Bunker, candidate for Congress. The large hall was packed to overflowing, many leaving after a vain endeavor to hear the noted speaker of the evening. It was by far the greatest and best rally that this part of Washington County has ever known, and a grand, glorious tribute to a famous member of President Wilson's Cabinet.

GOV. CURTIS.

Gov. Curtis again to-night defended himself from the attacks of Carl E. Milliken, Republican candidate for governor, especially alluding to the representations made at Island Park in Kennebec County in a recent speech.

Secretary of State Bunker discussed the various candidates and their qualifications.

The party to-morrow will travel up through Jonesport, and in the evening address a rally at Machias.

Answering the 12 questions propounded by Congressman A. P. GARDNER in his speech at West Sullivan, Hon. Josephus Daniels, Secretary of the Navy, in his speech here to-night, read an extract from a reply to the questions regarding target practice given the Secretary by Capt. C. P. Plunkett, director of gunnery exercises, in which Capt. Plunkett expressed his opinion that Mr. GARDNER'S criticisms of target practice "had been of the greatest use to every enemy of the Government." In replying to the 12 questions, Secretary Daniels said in part:

MANY ANSWERS.

"There are doubtless people who are able to ask more questions than Mr. GARDNER, but I doubt if anyone has ever asked the same questions so many times without paying the slightest attention to the answers. I have, directly and indirectly, answered these questions in statements to the newspapers, in information furnished Congress, in letters beyond number addressed to Mr. GARDNER himself, and in every other conceivable way I have talked them and written them and done everything but sing them to him, and, indeed, while Goodness knows I am no singer, if I thought that by so doing I could get him to stop asking questions long enough to listen to the answers, I would gladly set them to music and sing them to him. Not only have I answered these questions myself, but they have been answered by naval authorities far more competent to speak than any civilian could be, perhaps the most succinct and convincing answer of all having been made by Admiral Dewey in a published interview last Sunday, when he summed up the entire series of interrogation points in the single word 'bosh.'

"Mr. GARDNER, according to the Congressional Directory, has been in Congress since 1902. He has had the right and, since he has been so vigorously hunting for Democratic deficiencies during the last year, he has himself admitted that it is not only his right but his sacred duty, by speech and vote, to safeguard this country from a degenerating and inefficient Navy, to see, by constant and reiterated warning, that the Navy is kept on its toes, as it were, and, by sharp criticism and inquiry, to drag every weakness from its hiding place and expose it to the public.

NAVY IN 1905.

"During this period, therefore, that he has been in Congress, if Mr. GARDNER is sincere, if Mr. GARDNER is asking these questions from a desire to improve the Navy, if he really thinks he has been appointed by the people to safeguard their interests in this matter, if he is not merely playing petty politics and, by misrepresentation and twisting of figures, trying to get his party back into power without any regard for the Navy itself, he has, of course, during all of this time, never failed to protest loudly and vociferously whenever our Naval Establishment showed signs of disintegration. For instance, in 1905 that great recent convert to preparedness, Theodore Roosevelt, then President, in his message to Congress made this statement: 'It does not seem to be necessary, however, that the Navy should, at least in the immediate future, be increased beyond the present number of units.'

"Mr. GARDNER, if he is the real naval expert which he would have us believe he is, knew the building programs of the other nations that year and that his policy carried out would inevitably throw us back to third or even fourth place. Therefore, we have only to turn to the CONGRESSIONAL RECORD to find Mr. GARDNER addressing questions to the President, speaking on every occasion on the floor, warning the people of his district of the peril to our country, demanding the recommendations of the General Board and in other ways arousing the slumbering Nation to its danger. I have searched the CONGRESSIONAL RECORD for that year through with some care, and I find that Mr.

GARDNER failed to say anything about the Navy at all. He was apparently in total ignorance of the fact that there was a Navy—in fact, had been oblivious to the fact during all the four years previous that he had served in Congress, for, in all of that time not one word pertaining to the Navy appears, so far as I can find, credited to the Hon. AUGUSTUS PEABODY GARDNER.

"Again, President Roosevelt, in his message to Congress in December, 1907, continuing the fatuous policy which eventually brought us to the time that required heroic action by the Democrats to rescue our Navy from sinking to the very bottom of the list, said: 'I do not ask that we continue to increase our Navy. I ask merely that it be maintained at its present strength.'

"Did the Hon. AUGUSTUS PEABODY GARDNER arouse himself by this time? Had not the inevitable downward drift for two years caught his attention? Apparently not. Not one word about the Navy did Mr. GARDNER speak that year or the next.

SUCH IS THE RECORD.

"Such is the record, and we have not, then, a man devotedly interested in the Navy, caring deeply whether or not we are in first, second, or ninth place, but one interested in nothing pertaining to military subjects of any kind, until somebody suggests that it would be good politics to attack the Democratic administration. Let us quote Mr. GARDNER'S own statement of his course in Congress, from the first real speech about the Navy that he made. On October 16, 1914, Mr. GARDNER says:

"'For a dozen years I have sat here like a coward and I have listened to men say that in time of war we could depend for our defense upon our National Guard and our Naval Militia, and I have known all the time that it was not so.'

"So Mr. GARDNER, by his own words, was not even to be excused from ignorance for his own silence. He knew better, and the reason he saw things going from bad to worse and said nothing was because he was a 'coward.' Now, there is a certain amount of credit to be given to a man who honestly and publicly regrets that he has been a coward, but let us see whether that is an honest confession or not. I want to ask Mr. GARDNER one question in return: Were you a 'coward' in not exposing the gradual deterioration of the Navy under Republican administration because you dared not expose your own party's deficiencies for fear of your own political future, and is your present bravery due to the fact that you are attacking a Democratic administration and gaining prestige in your own party in consequence, or, if that is not what made you a coward for so many years, what, Mr. GARDNER, was it? Who or what were you afraid of?

"I have said, and I hope I have proved, that the insincerity of the questions requires no further answer, but I am going to answer them just the same. Mr. GARDNER has asked them with the fatuous idea that he may obtain Republican votes by so doing. I am going to answer them, because I know I will get Democratic votes when the truth is known.

"Mr. GARDNER first plaintively inquires whether I knew, at the time of submitting my annual report in 1914, that every battleship then in commission was equipped entirely with torpedoes which Admiral Strauss, Chief of the Bureau of Ordnance, had six weeks previously declared to be obsolete.

"If Mr. GARDNER would only read some of the reports of the naval officers he would find many of the questions answered, and this is the present case, for with my annual report went the report of the Chief of the Bureau of Ordnance, which said not only that we knew it, but that we had already obtained appropriations and were actually manufacturing long-range torpedoes to take their places. I am also glad to inform him that since then all of the dreadnaughts in commission have been equipped with these torpedoes. I am not quite sure whether Mr GARDNER really knows what a torpedo is or not. His ignorance of things nautical is at times amazing. But it may interest the public generally to learn that the increasing range of naval guns was yearly increasing the distance apart of fighting battleships, and the time had come when the range at which the ships would fight exceeded the distance which the old torpedo could be made to go. This was not a condition peculiar to our Navy. It was true of every navy battleship.

"Question No. 2 shows a lamentable failure upon Mr. GARDNER'S part to read the newspapers. At this late day he inquires anxiously whether or not Admiral Fiske had submitted to me three weeks previous to November 9, 1914, an official letter with the subject title 'The Navy's unpreparedness for war.' To answer this momentous question at length would be to assume that my audience was equally indifferent to the public press. It is sufficient to say that it was claimed that Admiral Fiske had presented such a letter; that I had said that Admiral Fiske had presented so many memorandums on naval subjects as part of his official duties that it was difficult to remember exactly the one referred to, but that I could not find it in my files. That Admiral Fiske himself then announced that he was quite sure he had sent the letter, to which I replied that if Admiral Fiske made such a statement I did not for a moment doubt that it was true.

"Mr. GARDNER also wishes to know whether or not, three weeks before I made this report to Congress, I had written to Admiral Fletcher commenting on some breakdowns of our submarines and asking what he recommended to prevent them occurring in the future? Mr. GARDNER apparently finds it very difficult to reconcile this letter, which I undoubtedly wrote, with my statement in my report that 'So far as the submarines themselves are concerned, it is believed that ours are on a par with any in the world.' Apparently Mr. GARDNER has fallen into the error of assuming that the statement that our submarines were as good, so far as we know, as the other fellows', meant that they were therefore perfect and without flaw. As a matter of fact, submarines were and still are in a state of development and are subject to as unexpected and sudden breakdowns as the automobile of 10 years ago. Saying that they were on a par with any in the world at that time did not mean that they were perfect or anything like it.

"Now comes questions 5, 6, 7, 8, and 9, all bearing on the number of vessels this administration has under construction or constructed and the time required for their completion. I am giving to the press a full and detailed reply to these questions prepared by the Bureau of Construction and Repair, as it makes several pages and goes into technicalities which are rather out of place to read here; but it is enough to say in general that the record of this administration for the number of vessels completed from the time of its going into office exceeds that of any other administration in the history of the Navy since modern ships replaced the old quickly constructed wooden vessels; that, specifically in reference to question 6, which asks, Is it not true that not one single stroke of work has yet been done on the *Tennessee*, *California*, *Caldwell*, and two submarines? I can reply it is not true. If Mr. GARDNER had only a rudimentary knowledge of naval construction, he would know that before the keel is laid there must first be done much work in the shops. Certain parts of a boat are made inside the shops before the actual erection on the ways is begun. This work has been and is going on in spite of the great difficulty of obtaining labor in these prosperous times.

"Mr. GARDNER asks, in question No. 10, if it is not a fact that eight years ago 16 American battleships were mobilized for a trip around the world, whereas last winter only 15 battleships, not counting the *Kentucky*, could be mustered for Admiral Fletcher's maneuvers. It is a fact that 16 battleships took the trip around the world eight years ago, although to do it not only every ship left behind but the navy yards and shore stations as well were stripped of men to afford them personnel sufficient to make the trip. It is not true that only 15 could be mustered for Admiral Fletcher's maneuvers. Only 15 were used, which is a different thing. If Mr. GARDNER will read his morning paper he will find in fact that there are 25 battleships at this moment engaged in maneuvers off our shores.

"In question No. 11 Mr. GARDNER wants to know about reduced complements on some battleships and destroyers. Our reserve battleships and destroyers have and always have had reduced complements. The question of personnel and the need for increased personnel has been brought up with all the earnestness in his power by the Secretary of the Navy, and Congress under a Democratic administration has responded for the first time by increasing the number of men which we may enlist under the law to a figure which will make it possible to adequately man our fleet.

"Question No. 133, and the last, is rather an unlucky number for Mr. GARDNER. He wants to know if it is not true that in 1915 I reduced the number of ships I asked of Congress from that recommended by the General Board. It is an unlucky question, because it allows me to point out how much nearer I have come to the recommendations of the General Board than Republican Secretaries in the past. It is the Secretary's duty to take the General Board's recommendation, which represents what might be called the ideal number that we need, and, by careful canvass of Congress, find out how many he can actually get and to be careful not to ask for so much more than he can possibly get as to imperil the entire program In 1915 the country was not yet awakened to the necessity of largely increasing its naval establishment. When that time came, this year's appropriation bill shows that your Secretary of the Navy did not fail to recommend a program so extensive, so satisfying in its numbers and the character of its ships as to silence even the most carping critic.

"Mr. GARDNER, in question No. 3, seeks to make out 'that our naval gunnery had degenerated to an inefficiency almost incredible.' Mr. GARDNER and, thanks to his propaganda, all the world knows that, owing to Secretary Meyer's parsimony and lack of conception of the Navy, the elementary target practice was discontinued and that our gunnery practice was discontinued and that our gunnery practice did fall off lamentably. Mr. GARDNER should know it, if he is serious in his investigations, that it has improved immensely since I restored the elementary practice. He must also know that is a question which, from his wording, is an assertion that the American battleship to-day need not be taken seriously by a foreign power, because it is not able to hit an enemy, and that it is not true, but is the absolute reverse of the facts, and that in making such a statement he deliberately invites some nation in the future, weighing the profitableness of war or of peace in its mind, to plunge our country into war through misapprehension of the conditions of our fleet."

III. GARDNER'S REJOINDER, HALLOWELL, ME., AUGUST 29, 1916.

Congressman GARDNER'S speech was as follows:

"It is not much good voting to build a big Navy if you are going to have a Secretary of the Navy who has not the executive ability to push the shipbuilding program to completion. You can not expect our Navy to be properly run if you have a Secretary who elbows out the trained organization of his predecessor to make room for his own coterie of favorite officers. No one knows better than I that many of the naval officers in the department at Washington are splendidly equipped for their positions and admirable officials in every way.

"In Waterville the other night Secretary Daniels publicly asked me a question, to which he is quite welcome to an answer. He asked me why I was a coward for a dozen years in not exposing the weakness of our national defense. He commented on the fact that I admitted that I knew for years of the inefficiency of the National Guard and the National Militia. 'Who or what were you afraid of?' asked the Secretary. I guess it was the loss of votes I was afraid of, Mr. Secretary. Would you not be a little bit scared yourself if you represented a district chock-a-block with national guardsmen and national militiamen?

DANIELS CONFESSES.

"The first four questions which I addressed to Mr. Daniels at West Sullivan were designed for the purpose of proving that at the very time when he reported to Congress in December, 1914, that the Navy was in a state of preparedness and superb efficiency, as a matter of fact, at that very time there was in the department substantial evidence of the incorrectness of his report. You may remember that it was largely Secretary Daniels's report of the preparedness of the Navy which furnished the basis of the arguments in consequence of which all proposals looking toward adequate national defense were rejected by President Wilson and by Congress in the session of 1915. Secretary Daniels now admits that at the very time when he penned the subdivision of his report which was entitled 'Proof of preparedness of the Navy,' he was entirely aware of the fact that the battleship fleet was entirely equipped with obsolete torpedoes, and, furthermore, that he knew that our submarine flotilla was not in condition for actual service. He admits that at that very time he had in his possession the scathing report on our Navy's unpreparedness which had been

presented to him three weeks previously, on November 9, 1914, by his senior naval advisor, Admiral Bradley A. Fiske. He does not deny my statement that the ratings of more than half the battleship fleet in the target practice held in the fall of 1914 were of the lowest grade known to the Navy Department classification and that he knew it when he sent his report to Congress. In lieu of denying my facts, he publishes a rebuke to me for exposing our gunnery figures. This rebuke is written by Capt. C. P. Plunkett, whom Secretary Daniels has put at the head of the Target Practice Bureau. Inasmuch as Secretary Daniels has now announced his intention to abandon this fall the practice of concealment of target-practice scores, I can not understand Capt. Plunkett's position, especially as it is in direct opposition to the views of Capt. W. S. Sims, former chief of the target practice of the Navy, now in command of the superdreadnaught *Nevada*. Capt. Sims, by the way, is the officer whom Secretary Daniels described as 'one of our ablest officers, and probably our best authority on target practice.' On March 10, 1916, Capt. Sims testified strongly in favor of the publication of all target-practice scores. He pointed out that the scores were known to the officers and men of the Navy, and that it was impossible to keep them secret from foreign Governments. He declared that publicity in the matter would be a direct incentive for improvement.

"Here is a quotation from his evidence:

"Speaking of the naval representatives of foreign Governments, Capt. Sims said: 'When those people want information about our target practice, they get it, and there is only one class of people who are really ignorant about these subjects, and that is the American people. We want the truth about it. The Navy is perfectly willing to have the truth published, and take its licking from the press, and let the people know where it stands.' Again, Capt. Sims says at the same hearing, 'Now, as a matter of fact, the target practice of last fall, although 40 per cent better than the fall before, is still unsatisfactory to a very considerable degree. It ought to be doubled.'

DANIELS PLEADS NOLO CONTENDERE.

"Secretary Daniels does not deny that out of 44 vessels authorized during President Wilson's administration he has succeeded in pushing but one to completion. He does not deny that he has 32 unfinished submarines on his hands, of which 6 were authorized by Congress in 1912 or earlier. He does not deny that he has made a three-year contract for the completion of the sengoing submarine *Schley* with the Electric Boat Co., which is the very company that in five months completed for the British Government 10 submarines which actually crossed the Atlantic on their own bottoms. He does not deny that five years were expended in the completion of the superdreadnaughts *Nevada* and *Oklahoma*, which he put into commission for the first time this spring.

"My question No. 6 reads as follows: 'Is it not true that on August 1, 1916, not one single stroke of work had been done on the dreadnaughts *Tennessee* and *California*, the destroyer *Caldwell*, and the submarines *O-1* and *O-2*, although Congress voted to build these vessels over 17 months ago, on March 3, 1915?' To this the Secretary replied, 'It is not true.' He claims that certain shopwork has been done on these vessels which must necessarily be completed before their keels are laid. I based my statement on the official bulletin of the Bureau of Construction and Repair, published August 10, 1916. This bulletin shows the percentage of completion of every vessel authorized for the Navy. Against the names of the *Tennessee*, the *California*, the *Caldwell*, and the submarines *O-1* and *O-2* appears a zero. I have been unofficially told that when the shopwork on a vessel has been finished and assembled that the Bureau of Construction and Repair considers that the vessel is 2 or 3 per cent completed. But there is no use splitting hairs on the matter. I will admit that the bulletin of the Bureau of Construction and Repair may be inexact; but at all events the fact remains that over 17 months have elapsed and the keels of those five vessels are not yet laid.

"As to the machinery which is being constructed for these five ships, I find, by consulting the report of the Chief of the Bureau of Steam Engineering of the Navy Department, that on August 1, 1916, the percentage of machinery completion was as follows: Dreadnaught *Tennessee*, 0 per cent; dreadnaught *California*, 0 per cent; destroyer *Caldwell*, 3 per cent; submarine *O-1*, 1 per cent; submarine *O-2*, 1 per cent.

"I hardly think that anyone would characterize as a marvel of frankness the Secretary's reply to my question about these five vessels.

"The Secretary does not deny that in both of the last two years in the middle of the European war he has actually recommended to Congress that we should cut in two the building program recommended by the General Board of the Navy. He defends his conduct by the claim that in times of profound peace Republican Secretaries of the Navy have done the same or worse than he. That fact I deny. Even if it were true, nevertheless, when the whole world is ablaze it is no defense of the Daniels policy of 'dawdle, dawdle, dawdle,' to say that Republican Secretaries of the Navy were equally remiss when the whole world was at peace and likely to remain so.

"In answer to my charge contained in question No. 10 to the effect that Secretary Daniels was only able to mobilize 15 American battleships for Admiral Fletcher's maneuvers last winter, whereas President Roosevelt mobilized 16 battleships for the trip around the world nine years ago, the Secretary replies:

It is not true that only 15 could be mustered for Admiral Fletcher's maneuvers. Only 15 were used, which is a different thing.

"This will be news for Admiral Fletcher, as it directly contradicts his testimony before the Committee on Naval Affairs March 3, 1916. In answer to certain questions by Congressman KELLEY of Michigan, Admiral Fletcher testified:

There are 19 (battleships) in active commission assigned to the fleet, but 4 of them have short complements, so that leaves only 15 actually operating in the fleet.

"Later on the admiral says:

The shortage of officers and men prevents any more battleships being placed in commission.

"Further answering my questions, the Secretary reiterates the claim which he has made in so many speeches lately that 25 battleships are engaged in maneuvers off our shores. Technically this may be the case; but the newspapers tell us that no less than 12 of these battleships carry only 40 per cent of a full crew of regular officers and men. The fact is that 12 of these battleships instead of being actually mobilized are nothing in the world but training-school ships for the Annapolis midshipmen and the 2,000 civilian rookies about whom we have been reading. This may all be very useful training; but it is fantastic to compare such a primary-school mobilization with the trip of the 16 battleships of the American Navy around the world. The following telegram from Admiral Benson lets the cat out of the bag:

WASHINGTON, D. C., *August 27, 1916.*

Hon. A. P. GARDNER,
*Augusta House, Augusta, Me.:*

In recent maneuvers there were engaged 28 battleships, including flagship of chief umpire. Of these, 12 were operating with reduced complements. Of these 12, 3 had on board midshipmen from Naval Academy and 9 had on board civilians of volunteer-training cruise.
BENSON.

FIVE HUNDRED DOLLARS REWARD.

"I shall now take leave to disregard Secretary Daniels's rebuke concerning my exposure of target-practice scores. I assert that in the recent division target practice the battleship *Nebraska* fired 83 shots and the battleship *Michigan* fired 42 shots without either vessel hitting the screen target a single time. If Secretary Daniels can deny that statement, I will cheerfully give $500 to any charity which he may name.

"Here is the actual score of shots and hits made by the Atlantic battleship fleet in division practice in the spring of 1916:

*Division practice, spring, 1916.*

| Vessels. | Number of shots. | Number of hits. |
|---|---|---|
| Arkansas | 76 | 6 |
| Delaware | 70 | 5 |
| Florida | 70 | 3 |
| Kansas | 76 | 2 |
| Louisiana | 77 | 1 |
| Michigan | 42 | 0 |
| Nebraska | 83 | 0 |
| New Jersey | 79 | 3 |
| New York | 70 | 4 |
| Rhode Island | 84 | 4 |
| South Carolina | 56 | 3 |
| Texas | 70 | 10 |
| Utah | 70 | 7 |
| Wyoming | 84 | 5 |
| | 1,007 | 53 |

"The above figures are compiled from a letter written by Secretary Daniels to the President of the United States Senate on August 18, 1916.

"I notice that the Secretary states that he intends to give the widest publicity to the large practice scores made this fall. The Secretary is a very adroit gentleman. Until this morning there has been no publicity of the target-practice scores made this spring. Let me tell you 'the nigger in the woodpile.' Spring target practice takes place at battle ranges, at from 7 to 9 miles, sometimes a little more, sometimes a little less. Fall target practice, on the other hand, is for the purpose of giving

elementary training, and is held at a range of about 1 mile. It is currently reported that under these easy conditions the big guns of our battleships last fall made about 70 per cent of hits. I have no exact figures, however. The average man, of course, does not realize the difference between elementary practice and battle practice. I do not in the least accuse Mr. Daniels of politics in the matter; but I can readily understand that there would be no loss of votes if just before election he were to publish scores showing that the big guns of the American battleship fleet had made a record of 75 per cent hits, especially if he failed to point out that in the previous spring in actual battle practice these same ships had made only 5 per cent hits.

"I have read an alleged interview with dear old Admiral Dewey at some watering place or other. As a contrast to his present alleged views, I can not refrain from quoting the report which he himself signed as president of the General Board of the Navy as recently as November, 1913. It runs as follows: 'The absence of any definite naval policy on our part, except in the General Board, and the failure of the people, the Congress, and the executive government to recognize the necessity for such a policy has already placed us in a position of inferiority which may lead to war; and this inferiority is progressive and will continue to increase until the necessity for a definite policy is recognized and that policy put into operation.'

"The fact is that the Admiral is a gallant old sailor of some 79 years, and can not be expected always to agree with younger officers like Admiral Winslow, Rear Admiral Fiske, Capt. W. S. Sims, and Commanders Yarnell and Stirling."

---

## The Naval Bill.

### EXTENSION OF REMARKS
OF
### HON. WILLIAM B. OLIVER,
OF ALABAMA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. OLIVER. Mr. Speaker, I am pleased to find that the House conferees have secured some very important changes in the naval bill passed by the Senate.

I consider these changes not only wise but they will result in a large saving to the Public Treasury. The appropriations made by the Senate for the development of certain navy yards which were not included in the House bill have been eliminated. The matter of developing existing yards or establishing new yards has been wisely postponed until after the commission authorized by the House bill makes its report.

A large part of the personnel legislation has been rewritten and some dangerous provisions omitted. It is especially gratifying that the naval regulations were not made a part of the permanent law, as proposed by the Senate bill. While I recognize that these regulations at present are well and wisely drawn and efficiently administered, yet it would be a serious mistake to deprive the Secretary of the Navy of the power to make changes from time to time in these regulations when suggested by constantly recurring changed conditions. To write these regulations into the permanent law would eventually so narrow the scope of the Secretary's power as to make him a mere figurehead in the control and direction of our Navy.

Personally I opposed the provision of the House bill conferring on the Chief of Naval Operations the rank of admiral, and requiring the Secretary to appoint a minimum number of line officers to serve as aids to the Chief of Naval Operations. The conferring of this exalted rank will tend to largely subordinate the different bureau heads, and my fear is that it may disturb, in the course of time, that perfect harmony and cooperation that is now found between the different bureaus.

The number of officers detailed for this service could be safely left to the wise discretion of the Secretary of the Navy. Many members of the House Naval Committee were opposed to this feature of the bill, and if sufficient time could have been secured to properly present it to the House I question its adoption as now written.

These same matters have had the serious consideration not only of former House Naval Committees but also of Congress since 1903, and the verdict always has been adverse to the provisions referred to. I mention this in order that it may serve to make Congress watchful of any evil results or tendencies, so that the same can be speedily checked and corrected. It will be noted in this connection that a very stringent provision was inserted in the Army bill by this Congress to prevent unwarranted interference by the General Staff of the Army with bureau chiefs.

The Senate bill provides for a three-year building program, carrying an appropriation for 8 capital ships the first year and an authorization for 10 additional capital ships during the next succeeding two years.

I recognize that the people of this country are in thorough sympathy with the building of a strong and efficient Navy, and the 16 battleships during the next three years is not an unreasonable building program.

It has been my belief, however, that it would be far better to order at this time the building of only five battle cruisers, as provided for in the original House bill. The imperative need of this type of ship to make efficient the fleet that we now have was recognized by every naval officer who appeared before the House Naval Affairs Committee.

Congress will reconvene in about three months, and further authorizations could be made at that time. This delay will enable us not only to appropriate much useful information that is constantly being learned from the present European conflict, but at the same time might enable us to realize large savings in the construction of these great ships of war.

Shipyards are now crowded with business, labor and materials are difficult to procure at any price, and the profits demanded are abnormally high. The larger the building program, the more independent become the shipbuilders and the more likely are they to insist upon unreasonable profits.

Economy and efficiency, in my judgment, can best be served by pursuing a reasonable building program, at short intervals, in the almost continuous sessions of Congress, as now held, and this can be accomplished without danger to the public welfare. These are my own individual views, but I recognize that the large majority of the Members of the House are of the opinion that it will be impossible to have the Senate recede from the continuous building program proposed, and that the recommendation of the conferees should now be adopted.

Civilization is to-day in the midst of the most terrible crisis of modern history. Two-thirds of the world is at war. Nearly 10,000,000 men have already been killed or wounded. It has required the utmost skill on the part of the President to keep the United States from being drawn into this welter of blood. But for him American boys would be dying daily by the thousand in the trenches of Europe. He, as the Commander in Chief of the Army and Navy, now strongly urges the immediate passage of the bill recommended by the conference committee, and my faith in his counsel and judgment is so strong that I am willing to yield my individual views and vote in favor of the bill as reported, recognizing that the material difference between us is in the plan and method of increasing the strength and efficiency of the Navy.

While the bill carries heavy expenditures, yet this Democratic Congress has largely provided the additional revenue to meet such expenses by a tax on munitions of war and by an inheritance and increased income tax. Wealth is thus compelled to bear its just part of the burden.

It is fortunate that the large appropriations now carried will be expended under the careful supervision of the present efficient Secretary of the Navy, whose insistence on competitive bids for armor plate will save to the Federal Treasury in this one item alone the enormous sum of at least three and a half millions of dollars in the building of the ships authorized by this bill.

The personal interest shown by the present Secretary in the welfare of the enlisted man by providing vocational training and other educational advantages and by creating many opportunities for promotion has made it comparatively easy to secure enlistments, and I do not anticipate that serious trouble will be encountered in readily providing for the large increase in personnel carried by the present bill.

I desire to make this observation in reference to the ships authorized in this bill, the building of which will be postponed until necessary appropriations are hereafter made by Congress. The small type of coast submarines should be abandoned, and only the larger type recommended by Admiral Grant and by other naval officers should be appropriated for. If the best expert information of our naval officers is to be followed, we will likewise provide that of the 8 capital ships to be hereafter built at least 6 should be of the battle-cruiser type. This would give to our navy 10 battle cruisers when the present program of 16 capital ships is complete and would materially add to the balance and efficiency of our fleet.

The absolute necessity for this type of ship has been clearly demonstrated in the recent naval maneuvers off the Atlantic

coast. Such type of ship can and must be relied on to supply first and timely information of the approaching foe and are absolutely indispensable in providing effective plans for meeting an enemy fleet on advantageous terms. Some have expressed doubt as to the value and efficiency of the battle cruiser on account of the loss of a number of this type in the recent naval engagement off Jutland Bank. I will append at the conclusion of my remarks copies of letters from Capt. William S. Sims, of our Navy, in reference to this engagement, and in which he clearly discusses and emphasizes the importance of building this type of ship for our Navy, and disposes satisfactorily of the apprehension that some have felt because of the Jutland engagement. It is needless for me to state that Capt. Sims is universally recognized as one of the most capable officers of our Navy.

In concluding I desire to say that the present Navy bill is a peace as well as a war measure.

The peace provisions authorize the President at the close of the war in Europe to invite all the important Governments of the world to send representatives to an international peace conference to consider the establishment of an international court on some practical and acceptable basis that will insure peace and seek to put an end to war. A large appropriation is made to carry out this plan.

This bill makes us the unquestioned second naval power in the world, and we can appropriately propose a limitation in armament and prove our good faith by suspending all further expenditures as authorized in this bill when assured of the success of the plan proposed.

This is rational pacifism, which considers the national safety and world welfare at the same time. Let us hope that it is indeed a measure looking to permanent peace.

The letters from Capt. Sims referred to previously are here set out:

U. S. S. "NEVADA," *At Sea, July 12, 1916.*

MY DEAR MR. OLIVER: Your letter of July 8 just received. The delay was due to the fleet being at sea engaged in maneuvers.

The Secretary's telegram, asking whether the incidents of the battle of Jutland Bank had changed my opinion as to the necessity for battle cruisers to strengthen our Navy, reached me on the 8th, and I sent my reply on the same day. I inclose a copy herewith. I hope you will find it sufficiently full and complete for your purpose.

You will see that I agree with you that the popular arguments in favor of battleships and against battle cruisers that have arisen since the North Sea fight are not justified; and I am naturally gratified that these arguments have not been able to shake your faith in the statements made upon this subject before the House Naval Committee by various officers.

In my letter to the Secretary I might have invited attention to the peculiar quality of battle cruisers to which I referred in my hearing, namely, their ability in chasing commerce from the seas wherever they are more powerful in the aggregate than the enemy's vessels of a similar type.

This may be made clear by the following illustrations:

Great Britain's control of the sea is due to the possession of certain types (and numbers) of vessels which enable her to accomplish two functions which are wholly essential to her success in this war. These are:

1. Prevention of invasion by means of a battleship force so superior to that of the battleship force of her enemy that the latter can not attempt to convoy an army of invasion with any reasonable chance of success.

2. Protection of commerce by means of a battle cruiser force so superior to that of the battle cruiser force of her enemy that the latter can not take the sea for the destruction of British commerce with any reasonable chance of escaping destruction by the superior similar British force. Of course they could do considerable damage before they were caught, but they would soon be destroyed.

The point is that her superior force of battleships prevents invasion and her superior force of battle cruisers prevents the destruction of her commerce—the cutting off of her essential supplies.

It follows also, as a natural consequence, that the possession of a fleet of this character enables Great Britain to deprive her enemy of the use of the sea, to blockade her coasts, to transport great armies to distant points, etc.

To put the extreme case, suppose Great Britain had built no battle cruisers but had spent their cost in extra battleships. Neither this great force, nor a force of battleships twice as great, could have prevented the German battle cruisers taking the sea and interrupting the enemy's commerce, simply because Great Britain would have had no types (and numbers) of vessels fast enough to overtake them and at the same time powerful enough to destroy them.

Similarly, also putting the extreme case, suppose that Great Britain had built all battle cruisers and no battleships. The result would have been that the relatively more powerful German battleships, even though inferior in numbers, would have had control of the sea, at least in so far as concerned Germany's ability to send her battle fleet where she pleased and convoy her troops. The British fleet, being composed of nothing more powerful (in offensive and defensive qualities) than battle cruisers, could not successfully oppose her. On the other hand, Germany would not have the freedom of the seas for her commerce, because she would have nothing fast enough to catch the British battle cruisers.

The object is only one illustration of the fact that different types of vessels are designed to accomplish different objects. The nation that has not the requisite types in sufficient numbers can not expect to accomplish these objects.

In my hearing I tried to make clear the other objects for which battle cruisers are designed, such as scouting, screening, supporting torpedo attacks, enfilading the battle column as a "fast wing," etc., all of which require the peculiar qualities of these vessels; that is, greater gun power and protection than any other vessels except battleships, and speed enough to avoid battleships or fight them at a range of their own choosing.

Similar illustrations could be given to show the necessity for certain other types of war craft, such as scout cruisers, destroyers, mine layers, submarines, sweepers, etc.

Surely the opinions of the class of men who would have to handle a nation's naval forces in battle should be conclusive as to the types and relative numbers of each that are necessary to maintain that nation's policies against its probable enemies.

But I hope that never again will the committees of Congress try to reach a decision upon such a very complicated technical question by calling before it individually a large number of officers of different corps, specialties, ages, nautical experience, and professional information, but that instead they will cause to be convened a conference composed of experienced men who adequately represent each one of the specialties that must be given due weight in reaching a sound conclusion.

Very sincerely, yours,

WM. S. SIMS,
*Captain, United States Navy.*

Hon. WM. B. OLIVER,

---

U. S. S. "NEVADA."
*Newport, R. I., July 8, 1916.*

From: Capt. William S. Sims, U. S. Navy.
To: Secretary of the Navy.
Subject: Supplementary statement concerning battle off Jutland Bank.

1. Receipt is acknowledged of the department's telegram of this date, as follows:

"U. S. S. 'NEVADA,' FOR CAPT. SIMS:

"In view result of battle off Jutland Bank and Jellico report, House Naval Committee desires additional written statement immediately your testimony already given before it, modifying or confirming.

"DANIELS."

2. I do not desire to modify my statement in any respect in regard to types of vessels recommended in my hearing as most needed at the present time to strengthen our fleet.

3. I have read carefully the American press accounts of the action; also a considerable number of clippings received from England, which give a much fuller account. The latter includes two comprehensive articles published in Land and Water, by Pollen, the well-known naval critic.

4. I consider all these accounts distinctly on the defensive—as attempts to justify the attack of a superior force (German battleships) by a greatly inferior force (British battle cruisers). As Mr. Pollen indicates, the accounts are published under control of the censor. For example, the admiralty permitted Mr. Pollen to make certain purely negative statements concerning the causes of the sinking of the battle cruisers, but declines for the present to publish the real cause. This is a common procedure while war is in progress. For the same reason—that is, to avoid the loss of prestige—even radical mistakes in tactics may be defended.

5. For the above reasons it may be quite possible that certain essential features of this battle are being suppressed, these reasons being both military and political.

6. In view of this possible, and even probable, condition any opinions regarding the action should be considered only with extreme reservation.

7. This reservation being clearly understood, the following comments are submitted, based only upon the known essential facts:

(a) Referring to Mr. Pollen's article, and particularly to the diagram illustrating the relative positions of the British main body and battle cruisers and the German main body and their battle cruisers at the time sight contact was first made between the battle cruisers of the two sides, it will be noted that the situation was typical of that considered most probable, in our war games on the sea and on the game board, in the opening phases of a sea battle between large forces.

(b) Assuming the above forces in the relative positions indicated, and considering the marked superiority of the British in numbers of all the different types, and assuming the British force to have executed the, under the circumstances, very simple maneuvers necessary to concentrate their forces and strike with all of their power, there can be no possible doubt as to what the result would have been. Considering the great superiority of the British both in numbers and in power, one of two things must have happened:

(1) Either the German main fleet would have been decisively defeated or

(2) It would have declined decisive action by retreating behind its defenses; and even the latter would have inflicted upon the Germans a humiliation impossible to conceal, much less to claim as a victory for the encouragement of their people. The latter, forcing the German fleet to retreat before a concentrated superior force, could have been accomplished with little or no material loss; and if the Germans had elected to fight a decisive action, there could be no doubt that both their proportionate and actual losses would have been vastly greater than those of the British. Also, in either case, the various types of vessels, including battle cruisers, would have been employed to the best advantage in the legitiamte rôles for which they were designed.

(c) The contention of British writers that the sacrifice of the battle-cruiser squadron in fighting a delaying action against battleships late in the afternoon was justified in the hope of bringing on a general action between the main fleets is not believed to be sound, and this for the simple reason that the military situation did not require the British fleet to fight a decisive action or any action at all, because they already had practically as complete control of the sea as would have resulted from the defeat of the enemy fleet. Control of the sea is accomplished when the enemy's fleet is defeated or "contained"; and the German fleet has been contained since the beginning of the war, is now contained, and doubtless will remain so.

(d) There is no reason to believe that the Germans have ever intended to risk their fleet in a decisive action against the greatly superior British fleet. They are not in the habit of pitting any military force against twice its numbers of at least equally powerful units. There is, on the contrary, every reason to believe that the Germans knew exactly what they intended to do during this last sortie of the grand fleet, and it is a reasonable presumption that they accomplished what they intended, namely, the trapping and pounding of the British battle cruisers before they could be supported by the British main body.

(e) The surprise to naval critics, and doubtless to the Germans, was the extraordinary resistance battle cruisers can sustain and the extraordinary amount of damage they can inflict, even against battleships. This indicates a greatly enhanced value when they are employed in their proper rôle in a general naval engagement; that is, with their enfilading fire as fast wings, their driving power on the scouting line, their support of destroyer attacks, etc.

(f) That the British attacked battleships with battle cruisers and armored cruisers is their own affair. They doubtless had what they considered sufficient reasons for doing so, but we may rest assured that this was done with full knowledge of the probable nature of the sacrifice, and not with the idea that these vessels are a match for battleships; and if the conditions as to visibility had been better, the sacrifice might well have been justified by success in engaging with the German main fleet. At all events, battle cruisers have proved that in case of necessity they can fight a delaying action against battleships with reasonable chances of success.

(g) There is nothing, however, in the incidents of the fight to justify any argument against the necessity for battle cruisers. When for any reason they are deliberately put against battleships, they must expect to suffer in proportion to the relatively small number of their guns and the relative lightness of their armor. It is the same with all other types of vessels. If in this battle it had been considered necessary to launch flotillas of unsupported destroyers against the enemy's battleships in daylight, and half of them had been destroyed, there would doubtless have been some arguments in opposition to building any more destroyers—and these arguments would have been precisely as sound as the popular arguments now current as a result of the sinking of three British battle cruisers.

(h) Beyond the demonstration of the unexpected resistance of battle cruisers, the incidents of the action in question have no bearing upon the arguments advanced in my hearing as to the immediate necessity of the addition of battle cruisers to the United States Navy in its present condition. That the battleship must constitute the main strength of a naval force admits of no doubt; but, as I attempted to show by my testimony, an adequate force of battle cruisers is necessary in order that the battleships may be used against an enemy with their maximum power. This is particularly true of the situation that would confront us in case of the necessity of repelling the attack of an enemy fleet against our coast.

WM. S. SIMS.

## Invalid Pensions.

# SPEECH

OF

# HON. MICHAEL K. REILLY,

OF WISCONSIN,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, June 17, 1916.*

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H. R. 15775) making appropriations for the payment of invalid pensions of the United States for the fiscal year ending June 30, 1917, and for other purposes.

Mr. REILLY. Mr. Chairman, it pleased me very much to hear the gentleman from South Carolina [Mr. RAGSDALE] who has just addressed the House, and who represents on this floor a southern constituency—a constituency that lost in that great contest between the States—make the statement that, in his judgment, the men who went out to fight for the Union should receive just compensation for their services and that he was willing that in their old age these soldiers of the Republic should receive adequate pensions.

The sentiment expressed by the gentleman from South Carolina is typical, I believe, of the sentiment that prevails throughout the Southland to-day. While the South lost in that great struggle, the overwhelming mass of the sons and daughters of the Dixie land to-day are glad that the South did lose and that the Union was preserved.

The pending bill carries $158,000,000 for pensions, about $9,000,000 less than was carried in the bill passed last year.

This decrease in the amount appropriated for pensions does not mean that the Government is getting less liberal with the old soldiers, but it unfortunately does mean that there is an increasing number of veterans of our wars who are yearly answering their last roll call and joining the army of the unnumbered dead.

June 30, 1915, there were 748,147 names on the United States war-pension roll, and of this number survivors of the Civil War numbered 347,081. At the same date there were 54,131 Civil War widows, 28,912 Spanish War pensioners, 134 pensioners of the War of 1812, and 19,730 Regular Army pensioners.

In 1902 the war-pension roll of the United States reached the high-water mark when it carried 999,436 names. In that year there was paid out in pensions $141,335,000. In 1913 the high point for pension appropriations was reached when the sum of $176,714,000 was paid for pensions and the expenses of operating the Pension Bureau.

The records show that the number of pensioners are decreasing at the rate of about 35,000 a year. The Civil War veterans are passing away at the rate of about 25,000 a year and the widows of Civil War veterans at the rate of about 3,000 a year.

It will undoubtedly be a matter of surprise to many to learn that 50 years after the close of the great Civil War there are still left about 350,000 of the men who participated in that great contest. The fact of the matter is the Civil War was fought by young men, more than one-half of whom were below 20 years of age.

The fact that 350,000 of the men who participated in the great strife between the States still survive, many of them in vigorous health, engaged in various lines of activity, is a wonderful tribute to the physical stamina of the men who made up the victorious Army of the Blue.

This House recently passed a bill granting pensions to widows of Spanish War veterans, at the rate of $12 a month and $2 a month for each child under 16 years of age.

As the law now stands the widows of Spanish War veterans can not secure pensions unless they are able to prove that the death of their husbands was the result of disease and disability contracted in the service. This is a discrimination against widows of Spanish War soldiers and sailors, because, under the existing laws, widows of Civil War soldiers and sailors can secure pensions regardless of the cause of the death of their husbands. It is right and proper that both Civil War and Spanish War widows should be put on the same footing as regard pensions.

There is now on the calendar of this House a bill known as the Civil War widows' pension bill. This measure comes to the House with the unanimous report of the committee, and I understand it will be shortly taken up for consideration. This bill has much merit and should be passed by the House without a dissenting vote.

Under the present law, a widow of a Civil War veteran is entitled to a pension of only $12 a month, providing she married the soldier prior to June 27, 1890.

Widows of Civil War veterans did not receive any pension until 1890, 25 years after the close of the war, and then the pension granted was only $8 a month, which was increased to $12 in 1908. The proposed widows' pension law will grant pensions of $20 a month to Civil War widows who have reached or may hereafter reach the age of 70 years, and who are already on the pension roll or who may hereafter be placed on. This bill also raises the marriage limit 15 years from June 27, 1890, to June 27, 1905, so any widow who married a soldier prior to 1905 will be entitled to a pension of $12 a month. Heretofore such widows would not be entitled to any pension.

All pensions granted by this bill are to date from the filing of the application, no back pensions will be allowed.

This bill restores to the pension roll all widows of Civil War veterans who were dropped from the pension roll by reason of their remarriage, or who have been divorced upon their own application.

This provision is manifestly just because there can be no reason why the widow of a soldier who remarries should lose her pensionable status upon the death of her second husband. By remarrying, she relieves the Government of liability for her pension, thereby showing a disposition to place herself in the position where she would not need the support of the Government during the period of her second marriage, and the Government is thereby the gainer. It is certainly just and equitable that when the remarried widow of a soldier is deprived of the support of her second husband through death, that the Government should step in again and take up its responsibility.

The Government of the United States has been liberal in its treatment of its soldiers. Almost $5,000,000,000 has been spent since the birth of the Republic in pensions to soldiers and their dependent ones. No other country in ancient or modern times has done so much for the men who in the hour of need went forth to do and to die for their country.

While it is true that during the present administration many millions more have been appropriated for pensions than in any previous administration, I do not believe that the people begrudge money expended in this way. The belief is general that the men who served their country in time of peril are deserving of generous treatment at the hands of the Government served.

It has always been a pleasure for me during my short service in this House to give my vote and support to legislation designed to make more happy and comfortable the declining years of the men who have fought the battles of our country. I have always felt it a privilege to do all I could in the way of helping the veterans and their dependent ones to secure the full benefit of all pension legislation.

While I believe the General Government has been reasonably liberal, in recent years, at least, in its treatment of our soldiers and their widows and dependent ones, I do not believe that Congress has gone any further along the lines of pension legis-

lation than a decent appreciation of the sacrifices made by these men would justify. The men who at the call of country severed the fondest ties of life, willingly giving up all worth living for, in order to go forth to fight and die, if necessary, in defense of their country and their country's flag are worthy of most generous treatment at the hands of the country that they so patriotically served in the hour of need.

## "Strike of the National Guard."

### EXTENSION OF REMARKS

OF

### HON. J. HAMPTON MOORE,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. MOORE of Pennsylvania. Mr. Speaker, it is now generally admitted by all parties that the President of the United States is very clever in politics. He has rather justified the hitherto rejected theory that "a man may rise above his party," for we have it, in numerous speeches from the Democratic side of the House, that Mr. Wilson is another Thomas Jefferson, who has all of the characteristics of Andrew Jackson, combined with the fine patriotic instincts and homely attributes of Abraham Lincoln. It is not contended that Mr. Wilson is another Grover Cleveland, although Grover Cleveland has usually held high place in Democratic councils; and it is flatly denied that James Buchanan, who was the first Democratic President to issue Government bonds (Grover Cleveland being second), has anything in common with Mr. Wilson, except that in due course Mr. Wilson will be called upon to issue Government bonds to make up for the financial delinquencies of his administration. We have it also from the newspapers this morning that Mr. Wilson's speech of acceptance at Shadow Lawn in favor of a second term for President—despite the Democratic platform of 1912 in favor of one term—will be sent out to the tune of 2,000,000 to convince the voters of the country that what Mr. Wilson said at Shadow Lawn—that platform pledges were made to be kept—was not intended to apply to the one-term proposition. As our Socialistic Member from New York [Mr. LONDON] frankly stated in his defense of the Wilson administration on the strike question on Tuesday last, "the President has such a powerful grip upon his party that whenever he sneezes the Democrats wipe their noses," although it does not so appear in the CONGRESSIONAL RECORD.

WILSON BIGGER THAN HIS PARTY.

When "a man rises above his party" he can do many things which humiliate his party, since, if his party is a "sneezing party" it must follow "the man above" whether it is humiliated or not. The Democratic Party thus far has given ample proof of its capacity to "sneeze" when the President takes snuff. It almost sneezed its head off at the copious doses of snuff he administered in the matter of the Baltimore platform. It sneezed on the Panama Canal tolls question. It sneezed on extravagance and went the Republican Party one better on its ability to create offices for "deserving Democrats"; it sneezed on the high cost of living promise since the cost of living has gone higher ever since Mr. Wilson came into power. It not only sneezed but it gagged on the tariff commission question, which it had traditionally repudiated. It gagged on the recognition of Carranza and lost 102,000 votes to an anti-Wilson candidate for Senator in Texas on that account. It took snuff, sneezed and gagged again on the armed merchantmen controversy, being first for the McLemore resolution and then against it. It swallowed the eight-hour antiarbitration gag of the President in the recent strike controversy, notwithstanding that an accounting must be made to the farmers of the country and, above all, to the cotton planters of the Southern States, where an eight-hour proposition, such as is now demanded for industrial establishments, would defeat any candidate who advocated it. But, as heretofore observed, the President "has risen above his party," and the only thing left for that party to do is to change its attitude on public questions as rapidly as does "the man higher up." It is humiliating to many of the old-line Democrats who have an appreciation of the word "consistency," but "old-line Democrats" are not given much of a chance to keep their poise, or their consciences, while these spectacular and kaleidoscopic political gyrations are disturbing the body politic.

MEXICO WILL NOT DOWN.

Yes, Mr. Speaker, the President is as clever a politician as we have seen in our time. Those who would satisfy their estimate of his ability by classifying him as "schoolmaster," "rhetorician," or "literateur" would do well to revise their estimates before this campaign is over. The cards have not all been laid on the table. The passage of the so-called eight-hour law, with all its sensational trimmings, was not the last act in the political drama of 1916. There are many other problems confronting the Democratic Party which must be met before the campaign is over. Do not forget that the National Guard is still down along the Mexican border blistering upon the hot sands of Texas. Members of Congress are in constant receipt of letters from the front asking why the guard is still kept there with nothing to do. Rumors of discontent because of this state of inactivity are percolating throughout the households of the United States, for every city and hamlet is more or less interested in knowing why these volunteers, who wanted to do their country a service, are being kept at the front at great inconvenience to themselves and at considerable public expense. The wonderment has not ceased since an agreement was reached between the President and Carranza to establish a joint commission to bring about a lasting peace, much of which, we are told, will depend upon the amount of money we shall pay for the damage "done to Mexican dignity" by our "assault upon Carrizal."

The whole Mexican situation is still a nightmare to the President and his party, as was evinced by his reference to it in his Shadow Lawn acceptance, the weakest and most involved explanation of a trying situation that has yet eminated from this distinguished writer.

If, then, the National Guard is to be an issue, how is that issue to be met? Folks are clamoring for the return of the soldier boys because their stay upon the border seems to be useless. That the administration is alive to this situation may be accepted as a fact, since "the return of Villa" to destroy the United States is now momentarily expected along the frontier. We had been informed from time to time, through Funston and Pershing and also from sources close to Carranza, that the war was over and that Villa had been destroyed. Possibly these rumors came along too soon, for now, when the National Guard is restive and the people are wondering why it is not returned to the States, the active press agents of the administration reproduce the Villa scare, and thus cover, temporarily at least, that end of a trying situation.

SOLDIERS BEING EXCUSED.

I am induced to make these remarks this morning because of the apparent juggling of the National Guard, the seeming use of this great military organization for purposes not yet disclosed by the administration or the War Department. Is the National Guard growing tired and inquisitive? Here is an article from the Sunday Star, Washington, August 27 last, which throws some light upon this situation. I commend it to those who are trying to understand, as I believe the War Department also is trying to understand, why the National Guard situation is as it is:

TIRED OF BORDER SERVICE—BOTH OFFICERS AND ENLISTED MEN SEEK RELEASE FROM DUTY.

That service on the Mexican border under existing conditions is becoming irksome is indicated by the large number of applications received at the War Department from officers and enlisted men of the Organized Militia for relief from further service. Most of these applications are based on representations that the men are tired of the routine of military life on a peace basis and can not afford the financial sacrifice involved in the neglect of private business. Applications come not only from enlisted men receiving small pay, but from large numbers of commissioned officers.

Some of the applications have been granted, as is shown by the fact that the President to-day accepted the resignations of 20 militia officers, to take effect at once.

MEN ON THE GROUND WONDER.

But, Mr. Speaker, we do not have to depend wholly upon newspaper reports in Washington for our information about the guard. We are all receiving plenty of information direct. Listen for a moment to what one of the men upon the ground has to say about it:

We are wondering why the administration is charging the country with the expense of transporting some thousands of additional troops from their mobilization camps to the border, when the troops now along the line seem abundant for any sudden emergency that could arise before the present forces on the frontier could be augmented. Moreover, the probable early withdrawal of Pershing's expedition will itself constitute a considerable increase of troops in this locality. The cost of maintaining the troops in their mobilization camps is heavy, but that may be necessary for some reasons of state about which we have no knowledge. But transportation of troops for upwards of 2,000 miles is very expensive, and the urgent immediate necessity is not apparent.

RELEASING COLLEGE BOYS; HOLDING OTHERS.

If that is not sufficient, listen to what sounds like a matter of favoritism in the release of one class of soldiers and the retention of others with greater home responsibilities:

Another matter of administration policy that is incomprehensible is the order for the discharge of students of schools and colleges. There is probably no group of men now in service whose retention would involve less personal loss, sacrifice, or even inconvenience. It seems absurd to encourage applications for discharge from young men who have no family, business, or professional obligations, while many other enlisted men are retained in service at serious loss to themselves, their families, and business associates. The latter, with remarkable unanimity, are serving willingly, without complaint, and will remain in service cheerfully if any necessity exists. But the prospective release of a large number of students advertises the fact that there is no longer serious need for troops here, and great discontent arises because students (who, at the worst, will only be delayed in the completion of their courses for a short period) are regarded as a preferred class.

BUSINESS MEN AND WORKERS AT DISADVANTAGE.

I would not want to stop with this statement, but feel that it may help us to understand a little better by continuing further this quotation:

It is a common opinion that the educational institutions are not offering to do their full duty in the matter of national preparedness. Instead of urging the return of their students, they should hasten to give public assurance that none of the latter would suffer any disadvantage in collegiate standing, or financially for tuition or other fees, by reason of this absence. At whatever inconvenience to the instructor or the normal routine these students should be enabled to complete their courses by only so much additional attendance as would equal the period of their absence on military duty.

Many of our leading college presidents have been active in the propaganda for national preparedness; now is the time for them to do their share, just as most of the railroads and the large industrial, commercial, and financial institutions are doing theirs.

IS THE GUARD STILL NEEDED?

Whether the National Guard is still needed along the Mexican border is certainly now a debatable question. The colleges are beginning to open, and if the college boys are to come back because they are not needed on the frontier, it might be well for others to come back for the maintenance of whose families left in distress numerous communities are now paying liberally. As to this phase of the subject I quote from another writer of the guard, who is wondering:

It should be remembered that if the policy of universal military service should be adopted, as advocated by many educators, very many more students would be called to the colors in a general mobilization such as the present one than are now on duty.

Briefly, if there is any need of our presence here, students, instructors, schools, and colleges should participate at least equally with all other classes and institutions in providing an effective force. If the need does not exist, all should be returned to duties and obligations for which they are needed, and the Government saved a continuance of the vast expense.

HOW TO AVOID THE GUARD ISSUE.

The Democratic leader in this campaign has been so adroit in other matters that it must not be taken for granted that the National Guard as an issue will be overlooked. Soldiers themselves may inveigh against the power at Washington that keeps them chafing in the Texas heat, and the folks at home may carp and criticize as they please, the keen political mind that conceived "the eight-hour makeshift" to save the country from the calamity of a national strike that would deprive even "the babies of their milk" will not be found wanting when the new crisis comes. Why is the National Guard being kept along the border? Well, for one thing, Villa is again "menacing" the United States and we are in very great danger of capture (?). Of course, we must protect ourselves against Villa if every arm of the Government must be brought into the service.

Who are the National Guardsmen, anyway? Do they come within the purview of the eight-hour law? Do they bear any relation to this "involuntary servitude" we have been hearing so much about? Are they not subject to contractual relations, and must they not "stand where put" in all kinds of weather and on any kind of food, so long as the administration desires? Is it not true that these men "swore in" for the Federal service, and that they are not subject to that "freedom" of obligation which holds in the industrial world? These are matters to be considered as "point No. 1."

WHEN THE GUARD COMES MARCHING BACK.

But "point No. 2"! Is it not possible that instead of being an incubus in this campaign the guard may prove a political asset? Think that over for a while. The President spoke of the "humanitarian" side of the railway-strike problem and abhorred the "involuntary servitude" side of it. Suppose the President goes to Texas, as it is reported he intends to do, and preaches "the new freedom" and "humanitarianism" to the National Guard; will not they appreciate it? Suppose the Stars and Stripes are unfurled and the heroes of the frontier march in review before the man "who is bigger than his party." What will the effect be? Speeches on Abraham Lincoln, speeches to the dissenting woman suffragists, speeches to the railway magnates on the necessity for higher freight rates and to the railway employees for higher wages will pale into insignificance when the band strikes up "America" under these happy auspices. Does the picture jar you? Is the great Democratic leadership incapable of such a coup d'état? Why, Mr. Speaker, me thinks I can hear the cheers and see the flags wave, even at this great distance, as the cry goes echoing throughout the land, "Hurrah, hurrah! The boys are coming home!"

And as these sturdy veterans, tired, homesick, and weary of "watchful waiting" on the frontier, come trooping along Pennsylvania Avenue to be reviewed by the President—just before election—Mr. Speaker, we can hear the 30,000 new officeholders of the Wilson administration and the tens of thousands of hopeful holdovers, with one mighty voice, exclaim: "Some politics that, boys; some politics."

## World Peace.

### EXTENSION OF REMARKS
OF
### HON. DAVID A. HOLLINGSWORTH,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. HOLLINGSWORTH. Mr. Speaker, I desire to submit a few thoughts on universal peace. Permanent peace in the world, safeguarded by the common interests of mankind and international organizations strong enough to enforce universal justice on the one hand, or resultant world-wide chaos and war's desolation on the other, must soon follow the close of the European conflict, now plainly approaching a crisis.

Exhaustion, starvation, or the superior force of one or the other group of belligerents must soon cause a cessation of the strife.

The end draws near, and with it comes the certainty that America will be looked to as leader in the upbuilding processes of civilization, and it should be prepared for tremendous eventualities.

Preparation therefore for peace is more essential to American interests than excessive Army and Navy preparations for war. Economic and humanitarian problems in a world of exhausted and wrecked commonwealths must inevitably rise superior to thoughts either of war or commercial rivalries. Isolation is no longer possible with any nation. America, world-renowned for the justness of its conceptions, has outgrown any fear of foreign entanglements. The simplicity and ideals of the Washington era are impossible in the twentieth century; the world must be recognized as a friendly field of common endeavor for all nations, all creeds, and all conditions of mankind. A better day dawns, notwithstanding the horrors and tragedies of the present. Even the longed-for universal brotherhood of man may rise out of the gloom and savagery of despair now settling down on half the world. Truth crushed to earth is said by the poet to rise again.

In this connection, Mr. Speaker, my thought is to call attention to the propaganda now under way by what is known as the League to Enforce Peace, officered by such men as ex-President Taft, Alton B. Parker, and others of much prominence in the public life of both continents.

These officials have furnished me with a copy of the league's four foundation proposals and excerpts from the expressed views of its most distinguished members, which I am glad here to incorporate as part of my remarks.

They are words of wisdom, and, like the shots fired at Lexington and Concord, destined to be heard around the world:

WHAT PUBLIC MEN SAY ABOUT THE LEAGUE TO ENFORCE PEACE.

PUBLIC RIGHT TAKES PRECEDENCE.

[By President Wilson.]

Only when the great nations of the world have reached some sort of agreement as to what they hold to be fundamental to their common interest, and as to some feasible method of acting in concert when any nation or group of nations seeks to disturb those fundamental things can we feel that civilization is at last in a way of justifying its existence and claiming to be finally established. * * * Repeated utterances of the leading statesmen of most of the great nations now engaged in war have made it plain that their thought has come to this, that the principle of public right must henceforth take precedence over the individual interests of particular nations, and that the nations of the world must in some way band themselves together to see that right prevails as against any sort of selfish aggression. * * * The nations of the world have become each other's neighbors. It is to their interest that they should understand each other. In order that they may understand each other it is imperative that they should agree to cooperate in a common cause, and that they should so act that the guiding principle

of that common cause shall be even-handed and impartial justice. * * * I am sure that I speak the mind and wish of America when I say that the United States is willing to become a partner in any feasible association of nations formed in order to realize these objects and make them secure against violation.

—

COOPERATION TO LIMIT ARMAMENTS.

[By Charles E. Hughes.]

If the conflict of national interests is not to be brought to the final test of force, there must be a development of international organization in order to provide international justice and to safeguard so far as practicable the peace of the world.

Arbitration treaties are useful within their proper sphere, but it is worse than folly to ignore the limitations of this remedy or to regard such treaties as an adequate means of preventing war. There should be an international tribunal to decide controversies susceptible of judicial determination * * * We need conferences of the nations to formulate international rules, to establish principles, to modify and extend international law so as to adapt it to new conditions, to remove causes of international differences. We need to develop the instrumentalities of conciliation. And behind this international organization, if it is to be effective, must be the cooperation of the nations to prevent resort to hostilities before the appropriate agencies of peaceful settlement have been utilized. If the peace of the world is to be maintained, it must be through the preventive power of a common purpose. * * * And it is only through international cooperation giving a reasonable assurance of peace that we may hope for the limitation of armaments. We, in this country, can, and should, maintain our fortunate freedom from entanglements with interests and policies which do not concern us. But there is no national isolation in the world of the twentieth century.

—

BUSINESS FAVORS THE LEAGUE.

[By R. G. Rhett, president of the Chamber of Commerce of the United States.]

The Chamber of Commerce of the United States has in its membership 350,000 business men, firms, and corporations, in which every State in the Union is represented. When they speak with the two-thirds majority required by the constitution of the chamber, there can be no doubt that they voice the sentiments of the business men of the country. * * * In November, 1915, the board of directors of the national chamber sent out a referendum on the subject of the proposals of the League to Enforce Peace. In response to that referendum over 96 per cent of the vote was in favor of the proposition that the United States take the initiative in securing conferences for the purpose of establishing rules for the better protection of life and property at sea; to be followed by successive conferences for the adoption of amendments to meet changed conditions. By practically the same majority the membership voted to approve of the proposition that this country take the initiative in forming a league of nations, which shall agree to submit justiciable questions arising between any of its members to an international court, and nonjusticiable questions to a council of conciliation for their respective decision or recommendation, before resorting to war. * * * Whatever business men can contribute toward the success of the purposes which the league has in mind I feel sure that they will be willing to contribute cheerfully and generously.

—

AMERICA MAY AVERT DISASTER.

[By W. H. Taft, president of the League to Enforce Peace.]

Contrast our present world relations with those which we had in Washington's time. It would seem clear that the conditions have so changed as to justify a seeming departure from advice directed to such a different state of things. One may reasonably question whether the United States by uniting with the other great powers to prevent the recurrence of a future world war may not risk less in assuming the obligations of a member of the league than by refusing to become such a member in view of her world-wide interests. But even if the risk of war to the United States would be greater by entering the league than by staying out of it, does not the United States have a duty as a member of the family of nations to do its part and run its necessary risk to make less probable the coming of such another war and such another disaster to the American race?

We are the richest Nation in the world, and in the sense of what we could do were we to make reasonable preparation, we are the most powerful Nation in the world. We have been showered with good fortune. Our people have enjoyed a happiness known to no other people. Does not this impose upon us a sacred duty to join the other nations of the world in a fraternal spirit and with a willingness to make sacrifice if we can promote the general welfare of men?

At the close of this war the governments and the people of the belligerent countries, under the enormous burdens and suffering from the great losses of the war, will be in a condition of mind to accept and promote such a plan for the enforcement of future peace.

—

PEACE MUST BE BACKED WITH FORCE.

[By HENRY CABOT LODGE, United States Senator from Massachusetts.]

The United States has led the world in the matter of arbitration. From the day of the Jay treaty of 1794 and the Pinckney treaty of 1795 down to 1912, 84 arbitration treaties had been negotiated by the Executive of the United States, 83 had been ratified by the Senate, and only 1, the treaty of 1897 with England, rejected. I think that is a remarkable record. We have carried the principle of voluntary arbitration to its limit, and it is well to recognize that it has a limit, because when we undertake to put into treaties for voluntary arbitration questions which no nation, when the stress comes, will submit to arbitration, we do not advance the cause of peace, and we do vast mischief by making treaties which we know in our hearts we are not prepared to carry out when the time comes. * * * If we have reached the limit of voluntary arbitration, what is the next step? I think the next step is that which this league proposes, and that is to put behind international peace, behind an international league or agreement, or tribunal, for peace—force.

INTERNATIONAL LAW MUST BE ENFORCED.

[By Elihu Root, former Secretary of State and United States Senator.]

I heartily agree with the purpose and general principle of the League to Enforce Peace. It seems clear to me that if we are ever to get away from the necessity for great armaments and special alliances, with continually recurring wars, growing more and more destructive, it must be by a more systematic treatment of international disputes brought about by common agreement among civilized nations. It seems to me that any such system must include the better formulation of international law, the establishment of an international court to apply the law, and a general agreement to enforce submission to the jurisdiction of the court. I also think the court of conciliation for dealing with questions which are not justiciable is very desirable.

—

ONLY A LEAGUE CAN MAKE PEACE SURE.

[By A. Lawrence Lowell, president of Harvard University.]

A breach of the world's peace, like a breach of domestic peace, is an offense against public order which the public ought to have some right to prevent. Nations that go to war break the peace of the world, and the world has at least a right to insist on knowing the reason for the war. It has a right to go further and demand that peace shall not be broken until an opportunity has been given to ascertain where justice lies; to try mediation and arbitration; and to consider calmly whether or not the matter at issue requires the sacrifice of war. In saying that the world has a right to insist upon this, we mean that it is justified in compelling nations to go to arbitration and state their case before they take up arms. But in order that the compulsion may be effective, the method of enforcement must be certain and sufficient for the purpose. In the terrible face of war there is no use in shaking the rattle of an unarmed watchman or in convening councils that talk and will not act. * * *

No single country can enforce a Pax Romana on the modern world; to attempt it would be to make itself a Don Quixote in search of perilous adventures to suffer defeat and become a laughingstock. It can be undertaken only by a league of nations strong enough and trustworthy enough to overawe any single State or combination of States that might venture to disregard its law of peace and war. Whether such a league can be formed or not we do not know. The question bristles with difficulties for statesmen and international lawyers, which there is no use in attempting to minimize, and which requires learning, skill, patience, and good will to solve. But one thing we do know—that such a league is not possible unless our country is willing to join it; nay, more, unless we take a prominent part in its formation. * * * We are faced by the alternatives of standing aloof from the rest of the world if we can, defending ourselves and working out our destinies by the strength of our own arm if we must, a stranger and perchance an Ishmaelite among the nations; or of taking our part, if we may, in shaping with others the progress of mankind and helping with them to bring order and peace over the earth as the waters cover the sea.

[By Benjamin Ide Wheeler, president of the University of California.]

If anything can be done to abate the chances of war, it must be done in the general field of the program sketched out for this league.

—

STRONG HAND TO PUT DOWN WAR.

[By Gen. Leonard Wood.]

In Europe to-day there are perhaps six to eight millions of laboring men facing each other for their mutual destruction at the behest of those who may be described as autocratic leaders. * * * I know those men. My daily life has brought me into contact with them day after day, year after year. They have a better possible destiny than to become food for powder. Their families have a better possible future than starvation amid the ruin of their homes. That better destiny, that better future, can only be secured to them by a joint preparedness on the part of the nations of the earth to put down with the strong hand of a united league of nations those who would substitute at any time war and its horrors in place of a decent peaceful solution of their international difficulties just as their private difficulties have been found to be adjustable without levying private war. We must be prepared to take our place and do our share as a Nation in the league of nations and as a great and powerful Nation our share will not be a small one.

—

METHODS THAT HAVE FAILED.

[By Oscar S. Straus, chairman New York Public Service Commission.]

Any future plan to be lasting must take into consideration the two antagonistic schools regarding the application of moral principles to international affairs, and in so doing reconstruct international relationship, not as heretofore exclusively on the basis of war but dominantly on the basis of peace. This can not be done by the dominance of a single power. That method has been tried and failed. It can not be done by a division of power. That, also, has proved a failure. It must be done by a unity of power; by placing the might of the united nations as guardians of the rights of each nation, on the same principle as we constitute the joint power of the 48 States of our Union as the guardian of the right of each State.

—

INTEREST OF LABOR IS IN PEACE.

[By Samuel Gompers, president American Federation of Labor.]

The interests of men and women of labor are identified with those of peace. * * * In the general reorganization that will follow the present war the workers will insist upon having voice and influence. * * * Peace is the fundamental necessity of government and of all progress. * * * In any program looking toward the establishment of more permanent peace among nations labor will insist upon the rescue of military forces from the dictation of arbitrary autocracy and secret diplomacy; upon a program that will make it impossible for a few strong nations to dictate the policies and development of the world; upon greater influence for the masses in those decisions that plunge nations into war; upon international machinery that will afford a medium through which all classes of society can voice their judgment and register their demands.

INTERNATIONAL LAW CAN BE DEVELOPED.

[By John Bates Clark, professor of political economy at Columbia University and director of the department of economics and history of the Carnegie Endowment for International Peace.]

The world demands a league of some kind for preserving peace, and, for the first time, much of the world expects to get it. * * * There is a highway in sight, along which unfriendly nations can walk, if they will, toward and finally to the realm of fraternal union. They must make treaties of peace and can make treaties of arbitration. In due time they can cooperate in putting life into the institutions at The Hague. * * * They can develop and codify international law. They must resume their economic activities, and can so direct them that causes of friction shall gradually be reduced and common interests shall be magnified. They can hold conferences at intervals and let them become, as decade after decade shall pass, more frequent and influential. In the end let us profoundly hope a single, strong, and binding league of nations can be created with every institution foreshadowed by the program of our own organization, and others besides, all buttressed by common interests and vitalized by community of feeling.

MORAL FORCE NOT ENOUGH.

[By Franklin H. Giddings, professor of sociology and history of civilization, Columbia University.]

If war is to cease, there must be forecasting in a larger way than would suffice to prepare one nation only for defense. There must be agreeing action by many nations collectively strong enough to restrain any power that would break the peace—as the single State is strong enough to restrain the criminal individual, or the forces of local insurrection. The strength of the restraining group must be more than moral; it must be the strength of physical force. A league to pass resolutions and to offer advice will not avail; it must be a league to enforce peace. The preamble and the platform which the League to Enforce Peace has adopted state the simple, obvious conclusions of experience. In one way only has the area of peace been widened as the centuries have passed. The lawbreaker and the war maker have been restrained by authority armed and employing force. History offers us no suggestion of any other possibility.

NOW TIME TO JOIN AN ALLIANCE.

From the Democratic platform:

"The circumstances of the last two years have revealed necessities of international action which no former generation could have foreseen. We hold that it is the duty of the United States to use its power, not only to make itself safe at home, but also to make secure its just interests throughout the world; and, both for this end and in the interest of humanity, to assist the world in securing settled peace and justice. We believe * * * that the world has a right to be free from every disturbance of its peace that has its origin in aggression or disregard of the rights of peoples and nations; and we believe that the time has come when it is the duty of the United States to join with the other nations of the world in any feasible association that will effectively serve those principles, to maintain inviolate the complete security of the highway of the seas for the common and unhindered use of all nations."

From the Republican platform:

"We believe in the pacific settlement of international disputes and favor the establishment of a world court for that purpose."

Proposals of the league:

We believe it to be desirable for the United States to join a league of nations binding the signatories to the following:

First. All justiciable questions arising between the signatory powers, not settled by negotiation, shall, subject to the limitations of treaties, be submitted to a judicial tribunal for hearing and judgment, both upon the merits and upon any issue as to its jurisdiction of the question.

Second. All other questions arising between the signatories and not settled by negotiation shall be submitted to a council of conciliation for hearing, consideration, and recommendation.

Third. The signatory powers shall jointly use, forthwith, their economic forces against any of their number that refuses to submit any question which arises to an international judicial tribunal or council of conciliation before issuing an ultimatum or threatening war. They shall follow this by the joint use of their military forces against that nation if it actually proceeds to make war or invades another's territory.

Fourth. Conferences between the signatory powers shall be held from time to time to formulate and codify rules of international law, which, unless some signatory shall signify its dissent within a stated period, shall thereafter govern in the decisions of the judicial tribunal mentioned in article 1.

## A Good Record.

### EXTENSION OF REMARKS

OF

### HON. JOHN R. CONNELLY,

OF KANSAS,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. CONNELLY. Mr. Speaker, as we come to the time when we shall adjourn this session of Congress and return to our districts, many of us asking to have our commissions renewed for two more years, it appears to me proper that we should review the work of this administration and submit it to the people whose votes we are soon to ask, and allow them to judge whether we are justified in asking again to be intrusted with the high honor and great responsibility of continuing to represent them here at Washington.

Four years ago the fortunes of politics sent to Washington a Democratic President and a Democratic Congress in both branches. The people have a right to know what the record of this administration has been, and it is for the purpose of placing that record before them that I submit the few remarks that I now make. I believe that if the individual voters of this country can fully understand the effort that this administration has made to serve them honestly and fairly and to meet the emergencies that have arisen and the response to the needs of the country in every respect, they will not rebuke those who have rendered faithful service during the last four years. I shall not expect the people to defeat Woodrow Wilson and those who have assisted him in giving to the country a record of achievements that has never been surpassed in its history; and if they should by any chance do so I shall believe that it has been because they do not fully appreciate the work that has been done, for I believe the great body of men and women are honest and want the best to prevail in all things pertaining to government.

THE TARIFF LAW.

In the campaign of 1912 there were 10,000,000 voters who supported platforms declaring for a downward revision of the tariff. The Democratic Party solemnly declared for it and the Progressive platform sincerely demanded it. The Democratic Party would indeed have been unmindful of the pledges it had made to the people of the country had they not set about honestly to give such revision of the tariff as this great body of voters had indicated that they desired. The Underwood tariff law was enacted on October 3, 1913, and I believe that it is the best law of the kind that has graced the statutes of the country for half a century. The law was so well balanced that the business of the country felt no shock, as is the usual case with the passage of tariff laws, and it, with the income-tax law, which was part of the law, brought more money into the Treasury of the country than any other law of the kind had in a like period in former years. Those who now criticize it seldom compare it with other like laws in other periods, because in so doing they would always find the Underwood tariff law coming out best in the comparison. Let us examine some of the criticisms made of this law and see if they will stand the light of analysis. Those who criticize it say that under its working $80,000,000 more goods came into the country the first year it was in effect than came in the last year of the old law. They say that if these goods had been made here instead of being shipped into the country more people would have been employed and better results obtained. If that is true and this law was a failure because it allowed an increase of $80,000,000 in imports of 1914 over what they were in 1913, then what must they say about the Payne-Aldrich tariff law that allowed $160,000,000 more imports to come in during the year 1913 than came in under the same law in 1912? They say that the law did not produce revenue, and yet it brought into the Treasury $10,000,000 more for the year ending August 1, 1914, than the Payne-Aldrich bill had brought in during the corresponding year ending August 1, 1913. The critics say that it is unfair to the farmer and places too little protection on what he has to sell.

In answer to this I have but to call to your mind the fact that the Republican Party came into power in this Nation on March 4, 1861, and they placed every line of tariff legislation on the statute books until the 24th day of August, 1894, or for more than a third of a century, and at the end of that period, I want to remind you, the products of the farm have seldom brought as little money as they did then and for the last 10 years of that period. The Democratic Party has contended that a tariff on farm products had little if any effect on the price so long as we were forced to sell our surplus products out in the free-trade markets of the world. In this opinion we find that some very prominent Republicans have at times concurred. When the Payne-Aldrich tariff law was being discussed in the United States Senate, Senator CUMMINS, a Republican Senator from the State of Iowa, said that in his opinion not a dollar was added to the $700,000,000 worth of farm products annually raised and marketed from the farms of the great State of Iowa by a tariff on farm products. In the famous speech made by President Taft, at Winona, Minn., while he was President, he said, among other things, "Certainly no one will contend that a tariff increases the price of foodstuffs when we are the greatest exporters of foodstuffs of any nation in the world." The best answer to the critics of the tariff law and its effect on the price of farm products is to be found in the prices that these farm products brought after the enactment of the law and before the breaking out of the European war. In a speech that I made in August, 1914, on the floor of this House, I printed a table compiled by the Price Current, in which I showed that the price of the 10 leading farm products sold for a higher average price on March 1, 1914, than they had any March 1 in the past 10 years. The average farmer is entirely too bright to be misled by these tariff critics.

Mr. Speaker, I have dwelt longer on the tariff than I intended. I find that the Republican orators dwell upon the tariff bill for two reasons: First, it is one of the easiest subjects in the world to mislead people, by publishing long lines of figures and dealing in certain tables of percentages; and, second, this is about the only law passed by this Congress that they care to attempt to criticize and the only one that their platform declares that they will repeal if intrusted with power.

THE MEXICAN SITUATION.

The Mexican situation is one that is not and should not be made a partisan matter. It is a matter that should receive the best thought of the best minds of the country, and these minds should not be clouded with any partisan rancor. The average citizen is interested in such a solution of the Mexican situation as will best serve the people of our own country and do no injustice to the weak and troubled country of Mexico. There are but two things that we can do in Mexico. We can go in, make war on the country and conquer it at the cost of much money and the loss of lives to our own soldiers, or we can stay out of Mexico and try as best we can to help them become a self-governing and independent Republic. It will be a long and troublesome road, no matter which of them we choose to travel. It has been the purpose of President Wilson to stay out of Mexico, and I am inclined to believe that is the best solution of that very vexed question. It is very possible that some mistakes have been made at times in our dealing with Mexico. We will doubtless make more mistakes regardless of which party is successful at the polls at the coming election. I am one of those who believe that criticism in a Republic is not a bad thing, but I do not believe that bitter partisan criticism is useful or helpful in solving those questions of dealing with other nations than our own.

THE FOREIGN WAR.

There are now 14 nations at war in Europe, and it is estimated that 30,000,000 soldiers are pitted against each other in the most gigantic conflict that any civilization has ever witnessed. This country has suffered much as a natural consequence of this war. Nearly all of the nations have not been as careful of the rights of neutrals as they should, but in nearly every instance it is my opinion that these foreign nations have harmed us only because of their zeal to win, which they all believe to be a dire necessity, and not that they want to intentionally do us harm. There are but two roads to travel in our efforts to be neutral with these warring nations. One is to protest when we are wronged and insist upon our rights being respected, and the other is to jump into the conflict and spill our blood and spend our treasures in the cataclysm of a world war. President Wilson has chosen the path of peace and protest. He has been criticized for not going to war, but I am convinced that time will vindicate his judgment and show that he has chosen the wiser course.

FINANCIAL LEGISLATION.

There has been a general demand among the business men, the farmer, the laborer, the banker, for a more satisfactory financial system than the old national banking law. It had failed many times to meet the stress of emergencies and permitted financial panics to come to the country. In such times the farmer sold his products for less than the actual cost of production, the laborer could not find employment, the merchant found it difficult to meet his obligations, and the banker was oftentimes driven to failure even when he had plenty of assets and was solvent in every sense of the word. This administration set to work to revise the old banking and currency laws, and the result is the regional reserve banking and currency law, which has met the demands of increased business and has kept and will continue to keep the country free from financial panics.

RURAL-CREDIT LAW.

The farm-loan bill was designed to be helpful to the farmer and to furnish him money on long-time payments and at a low rate of interest. The business man usually wants to hire money for months, and he can be accommodated by the provisions of the regional reserve act. The farmer wants to hire money, oftentimes for years, and the farm loan is destined to collect from the investor money that is for loan at a low rate of interest and place it at the disposal of the farmer who desires to borrow on long time and at a low rate. This bill is among the first bills ever passed by the National Congress to be especially helpful to the farmer, and I believe that it will save to the farmers who are to-day hiring money on the farms in the sixth district of Kansas many hundred thousands of dollars in interest charges that have heretofore been paid in excess interest on farm loans.

OTHER LAWS FOR THE FARMER.

The welfare of the farmer has been well looked after in the last two Congresses, which have been mindful of his interests and of the importance of his success in a Nation that desires to be happy and prosperous. The following laws show that the farmer has not been neglected:

1. The agricultural-extension act, which helps the farmer to study seeds and soils and brings to his assistance the best thought developed at the leading colleges of the country.

2. The warehouse act, which permits the storing of agricultural products and issuing warehouse receipts upon them which can be used as collateral and thus permit the farmer to hold his crop until he can secure the best returns for the same.

3. The act establishing a Bureau of Markets, designed to help in marketing the products of the farm.

4. The grain-grading act, which insures the farmer just and proper grades on the grains that he ships to market and prevents his being wronged in this respect.

5. A law appropriating a large sum of money to eradicate hog cholera, the ravages of which has cost the farmers $100,000,000 per annum.

6. The good-roads law, which in the next five years will permit the spending of $85,000,000 by the General Government on the roads of the various States and compels the States to spend a like sum, all guarded about by such provisions as will result in greatly improving the roads of the country.

LAWS FOR THE LABORER.

1. The Secretary of Labor in the President's Cabinet, giving the people who work with their hands representation in the highest councils of the country.

2. The seaman's act, which abolishes slavery on the ships that fly the American flag and also from other ships that make our ports.

3. A law freeing child labor from the factories of the country by refusing to permit goods manufactured by child labor to enter into interstate commerce.

4. A law granting a just compensation to Government employees who are killed or injured in line of duty.

5. A law providing for a Children's Bureau in the Department of Labor, to investigate infant mortality, orphanage, juvenile courts, desertions, dangerous occupations, and diseases.

6. A law preventing the abuses of courts in issuing injunctions in labor disputes without a proper showing of evidence justifying such an action.

7. A law establishing an eight-hour day for all work done by and for the United States.

8. A law establishing an eight-hour day for trainmen on railroads doing an interstate business.

9. A law providing for a Bureau of Safety Appliances, designed to prevent accidents upon railroads.

10. A law preventing the importation of pauper-made goods.

Mr. Speaker, it is a good record that this administration has made in the last four years. I appreciate that partisan papers will try to show to the people that they should make a change. Much money will be spent to persuade the people to turn their backs upon an administration, a President, and a Congress that have been faithful to the trusts reposed in them; but I feel that it will be of no avail, and that the people of this country will, by their verdict in November, refuse to rebuke a President or a Congress that has been responsible for this vast amount of good legislation in behalf of the best interest of the whole country.

## The Eight-Hour Law.

### EXTENSION OF REMARKS

OF

### HON. WILLIAM C. ADAMSON,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. ADAMSON. Mr. Speaker, so many erroneous statements are circulating about the eight-hour law recently enacted that a few remarks from me may be pardoned if not justified.

In the first place it is not true that the act fixes wages. That statement is gratuitous and inconsiderate. The law fixes an 8-hour day. We had previously a 16-hour day and a 9-hour day. We now have an 8-hour day. The only reference to wages is in the language used to hold in statu quo until the workings of the eight-hour law could be observed and all other

features of the service adjusted to the eight-hour law. The language means and means only that there shall be no changes in the relations of the parties in any effort of the railroads to recoup what they assert to be an increase of wages. They might have, under the claim of increased expenses, reduced wages pending investigation, which we did not intend to permit The assertion that adopting the eight-hour day will increase expenses is largely speculative, grossly exaggerated, and intended to deceive and mislead.

The present threat of some railroad officials to resist the law and refuse to put it into effect until forced to do so by the courts is strangely inconsistent with the known position of the railroad officials, often stated by them and made in their replies to the President, that they have no objection to an increase of wages if they are permitted to recoup for that by increased charges on the public. They would no doubt welcome with avidity an increase of wages and expenses and evidently favor it, because they think that they could secure an increase of rate largely out of proportion to the increased expense.

Those gentlemen who see proper to resist the law until compelled by the courts will probably find the first expression from the court in the shape of a criminal warrant for failure to comply with the law. It is in keeping with the traditional habit of that class of men. All railroad officials are not that way. Many of them are rational and patriotic, but some of them resisted all regulation from the beginning, and still resist. They claimed that everything proposed by the Federal Government was unconstitutional, and it was asserted that State governments had sole jurisdiction. When the State governments undertook to regulate them, their jurisdiction was then denied and sole jurisdiction ascribed to the Federal Government. These gentlemen pretend that the eight-hour law is unconstitutional. The Constitution charges Congress with the duty and invests it with the power to regulate interstate commerce. Part of that regulation should and does relate to the safety of passengers and property. This act, like the 16 and 9 hour laws, is based on the idea of public safety. If it is warranted by the Constitution, it is not unconstitutional. If it is a regulation of commerce it is constitutional. No genuine lawyer will deny that prescribing hours of labor for persons operating trains, prescribed in the interest of public safety, is a regulation of commerce. If any alleged lawyer gives any such erroneous advice and any railroad official, acting on that advice, goes to jail, he should have "benefit of counsel" far enough to insure the incarceration with him of that unfaithful lawyer, and both of them would look well in stripes, and probably will be thus adorned if they persist in their announced course.

The disgruntled Republican leaders evidently disagree with the assertions of these railroad officials, as they are proposing to make a campaign against the administration because we yielded and the brotherhoods frightened Congress into passing hasty legislation, not unconstitutional but without consideration and without providing for arbitration. That position is as ridiculous as the other. The President did not force anything; the four brotherhoods did not force anything; Congress did not pass anything half-baked or ill considered.

The strike has been fomenting for four or five months. One Republican leader on the floor, versatile but sensational, has three or four times referred to the fact that I was considering that strike four months ago, and one or two newspapers have seen proper to take up his wonderful deliverance as evidence of political design in the matter. It is true that four months ago my attention was called to the impending strike by the Republican leader, the distinguished gentleman from Illinois [Mr. MANN], who foresaw serious trouble and desired that I should give attention to the situation and threatening possibilities with a view of averting them. I saw Mr. ESCH, the ranking minority member of the committee of which I am chairman, and he concurred with Mr. MANN that if anything could be done it ought to be done. Together Mr. ESCH and I conferred with the Interstate Commerce Commission without result. I went and talked to the President about it, but the President could think of nothing that was proper for him to do at that time. I then talked to the representatives of the four brotherhoods. They assured me that there was no immediate danger of a strike, and very little danger of one at any time. They believed that no legislation was necessary at all, and insisted that none should be had, claiming that an amicable settlement would be made of the differences between them and the managers. I reported that to Mr. MANN and Mr. ESCH and relied on it. If there was any political frame up in that, there were with me in it two very able and distinguished Republicans, as able and patriotic, in my judgment, as any of those, from Candidate Hughes down, who are spouting vitriol against the best administration the country ever had.

When a crisis came and it was rumored that a strike had been ordered for the 20th or 23d of August, the President summoned both parties to the controversy, not as President but as an American citizen of sufficient standing and popular respect, to suggest that he might be a proper one to intervene in a friendly way. He did not see one party and take a message proposing terms to the other, but he studied the situation and having formulated a plan saw both, each separately of course, and stated to both exactly the same proposition and terms. Together with other Members of Congress, we suggested then to both sides that they ought to accept his proposition. It was that 8 hours be substituted for 10 hours wherever it occurs in their system, and that all other circumstances and conditions should remain as they are until they could be adjusted either by agreement or arbitration to be aided by an investigation. That was so fair and proper that we thought both sides ought to accept it. The railroads were unpatriotic enough to refuse. As they were nearly all Republicans, subsequent events suggest, as well as other parts of their conduct, that they were not at all averse to a strike. As usual they forgot their relations to the public. Some of them have never been able to realize their quasi public function that they are really officers of the United States, and their assumption of independence of the people and resistance to regulation have inoculated their employees so that they have come to be sometimes unmindful of their obligations to the public. They were reasonable enough, however, to accept the President's proposition and immensely elevated themselves in popular esteem. Unfortunately, however, there were limits on their wisdom and patriotism and they largely and rashly compromised and endangered their prestige and position of vantage by ordering a strike just when their wise and patriotic conduct had placed them on the flood tide of popularity.

They did not even then ask for legislation, but there were others of us who did realize what a calamity it would mean to have a strike. All our social and business life is built up around and dependent on our system of transportation. Stoppage of that transportation would mean paralysis to social and business life. The President washed his hands of the affair, delivered a message to Congress stating the case fairly and squarely, proposing various remedies—some emergent and some which could be deferred as we thought. The charge that he or Congress abandoned the plan of arbitration is unfounded and made to deceive. It was impossible to agree on but two of his propositions. We did not have time to agree that at present they were all wise and appropriate or that all were necessary to be enacted now. The part that we did enact was not half-baked nor ill considered.

The eight-hour law will be supported by the American people. It has been discussed for years; it would pass both Houses of Congress by an overwhelming majority at any time for train operatives; in fact, Congress has already enacted the eight-hour law for all Government work and the vote on the Clark resolution for all employees on railroads showed the strength of the sentiment in favor of an eight-hour law for everybody, but we did not insist on it for anybody but train operatives; we could agree on that; we understood it; everybody knows what it means; and we then provided for the investigation as to the effect of the eight-hour law on the operation of a railroad. Then we will enact whatever else is necessary.

I do not at all concede that it necessarily increases wages. If the railroads will abolish the collusion which they have been practicing with the men regardless of the rights of the public the increase will be much less than apprehended. The railroads do not hesitate to say they will increase anything the men want, and then tax the public for increased rates. The public is not going to stand for that and Congress refused to suggest in advance any increase in rates. The two propositions are entirely separate and distinct.

It is a falsehood with which Republicans would as well cease to try to fool the people to state that this establishment of an eight-hour law necessarily and permanently increases wages.

When we have time to agree, and I do not see how it is possible to agree to any of the propositions offered in the Senate or in the House, but when we do agree, if the obstinacy of the parties further forces legislation, and legislate, we will equitably adjust all the relations between the roads and the men. The eight-hour day will be an eight-hour day, with prescribed exceptions and tolerances for necessary overtime. We will establish conditions under which wages will be adjusted according to what is right and proper. If the men are being paid too much or too little, their wages will have to be increased or diminished. On the other hand, the railroads will be taken care of. They are our servants; we absolutely depend on them; we are compelled to support and maintain them. The managers

are very presumptious and reflect on Congress and the people to assert any fear that we will allow them to bankrupt or become inefficient. If when these proposed adjustments are made, either by legislation or agreement of the parties, it is found that the railroad rates are too low to be remunerative they will be increased under existing law, which makes it the duty of the Interstate Commerce Commission to increase them. If they are too high they will be reduced in the same way. But there are a great many reforms and economies, as pointed out by Justice Harlan for the commission in the 5 per cent eastern rate case, and probably others, that the railroad managers ought to study instead of denying the authority of law, resisting regulation, and defying public opinion.

While the managers and the men must learn that they are acting for the public as officers, they should also have patriotic faith in Congress and in the people, who are their ultimate masters and guardians, that both will be justly and properly taken care of. I believe they are learning that.

I believe that while Republican politicians are blindly blundering about in their discomfiture over the settlement of this trouble that the railroad managers and the employees have discovered the truth of what we told them when they were before the President that they would better settle their own differences and keep the matter out of Congress. I think they will all amicably adjust the matter before Congress has an opportunity to legislate any further, but if they do not they may rest assured that Congress will do the right thing for both sides and for the people.

The foolish charge that the President and the Democratic majority acted from political motives or were coerced into anything by threats of a strike are pusillanimous and contemptible. The President, as a great patriot, tried to avert a strike. The majority of Congress, aided by a large majority of patriotic Republicans in the House, rose to the demands of the occasion and passed just as much law as was necessary, well understood, wise, and well adapted to the purpose, and averted the strike. The first note of partisanship comes from disgruntled Republicans rushing recklessly around, physically and mentally, like a blind bull in a china shop, seeking something on which to attack the administration for political purposes. It looks like they are sorry the strike was averted. It seems that they are disappointed in their expected campaign wish of crying calamity in the midst of a universal horror coming during a Democratic administration. They are frantic over their disappointment. All Republicans are not that way; there are some good men in spite of their political heresies and party affiliations, but some of them wanted a calamity during the Democratic administration and were sorely afraid the President would deserve and receive credit for averting the trouble. They were worse than Nero, who fiddled when Rome burned, because Nero built a better and a handsomer city. They would have shouted for joy during a calamity, in hope that it would restore their opportunity to plunder the people already blighted by that calamity.

I shall conclude this speech by the insertion of a personal letter received from a friend who is an observer of events, a student of politics; and he makes some statements so clear and pointed that I think they make a fine peroration for this speech.

I want to congratulate you heartily on the splendid work you did in putting through the eight-hour bill and preventing the threatened railroad strike. It is a fine tribute to your intelligence, patriotism, and ability, and every clean-minded and patriotic American citizen who has intelligence enough to think straight must appreciate the work of the President and the Democratic Congress in saving the country from a catastrophe of such appalling proportions that no one can realize what it would have meant unless it had actually occurred. It seems to me that the railroad executives showed an amazing lack of judgment, to say the least of it, when they refused to make the settlement outlined by the President and accepted by the unions. I don't want to be unfair about it, but it does seem to me that they were deliberately trying to precipitate a strike and that there were political motives of the first magnitude back of their efforts. This strikes one with great force when one recalls that Mr. Hughes delivered the opinion of the Supreme Court in the Minnesota rate cases, extending to a greater degree than ever before national control over rate regulation, etc., and diminishing very largely the powers of the States over interstate traffic; that he was subsequently nominated for President by the Republican Party, and that, for the first time in our history, a railroad plank is put in the Republican platform, which is undoubtedly designed to destroy all the State railroad commissions and put control and regulation wholly within the national authority. I am not, at the moment, expressing an opinion upon the merits of this proposition—I am only speaking of the significance of the situation; that these people have been foiled is a godsend to the masses of the country. Congress will now have time to take up these questions in the light of settled conditions and orderly processes and secure legislation of a permanent character that will enable the people of this country in the future successfully to meet and deal with these grave economic problems.

I notice, by the way, that Mr. Hughes is mighty silent on the strike proposition. On this as on other vital questions, he apparently has no opinion; or, if he has, he is afraid to express it. I notice the mighty and courageous Teddy also expresses no opinion on the strike question. I wonder if either of these men is for the eight-hour day. If they are not, what absolute hypocrites they are in pretending to be for social justice. I wish somebody could make them answer two questions: First, do you favor the eight-hour day as applied to interstate railroads; second, do you approve the prevention of the strike by the legislation just enacted by the Congress?

The fact that the Republican Party in the Senate voted solidly against the strike settlement indicates where Mr. Hughes's and Mr. Roosevelt's sympathies are. I wish you would make these points clear in a speech in the House before the Congress adjourns.

Mr. Speaker, if we are to be criticized and punished for averting the strike, what will become of the 70 honest and patriotic Republicans, including Uncle JOE CANNON, the nestor of his party, the best and ablest of them all? These 70 voted with us to spare the country the calamity of the strike, and they deserve the thanks of the people. They were not deterred by the unworthy fear actuating other Republicans, that if the President and Congress succeeded in averting the strike, the people would gratefully accord to the present administration credit therefor.

Mr. Candidate Hughes is making a wonderful performance, promising to do things which President Wilson has already done and making unjust charges and criticisms. He and his followers are making similar misrepresentations about the eight-hour bill and the incidents which led up to it and the effects of it. Their performance and reckless statements bring to mind the prophecy of the Savior as to false prophets arising to deceive the very elect themselves, and the great Prophet Isaiah must have foreseen something like the Hughes campaign when he gave utterance to the following two verses:

Isaiah 5:20—

Woe unto them that call evil good, and good evil; that put darkness for light, and light for darkness; that put bitter for sweet, and sweet for bitter!

9:16—

For the leaders of this people cause them to err; and they that are led of them are destroyed.

Let the people beware.

## President Wilson's Mexican Policy—Address of Former Congressman James M. Graham at the Annual Catholic Picnic at Franklin, Ill.

I doubt if the people will ever fully realize the magnificent resistance which President Wilson has made to the efforts put forth by these powerful combinations of wealth. He has stood like a wall of adamant between the inordinate greed of these selfish men and the rights as well as lives of the very cream of the young men who are to-day the pride of their mothers and sisters and sweethearts.

## EXTENSION OF REMARKS

OF

# HON. CLAUDIUS U. STONE,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. STONE. Mr. Speaker, under the leave granted me to extend my remarks in the RECORD, I submit as a part of them an address delivered by Hon. James M. Graham, of Springfield, Ill., a former Member of this House, at the annual Catholic picnic at Franklin, Ill., Thursday, August 17, 1916. It deals with President Wilson's Mexican policy, and I give it as it was printed in the Jacksonville (Ill.) Courier.

GRAHAM DEFENDS WILSON'S MEXICAN POLICY—BLAMES CAPITALISTS FOR DISTURBANCES IN TALK AT FRANKLIN CATHOLIC PICNIC.

Speaking before thousands of people gathered at the annual Catholic picnic at Franklin Thursday afternoon, former Congressman James M. Graham, of Springfield, made a ringing defense of President Wilson's Mexican policy. In it he charged that the border and internal disturbances which have made the Mexican situation a menace for years were due to the agitations of American capitalists who wish to see the United States control Mexico in order to boost the value of their property in Mexico.

He showed that Americans own more than 40 per cent of the property in the southern Republic, much of which has been greatly reduced in value since the Diaz régime passed, and which would be increased many-fold by United States protection. But, he declared, these conscienceless capitalists would willingly sacrifice tens of thousands of the young men of the country to enlarge their dividends. He declared one could scarcely realize the "magnificent resistance" which the President has made against these combinations of wealth.

Mr. Graham opened his powerful address by a brief running description of the political and geographic conditions of Mexico; the size; the population, of which a very large per cent is full Indian, another very large per cent mixed with Indian, the Indian blood predominant, with only 2,000,000 whites in a population of 14,000,000. The country is largely gifted by nature, abounding in opportunities, and especially in mineral wealth.

DIAZ CATERED TO CAPITALISTS.

"During the 35-year rule of Diaz," he said, "he governed the country by force, but he offered great opportunities to foreign capital, and foreign capital seized these opportunities with avidity. Most of the

natural opportunities there, such as gold, silver, copper, petroleum, and rubber, as well as many of the industries, such as railroads, the insurance, and manufacturing, are now owned by outsiders, and mostly by Americans. Senator LA FOLLETTE, of Wisconsin, has published a statement in his weekly paper giving the natural wealth of Mexico and telling how it is owned. He said that Americans own $1,057,000,000 worth of the wealth of Mexico, whereas Mexicans themselves own only $793,000,000. The English own $321,000,000, French $143,000,000, and other nations $118,000,000.

UNITED STATES OWNS 43 PER CENT OF NATURAL WEALTH.

"Reduced to per cent, that would mean the United States capitalists own over 43 per cent of the natural wealth of Mexico, and the Mexicans own only about 30 per cent of the wealth in their own country. Much of this wealth is in the form of railroads, mines, and other industrial enterprises, which in present disturbed conditions in Mexico yield little or no profit. That condition, of course, is very unsatisfactory to owners, and it is extremely important to them that peace and good order should prevail there. Under peaceful and orderly conditions they are in a position to absorb much, if not most, of the wealth which Mexican labor would produce. These influences are extremely powerful in the United States. They not only own a large part of the wealth of Mexico, but they own a large part of the wealth of the United States. And it would be very difficult to estimate the extent of the power which they wield here. To a very great extent they either own or control the great metropolitan press of this country and many of the magazines. Through these mediums they can exert a force and power in the formation of public opinion, which is enormous. It is quite safe to say they do not hesitate to exert every influence and put forth every ounce of power which they can in order to make those in authority in this country conform to their views.

CARE LITTLE FOR RIGHTS OF MEN.

"It requires no explanation or elaboration to make clear the importance to them of government in Mexico, which would make their property rights secure. I fear the capitalists care but little about the rights of men. I am induced to think they place a much higher value on property rights than on human rights. And they are quite wise enough and quite farsighted enough to see that if the United States intervenes in Mexico, or, in other words, declares war on Mexico and sends an army down there to conquer the Mexicans and take possession of their country and then keep the army there for years, if necessary, to do police duty and compel the Mexicans to respect the property rights, it would be of immense financial value to the capitalists of this country. I think it is hardly exaggeration to say that if the President of the United States declared in favor of intervention to-day the property there which is American owned would be worth ten times as much to-morrow as it was yesterday. They have been urging intervention by every means within their power. They have tried to create a public sentiment in this country in favor of it, and Senator LA FOLLETTE adopts the view that these American financiers have conspired to bring about Mexican raids into the United States in order to provoke American public opinion and force the President to intervene. The fact that tens of thousands of American boys would lose their lives and that tens of thousands of other American boys would be crippled and disabled the remainder of their days from wounds and exposure in that dreadful climate is of no consequence to them. Nor does it in the slightest deter them in their efforts to send our boys on this ruthless and unjustifiable invasion under the guise of patriotism when the plain truth and plain fact is that they simply want to increase their wealth and enlarge their dividends.

PRESIDENT RESISTING PRESSURE.

"I doubt if people will ever fully realize the magnificent resistance which President Wilson has made to the efforts put forth by these powerful combinations of wealth. He has stood like a wall of adamant between the inordinate greed of these selfish men and the rights as well as the lives of the very cream of the young men who are to-day the pride of their mothers and sisters and sweethearts, the strength and hope of this great Republic. Every American who loves his country and values its honor should bless God that the Nation is favored by having Woodrow Wilson in the White House at Washington."

## Senate Amendment to Naval Bill.

## EXTENSION OF REMARKS

OF

# HON. DAVID A. HOLLINGSWORTH,

OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. HOLLINGSWORTH. Mr. Speaker, the leading Democratic newspaper of my district, published by a corporation whose president is postmaster in its principal city, recently attacked my vote against the Senate amendment to the House naval bill, which, according to the statements of this paper, provided for the construction of 157 new American war vessels, suggesting further that the President, who not long ago said we already have an efficient Navy, had his heart in the measure and used his influence to bring about its passage, adding with usual partisan zeal that I would be "called to explain" my vote, and that I "would have to step aside and let a younger man take my place," indicating that such younger man was to be my present Democratic opponent, who, in fact, although this was not mentioned in the paper, had as a former Member of Congress voted on two occasions to reduce proposals for the construction of two battleships to only one and on another occasion to reduce our small Army by abolishing five Cavalry regiments.

Believing it the right, in fact duty, of every good citizen, whether friendly or otherwise, in or out of the Government service, to call upon his Congressman for explanation of any of his votes, if desired, I promptly acted on the suggestion and sent to the paper my explanation expecting naturally it would be given the same publicity as the attack on my vote, although in this expectation I was disappointed.

It follows, substantially:

"Whether or not the President is in favor of this colossal increase in naval expenditures, greater in amount than ever before proposed in any Government on earth in war or peace, is not and can not be known until the bill reaches him for Executive action.

"The Army bill, just vetoed, was in like manner put forward by his friends in the House as one of his pet measures without any thought of a veto. Democratic leaders seemed to speak for him with authority, and, being a conservative measure, it met with little opposition on either side of the Chamber, or elsewhere until the Senate largely increased it, followed by a presidential veto.

"In matters of highest importance, however, the President's changing attitude is sometimes compared by Democratic leaders to a weather vane in a brisk gale. Personally, I have the highest regard for the man as well as his position, and have voted with him on all war measures involving any proper purpose of defense for our country, its flag, or its honor, including his most unfortunate "in again and out again" policy in Mexico. I have tried to be conservative and nonpartisan when the interest and honor of our country have been, or seemed to be, at stake, but like the real leaders of thought in the President's own party, I have been compelled to stop short in the approval of the present startling and colossal expenditure of the people's money proposed in the Senate amendment intended as it is, not for the present year, as is usual in such legislation, but for a continuing program of onward and increasing expenditure from year to year without any additional legislative authority, the inevitable result of which, in my judgment, will be a total change in the basic form of our Government from Lincoln's ideal of one by the people to a Prussianized militarism of the most pronounced type.

"Anyone reading the details of this bill, with the added Senate amendments, must realize that by it a new and distinct un-American class, independent of the people, is formed in this country with a provision for its continuance years after the hoped-for change of administration shall take place by the inauguration of President Hughes in March of next year.

"A shade of doubt is also cast upon the sincerity of the President, if he really does favor this great and increasing naval expenditure, by the fact that the keels of a number of warships, long ago authorized by Congress, have not been laid or begun by this administration, and the certainty that this program can not be completed until 1920. Facing this condition, and with this knowledge, with signs of peace on every hand, as stated by the President, how should I have voted? Of course, I could have dodged or not voted as did other Members according to the RECORD, some doubtless for fear of just such newspaper attacks as have been made upon me. But I never dodged a duty in my life and am too old to begin. I admit mistakes, but no fair-minded man or woman ever charged me with evasion. The only choice, therefore, left to me was to follow my own convictions and vote as I did with the minority, including Mr. KITCHIN, majority leader, and such sturdy Republican leaders as CAMPBELL, of Kansas, and LENROOT, of Wisconsin, instead of with the majority, certain as it was of success, and exultant under the leadership of the Democratic chairman of the Naval Committee and the Republican minority leader. I am on record as a conservative and in favor of honest neutrality, but have supported every war measure asked for by the President without a thought of partisan advantage accruing to him, except the present proposition, if he be in fact in favor of it. In my recent canvass for renomination, I wrote an open letter to my Republican constituents, not being able to visit them in person on account of official duties at Washington, in which my position was plainly stated as follows:

"Knowing something of the real horrors of war, I have stood for peace and, in every possible way short of national dishonor, have favored keeping this country out of war. At times dark clouds have appeared, but the conservatism and good sense of sincere men of both parties have ruled, and the country is to be congratulated.

"Over 7,000 voters joined in my renomination on this platform, and not one of them has yet called upon me, as suggested in this Democratic newspaper, to explain my vote.

"I make no boast, nor do I undertake to reply to the Democratic suggestion that HOLLINGSWORTH will have to step aside and let a younger man take his place, but I believe in the fair-

ness and good judgment of the American people, and am willing to further test before them this assertion.

"In closing, permit me, in answer to this newspaper's call, to add, for the enlightenment of Democratic readers, numbers of whom have written me encouraging words, the following quotation from the speech of the majority leader of the House, the Democratic chairman of the Ways and Means Committee, who refused utterly to be a party to the proposed naval extravagance:

"Mr. KITCHIN. Mr. Speaker, I shall not support this motion to adopt the naval program contained in the Senate amendments. I do not hesitate to confess embarrassment as a Member of the House, and especially as a Democrat, to-day. I remember two months ago the chairman of the Committee on Naval Affairs, the Democratic membership of that committee, the Democratic membership of the House, and, as I understood it, the Secretary of the Navy, in behalf of his department, and the administration persuaded and insisted upon the Democrats in the House to vigorously oppose and vote against what was then considered an extravagant, wild, and reckless program presented by the Republicans. Under such persuasion and insistence I got up in this House and, amid the applause of my fellow Democrats, led by the chairman of the Committee on Naval Affairs, and denounced the Republican program presented by minority report as criminal extravagance and recklessness.

"I declared, and I was authorized by the report of the minority and the chairman's speech to make the declaration, that such a program was not requested by the needs of the Navy or the Government. I believe I said it was criminal for this House to vote upon a proposition that would take hundreds of millions of dollars needlessly out of the Treasury through the proposition presented by the gentleman from Pennsylvania [Mr. BUTLER, a Republican]. And yet in two short months the chairman of the Committee on Naval Affairs, the Secretary of the Navy, and the President, and most of my fellow Democrats want me to get up now on the floor and eat my words and say that the program of the gentleman from Pennsylvania and the Republicans, which they induced me then to denounce as criminal recklessness, is now the very perfection of virtue and patriotism.

"I was given to understand—I was expressly told—that if we could get the Democratic members of the Naval Committee and the Democrats in the House together on a one-year $240,000,000 program the Secretary of the Navy and the administration would get behind it and make it the administration program. Though this was many millions larger than many of us favored, I went to work to get my colleagues together. All got together and the one-year $240,000,000 program was reported out by the Democratic solid vote on the committee. The chairman stated on the floor of the House that the Navy Department and the Secretary of the Navy approved it enthusiastically. But this program is gone, and here comes the Butler program to take its place. The first year of the program is enough like the one-year program of the gentleman from Pennsylvania [Mr. BUTLER] and his colleagues to be twins. The three-year program—and Mr. BUTLER and his colleagues demanded in the committee a three-year program—out-Republicans the Republican program by over $75,000,000. I denounced, with the approval of the Navy Department and Chairman PADGETT and my colleagues, the program of the Republicans as criminal extravagance and waste, and now, gentlemen, upon my honor as a man and Member of this House, I can not see more virtue in it because, forsooth, within two months, to-day it has Democratic sanction—from the President down. If such a program was wrong and reckless and extravagant then, it is wrong and reckless and extravagant now, and more so because since then two great naval powers of Europe have lost 100,000 tonnage each of warships, and to-day the navy of Germany and of all other nations except Great Britain is far below the strength of the United States Navy, considering ships built, building, and authorized, and we stand to-day far in the front as the second naval power of the world.

"That is the rank which the chairman of the Committee on Naval Affairs, which the Republicans in their report, which the administration, and which the war traffickers through their patriotic organization, the Navy League, asked us to put this Nation in.

"Regretting to learn from the article in question that my distinguished opponent is opposed to the patriotic and nonpartisan position I have taken on this subject, a matter of vital importance, as I see it, to the very form of our Government itself, I am,

"Very truly, yours,

"D. A. HOLLINGSWORTH."

## Delay School Opening in the District of Columbia.

### EXTENSION OF REMARKS

OF

### HON. FRANK W. MONDELL,

OF WYOMING,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. MONDELL. Mr. Speaker, I desire to call the attention of Members for a moment from the weighty affairs of state which are engrossing their attention to the consideration of a matter which warrants our consideration as members of the town council of the city of Washington. I refer to the very extraordinary action, in view of the circumstances, taken by the board of education yesterday afternoon in postponing the opening of the schools in this city for two weeks, or from September 18 to October 2. I quote from the Washington Post of this morning in regard to this matter as follows:

DELAY SCHOOL OPENING—BOARD OF EDUCATION MAKES DATE OCTOBER 2 INSTEAD OF SEPTEMBER 18—BOW TO PUBLIC SENTIMENT.

The opening of the District public schools has been postponed from Monday, September 18, to Monday, October 2, by vote of the board of education at its first meeting this season at the Franklin School yesterday afternoon. It was also voted to appoint a committee to confer on the advisability of making October 2 the permanent opening date, instead of the middle part of September as heretofore.

The measure was not adopted without prolonged debate, as it was stated in the president's report that "there is no serious reason for postponing the date of opening." The report stated that conferences on the subject had been held with the principal officers of the health department, and that these officers had given it as their opinion that delay was unnecessary.

NUMEROUS LETTERS RECEIVED.

It was pointed out, however, that the numerous letters received, including one from the Secretary of the Treasury, indicated that public sentiment is against opening the schools at present, because of a fear that infantile-paralysis plague may appear. The report stated that the president of the board had the utmost confidence in the opinion of the health officers, but that while there was no apparent danger, the president wished to do as the public itself desired.

The resolution of postponement provided that the teachers should be subject to call at the regular time. It was found that the question of teachers' pay was not affected by the postponement.

There was a strong sentiment evinced by members of the board for making the date a permanent one, and the committee was to consider this question, with a view to bringing its observations to the board later.

From this article it would appear that the Board of Education, in voting for this postponement, is following what it understands to be the public sentiment on the question. They have letters, it is said, requesting postponement, including, let it be noted, one from the Secretary of the Treasury. My opinion is that there are not 5 per cent of the parents of this city who desire to have the opening of school postponed, and I base that opinion on the fact that most people desire to have their children educated, and therefore do not desire to have terms of school unreasonably shortened when there is no good reason for it, as there is not in this case.

Primarily the postponement is charged to the prevalence of infantile paralysis, although infantile paralysis is not and has not been prevalent in Washington, there having been very few cases and most of them very mild. But, it is said, paralysis may be brought in by the children coming from their summer vacations. It is notorious that there has been no infantile paralysis in the summer and vacation resorts. And yet out of these two perfectly favorable factors the Board of Education deduces an unfavorable conclusion. The Post article closes with the observation that there was a strong sentiment evinced by members of the board for making the date October 2 a permanent one, and it is stated a committee was appointed to consider the question. We have here, in my opinion, the real milk in the coconut. The infantile paralysis argument is merely toted in as an excuse.

With all due deference to the honorable Board of Education, my opinion is that it will be a long time before the Washington school year is further shortened. It is already quite short enough, and with the numerous holidays and half holidays which are declared and provided for on all sorts and kinds of trivial and trifling excuses some people have begun to wonder whether the schools of Washington are conducted for the purpose of giving the children of the District an education or for the benefit of the teachers and the entertainment of the Board of Education. It will be noted, in connection with this postponement, that the board was careful to investigate as to whether the teachers' salaries would be affected and only agreed to the postponement when assured that the teachers would not lose anything, however much the schools might suffer.

The action of the Board of Education is the more extraordinary in view of the fact that the health officer of the District and the superintendent of schools, the two men of all others best qualified to advise, advised against it. I am told that the present school year was made short compared with that of many other cities because of the alleged summer heat of Washington. While, of course, no one wants the regular public schools open during midsummer, the fact is that there are very few cities in the Union where the question of summer heat is less of a factor to be reckoned with in the matter of the school year than right here in Washington, and it is about time that the people here got over the habit of using Washington summer climate as an excuse for the shortening of school terms, and particularly for the closing of playgrounds at a time when they are most needed. Most cities of the Union would consider themselves very fortunate if their people suffered no more from heat in the summer than do the people of Washington.

**The Rural-Credit Law Is a Full Redemption of the Democratic Platform Promise to the Farmers.**

EXTENSION OF REMARKS

OF

# HON. RALPH W. MOSS,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. MOSS. Mr. Speaker, in the campaign of 1912 each of the great political parties pledged its membership to the enactment of a rural-credit law. The Democratic Party declared in its platform that rural credits was of equal importance with the question of currency reform, thereby placing the interest of the farmer side by side with that of the merchant and business man. The national-bank law, which was enacted by the Republican Party, grossly discriminated against the farmer. This law remained upon the statute books during 50 years of Republican rule and actually made it a crime for any national bank to loan a dollar to a farmer and accept a mortgage on his farm as security. The result naturally was that farmers during this long period were driven to loan agents, trust companies, and foreign corporations to secure mortgage loans. No farmer ever borrowed a dollar on real estate mortgage security from any bank chartered by the Federal Government under a law passed by the Republican Party.

One of the first acts of President Wilson's administration was the appointment of a commission to go abroad and study the rural-credit systems in the leading nations of Europe and make a report to Congress. I felt myself highly honored in being named a member of that commission. In company with my colleagues, I spent the summer of 1913 in Europe; we visited every country whose rural-credit societies were well organized, and made a report to Congress which embodied the latest information on this subject to be obtained in any country in the world. The commission also drafted a tentative bill on this subject as a further assistance to Congress. This bill was at once revised by the Banking and Currency Committees of the Senate and House. No time was wasted or delay permitted to retard the progress of this legislation which had been promised in good faith by the Democratic Party. In order to hasten progress, Congress created a special joint committee, composed of Senators and Representatives, to sit during vacation, with instructions to report a bill not later than January 1, 1916. I also had the honor to be a member of this special joint committee and know the fidelity with which every member discharged his duty. The result was the framing of the bill which is happily now a law. Every Democrat in both House and Senate remembered the pledge of his party to enact this legislation, and not a single Democratic vote was cast against it. Five votes in the Senate and ten in the House were cast against it by stand-pat Republicans. No other great measure in a generation has passed Congress with so nearly a unanimous vote. This vote is not only a high compliment to the various committees which framed this law but is emphatic proof that the Democratic Party has given the farmers of the Nation an effective rural-credit law.

The purpose of this law is to give credit for productive purposes to farmers at low interest rates, for long periods of time, and on easy installments in repayment. The real problem before Congress was how to secure money so as to be able to loan it to farmers on these favorable terms. It is well known that the National Government can borrow money in larger amounts and at lower interest rates than any person or corporation. This is true because the National Government can issue a bond which is more attractive to investors than any other credit instrument. A Government bond is known to be absolutely safe and nontaxable. For these reasons the Government can to-day borrow money on its own terms at 3 per cent interest.

The framers of the rural-credit law took the Government bond as a model for the new credit instrument. The Federal farm-loan bond will possess every advantage which a Government bond now carries. It is exempt from all taxation; it is a legal investment for all trust funds under Federal law. The system is closely associated with the Federal Treasury, and the Secretary of the Treasury is a member of the Farm Loan Board. The land is to be appraised by a Government official, and the mortgage will be held in trust by the Government to secure the payment of the bond which is issued against it. Every detail will be under strict Government supervision. Graft, mismanagement, or speculation is made impossible, and the borrower can not be held up for commission and exorbitant fees. Finally, the Secretary of the Treasury is authorized to deposit Government funds in Federal land banks to meet any threatened default in payment of interest or principal on Federal farm-loan bonds. With all these exceptional advantages these bonds will sell in close competition with Government issues. It is practically certain that they will sell at a lower rate of interest than State, county, or municipal bonds. This means a 3½ per cent bond just as soon as the public becomes educated to their exceptional value and may give as low a rate as 3¼, under conditions as favorable in the financial world as obtains to-day. I confidently predict that the first issue of farm-loan bonds will sell readily at 4 per cent. I will go further and predict that when the Federal farm-land banks become well established and the integrity of their bond issues fully proven, farm-loan bonds will sell at par, bearing a rate of interest within one-quarter per cent of the current rate on Government bonds. This prediction is fully borne out in the world's history and will be verified here as well as in Germany, France, and other European Governments where rural-credit banking has long been organized.

Now, what does this mean to the actual borrower? Well, it means money at a rate not exceeding 5 per cent, with no commissions or renewal fees. The cost of operating the system will soon drop to three-fourths per cent as the operating cost will tend to decrease as the volume of business increases. The interest rate on the mortgage can never be higher than 1 per cent above the interest rate in the farm-loan bond, as the law fixes 1 per cent as the widest margin which can be charged as operating expenses. If that margin is charged and the expenses and reserves do not consume it all, the balance must be prorated as dividends to the borrowers. The loans must always be given at actual cost. The law sets no limit to the amount of bonds which may be issued except that loans must be made to farmers in an amount equal to the issue of bonds.

The method of securing loans is very simple. The farmer applies to the land bank through his local association for a loan and gives his note with a mortgage as security. The bank files the mortgage with the Government and sells a bond on the market. The capitalist buys the bond and the farmer gets the money. These operations will continue as long as any farmer desires to secure a loan. Every dollar invested in farm-loan bonds must be loaned to some farmer to improve his farm, to operate it, or to purchase land to farm. No person can borrow a dollar from a Federal land bank except he personally operates or shortly intends to operate the mortgaged farm. No speculator can get a dollar under any conditions. No man can borrow more than $10,000 at any one time. Thus the benefits of the law will go wholly to those who own or who may purchase farms and operate them personally and who desire only a moderate-sized loan; and the law makes ample provision to supply every farmer in the United States who may come within these limits and who may desire to avail himself of its benefits. It plays no favorites.

Any loan may be made for a period not less than 5 years nor more than 40 years, and may be repaid, in whole or in part, any time after the loan has run five years. No man need fear a foreclosure if he makes his annual or semiannual payment, and he will never have any renewal fees to pay. I shall only point out one further feature of large advantage to the borrower in this law, and that is the installment plan of repayment, commonly called amortization. I can best illustrate this by taking the State of Indiana as an example. The farm-mortgage indebtedness of Indiana is about $132,000,000 and the average rate of interest is 6.2 per cent. This means that the farmers in Indiana are paying an average of $62 interest every year on every thousand dollars of their mortgage debt without reducing the principal at all.

The land banks under the rural-credit law will make loans which are to be repaid in annual or semiannual installments. I will assume that the first loans will be made in our land district at 5 per cent. The annual interest charge on $1,000 at 5 per cent is $50. If a farmer who is now in debt were to borrow money from a rural-credit bank at 5 per cent and would agree to pay an annual installment of $60.43, which is less than the average amount he now pays in our State for interest alone, and would make this payment for 36 years, he would discharge his debt in full. He will thus have repaid a debt of $1,000 with $375.48. This is what the new law will actually offer to Indiana farmers. It means such a reduction in interest rates that a farmer can actually pay principal and interest of his debt with less money than he is now paying for interest alone.

It is the first banking law to be enacted by the Congress of the United States dedicated exclusively to the interest of farm borrowers. It makes farmers a preferred class of borrowers and will give them money for productive purposes at a lower

rate of interest than any other class of borrowers can secure it. Thus the Democratic Party has redeemed its promise to enact a rural-credit law which will place a farmer's credit on a par with that of the merchant and the business man. Speaker CLARK has said publicly that the rural-credits law is one of the three greatest laws passed during this administration.

I am proud of this record; I am proud of the part I have been permitted to take in the enactment of this law; and I am proud of my party, because it has fought a good fight and has kept faith with the farmers of the Nation.

## British Workmen Want Protection.

EXTENSION OF REMARKS

OF

# HON. J. HAMPTON MOORE,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. MOORE of Pennsylvania. Mr. Speaker, with President Gompers, of the American Federation of Labor, making speeches in Maine for President Wilson, who stands for the Underwood tariff law, it is interesting to note the attitude of the labor unions of Great Britain in opposition to the free-trade system that has so long prevailed there. Several years ago, after an extensive tour of Europe, Mr. Gompers published a book in which he depicted the deplorable condition in European industrial districts, but notwithstanding the misery, degradation, low wages, and poor living conditions which he then described, the chieftain of the American Federation of Labor has been a sturdy champion of the Democratic Party at least since the time of President Roosevelt. He opposed the Republican nominee in 1906 and in 1912 and is now openly in the field and on the stump for the Democratic candidate.

GOMPERS STUMPS FOR WILSON.

Indeed, if Mr. Gompers's speech at Lewiston, Me., September 3, is accurately reported in the Washington Herald of the next day, Mr. Gompers is much closer to the White House than most people have hitherto believed. Not only does Mr. Gompers laud the President in that speech, but he also takes occasion to denounce the Republican candidate, Mr. Hughes. After explaining his reasons for supporting Mr. Wilson, Mr. Gompers is quoted upon the Mexican situation and throws a side light upon the recognition of Carranza, which is highly important. Here is that reference:

"When the most critical situation had been reached and it seemed that every hope had been exhausted, representatives of the organized labor movement in Mexico came to the president of the American Federation of Labor and asked him to use his influence to secure recognition of the Carranza government by the administration of President Wilson," Gompers said.

A letter from the president of the American Federation of Labor to President Wilson requested that he have patience with the people of Mexico and give them time to work out their problems without the intervention of an outside power. Intervention did not take place.

At the September, 1915, meeting of the executive council the president of the American Federation of Labor was instructed to write to President Wilson asking that he recognize the Carranza government. It was about a month after that letter was sent that Secretary of State Lansing notified the Mexican representative in this country that the administration formally recognized the existing government, so there was assured to the people of Mexico additional opportunity to work out their problems in accord with their own ideas and their understanding of their best interests.

LEGISLATION REGARDLESS OF FREE TRADE.

It will be observed that Mr. Gompers's intimacy with the President had to do with other than labor problems and that his support of the President in this campaign is regardless of whatever has been said in the past about the miserable labor conditions in Great Britain and other countries, with which the United States had had to compete. It has made no difference whether the most serious piece of Democratic legislation, the Underwood low-tariff law, has remained on the statute books or not. Labor in the mills and workshops and upon the farm may be allowed to suffer just the same after the European war, so far as the present attitude of the president of the American Federation of Labor is concerned. President Wilson must be elected and the free-trade tariff law for the workers in the mills of America must be maintained at all costs. Note the difference with the trade-unionists of Great Britain. They have tasted the bitter cup of free trade and they want no more of it. Years ago they began to realize that free trade was a dream and that it operated to the advantage of other nations. When the late Joseph Chamberlain began to talk protection for Great Britain the British workmen, who had been competing with European labor, began to applaud. They held meetings in Hyde Park and about Trafalgar Square and in their union meeting places. They began to realize that the American plan was a good plan and wanted to adopt it. Anyone who has traveled through Great Britain knows of this growing disposition of the statesman and the workingman of that country to resort to the protective system, and yet the president of the American Federation of Labor argues for the reelection of the President, notwithstanding his responsibility for the existing tariff law, which was passed, as the President said, to make American industrialists "whet their wits against the wits of the world."

I do not dispute with Mr. Gompers as a labor leader, because he is able and successful, but I do argue with him as a politician who stands for the destruction of the protective-tariff system in the United States. He commands respect as a labor chieftain and must be reckoned with, but as a politician, resisting a great economic principle which threatens the wage earners of the United States, he is subject to the criticism that attaches to any misdirected effort.

BRITISH LABOR WANTS PROTECTION.

In contrast with Mr. Gompers's political teachings, I present the action of the organized workers of Great Britain, as reported from Birmingham, England, September 6. The report, which is appended, comes from the Philadelphia Record, a forceful Democratic newspaper, which is itself opposed to the doctrine of protection:

BRITISH UNION LABOR TURNS TO HIGH TARIFF—WORKMEN'S CONGRESS VOTES FOR RESTRICTION OF FOREIGN COMPETITION AFTER WAR—RESTORATION OF RULES—WILL INSIST ON ALLEGED RIGHTS, NOW WAIVED TO INCREASE WAR PRODUCTION.

BIRMINGHAM, ENGLAND, *September 6.*

The trades-union congress, representing nearly 2,500,000 organized workers of Great Britain, took an important and unexpected step to-day by adopting, with a majority of more than 1,000,000 votes, a resolution virtually indorsing the principle of protection.

The resolution asks for "the adoption of methods for restricting or preventing the importation of cheap manufactured goods produced at lower rates of wages and under worse labor conditions than prevail in this country." Although these words themselves do not accept the principle of a protective-tariff wall, the protectionists among the labor delegates and in other circles are inclined to regard the workmen as having been won over to a complete change from free trade. One of the labor members of the House of Commons said the meaning of the resolution was merely that measures should be taken to investigate the origin of goods and conditions under which they are produced with a view to preventing the unloading of cheap goods in this country after the war, which is much feared.

The congress considered other resolutions regarded as of importance for labor after the war, including one dealing with restoration of trades-union rights which have been suspended in order to increase the output of munitions. Undue delays in granting pensions to those incapacitated in the war by wounds or disease were denounced and demands were advanced for the abolition of what was characterized as "antediluvian old-fogyism" of the pensions commission.

## Charles E. Hughes Known by His Words and Deeds.

EXTENSION OF REMARKS

OF

# HON. ISAAC SIEGEL,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. SIEGEL. Mr. Speaker, the thinking men of this country are asking the question as to whether the judicial opinions of Gov. Charles E. Hughes show him to be a man near and close to the people. With that in view, I shall present extracts of his decisions when on the Supreme Court Bench from 1910 to 1916, and in each case it will be found that Gov. Hughes represented the advanced thought of the Nation. One of the most important cases that ever came before the Supreme Court was that of Leo M. Frank. In an opinion written by Mr. Justice Holmes, with whom Mr. Justice Hughes concurred, in No. 237 United States, page 345, the former said:

The trial began on July 28, 1913, at Atlanta and was carried on in a court packed with spectators and surrounded by a crowd outside, all strongly hostile to the petitioner. On Saturday, August 23, this hostility was sufficient to lead the judge to confer, in the presence of the jury, with the chief of police of Atlanta and the colonel of the Fifth Georgia Regiment stationed in that city, both of whom were known to the jury. On the same day, the evidence seemingly having been closed, the public press, apprehending danger, united in a request to the court that the proceedings should not continue on that evening. Thereupon the court adjourned until Monday morning. * * * Mob law does not become due process of law by securing the assent of a terrorized jury.

The single question in our minds is whether a petition alleging that a trial took place in the midst of a mob savagely and manifestly intent on a single result is shown on its face unwarranted by the specifications, which may be presumed to set forth the strongest indications of the fact at the petitioners' command. This is not a matter for polite

presumptions; we must look facts in the face. Any judge who has sat with juries knows that in spite of forms they are extremely likely to be impregnated by the environing atmosphere. And when we find the judgment of the expert on the spot, of the judge whose business it was to preserve not only form, but substance, to have been that if one juryman yielded to the reasonable doubt that he himself later expressed in court as the result of most anxious deliberation, neither prisoner or counsel would be safe from the rage of a crowd, we think the presumption overwhelming that the jury responded to the passions of the mob. Of course we are speaking only of a case made by the petition and whether it ought to be heard. Upon allegations of this gravity, in our opinion, it ought to be heard, whatever the decision the State court may have been, and it did not mean to set forth contradictory evidence or matter of rebuttal or to explain why the motions for a new trial and to set aside the verdict were overruled by the State court. There is no reason to fear an impairment of the authority of a State to punish the guilty. We do not think it impracticable in any part of this country to have trials free from outside control. But to maintain this immunity it may be necessary that the supremacy of the law and of the Federal Constitution should be vindicated in a case like this. It may be that on a hearing a different complexion would be given to the judge's alleged request and expression of fear. But supposing the alleged facts to be true, we are of the opinion that if they were before the Supreme Court it sanctioned a situation upon which the courts of the United States should act, and if for any reason they were not before the Supreme Court it is our duty to act upon them now and to declare lynch law as little valid when practiced by a regularly drawn jury as when administered by one elected by a mob intent on death.

In Miller *v.* Wilson (236 U. S. Repts., p. 373), Mr. Justice Hughes held constitutional a limitation of women's workday to 8 hours and their work week to 48 hours. In Coppage *v.* Kansas (236 U. S., p. 27) Justice Hughes was unable to indorse the views of the majority of the court to the effect that a Kansas statute declaring the Kansas statute making it a misdemeanor for an employer to require an employee to agree not to become or remain a member of any labor organization during the time of employment was unconstitutional. Justice Hughes felt that inasmuch as men had the right to choose freely whether they would join trades-unions and inasmuch as the law looks with favor upon membership therein for common industrial betterment, the Legislature of Kansas had the right to forbid attempts to coerce an unwilling employee to agree to forego the exercise of his wholesome legal right of membership, even to the point of refusing him employment at all unless he was willing thus to agree not to do what he lawfully and desirably might do, the exercise of his rights which he deemed to be his, not only legally but morally.

In Truax *v.* Riach (239 U. S. Repts., p. 23) Justice Hughes held unconstitutional an Arizona statute requiring every employer of more than five persons to employ not less thn 80 per cent qualified electors or native-born citizens of the United States. He thus showed that there was no room in this country for laws that would in any way attempt to discriminate between native born and foreign born trying earnestly to earn a livelihood. In the recent Coca Cola case he demonstrated that he had no use for those food manufacturers who were attempting to deceive buyers as to the ingredients contained in the food products which they were selling. No justice of the Supreme Court has ever taken a stronger and more firm stand against the sale of adulterated food. This case is that of the United States *v.* Coca Cola Co. (241 U. S., p. 265).

In conclusion let me quote from an address delivered by Gov. Hughes on October 19, 1907, at the dedication of a statue erected in memory of distinguished citizen of foreign birth:

Fortunate also is it that we are becoming more and more free from racial and provincial prejudices, and are able to make a truer estimate of the many sources from which we have derived our national strength and the virtues of our citizenship. It is a pleasant thought, which frequently has been expressed, that the ancestors of most of those who settled the country in colonial days once lived in the German forests; we witness here, on a large scale, and after centuries of varied experience, what is virtually a reuniting of the descendents of a common stock. But however pleasing this may be to the historical imagination our unity and fact is not racial and does not depend upon blood relationship, whether near or remote. It is the unity of a common national idea; it is the unity of a common conception of the dignity of manhood; it is the unity of a common recognition of equal civil rights; it is unity in devotion to liberty, expressed in institutions designed to give every man a fair opportunity for the exercise of his talents, and to make the activities of each subordinate for the welfare of all. To the maintenance of this ideal, and to the fulfillment of the purposes of our national organization each race has made contribution, and we are not truly Americans if we do not greatly rejoice in the fact that here is more than the work of any one people, and more than the product of any one experience; that to the making and to the prosperity of this Commonwealth humanity has given of its best; and that its vigor and unprecedented strength are due in no small degree to the fusion of its diverse elements. * * * This is our common country. Whatever the abode of our ancestors, this is our home and will be the home of our children, and in our love for our institutions, and in our desire to maintain the standards of civic conduct, which are essential to their perpetuity, we recognize no difference in race or creed—we stand united, a contented people rejoicing in the privileges and determined to meet the responsibilities of American citizenship.

Mr. Speaker, Charles E. Hughes is typical of the American citizen who comes of foreign-born parents, but who loves our flag and country, and cherishes its institutions in a manner that indicates that he is for America at all times.

## Two Patriotic Services Which Should Elect Wilson.

### EXTENSION OF REMARKS
OF
### HON. ALFRED G. ALLEN,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. ALLEN. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD I include an editorial from the Cincinnati Post on September 6, 1916.

The editorial is as follows:

TWO PATRIOTIC SERVICES WHICH SHOULD ELECT WILSON.

It would be difficult to overestimate the service which President Wilson has rendered to the Nation by preventing the strike of railroad employees.

That the President is entitled to the bulk of the credit even his most captious critics must admit.

Candidate Hughes has not been heard from on the subject, and, judging by his performances during the past month, he probably will not be. The ex-justice, in his campaign for President, seems to be acting on the theory that the people are not interested in vital issues.

It would be ridiculous to say that by forcing Congress to act with unprecedented promptness on the eight-hour law President Wilson permanently settled all the differences between the railroads and the 400,000 members of the four brotherhoods.

But it is within the facts to say that but for the enactment of this law this country would to-day be in the throes of an industrial revolution, the far-reaching consequences of which no man could forecast.

When President Wilson stepped in it seemed to those who had knowledge of the inside facts of the situation that even the tremendous power and prestige of the presidential office could not avert the calamity of a general railroad strike.

President Wilson brought to the crisis not only the power and prestige of his office, but that indomitable will to succeed, which is perhaps the most marked characteristic of a personality richer in sterling elements than that of any President since Lincoln.

It was this same will to succeed, backed by moral courage of a high order, that enabled President Wilson to vindicate international law and establish the rights of neutral nations, in the submarine controversy with Germany, without going to war.

If the arguments for President Wilson's reelection began with his settlement of the submarine controversy and ended with his action which averted the railroad strike, with nothing in between, he ought to be assured of the support of every voter who puts patriotism above partisanship.

And yet those who know the President best know that his action in neither of these crises was in the slightest degree based upon political expediency.

In one case he incurred the aggressive hostility of many German-Americans who mistakenly allow love for their fatherland to kill their sense of justice.

In the other case he has antagonized the powerful financial interests who own the railroads and who mistakenly allow their selfish interests to kill their sense of justice.

That man is a fool who underrates the political influence of these two groups, who, in their blindness of prejudice and greed, are determined to "get even" with Wilson.

The question to be decided at the November election is whether such influences are powerful enough to defeat a President who has had the temerity to enforce the rights of America against Germany and the rights of labor against capital.

We believe that Wilson is justified in awaiting the decision with calmness and confidence.

## Review of President Wilson's Administration.

### EXTENSION OF REMARKS
OF
### HON. RICHARD W. AUSTIN,
OF TENNESSEE,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, September 8, 1916.*

Mr. AUSTIN. Mr. Speaker, I avail myself of the privilege granted by the House to extend my remarks by inserting a letter from Hon. Hannis Taylor to the National Business Men's Republican Committee, of New York City, entitled "A Review of President Wilson's Administration." Mr. Taylor is a lifelong Democrat; served this country with credit and distinction under the Cleveland administration as minister to Spain; is an authority on diplomacy, and the author of a number of textbooks on international law:

A REVIEW OF PRESIDENT WILSON'S ADMINISTRATION.

WASHINGTON, *D. C., September 5, 1916.*

GENTLEMEN: I have received your letters in which you say: "May we have your name, indorsement, and moral support on committee for the election of Charles E. Hughes for President? * * * We should be very glad indeed to have you make your statement through this committee at the right time." Knowing Mr. Hughes to be a wise and progressive statesman, an exceptionally able jurist, a man of affairs, a fearless patriot with the courage of his convictions, I can not doubt

his ability to deal successfully with the mighty problems with which the world in general and our country in particular are now confronted. At this critical moment in our history, with the war drums beating in every quarter, certainly it will be a blessing to the country for the administration of a drifting and irresolute opportunist to be succeeded by that of a resolute statesman with positive convictions, whose firmness and moral dignity will be the best security for peace. But, admitting all that to be true, have I, a lifelong Democrat who never voted a Republican ticket nor supported a Republican candidate, the right to support Mr. Hughes?

THE DEMOCRATIC PARTY SUPERSEDED BY A POLITICAL DICTATORSHIP.

I was invited to preside and did preside over a great political meeting held at Washington to ratify the first nomination of Mr. Wilson; I subscribed to his campaign fund; I gave him my cordial support in every way. In the only personal letter I ever addressed to him I told him I had nothing whatever to ask of him, a promise to which I have faithfully adhered. Living as I do at the seat of government, with a large personal acquaintance with the leaders of both political parties, I have had exceptional opportunities to study at close range every act of Mr. Wilson's administration, foreign and domestic. I have watched all the currents and countercurrents that have influenced that incoherent mass of inconsistent acts which he is pleased to call his policy. Thus, against my will and political associations, I have been forced to conclude that no man who ever filled the Presidential office was so opposed to the basic principles for which the Democratic Party stands as Mr. Wilson; that he is at heart a typical and extreme Federalist, intent upon the abnormal exaltation of the powers of the Executive and the humiliation of Congress. To use an epithet he once employed in stigmatizing Jefferson, Mr. Wilson is "a philosophical radical," intent upon transforming the Presidency of the United States into a political dictatorship with himself as its head.

THE NEW TYRANNY.

I have seen Mr. Wilson trample under foot, apparently without remorse, the party platform upon which he was elected and which he pledged his sacred honor to the people faithfully to carry out. I was near at hand when he drafted a second party platform, which he sent to St. Louis from the White House by one of his agents with an imperious demand that it be accepted by the convention as its act and deed. If he should be reelected, he will claim, of course, the right to repudiate, in whole or in part, that second party platform, which is, in a very peculiar sense, the work of his own hands. Thus the old Democratic Party, to which I have belonged all my life and which has heretofore expressed its corporate will through representatives chosen from its ranks, has been for the moment abolished, or at least superseded by a political dictatorship, created by an arrogant usurper, who has demonstrated his utter inability to play the pretentious rôle he has prepared for himself. I can not, without a sacrifice of my self-respect, consent to support this new and preeminently undemocratic system of political tyranny, which would be a real menace to the country and the Constitution were it not for the feebleness and inefficiency of its creator. The only thing that has ever justified dictatorships in the past has been the preeminent ability and authority, in moments of supreme peril, of the dictator himself, qualities whose conspicuous absence has rendered Mr. Wilson's unprecedented performances really grotesque. If our democratic system of government is to be overthrown, let it be done by a masterful man, not by one so timid, so silly, as to compromise us in the eyes of the whole world by the false and ridiculous assertion that we are "too proud to fight."

MR. WILSON'S CONFESSION OF POLITICAL FAITH, IN WHICH HE CALLS THE PRESIDENCY "THE REAL THRONE OF ADMINISTRATION."

Mr. Wilson's bitterest enemy will not dare to assert that, in his efforts to exalt abnormally the powers of the Presidency and to humiliate Congress, he is at all inconsistent or unfaithful to the political creed which he proclaimed at the beginning of his career as a public man. In his well-known work entitled "Congressional Government," fifth edition, his thesis is that the Presidency was in an ideal state under the Federalist Party, when Congress was opened with the spectacle of a cavalcade and presidential oration ("a King's speech" of which he is so fond), followed by legislative responses and processions in imitation of the ancient pageantry of the British Crown conducted by the gentleman usher of the Black Rod at Westminster. In those good old days Mr. Wilson says: "He [the President] was constituted one of the three great coordinate branches of the Government; his functions were made of the highest dignity; his privileges many and substantial * * * and there can be little doubt that, had the presidential chair always been filled by men of commanding character, of acknowledged ability, and of thorough political training it would have continued to be a seat of the highest authority and consideration, the true center of the federal structure, the real throne of administration, and the frequent source of politics" (p. 41). But, according to Mr. Wilson's view, the evil days came with the development and assertion of the power of the people as vested in Congress—to use his own words, the "prestige" of the Presidency was "belittled by growth of congressional power" (p. 341). Again to use his own words: "That high office [the Presidency] has fallen from its first estate of dignity because its power has waned, and its power has waned because the power of Congress has become predominant" (p. 43). Mr Wilson's persistent and sincere purpose since he was clothed by Democratic votes with the executive power, has been to put in force his Federalist theory of government as expounded in his first book, with "the King's speech" in the center of the stage, and with Congress prostrate at the feet of the presidential office. Some faithful artist should give to the American people a graphic picture of our so called Democratic President as he appears when, wrapped in the solitude of his monarchial tendencies, he delivers his "King's speech," from "the real throne of administration," to an awe-stricken Congress. It is this new condition of things which Mr. Wilson is now asking the American people to make permanent.

MR. WILSON'S LIBEL ON THE CHARACTER OF JEFFERSON.

As all the world knows, Jefferson assumed the Presidency firmly resolved to abolish, at once and forever, "the King's speech" to Congress, with all the other monarchical flummery which Mr. Wilson so adores. Jefferson's now obsolete theory was that "the real throne of administration" should be not in the White House but in Congress, where the voice of the people could be heard. He therefore informed both Houses in writing, on December 8, 1801, that "the King's speech" would henceforth be superseded by the presidential message, which continued as a purely American institution for more than a century, until abolished by Mr. Wilson in favor of the monarchical usage of Federalist times. When his habitual bitterness toward all who oppose him or differ with him is taken into account can we wonder at the cynical and contemptuous spirit in which he claims that Jefferson was merely a poseur, a deliberately insincere demagogue, an aristocrat masquerading in the garb of a leader of the common people? In his History of the American People, Volume IV, pages 3 and 4, Mr. Wilson says: "Mr. Jefferson, an aristocrat and yet a philosophical radical, deliberately practiced the arts of the politician, and exhibited oftentimes the sort of insincerity which subtle natures yield to without loss of essential integrity. Gen. Jackson was incapable of arts or deceptions of any kind. He was, in fact, what his partisans loved to call him, a man of the people, of the common people. Mr. Jefferson was only a patron of the people, appealed to the rank and file, believed in them, but shared neither their tastes nor their passions." There is a crystal lake in the high Sierras so fathomless that it reflects only the image of the traveler who looks into its depths. And so, when the autocrat, with monarchical tendencies, who now misrepresents the party Jefferson founded, looks into that fathomless mind he can not comprehend, he sees only his own image, which he has unconsciously painted. What Mr. Wilson has said so viciously and so unnecessarily of the dead Jefferson, whose shoes he is now attempting to fill, is simply a precious bit of self revelation. The "aristocrat," the "philosophical radical," who "deliberately practices the arts of the politician," is now the President of the United States, seeking reelection in defiance of his solemn pledge not to be a candidate to succeed himself.

MR. WILSON'S REVIVAL OF "THE KING'S SPEECH" AND HIS MARKED AVERSION TO PERSONAL CONTACT WITH THE PEOPLE.

If specific proof is demanded of that assertion it is to be found in Mr. Wilson's sudden and arbitrary abolition of the inaugural ball and of the New Year's receptions, which since the foundation of the Government have been the sacramental ties binding the Presidency to the rank and file of the people. Even the cold and exclusive Adamses were willing to mingle with the people at inaugural balls and New Year's receptions. But Mr. Wilson can not go that far. He has become so proud, so pretentious, so monarchical in his habits of life that he considers it necessary, even in the summer season, to set up "the real throne of administration" in the great palace of Shadow Lawn, the vulgar and ostentatious creation of a multimillionaire.

Since Mr. Wilson's abrupt and ruthless abolition of the inaugural ball and New Year's receptions—institutions as old as the Government itself—the uninvited masses of the people have been deprived of the privilege of approaching, on such occasions, "the real throne of administration." Those who enter the White House when entertainments are given, must be specially invited by a gilded and embossed card, delivered, not through the mails, but by presidential messengers. And even when the President delivers "the King's speech" in the Hall of the House of Representatives, the general public is severely excluded. No one can go even to the galleries without a special card of admission. We may confidently expect that after the inauguration of the new President on the 4th of March next, he will announce at once, as Jefferson did, the abolition of "the King's speech," with all the monarchical flummery attending it; and the revival of the inaugural ball and New Year's receptions, which had become cherished parts of our national life.

"COURT FAVORITES" INTRODUCED BY MR. WILSON INTO AMERICAN POLITICS.

After the abolition of the two Democratic institutions just mentioned, Mr. Wilson resolved to fill the vacuum not only by the revival of the "King's speech" but by the introduction into American politics of "court favorites," an insititution imported into England from Scotland by James I, a monarch often spoken of as the intellectual and political progenitor of the dictator under whom we now live. Following in the path of his great progenitor, Mr. Wilson drove from his cabinet, at a time when they were most needed by the country, the two dominating minds that refused to bow to his insolent and self-seeking dictatorship. Thus the way was cleared for the completion of that system of political absolutism under which our Government is now carried on by a group of obscure and inefficient individuals—Mr. Wilson's personal creations, "dependent ministers," who are "mere agents of the King's will."

At the head of the "court favorites" thus introduced by Mr. Wilson into American politics stands his Duke of Buckingham, Col. Edward Makepeace House, connected only through his middle name with the august office of ambassador of ambassadors, with which he could not possibly have been associated through even the remotest knowledge of diplomacy or international law. We know that Carr and Villiers were elevated to supreme power by James I by reason of their personal beauty, but, as Col. House does not seem to possess that quality, the source of the unbounded influence of this obscure and untrained person over the President of the United States is a sealed mystery which it seems must remain forever unbroken. At a critical time in our diplomatic history, when an unselfish, patriotic, and unfettered President would have summoned Mr. Olney, Mr. Choate, Mr. John Bassett Moore, Senator O'GORMAN, or Senator HOKE SMITH, Mr. Wilson turned to an obscure personal favorite, unknown to the people and never trusted by them, who is about as well adapted to the delicate functions of high diplomacy as a cobbler to the work of a mathematical astronomer. No great office is ever filled in the Cabinet, on the bench, or elsewhere, without loud suggestions of the dominating influence of Col. House; and when the office of Secretary of State was made vacant by the resignation of Mr. Bryan, the newspapers heralded the fact, never denied from the White House, that it was entirely at the colonel's disposal if he would deign to accept it. Mr. Wilson is so obsessed by the "court favorite" idea, that he does not seem to understand that the great offices of state are not his personal perquisites to be bestowed upon obscure and incompetent individuals, entirely unconnected with our public life, simply because it suits his personal interest and convenience so to bestow them, but the property of the people held only in trust by him for their benefit.

Mr. Hughes has done well in denouncing in his campaign speeches the indefensible selfishness which has prompted Mr. Wilson to fill very many of the highest offices in the Government, at home and abroad, with fameless and incompetent persons, to many of whom he is obligated by reason of political services of a journalistic character.

All the world knows that, at the most critical moment in our diplomatic history, our Diplomatic Service has been weighted down, with a few exceptions, by such inexperienced and obscure persons as were never before accredited to the great posts. If anyone is skeptical on that subject, let him but turn his eyes to the capitals of France and the British Empire, where the most critical diplomatic work is now being carried on. Mr. Wilson, who has thus dragged our

Diplomatic Service down to a point never reached before, refused at the beginning of his administration to give either aid or comfort to a bill carefully devised for its improvement, and introduced in the House by Mr. HENRY, of Texas, chairman of the Committee on Rules, and in the Senate by Senator Bacon, of Georgia, then chairman of the Senate Committee on Foreign Relations. But Mr. Wilson's capital offense in the rewarding of personal retainers who served him in the public press is represented by his grossly unlawful elevation to the headship of the government of the District of Columbia of a journalist with no possible connection with the District in the way of residence or property, in open defiance of a statute declaring that only an actual and bona fide resident of the District, a home man, shall be eligible to that office. The question of Mr. Newman's eligibility has been tried by the courts and juries of the District, which have exclusive jurisdiction over it, and it has been solemnly adjudged by those tribunals that he be ousted from his office on account of his lack of legal capacity to hold it. And yet, in open defiance of such judgments and verdict, Mr. Newman has been kept in office by Mr. Wilson; and the people of the District of Columbia have been thus deprived by his act, aided by a technical flaw in legal procedure, of the only scrap of local self-government they possessed, simply because the President of the United States owed a political debt to a political retainer. Surely the new President will not be slow in redressing this outrage, whose author seems to be devoid of all sense of legality.

MR. WILSON'S FLAGRANT BREACH OF HIS SOLEMN COVENANT NOT TO BE A CANDIDATE TO SUCCEED HIMSELF.

Mr. Wilson enjoys the very unenviable distinction of being the first President ever accused, so far as I know, of breaking the solemn "promises and covenants" made with the people in the party platform upon which he sought and obtained their votes. Under our rigid and complex Constitution the honor system, under which the people give their suffrages in exchange for the "promises and covenants" given by nominees in party platforms, is at once vital and fundamental. Senator NORRIS hit the nail on the head when he said in a speech delivered at Washington a few months ago: "The greatest evil in American politics to-day is the dishonest nominee." The question of questions involved in the approaching election is this: Is Mr. Wilson a dishonest nominee? Despite the labored and sophistical efforts made by his partisans and apologists to obscure the real facts involved, they are too plain to be misunderstood. Unless it is legitimate to argue, as De Quincy did, that "murder is a fine art," it is unnecessary to say that when a nomination is accepted under our American honor system the nominee pledges his sacred honor to observe every part and clause of the party platform as completely as if he took an oath to that effect in a court of justice. Such has always been the distinct understanding of the American people since our honor system began. The plain facts in Mr. Wilson's case are these: The Democratic platform of 1912, to every clause of which he solemnly pledged himself, provided: "We favor a single presidential term, and to that end urge the adoption of an amendment to the Constitution making the President of the United States ineligible for reelection, and we pledge the candidate of this convention to this principle."

If ever a man had the right to speak for another, Mr. Bryan, the political creator of Mr. Wilson, who took the nomination away from the Hon. CHAMP CLARK in order to give it to him, had the right not only to speak for Mr. Wilson but to bind him by his words. As his accredited representative and spokesman, Mr. Bryan canvassed the country in his interest, making many speeches, in all of which he declared to the people what his—Mr. Wilson's—understanding was as to his candidacy for a second term. At a great meeting held at Indianapolis on October 17, 1912, Mr. Bryan said: "We present him—Mr. Wilson—not only qualified in every way, but we present him pledged to a single term, that he may be your President and spend no time dividing patronage in order to secure delegates; that he need spend no time in planning for reelection; that he may give you all his thought and all his heart and all his energy. I believe that when a man is lifted by his countrymen to this pinnacle of power he ought to tear from his heart every thought of ambition and on his bended knees consecrate his term to his country's service. That is our ideal President, and we present to you a man who measures up to that ideal." I was in Indianapolis at the time and heard those words as they were spoken by Mr. Bryan to at least 7,000 people assembled in front of the State House. When that part of Mr. Bryan's speech pledging Mr. Wilson to a single term was republished in Collier's for November 6, 1915, I called his attention to it, and he said that he had seen it. So far from questioning the accuracy of the publication, he added that he had said the same thing in all his speeches everywhere. Will any honest man undertake to say that after Mr. Wilson permitted Mr. Bryan, as his accredited representative and spokesman, to canvas the country and pledge him to a single term, as his—Mr. Wilson's—construction of the Baltimore platform, he was not as completely bound in honor as if he had made that pledge to the people in his own words? If that is not so then the political morality of Machiavelli governs here; then the American honor system is at an end; then all such pledges as Mr. Bryan gave to the people as Mr. Wilson's representative are absolutely worthless. Nobody has ever claimed that Mr. Wilson protested at the time that Mr. Bryan was not authorized to pledge him to a single term as his—Mr. Wilson's—construction of the Baltimore platform.

Painful and humiliating as the fact must be to every high-minded Democrat, it can not be denied that, despite the solemn pledges made to the people by Mr. Bryan in his name, Mr. Wilson, while President-elect, set himself to work to find some loophole through which to escape from the double obligations by which he was bound hand and foot. A sensitive mind, fully conscious of the obligations of "promises and covenants," would have been appalled by the difficulties then in the way of such an undertaking. On June 4, 1912, Mr. CLAYTON, of Alabama, as chairman of the Judiciary Committee of the House, had offered an amendment to the Constitution making the President ineligible for a second term. It was that pending amendment to which the Baltimore convention that met on June 25 directly referred. Mr. Wilson was therefore bound by every principle of honor and of duty to insist that the then pending amendment, to which he was pledged, not only by the platform but by the solemn promises given to the people by Mr. Bryan in his name, should be made at once a part of the fundamental law. Under such circumstances what did he actually do? Did he strive to secure the adoption of the amendment or did he deliberately and actively intrigue to defeat it? Let the answer to that question come from his able and experienced advocate and apologist, Mr. George Harvey, who, in attempting to make a case for him in the North American Review for February, 1916, made instead admissions that render all future attempts to defend him hopeless.

Mr. Harvey said: "But after the election of Mr. Wilson upon a platform pledging the candidate to 'the principle' avowed, the proposition was revived in the Senate, and on February 1, 1913, it was adopted by that body, 17 anti-Roosevelt Republicans voting affirmatively and only 1 Democrat, Mr. Shively of Indiana, voting in the negative. The sentiment of the House was overwhelmingly in favor of the resolution, but the Democratic leaders, feeling that their newly elected President was entitled to consultation upon a matter of so much importance and having no late information respecting his attitude, deferred action until his views could be ascertained. * * * Meanwhile the President-elect intervened in the letter to Mr. A. Mitchell Palmer, dated February 13, which was duly exhibited to Chairman Clayton and other prominent Representatives, who promptly bowed to the wish of their new leader and buried the resolution."

Thus, in by far the most studied and formal effort ever made to apologize for Mr. Wilson's wanton conduct in this regard, his advocate admits that the amendment, to whose adoption he was so solemnly bound by a double pledge, after its adoption by the Senate, was defeated in the House, where the sentiment "was overwhelmingly in favor" of it, by the active personal solicitation of Mr. Wilson, intriguing through a letter directed to Mr. A. Mitchell Palmer, not as an individual, but as chairman of the Democratic caucus. In describing that letter, Collier's for November 6, 1915, said: "Mr. Wilson dictated a long reply, about 1,500 words in length, and sent it to Representative A. Mitchell Palmer, of Pennsylvania, then chairman of the Democratic caucus." Thus even Mr. Wilson's advocates and apologists are forced to admit that the machinery of the Democratic Party was actively employed by him to defeat its and his solemn pledge to the people to limit the presidency to a single term.

MR. WILSON'S UNFAITHFUL CONDUCT A WARNING TO THE AMERICAN PEOPLE TO LIMIT THE PRESIDENT TO A SINGLE TERM.

Mr. Wilson has demonstrated by his conscienceless conduct, as described above, the lengths to which an abnormally ambitious and selfish man, lustful of power and office, may go in chasing the phanton of a second term. He trampled upon those things which most men hold most dear by actively intriguing to destroy the single-term plank of the Baltimore platform, through the use of Democratic Party machinery, even before his first term began. How pathetic and humiliating it all is when we recall Mr. Bryan's golden words: "We present him [Mr. Wilson] not only qualified in every way, but we present him pledged to a single term, that he may be your President and spend no time dividing patronage in order to secure delegates; that he need spend no time in planning for reelection; that he may give you all his thought and all his heart and all his energy. That is our ideal President, and we present to you a man who measures up to that ideal." Honest and noble-minded as he is, how sore at heart Mr. Bryan must be when he looks down on his fallen idol who has done all the things he said he would not do. The best work Mr. Bryan has ever done has been embodied in his efforts to protect his country against the terrible and growing evils of a second term. In the Indianapolis speech, in which he pledged Mr. Wilson to a single term, he said: "Eighteen years ago, when I was a young man, a Member of Congress, I introduced a resolution submitting an amendment limiting the President to a single term in office.

"Three times when I was a candidate for office I announced immediately after my nomination that if I were elected I would not be a candidate for a second term." Mr. Wilson has manifested his ingratitude for all Mr. Bryan has done for him not only by forcing him out of his Cabinet and becoming a candidate for a second term, but by wrecking the cause for which Mr. Bryan has battled so long and so unselfishly. In Mr. Wilson's so-called St. Louis platform there is not a word about a second term. Those who understand Mr. Bryan's character know perfectly well that he has a courage that can, when aroused, rise to the height of any occasion. The great moral and patriotic duty of his life is upon him now. He knows, as no other man knows, how wretched and faithless Mr. Wilson's conduct has been in violating his solemn pledge not to seek a second term. He therefore owes it to himself, to his reputation for consistency, to stand by the gospel he has preached so long and so forcefully. He owes it to the American people, he owes it to truth and justice, to rise in his high place in this Nation and, sinking partisanship in patriotism, denounce Mr. Wilson's candidacy because he knows he is a "dishonest nominee." In the presence of Mr. Wilson's broken vows to the people, for whose performances he solemnly pledged himself as guarantor, how can Mr. Bryan support him for a second term? M. Clemenceau certainly had Mr. Wilson in mind when, in defining a symbol, he said: "A man about whom the people still believe what was never true."

Is it possible that such a man as Mr. Wilson, who, to promote his inordinate and selfish ambition, has deliberately violated the solemn "promises and covenants" for whose performance he plighted his sacred honor to the American people, can, for a second time, be elevated by their votes to the chief magistracy of this Nation? That is now the question of questions, the issue of issues, which, as it involves the moral dignity of the people of the United States, can neither be concealed nor ignored. Mr. Wilson's partisans within the Democratic Party, who have been recreant in their duty to the ancient and historic organization which Jefferson founded, may shout as they will, but—

"Nor florid prose nor honeyed lines of rhyme,
Can blazon evil deeds, or consecrate a crime."

No matter whether Mr. Bryan does his duty or not, the American people must and will do theirs. For more than 30 years I have made a special study of our complex American Constitution; for the last 14 years I have lived at Washington, where I have watched its practical workings day by day, just as a machinist might watch the movements of a Corliss engine. In the light of that study and experience I do not hesitate to say that, in my humble judgment, the gravest defect in our National Constitution, that brings more evils to the people than all others combined, is represented by the lack of that amendment prohibiting a second term which Mr. Wilson's selfish ambition has for the moment defeated. His almost insane desire to succeed himself has deprived him of the power to be really useful at a critical moment in our history. His ceaseless pursuit of that will-o'-the-wisp called a second term has led him into all kinds of bogs and morasses; it has entangled him in hopeless inconsistencies; it has put him on both sides of nearly every public question; it has forced him to do things no other public man would have dared to do. The typical illustration of course is his sudden and violent change of front as to the exemption of American vessels from tolls

in a canal built by American brains and American money through American territory. Representative MEEKER, of Missouri, says Mr. Wilson is "the greatest President Great Britain ever had." I have not a word to say now as to the merits of the tolls question, as to which good and wise men have disagreed.

It is not necessary to go further than the statement that honesty and decency forbade Mr. Wilson's departure from the positive mandate on that subject of the Baltimore platform, which he specially and earnestly advocated before the people in order to catch their votes. Then, when the wind shifted and it appeared as if more votes were to be had by facing the other way, he turned about with a ruthless cynicism that would have put Machiavelli to the blush, entirely ignoring that part of the Baltimore platform, repeated in speeches by him, which declares that "Our pledges are made to be kept while in office as well as to be relied upon during the campaign." He thus demonstrated that, like King John, he is also "a king whom no oaths can bind"; that he is a man whom "even treachery can not trust." At one time Mr. Wilson gave us brilliant and conclusive reasons why the sending of arms and munitions into Mexico, which may be used against ourselves, was a wrong not to be tolerated. Then, when the wind shifted, he demonstrated in the same brilliant and conclusive way that such reasons have no real value at all. I wonder if he ever remembers, when engaged in these perilous acrobatic performances, which only a sublime and fatalistic vanity could inspire, the terms in which he denounced Jefferson, "an aristocrat and yet a philosophical radical," who, he says, "deliberately practiced the arts of the politician, and yet exhibited oftentimes the sort of insincerity which subtle natures yield to without the loss of essential integrity." Can the American people so stretch its mantle of Christian charity as to bring the "subtle" Mr. Wilson within his own saving clause? Can they force themselves to believe that he has been able to commit his graver offenses "without the loss of essential integrity"?

MR. WILSON'S UTTER FAILURE TO UPHOLD OUR DIGNITY AS THE GREATEST OF THE NEUTRAL NATIONS.

Instead of offending all true Democrats by assailing the "essential integrity of Jefferson"; instead of abusing that genius and patriot as "an aristocrat," as a "philosophical radical," as "a patron of the people," Mr. Wilson should have devoted himself more carefully to the study of the great Virginian's mighty work in laying the foundations of the modern law of neutrality, of which he seems to have only a hazy notion. When the European nations were, then as now, tearing each other to pieces on land and sea Jefferson was wise and thrifty enough to perceive that the American clipper ships then decorating our Atlantic seaboard could do a great business, as they did, if an enforceable law of neutrality could be created. Really the greatest of Jefferson's achievements, from a practical point of view, is represented by his part in the creation of the modern law of neutrality, by which the world has been governed from his time down to its recent abolition by the British and German Empires. And yet Jefferson's work, intellectual as it was, would have been a failure had it not been for the stern moral dignity of Washington, who understood that the very essence of neutrality depends upon an unswerving impartiality that refuses to favor one belligerent as against the other. When Jefferson, full of love and partisan feeling for France, showed signs of sympathy for Genet's design to make our shores bases for French expeditions against Great Britain, Washington planted his great foot on the earth and said, "No!" He refused to play favorites; he refused to make fish of one and flesh of another.

If Mr. Wilson had only been wise enough and honest enough to learn that great yet simple lesson from the master character, how much higher in the respect of the world should we stand to-day! I sympathize with him in his partiality for the allies. I also have British blood in my veins, but not so much as he has—one-half. Mr. Wilson constantly forgets, when he expresses distrust of people with foreign blood in their veins, what a typical hyphenated citizen he himself really is.

If I were in power I know I would be tempted, just as Jefferson was, to do very unlawful things for great and glorious France, never so splendid, so heroic, as now. But all such weakness is unworthy when the duty of neutrality is involved. Mr. Wilson should have refused, as Washington did, to play favorites; he has had no right, legal or moral, to be the secret ally of the allies, while claiming to be neutral. If I were to yield to my personal feelings I would favor France and Great Britain as against Germany; but I would not favor either at the expense of the neutral commerce of the United States, which Mr. Wilson has shamefully failed to defend. We have been outraged and trampled upon on the high seas by both the German and British Empires without any real satisfaction from either. The mangled bodies of American men, women, and children, one of them of my own family connection, have floated away unavenged from the wreck of the *Lusitania;* the cotton of the South, the food products of the Middle West, the mineral products of the far West have been unlawfully seized by the British Navy as contraband; the mails have been violated, without any substantial redress. Mr. Wilson does not seem to understand that the primary purpose of our diplomatic system is to obtain actual redress for wrongs done to our citizens, and not to put into circulation rhetorical diplomatic literature whose force would be double if its volume were reduced by more than one-half. We have had notes, notes, notes, like Amos Cottle's poem, with "lines 40,000, cantos 25"; but we have had no actual redress of any practical kind. To the intolerable wrongs inflicted on the persons and property of our neutral and unoffending citizens by the British and German Empires, we have only responded with paper bullets bearing the pathetic inscription, "Too proud to fight!"

From the foundation of the Government it has been considered the high duty of the President to appoint to the office of Secretary of State the foremost statesman and diplomatist of the country. Washington was not too proud to lean upon Jefferson; Jefferson upon Madison; Taylor upon Webster; Pierce upon Marcy; Lincoln upon Seward; Grant upon Hamilton Fish; Hayes upon Evarts; Cleveland upon Olney; McKinley upon John Hay; Roosevelt upon Elihu Root. But at the most critical moment in our diplomatic history Mr. Wilson feels that he is omnipotent enough to get along with Mr. Robert Lansing and Col. Edward Makepeace House! Who can wonder that Mr. Hughes, in arraigning Mr. Wilson, should say: "If we are to have a Secretary of State, we want a man who will stand before the world as a man of learning, of skill, of experience, of power." Mr. Wilson's greatest weakness is his sublime and flamboyant egotism, which deludes him with the fancy that he is strong enough to clear the executive stage of all possible rivals so that he may star alone. He thinks that as the maker of "the king's speech" he should be "the whole show"; he does not believe there is glory enough for all; he thinks that all power and importance should be vested in himself, no matter how much the country may suffer thereby. Thus he presents the pathetic image of a vain and vacillating opportunist struggling in a bog, and refusing to be aided by stronger and more experienced men, because he is unwilling that anybody should share with him the glory of doing things. What would happen if Mr. Wilson should suffer a genuine spasm of patriotic unselfishness, free from all self-seeking, self-glorification of any kind?

THE MEXICAN HORROR.

No American can look upon the Mexican horror without a sense of pain; no Democrat can look upon it without a sense of humiliation, because the grave condition of things existing when President Wilson entered into office has been converted into a prolonged drama of death and destruction by his unprecedented and offensive intermeddling with the internal government of a friendly State, in open defiance of the most elementary principle of international law. As Mr. Wilson took into his own hands the management of this business by the appointment of his special and confidential agent, Mr. John Lind (the President's "personal spokesman and representative" in the regulation of the internal politics of Mexico), he made himself directly and personally responsible for all that has happened since that time. He opened Pandora's box when he dared to trample upon that elementary principle of the law of nations, which sternly forbids one State to intermeddle in the internal politics of another, by applying that grossly unlawful pressure that resulted in the deposition of the de facto President, Huerta, the only man capable of maintaining order, who had been actually recognized by Great Britain, France, Germany, Russia, Spain, and Japan. It is almost incredible that an American President, claiming to be an upholder of the law of nations, should have dared to intermeddle with the internal politics of Mexico, not only by attempting to destroy its de facto ruler, recognized as de jure by many of the world powers, but by declaring that such ruler would not be permitted to be a candidate for the office of President at the election which Mr. Wilson demanded. As there is no precedent for such flagrant and insulting intermeddling in the internal politics of a friendly State, can we wonder at the Mexican hatred of Americans, which Mr. Wilson's unlawful conduct has so intensified?

After deposing Huerta, President Wilson recognized, in his place and stead, Gen. Carranza, who seems to revel in the destruction of American lives and property and in the pitiless persecution of the Catholic Church. I have had from the lips of one of the sufferers, a religious born in the South, a description of the conditions that have driven from their convents many nuns who were compelled to put on secular dress and to seek shelter in Catholic homes from outrages, too terrible for words, inflicted upon their associates. I have talked with an exiled Mexican bishop forced under the Carranza regime into hiding for months in humble abodes in order to save his life. Will Mr. Wilson's blindest partisan contend that any good thing has so far resulted from his unlawful and offensive intermeddling with the internal affairs of this friendly State? When our citizens have appealed to him for protection they have been told to fly for their lives; when they have asked him to obtain indemnity for their losses they have been comforted only by a vague and icy smile.

When the future historian undertakes to reduce to some kind of order Mr. Wilson's bewildering and fantastic performances in Mexico, he will be forced to confess that in one particular at least he has been brilliantly consistent—that whenever he has professed to do one thing he has invariably done the opposite. After a correct and ostentatious declaration that the Mexican people have the right to fight it out among themselves; that we have no right to intervene in their internal affairs, he set on foot two armed interventions, both of which have ended in pitifully lame and impotent conclusions. After the publication of a sound state paper setting forth the best of reasons why we should not sell arms and munitions to neighbors, actively engaged in disturbing our peace by cutting their own throats, he reversed himself by expressly authorizing what he had sternly condemned.

On July 10, 1915, a great American newspaper stated the case fairly when it said: "The only Mexican since Diaz able to keep order in Mexico City was Huerta. President Wilson declared a sort of personal war on him, with the armed forces of the United States. Mr. Wilson drove Señor Huerta out of Mexico and is now keeping him out, while permitting the other Mexican revolutionary leaders and plunderers to come and go freely. The export of ammunition to Mexico is permitted, then forbidden, then repermitted in spasmodic fits and starts." That "spasmodic fits and starts" policy represents the only contribution actually made by a nervous, fidgety, and irresolute opportunist, who has aggravated a difficult situation, first, by a wanton disregard of an elementary principle of international law; second, by the lack of that kind of consistency and force which a commanding President would have supplied.

PRESIDENT CLEVELAND AND PRESIDENT WILSON CONTRASTED.

In the famous Venezuelan case, President Cleveland, backed by his great Secretary of State, Mr. Olney, demonstrated what a President of real moral dignity and authority could accomplish through unbending resolution, even against the greatest of the world powers, at a time when our military and naval unpreparedness was at its height. Diplomacy draws its strength not so much from the man behind the gun as from the man behind the pen, when that man, speaking not as a timid rhetorician but as the real mouthpiece of a great compelling Nation like our own, is known to be one who means what he says. Great Britain bowed at the critical time in question to our primacy in the New World, because Lord Salisbury knew that when President Cleveland put that high and inevitable construction on the Monroe doctrine, which Mr. Wilson is industriously striving to undermine, he was ready to maintain it even at the cost of our last dollar and our last man. President Cleveland never said once: "We are too proud to fight."

Since Mr. Wilson has forced an unwilling Congress to crown 95,000,000 of American citizens with a bitter national humiliation through the abject surrender of their sacred rights to the imperious demands of a mere handful, it is impossible not to recall the splendid courage of President Cleveland who, in 1894, with the great Richard Olney at his side as Attorney General, appealed under like circumstances to the courts, whose final judgment was recorded in the Debs case, in which the Supreme Court of the United States said: "The strong arm of the National Government may be put forth to brush away all obstructions to the freedom of interstate commerce or the transportation of the mails. If the emergency arises, the Army of the Nation and all its militia are at the service of the Nation to compel obedience to its laws." With the entire force and authority of the American people at his command, Mr. Wilson preferred to display upon his banner the now familiar device—"Surrender." Thus on Sunday morning last occurred the most abject moment in the life of this Republic when the chiefs of the four railroad brotherhoods, who had frightened and coerced the President of the

United States by a threat, put into his hand the four pens (their trophies of victory) with which he signed, as his act and deed, the fatal admission that the Government of this Nation, while in his keeping, had lost the right to think and act as a free agent!

"One hour of Grover Cleveland or Theodore Roosevelt would have settled the question," said Representative GILLETT, of Massachusetts, "but President Wilson listened to the voice of expediency and failed in his duty."

MR. CLEVELAND'S ESTIMATE OF MR. WILSON.

What a blessing it would be if we could have Mr. Cleveland now! But as we can not, we must be content to profit by his estimate, very carefully made, of the only Democrat who has occupied the White House since that time. For some years Mr. Cleveland lived at Princeton while Mr. Wilson was at the head of that institution, participating with him in its management. Thus he was able to study the president of Princeton at close range and to see him from every angle. In the light of such intimate knowledge the great ex-President made a very careful estimate of Mr. Wilson, which he deliberately expressed at Princeton in no vague or uncertain terms. I therefore appeal to every Cleveland Democrat to ascertain what that estimate was and to weigh it well before he consents to vote for the reelection of a man who solemnly pledged himself neither to seek nor accept a second term. By his bad faith in breaking the solemn "promises and covenants" contained in the platform upon which the people elected him; by his cold-blooded selfishness in building up a personal and political dictatorship upon the rules of the party that trusted him, Mr. Wilson has fully confirmed all that Mr. Cleveland said of him. It would be a sad commentary on human nature if such an unprecedented line of presidential conduct had not aroused in the minds of the real leaders of the Democratic Party, many of whom refused to attend "the cut-and-dried" St. Louis convention (the ripe fruit of Mr. Wilson's political dictatorship), a sense of indignation and revolt, which is only kept down by a noble spirit of loyalty and self-abnegation that impels them to believe that the future of the party might be injured by the dethroning at this critical moment of a leader whom they despise personally and distrust politically.

THE THINGS MR. WILSON STANDS FOR.

As Mr. Wilson was careful to define beforehand in books most of the political theories and vagaries he has put into practice since his elevation to the Presidency, it is very easy to epitomize precisely the things he now stands for. In the first place, he stands for the new and revolting political gospel which teaches that bad faith should be made the basis of American politics by dispensing the President of the United States from the performance of the solemn "promises and covenants" made by him to the people in party platforms; in the second, for the contention that the Presidency is "the true center of the Federal structure, the real throne of administration, and the frequent source of policies"; in the third, for the contention that "that high office [the Presidency] has fallen from its first estate of dignity because its power has waned, and its power has waned because the power of Congress has become predominant"; in the fourth, for the contention that the old condition of things should be restored by making the Congress a subordinate and dependent body, subject to the direction and control of the Executive; in the fifth, for the contention that "the King's speech" should be reestablished in the place of the presidential message, which the "aristocrat," the "philosophical radical," the "patron of the people," Jefferson, inaugurated; in the sixth, for the contention that the President should not mingle with the uninvited masses of the people at inaugural balls and New Year's Day receptions; in the seventh, for the contention that a Democratic President should be, ex officio, the political dictator of his party; in the eighth, for a timid and vacillating foreign policy based on the false and humiliating assumption that we are 'too proud to fight"; in the ninth, for the most stupendous annual appropriations ever made in the history of the American people.

The words of the Baltimore platform are these: "We denounce the profligate waste of money wrung from the people by oppressive taxation through the lavish appropriations of Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a democratic Government and a reduction in the number of useless offices, the salaries of which drain the substance of the people." To that burning denunciation the Republican national committee has just made this laconic and crushing reply: "The total 'appropriations' of the last Republican Congress (two sessions) amounted to $2,054,000,000. The appropriations of this Congress (two sessions) will total at least $3,400,000,000. The increase in the appropriations due to preparedness is $390,000,000, which leaves an increase of $200,000,000 of actual appropriations over last session." Is it strange that in the presence of such a humiliation Mr. Wilson should have cried out in his speech of acceptance, just delivered in the summer palace at Shadow Lawn: "Boasting is always an empty business which pleases nobody but the boaster, and I have no disposition to boast of what the Democratic Party has accomplished." Mr. Wilson has nothing to boast of but failures which surround us on every side, both at home and abroad, so far as his performances are concerned.

Is there any partisan of Mr. Wilson so blind or so uncandid as to deny that he has formally and solemnly committed himself to each of the nine propositions set forth above, either by his printed declarations or by his solemn public acts? If he is reelected, he will attempt, of course, to make such deadly and undemocratic theories the permanent bases of our national life. What kind of a Democrat, what kind of an American, who believes in government "of the people, by the people, and for the people," can conscientiously support a presidential candidate standing upon a platform composed of those nine propositions, which completely overthrow the famous trilogy which Mr. Lincoln proclaimed as the true basis of our national life? Under such conditions I deem it the duty of every patriotic American, no matter what his past political affiliations may have been, to give his earnest support to the candidacy of the Hon. Charles E. Hughes, a wise and patriotic statesman, whose life has been an open book and whose character for courage, candor, and faithfulness has never been impugned. At this particular juncture I believe that his views on the tariff should be as attractive to thoughtful Democrats as to Republicans, because the soundest of our economists and financiers believe that after the end of the present world war only the enforcement of such views can save us from a catastrophe. My personal admiration for and confidence in Mr. Hughes as a man add to my pleasure in assuring you that I deem it my duty to give him my humble and cordial support. Use my name as you may see fit in behalf of the candidacy of Mr. Hughes.

HANNIS TAYLOR.

**Issue of the Coming Campaign.**

## EXTENSION OF REMARKS

OF

# HON. CHARLES B. TIMBERLAKE,

OF COLORADO,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. TIMBERLAKE. Mr. Speaker, the first session of the Sixty-fourth Congress—the first session also in which I have been privileged to take part in the deliberations of this greatest of all popular legislative bodies—is rapidly drawing to a close. Each of us will go to give his constituents an account of his stewardship and will do his best to justify not only his individual acts, but also those of the party to which he bears allegiance. As to the discharge of the first of these responsibilities I will make incidental reference in the course of my remarks, but in the main it is my purpose to apply myself to a consideration of what the party in power has done, or has failed to do, so far as the interests of the Government and the people are concerned.

It is not easy to see how the Democratic spellbinders will justify the course of their party during the past three years. Its control of the Government since the 4th day of March, 1913, is marked by profligate extravagance in expenditures, by disregard of existing law, by flagrant indifference to party obligations as assumed in the Baltimore platform, by failure in fulfilling solemn promises to the people of the United States. It has sinned so greatly that its offenses are too numerous for the index.

When the Democratic Party came into power it found in the Treasury a rich surplus, which it converted into a deficit. It found a fiscal machinery producing a more than sufficient income for all the needs of the Government and immediately proceeded to upset it and substitute an abortive something that has reduced the revenues from imports to the lowest notch.

In my arraignment of the Democratic Party at the bar of public opinion I make this the first count, because I believe the tariff to be the overshadowing issue in the impending election campaign. It certainly is that in the State of Colorado, for the people of the district which I have the honor to represent here, and the people of the entire State have not forgotten the sugar-tariff legislation in the Underwood law. There are in my district 9 beet-sugar factories, and 17 all told in the State. The 25 cents reduction which went into effect in 1914 caused some of them to shut down, and all would have closed if sugar had gone on the free list in May of this year, as provided in the tariff act of October 3, 1913.

The sugar-beet farmers and the beet-sugar manufacturers of my State, as of Michigan and other States, can thank the war in Europe—that bloodiest of all slaughters in the history of the world—that they are not all commercially and financially ruined. If the beet-sugar exports from Germany had not been suspended because of the compulsory inactivity of the German merchant marine, the imports of sugar from that country would have made competition by American manufacturers impossible.

The Democratic Party has always been most vociferous in its protestations of affection for the farmers, but the very first thing it did was to put the big products of our farms on the free list. The cattle and corn of Argentina were brought into free competition with the cattle and corn of the Western and Southwestern States, and wheat from Canada and wheat flour from anywhere and everywhere were cordially invited by the Democratic tariff tinkers to enter the American market against the domestic products. Timber and lumber had proper protection in Republican tariffs, but the Democrats could not bear to see that American industry prosper, and so they put these, too, on the free list. I may be allowed to paraphrase a famous apostrophe thus: "Oh, tariff for revenue only, what crimes are committed in thy name!"

In my district—the best agricultural district in Colorado—there are large areas of irrigated land and a large semiarid territory especially adapted to dry farming, dairying, and stock raising, and where these interests are quite extensive. In so far as the Agricultural appropriation bill passed at this session fostered those interests I gave it my hearty support by speech and vote, and was really glad that there was one piece of Democratic legislation to which I could give unqualified assent. But, Mr. Speaker, the injury done by the Underwood tariff to the stock raisers of Colorado has not been condoned and will be remembered at the ides of November.

Colorado is rich in minerals. Copper, zinc, lead, and tungsten abound there. The largest tungsten deposits in this country are in Boulder County, in my district. Under the Payne-Aldrich law all these minerals had proper protection, but in the Underwood law the rates have all been cut and thereby the importation of the foreign article has been encouraged. Under the tariff of 1909 tungsten paid a duty of 25 per cent ad valorem. The Democrats cut the rate to 15 per cent. That it needs protection is apparent from the fact that nowithstanding the enormous demands by the warring nations for this metal more than 1,000,000 pounds per month is imported into the United States. Surely the people of Colorado are not to be blamed if they again range themselves under the banner of the party which has always given the right sort of consideration to their material interests.

However, I shall not dwell any longer on the wrongs which my State and district have suffered through Democratic legislation, but survey the larger field of national woes. In 1912 the Democrats went from one end of the land to the other and raised their favorite cry that the high cost of living was due to protective-tariff duties. They asserted—and unfortunately enough of the people believed what they said—that Democratic tariff legislation would be sure to bring down prices. The land would flow with milk and honey if only those pesky Republicans could be turned out. And it was done. Whereupon the Democrats constructed the tariff schedules with which the country is now burdened. Did prices come down? Not so that you could notice it. On the contrary, quite the reverse. Prices have kept on climbing up and up, until to-day the cost of living is higher than ever. I do not blame the Democrats for this condition, but what I do blame them for is for humbugging the people into false beliefs and getting into power under false pretenses.

There is one result, however, of these Democratic tariff vagaries, shown by the irrefutable evidence of official statistics, and that is that the revenues of the Government drawn from customs duties have steadily fallen off ever since the Underwood tariff law went into effect. The Sixty-third Congress took so much of the imports out of the dutiable list and put them into the free list that the imports of the latter have increased year after year. I am not going to indulge in any elaborate statistical exhibits, but just to illustrate my statement I will say that during the last three fiscal years of the Payne-Aldrich tariff—1911, 1912, and 1913—the free imports aggregated, in round numbers, $2,646,167,000, while in the last three fiscal years of the Underwood tariff—1914, 1915, and 1916—they footed up $3,653,693,000, or over a billion dollars more. In the same relative periods the dutiable imports under the Underwood tariff were $235,000,000 less than under the Payne-Aldrich tariff.

There is a sample of your vaunted Democratic tariff legislation. What would be thought of a merchant who would buy every year more of the goods on which he would lose money and less of the goods that would yield him a profit? Well, that is just what the Democrats did, and that is the reason why a Treasury deficit even in the first year of the Wilson administration was inevitable. But worse than that happened. Factories closed down; business failures increased; thousands of men were thrown out of employment; and the old Democratic trade-mark—soup house and bread line—was once more in evidence.

In the face of all this the Democratic administration—the President and all his Cabinet officers, at that end of the Avenue, and the Democratic Senators and Representatives at this end—have the "gall" to proclaim that prosperity reigns in the land. They point to the greatly augmented exports of the last two fiscal years and to the great trade balance in favor of the United States caused by this increase. I am going to puncture that prosperity bladder with just a pin prick of truth. I will show that this prosperity is of the hothouse variety; that it will not last beyond the duration of its one and only great cause—the war in Europe.

The Underwood tariff was a blight upon the country even before it had become a law. It did not create a single new industry, but it crippled many an existing one and gave the deathblow to others. The coming event did cast its shadow before. Months before the law went into effect capital was withdrawn from the market of enterprise; manufacturers curtailed their output; some concerns closed down altogether before the threatened flood of the cheap-labor products of Europe and the Far East. The opening of the year 1914—the first year in which the effects of the Wilson administration's activity were felt—was black with business depression everywhere.

Then, like a stroke of lightning from a clear sky, broke the awful war in which now 14 nations are arrayed against each other. The exporting power of Germany and her allies was laid low by the overpowering might of the British Navy, and the countries that had consumed her products had to look elsewhere.

Naturally all turned to the one great country whose producing power was not crippled. The United States was called upon to supply everything the belligerents needed in food, in clothing, but especially in arms, ammunition, and the articles that went into the manufacture of them. Exports of these things increased with leaps and bounds. To meet the extraordinary demand and reap the unusually large profits that went with it, existing factories in those specialties increased their plants, while others forsook their accustomed lines of manufacture and joined in the general scramble for foreign munition contracts. Labor found employment and at wages far beyond the ordinary. Naturally exports increased, and the balance of trade grew proportionately.

The Department of Commerce recently sent out a bulletin stating that the trade balance for the fiscal year ended June 30, 1916, was two thousand two hundred and seventy-three million dollars as against one thousand two hundred and twenty-five millions in 1915 and only four hundred and forty-three millions in 1914. It appears, however, from a careful analysis of the export statistics for 1916 that of the articles exported those directly required by the excessive needs of the European nations, belligerents as well as neutrals, represented an export value of two thousand one hundred and fifty million dollars. The excess of this over 1914, therefore, was one thousand seven hundred and seven millions. Deduct this from the one thousand eight hundred and thirty millions excess over 1914 shown by the figures of the department and there remain but one hundred and twenty-three millions increase during a period not to be compared with any other in the world's history.

It can be seen, then, at a glance that this prosperity will last, perhaps, as long as the war; no longer. No American in whom the love of mankind is alive will be sorry to see the end of a prosperity that is built up out of the ruin and misery of other nations, upon a holocaust such as now brings mourning into millions of families. Indeed, I can see it waning even now, for England and France have managed to bring their capacity for manufacturing arms and ammunition to the highest possible point of efficiency; Russia is rapidly doing the same; and Japan is aiding them all with large supplies of war material. I am not a prophet, but I will risk the prediction that the end of the current fiscal year will show a very considerable decrease in our trade balance.

After the war, then what? If the Democrats remain in control of the Government we will still be saddled with the Underwood tariff, although the present revenue bill, passed under the stress of expenditures greatly in excess of revenues, has established some sort of duty on dyestuffs, after the duty on sugar had been restored by former legislation. All the belligerent nations, England and her allies on the one hand, and Germany and her allies on the other, have entered into agreements which aim at nothing less than partitioning the markets of the world among themselves and flooding those markets with their goods made, as before, with much cheaper labor than can be had here or is wanted here.

Can the United States stand up under a competition such as that without a tariff strong enough to protect its industries? Can American wages be kept up and the American standard of living be maintained under such conditions? Will the American people by their votes perpetuate a tariff policy which robs every merchant of his customers and every farmer of the slender profits on his products? If they want real prosperity again to bless the land, if they would raise up effectual bars against the deluge of cheap labor products which will beat against our shores when Europe is again at peace, if they would have the country ready for the ruthless commercial war in which she must take part, then there is but one way to do it—send Mr. Wilson back to the classic shades of Princeton and the Democratic Party to the obscurity which it graces better than anything else that I can think of.

There is, however, another side to the picture. The Democratic platform of 1912 fairly reeked with declamations against alleged Republican extravagance, and all the Democratic spellbinders that went into the highways and byways howled the refrain. Likewise it was promised that with Democratic rule there should come genuine economy in all the affairs of the Government. Let us see how that promise has worked out. The Democratic textbook of 1910 had a comparison of the appropriations during the Cleveland administration from 1894 to 1897 with those of the four years (1907 to 1910) of the Roosevelt administration. For the former it gave $1,866,440,200; for the latter, $3,842,307,577.

In the Sixty-third Congress—1913 to 1915—the Democrats, as stated by Mr. FITZGERALD, chairman of the Committee on Appropriations, on this floor on March 4, 1915, ran up a bill of $2,231,-239,546, the largest amount ever appropriated in two years. The appropriations for the first session of the present Congress will come close to $1,700,000,000. That makes nearly $4,000,-000,000 appropriated in three years, or about sixteen millions more than was appropriated during the four Roosevelt years. Add to this the probable appropriations during the next session of this Congress, beginning December, and there appears the unheard-of sum of something like five and one-half billion dollars.

This, mark you, is what Democrats understand to be economy. Republicans would call it shameful extravagance, even though an allowance be made to the extent of some $500,000,000 for the unusual expenditures necessitated on account of a larger Army establishment and a greater Navy. In this case, too, history has repeated itself, for the Democrats of 1916 have had recourse to a bond issue to meet current expenses, just as under the Cleveland administration there was a bond issue of $200,000,000 for the same purpose.

Some of these appropriations I supported by my vote, because they commended themselves to my judgment as being required for the proper development of the varied interests of the country; others I opposed. Thus I gave hearty concurrence to the Agricultural appropriation bill, because every dollar that promotes the farming interest is well spent. I voted for the preparedness measures, because I know the people of Colorado want to see their country ready for any emergency that may arise. While I supported the Lenroot amendment to the river and harbor bill, appropriating $20,000,000 for the proper care of improvements already begun, I voted against the bill as a misuse of the public money after the Lenroot amendment failed, because I do not believe in the "pork barrel." Rather reluctantly I gave my vote to the flood-control bill, because I believed that it does not deal with the problem in a way to accomplish the best results. In my opinion, flood control should begin at the upper reaches of a river and that the waters should be impounded and used in reclamation projects.

The shipping bill met my earnest opposition. I conceive that ownership of public utilities is utterly foreign to our scheme of Government. Not only do I believe that individual private enterprise can deal far better with subjects of this character, but I also know that the amount of $50,000,000 is entirely insufficient to make any impression in our favor in the world's ocean carrying trade. Instead of encouraging private enterprise this law will deter capital, for private capital will not enter upon the unequal contest of competition with the Government or Government-aided projects. For similar reasons I opposed the appropriation of $20,000,000 for a nitrate plant, as I considered the scheme to have been conceived in the interest of a private corporation.

The revenue bill did not get my vote. True, I favor an income tax properly levied, and I could vote conscientiously for a tax on the excess profits of war munitions manufacturers. In a general way, however, the bill violates my convictions as to how revenue for the Government should be raised. Also, while I am heartily in favor of a tariff commission, I do not want one created with a view to the perpetuation of Democratic tariff policies.

I now retrace my steps, Mr. Speaker, from more or less personal considerations to the contemplation of larger issues. And this contemplation is not a cheerful one, for it concerns what has been mistakenly, perhaps ironically, designated as the foreign policy of the Wilson administration. The domestic policies of the Democratic Party are in all conscience bad enough, but the foreign policy of which we have been witnesses for the last three years is something simply unspeakable. In the forefront stands poor Mexico. There has never been such a spectacle since we became a nation. In considering the Mexican situation it ought to be remembered that our neighbor Republic has always depended more or less upon the moral influence of the United States. It was that which caused Napoleon III to recall Bazaine and his 50,000 troops and leave poor, deluded Maximilian to his tragic fate. It was that which sustained Porfirio Diaz through the more than 30 years of his rule. It was that which virtually made and unmade Madero, and finally it was President Wilson's refusal to recognize Huerta which compelled the latter to quit.

This was the initial false step of President Wilson in regard to Mexico, for Huerta was the only strong man Mexico had at the time. Then followed a succession of disgraceful happenings, all the outgrowth of Mr. Wilson's miserable policy of "watchful waiting." When our flag was insulted at Vera Cruz we sent our warships there in a hurry to demand satisfaction by a salute from the Mexican Government to the Stars and Stripes. The salute did not materialize, and, though the guns of Admiral Fletcher's ships were trained upon the citadel, no shot was fired. We were "too proud to fight," even though 17 American lives had been sacrificed.

Mr. Wilson knew that he was dealing with a people four-fifths of whom were illiterates and little better than savages. If he had been animated by the altruism which he professes on every occasion he would have taken some steps to restore affairs in Mexico to an orderly basis. Instead of that he first dickered with Villa and then with Carranza, meanwhile permitting shipments of arms and ammunition and dynamite to go across the border to be used most effectively against American soldiers some months later.

Then came the latest flare-up. Villa, moved to contempt of the American Government, raided Columbus, killed some of the inhabitants, got a lot of loot, and escaped across the border. Troops were rushed to the Rio Grande from all parts of the country; a so-called punitive expedition was sent into Mexico—which, by the way, is now being withdrawn, although nobody has been punished—the National Guard was called out and sent down there, and then "the mountain labored and brought forth the ridiculous mouse" in the form of a mixed commission which is going to bring about a modus vivendi, or something equally as good. Can anybody conceive that such a muddle could have been brought about under a Republican President?

No less unfruitful has been the alleged foreign policy as applied in the dealings with the belligerent nations of Europe. Outrage upon American citizens and property succeeded outrage, first by one of the combatants and then by another, and they were met by the State Department, under the direction of President Wilson, with diplomatic notes, the majority of which made little or no impression upon the offenders. The fact is—and it may just as well be realized by our people now as later on—that the foreign policy, always so called, of this administration has caused the United States to be cordially disliked by almost every foreign nation. If our ambassadors, ministers, and consuls were permitted to say what they know they would tell the American people that the United States has not a friend among the nations of Europe.

Nothing could be further from my thoughts than to make a sectional issue, at least so far as that term used to be understood. But I can not forbear to call attention to the fact that in nearly all legislative enactments in which different sections of the country had contending interests the Southern States have almost invariably had the better of it. The cause of this discrimination may be discovered in the circumstance that of 58 committees of this House 40 are presided over by men from the South or politically affiliated with that section, and the same is true, though in a somewhat less degree, of the Senate, where 31 out of 75 committees have southern Senators as their chairmen.

The Democratic platform of 1912 had something in it about the civil service. It said:

> The law pertaining to the civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political party.

Some time ago the slogan was "Public office is a public trust," but evidently under the present administration this has been changed into "Public office is a private graft," for never since civil-service reform laws were first put upon the statute books has there been such persistently mischievous paltering in the application of them. By direction as well as by indirection has the civil service of the Government been debauched by appointments the beneficiaries of which were not required to undergo the examinations required by law.

It is a notorious fact that in the face of protests entered by the Civil Service Commission the rules governing appointments were suspended in hundreds, if not thousands, of cases by Executive order, and men and women were placed in positions which were subsequently covered into the classified service so as to make the appointees safe against arbitrary removal. But the disregard of the civil-service principle was carried even further and shown more flagrantly in the acts of the Democratic Congress. I will cite just a few of the more glaring of these transgressions.

On June 23, 1913, technical services in the Office of the Supervising Architect of the Treasury Department—the office in which all the plans for public buildings throughout the country are prepared—were exempted from the classified service. On October 3, 1913, agents, deputy collectors of internal revenue, inspectors, and other employees in connection with the income tax were exempted from the civil-service rules. Employees under the Federal reserve act were not included in the civil-service regulations. Commercial attachés, appointees under the

Department of Commerce, were exempted from the regulations of the merit system. The act creating the Federal Trade Commission exempted a long list of employees from these regulations. The same is true in a large measure as to appointments under the rural-credit act. And here is another nut to crack. Representative Good, of Iowa, a member of the Committee on Appropriations, is authority for the statement that the Democrats have created at least 30,000 new positions at an annual cost to the country of over $36,000,000.

Not the least reprehensible feature of this business is that in a number of instances the legislation was rushed through as "riders" on appropriation bills. This vicious method of legislating has been resorted to by the Democrats whenever they had some pet scheme which they did not want to subject to the rigid scrutiny of the opposition, and of the passage of which, by ordinary and orderly procedure, they had serious doubts. No censure of these methods can be too severe. They are against public policy and mischievous in the extreme.

Last, but not least, in my schedule of indictments is this one against the President, that he has assumed the rôle of dictator in his dealings with the Congress. He has been the boss of bosses. There used to be a good deal of talk of Roosevelt's "big stick." Why, my friends, compared with the Wilson schoolmaster's rod that stick was as feeble as a straw. A noteworthy fact in this connection is this: That the psychological processes of the presidential mind were subject to such sudden changes that the things which on one day the Congress had been ordered to do, it was commanded to undo the next. And the worst of it all is that the Democratic Congress has been pitifully, weakly subservient to its master. I make the assertion—and I challenge contradiction—that there has never from the days of Washington until now been any such arrogant dictation on the part of the Executive toward the lawmaking body of the Nation.

It is impossible to believe that a party which has so betrayed its trust is going to be allowed by the people to remain in control of the Government. The differences which for a while caused dissensions in the Republican Party have been transmuted into cordial harmony. With the utmost confidence do I look forward to the 4th day of March, 1917, when Charles Evans Hughes will take the oath of office as President of the United States, and with him there will come a Republican Senate and a Republican House of Representatives.

## National Legislation and Work of Congress.

### EXTENSION OF REMARKS
OF
### HON. CHARLES O. LOBECK,
OF NEBRASKA,
IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. LOBECK. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting a speech of the Hon. John A. Maguire, Member from Nebraska in the Sixty-first, Sixty-second, and Sixty-third Congresses, in relation to the work in Congress and his experience here. I thank the Speaker and the Members of Congress for the privilege of inserting this speech in the RECORD, for it covers in a very complete manner the work of Congress, telling how the fathers of the Nation provided for a Congress consisting of two branches, the Senate and the House, time and place where Congress meets, how the records are kept, the rules of the House, when bills are brought up for discussion—in fact, take it all in all, it is one of the best speeches that I have had the pleasure to read relative to the work of Congress, the duties of Congressmen, and the manner by which the people of the Nation are brought into close contact with the work of the Government.

Mr. Maguire, with whom I had the pleasure to serve in the Sixty-second and Sixty-third Congresses, was one of the most industrious and popular Members of the House while here, and a man who served his constituents constantly and faithfully, and it affords me pleasure to have this excellent address which contains so much valuable information printed in the RECORD.

The address is as follows:

ADDRESS OF HON. JOHN A. MAGUIRE.

NATIONAL LEGISLATION AND CONGRESS—A COURSE IN CIVICS FOR STUDENTS OF THE LINCOLN HIGH SCHOOL.

Under the Federal Constitution the legislative power of the National Government is vested in Congress. In the Government which preceded our constitutional period the legislative power was vested in the Continental Congress, which consisted of one body. The great men who drew up our present Constitution wisely provided that Congress should consist of the Senate and the House of Representatives, with powers both concurrent and exclusive. As the Federal Government itself is one of limited and delegated powers, so the legislative branch, or the Congress, has limited and specific jurisdiction over certain matters and general and absolute jurisdiction over other matters, as provided in the Constitution of the United States. Although the legislative, executive, and judicial branches of the Government are independent of each other, still they are coordinate, and each, acting within its own sphere, may check or develop the constitutional functions of government.

SENATE AND HOUSE.

In the Capitol Building, at Washington, Congress meets in annual session on the first Monday in December and in extraordinary session when called by the Executive. The Senate occupies the north wing and the House of Representatives the south wing of the Capitol.

In the Senate there are 96 Members, elected by direct vote of the people in the various States, and each State is entitled to two Senators. Before the adoption of the seventeenth amendment to the Constitution, the State legislatures elected the Senators. The Senate is a continuous body, and each Senator is elected for a term of six years.

In the House of Representatives there are 435 Members, elected by the people for a term of two years. The States are divided into congressional districts, each district elects one representative, and if the population of the State justifies more, they may be elected at large—e. g., Illinois has 25 and 2 at large. The Territories of Alaska and Hawaii have one Delegate each, Philippine Islands has two Resident Commissioners, and Porto Rico one Resident Commissioner.

It may be said in connection with the election of both Senators and Representatives that there is a Federal law limiting campaign contributions and expenditures, and in most of the States corrupt-practices acts supplement the Federal law.

RULES—RECORD.

Each House adopts its own rules of procedure and parliamentary practice, which may be changed or amended at the pleasure of the respective bodies. In recent years a very radical change was made in the House rules, the effect of which, briefly, was to take away the power of appointing all the standing committees of the House from the Speaker and place it in the hands of the Ways and Means Committee, which is the ranking committee, and is itself appointed by the House. The rules of the Senate have become more permanent and have resisted successfully nearly every attempt at change.

The CONGRESSIONAL RECORD, printed and published daily, contains the verbatim account of all debates and votes in both Senate and House. Each body also keeps a Journal of its proceedings.

HOUSE POPULAR BRANCH.

The House of Representatives is the popular branch, and its membership and control may change every two years. As the business of the country has grown, the work of Congress has steadily increased, and the time will soon come, if not now at hand, when Congress will find it necessary to sit in continuous session to attend to the great volume of public business.

The theory of our Government recognizes the right of the majority to rule, and therefore we have a system of party government. The two Houses of Congress have frequently been in control of different political parties—e. g., in the Sixty-second Congress the House was in control of the Democrats and the Senate in control of the Republicans and the administration was Republican. This condition results in divided responsibility, and often important measures or policies fail because of partisan strife.

In essential features of a legislative body, the two Houses of Congress are not different from the State legislature of any of our States. At the beginning of each new Congress the House elects a Speaker and other officers. Under present rules the Speaker, although a Member and can debate and vote on any and all questions, is otherwise merely a presiding officer. Until recently the Speaker represented and used as its leader the power of the party majority.

MAJORITY, MINORITY, AND COMMITTEES.

The majority and minority leaders are chosen by their respective parties by caucus. The chairman of the Ways and Means Committee of the House becomes majority leader, according to precedent. All the standing committees of the House, under present rules, are nominated by the Ways and Means Committee and formally appointed by the House. In selecting

the members of committees, however, the chairmanship and a majority of the membership are given to the majority party in control. The rights of the minority are recognized under the rules of the House and respected on the floor.

BILLS, RESOLUTIONS—COMMITTEES.

All legislation is initiated by the introduction of bills, which are referred to one of the several committees for consideration and such action as they choose to take. If favorable action is taken by the committee, the bill is reported back to the House, usually accompanied by a written report, and the bill is placed upon its proper calendar and waits its turn to be called up for consideration. The printed daily calendar guides the House as to all bills pending as having been acted upon by some committee. In order to facilitate the business of the House certain days of the week are devoted to special groups of bills. The alternate Mondays are known as unanimous-consent days, and bills on the Unanimous Consent Calendar may be called up on Monday, but upon objection by any Member the bill can not be considered that day. The other Mondays are known as District of Columbia days, when legislation pertaining to the District of Columbia is considered. Fridays are given to pensions and private bills, and Wednesdays are Calendar Wednesdays, when the committees are called in order for any bills ready for consideration. Other days are given to appropriation bills and administration measures or other general bills. When appropriation bills are up the House resolves itself into the Committee of the Whole and general debate is agreed upon, and then the bill is read by sections and paragraphs for amendments and further debate under the five-minute rule. In this way dry speeches are made and much useless debate, which goes into the overburdened RECORD. When the bill is perfected in the Committee of the Whole it is reported back to the House, and a vote taken, either viva voce or by yea-and-nay vote. Only yea-and-nay votes appear in the RECORD.

CAUCUS—FILIBUSTER—LOBBY.

In connection with legislative bodies, and especially Congress, there are three familiar phrases which might properly be given some attention here. These are the caucus, the filibuster, and the lobby.

Both the caucus and the filibuster concern directly the Members, while the lobby is an outside influence. The caucus is a product of party government and may or may not serve a useful and proper purpose. If public servants go into secret caucus and there bind their own actions and consciences, even against the interests of the public and of their constituents, then the caucus is a vicious thing. But if, on the other hand, a caucus or conference is held to determine how a party by united action can best carry out its pledges made to the people, and such caucus does not attempt to bind public servants against their own sense of duty, then the caucus may serve a proper and useful end. Take, for example, the demand for rural-credits legislation. No two Members of Congress agree upon just what sort of bill is best. There are nearly as many different bills on rural credits as there are Members of the House. Now, without some surrender of individual views and compromise rural-credits legislation will fail. If the party charged with the responsibility for passing such legislation can meet and reach a substantial agreement in caucus on the best possible measure, then by united action the rural-credits legislation will be passed, pledges redeemed, and the interests of the people served.

The filibuster is resorted to in legislative bodies by those who oppose or want to obstruct certain legislation. Rarely does the filibuster serve any useful purpose. Its common method is by Members getting the floor and keeping it by long and irrelevant speeches or by roll calls and parliamentary tactics to delay and obstruct the regular order of procedure. The House, by its rules, makes filibuster practically impossible, but the Senate is the stronghold of the practice and seems helpless to prevent it because of the long-standing custom of unlimited debate in the Senate.

The lobby is a creature of selfishness and special privilege which persistently seeks its own as against the public welfare in securing or preventing legislation. The insidious lobby uses any means from bribery to blackmail and libel to browbeat or cajole public men. The milder and more seductive method of the lobby is to establish a press bureau to control or influence public opinion or direct local sentiment or to stir up a propaganda of letter writing and telegrams, urging this or protesting against that. Still more effective has been the method to win over the particular committee which has their special legislation under consideration. Nothing is too good for such a committee—big dinners and banquets, free junketing trips, contributions to their campaigns for reelection, and so forth.

There is, of course, a wide distinction between the professional, paid lobbyist and the citizen who writes to his Congressman giving his own views on any public question, or the individual who goes to Washington to appear before a committee to testify at a public hearing on any bill or resolution in which he or his people are interested.

LAWS—PRIVATE AND PUBLIC.

It may be said that all legislation in Congress falls into one of three groups, viz, that which is national or public in its nature and effect, that which is local and private in effect, and that which is applicable to the District of Columbia. Examples of the legislation which is of national importance are the tariff laws, currency laws, all of the so-called administration measures, affecting agriculture, rural credits, conservation, homesteads, water power, merchant marine, the judiciary, the Army, the Navy, and a great many other matters of more or less national importance. All these questions occupy by far the greater part of the time of the committees and of Congress. Public legislation of a local nature covers the authorization for construction of bridges over navigable streams, purchase of sites and construction of post-office and other public buildings, erection of monuments, and so forth. Legislation of a private nature includes granting by special bills pensions and increase in pensions, relief bills for injuries received in Government service, correcting military records, claims against the Government, claims for stolen Government property, such as postage stamps, and so forth; claims for taxes and duties collected through error or without authority of law, and so forth. And finally legislation affecting primarily the District of Columbia comes within the power and duty of Congress. All of the governmental functions for the city of Washington and the District of Columbia must be based on direct action of Congress or by general congressional authority given the Commissioners of the District of Columbia. Not even a street extension can be made without an act of Congress.

All legislation, whether public or private, originates in the form of a bill or resolution introduced in either the House or Senate. In the House the bills are designated as "H. R." and are numbered consecutively from 1 on during the entire Congress of two years. In the Senate the bills are designated as "S." and numbered in similar manner. Then there are simple House and Senate resolutions, designated by "H. Res." and "S. Res." Also, concurrent resolutions, designated "H. Con. Res." and "S. Con. Res."; and finally joint resolutions, designated "H. J. Res." and "S. J. Res.," numbered by Congresses during two years. All bills except bills for raising revenue, which must originate in the House of Representatives, as provided in the Constitution, may originate in either House of Congress, and before becoming law must pass both Houses and receive the approval of the President, or pass over his veto by a two-thirds vote of each House. Appropriation bills, through custom, originate like revenue bills in the House.

Simple resolutions, to be effective, require only agreement of the House, if a House resolution, and of the Senate, if a Senate resolution. The concurrent resolutions, when agreed to in both Houses, become effective, but in case of simple resolutions they do not become statutory in the sense that bills and joint resolutions do. Joint resolutions require the approval of the President and become public resolutions and are found in the statutes. The one exception among the joint resolutions is one proposing an amendment to the Constitution of the United States, which does not require approval by the President, and which becomes effective upon passage in each House by two-thirds vote. The total number of bills and resolutions introduced last Congress was as follows:

| | |
|---|---|
| House bills in the Sixty-third Congress | 21,616 |
| House resolutions in the Sixty-third Congress | 753 |
| House concurrent resolutions in the Sixty-third Congress | 61 |
| House joint resolutions in the Sixty-third Congress | 441 |
| Senate bills in the Sixty-third Congress | 7,751 |
| Senate resolutions in the Sixty-third Congress | 574 |
| Senate concurrent resolutions in the Sixty-third Congress | 38 |
| Senate joint resolutions in the Sixty-third Congress | 245 |
| Total bills and resolutions | 31,479 |
| Total public laws and public resolutions | 417 |
| Total private laws and private resolutions | 283 |
| Total | 700 |

DUTIES OF CONGRESSMAN.

Space will not permit of further discussion on the general work of Congress, but it seems to me pertinent that something should be said touching the relation of a Representative or Senator in Congress to his district and to his constituents. A very able and prominent American has said that a public man must not only strive to become a statesman, but he must also keep

sufficiently in touch with his constituents that his opportunities may continue. A public servant who tries to be of the greatest service to his country and his constituents will find that he is a very busy man. It is a great honor to be in Congress, but that honor carries with it very many and arduous duties.

The daily sessions of the House or Senate begin at noon and often earlier and continue until 5 or 6 or even late into the night. Contrary to public opinion, oratory plays very little substantial part in the practical work of legislation. Constant, industrious efforts are called into play and accurate knowledge and experience and personal influence of the Members contribute far more than smooth speech to the perfecting of intricate matters of legislation. A vote for or against the scores of amendments that may be offered to a bill may be just as important as a vote on the passage of the bill itself.

One of the greatest burdens, as well as a most important part of congressional service, is work upon the several committees. Each member is expected to serve on one or more of these committees according to his assignments. The work is looked upon by many as drudgery and requires long tedious hours for days and weeks of careful painstaking scrutiny of all bills before the committees for action. Especially the great appropriation bills involve weeks of hearings and a mass of testimony in the preparation of the supply bills for our great Government. The importance of committee work is apparent when it is known that the very best, first-hand information is available to the committees and the actual legislation is made or unmade when the committee reports its bill to the House or Senate. In passing upon the work of the committees, the House or Senate rarely departs in the main from the bill as drafted in committee. The committees of Congress, when they do their work fearlessly, conscientiously, and thoroughly, form a great bulwark between the interests of all the people and the legislative body proper, which might otherwise act hastily or without full information.

Another great and important part of a Congressman's service comes through his opportunity to keep in close touch with all the Government departments and seek to bring the results and benefits of their research, scientific, and experimental work directly to his people in the various States.

BRINGING THE GOVERNMENT NEAR THE PEOPLE.

Our Government is a great business concern, with departments and bureaus to meet the growing needs of a great Nation. Every State and every district can and should participate in the work of the Central Government for the greatest prosperity and welfare of our people. From my own experience I might mention a number of lines of activity in which the Federal Government aids directly or cooperates with the States.

In Lincoln we have a post-office building and a new addition now nearing completion. The agricultural college and experiment station bring to the attention of the farming industry in a practical way much of the work of the Department of Agriculture, and the distribution of Farmers' Bulletins brings into the homes free a library of valuable information. Not only the Post Office and Railway Mail Service but the local land office, Weather Bureau, Public Health Service, are all Federal agencies benefiting directly the people of each community.

The Government also cooperates with the States and counties through the Bureau of Animal Industry, corn investigations, soil surveys, topographic surveys, drainage, reclamation, hog-cholera eradication, and good roads. Nor does the Government neglect to help the business interests of the country. Government publications are sent free on cotton production and distribution, commerce reports, tide tables, trade directory, export trade to South America, labor statistics, weekly news letter of Department of Agriculture, radio service, weather and crop service, postal savings banks, and recently the Federal Reserve Bank System.

A Congressman's troubles are not all over when he has attended to his legislative and departmental duties. His office is always a busy workshop, and the vast amount of correspondence to which he must devote his personal attention grows into very large proportions and increases with his service in public life. A very large amount of office work is in the nature of individual requests and must receive careful attention, whether they be of great importance or not.

Hearing from home and trying to determine the sentiment of the constituents on the matters of special interest offers one of the difficulties for a Representative in Congress. In his effort to reflect the predominant sentiment at home a public man must beware of artificial sentiment manufactured by propaganda. The spontaneous views of unbiased people with knowledge of all the facts might well serve a wholesome purpose in determining the course a public man ought to pursue when he is in doubt as to his duty.

## Forecasting the Election of Woodrow Wilson in the Coming Elections.

EXTENSION OF REMARKS

OF

# HON. JOHN H. STEPHENS,

OF TEXAS,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, September 8, 1916.*

Mr. STEPHENS of Texas. Mr. Speaker, under leave granted me to extend my remarks in the RECORD I include an editorial from to-day's Washington Post, the leading—politically independent—paper published in this city, whose editorial writer never strains his conscience to write anything in praise of a Democratic administration.

The editorial is as follows, namely:

A MEMORABLE SESSION.

From December 6, 1915, to September 8, 1916, the period covered by the first session of the Sixty-fourth Congress, events moved rapidly at home and abroad. These seven months are crowded with historical developments, some of them the outcome of impulses begun years ago and others serving as impulses that will profoundly affect the future. Congress has been both radical and conservative, gratifying and disappointing. It has transacted an enormous amount of work, with no more lost motion or looseness of tongue than other Congresses. Its attitude toward world affairs has been extremely conservative. It has kept its temper and its peace in the face of great provocation, and doubtless few Members now regret that foreign relations were left in the hands of the President.

If Congress had done nothing else than enact the national-defense bills, it would have earned public approval. In this legislation Congress measured up to the great national assemblies of the past, faithfully reflecting the true spirit of American independence and determination to guard American liberty. Courage and clear vision were displayed by both bodies in providing for a strong, modern Navy and a satisfactory Army, with accompanying facilities and means for securing effectiveness.

The catalogue of legislation enacted during the session is long. Some of the laws are good, and others are better. For better or worse, the session goes into history, and the two political parties line up for or against the record in a battle royal for control of the Government. The people will pass upon the individuals and the parties.

The Post extends its congratulations to Senators and Representatives for the work performed. It wishes them a pleasant vacation and good fortune in November, and will cordially welcome them next winter, whether they have won or lost.

The same paper, in an adjoining column to that just quoted, editorially approves the action of the Democratic conferees in their report on the revenue bill which passed both Houses of Congress last night, and says:

THE PHELAN AMENDMENT.

The conferees on the revenue bill evidently had no regard for public sentiment when they struck out Senator PHELAN'S amendment denying the use of the mail, telegraph, express, wireless, and cable facilities to the citizens of countries which deny or abridge similar facilities to American citizens. The passage of this amendment by the Senate was instantly approved by the public, which has waited long and patiently for some relief from the unwarranted interference with oceanic mails, the abuse of military censorship, cable espionage, etc.

It is said that the conferees based their action upon the fear that American citizens abroad would be subjected to still greater injury if a policy of retaliation should be authorized. But this argument, if it is valid at all, applies with still greater force to the other retaliatory provisions which the conferees suffered to remain in the bill. If injury to American citizens is feared there should be no retaliation of any kind or nature against any offending nation, for all of them are capable of further acts of injustice to American interests. This country for more than two years has tried the policy of nonresistance and mild expostulation, with ever-increasing encroachment upon American rights as the only visible result. Protests mean nothing whatever, unless supported by the power to retaliate in some manner that will make it unprofitable for foreign nations to violate American rights.

The mere power to retaliate, accompanied by notice that it would be exercised if necessary, would be sufficient to bring relief. The belligerents will go as far as they can in trampling upon neutrals' rights. They will stop when they find it is unwise to go further. Having found that the United States was powerless to retaliate, the belligerents have not hesitated to commit acts which in normal times would be classed as grossly unfriendly, if not deliberate incitements to war. Now, if Congress makes known the fact that it fears to authorize retaliation, the aggressions of belligerents will be redoubled.

President Wilson may be safely entrusted with the power of retaliation against any kind of interference with American interests and rights. He would not use this power in all its rigor any more than the belligerents go to extreme limits of aggression. The knowledge that he had been provided with a powerful defensive weapon would be sufficient to make his protests effective.

Mr. Speaker, it is well known that the great body of silent independent voters in this country decide all elections, and if we are to judge in advance the result of the coming fall election—from the above editorials of that great paper—Woodrow Wilson will be chosen to succeed himself as President of these United States.

**The 640-Acre Stock-Raising Homestead Bill—Why Final Action Failed to be Taken Upon the Bill Before Adjournment of the Session.**

---

## EXTENSION OF REMARKS
OF

# HON. PATRICK D. NORTON,
OF NORTH DAKOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, September 8, 1916.*

Mr. NORTON. Mr. Speaker, I desire to say a few words to make clear why final action was not taken before the adjournment of this session this morning on House bill 407, being the bill entitled "An act to provide for stock-raising homesteads, and for other purposes." During the past three years I have been deeply interested in having enacted into law legislation such as proposed in this bill. Since the beginning of this Congress my closest attention has been given to this bill and my best efforts have been employed to secure favorable and final consideration of the bill before the close of the session. The legislation provided for in this bill will, when placed upon our statute books, result in placing new settlers and desirable farm home builders upon practically all the unappropriated Government lands in western North Dakota and in western South Dakota and upon large areas of Government lands in other western States.

The bill was passed by the House on the 16th day of last January, and on the 20th of January was referred in the Senate to the Senate Committee on Public Lands.

Much opposition to the bill was encountered in the Senate, and for a long time the friends of the measure despaired of getting favorable action upon it at the other end of the Capitol.

This morning the friends of the bill in the Senate were finally able to have it called up and considered and passed with the amendments recommended by the Senate Committee on Public Lands. The bill, with the Senate amendments, was returned to the House at 10 minutes after 9 o'clock, less than an hour before the time set for the final adjournment of the Senate. At the moment the bill reached the House from the Senate this morning myself and other friends of the bill in the House immediately considered the possibilities of having the amendments of the Senate agreed to in the House and the bill enrolled and signed by the President before 10 o'clock, the time set for adjournment. Our investigations and inquiries disclosed that it would be physically impossible for the enrolling clerks to enroll the bill as amended by the Senate and prepare it for the President's signature before the hour for adjournment. Accordingly it has been necessary for the House to let the bill go over for consideration until the next session of the Congress in December. I wish to say in conclusion that I am hopeful that at an early day in the next session of the Congress favorable and final action will be taken upon this meritorious measure in the House and that it will be then sent to the President for his approval. The following is the bill as passed by the Senate. New provisions added to the bill by the Senate are shown in italics. Matter in brackets are those portions of the House bill that were stricken out by Senate amendments.

An act (H. R. 407) to provide for stock-raising homesteads, and for other purposes.

*Be it enacted, etc.*, That from and after the passage of this act it shall be lawful for any person qualified to make entry under the homestead laws of the United States to make a stock-raising homestead entry for not exceeding 640 acres of unappropriated unreserved public land in reasonably compact form: *Provided, however*, That the land so entered shall theretofore have been designated by the Secretary of the Interior as "stock-raising lands."

SEC. 2. That the Secretary of the Interior is hereby authorized, on application or otherwise, to designate as stock-raising lands subject to entry under this act lands the surface of which is, in his opinion, chiefly valuable for grazing and raising forage crops, do not contain merchantable timber, are not susceptible of irrigation from any known source of water supply, and are of such character that 640 acres are reasonably required for the support of a family: *Provided*, That where any person qualified to make original or additional entry under the provisions of this act shall make application to enter any unappropriated public land which has not been designated as subject to entry (provided said application is accompanied and supported by properly corroborated affidavit of the applicant, in duplicate, showing prima facie that the land applied for is of the character contemplated by this act), such application, together with the regular fees and commissions, shall be received by the register and receiver of the land district in which said land is located and suspended until it shall have been determined by the Secretary of the Interior whether said land is actually of that character. That during such suspension the land described in the application shall not be disposed of; and if the said land shall be designated under this act, then such application shall be allowed; otherwise it shall be rejected, subject to appeal.

SEC. 3. That any qualified homestead entryman may make entry under the homestead laws of lands so designated by the Secretary of the Interior, according to legal subdivisions, in areas not exceeding 640 acres, and in compact form so far as may be subject to the provisions of this act, and secure title thereto by compliance with the terms of the homestead laws: *Provided*, That a former homestead entry of land of the character described in section 2 hereof shall not be a bar to the entry of a tract within a radius of 20 miles from such former entry under the provisions of this act [subject to the requirements of law as to residence and improvements], which, together with the former entry, shall not exceed 640 acres: *Provided further, That the entryman shall be required to enter all contiguous areas open to entry prior to the entry of any noncontiguous land: Provided further*, That instead of *residence and* cultivation as required by the homestead laws the entryman shall be required to make permanent improvements upon the *additional* land entered before final proof is submitted tending to increase the value of the same for stock-raising purposes, of the value of not less than $1.25 per acre, and at least one-half of such improvements shall be placed upon the land within three years after the date of entry thereof.

SEC. 4. That any homestead entryman [of lands of the character herein described,] who has not submitted final proof upon his existing entry, shall have the right to enter, subject to the provisions of this act, such amount of contiguous lands designated for entry under the provisions of this act as shall not, together with the amount embraced in his original entry, exceed 640 acres, and residence upon the original entry shall be credited on both entries, but improvements must be made on the additional entry equal to $1.25 for each acre thereof.

SEC. 5. That persons who have submitted final proof upon, or received patent for, lands [of the character herein described] under the homestead laws, and who own and reside upon the land so acquired, may, subject to the provisions of this act, make additional entry for and obtain patent to contiguous lands designated for entry under the provisions of this act, which, together with the area theretofore acquired under the homestead law, shall not exceed 640 acres, on proof of the expenditure required by this act on account of permanent improvements upon the additional entry.

SEC. 6. That any person who is the head of a family, or who has arrived at the age of 21 years and is a citizen of the United States, who has entered or acquired under the homestead laws, prior to the passage [hereof] *of this act*, lands of the character described in this act, the area of which is less than 640 acres, and who is unable to exercise the right of additional entry herein conferred because no lands subject to entry under this act adjoin the tract so entered or acquired or lie within the 20-mile limit provided for in this act, may, upon submitting proof that he resides upon and has not sold the land so entered or acquired and against which land there are no encumbrances, relinquish or reconvey to the United States the land so occupied, entered, or acquired, and in lieu thereof, within the same land-office district, may enter and acquire title to 640 acres of the land subject to entry under this act, but must show compliance with all the provisions of this act respecting the new entry and with all the provisions of existing homestead laws except as modified herein [:*Provided*, That the lands so relinquished or reconveyed as herein provided shall thereafter be subject to disposition only on such terms and under such rules and regulations as the Secretary of the Interior may prescribe].

SEC. 7. That the commutation provisions of the homestead laws shall not apply to any entries made under this act.

SEC. 8. That any homestead entrymen or patentees who shall be entitled to additional entry under this act shall have, for 90 days after the designation of lands subject to entry under the provisions of this act and contiguous to those entered or owned and occupied by him, the preferential right to make additional entry as provided in this act: *Provided*, That where such lands contiguous to the lands of two or more entrymen or patentees entitled to additional entries under this section are not sufficient in area to enable such entrymen to secure by additional entry the maximum amounts to which they are entitled, the Secretary of the Interior is authorized to make an equitable division of the lands among the several entrymen or patentees, applying to exercise preferential rights, such division to be in tracts of not less than 40 acres, or other legal subdivision, and so made as to equalize as nearly as possible the area which such entrymen and patentees will acquire by adding the tracts embraced in additional entries to the lands originally held or owned by them: *Provided further*, That where but one such tract of vacant land may adjoin the lands of two or more entrymen or patentees entitled to exercise preferential right hereunder, the tract in question may be entered by the person who first submits to the local land office his application to exercise said preferential right.

SEC. 9. That any person who has heretofore acquired title to land [of the character designated in this act] under any of the homestead laws of the United States and who is the owner and occupant of the land so acquired may purchase from the United States not exceeding 320 acres of stock-raising lands, as designated by this act, or unappropriated and unreserved lands valuable only for grazing contiguous to his said homestead, upon paying to the United States the sum of $1.25 per acre for such lands, under such rules and regulations as may be prescribed by the Secretary of the Interior, which said land, together with the area theretofore acquired under the homestead laws, shall not exceed 640 acres.

SEC. 10. That all entries made and patents issued under the provisions of this act shall be subject to and contain a reservation to the United States of all the coal and other minerals in the lands so entered and patented, together with the right to prospect for, mine, and remove the same. The coal and other mineral deposits in such lands shall be subject to disposal by the United States in accordance with the provisions of the coal and mineral land laws in force at the time of such disposal. Any person qualified to locate and enter the coal or other mineral deposits, or having the right to mine and remove the same under the laws of the United States, shall have the right at all times to enter upon the lands entered or patented, as provided by this act, for the purpose of prospecting for coal or other mineral therein, provided he shall not injure, damage, or destroy the permanent improvements of the entryman or patentee, and shall be liable to and shall compensate the entryman or patentee for all damages to the crops on such lands by reason of such prospecting. Any person who has acquired from the United States the coal or other mineral deposits in any such land, or the right to mine and remove the same, may reenter and occupy so much of the surface thereof as may be required for all purposes reasonably incident to the mining or removal of the coal or other minerals, first, upon securing the written consent or waiver of the homestead entryman or patentee; second, upon payment of the damages to crops or other tangible improvements to the

owner thereof, where agreement may be had as to the amount thereof; or, third, in lieu of either of the foregoing provisions, upon the execution of a good and sufficient bond or undertaking to the United States for the use and benefit of the entryman or owner of the land, to secure the payment of such damages to the crops or tangible improvements of the entryman or owner, as may be determined and fixed in an action brought upon the bond or undertaking in a court of competent jurisdiction against the principal and sureties thereon, such bond or undertaking to be in form and in accordance with rules and regulations prescribed by the Secretary of the Interior and to be filed with and approved by the register and receiver of the local land office of the district wherein the land is situate, subject to appeal to the Commissioner of the General Land Office: *Provided*, That all patents issued for the coal or other mineral deposits herein reserved shall contain appropriate notations declaring them to be subject to the provisions of this act with reference to the disposition, occupancy, and use of the land as permitted to an entryman under this act.

SEC. 11. That lands containing water holes or other bodies of water needed or used by the public for watering purposes shall not be designated under this act but may be reserved under the provisions of the act of June 25, 1910, and such lands heretofore or hereafter reserved shall, *while so reserved*, be kept and held open to the public use for such purposes under such general rules and regulations as the Secretary of the Interior may prescribe: *Provided*, That the Secretary may, in his discretion, [designate as stock driveways and withhold from entry under this act lands not over one-fourth mile in width needed for use in movement of stock to summer and winter ranges or to shipping points] *also withdraw from entry lands necessary to insure access by the public to watering places reserved hereunder and needed for use in the movement of stock to summer and winter ranges, or to shipping points, and may prescribe such rules and regulations as may be necessary for the proper administration and use of such lands.*

SEC. 12. That the Secretary of the Interior is hereby authorized to make all necessary rules and regulations in harmony with the provisions and purposes of this act for the purpose of carrying the same into effect.

## The So-Called Eight-Hour Law for the Railroads.

### EXTENSION OF REMARKS
OF
### HON. AUGUSTUS P. GARDNER,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

*Thursday, September 7, 1916.*

Mr. GARDNER. Mr. Speaker, I was one of those who voted on Friday against the so-called eight-hour law for the railroads. As a matter of fact, it is not an eight-hour law at all. This law does not curtail the trainmen's workday by a single minute. If an engineer has been receiving $5 for working 10 hours a day, the passage of this bill will raise his pay to $6.25; but it will not shorten his workday even the tenth part of a second. This is no more like the true eight-hour principle than chalk is like cheese.

The reason why people call this an eight-hour law is because it says that in the case of railroad trainmen they shall get their day's pay for the first eight hours' work, and all the rest is to be considered overtime.

I am glad to see the growth of the eight-hour day in this country. I mean the real eight-hour day, the eight-hour workday. I voted for the law which provides an eight-hour day for everyone who works on a Government contract. I spoke and voted in behalf of an eight-hour day for every woman employed in the city of Washington. But those were real eight-hour workdays for which I spoke and voted. Those eight-hour laws permit no overtime. They provide for an eight-hour day and not a minute more, except in the case of real emergency.

Perhaps the trainmen are underpaid. If so, they ought to have submitted their whole demand to impartial arbitration. They would not do it. They said—and President Wilson backed them up—"No; you must begin by granting us two-thirds of our demand, and then we'll arbitrate the rest." Now, that does not seem to me to be a square deal for the railroads and the traveling public and the farmers, who have their grain and produce to ship. I am not sure that it is a square deal for the rest of the railroad employees, either. This law does not affect section hands nor trackwalkers nor shopworkers nor laborers nor the bridge and building forces, nor any other employees of a railroad not immediately connected with the train service. They will not get any shorter hours or any more pay under this law, and yet they contribute over two-thirds of the railroads' working force, and, as a rule, they get the poorest pay, too. Do you think the public will be in the mood to pay the bill for an increase in pay for these folks after they begin to feel the effects of this new law?

Anyway, I do not think that this House ought to legislate under compulsion. The trainmen served notice that we had to legislate the way they told us, and do it mighty quick, or we should see the whole country paralyzed.

I, for one, will not knuckle under to that kind of talk. Do not tell me that this strike could not have been called off or postponed if President Wilson had shown that he meant business. I do not for one minute believe that these four brotherhood leaders started the blaze going without knowing how to put it out. One of them admitted that he could put it out, so far as his own brotherhood was concerned, but that his followers would think that he had gone back on them if he were to do so.

I am mighty sorry to vote against this bill. Of course, I know that it will hurt on election day, and I am under obligations to the brotherhoods for helping me out of a tight place politically a few years ago. Nevertheless every now and then a Congressman is face to face with the question as to whether he is going to be a man or a mouse. Just for once I made up my mind to be a man and take the consequences.

## Speeches of President Wilson and Others Delivered at Hodgenville, Ky., at the Acceptance by the Government of the Lincoln Homestead.

### EXTENSION OF REMARKS
OF
### HON. BEN JOHNSON,
OF KENTUCKY,
IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, September 6, 1916.*

Mr. JOHNSON of Kentucky. Mr. Speaker, I avail myself of the privilege granted by the House to extend my remarks by inserting the speeches made by President Wilson and others at Hodgenville, Ky., on September 4, 1916, at the acceptance by the Government of the Lincoln homestead.

PRAYER OFFERED BY WILLIAM ARTHUR GARFIELD OPENING CEREMONIES AT LINCOLN FARM, HODGENVILLE, KY., SEPTEMBER 4, 1916.

Almighty God, our Father, we assemble here this hour in Thy name. We voice to Thee the profound gratitude of a thankful Nation. We thank Thee for the kindly providence that has been over us and has brought us to this hour; we thank Thee for this beautiful day, and for the many tender and precious memories which shall ever cluster about this time and place; we thank Thee for a great Nation, and we are sincerely grateful that we live and abide in peace.

Oh Lord, thou ruler of nations and of men, grant, we beseech Thee, that we may ever remain at peace with the other peoples of the earth and that we may dwell together in unity and peace within the State.

We thank Thee for the great men who have lived and guided the course of our people; above all are we to-day thoughtful and grateful for the life which we memoralize at this sacred hour.

We are grateful for clear minds and memories whereby we cherish the lives and deeds of men of other days, and gain inspiration for nobler living and better service.

We voice to-day the gratitude of the American people for the life and leadership and ministry of Thy servant, the President of these United States. We invoke Thy gracious favor and blessings to rest richly upon him. Grant unto him wisdom for every task, strength for every burden, and grace for every trial. Counsel him by Thine own unerring counsel and enable him to direct the course of the State aright.

We invoke Thy gracious benediction to be upon all this great company, upon the people of our land everywhere, in their homes and about their firesides, in the shop and place of toil.

Do thou lead and direct us always along the pathway of duty and of service, of pleasure, and of peace.

Let ours be the life of service and of blessing, let Thine ever be the glory. Amen.

BRIEF TALK BY GEN. JOHN B. CASTLEMAN—CONFEDERATE ARMY VETERAN INTRODUCES FORMER GOV. FOLK AT LINCOLN FARM CEREMONIES.

Gen. John B. Castleman, in introducing former Gov. Folk, said:

"Our President, our countrymen:

"Believing in life eternal we come by the goodness of Almighty God, animated by patriotic reverence for the man of humble birth whose achievements furnish to all mankind everlasting inspiration.

"It is significant that the distinguished citizen who is chairman of our reception committee is the son of a Confederate soldier; that at Hodgenville the statue erected to the memory of

the immortal President was dedicated by a Confederate soldier; that at the capital of his native State the statue of Abraham Lincoln was presented in behalf of a United States war veteran, by a Confederate States war veteran.

"Our fellow citizens, we testify here the world's obligation to Robert J. Collier, who led, and to those who with him followed, in preservation of the farm and perpetual care of the cabin home where was born the child who became the godlike man.

"To me has been assigned the privilege of formally presenting to you, the executive head of the Lincoln Farm Association, a southern boy, born in the southern State of Tennessee, once governor of the southern State of Missouri, legal adviser of a great tribunal, designed to afford to the people safeguards instilled by Abraham Lincoln. I have the honor to introduce Joseph W. Folk, of the United States."

—

ADDRESS OF FORMER GOV. JOSEPH W. FOLK, PRESIDENT OF THE LINCOLN FARM ASSOCIATION, ON OCCASION OF FORMAL TURNING OVER OF THE LINCOLN FARM TO THE UNITED STATES GOVERNMENT, HODGENVILLE, KY., SEPTEMBER 4, 1916.

This country has produced many men whose names have emblazoned the pages of history, but no name is dearer to the hearts of Americans than that of the simple and sublime Lincoln, who literally sprang from this soil to become the mightiest of the mighty. His birthplace was as lowly as that of the Man of Galilee, whom he resembled so much in the sorrows he knew, the burdens he bore, and the love of humanity he manifested. This crude cabin preserved in this magnificent marble mausoleum is consecrated by the life of the man who here came into the world. No poet's fancy, no dream of fiction, can equal the emerging from this humble hut of extreme poverty of one whose steps were destined to shake the world and whose mission was to rededicate a united nation to the cause of freedom.

As a people we are indeed rich in the achievements of the foremost of our American public men. Washington fought to give us this Nation, guaranteeing rights to the individual never obtained or exercised by any other people; Lincoln struggled to keep it a government of the people, for the people, and by the people. Jefferson taught the civic truths so necessary to the happiness of a free people; Lincoln, with patient understanding, applied these truths to the troubles of his time. Jackson thundered against and overcame the evils of his day; Lincoln, with a heart for any fate, breathed a new force into the doctrines of Jackson and steered the ship of state into a peaceful harbor.

The spirit of Lincoln is more alive to-day than when he walked in the flesh. His ideals live and pulsate through millions of American freemen. He founded an Americanism that is not a matter of creed or national descent, but an ideal of the soul and of the mind; an Americanism that is not merely a union of political entities but of a common aspiration and a common destiny; an Americanism so virile that there need be no nation so strong we should fear it, or so powerful we must cower at its feet; an Americanism so just that the golden rule may be the supreme law guiding us in our diplomatic relations with other nations; an Americanism ready to defend against the aggression of all nations, but intentionally offending none in upholding the principle of the rights of man throughout the world; an Americanism that gives inspiration to those who love liberty everywhere and encouragement to those who would hasten the coming of the day when each man's good shall be all men's aim; an Americanism that means hope to those who would preserve the sacred fire of brotherhood now in danger of being extinguished in the sanguinary floods across the sea; an Americanism based upon service for the common good and equality of opportunity for all.

Until recently this place, which should be an object lesson to coming generations and revered by every American, was unnoticed and abandoned. Inspired by the idea that a due regard for the apostle of human liberty, whose life began on this spot, demanded the preservation of his birthplace, a few patriotic men, headed by Robert J. Collier and Richard Lloyd Jones, organized the Lincoln Farm Association, to purchase the property and to erect upon it a suitable memorial to the life that typifies above all others the wonderful possibilities in the American Republic. The movement met with a ready support from every section of the Nation. Most of the contributions came from the plain people, whom Lincoln loved so well. The South, as well as the North, responded generously. In honoring the memory of Lincoln there is neither North, nor South, nor East, nor West; there is one heart in all, and that the heart of loyal America.

This majestic memorial we to-day formally turn over to the United States Government is, therefore, not only a memory of Lincoln but it is testimony given in blocks of marble that the fires of fraternal hatred kindled by the fierce conflict of half a century ago are dead, and from the ashes have arisen a pure patriotism for a common country and a sincere devotion to a common flag. In dedicating this memorial as the property of the American people, let us likewise consecrate ourselves in our day and generation to maintain the Americanism of Lincoln inviolate and from this occasion and these surroundings take increased devotion for all that Americanism means. The Americanism of Lincoln represents a patriotism that abides not alone amid the roar of cannon and the din and clash of arms but in the simple duties of life as well—a patriotism that would uplift mankind, not through the bayonet or bullet but by inculcating into the minds of men those ideals that translate the heartbeats of humanity into action. When men shall learn to serve as faithfully in peace as in war, when men shall be as willing to sacrifice a little for the common good in everyday life as they are to give the last full measure of devotion on the battle field, then the ideals of Lincoln will be realized and there will be peace on earth and good will in the hearts of the children of men.

So we give to the American people, those living to-day and the Americans that are yet to be, this hallowed ground where Lincoln was born, and this mausoleum, which enshrines as a priceless heritage the cabin in which Lincoln first saw the light. With these gifts may there go also to Americans throughout the flight of time down the centuries the lessons of Lincoln's life and the ideals which he taught to make men happy, to make men free, and to ennoble all mankind.

—

EXCERPTS FROM THE ADDRESS OF HON. JOHN SHARP WILLIAMS ON THE OCCASION OF THE PRESENTATION BY THE LINCOLN FARM ASSOCIATION OF THE LINCOLN FARM TO THE GOVERNMENT OF THE UNITED STATES, HODGENVILLE, KY., SEPTEMBER 4, 1916.

LINCOLN NOT FIRST AMERICAN, BUT PROBABLY GREATEST, SAYS WILLIAMS.

Mr. President, ladies, and gentlemen, the presentation and acceptance of this generous gift, which is really made to the Nation and its people of the United States, whose servants we all are—the President being chief only—is fraught not only with memories but with meanings too many and too various for one man's expression.

Abraham Lincoln was born in yonder little log cabin. He was not the first nor the only one of our great men to be thus humbly born. He sprang from that poorer class of southern white people whence sprang also Patrick Henry, Henry Clay, Andrew Jackson, and so many others whose names illustrate on the pages of our history the fact that those of humblest origin in a free democracy of equal opportunities can, and often do, reach the very highest station.

Lincoln was not "the first American," as has been said of him. There were preceding him, even in the presidential chair, others who were not colonials of any European people, but thoroughly and altogether American—typical Americans, each in his own way.
